

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

IN issuing the last volume of the DICTIONARY OF THE BIBLE, the Editor desires to record his sense of the goodness of God in enabling him to carry it through to the end, and to beseech His blessing on the use of it, that His Name may be glorified. He desires also very heartily to thank all those who have been associated with him in its production. He thanks the Publishers for their confidence at the beginning, for the liberty they have left him, and for the perfect courtesy of all their intercourse with him. He thanks the Printers also, Messrs. MORRISON & GIBB, and their employees, for their skilful workmanship and their patient personal interest. And he thanks all the Authors. Chosen because they were believed to be able to give the best account of the subjects entrusted to them, they have done their work in such a way as to vindicate their choice; while the relations between them and the Editor have been most agreeable throughout. He thanks them all, but especially those with whom he has been most closely associated in the oversight of the work—Dr. JOHN A. SELBIE, Dr. S. R. DRIVER, Dr. H. B. SWETE, and Dr. W. SANDAY. There is another, Dr. A. B. DAVIDSON, but he has passed beyond the voice of earthly gratitude.

* * While this volume completes the DICTIONARY as announced, an Extra Volume is in preparation, to contain Indexes and certain subsidiary articles of importance.

LIST OF ABBREVIATIONS

I. GENERAL

Alex. = Alexandrian.
 Apoc. = Apocalypse.
 Apocr. = Apocrypha.
 Aq. = Aquila.
 Arab. = Arabic.
 Aram. = Aramaic.
 Assy. = Assyrian.
 Bab. = Babylonian.
 c. = *circa*, about.
 Can. = Canaanite.
 cf. = compare.
 ct. = contrast.
 D = Deuteronomist.
 E = Elohist.
 edd. = editions or editors.
 Egyp. = Egyptian.
 Eng. = English.
 Eth. = Ethiopic.
 f. = and following verse or page; as Ac 10²⁴.
 ff. = and following verses or pages; as Mt 11^{28ff}.
 Gr. = Greek.
 H = Law of Holiness.
 Heb. = Hebrew.
 Hel. = Hellenistic.
 Hex. = Hexateuch.
 Isr. = Israelite.
 J = Jahwist.
 J' = Jehovah.
 Jerus. = Jerusalem.
 Jos. = Josephus.

LXX = Septuagint.
 MSS = Manuscripts.
 MT = Massoretic Text.
 n. = note.
 NT = New Testament.
 Onk. = Onkelos.
 OT = Old Testament.
 P = Priestly Narrative.
 Pal. = Palestine, Palestinian.
 Pent. = Pentateuch.
 Pers. = Persian.
 Phil. = Philistine.
 Phoen. = Phœnician.
 Pr. Bk. = Prayer Book.
 R = Redactor.
 Rom. = Roman.
 Sam. = Samaritan.
 Sem. = Semitic.
 Sept. = Septuagint.
 Sin. = Sinaitic.
 Symm. = Symmachus.
 Syr. = Syriac.
 Talm. = Talmud.
 Targ. = Targum.
 Theod. = Theodotion.
 TR = Textus Receptus.
 tr. = translate or translation.
 VSS = Versions.
 Vulg. = Vulgate.
 WH = Westcott and Hort's text.

II. BOOKS OF THE BIBLE

Old Testament.

Gn = Genesis.	Ca = Canticles.
Ex = Exodus.	Is = Isaiah.
Lv = Leviticus.	Jer = Jeremiah.
Nu = Numbers.	La = Lamentations.
Dt = Deuteronomy.	Ezk = Ezekiel.
Jos = Joshua.	Dn = Daniel.
Jg = Judges.	Hos = Hosea.
Ru = Ruth.	Jl = Joel.
1 S, 2 S = 1 and 2 Samuel.	Am = Amos.
1 K, 2 K = 1 and 2 Kings.	Ob = Obadiah.
1 Ch, 2 Ch = 1 and 2 Chronicles.	Jon = Jonah.
Ezr = Ezra.	Mic = Micah.
Neh = Nehemiah.	Nah = Nahum.
Est = Esther.	Hab = Habakkuk.
Job.	Zeph = Zephaniah.
Ps = Psalms.	Hag = Haggai.
Pr = Proverbs.	Zec = Zechariah.
Ec = Ecclesiastes.	Mal = Malachi.

Apocrypha.

1 Es, 2 Es = 1 and 2 Esdras.	To = Tobit.
	Jth = Judith.

Ad. Est = Additions to Esther.	Sus = Susanna.
Wis = Wisdom.	Bel = Bel and the Dragon.
Sir = Sirach or Ecclesiasticus.	Pr. Man = Prayer of Manasses.
Bar = Baruch.	1 Mac, 2 Mac = 1 and 2 Maccabees.
Three = Song of the Three Children.	

New Testament.

Mt = Matthew.	1 Th, 2 Th = 1 and 2 Thessalonians.
Mk = Mark.	1 Ti, 2 Ti = 1 and 2 Timothy.
Lk = Luke.	Tit = Titus.
Jn = John.	Philem = Philemon.
Ac = Acts.	He = Hebrews.
Ro = Romans.	Ja = James.
1 Co, 2 Co = 1 and 2 Corinthians.	1 P, 2 P = 1 and 2 Peter.
Gal = Galatians.	1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Eph = Ephesians.	Jude.
Ph = Philippians.	Rev = Revelation.
Col = Colossians.	

III. ENGLISH VERSIONS

Wyc. = Wyclif's Bible (NT c. 1380, OT c. 1382,
Purvey's Revision c. 1388).
Tind. = Tindale's NT 1526 and 1534, Pent. 1530.
Cov. = Coverdale's Bible 1535.
Matt. or Rog. = Matthew's (i.e. prob. Rogers')
Bible 1537.
Cran. or Great = Cranmer's 'Great' Bible 1539.
Tav. = Taverner's Bible 1539.
Gen. = Geneva NT 1557, Bible 1560.

Bish. = Bishops' Bible 1568.
Tom. = Tomson's NT 1576.
Rhem. = Rhemish NT 1582.
Dou. = Douay OT 1609.
AV = Authorized Version 1611.
AVm = Authorized Version margin.
RV = Revised Version NT 1881, OT 1885.
Rvm = Revised Version margin.
EV = Auth. and Rev. Versions.

IV. FOR THE LITERATURE

AHT = Ancient Hebrew Tradition.
AJSL = American Journal of Sem. Lang. and
Literature.
AJTh = American Journal of Theology.
AT = Altes Testament.
BL = Bampton Lecture.
BM = British Museum.
BRP = Biblical Researches in Palestine.
CIG = Corpus Inscriptionum Græcarum.
CIL = Corpus Inscriptionum Latinarum.
CIS = Corpus Inscriptionum Semiticarum.
COT = Cuneiform Inscriptions and the OT.
DB = Dictionary of the Bible.
EHH = Early History of the Hebrews.
GAP = Geographie des alten Palästina.
GGA = Göttingische Gelehrte Anzeigen.
GGN = Nachrichten der königl. Gesellschaft der
Wissenschaften zu Göttingen.
GJV = Geschichte des Jüdischen Volkes.
GVI = Geschichte des Volkes Israel.
HCM = Higher Criticism and the Monuments.
HE = Historia Ecclesiastica.
HGHL = Historical Geog. of Holy Land.
HI = History of Israel.
HJP = History of the Jewish People.
HPM = History, Prophecy, and the Monuments.
HPN = Hebrew Proper Names.
IJG = Israelitische und Jüdische Geschichte.
JBL = Journal of Biblical Literature.
JDTh = Jahrbücher für deutsche Theologie.
JQR = Jewish Quarterly Review.
JRAS = Journal of the Royal Asiatic Society.
JRL = Jewish Religious Life after the Exile.
JThSt = Journal of Theological Studies.
KAT = Die Keilinschriften und das Alte Test.
KGF = Keilinschriften u. Geschichtsforschung.
KIB = Keilinschriftliche Bibliothek.
LCBI = Literarisches Centralblatt.
LOT = Introd. to the Literature of the Old Test.

NHWB = Neuhebräisches Wörterbuch.
NTZG = Neutestamentliche Zeitgeschichte.
ON = Otium Norvicense.
OP = Origin of the Psalter.
OTJC = The Old Test. in the Jewish Church.
PB = Polychrome Bible.
PEF = Palestine Exploration Fund.
PEFSt = Quarterly Statement of the same.
PSBA = Proceedings of Soc. of Bibl. Archæology.
PRE = Real-Encyclopädie für protest. Theologie
und Kirche.
QPB = Queen's Printers' Bible.
RB = Revue Biblique.
REJ = Revue des Études Juives.
RP = Records of the Past.
RS = Religion of the Semites.
SBOT = Sacred Books of Old Test.
SK = Studien und Kritiken.
SP = Sinai and Palestine.
SWP = Memoirs of the Survey of W. Palestine.
ThL or ThLZ = Theol. Literaturzeitung.
ThT = Theol. Tijdschrift.
TS = Texts and Studies.
TSBA = Transactions of Soc. of Bibl. Archæology.
TU = Texte und Untersuchungen.
WAI = Western Asiatic Inscriptions.
WZKM = Wiener Zeitschrift für Kunde des
Morgenlandes.
ZA = Zeitschrift für Assyriologie.
ZAW or ZATW = Zeitschrift für die Alttest.
Wissenschaft.
ZDMG = Zeitschrift der Deutschen Morgen-
ländischen Gesellschaft.
ZDPV = Zeitschrift des Deutschen Palästina-
Vereins.
ZKSF = Zeitschrift für Keilschriftforschung.
ZKW = Zeitschrift für kirchliche Wissenschaft.
ZNTW = Zeitschrift für die Neutest. Wissen-
schaft.

A small superior number designates the particular edition of the work referred to, as KAT³, LOT⁴.

CANAAN AS DIVIDED AMONG THE TWELVE TRIBES . . . facing page 1

AUTHORS OF ARTICLES IN VOL. IV

- ISRAEL ABRAHAMS, M.A., Editor of the *Jewish Quarterly Review*, and Senior Tutor of the Jews' College, London.
- Rev. ALEXANDER ADAMSON, M.A., B.D., Dundee.
- Rev. WALTER F. ADENEY, M.A., D.D., Professor of New Testament Exegesis in New College, London.
- Ven. A. S. AGLEN, M.A., D.D., Archdeacon of St. Andrews.
- W. BACHER, Ph.D., Professor in the Landes-Rabbinerschule, Budapest.
- Rev. JOHN S. BANKS, Professor of Systematic Theology in the Headingley College, Leeds.
- Rev. W. EMERY BARNES, M.A., D.D., Fellow of Peterhouse, and Hulsean Professor of Divinity, Cambridge.
- JAMES VERNON BARTLET, M.A., Professor of Church History, Mansfield College, Oxford.
- GRAF WILHELM VON BAUDISSIN, Professor of Theology in the University of Berlin.
- Rev. LLEWELLYN J. M. BEBB, M.A., Principal of St. David's College, Lampeter; formerly Fellow and Tutor of Brasenose College, Oxford.
- Rev. WILLIS JUDSON BEECHER, D.D., Professor of Hebrew Language and Literature in Auburn Theological Seminary, New York.
- P. V. M. BENECKE, M.A., Fellow and Tutor of Magdalen College, Oxford.
- Rev. WILLIAM HENRY BENNETT, M.A., Litt.D., D.D., Professor of Old Testament Exegesis in Hackney and New Colleges, London; sometime Fellow of St. John's College, Cambridge.
- Rev. EDWARD RUSSELL BERNARD, M.A., Chancellor and Canon of Salisbury Cathedral; formerly Fellow of Magdalen College, Oxford.
- Rev. JOHN HENRY BERNARD, D.D., Fellow of Trinity College, and Archbishop King's Lecturer in Divinity in the University of Dublin.
- FREDERICK J. BLISS, B.A., Ph.D., Director of the Palestine Exploration Fund in Jerusalem.
- Rev. W. ADAMS BROWN, M.A., Ph.D., Professor of Systematic Theology in Union Theological Seminary, New York.
- K. BUDDE, Ph.D., D.D., Professor of Theology in the University of Marburg.
- Rev. WILLIAM CARSLAW, M.A., M.D., of the Lebanon Schools, Beyrout, Syria.
- Rev. ARTHUR THOMAS CHAPMAN, M.A., Fellow, Tutor, and Hebrew Lecturer, Emmanuel College, Cambridge.
- Rev. ROBERT HENRY CHARLES, D.D., Professor of Biblical Greek in the University of Dublin.
- Col. CLAUDE REIGNIER CONDER, R.E., D.C.L., LL.D., M.R.A.S.
- Rev. G. A. COOKE, M.A., formerly Fellow of Magdalen College, Oxford.
- Rev. HENRY COWAN, M.A., D.D., Professor of Church History in the University of Aberdeen.
- The late Rev. A. B. DAVIDSON, D.D., LL.D., Professor of Hebrew and Oriental Languages in New College, Edinburgh.
- Rev. T. WITTON DAVIES, B.A., Ph.D., M.R.A.S., Professor of Hebrew and Old Testament Literature in the Baptist College, Bangor, and Lecturer in Semitic Languages in University College, Bangor.
- Rev. W. T. DAVISON, M.A., D.D., Professor of Systematic Theology in the Handsworth Theological College, Birmingham.
- Rev. JAMES DENNEY, M.A., D.D., Professor of Systematic Theology in the United Free Church College, Glasgow.
- The late Rev. W. P. DICKSON, D.D., LL.D., Professor of Divinity in the University of Glasgow.
- Rev. SAMUEL ROLLES DRIVER, D.D., Litt.D., Canon of Christ Church, and Regius Professor of Hebrew in the University of Oxford.
- Rev. DAVID EATON, M.A., D.D., Glasgow.
- Rev. WILLIAM EWING, M.A., Glasgow, formerly of Tiberias, Palestine.
- Rev. GEORGE FERRIES, M.A., D.D., Cluny, Aberdeenshire.
- Rev. ROBERT FLINT, D.D., LL.D., Professor of Divinity in the University of Edinburgh.
- Rev. ALFRED ERNEST GARVIE, M.A., B.D., Montrose.
- Rev. JOHN GIBB, M.A., D.D., Professor of New Testament Exegesis in Westminster College, Cambridge.
- G. BUCHANAN GRAY, M.A., Professor of Hebrew in Mansfield College, Oxford.
- Rev. ALEXANDER GRIEVE, M.A., Ph.D., Forfar.
- FRANCIS LLEWELLYN GRIFFITH, M.A., F.S.A., Superintendent of the Archaeological Survey of the Egypt Exploration Fund.

- Rev. HENRY MELVILL GWATKIN, M.A., D.D., Fellow of Emmanuel College, and Dixie Professor of Ecclesiastical History in the University of Cambridge.
- Rev. G. HARFORD-BATTERSBY, M.A., Balliol College, Oxford; Vicar of Mossley Hill, Liverpool.
- J. RENDEL HARRIS, M.A., Litt.D., Fellow and Librarian of Clare College, Cambridge.
- Rev. ARTHUR CAYLEY HEADLAM, M.A., B.D., Rector of Welwyn, Herts; formerly Fellow of All Souls' College, Oxford.
- EDWARD HULL, M.A., LL.D., F.R.S., F.R.G.S., late Director of the Geological Survey of Ireland, and Professor of Geology in the Royal College of Science, Dublin.
- MONTAGUE RHODES JAMES, M.A., Litt.D., Fellow and Dean of King's College, and Director of the Fitzwilliam Museum, Cambridge.
- Rev. ARCHIBALD R. S. KENNEDY, M.A., D.D., Professor of Hebrew and Semitic Languages in the University of Edinburgh.
- Rev. H. A. A. KENNEDY, M.A., D.Sc., Callander.
- FREDERIC G. KENYON, M.A., D.Litt., Ph.D., of the Department of Manuscripts in the British Museum, late Fellow of Magdalen College, Oxford.
- EDUARD KÖNIG, Ph.D., D.D., Professor of Old Testament Exegesis in the University of Bonn.
- Rev. JOHN LAIDLAW, M.A., D.D., Professor of Systematic Theology in the New College, Edinburgh.
- Rev. WALTER LOCK, M.A., D.D., Warden of Keble College, and Dean Ireland's Professor of New Testament Exegesis in the University of Oxford.
- ALEXANDER MACALISTER, LL.D., M.D., F.R.S., F.S.A., Fellow of St. John's College, and Professor of Anatomy in the University of Cambridge.
- Rev. GEORGE M. MACKIE, M.A., D.D., Chaplain to the Church of Scotland at Beyrout, Syria.
- Rev. J. A. M'CLYMONT, M.A., D.D., Aberdeen.
- Rev. HUGH MACMILLAN, M.A., D.D., LL.D., Greenock.
- The late Rev. JOHN MACPHERSON, M.A., Edinburgh.
- Rev. D. S. MARGOLIOUTH, M.A., Fellow of New College, and Laudian Professor of Arabic in the University of Oxford.
- Rev. JOHN TURNER MARSHALL, M.A., Principal of the Baptist College, Manchester.
- Rev. ARTHUR JAMES MASON, M.A., D.D., Lady Margaret's Reader in Divinity in the University of Cambridge, and Canon of Canterbury.
- JOHN MASSIE, M.A., Yates Professor of New Testament Exegesis in Mansfield College, Oxford; formerly Scholar of St. John's College, Cambridge.
- Rev. SELAH MERRILL, D.D., LL.D., U.S. Consul at Jerusalem.
- Rev. GEORGE MILLIGAN, M.A., B.D., Caputh, Perthshire.
- Rev. WILLIAM MORGAN, M.A., Tarbolton.
- Rev. R. WADDY MOSS, Professor of Classics in the Didsbury College, Manchester.
- Rev. JAMES H. MOULTON, M.A., D.Litt., Senior Classical Master in the Leys School, Cambridge.
- W. MAX MÜLLER, Ph.D., LL.D., Professor of Old Testament Literature in the Reformed Episcopal Church Seminary, Philadelphia.
- EBERHARD NESTLE, Ph.D., D.D., Professor at Maulbronn.
- Rev. THOMAS NICOL, M.A., D.D., Professor of Divinity and Biblical Criticism in the University of Aberdeen.
- W. NOWACK, Ph.D., Professor of Theology in the University of Strassburg.
- Rev. WILLIAM P. PATERSON, M.A., D.D., Professor of Systematic Theology in the University of Aberdeen.
- Rev. JAMES PATRICK, M.A., B.D., B.Sc., Examiner for Degrees in Divinity in the University of St. Andrews.
- Rev. JOHN PATRICK, M.A., D.D., Professor of Biblical Criticism and Biblical Antiquities in the University of Edinburgh.
- ARTHUR S. PEAKE, M.A., Professor in the Primitive Methodist College, Manchester, and Lecturer in Lancashire Independent College; sometime Fellow of Merton and Lecturer in Mansfield College, Oxford.
- WILLIAM FLINDERS PETRIE, M.A., D.C.L., Professor of Egyptology in University College, London.
- THEOPHILUS GOLDRIDGE PINCHES, LL.D., M.R.A.S., London.
- Rev. ALFRED PLUMMER, M.A., D.D., Master of University College, Durham.
- Rev. FRANK CHAMBERLIN PORTER, M.A., Ph.D., D.D., Professor of Biblical Theology in the Divinity School of Yale University, New Haven.
- Rev. HARVEY PORTER, B.A., Ph.D., Professor in the American College, Beyrout, Syria.
- Rev. GEORGE POST, M.D., F.L.S., Professor in the American College, Beyrout, Syria.
- IRA MAURICE PRICE, M.A., B.D., Ph.D., Professor of Semitic Languages and Literatures in the University of Chicago.
- Rev. CYRIL HENRY PRICHARD, M.A., late Classical Scholar of Magdalene College, Cambridge, and Lecturer at St. Olave's, Southwark.
- The late Rev. GEORGE T. PURVES, D.D., LL.D., Professor of New Testament Literature and Exegesis in Princeton Theological Seminary, New Jersey.
- WILLIAM M. RAMSAY, D.C.L., LL.D., Litt.D., Professor of Humanity in the University of Aberdeen, Honorary Fellow of Exeter and Lincoln Colleges, Oxford.
- Rev. HENRY A. REDPATH, M.A., Rector of St. Dunstan's in the East, London.
- Rev. FREDERICK RELTON, A.K.C., Vicar of St. Andrew's, Stoke Newington, London.
- Rev. ARCHIBALD ROBERTSON, M.A., D.D., LL.D., Principal of King's College, London, late Fellow of Trinity College, Oxford.
- J. W. ROTHSTEIN, Ph.D., D.D., Professor of Theology in the University of Halle.

- Rev. STEWART DINGWALL FORDYCE SALMOND, M.A., D.D., F.E.I.S., Principal and Professor of Systematic Theology in the United Free Church College, Aberdeen.
- Rev. WILLIAM SANDAY, M.A., D.D., LL.D., Lady Margaret Professor of Divinity, and Canon of Christ Church, Oxford.
- Rev. ARCHIBALD HENRY SAYCE, M.A., LL.D., Fellow of Queen's College, and Professor of Assyriology in the University of Oxford.
- Rev. JOHN A. SELBIE, M.A., D.D., Maryculter, Kincardineshire.
- C. SIEGFRIED, Ph.D., Geh. Kirchenrath and Professor of Theology in the University of Jena.
- Rev. JOHN SKINNER, M.A., D.D., Professor of Hebrew and Old Testament Exegesis in Westminster College, Cambridge.
- Rev. GEORGE ADAM SMITH, M.A., D.D., LL.D., Professor of Hebrew in the United Free Church College, Glasgow.
- Rev. VINCENT HENRY STANTON, M.A., D.D., Fellow of Trinity College, and Ely Professor of Divinity in the University of Cambridge.
- JOHN F. STENNING, M.A., Fellow and Lecturer in Hebrew and Theology, Wadham College, Oxford.
- Rev. GEORGE BARKER STEVENS, Ph.D., D.D., Dwight Professor of Systematic Theology in Yale University.
- Rev. W. B. STEVENSON, M.A., B.D., Professor of Hebrew and Old Testament Introduction in the Theological College, Bala.
- ST. GEORGE STOCK, M.A., Pembroke College, Oxford.
- Rev. JAMES STRACHAN, M.A., St. Fergus.
- HERMANN L. STRACK, Ph.D., D.D., Professor of Theology in the University of Berlin.
- Rev. JOHN TAYLOR, M.A., Litt.D., Vicar of Winchcombe.
- HENRY ST. JOHN THACKERAY, M.A., Examiner in the Board of Education, formerly Divinity Lecturer in Selwyn College, Cambridge.
- Rev. THOMAS WALKER, M.A., Professor of Hebrew in the Assembly's College, Belfast.
- Rev. B. B. WARFIELD, M.A., D.D., Professor of Theology in Princeton University.
- Lieut.-General Sir CHARLES WARREN, G.C.M.G., K.C.B., F.R.S., Royal Engineers.
- Rev. ADAM C. WELCH, M.A., B.D., Glasgow.
- The late Rev. HENRY ALCOCK WHITE, M.A., Tutor in the University of Durham, and formerly Fellow of New College, Oxford.
- Rev. H. J. WHITE, M.A., Fellow and Chaplain of Merton College, Oxford.
- Rev. NEWPORT J. D. WHITE, M.A., B.D., Librarian of Archbishop Marsh's Library, and Assistant Lecturer in Divinity and Hebrew in the University of Dublin.
- Rev. OWEN C. WHITEHOUSE, M.A., D.D., Principal and Professor of Biblical Exegesis and Theology in Cheshunt College.
- Rev. A. LUKYN WILLIAMS, M.A., Vicar of Guilden Morden and Examining Chaplain to the Bishop of Durham.
- Lieut.-General Sir CHARLES WILLIAM WILSON, R.E., K.C.B., K.C.M.G., D.C.L., LL.D., F.R.S.
- Rev. FRANCIS HENRY WOODS, M.A., B.D., Vicar of Chalfont St. Peter, and late Fellow and Theological Lecturer of St. John's College, Oxford.
- Rev. JOHN WORTABET, M.A., M.D., Beyrout, Syria.

DICTIONARY OF THE BIBLE

PLEROMA (πλήρωμα; Lat. *plenitudo*, *supplementum*, *pleroma*; AV and RV 'fulness').—A word of common Greek usage, which is raised to a semi-technical meaning in relation to God in certain books of the NT connected with Asia Minor (Ephesians, Colossians, John (prol.)). This meaning may have been given to it first by St. Paul; but his absolute use of it in Col 1¹⁹, without any explanation added, suggests that it was already in use among the false teachers against whom he is writing. Lightfoot conjectures that it had a Palestinian origin, representing the Hebrew מלא.

The word itself is a relative term, capable of many shades of meaning, according to the subject with which it is joined and the antithesis to which it is contrasted. It denotes the result of the action of the verb πληροῦν; but πληροῦν is either (a) to fill up an empty thing (e.g. Mt 13⁴⁰), or (b) to complete an incomplete thing (e.g. Mt 5¹⁷); and the verbal substantive in -μα may express either (1) the objective accusative after the verb, 'the thing filled or completed,' or (2) the cognate accusative, 'the state of fullness or completion, the fulfilment, the full amount,' resulting from the action of the verb (Ro 11¹² 13¹⁰ 15²⁹, 1 Co 10²⁶). It may emphasize totality in contrast to its constituent parts; or fullness in contrast to emptiness (κένωμα); or completeness in contrast to incompleteness or deficiency (ὑστερήματα Col 1²⁴, 2 Co 11², ἡττημα Ro 11¹²). A further ambiguity arises when it is joined with a genitive, which may be either subjective or objective, the fullness which one thing gives to another, or that which it receives from another.

In its semi-technical application it is applied primarily to the perfection of God, the fullness of His Being, 'the aggregate of the Divine attributes, virtues, energies'; this is used quite absolutely in Col 1¹⁹ (ἐν αὐτῷ εὐδόκησεν πᾶν τὸ πλήρωμα κατοικῆσαι), but further defined (1) as πᾶν τὸ πλήρωμα τῆς θεότητος, 'the whole completeness of the Divine nature,' in Col 2⁹, (2) as πᾶν τὸ πλήρωμα τοῦ θεοῦ, 'the whole (moral) perfection which is characteristic of God,' in Eph 3¹⁹. Secondly, this same πλήρωμα is transferred to Christ; it was embodied permanently in Him at the Incarnation (Col 1¹⁹); it still dwells permanently in His glorified Body, ἐν αὐτῷ κατοικεῖ σωματικῶς (Col 2⁹); it is τὸ πλήρωμα τοῦ χριστοῦ (Eph 4¹³), the complete, moral, and intellectual perfection to which Christians aspire and with which they are filled (Eph 4¹³, Col 2⁹ ἐστὲ ἐν αὐτῷ πεπληρωμένοι. Cf. Jn 1¹⁶ ἐκ τοῦ πληρώματος αὐτοῦ ἡμεῖς πάντες ἐλάβομεν, where πλήρωμα is the state of Him who is πλήρης χάριτος καὶ ἀληθείας, 1¹⁴, cf. Lk 2⁴⁰ πληρούμενον σοφίας). This indwelling emphasizes

the completeness with which the Son represents the Father; it is the fullness of life which makes Him the representative, without other intermediary agencies, and ruler of the whole universe; and it is the fullness of moral and intellectual perfection which is communicable through Him to man; it is consistent with a gradual growth of human faculties (Lk 2⁴⁰), therefore with the phrase ἐαυτὸν ἐκένωσεν of Ph 2⁷, which is perhaps intended as a deliberate contrast to it [KENOSIS]. One further application of the phrase is made in Eph 1², where it is used of the Church, τὸ πλήρωμα τοῦ τὰ πάντα ἐν πᾶσιν πληρουμένου. Here the genitive is perhaps subjective—the fullness of Christ, His full embodiment, that fullness which He supplies to the Church—emphasizing the thoroughness with which the Church is the receptacle of His powers and represents Him on earth. The analogy of the other uses of the word with the genitive of the person (Eph 3¹⁹ 4¹³), and the stress throughout these books on Christians being filled by Christ (Eph 3¹⁹ 4¹³ 5¹⁸, Col 1⁹ 2¹⁰ 4¹², Jn 1¹⁶ 3³⁴), favours this view. But the genitive may be objective, 'the complement of Christ,' that which completes Him, which fills up by its activities the work which His withdrawal to heaven would have left undone, as the body completes the head. The analogy of the body, the stress laid on the action of the Church (Eph 3¹⁰ 2²¹), St. Paul's language about himself in Col 1²⁴ (ἀνταναπληρῶ τὰ ὑστερήματα τῶν θλίψεων τοῦ χριστοῦ), support this, and it is impossible to decide between the two. The former view has been most common since the thorough examination of the word by Fritzsche (*Rom.* ii. pp. 469 ff.) and Lightfoot (*Col. ad loc.* and Additional Note), and is still taken by von Soden (*Hand-Comm. ad loc.*) and Macpherson (*Expositor*, 1890, pp. 462-472). But the latter view, which was that of Origen and Chrysostom, has been strongly advocated of late by Pfeiderer (*Paulinism*, ii. p. 172), T. K. Abbott (*International Critical Comm. ad loc.*), and most fully J. A. Robinson (*Expositor*, 1898, pp. 241-259).

Outside the NT the word occurs in Ignatius in a sense which is clearly influenced by the NT, and apparently in the meaning of the Divine fullness, as going forth and blessing and residing in the Church (Eph. Inscr. τῇ εὐλογημένῃ ἐν μεγάλῃ θεοῦ πατρὸς πληρώματι, and Trall. Inscr. ἦν καὶ ἀσπάζομαι ἐν τῷ πληρώματι, almost=ἐν Χριστῷ [but see Lightfoot, *ad loc.*]).

In Gnosticism the use becomes yet more stereotyped and technical, though its applications are still very variable. The Gnostic writers appeal to the use in the NT (e.g. Iren. i. iii. 4), and the word

retains from it the sense of totality in contrast to the constituent parts; but the chief associations of *πλήρωμα* in their systems are with Greek philosophy, and the main thought is that of a state of completeness in contrast to deficiency (*ὀστέρημα*, Iren. I. xvi. 3; Hippol. vi. 31), or of the fulness of real existence in contrast to the empty void and unreality of mere phenomena (*κένωμα*, Iren. I. iv. 1). Thus in Cerinthus it expressed the fulness of the Divine Life out of which the Divine Christ descended upon the man Jesus at his baptism, and into which He returned (Iren. I. xxvi. 1, III. xi. 1, xvi. 1). In the Valentinian system it stands in antithesis to the essential incomprehensible Godhead, as 'the circle of the Divine attributes,' the various means by which God reveals Himself: it is the totality of the thirty æons or emanations which proceed from God, but are separated alike from Him and from the material universe. It is at times almost localized, so that a thing is spoken of as 'within,' 'without,' 'above,' 'below' the Pleroma: more often it is the spirit-world, the archetypal ideal existing in the invisible heavens in contrast to the imperfect phenomenal manifestations of that ideal in the universe. Thus 'the whole Pleroma of the æons' contributes each its own excellence to the historic Jesus, and He appears on earth 'as the perfect beauty and star of the Pleroma' (*τελείωτος κάλλος καὶ ἄστρον τοῦ πληρώματος*, Iren. I. xi. 6). Again, each separate æon is called a *πλήρωμα* in contrast to its earthly imperfect counterpart, so that in this sense the plural can be used, *πληρώματα* (Iren. I. xiv. 2); and even each individual has his or her Pleroma or spiritual counterpart (*τὸ πλήρωμα αὐτοῦ* of the Samaritan woman,—Heracleon, *ap.* Origen, xiii. p. 205; *ap.* Stieren's *Irenæus*, p. 950). Similarly it was used by Ophite writers as equivalent to the full completeness of perfect knowledge (*Pistis Sophia*, p. 15). It thus expressed the various thoughts which we should express by the Godhead, the ideal, heaven; and it is probably owing to this ambiguity, as well as to its heretical associations, that the word dropped out of Christian theology. It is still used in its ordinary untechnical meaning, *e.g.* Theophylact (p. 530) speaks of the Trinity as *πλήρωμα τοῦ θεοῦ*; but no use so technical as that in Ignatius reappears.

For fuller details cf. Suicer's *Thesaurus*, s.v.; Lightfoot, *Col.* ('Colossian Heresy' and Additional Note); Smith's *Dict. Christ. Biogr.* s.v. 'Gnosticism,' 'Valentinus'; *Cambridge Texts and Studies*, i. 4, p. 105. W. LOCK.

PLOUGH, PLOUGHSHARE.—See AGRICULTURE in vol. i. p. 49.

PLUMBLINE, PLUMMET.—A line or cord with a heavy weight attached, used by masons when erecting a building, to ascertain if the walls are perpendicular. The plumbline used by the Syrian masons is a cord passing freely through a hole in the centre of a cylindrical piece of wood about 3 in. long; at one end of the cord is a hollow cone of copper filled with lead. The cord is fastened to a ring inserted into the centre of the base of the cone-shaped plummet, the diameter of the base being the same as the length of the cylinder of wood. One end of the piece of wood is applied to the face of the wall, and the plummet is allowed to descend slowly. If the rim of the base just touches the surface of the stones the wall is perpendicular. Several Heb. words are rendered plummet or plumbline. 1. *קֶן*, literally, a stone, probably showing that the original plummet was a suspended stone, Is 34¹¹. In Zec 4¹⁰ the expression *קֶן יִקְרֶה* (see Nowack, *ad loc.*), a stone of tin, a plummet, is used. 2. *זָהָב* Am 7⁷⁻⁸. The etymology

of this word is doubtful. There are similar words in cognate languages for 'lead,' 'tin' (cf. *Oxf. Heb. Lex.* s.v.). 3. *הַקֶּזֶז* in 2 K 21¹³, *הַקֶּזֶז* Is 28¹⁷, a weight. In all the Scripture references to 'plumbet' or 'plumb-line,' the term is used metaphorically, *e.g.* in Am 7⁸, where 'J' is to set a plummet in the very midst of His people (i.e. apply to it a crucial moral test), and whatever does not conform to its standard will be destroyed (Driver, *ad loc.*).

W. CARSLAW.

POCHERETH - HAZZEBAIM.—Amongst the 'children of Solomon's servants' who returned with Zerubbabel are mentioned the *כִּזְבִּי הַקֶּזֶז*, Ezr 2⁵⁷=Neh 7⁵⁰ (*כִּזְבִּי הַקֶּזֶז*). The LXX, misunderstanding the passage, divides into two proper names (in Ezr B *ἰολ Φασράθ*, *ἰολ Ἀσβεβεῖν*, A *Φακεράθ*, *Ἀσβεβεῖν*; in Neh B *ἰολ Φακαράθ*, *ἰολ Σαβαεῖν*, A . . . *Φαχαράθ* . . .). In 1 Es 5²⁴ the LXX has *ἰολ Φακαρέθ Σαβ(ε)λ(η)*. See PHACARETH. The Heb. *pochereth-hazzebaim* means 'hunter of gazelles.'

J. A. SELBIE.

POET.—Only Ac 17³⁵ 'As certain even of your own poets have said, For we are also his offspring.' By 'your own poets' (*οἱ καθ' ὑμᾶς* [WH marg. *ἡμᾶς* after B, 33 etc., Copt.] *ποιηταί*) Lightfoot thinks St. Paul meant poets belonging to the same school as his Stoic audience (*Dissertations on Apost. Age*, p. 288 f.). The words have been traced to Cleanthes' *Hymn to Zeus*, 5, where we read, 'For Thine offspring are we (*ἐκ σοῦ γὰρ γένος ἐσμέν*), therefore will I hymn Thy praises and sing Thy might forever. These all this universe which rolls about the earth obeys, wheresoever Thou dost guide it, and gladly owns Thy sway.' Than in this 'sublime hymn,' says Lightfoot (*Dissert.* p. 306), 'heathen devotion seldom or never soars higher.' Cleanthes belongs to the 4th cent. B.C. The exact words of St. Paul's quotation (*τοῦ γὰρ καὶ γένος ἐσμέν*) have been found in another Stoic's writings, the *Phænomena* of Aratus of Soli (of the 3rd cent. B.C.), and the form of the apostle's expression, 'some of your own poets,' may mean that he knew the words to be found in more than one poet.

In 1 Co 15³³ and Tit 1¹³ quotations have been discovered from other Greek poets, but they partake rather more of the character of common proverbs than the quotation from Cleanthes or Aratus. The first (*φείρουσαν ἥθη χρησθ' ὁμίλει κακαί*) has been traced to the *Thais* of Menander, a comic poet of the 3rd cent. B.C. The line is iambic trimeter, and the form *χρησθ'* of the TK is necessary for the scansion; *χρηστά* is, however, the form in almost all MSS, and adopted by almost all editors, so that the feeling for the metre of the line was not present when the apostle wrote. The second (*Κρήτες δὲ ψεύσται, κακὰ θηρία, γαστέρες ἀργαί*) is a complete hexameter verse, and comes from the *Περὶ χρησμῶν* of Epimenides, who lived about B.C. 600. It is also found in the *Hymn to Zeus* of Callimachus.

These fragments of Greek verse exhaust the poetry (if the word is to be used in its usual connotation) of the NT. It is extremely probable, however, that many of our Lord's sayings were cast in the forms of Hebrew poetry. See the articles by Briggs on 'The Wisdom of Jesus the Messiah' in the *Expos. Times*, vol. viii. (1897) pp. 393 ff., 452 ff., 492 ff., vol. ix. (1898) 69 ff., and less fully in his *Study of Holy Scripture* (1899), p. 373 ff.

POETRY (HEBREW).—

Introduction.

1. The Form of Heb. poetry.

A. Poems written in Prose.

B. Poems written in Verse.

1. The External evidence.

2. The rules for the form of Heb. poetry: (a) the line; (b) the verse; (c) parallelism; (d) metre: the *finah* and other kinds of verse; (e) the scale for the lines; (f) strophes; (g) subordinate matters of form.

ii. The Material of Heb. poetry.

A. The different species of poetry.

B. The employment of poetry.

1. Folk-poetry: (a) in family life; (b) in the life of the community; (c) in the religious life; (d) in the national life.
2. The poetry of the Prophets.
3. Artistic poetry.

Poems are works of art, whose substratum is supplied by human speech. Since they make their impression only through oral utterance, which from its very nature dies away, they require for their perpetuation—differing in this from the works of plastic art—the medium of writing. By the signs of the latter they can afterwards be reproduced with more or less fidelity, in proportion to the sufficiency of the system of writing and the state of preservation of the script in which it has reached us. Like every work of art, the poem has for its chief source the creative imagination of its author; in every instance a strong element of invention enters into its construction. Its aim is æsthetic enjoyment, it seeks to work upon the senses, the emotions, the imagination, of the hearer. An ulterior purpose, namely, to influence directly the will and conduct of those who happen to make acquaintance with the poem, is, strictly speaking, outside the scope of poetry, as of art in general. But although a discourse whose interest is judicial, political, or social, has certainly, in spite of all the rhetorical art expended upon it, no claim to be called a poem, yet the border-line is a shifting one. There are edifying, didactic, political compositions, which in spite of their underlying 'tendency' do not cease to be poems in the fullest sense, while the claim of others to this title may be disputed.

The aim of poetry may be reached without the employment of special, external, palpable means such as distinguish the language of poetry from that of daily use. There are poems free from the trammels of verse, composed in simple prose, nay, in recent times the employment of the prose form in poetry is more common than that of verse. This is the case above all with the drama, and in the next place with the epics in the form of the novel; it is only for lyric poetry that the use of the prose form constitutes a great exception.* In ancient times the employment of verse was the rule for every species of poetry; where the prose form prevails, it will generally be found to be in compositions which lie upon the dubious border-line referred to above.

The question *whether poetry has a place in the Holy Scriptures* could be raised as long as men held fast to the strict verbal inspiration doctrine. From that standpoint the admixture of so strongly human and subjective an element might appear to contradict the purely Divine and objective origin of the words of the Bible. Better knowledge now teaches us that no device of human language is to be declared incapable of employment in Scripture. Yet poetry will not be the rule there, for neither of the two collections of books that make up the Bible is arranged from the point of view of art, but from that of religious value; they are collections not of national *belles lettres* but of Sacred Writings. At the same time, however, the *Old Testament* embraces all that has come down to us of the literature of the people of Israel in its early days, so that for our knowledge of the poetry and the poetical art of the ancient Hebrews we have to turn solely to this collection of their Sacred Writings.

* Cf. e.g. Hardenberg (Novalis), *Hymnen an die Nacht*.

i. THE FORM OF HEBREW POETRY.—A. *POEMS WRITTEN IN PROSE*.—Prose-poems are not absent from the OT, yet the border-lines for their recognition are hard to draw. If all fiction could be called poetry, then the tale of the woman of Tekoa (2 S 14⁵⁻⁷) would have to be included in this category, and still more the story told by the prophet Nathan (2 S 12¹⁻⁴). But in both these narratives we have simply rhetorical artifices, both give themselves out in the first instance as bare statements of actual occurrences. It is otherwise with Jotham's fable (Jg 9^{8a}), which presents itself within the framework of his address as a didactic composition, and is to be placed on the same plane as the parables of Jesus in the New Testament. The Books of Jonah, Ruth, Esther, and the Daniel narratives in Dn 1-6, are regarded by modern OT science as products of Jewish novel-writing, of which further instances, outside the Canon, have come down to us in the Books of Judith, Tobit, 2 Maccabees, etc.* But their quality as poetry stands and falls with the verdict reached by criticism, for, the moment their contents are declared to be historical, they lose all claim to this title. In any case, it is to be observed that these prose-poems one and all belong to a late period; but, on the other hand, the prologue and the epilogue of the Book of Job, which in contradistinction from the speeches in chs. 3-41 are composed in prose, show that the date alone does not decide the procedure in this matter. The reason for this difference of form will have to be examined below (see pp. 9^b and 10^a).

B. *POEMS WRITTEN IN VERSE*.—1. *The External Evidence*.—Far more prominent are the poems composed in verse, and of these alone we mean to speak in what follows. That the ancient Hebrews possessed and consciously employed in poetry prescribed poetical forms constructed for that special purpose, may be proved with certainty from the OT itself. The evidence is found first of all in the peculiar expressions used to designate poetry, the poet and his activity (cf. especially the roots שָׁלַח and שָׁרַח), in the application of these peculiar terms to certain compositions (cf. the numerous introductions and superscriptions, such as Ex 15¹, Jg 5¹, Nu 21^{17, 27}), in the statement that certain passages were recited to the accompaniment of music, and sometimes of dancing, e.g. Ex 15²⁰, 1 S 18⁶; cf. also many of the titles of the Psalms. We are carried a point beyond this by the alphabetical poems, in which equal poetical units are clearly separated from one another through their initial letters being arranged so as to form the Heb. alphabet. Most important are Ps 111 and 112, in which each several line bears a new letter, and next to these are to be reckoned those poems in which, like Ps 25, 34, 145, Pr 31¹⁰⁻³¹, a letter is given to each verse. The Synagogue tradition (*Shabbath* 103b, *Sopherim*, ch. 12; cf. Strack, *Prolegom. crit. in Vet. Test. Heb.* p. 80) at least testifies to and enjoins the writing in distinct lines of the songs Ex 15, Dt 32, Jg 5, 2 S 22, no doubt because these are called 'songs' in the titles they bear. But this is to recognize expressly the poetical form of these passages.

2. *The rules for the form of Heb. poetry*.—a. *The line*.—Far more uncertain than the fact that the Hebrews possessed a form of composition specially devised for use in poetry is the question as to the rules of this form, or, in other words, as to the metrical system of the ancient Hebrews. On this subject there is no tradition worthy of the name, rather must the laws of Heb. metre be deduced from the poems themselves. Fortunately,

* Cf. C. A. Briggs (*General Introd. to Study of Holy Scripture*, New York, 1899, p. 341 ff.), who calls these books 'prose works of the imagination.'

there are two factors that from the first stand out as indubitably established. The first of these is the *line* (*stichos*), externally authenticated, as has just been said, by Pss 111 and 112, as well as by the circumstance that in the MSS some poems are written stichically, and latterly also by the newly discovered fragments of the Heb. Sirach, which are likewise written in *stichoi*. It is the fundamental rule of all metrical composition, the one indispensable condition, that the continuous flow of the discourse should be divided into short word-groups, which, as far as the sense is concerned, have a certain independence. It is only in highly developed forms of poetry that the independence of the lines, in this matter of the sense, is more or less superfluous. The limit for the length of these lines is one imposed by nature, namely, that each line should be capable of being pronounced in a single easy breath. Such lines detach themselves from one another with perfect clearness in all the poetical parts of the OT, and there cannot be a moment's doubt that it is not the logic of the discourse but an artificial design that has divided the flow of the language in this way. In Hebrew, especially, the end of the line uniformly coincides with a break in the sense, and even the accentuation of our texts is seldom wrong as to the correct division. It is possible to have poems which employ no other method as to their form than such a separation into the briefest units that give a complete sense, although these do not stand in an exact rhythmical relation to one another or mutually unite themselves into uniform groups. This is exemplified, for instance, in a number of Goethe's finest poems, such as *Der Gesang der Geister über den Wassern*, *Grenzen der Menschheit*, *Ganymed*, *Prometheus*, etc.

b. The verse.—As well established as the line is the second higher poetical unit, the *verse*. In Heb. poetry a plurality of lines, in by far the majority of instances two of these, regularly combine to form a verse. This unit is likewise witnessed to by tradition. The sign for the close of the verse (the double point כּוֹסֵף) is undoubtedly the earliest addition made to the consonantal text, and is handed down along with the latter, where accents, vowels, and diacritical points are wanting. The division by כּוֹסֵף is already witnessed to in the Mishna (*Megillah* iv. 4). The verse-division, to be sure, is not confined to the poetical sections of the OT, but is carried through everywhere. But it is a circumstance of extreme importance that in the poetical sections the verse-divider does not stand at the close of each *stichos*, but regularly (with extremely rare exceptions) includes several of these. And though it happens frequently that several metrical verses are combined in a single Massoretic verse, on the other hand it is one of the rarest occurrences to find the verse-divider wrongly separating *stichoi* of the same verse from one another.

c. Parallelism.—The connecting agency, however, which unites the verse-members so as to form the verse, was not clearly recognized and defined till last century. The merit of this belongs to Bishop Lowth in his epoch-making book, *De sacra pœsi Hebræorum*, which appeared in the same year (1753) as Astruc's *Conjectures*. There in his *Prælectio* xix., p. 237,* he says:—

'Poetica sententiarum compositio maximam partem constat in æqualitate, ac similitudine quadam, sive parallelismo, membrorum cujusque periodi, ut ita in duobus plerumque membris res rebus, verbis verba, quasi demensa et paria respondeant.'

From this passage came the term *parallelismus membrorum*, which has since then been generally

* Compare with this the more detailed discussion in the *Preliminary Dissertation* to Lowth's works on Isaiah, 1778 [German by Koppe, 1779 ff.].

employed. We have to do here not with a formal contrivance like rhyme, assonance, alliteration, regularly changing length of the lines (cf. the dactylic distich), but with a connexion by means of the sense, which finds its full expression only in parallelism, and, at the same time, in parallelism separates itself from what precedes and what follows. Lowth continues quite correctly—

'Quæ res multos quidem gradus habet, multam varietatem, ut alias accuratior et apertior, alias solutior et obscurior sit';

but by distinguishing three kinds of parallelism, *synonymous*, *antithetic*, and *synthetic*, as well as by the very name 'parallelism,' which was capable of being misunderstood, he contributed at the same time to encourage too narrow a conception of the phenomenon.* Nor is it any advantage to complete the scheme, as H. Ewald in particular has sought to do; all this has only a casual value as compared with the general principle established, that the individual *stichoi*, which themselves each form a unit of sense, combine in the verse to form a larger unit. The possible variety of relation between the *stichoi* is endless.

A wider background for this phenomenon has lately been gained by observing that the same rule holds good in the poetry of the ancient Babylonians and Assyrians, and, perhaps in a less developed form, also in that of the ancient Egyptians. Schrader † assumes that Israel took over this principle, along with much else, from Mesopotamia, and Briggs (*op. cit.* p. 368) also considers this extremely probable. Still the possibility remains that this poetical rule is the common heritage of a large group of the nations of antiquity.‡

It is radically wrong to see in the parallelism merely a rhetorical phenomenon, and to disregard it accordingly, as need may be, in conducting metrical investigations. In this way one overlooks the fact that the parallelism is founded on the previous separation of the *stichoi*. It is possible, of course, to take the sense-parallelism and apply it to a prose composition, at the same time dispensing with a uniform separation into lines, and in this way to weaken it down to a purely rhetorical form, but, when coupled with that separation, the parallelism assumes the character of a fixed device of art. The best proof of this is found in the circumstance that for nearly 2000 years men felt and recognized the Psalms and other poetical portions of the OT to be poems, without having any clear consciousness of the device employed to constitute them so. It is a specially happy providence that this device is so connected with the contents that it had practically to be handed down along with these.

* Still the distinguishing of three possibilities has a certain logical value. In the unpublished second part of the present writer's *Akademische Antrittsvorlesung*, 1873 (cf. *SK*, 1874, p. 764, Anm.), an attempt is made to explain the *parallelismus* by going back to the word כּוֹסֵף as a term for poetical discourse. If this Heb. word means originally 'comparison, likeness,' bipartition and parallelism find their ground in the nature of the case. The result of a comparison may be one or other of three kinds. It may disclose (1) equality or resemblance, e.g. Pr 10²⁶ 11¹⁶ 22³⁰, (2) inequality, unlikeness, or opposition, e.g. Pr 10¹⁻², (3) a more or less, a better or worse, etc., by which a movement, a progress is given, e.g. Pr 12⁹ 15¹⁶ 17¹⁰ 19¹, as also 11³¹ 15¹¹. There can be hardly any doubt that the parallel verse exhibits its greatest independence and purest development in the various apophthegms of Pr 10 ff., which all fall under this threefold scheme. The circumstance that, at least in their written form, these belong to the later products of Hebrew literature, is certainly no adequate objection to the view put forward in the above-cited lecture, that the fundamental rule for the form of Heb. poetry is borrowed from the apophthegm. Yet it is so hopeless a task to reach any probable pronouncement regarding these first beginnings that the present writer is no longer disposed to maintain that former view.

† His article in the *Jahrb. f. prot. Theol.* i. (1875) p. 121 ff., is still well worthy of study.

‡ Cf. W. Max Müller, *Die Liebespoesie der alten Ägypter*, 1899, p. 10, Anm. 1.

d. Metre: the *kinah* and other kinds of verse.

—From what has just been said, it is self-evident that the length of the lines is not a matter of indifference. These must be fashioned in a certain uniform relation to one another, in order to produce the impression of rhythmic units. The sure proof that the Heb. poet consciously fixed the length of the lines is found in the circumstance that for a special occasion that presented itself in the life of the people he uniformly chose a special length of line. This is established in the case of the *kinah*, the Hebrew lament for the dead, i.e. the songs which women as mourners (*muqqam* Jer 9¹⁶) sang at funerals in ancient Israel. These were uniformly composed in verses of two members, the length of the first of which stands to that of the second in the proportion of 3:2, giving rise to a peculiar limping rhythm, in which the second member as it were dies away and expires. These verses are very sharply distinguished from the others, in which equal length of verse-members in the same verse is the rule. For proof of the correctness of these observations the present writer's art. 'Das hebräische Klagelied' in *ZATW*, 1882, pp. 1–52, may still suffice, if it be read with care. It will not do either to unite the two unequal *stichoi* into a single 'long line,' or to pronounce it a matter of indifference whether the longer line comes first or last.* Equally established beyond all doubt is the original connexion of this kind of verse with the popular lament for the dead. When Briggs (*op. cit.* p. 381) says, 'there is no propriety in the name,' and, further, supposes that the name was given to it by the present writer 'because apparently he first noticed it in the Book of Lamentations,' the one remark is as mistaken as the other. The second of the two merely proves that Briggs has not followed our argument, which is founded rather upon the fact that the prophets, whenever they introduce the mourning women speaking in person (Jer 9¹⁶, 20 38²²),† or when they themselves in their symbolical actions assume the rôle of the mourning women (Am 5¹, Ezk 19, etc.), uniformly choose this measure.‡ The objection that David does not employ it in his lament for Saul and Jonathan (2 S 1⁷⁷) can be urged only by one who holds that David meant to take the place of the mourning women at the obsequies, or to attach himself to their lamentations. And when Grimme (*loc. cit.* p. 549) suggests that the earliest employment of this measure should rather be sought for in the oracles of the priests, not only must we first wait for proof that the ancient oracles were composed in it,§ but must ask, further, which was the earlier in Israel, the funeral or the oracle, and whether it is likely that this form of verse was originally learned by the mourning women from the lips of the priests as they pronounced their oracles, to be afterwards

* Both these things have been done recently by Grimme (*ZDMG*, 1896, p. 545 f.). The examples he adduces in justification of his procedure appear to us to be altogether inadequate. Some of them are due to faulty scansion, in others a false length is given to the lines by a wrong division of the context, some are cited from a corrupt unemended text, others are to be explained in accordance with *ZATW* ii. p. 7, No. 3. No agreement seems possible between the present writer and Grimme, for not only would this necessitate the acceptance of the metrical system of the latter, but Grimme's 'fünf-hebiger Vers' is something quite different from the *kinah* verse.

† Cf. *ZATW*, 1883, p. 299 ff.

‡ Grimme (*ZDMG*, 1897, p. 693) declares that one might as well assert that the Greek hexameter is properly a mourning strain because it is in it that the women lament for the dead Hector. Yes, no doubt, were it not that the rest of the *Iliad* also is written in hexameters. In the same place he seeks to prove that Jer 9¹⁶ is wholly composed in the *kinah* measure, but his argument breaks down completely. Only 822–95 was originally an independent poem in this measure.

§ The examples which Grimme (*ZDMG*, 1897, p. 707 f.) brings forward and scans exactly (Gn 25²³ 27²⁸ 30¹) may be, according to his system, pentameters, but they have nothing whatever to do with the 'mourning verse' noted by the present writer.

copied from the women by the prophets. Woman is the most conservative of all social forces, and if even at the present day in an Arab nursery the *kinah* verse is still to be heard from the lips of the mother (as reported by Snouck-Hurgronje), there is nothing more probable than that in this a recollection has been preserved of a time when it was *par excellence* the verse of women.*

But now that it has been thus shown that in one particular case Hebrew poets consciously fixed the length of their verses and shaped it accordingly, we must conclude that in the case of other verses (or lines) as well they had a clear consciousness of one or more different lengths. And, as a matter of fact, examination shows that throughout wide tracts the individual lines have the usual length of the first member of the *kinah* verse; amongst others this is by far the predominating length all through the Book of Job. Elsewhere we may observe a longer line than the prevailing one, something like double the length of the shorter *kinah* line.

e. The scale for the lines.—But although one cannot avoid recognizing the facts just mentioned, it yet remains a very difficult task to determine the scale by which the Heb. poet measured the length of his lines. Here comes in the attempt to establish a metrical system for Heb. poetry, which during the last centuries has again and again attracted amateurs and scholars. The theories put forward as the basis of this system exhaust all the possibilities that are to hand, and at the present day almost all of them still stand unreconciled side by side. Some have counted, marked quantity, accented, or combined the first or the second of these processes with the last. Others have taken now the syllable and now the word as the fundamental unit. Others have sometimes been content to take the traditional pronunciation with the vocalization and accentuation, and to interpret metrically, and reduce to rule what lies before us in the Massoretic text. At other times, upon the ground of a fixed theory, all liberties with the text have been considered allowable, the accent has been shifted, the vocalization altered in whole or in part, and changes of the consonantal text proposed to a greater or less extent. Systems have been constructed, which leave much licence open, licence partly of a purely arbitrary kind and partly in strict subordination to the system; there have been other systems, again, which permit no deviation to the right hand or to the left, but yield metres carried through with the utmost rigour. Space forbids our going into all these manifold attempts, nor does the case require it.† We must confine ourselves to a brief description of the most important of the systems put forward at present, indicating at the same time the difficulties involved, and we shall finally draw a number of conclusions whose probability we believe it necessary to maintain.

J. Ley‡ operates with the *word-accent*. Every word that conveys an idea has a tone-syllable, certain words may have more than one. Every tone-syllable forms, along with the preceding unaccented syllables and the following syllable of the falling tone, one metre. The number of un-

* For the later history of the *kinah* measure in the OT cf. the present writer's art. 'The Folk-Song of Israel in the mouth of the Prophets' in *The New World*, 1893, p. 28 ff.

† Cf., for the earlier attempts, Saalschütz, *Von der Form der heb. Poesie*, 1825; Budde, 'Ueber vermeintliche metrische Formen in der heb. Poesie,' in *SK*, 1874; Briggs, *General Introduction*, p. 361 ff. All the modern systems are fully explained and criticised in Ed. König's *Stilistik, Rhetorik, Poetik*, etc., 1900.

‡ *Grundzüge des Rhythmus, des Vers- und Strophenbaues in der heb. Poesie*, 1875, *Leitfaden der Metrik der heb. Poesie*, 1887, and a great number of articles in various periodicals. Ley has constantly sought to perfect his system.

accented syllables makes no difference, so that a significant word of a single syllable may have the same metrical value as a whole series of syllables. The kind of verse is determined by the number of such metres, as pentameter, hexameter, octameter, decameter, and, further, assumes a much greater variety of forms through the possibility of divers cæsuras. The unit ('verse') for Ley (1887) is the verse formed by parallel lines; the cæsuras serve to divide the individual lines from one another. In this way it becomes possible to unite lines of very different lengths in the same verse. Ley accepts the traditional vocalization and accentuation, but has lately proposed a moderate number of changes of the text.

G. Bickell* applies the Syriac metre to the OT, holding the next to the last syllable, as in Syriac, to be as a rule the tonic one, and frequently altering the vowel-pronunciation. He counts the syllables of each line, and then makes rises and falls interchange with perfect regularity, in such a way that all lines with an even number of syllables are trochaic, and all with an odd number iambic. He everywhere ends by carrying through with the utmost exactness the metre assumed, and in order to reach this result proposes numerous alterations on the consonantal text, when the liberties taken with the vowel-pronunciation prove insufficient.

H. Grimme† bases his system upon a new theory of the accent and the vowels, which above all attributes to the vowel-signs a very different value from that assigned to them on the doctrine held in other quarters. He thus abides by the traditional written signs, but understands them quite differently. His metrical system is at once *quantitative and accentual*. It is quantitative, because, in accordance with an ingeniously carried out system of 'moræ,' he attributes to each syllable and to each syllabic beat a definite quantity, a definite number of 'moræ' (Lat. *mora*, 'lapse of time,' 'stop'). Every final principal-tone syllable of a 'Sprechakt' counts as a rise; whether other syllables are to be reckoned rises or not is determined by counting, according to fixed rules, the value of the 'moræ' of the syllables which fall within the same sphere. The number of rises determines the species of verse. Grimme recognizes verses (i.e. lines) with 2, 3, 4, 5 rises, but the verse with 2 rises occurs only as an accompanying metre to that with 4 and 5 rises. Grimme, like Ley, is relatively sparing in the matter of changes of the text.

All the above systems are worked out with extreme care, and in the opinion of their authors leave no unexplained residuum. The earliest two (those of Ley and Bickell) have each found many adherents, the third is yet too recent to have done so. Still, in the majority of instances, perhaps even without exception, the declarations of adherence given in by other writers have regarded merely to the acceptance of a metrical system and to principles, but not to the complete systems elaborated by their respective authors. Thus C. A. Briggs, the principal English-speaking champion of Hebrew metre, declares that his views 'correspond in the main with those of Ley.'‡ A similar attitude towards Duhm (i.e. Bickell) is assumed by Cheyne.§ As a matter of

* *Metres biblicæ regulæ exemplis illustratæ*, 1879, *Carmina veteris testamenti metricæ*, 1882, and a great number of later publications in which he introduces many changes and improvements on his earlier attempts at scansion.

§ In Haupt's *SBOT*, 'Isaiah,' p. 78.

fact, in these systems the leading possibilities are represented in such a way that everyone will feel himself more or less in sympathy with one view or another.

The circumstance that theories so diametrically opposed are able time after time to maintain themselves side by side, and that each of them can be held up as the infallibly correct one, is due to the peculiarly unfavourable conditions under which we have to work in this matter. (a) We have to do with a text originally written without vowels, and whose living sound was first marked at a very late period by additional points and lines. One is entitled to question the correctness of this vowel-pronunciation and accentuation, and there will be a disposition to draw the boundaries of this incorrectness narrower or wider according to the needs of a metrical system, without its being possible for an opponent to adduce conclusive evidence in favour of the contrary position. (b) It is equally certain that the consonantal text of the OT has suffered seriously, not only through mistakes but frequently also through conscious well-intentioned editing. Since the latter was always undertaken from religious points of view and would have little regard to the artistic form of the poems included in the collection of Sacred Writings, its employment must have been fraught with specially serious issues in the sphere with which we are dealing. Here again it is impossible to set objective limits to the changes which, upon the ground of an assumed metre, may be proposed with a view to the restoration of the original text. But, on the other hand, a metrical system which finds an easy application to the traditional text, including all the disfigurations it has undergone in the course of time, only shows by this that it is itself untenable. (c) Finally, all information about the music of the ancient Hebrews has been lost to us. But music was originally always combined with poetry, and protected the metrical form, just as, on the other hand, it helped what was defective.* This aid, too, we must entirely dispense with.

Under such conditions subjectivity finds here an open field without any sure boundaries. But this awakens the imagination and fires the courage. Besides, we have here to do with a subject akin to mathematics, a subject giving scope for playing with numbers. It is a fact perhaps too little observed, that all departments of study akin to this offer a special incentive to the ingenuity. We need only recall the subject of Chronology. One must have at some time gone deeply for himself into the question of Hebrew metre and triumphed over the temptation to lose oneself there, before he can understand the attraction wielded by such speculations. Since the present writer has had this experience he has no finished metrical system to offer, nor can he attach himself unreservedly to any of the others that have been proposed, although he cheerfully concedes that to each of the above-named champions of metre we are indebted for much stimulus and help. He can therefore merely indicate what he considers probable, and emphasize some points which appear to him worthy of attention.

(1) As regards the scale for the length of the lines, the vastly preponderating probability appears to belong to the theory of Ley, who counts the 'rises' without taking account of the 'falls.' In favour of this there is first of all the practice of vowelless writing, with irregular, in olden times doubtless very sparing, introduction of the vowel-letters, as contrasted with the regular employment

* Cf. W. Max Müller, *Liebespoesie der alten Ägypter*, p. 11: 'We, scanning Epigoni, forget only too often that the lost melody was the main thing.'

of these for the long vowels in Arabic. An exact measurement of a verse by syllables could hardly have been carried out with such a method of writing, and, conversely, if it came into use, it must in course of time have brought about a corresponding transformation of the writing. Further, great weight must be laid upon the circumstance that the lines (*stichoi*) in Hebrew are without exception separated from one another by the sense. Where a perfectly exact, rigorously self-asserting system of metre is used, in course of time the separating of units of sense into single lines comes to be regarded as superfluous, and the sense flows over from one line into another. We may compare, for instance, classical hexameters or ode-measure, and modern rhyming verse. The same view is favoured if we compare the Bab.-Assyrian and Egyptian poetical methods which, so far as one can yet see, are likewise to be brought under the above rule.* In general it may be added that a comparison ought to be made neither with extremely refined systems like the classical, nor decaying ones like the Syrian, but with primitive systems, even if these stand ethnologically far apart. The two-membered alliterative verse of the ancient Germans, which likewise takes account only of rises, appears to us to present the closest analogy, when, that is to say, it is looked at from the purely formal point of view, and without regard to the peculiar device by which the lines are connected.

(2) As regards the non-accenting or the accenting of words, much latitude must be conceded to the living language and to music, so that it would be very difficult to lay down strict and inviolable rules according to which this or that word is under certain circumstances to be non-accented or accented. In this way verse-members which appear to the eye very unequal may yet from the rhythmical point of view be counted of equal value.†

(3) We have, moreover, no certain guarantee for the intention to carry through with perfect uniformity the measure which in general rules in a poem. It is possible that it was considered legitimate to admit at times a line with four rises beside one with three, and conversely to introduce a whole verse with a different length of line, or finally to put a verse of three lines alongside of others with only two. On this whole subject cf. what W. Max Müller (*op. cit.* p. 11) has established for Egyptian, and Zimmern (*ZA* xii. 382) for Babylonian poetry.

(4) In general, one receives the impression that in the older poems greater freedom rules than in the later ones.‡ An unerringly regular parallelism, exact counting of the rises in verses of uniformly identical construction, all this is, nearly without

exception, the mark of later poems. The gap was, no doubt, filled up by music, which always accompanied poetry in early times, whereas in later times learned scansion with the pen in the hand and without regard to musical sound appears to have been the rule. But, on the other hand, one is entitled to make stricter demands on lyrical poetry in the narrowest sense, especially on dance-songs such as perhaps meet us in Canticles, than on longer didactic poems like the Book of Job, which can hardly at any time have been sung.

(5) The more decided and sharply cut any particular measure is, the more confidently may this be used as a medium for restoring the text. Thus, for instance, one may undertake the work of textual criticism on the *kinah*-measure with surer results than in the case of an evenly-flowing measure, because the peculiar limping form of the *kinah* must have demanded closer attention on the part of the poet. In any case, we should do well, in all textual criticism which deals with anything beyond superfluous expletives, to assure ourselves of strong support on other grounds besides metrical, and not repose too much confidence in emendations based on metrical grounds alone.

(6) Finally, it must always be kept steadily in view that the quality and the effect of poetry are still in by far the majority of instances secured for the texts by the parallelism, even where regularity in the measure is not carried out. Hence one must guard against assigning too great importance to metrical regularity.

f. *Strophes*.—We must deal more briefly with the use of *strophes*, i.e. larger formal units embracing several verses. The first to put forward a special strophe-theory was Fr. Köster in his article, 'Die Strophen oder der Parallelismus der Verse der heb. Poesie,' in *SK*, 1831, pp. 40-114. His example was widely followed, and, long before the stricter verse-theories were put forward, the division of the OT poems into strophes of lengths more or less equal or artistically interchanging was prosecuted as nothing short of a pastime. The results correspond exactly to those described above (pp. 6 and 7*) in the case of verse-theories. The variety of conclusions and the contradictions between them are perhaps even greater in this instance than in that. Here too in varying degrees may be seen mere strophic arrangement of the material received from tradition, alternating with a re-shaping of the text based upon a settled theory; great irregularity alternating with the strictest attention to rule; simplicity in the form obtained alternating with the extreme of artificiality; recognition of the parallel verse as the basis of the strophe alternating with acceptance of the line as the fundamental unit, reaching even to the denying and destruction of the parallel verse, etc. At present, in addition to the before-named leading upholders of different verse-theories, who also all put forward a special strophe-theory, the most prominent place is occupied by D. H. Müller, with a most ingeniously worked-out strophic system based upon three fundamental principles—the *responsio*, the *concatenatio*, and the *inclusio*.* In opposition to the line followed by him, a disposition at present prevails, following the lead of Bickell, Duhm, and others, to rest content, wherever possible, with the simplest strophic framework, consisting of four lines, equal to two verses each of two parallel members.

That Hebrew poetry has a strophic arrangement is generally taken for granted as self-evident. The

* For the former cf. H. Zimmern, *ZA* viii. 121 ff., x. 1 ff.; for the latter W. Max Müller, *Die Liebespoesie der alten Ägypter*, 1899, p. 10 ff. Whether, in this state of things, the actual relation of the falls to the rises can be reduced to summary formulae is another question. This will depend mainly upon the structure of the particular language. Thus Zimmern now (*ZA* xii. 382 ff.) thinks he can build the Bab. poetic rhythm practically upon the foundation of the *Ionius minor*. But when the result is to obtain in all six different feet admissible in the same verse, when from one to three falls are possible between two rises, when occasionally (cf. *Schöpfung*, iv. 4, p. 389) two more falls are elided in accordance with an assumed licence, there is certainly enough of field-room. Zimmern (p. 383) tells us that Sievers has succeeded in 'proving' the existence in Heb. poetry of a pronounced 'uniform rhythm.' Since his observations for Babylonian are based upon work carried on in common with Sievers, and he several times emphasizes the agreement between it and Hebrew, the above remark as to Zimmern's scheme will probably hold good also of Sievers' observations on Hebrew, with which the present writer has not yet made acquaintance.

† Cf. for instance in the Old Germ. poem *Heliand* v. 22 with v. 5 or v. 9, or the two halves of v. 30 or v. 209 with one another.

‡ W. Max Müller (*op. cit.* p. 10) says rightly: 'To me it is a very suspicious circumstance that the Song of Deborah and the latest Psalms still continue to be measured in one and the same fashion.'

* *Die Propheten in ihrer ursprünglichen Form*, 2 vols., Wien, 1896, *Strophenbau und Responsion*, Wien, 1898. Müller's system has been adopted and contributions made in support of it by F. Perles, *Zur heb. Strophik*, Wien, 1896, and J. K. Zenner, *Die Chorgesänge im Buche der Psalmen*, 2 parts, Freiburg i. B., 1896.

right to make this assumption is open, however, to serious question. It scarcely needs to be proved that there is such a thing as poetry that makes up verses but not strophes. But in this case the postulate of strophes is already satisfied beforehand. For the parallel verse is really a strophe, a higher unit produced by the union of smaller units, the lines. No metrical forms are shown by experience to resist more the reduction to a strophic formation than such double structures which have an inward completeness of their own. It may suffice to remind the reader of the two-membered alliterative verse of the Old German poetry and the dactylic distich of the Greeks and Romans. Upon this ground one may not, indeed, be able to dispute the possibility of strophes of a higher order, but in all probability these will form the exception, and parallel verses without any further union will be the rule.

Further, the strophe-theory finds, at all events, no support from *tradition*. In particular, the term *stichos* (appended 71 times in the Psalms and in Hab 3) cannot be urged in its favour. No significance attaches to the so-called *alphabetical poems*, a species of acrostics in which the letters *א-ת* are made to succeed one another at the opening of sections of equal length. These prove, as was emphasized above (p. 4*), the presence of *stichos* (in Pss 111, 112), but nothing more. If we can distinguish the single *stichos*, we can also count, according to the length designed for the poem, two (Pss 25, 34, 145, Pr 31¹⁰⁻³¹) or four (Ps 9 f. 37) *stichos*, and, if the *kinah*-measure is an established fact (cf. La 3, where each verse bears a letter, but each letter is repeated three times), we may include two (La 4) or three (La 1. 2) of these verses under a single letter. At most it may be said that the verse as a unit is witnessed to when in Ps 119 the same letter commences eight successive verses of two lines each. But this is yet a long way from the same thing as a strophe of eight verses or sixteen lines.*

It is generally left entirely out of sight that any new metrical unit must have a new formative medium. No one thinks of proving the existence of the latter. True, indeed, one framework of this kind is occasionally to be encountered in the OT, namely, the *recurring verse* or *refrain*. It must be admitted that this is in a high degree adapted to mark off strophes, especially when, as in Ps 42 f. (42¹¹ 43¹), at regular intervals it interrupts a sharply defined measure in the other verses by a different structure of verse. With always diminishing strength and importance the refrain occurs, further, in Pss 80. 46. 39. 57. 59. 49. 99. 56. 62. 67. But even if one were disposed to assume and carry through a fixed strophic structure in all these poems, upon the ground of the refrain, after all only about a dozen of the hundreds of Heb. poems would have been proved to be strophic, while the conclusion regarding the others must at best be to the effect that they are not constructed strophically.

As a special basis for the division into strophes, it is the custom simply to fall back everywhere upon the contents. A metric strophe is supposed to coincide with a section constituted by the sense, the supposition being that the poet divided his material into sections whose length, in virtue of certain rules, showed a rhythmical correspondence with one another. This assumption, however, is

* A device of a precisely similar kind has lately been shown to exist in the Bab.-Assyr. literature (ZA, x. 1ff.). Every 11th time the same syllable stands at the commencement of a two-membered verse, and the initial syllables of 25 sections each of 11 verses form a connected sentence. Yet Zimmern does not think of taking each of these long sections as a strophe, but concludes that every two verses make a strophe (of 4 lines), and that the 11th verse always stands by itself. It may be modestly asked whether each verse should not rather be taken by itself and the strophic structure given up.

all the harder, since the *contents* have already done their part in the formation of the parallel verse. Not only so, but this very parallelism gives to Heb. poetry in general the impression of aphorisms linked together, and renders it extremely difficult for the poet to exhibit a finely-articulated strictly progressive development of thought. Still the possibility of the nearest and easiest approach to this may be conceded, namely, that a single repetition of the parallelism, combining two verses of two lines, might fall rhythmically upon the ear, and that at the same time an idea seemed to exhaust itself in two parallel verses.* Deeper-reaching divisions of the sense could scarcely succeed in striking the ear as rhythmic units.

On the other hand, it is equally true that the theory of strophes is not to be refuted by postulates; the evidence of facts must decide. But any one who has convinced himself from the literature of the subject what finely artificial structures, with ever new forms, have been successively proved to underlie the same poems, and after being long forgotten have had their place taken by as artificial successors, will not waive his right to a radical scepticism on this subject. The charm of playing with numbers makes itself felt here almost more strongly than in the instance of verse; and the results, the more artistically these work themselves out, as in recent times those of Müller and Zenner, make their impression much more, being carefully printed, upon the eye, than upon the ear. The following sentences may serve for guidance and caution in this sphere of inquiry.†

(a) Under no conditions must the search for strophes lead to the abandonment of the certainly ascertained unit, the parallel verse, as has been frequently done (e.g. by Delitzsch, Merx, Diestel). Never must the end of a strophe break up a verse, and the verse, not the *stichos*, must remain the measure of the strophe.

(β) A great risk incurred by the search for strophes is this, that in their favour the *sense* of a poem might be divided wrongly and thus the poem receive a wrong interpretation. The endeavour should be to get first at the sense and its pauses, and then to ask whether strophe-like forms are the result.

(γ) We must not obstinately persist in carrying through rigorously a division which upon the whole is uniform, such as that into four lines. The possibility is not absolutely excluded that it was considered legitimate to interrupt this uniformity occasionally by verses of two or of six lines. This practice is assumed by Zimmern for Bab. poetry (cf. p. 7* footnote *), and, as another instance, it may be frequently noted in the Old Germ. poetry. Hence we must be cautious in the way of excising or of adding lines and verses, upon the ground of the strophic measure.

(δ) Conversely, a succession of sections of the most varied extent are not to be called strophes, by a misapplication of a term which denotes a rhythmic whole. This practice has been frequently followed, and is so still.‡

(ε) We must not demand strophes everywhere, but must, in the first place, make a distinction according to the different species of poetry. That dance-songs such as are found in Canticles should be strophic is not indeed necessary, but is extremely probable; that the Book of Job should ex-

* Cf. the Otfrid strophe of the Old High Germ. poetry, which consists of two rhyming couplets.

† Cf. earlier statements of the present writer's views in ZATW, 1882, p. 49 ff., and Actes du sixième Congrès international des Orientalistes, Leyden, 1884, p. 93 f.

‡ Thus C. A. Briggs (op. cit. p. 390) cites, as 'a fine specimen' of Old Egypt. strophe-formation, a poem whose twenty strophes exhibit the following number of lines: 12, 14, 8, 7, 13, 8, 9, 11, 9, 15, 14, 9, 10, 5, 11, 13, 10, 5, 10, 18. So we find strophes of from 5 to 18 lines ranged side by side!

hibit strophes throughout is the unlikeliest thing in the world. Likewise the age of the poem must be taken into account; strophes and a more regular structure of these will be looked for rather in later than in earlier times.

(5) Above all, we may recognize in a regular interchange of the length of lines an indication pointing to strophe-formation, because we have here a new formative method. Hence it is no fortuitous circumstance that the *kinah* verse which is composed of unequal members lends itself with special readiness to strophe-like forms such as meet us in La 1. 2. 4 and Ps 42 f. For here the equiponderance is restored by repetition of the unequal pairs.

Upon the whole, in this matter too little will do less harm than too much, and doubt will be more prudent than blind confidence.

g. Subordinate matters of form.—*Rhyme*, as well as the other things we have spoken of, has frequently been claimed as a medium employed in Heb. poetry.* The Heb. language has at its disposal a great number of sonorous endings and flexional additions used to denote a particular grammatical or logical relation. These would supply quite extraordinary facilities for the employment of terminal rhyme for poetical purposes. Yet, as is generally admitted, rhyme never became the prevailing medium of poetry. But it is self-evident that, where the same logical relations govern a series of lines, rhyme *must* come in with more or less regularity. As illustrations, Job 10¹⁸⁻¹⁹ (cited by Sommer) and Ps 6 (cited by Briggs) may serve, although in neither instance is the rhyme satisfactory throughout. Here and there the poet himself may have been conscious of it and thus indulged in a species of by-play; but in reality the occurrence of rhyme has scarcely any more significance than attaches to J. Chotzner's (*PSBA*, Jan. 8, 1884) collection from the OT of a whole series of the finest dactylic hexameters. In spite of these, one will hardly agree with Chotzner's conclusion that the Greeks borrowed the hexameter of the Homeric poems in Asia Minor from their Heb. slaves (Jl 3⁶). Thus, then, textual alterations ought not to be proposed in certain passages in order to make the rhyme frequently occurring in these perfectly uniform.

Assonance and *Paronomasia* play a large and unquestionably a conscious rôle in the OT. But they belong to rhetorical, not to strictly poetical devices. All these phenomena receive exhaustive treatment in the Dissertation of I. M. Casanowicz, *Paronomasia in the Old Test.*, Boston, 1894.

That, finally, Hebrew, like other languages, has in a certain measure its peculiar poetical vocabulary and grammar is a matter of course, but can be simply mentioned here.

ii. **THE MATERIAL OF HEBREW POETRY.**—A. **THE DIFFERENT SPECIES OF POETRY.**—In the literature of Israel the *drama* is wholly wanting. This peculiarity it shares with the whole Semitic literature, whereas in that of the Indo-Germanic peoples the drama three times over sprang up quite fresh and independent from the germ, namely on Indian, Greek, and German soil. This may perhaps be set down to a certain one-sidedness of disposition, a want of objectivity on the part of the Semites. The belief, to be sure, has often been cherished that precisely the OT itself forms an exception to this rule, and that it contains two dramas, *Canticles* and *Job*. In the case of the former of these, this opinion is based upon a false conception of the book, which is rather a collection of lyric (in fact, marriage) songs; † in the case

of the latter it is based upon a false definition of the drama.* It is only in chs. 3-41 that the Book of Job is disposed as a dialogue, and this disposition it shares with the majority of Plato's philosophical works, which no one thinks it necessary on that account to call dramas. Nay, the latter from beginning to end follow the method of dialogue, whereas in Job the whole *action*, from which the drama takes its name, is given in narrative form in chs. 1. 2. 42.†

Further, L. Diestel (art. 'Dichtkunst' in Schenkel's *Bibel-Lexicon*, i. [1869] p. 609) denies that anywhere in Semitic literature can the *epos* be found any more than the drama. This has since been shown to be incorrect, as on Bab.-Assyrian soil quite an extensive epic literature, whose contents are mythological, has been found composed in poetic form. But for Heb. poetry, so far as this is represented in the OT, Diestel's contention remains true. The OT enshrines a small number of historical poems or fragments of such—it may suffice to name the Song of Deborah in Jg 5—but this is lyric, not epic, poetry. Pss 105-107 are quite secondary productions, versification of the ancient popular history for liturgical purposes; they are litanies, not epics. The Jewish works of fiction of later times, the Books of Ruth, Jonah, Esther, Dn 1-6† are wholly in prose. The strongest evidence is furnished by the narrative proper in the Book of Job, the so-called prologue and epilogue in chs. 1. 2. 42. Although it is practically certain that these were borrowed from the mouth of the people,§ and are thus no secondary work, but an original one composed in the form current among the people for such subjects, these passages are written in prose, although this is unusually lofty or, if one will, has the breath of poetry. They share also with other narrative passages the characteristic that the *direct speech* of the parties acting occasionally reaches at the most critical points poetic expression (Job 1²¹, cf. elsewhere Gn 9²⁸⁻²⁷ 21^{6a}, 7 25³³ 27⁷⁻²⁸ 32¹, Jg 15¹⁶). It is difficult to regard these intermingled lines of verse as the last remnants of an originally poetic composition. We may rather find here an indication that poetry had with the Hebrews a wholly subjective, i.e. lyric, tinge, but that it was not in use for objective epic description. We must reckon with this fact, without being able to offer any sufficient explanation of it. Perhaps, however, in this matter the common Semitic tendency is upon the side of the Hebrews, the exceptional development upon that of the Babylonians and Assyrians.||

Such we consider to be the state of the case, and C. A. Briggs alone appears to come to a different conclusion. But even when he represents Jotham's fable (Jg 9⁸⁻¹⁵)—to take the most extensive illustration—as written in metre (see his metrical division of it, *op. cit.* p. 416 f.), this does not go essentially beyond what was said above. For here we have direct address and at least gnomic poetry, even if it is written in prose. ¶ But when the two Creation

* Cf. the present writer's Commentary on Job in Nowack's *Handkomm.* ii. 1 (1890), p. vi f. J. Ley's rejoinder (*Neue Jahrb. f. das klass. Altertum*, etc., Leipzig, Teubner, Jahrg. 1893, ii. Abth. p. 295 ff.) only shows that he has not rightly apprehended the point on which we are at issue.

† The above remarks are not of course meant to exclude the recognition of a dramatic element in many passages in the OT, including even the Bk. of Job. The present writer could assent to the remark of C. A. Briggs (*op. cit.* p. 419), 'the dramatic element is quite strong in Hebrew poetry,' but not to the hearing 'Dramatic Poetry,' nor to the statement (p. 420) that the dramatic element reaches its climax in the Song of Songs.

‡ Cf. above, p. 8^b.

§ Cf. Budde, *Comm.* p. vii ff.

|| So also Grimme, *ZDMG*, 1897, p. 684.

¶ Parallelism proper is wanting, it is simply the rhetorical construction, with fourfold repetition of the same scene (cf. such a passage as Job 11¹⁸⁻¹⁹) that gives the appearance of rhythm. The alterations made by Briggs on v. 15 are warranted, however, even without a metrical scheme, only we must read מַשְׁלִי and

* Cf., for early times, G. Sommer, *Biblische Abhandlungen*, 1846, p. 85 ff., and for modern, C. A. Briggs, *op. cit.* p. 373 ff.

† Cf. the present writer's Commentary on Canticles in the *Kurzer Hdcomm. z. AT*, xvii. (1898) p. xii ff.

narratives (P's in Gn 1 and J's in 2^d-4), as well as the two forms of the story of the Flood (Gn 6-8), are declared to be poetical passages, metrically composed (Briggs, *op. cit.* p. 559 f.), this gives rise to a new, otherwise unheard of, state of things. Before any examination of these passages, the objection lies to hand that one cannot see why then Gn 9 and 11¹⁻⁹ are not to be regarded as poetical, and, most pertinently of all, ch. 5, the Sethite table which forms the transition to the story of the Flood. But when one looks more closely at the passages in question, it becomes plain that the whole doctrine of the form of Heb. poetry, as explained above, must be radically transformed before these narratives can be forced into metrical forms. We find them dominated neither by stichical division nor by parallelism. Nothing is proved by the circumstance that here and there the tone of the language rises and takes a certain poetical flight, or that here and there a few lines are capable of scansion, or that the relation between certain clauses may claim the name of parallelism. In reality the primitive history of both sources (P and J) is, so far as the form is concerned, not otherwise constructed than the following history of the patriarchs, etc., and is transmitted to us as history, not poetry, just as strictly as that is.* The conclusion, then, holds that the poetically composed epics as well as the drama is wanting in Hebrew literature.

Accordingly, only one of the leading varieties of poetry, the earliest and the simplest of them, was cultivated in Israel, namely the *lyric*. At the same time it must not be forgotten that a secondary variety of this, namely *gnomic* poetry, which we might call 'thought-lyric,' likewise attained to a rich development.

B. THE EMPLOYMENT OF POETRY.—For the sake of brevity, we shall seek here to combine as far as possible a sketch of the history of OT poetry with a schematic survey of the poems that have come down to us. Only the folk-poetry of early times needs to be handled in any detail; the other survivals of Heb. poetry will be found treated of in this Dictionary in separate articles.

1. *Folk-Poetry.*—This is everywhere the oldest form of poetry. Poetry as an art never makes its appearance till later epochs. The saying of J. G. Hamann (1730-1788), 'Poetry is the mother-tongue of the human race,' which was more fully explained and established by his pupil J. G. Herder (1744-1803), and has in recent times been emphatically asserted especially by Ed. Reuss (cf. Herzog's *RE*² v. [1879] p. 671 f.), finds everywhere its complete justification. Poetry is in point of fact older than prose; all the most ancient utterances of different nations are couched in poetry. One may lay down the rule: *in the case of a primitive people all discourse that is intended for publicity or for memorial purposes will be found clothed in a poetical form.* To these two categories belongs everything of a religious character, and it must be borne in mind that in the life of ancient peoples much that appears to us secular bears the stamp of religion. In this way poetry has its home in Israel as elsewhere:—

(a) *In family life.*—What specially come into view here are the *wedding-song* and the *lament for the dead*. Of the former of these we possess a whole collection of fine specimens, which, thanks to

אֶחָדָם 'and there came out fire and devoured.' By the way, Grimme (*ZDMG*, 1897, p. 512), too, represents Jotham's fable as written in verse, although he gives a somewhat different arrangement of it.

* It appears to us that Briggs is in general inclined to draw too lightly the boundaries of poetical form, confusing, as he does, rhetorical and metrical forms. This remark applies also very specially to many NT passages to which he gives a metrical arrangement.

a mistaken exegesis, found their way into the Canon of the Sacred Writings, in the book which is called in Hebrew חִתּוּבֵי שִׁיר וְשִׁירָה, and in English, Canticles or the Song of Solomon. Though these songs are of late origin, yet they will have preserved, as genuine folk-songs, the quality of early times with essential fidelity.* A *contrafactum*† of the wedding-song of older days is exhibited by the prophet Isaiah at the beginning of his Parable of the Vineyard (5^{1a}).—Of the lament for the dead we possess only *contrafacta*, applied to historical persons and personifications, first in the mouth of the prophets and then in the Book of Lamentations (chs. 1-4). See fuller details on this point above, i. B 2 d, p. 5. In the case of lamentations for the dead, women alone were the composers and the performers (מְנַחֵמֶת, נִחְמָה, Jer 9¹⁶), who sought to increase their collection of dirges and handed down their art by instruction (v. 19). At weddings, on the other hand, young men and young women seem to have contended for the pre-eminence.‡ From the official lament we ought certainly to distinguish exceptional cases when an accomplished friend might dedicate a eulogy to the dead, such as has come down to us in David's fine lament for Saul and Jonathan (2 S 1^{17a}), and in a lament for Abner of which at least a few lines have survived (2 S 3^{33a}). Whether it was the custom to use songs to celebrate other important events and festivals in the family life, such, for instance, as weaning (cf. Gn 21⁶) and circumcision, we have no means of determining.

(b) *In the life of the community.*—That even the industrial life of the Israelitish farmer and nomad was interpenetrated with song we may assume without further question. Examples are thinly scattered. From the earliest times we have the *Song of the Well* (Nu 21^{17a}).§ From the life of the agriculturist Is 65⁸ has preserved some words of a *vintage blessing*. Harvest songs, too, may be taken for granted, in view of the harvest feasts and the proverbial joy of harvest (Is 6³), and perhaps the feast of sheep-shearing (1 S 25^{4a}, 2 S 13^{36a}) had also its special songs. If our interpretation of the difficult text Jg 5¹¹ is correct, the rehearsal of songs is presupposed even there as part of the shepherd's life. People did not like to be made 'the subject of verse' (שִׁירָה, cf. Is 14⁴, Mic 2⁴, Hab 2⁴) or 'of music' (תְּהִלָּה, cf. La 3¹⁴, Job 30⁹, Ps 69¹²). Hence the 'taunt-song' must have been much in vogue. Even for early times its use is not to be denied, while for a later period a short specimen of quite a unique kind has been preserved in the song upon the forgotten courtesan, Is 23¹⁶, which sounds as if it belonged to the category of *drinking-songs* mentioned in Ps 69¹², but presupposed also in Am 6⁶ and 2 S 13³⁶. At least no banquet proper (שִׁירָה, συμπόσιον) can well have been without music, including songs. It is not necessary to suppose, indeed, that on such occasions only pronounced drinking-songs were sung; rather will the want have frequently been met in early times by national songs. A special class of composers and singers, whose services were called into requisition on such occasions, is named in Nu 21¹⁷ (שִׁירָה). By this Hebrew name we are to understand a guild of 'travelling singers,' rhapsodists such as flourished in ancient Greece and on German soil, who not only had a rich repository of national saga and heroic poems, but also treated their

* Cf. Budde, 'Das Hohelied' in *Kurzer Hdcomm.*

† This is the name applied to the church songs of the close of the Middle Ages, which were composed in imitation of the measure, melody, and words of familiar secular songs.

‡ Cf. the description, for modern Syria, by Wetzstein (*Ztschr. f. Ethnol.*, 1873, p. 287 ff.).

§ For evidence that this is not a properly historical poem, but a song such as it was customary to sing at the discovery of new springs in the desert, as well as for an attempt to restore its original form, see Budde in *The New World*, 1895, p. 136 ff.

audience to songs of a more or less wanton or frivolous character. At the royal court 'singing men and singing women' are taken for granted as part of the regular *personnel* (2 S 19³⁶). To the category under consideration belongs also the single certain ancient trace of *gnomic poetry* which has come down to us, namely Samson's riddle (Jg 14^{14a}), along with its solution, and Samson's reply in v. 18. Such displays of wit may have been much in vogue as 'social games' at merrymakings. That, along with these, proverbs and wise saws also had wide currency among the people we may take for granted. No doubt the collection of these in the Book of Proverbs dates from later times, but all the same this may embody very ancient material, altered or not, as the case may be. The oracle, which under the title of 'the last words of David' interrupts the context in 2 S 23¹⁻⁷, must have a late date assigned to it; the saying of Jahweh about Moses in Nu 12²⁻³ appears to have been before the mind's eye of the writer. Another example of the same species is found in the words of Samuel in 1 S 15²². It must be added that all three of the last cited passages tend to pass over into the following divisions—the religious, the national, and the prophetic.

(c) *In the religious life.*—In the first place it is extremely probable that the ancient *priestly oracle*, where it did not simply, by the casting of the lot, give the answer 'yes' or 'no' to the question put, was couched in verse. A classical example is furnished by Gn 22³, an oracle, indeed, which belongs at the same time to our next division. Likewise for the cultus proper we have examples that are both ancient and certain. These are, in the first place, the *Aaronic blessing* (Nu 6²⁴⁻²⁶), then the *formula pronounced at the taking up and the setting down of the ark of J'* (Nu 10³⁵⁻³⁶),* and finally *Solomon's words in dedicating the temple* (1 K 8¹²⁻¹³), which must be supplemented and restored after the LXX (8²³). How far the religious service, i.e. in particular the sacrificial actions, was even in ancient times embellished by special songs, cannot now be determined. All that have come down to us emanate exclusively from the temple at Jerusalem in post-exilic times, as far at least as the form in which they now lie before us is concerned. But as surely as the religious gatherings were joyous feasts (Dt 12^{7, 12, 18}), with equal certainty may we conclude that even in early times music and poetry must have assumed their rôle at these, whenever any sanctuary obtained a name and a brilliant equipment, and considerable bodies of worshippers came together.

(d) *In the national life.*—Here we may distinguish the state of rest on the one side, and of activity, i.e. war, on the other. To the first category belong the extremely numerous *eulogistic and denunciatory sayings* in which a people celebrates its own qualities and its superiority to other peoples; or separate divisions or groups of a people may express their own distinctive characteristics. This species of poetry is extraordinarily widespread and everywhere highly developed, but most of all amongst Israel's relations, the ancient Arabs. It may exhibit all degrees, from empty unmeaning braggadocio up to the finest and loftiest poetical utterance. In the OT it begins with the boastful *song of Lamech* (Gn 4²³), which occurs in the primitive genealogical table inherited from the Kenites (יְקִי), and is a genuine type of the original form of this species as found in the mouth of a small tribe. Then come the *sayings of Noah* (Gn 9²⁵⁻²⁷), in which Israel (עַם) maintains its prestige over against the wealthy Phœnician (נַר) and the slave Canaan (קַנְאִן). Here for the first

time this species clothes itself in the form of the 'blessing,' in which, suitably to the quality of our sources, which look at everything from the religious view-point, it meets us in by far the majority of instances. The characteristic of his half-brother *Ishmael* is defined by Israel in the words put into the mouth of Jahweh in Gn 16^{11a}, which can hardly have retained their original form. So Israel states his relation to his twin brother *Edom* in the oracle of Gn 25²³, and separately for each in the double blessing of 27⁷⁻²⁸ and v. 30¹, very much, of course, to the prejudice of the brother. The more extensive *oracles of Balaam* (Nu 23^{7-10, 18-24, 24^{2-9, 15-24}}), which show indications that they have undergone several expansions, make glorious promises to Israel, in contrast to Moab, and even, further, to other nations. But this species shows its finest development in the two poems in which each of the tribes of Israel has its dignity and its special quality assigned to it in relation to the other tribes, namely the *Blessing of Jacob* (Gn 49) and the *Blessing of Moses* (Dt 33). It is by no accident that these two oracles have been put into the mouth of these two particular men, for Jacob is the fleshly and Moses the spiritual father of Israel, and they alone can pass judgment upon all their sons. The Blessing of Moses presupposes the Blessing of Jacob, and on the basis of the altered relations brought about by time (perhaps in the first half of the 8th cent.) gives it a new form. Thus, then, from the two sources, J and E, the older and the younger compositions are taken over. The older, the Blessing of Jacob, may have been compiled from separate sayings that were current about the different tribes. The self-consciousness of the tribe in which the finished poem took its rise, namely Judah, at last gave the general tone to the whole. Numerous sayings of the same kind, characterizing towns and hamlets, meadows, and clans, must have been current. A relic of these has survived in the now sorely mutilated saying about the city of Abel-beth-maacah, 2 S 20^{18c}.

The principal specimen of the real historical folk-song is the fine *Song of Deborah*, Jg 5. This attaches itself closely, at the same time, to the preceding species, being as it is a poem in which praise and blame are distributed, from v. 12 onwards. First of all, praise is given to Deborah, who by her recruiting-song has called to the battle, and then to Barak as the commander (v. 12). This is followed by an enumeration of the tribes who put in an appearance (vv. 13-18a), with censure and ridicule of those who kept at a distance (vv. 16b-17). Next a tribute is paid to the valour of the tribes of Zebulun and Naphtali (v. 18), the city of Meroz is cursed (v. 23), while to the Kenite woman Jael is awarded the palm for the greatest deed of personal heroism (v. 24¹). We have here, at least from v. 6 onwards, the primitive mode of a song that grew up in the life of the nation as a whole. We are directly reminded of the distribution of the rewards of victory after the battles of Platea and Mykale. Of other war-songs we possess only fragments (Nu 21^{14a, 27-30}, Jos 10^{12c}) or very brief extracts compressed into a single verse, such as the *Song at the Passage of the Red Sea* (Ex 15²¹), and that which was sung in honour of Saul and David when they defeated the Philistines (1 S 18⁴⁶). Similarly, the substance of a *song of triumph over Samson* is put into the mouth of the Philistines in Jg 16^{23c}. On the other hand, it is clear that the *Song contained in Ex 15¹⁻³⁰* is a late composition in Psalm style, expanded from the short v. 21 and really meant to take the place of this; and in like manner *David's triumphal song* in 2 S 22 = Ps 18 is a late insertion.

As a feature of the real life of ancient times it is

* Cf. further, *Actes du dixième Congrès de Orientalistes*, iii. (Leyden, 1896), p. 13 ff.

to be noted that in Ex 15²¹ as well as in 1 S 18⁴⁶ it is the women, or rather the maidens, who meet the returning warriors with songs, and the same custom is presupposed in Jg 11³⁴, in the story of Jephthah. Among the Arabs at the present day a victory is still followed by a sword-dance, performed by a maiden to the accompaniment of a song.

It is an extremely important circumstance that Nu 21¹⁴, according to the note wherewith it is introduced, is derived from ספר מלחמת יהוה, the **Book of the Wars of Jahweh**, i.e. of the wars of Israel, which, as such, are the wars of Israel's God (cf. 1 S 25²⁸). We have thus to do here with a collection of ancient war-songs which already lay before the ancient historian as a source, and thus to a certainty mark the beginning of writing amongst the Hebrews. Side by side with this source we read in Jos 10^{13b} of a ספר נאמן or **Book of the Upright**, from which v. 12^{12a} is said to be cited. From it, according to 2 S 1¹⁸, is cited also *David's lament for Saul and Jonathan*, no less than *Solomon's words in dedicating the Temple*, according to the LXX of 1 K 8⁵³, where ἐν βιβλίῳ τῆς ψόης = נאמן נאמן, and the last Heb. word is doubtless corrupted from נאמן. Here, then, we have to do with an ancient song-book, which contained more than war-songs, and whose composition, or at least completion, must be brought down as far as the time of Solomon. We have no room to complain that more of the contents of these two books have not come down to us, when we consider that Charlemagne's collection of Old German songs has been completely lost.

2. *The Poetry of the Prophets.*—That the prophets availed themselves of poetical composition is self-evident from the first. For their utterances were intended for publicity, and, as time went on, more and more for being treasured in the memory, while at the same time the prophetic movement grew out of the popular soil, which was completely saturated with poetry.* The prophets have accordingly not suffered to escape their notice any of the manifold forms of poetry that unfolded themselves in the midst of the people. At the same time, thanks to the great variety of entrances upon the scene made by the writing prophets of whose literary activity more extensive remains have come down to us, we must, even in the matter of poetical form, distinguish a number of possibilities which show a marked divergence from one another.

(a) The prophet may adopt the poetical forms current in other social circles, and come forward himself as a poet, thus playing a strange part, as in the extremely frequent prophetic laments (cf. above, i. B, d), or the isolated marriage-song, Is 5¹⁴ (cf. above, ii. B, a). But, even apart from these special cases, later prophecy has a special fondness for interrupting a prophetic address by songs, whether these are sung by the prophet himself, as happens with special frequency in Deutero-Isaiah, or are put into the mouth of other persons, as happens repeatedly in Is 24-27, and as has been done by a redactor in Is 12. In all these instances the language necessarily follows the laws of strictly poetical composition, because it attaches itself to fixed forms taken as a model.

(b) The prophet may communicate Divine oracles, which he has himself received. Here again strict, measured form is natural.

(c) The prophet may speak in his own name, taking for his basis, and expanding, Divine oracles. Betwixt these last two possibilities the great mass of prophetic passages continually oscillates; and

transition cases occur, in which it is impossible to draw the boundaries sharply.

(d) The prophet may himself tell of his entrance upon office and what happened in connexion with it, such as the conversations he held. To this category belong, for instance, the accounts of visions such as we have in Am 7ff., the appearances beheld by an Ezekiel or a Zechariah, etc., but no less the experiences of Hosea (chs. 1-3), not to speak of the little Book of Isaiah, whose kernel is the story of the prophet's meeting with king Ahaz (61-9*), and some things related of Jeremiah (e.g. 18^{1st}).

(e) Another author may tell about the prophet in such a way that the latter becomes the hero of the story. In such instances it is relatively indifferent if occasionally it is the prophet who speaks of himself in the third person, but this is scarcely a likely contingency. To this last category belong Am 7^{1st}, Is 20, and in a much less degree chs. 36-39, but, above all, large sections of the Book of Jeremiah, particularly from ch. 26 onwards. If these last-named sections at last expand into a life of Jeremiah, nay, into a history of his times, if Is 36-39 was mainly taken from a popular work of history and appended to the older Book of Isaiah, it is evident that we have now reached the sphere of prose pure and simple. But even in these sections there are prophetic discourses which by a stretch may be said to lead us back to the realm of poetry.

Besides, personal endowments must be taken into account. One might have the full consciousness of a call to the prophetic office and yet be no born poet. Then it might happen that at one time the prophet would put on the unwonted poetic harness and go earnestly to work for a while, only to relapse presently into heedlessness, while at another time he would disdain to use it at all and would employ prose. Something of this kind may be observed, for instance, in Ezekiel.

Under such conditions the literary form in the prophetic writings continually vacillates to and fro, and we meet also with transition forms betwixt prose and poetry, which it is difficult to class with certainty. The possibility of a careless treatment of poetical rules, giving rise to an imperfect type or mixed species of discourse, is open to Hebrew as well as to any other language, nay, it lies nearer to hand in it than in many other languages. The stichic structure only needs to be neglected for the discourse to flow on with tolerable freedom from restraint, while the parallelism is retained as far as possible and by its peculiar undulating progress always makes itself felt. Grimme (*ZDMG*, 1897, p. 683 f.) is wrong, then, when he rejects *in toto* the idea of a 'rhythmic prose'; the dilemma by which he attempts a *reductio ad absurdum* of it is not cogent for those who do not accept his system. His argument fails in particular to do justice to the parallelism of the thought. For an analogy to the above-named mixed species, we may compare our own doggerel verse or rhymed prose.

For the prophetic books, then, a sliding scale must be adopted, with many indefinable transitions. The poetical form will be most strictly observed in the cases described above under (a) and, a little less, (b); the prophet himself will move with more freedom in those included under (c); the instance cited under (d) will give ample scope for the intermixture of prose; finally, in the last case prose will be the form started with, which will only occasionally make way for poetry. Details would be out of place here.

3. *Artistic Poetry.*—To this category belong in a certain sense the whole of the poetical books, for these were all either composed or collected in full view and with clear consciousness of their artistic

* Cf., for the origin of earlier and later prophecy, the present writer's *American Lectures, The Religion of Israel to the Exile*, New York and London, Putnam, 1899, Lect. iii. and iv.

form. This took place, without exception, in later post-exilic times. But at the same time there is scarcely one of them which had not its roots in the ancient folk-poetry. Along with lyric poetry, the gnome and the Wisdom literature occupy the forefront in this arena.

(a) *Lyric Poetry*.—(1) **The Song of Songs**.—This belongs, as was pointed out above (p. 10), wholly to the realm of folk-poetry. It is a collection of popular wedding-songs, belonging to a late period. But it owed its retention in the Canon simply to the circumstance that it was taken to be an extremely ingenious allegorical poem with a religious meaning, and that its author was assumed to be Solomon. It is not an impossible suggestion that, because of this conception, the book underwent here and there editorial revision.* See, further, art. SONG OF SONGS.

(2) **The Book of Lamentations**.—Here, truly, poetry as an art rules, till artificiality is reached in the alphabetic arrangement. But this art is based on the employment by the prophets of the popular lament for the dead, and is an imitation of the latter. A higher degree of art than that found in chs. 1. 2. 4 is present in ch. 3, which is meant to be, as it were, a central peak between the other chapters; ch. 5, again, is popular, and alien in subject and form from the rest.† See, further, art. LAMENTATIONS.

(3) **The Psalms**.—In this collection we have to recognize the Temple hymn-book of the post-exilic community, the religious lyric with artistic development. Only in a single instance has a secular song strayed into this company, namely Ps 45, also a wedding-song, but one of quite an artificial character. More frequent is gnomic poetry, although with a decidedly religious application; cf. e.g. Ps 1. But even here the popular basis is not wanting. In its purest form this meets us in the collection known as the *Pilgrim Songs*, Pss 120-137. Psalms outside the collection proper are found in Hab 3, which exhibits the same kind of titles and technical terms as meet us in the Psalms; in 2 S 22=Ps 18; in 1 S 21-10 wrongly put in the mouth of Hannah; further, suitable to the situation are Ex 15¹⁻²⁰ (cf. above); the Song of Moses, Dt 32; Is 12. Perhaps also Nah 1 was originally an alphabetical psalm (see art. NAHUM for a defence of this view). In the so-called *Psalms of Solomon* (which see) there has come down to us, although only in the Greek language, another small collection of psalms from the 1st cent. B.C. The title 'Psalms of Solomon' expresses nothing more than that they are secondary, as compared with the canonical Psalms, which as a whole are attributed by tradition to David.

On the titles found in the Book of Psalms see art. PSALMS, p. 153 ff.

(b) *The Wisdom Literature*.—(1) **The Book of Proverbs** unites in itself gnomic poetry of the most diverse kinds and with the most varying degrees of development. The basis and the kernel (chs. 10-22¹⁷, also chs. 25-29) are supplied by the two-line *māshāl*, which in form and contents is certainly the oldest structure of this species, and in its origin is distinctly popular. To this were appended, towards the end, more elaborate species, apophthegms expressed at greater length, enigmatical and numerical sayings, and finally (31¹⁰⁻³¹) an alphabetical eulogy of the virtuous woman. At the beginning of the book (chs. 1-9) we have a connected series of pedagogical-philosophical didactic discourses, in which Wisdom and Folly personified are introduced. For details see art. PROVERBS.

(2) **The Book of Job** is based upon a popular

story, and gives to the problem raised in this a new turn which it carries artistically through the conversations of chs. 3-42⁶. The form adopted is essentially the same as is found in Pr 1-9, but the poet has succeeded in giving to this a lyric movement throughout, and has even cast the different speakers in so plastic a mould and kept them so well apart as to give rise to the appearance of a dramatic performance (cf. above, p. 9). Beyond any doubt, the Book of Job is the highest product of the poet's art to be found in the O.T. It brings to a focus, as it were, all that Heb. poetry could contribute, and stands out as one of the noblest poetical compositions of any age, or any people. See, further, art. JOB.

(3) **Qoheleth**.—This book takes its place as a counterpart to Pr 1-9, as a philosophical didactic poem, but has an essentially different point of view. Belonging to a very late period, it does not stand high poetically; both language and verse-structure leave much to be desired. See, further, ECCLESIASTES.

(4) To the same species belongs the **Book of Sirach**. This is probably older than Qoheleth, it stands higher as regards language and form; from the religious standpoint it is more valuable, if less original in its views. It concerns us here because recently a considerable part of its contents has been recovered in the original Hebrew (see SIRACH). With this book we may bring our survey to a close.

K. BUDDE.

POISON (חֵמָה *hēmāh*, 5 times, Dt 32^{24, 33}, Job 6⁴, Ps 58⁴ 140³; רֹשׁ *rō'sh*, in Job 20¹⁶; LXX θυμός except in Ps 140³, where it is *lōs* as in NT; Vulg. *indignatio* Job 6⁴, *caput* Job 20¹⁶, *furor* Dt 32²⁴, Ps 58⁴, *venenum* Dt 32³³, Ps 140³, Ro 3¹³, Ja 3⁸).—The commonest signification of *hēmāh* is fury or the heat of anger, in which sense it occurs over 100 times in the OT. In some of these passages the ideas of anger and of poison are united, as in Is 51¹⁷⁻²², where the cup of God's wrath is spoken of; see also Job 21²⁰, Jer 25¹⁵, etc. Luther translates 'fervent lips' of Pr 26²³ by *giftiger Mund*. The Greek word θυμός likewise primarily means that part of human nature which is affected with passion or anger. The Hebrew idea is therefore that poison is a substance which causes fatal heat and irritation, and in nearly every instance in the OT the material referred to is the venom of serpents or scorpions; see Dt 32^{24, 33}, Job 6⁴ 20¹⁶, Ps 58⁴ 140³, and in the NT Ro 3¹³.

Six species of poisonous snakes occur in Palestine, *Vipera Euphratica*, *V. ammodytes*, *Daboia zanthina*, *Echis arnecola*, *Naja Haje*, the hooded cobra common in the southern border countries, but not often found in the cultivated tracts; and *Craspis Hasselquistii*, the horned viper, very common, and often found lurking in hollows of the ground. Tristram has seen it in the imprints made on soft ground by camels. The Israelites were therefore well acquainted with the effects of poisonous wounds inflicted by these, as well as by the scarcely less dreaded centipedes and scorpions. In Egypt poison was likewise chiefly associated with serpent bites. In the Book of the Dead (c. 149, l. 27 ff.) the poison of the serpent *Ruek* is called *shmnt*, which comes from a root which also means to be hot, or to produce fever.

The natives of the neighbouring countries had, like most races of savage or semi-civilized man, learned to utilize this poison to render their darts and arrows more destructive. This was an ancient practice (cf. *Odyssey*, i. 251; Soph. *Trachiniae*, 574), and it is referred to in Job 6⁴. This usage has shown itself in the change of meaning in the word *ῥεῦμα*, possibly also in that of *ῥός*, although it is now generally held that in its Homeric sense

* Cf. the present writer's *Comm.*, p. xxi f.

† Cf. *Kurzer Hülfscom.*

as an arrow it is connected with the Sanskrit *ishus*, while in its Sophoclean sense as a poison, 'εἶτα φάρμακον ἐχθρὸν ἰός,' it is related to the Sanskrit *vishas*.

The poison of insect bites is mentioned directly in Wis 16⁹ and implicitly in other passages. The word *rō'sh* occurs 11 times, but is usually translated 'gall' ('venom' in Dt 32³³, 'poison' in Job 20¹⁶, 'hemlock' in Hos 10⁴). It was most probably a poisonous plant, and one which communicates its bitterness and poisonous properties to water (Jer 8¹⁴ 9¹⁵); but in the absence of more definite information it is not easily identified. Perhaps the poppy is the plant indicated (see GALL in vol. ii. 104), but the grapes of gall of Dt 32³³ are most probably the fruit of *Calotropis procera*.

Metaphorically, the influence of evil speech is said to be the deadly poison of that unruly evil, the tongue, Ja 3⁸. The forked tongue of the snake was believed to be the darter of its venom before the structure of the poison fangs was known; cf. Job 20¹⁶ 'he shall suck the poison of asps, the viper's tongue shall slay him.'

The administration of poison internally for suicidal or homicidal purposes is not mentioned in NT or OT. In 2 Mac 10¹³ there is, however, one instance given—that of the suicide of Ptolemy Macron. Poisoning and sorcery were, as they still are in savage and semi-savage countries, closely connected in ancient times and in the NT. Sorcerers are called *φάρμακοι*, as in LXX Ex 7¹¹ 9¹¹ 22¹⁸ and eight other passages, as well as in Rev 21⁸ 22¹⁸; and sorcery is *φάρμακία* in Gal 5²⁰. Sorcery in the OT is, however, more directly connected with incantation, as implied by its root *רָפָא*. See MAGIC, vol. iii. p. 210. Josephus (*Ant.* xvii. iv. 1), in describing the death of Pheroras, says that the Arabian women were skilful in compounding poisons; but the art of poisoning was in ancient times much more commonly employed among Indo-European than among Semitic peoples.

In the appendix to St. Mark's Gospel (16¹⁸) one of the promises made to 'those that believe,' is that if they drink any deadly thing (*θανάσιμον τι*), it shall not hurt them—a promise which, according to Papias (*ap. Eus.* HE iii. 39), was fulfilled in the case of Joseph Barsabbas.

The word 'poison' in English is borrowed from the French *poison*, which originally meant a potion or remedy. In the *Roman de la Rose*, l. 2043, it is thus used—

* Car ge sais par quel poison
Tu seras tret à garison;

but from the 13th cent. it has been used in English in the sense of a deadly drug. See the passage in Langtoft's *Chronicle*, where he describes the administration of 'puson' to Ambrosius. This, though written in a sort of French, is the work of an Englishman; see also Britton, ed. Nichols, i. 34, where the word is spelled 'poyson.'

For notes on the history of poisons in ancient times see Schulze, *Diss. sistens toxicologiam veterum plantarum venenatas describentem veteribus cognitās*, Halæ, 1788. A. MACALISTER.

POLE.—The brazen serpent was displayed upon a pole (Nu 21⁹ AV, the only occurrence of the word 'pole' in the Bible). The Heb. is *אֵז* (LXX *σημείον*), which appears to mean primarily 'a flag-staff,' and is used in a transferred sense for the banner itself. RV tr. 'standard.' See, further, art. BANNER.

POLL.—The poll (of Tent. origin, Scotch *pow*) is the head, especially its rounded back part. Thus Shaks. *Hamlet*, iv. v. 196—'All flaxen was his poll'; and Bacon, *Essays*, p. 122, 'Not the hundred

poll will be fit for an helmet.' The word is thence used in very early English for the person, as Piers Plowman, B. xi. 57, 'Pol bi pol' = individually. A poll-tax is a tax on each person, and a poll or polling is a census or record of persons. The subst. is used in AV only in the phrase 'by the poll' (Nu 3⁴⁷) or 'by their polls' (Nu 12. 18. 20. 22, 1 Ch 23³. 24). Cf. Shaks. *Coriol.* III. iii. 9—

'Have you a catalogue
Of all the voices that we have procured
Set down by the poll?'

The Heb. word is always *רִשְׁתָּהּ* *gulgoleth*, which in the places where it is rendered 'poll' as well as in Ex 16¹⁸ (AV 'for every man,' AVm 'by the poll or head,' RV 'a head') and 38²⁸ (AV 'A bekah for every man,' AVm 'a poll,' RV 'a head') means the head or the person in counting, taxing, etc., but elsewhere means the head as severed from the body (2 K 9³⁵, 1 Ch 10¹⁰), or the skull as broken with a stone (Jg 9⁵³). The idea in the Heb. word as in the Eng. is *roundness*.*

To 'poll the head' is to make it look more rounded by cutting off the hair. The expression occurs in 2 S 14²⁶⁻²⁷ (Heb. [רָחַץ] in Piel, usually tr. 'to shave') and Ezk 44²⁰ (Heb. *צָרַח*, its only occurrence); and 'to poll' by itself in Mic 1¹⁶ 'Make thee bald and poll thee for thy delicate children' (Heb. *צָרַח*, usually to 'shear'). Cf. Wyclif's (1388) tr. of Job 1³⁰ 'Thanne Joob roos, and to-rente his clothis, and with pollid heed he felde down on the erthe'; and 1 Co 11⁵ (1380), 'Forsoth ech womman preiynge, or prophesyinge, the heed not lilid, defoulth hir heed: forsoth it is oon, as yif sche be maad ballid, *pollid*, or *clippid*.'

In Jer 9²⁵ 25³² 49³² RV changes 'that are in the utmost corners' into 'that have the corners of their hair polled,' in accordance with AVm. See HAIR, vol. ii. p. 284^e. J. HASTINGS.

POLLUX.—See DIOSCURI.

POLYGAMY.—See MARRIAGE.

POLYTHEISM.—See GOD, and IDOLATRY.

POMEGRANATE (*רִמּוֹן* *rimmōn*, *ῥόα*, *granatum*). —There can be no doubt of the identity of this tree. Its Arab. name, *rimmān*, is plainly of the same origin. Its botanical name is *Punica Granatum*, L., of the order *Granatee*. It is 10–15 feet high, with oblong lanceolate deciduous leaves, a woody-leathery top-shaped calyx, five to seven scarlet petals, very numerous stamens in several rows, and an ovary with two tiers of cells, three in the lower and five in the upper tier. The fruit is apple-shaped, crowned by the lobes of the woody calyx, yellowish or brownish, with a blush of red, and contains very numerous angular seeds, surrounded by a juicy pulp. It grows wild in N. Syria and possibly in Gilead. The fruit is of two varieties, the sweet and the acid. The pomegranate is repeatedly mentioned in the Koran as one of the trees of Paradise. It is constantly alluded to in Arab stories.

The Scripture allusions to the pomegranate are also frequent. The spies brought pomegranates (Nu 13²³). The Israelites in the wilderness of Zin (Nu 20⁵) lamented the pomegranates of Egypt, along with its figs and vines. Moses, in recounting the good things of Canaan, did not forget them (Dt 8⁸). Saul abode under a pomegranate tree (1 S 14²⁵). Solomon compares the temples of his bride to a piece of the fruit (Ca 4³), and her whole person to an orchard of them (v. 13). The beautiful

* This perhaps explains the name *GOLGOTHA*, 'the place of a skull,' Mt 27³³, Mk 15³², Lk 23³³ (RV), Jn 19¹⁷.

flower is alluded to (6¹¹ 7¹²), and the juice or wine as a beverage (8¹). The withering or barrenness of this tree was a sign of desolation (Jl 1¹², Hag 2¹⁹). The fruit was embroidered (Ex 28³³), and sculptured (1 K 7¹⁸, etc.). It was also sculptured on the Egyptian monuments. It is mentioned in Sir 45⁹. Numerous places were named from this tree, as Rimmon (Jos 15³¹), Gath-rimmon (21²²), En-rimmon (Neh 11³⁰). The pomegranate is as extensively cultivated and as highly prized now as in ancient times. The beautifully striped pink and crystal grains are shelled out, and brought to table on plates. The acid sort is served with sugar. Rose-water is sometimes sprinkled over the grains. The juice of the acid sort is sweetened as a beverage, and also used in salads. The rind is used in tanning. It is also a powerful anthelmintic, principally against the tape-worm. A knife used in cutting the rind turns black, as does also the section of the rind, from the formation of tannate of iron.

G. E. POST.

POMMEL (from Old Fr. *pomel*, dim. of *pomme*; Lat. *pomum*, an apple) is the tr. in 2 Ch 4¹² vs. 12 of גִּלְיָה *gilliah*, which in the parallel passage, 1 K 7¹⁸ vs. 4, is tr. 'bowl.' RV gives 'bowl' in 2 Ch also. The reference is to the 'bowl- or globe-shaped portion of capitals of the two pillars in the temple' (Oxf. Heb. Lex.), so that *pommel* (which like the Heb. word contains the idea of roundness) is not unsuitable. Wyclif uses the word, not only of the round end of the handle of a sword, but of the whole handle, Jg 3²¹ 'the pomel (1388 *ether hille*) folwide the yren in the wound.' In Pr 25¹¹ (1388) he uses it in the orig. sense of an apple, 'A goldun pomel (Vulg. *mala aurea*) in beddis of silver is he that spekith a word in his time.'

J. HASTINGS.

POND.—See POOL.

PONTIUS PILATE.—See PILATE.

PONTUS (Πόντος) was a name used in a vague and loose way to designate certain large tracts of country in the north-eastern part of Asia Minor adjoining the Black Sea (which was often called by the Greeks 'the Sea'). Originally, the name was applied to all or any part of the Black Sea coasts; and the Attic orators regularly use it of the Tauric Chersonese (Crimea) and the Cimmerian Bosphorus; * and comparatively late writers also, such as Trogus, Diodorus, etc., sometimes apply the name to those remote parts. Herodotus, vii. 95, on the other hand, speaks of the Greeks of Pontus contributing 100 ships to the fleet of Xerxes in 480 B.C., obviously meaning the south Euxine coasts in general; and Xenophon in the *Anabasis* uses it of the eastern parts of the south coast. The term, as thus applied, was rather a mere description than a real name. It was only at a late period, and through political circumstances, that 'Pontus' began to have a definite sense as a geographical name.

i. THE FIRST KINGDOM OF PONTUS.—In the confusion that followed on the death of Alexander the Great, an adventurer named Mithridates managed to found a new state beyond the Halys in north-eastern Asia Minor, about B.C. 302. He assumed the title of king probably towards the end of B.C. 281, and was afterwards known as Ktistes, 'the Founder.' In later times the vanity of the dynasty descended from him invented the story of a legendary kingdom in older times, ruled by a Persian noble family; but that older kingdom rests on no historical basis. The kingdom ruled by the Mithridatic dynasty was, to a great extent,

part of the country previously called Cappadocia: it also included some of the mountain tribes near the Black Sea coasts, and part of Paphlagonia. But, as a political unity, it required a name. Polybius in the 2nd cent. B.C. called it 'Cappadocia towards the Euxine,' and Strabo mentions that some called it 'Pontus,' and some 'Cappadocia towards the Pontus.'* Such elaborate names could never establish themselves in common use: Cappadocia was fixed as the name of the kingdom which included the centre and south of the country hitherto embraced under that title, and Pontus as the name of the northern kingdom which was ruled by the Mithridatic dynasty for 218 years, B.C. 281-63. The extent of the name varied according to the varying bounds of the kingdom, which was sometimes larger (including Armenia Minor, etc.), sometimes smaller.

The meaning of the name Pontus changed in B.C. 64. It had previously designated a kingdom, and that kingdom in that year ceased to exist. The Romans then incorporated part of the former kingdom in the empire, constituting it along with BITHYNIA as the double province *Bithynia et Pontus*, which continued to exist with hardly altered limits for more than three centuries until the reorganization of the provinces by Diocletian.

The rest of the old kingdom of Pontus was broken up by Pompey into a number of parts, which were treated in diverse ways; several self-governing cities were constituted; Comana was governed by a priest; Gazelonitis and Pontic Armenia were bestowed on Deiotarus, the Galatian chief and king. The rapid vicissitudes of that part of Pontus in the following years cannot here be followed up in detail. Pharnaces, son of Mithridates the Great, had been made by Pompey king of Bosphorus, ruling over the countries on the north-eastern coasts of the Euxine; but he took advantage of the civil wars to reinstate himself in his father's realm of Pontus, till he was defeated by Cæsar in B.C. 47. The kingdom of Pontus was reconstituted by Antony in B.C. 39, and given first to Darius, son of Pharnaces, and afterwards, in B.C. 36, to Polemon.† Polemon founded a dynasty of kings who ruled over Pontus until A.D. 63.

ii. HISTORY OF PONTUS IN NEW TESTAMENT TIMES.—The new Pontic dynasty touched Christian history in several noteworthy ways; and it also was distinguished by coming into relationship with the reigning emperors, Caligula and still more nearly Claudius. The second wife of Polemon I. was Pythodoris, daughter of Antonia and granddaughter of Antony the Triumvir. Pythodoris reigned as queen of Pontus in her own right after her husband's death in B.C. 8 until some time after A.D. 21; but the history of the kingdom is quite unknown in her reign, and an interval seems to have occurred at her death. Her daughter Tryphæna reigned in association with her own son, Polemon II., during part of the reigns of Caligula, Claudius, and Nero. The one date which is certain is that Caligula ‡ made Polemon II. king of Pontus and Bosphorus in A.D. 38. Previously, Tryphæna seems to have lived for some time in Cyzicus, and she had married Cotys, king of Thrace (who died in A.D. 19). She perhaps retired to the neighbourhood of Iconium at some time during the reign of Claudius. Her father, Polemon I., had at one time governed a kingdom or state in the south,

* *Καππαδοκία ἡ πρὸς τὴν Εὐξείνου*, Polyb. v. 43. 1; ἡ πρὸς τὸ Πόντον *Καππαδοκία*, Strab. p. 534.

† Son of Zenon, the rhetor of Laodicea in the Lycus valley, see vol. ii. p. 86.

‡ Caligula's grandmother, Antonia, was half-sister of Tryphæna's grandmother. The first year of Tryphæna and Polemon ended (according to the current Pontic year) in autumn 38; and their coins are known as late as their eighteenth year (Imhof-Blumer in *Zft. f. Numism.* xx. p. 268; Wroth, *Catalogus of Brit. Mus., Pontus*, p. 47), A.D. 54-55.

* Bosphorus was the term which afterwards was employed to designate those regions when formed into a kingdom.

containing Iconium and great part of Cilicia Tracheia; and presumably some estates near the city may have remained in possession of the family.* The remarkable story contained in the *Acta Pauli et Thecla* mentions this queen Tryphæna as present at a great imperial festival in Pisidian Antioch under the reign of Claudius, and calls her a relative of the emperor. She could hardly be present at that festival of the provincial cult of the emperor, unless she were resident in the southern part of the province Galatia (of which part Antioch was capital), or, perhaps, on the frontier in the Cilician kingdom, which was given to Polemon by Claudius in 41 (see below); and she was a near connexion of the emperor Claudius, whose mother was Antonia, half-sister of Tryphæna's grandmother.

The residence of Tryphæna near Iconium under Claudius can only have been temporary, as she appears with the title of queen on Pontic coins in the year A.D. 54-55, when Nero was emperor. According to the story (which is probably founded on fact) in the *Acta* above mentioned, she protected Thecla, St. Paul's Iconian convert, and was converted to Christianity by her protégée. The name Tryphæna evidently lasted in Christian tradition; and we find a martyr Tryphæna at Cyzicus, which was at one time very closely associated with the queen (*Acta Sanct.* 31 Jan. p. 696).

The dynasty of Polemon is also connected with the legends about the Apostle Bartholomew. According to one legend he preached in Bosphorus, the kingdom of Polemon I., and from A.D. 38 to 41 of Polemon II.; and afterwards in Armenia Magna, where he suffered martyrdom in the city Ourbanopolis. Now Polemon II. received a Cilician kingdom in exchange for Bosphorus in A.D. 41; and the capital of that kingdom was Olba, a Hellenized form of a native name Ourwa or Oura, called also Ourbanopolis.† His brother Zenon was made king of Armenia Magna in A.D. 18 under the name of Artaxias.

Another legend makes Bartholomew preach in Lycaonia, or in Upper Phrygia and Pisidia. Part of Lycaonia with Iconium was ruled by Polemon I., and the inhabitants of Iconium considered it a Phrygian city. The most probable foundation for this legend is that Bartholomew preached to the Phrygian tribe called the Inner Lycones; see Ramsay, *Cities and Bishops of Phrygia*, pt. ii. p. 700. A third legend transports the scene of Bartholomew's preaching to India, but still assigns the name Polemon or Polymios to the king of the country, and Astreges or Astyages to his brother; and these are evidently mere distortions of the names Polemon and Artaxias.

It seems impossible that so many links should have been forged by tradition connecting the dynasty of Polemon with the early history of Christianity, unless there had been some historical reality out of which legend could draw its material. It would be out of place to investigate the subject further here. The discovery of the first traces of connexion was made by von Gutschmid in the *Rhein. Museum*, 1864, p. 170 (where he wrongly made Tryphæna the wife of Polemon). See also Lipsius, *Apocryphen Apostelgeschichten*, ii. 2, p. 55 ff.; Ramsay, *Church in the Roman Empire before 170*, ch. xvi.; and on the Polemon dynasty, Mommsen, *Epist. Epigraph.* ii. p. 259 ff.; Hill in *Numism. Chron.* 1899, p. 181 ff.; also many other recent papers quoted in these works.

In A.D. 63 the government of Nero came to the conclusion that the kingdom of Pontus had been raised to such a level of peace and order that it might safely be taken into the empire. The western part was incorporated as a region of Galatia, and the eastern part was incorporated in Cappadocia (see below). Polemon II. still retained the title of king, with a kingdom in Cilicia Tracheia, where he presumably went to reside after A.D. 64.

Polemon II. became connected with NT history in another way. In 41 the kingdom of Olba (including a large part of Cilicia Tracheia) was given him by Claudius in exchange for Bosphorus;‡ and he retained this Cilician kingdom at least as late as 68, for a coin of Olba bearing his name was struck under Galba (though he had lost the kingdom of Pontus in 63). Berenice, daughter of Herod Agrippa I. (Ac 12), sister of Herod Agrippa II.

(Ac 26), and widow of her uncle Herod of Chalcis, married Polemon, king of Cilicia, after inducing him through desire of her wealth to submit to circumcision; but she soon tired of him and abandoned him, whereupon he ceased to conform to the Jewish law.* This is evidently the same Polemon II. who was king of Pontus. Josephus does not mention the date; and above, in vol. ii. p. 360 f., the view is stated (following Smith's *DB* ii. c.v. 'Pontus,' and other authorities), that the marriage with Polemon was earlier than the interview of St. Paul with Berenice and her brother Agrippa. But that early date for the marriage is not certain, for Josephus speaks of Polemon as being king of Cilicia, and presumably living there, when the marriage occurred; and this implies a date after A.D. 63, for up till that year Polemon doubtless lived in Pontus, and would have been called king of Pontus rather than king of Cilicia. Berenice had been long a widow, as Josephus says,† when she married Polemon: now her husband, Herod of Chalcis, died in A.D. 48-49.

Thus in the 1st cent. A.D. the name Pontus had two distinct meanings: it might denote either the kingdom of Polemon, or the Roman province united with Bithynia. Further, there were other two uses of the name in the 1st cent. after Christ which are revealed to us by inscriptions. The kingdom of Polemon, though called Pontus, did not embrace nearly all the old Mithridatic kingdom of Pontus. Apart from the Roman province Pontus, a great part of western Pontus had been attached to the province Galatia, one part in B.C. 2 (with the cities Amasia and Sebastopolis), another in A.D. 35 (with the city Comana Pontica).‡ This district, then, had to be distinguished from Pontus the province and Polemon's Pontus, and the method of distinction is clearly shown in many authorities: the province was called Pontus simply, Polemon's Pontus was called Pontus Polemoniacus (a name which remained in use for centuries after the death of the last king Polemon), and the part included in the province Galatia was called Pontus Galaticus. Those names are used in Ptolemy's geography and in many inscriptions of the 1st and 2nd cents.: they may be compared with the division of Lycaonia during the same period into two parts, one ruled by king Antiochus and called Lycaonia Antiochiana or simply Antiochiana (a name that continued in use late in the 2nd cent. and occurs in Ptolemy), and one attached to the province Galatia and called Lycaonia Galatica or simply Γαλατική χώρα (see LYCAONIA, and on another similar pair of parts see PHRYGIA).

Still a fourth Pontus is mentioned by Ptolemy and in inscriptions, as Pontus Cappadocius. This included the regions that lay east of Polemoniacus, between the Euxine Sea and Armenia; and it had been comprised in the dominions of Polemon I., whose realm extended so far as to embrace even Bosphorus. Some modern authorities consider on account of the name Cappadocius that it was not in the dominions granted to Polemon II. in A.D. 38. Queen Pythodoris had married Archelaus king of Cappadocia after the death of Polemon I., and there is much obscurity as to the fate of the Pontic realm in the later years of the queen and immediately after her death until A.D. 38; and the opinion has been held by some that the eastern regions were attached to Cappadocia and assigned specially to Archelaus, so that at his death in A.D. 17 Pythodoris continued to reign over only the western part of Polemon's former kingdom. But this is very improbable; for Bosphorus was included along with Pontus in the

* See GALATIA, vol. ii. p. 86.

† On these names for Olba see Ramsay, *Historical Geography of Asia Minor*, p. 364.

‡ Dion Cass. 60. 8. See GALATIA, vol. ii. p. 80 f.

* Josephus, *Ant.* xx. vii. 3.

† Ηλίου χείρην ἐν γυμνασίῳ, xx. vii. 3.

‡ Gazelonitis must also be added, as stated above.

kingdom of Polemon II. from 37 to 41, and if so, eastern Pontus also would naturally be comprised in his dominions. Moreover, Archelaus' kingdom was made into a Roman province in A.D. 17, but Trapezus and Cerasus, two cities of Pontus Cappadocius (Trapezus being made capital of it by Trajan), dated from A.D. 63 as era, and this era must according to analogy be interpreted as the year when they were taken into the Roman Empire by being incorporated in a province. Now A.D. 63 was the year when Polemon's Pontic kingdom was taken into the empire, and the cities of Polemoniacus date from that year as era (so Zela and Neocæsarea); hence Cerasus and Trapezus would seem to have been included in the kingdom of Polemon II.; and if so, then presumably all Cappadocius was similarly included. The difference of name, Polemoniacus and Cappadocius, in that case, probably began only in A.D. 63, and was due to the fact that the eastern half of the kingdom was attached to the province Cappadocia and named accordingly, while the western half was attached to the province Galatia, and retained its former name Polemoniacus in distinction from the older Pontus Galaticus. An inscription, dating probably between 63 and 78, mentions Pontus Polemoniacus and Pontus Galaticus as parts of the province Galatia;* but does not mention Pontus Cappadocius, thus proving that the latter was not in Galatia; and, as we know that Trapezus by that time was Roman, Cappadocia is the only province to which it could have been attached. Such is the probable sequence of events.

Subsequently, Pontus Galaticus and Polemoniacus, after being included in the united provinces of Galatia and Cappadocia from about A.D. 78 to 106, were attached permanently to Cappadocia, when the two provinces were again separated by Trajan. Such is the arrangement described by Ptolemy. Yet the three names, Pontus Galaticus, Polemoniacus, Cappadocius, persisted, with their separate capitals, Amasia, Neocæsarea, Trapezus, implying that they were considered for administrative purposes as distinct regions of the vast province of Cappadocia, to which all three were henceforward attached.

iii. THE NAME PONTUS IN THE NEW TESTAMENT.—When the name Pontus occurs in the NT, what are we to understand by it amid this puzzling complicity of three or even four distinct regions, all bearing the name? As we have seen, the simple name Pontus, without any qualifying epithet, was regularly employed to designate the Roman province united with Bithynia;† and the writers of the NT seem to have observed this rule of ordinary usage. In 1 P 1¹ Pontus is clearly the province. Few could doubt this; and Hort has proved it beyond all question in his posthumous edition of part of the Epistle. Similarly, when the Jew Aquila, who bore a Roman name, is called a man of Pontus, Ac 18², it is practically certain that the province Pontus is meant. The Roman name demands a Roman connexion. The suggestion that he was originally a slave from Pontus Polemoniacus, who had been set free in Rome, seems impossible, as the freedman would not retain his slave nationality: the statement that Aquila was a man of Pontus, implies a lasting and present characteristic. Equally improbable is it that Pontus Galaticus is meant; for in the imperial system that district was merely a part of the province Galatia. In fact, there is practically no

doubt that the intention in Ac 18² is to state that Aquila, though in recent time resident in Rome, was a provincial from Pontus, and not one who originally belonged to the city. The question then arises whether Aquila was a *civis Romanus* of the province Pontus (as St. Paul was a *civis Romanus* of the province Cilicia). That, however, is impossible, for he ranked to the Romans as a Jew, not as a Roman: the edict of Claudius, Ac 18², would not have applied to him if he had been a Roman either by birth or as the freedman of a Roman master;‡ but, being a Jew by nation, a provincial residing in Rome, he was expelled by the terms of the edict.

The remaining case is not so clear. In Ac 2⁹ among the Jews and proselytes in Jerusalem at the Feast of Pentecost are mentioned 'dwellers in Judæa and Cappadocia, Pontus and Asia.' That list presents many difficulties, and is probably not composed by the author of Acts, but quoted by him from an older authority to whom he was indebted for the account of an incident which he himself had not seen (see PHRYGIA, vol. iii. p. 867). Hence it is not possible to say whether Pontus there means the Roman province united with Bithynia, or the whole country with its three distinct parts. But the former is much more probable, for Jews tended to prefer the peaceful and civilized countries, finding them much more suitable for trade and residence; and therefore it is exceedingly unlikely that there were many, if any, Jews in Polemoniacus in the year A.D. 29 or 30. Pontus Galaticus with the great city of Amasia would be more likely to contain Jews. But there is no possibility of reaching certainty about that unique and peculiar passage; and, being unique, it is less important.

iv. SPREAD OF CHRISTIANITY IN PONTUS.—The Churches of Pontus addressed by St. Peter (1 P 1¹) were evidently mainly composed of converted pagans. When that Epistle was composed, it must be concluded that Christianity had already taken strong root in Pontus, as contrasted with its feeble hold on LYCIA and PAMPHYLIA, which are not addressed in the Epistle.† Pontus lay so far from the earliest lines of the Christian propaganda that the strength of the new religion in it is, certainly, to be regarded as an argument in favour of a date later than A.D. 64.‡ It is highly probable that Christianity spread thither by sea from the Asian coasts, and even from Rome (as Hort in the remarkable essay appended to his posthumous edition of 1 Peter is inclined to believe), for it is improbable that any missionary movement occurred at so early a date on the lines leading north from Syria or Cilicia through the barbarous lands of Cappadocia and Pontus Polemoniacus. Thus it was the cities of the *Ora Pontica* or Pontic coast lands which earliest received the new religion; and probably Amastria was its chief centre at first. By A.D. 111-113 it had spread so strongly in the province Pontus that Pliny, governor of *Bithynia et Pontus*, when making a progress through Pontus, wrote to Trajan *Ep.* 96 (probably from Amastria, where he wrote the following letter, 98), giving a remarkable account of the spread of Christianity. He says that many persons, men and women, of all ages and every rank in the state, not merely in the great cities, but also in the villages and on farm lands, were affected by the new superstition, the temples were to a great extent deserted, the sacrificial ritual had been for a long time interrupted,

* *CIL* iii. Suppl. 6818, with the remarks in Ramsay, *Historical Geography of Asia Minor*, p. 253.

† Except, of course, where the context imposed another sense without any need for a distinctive epithet. *Καὶς Πόντος* on coins of Neocæsarea the capital of Polemoniacus means only that region; similarly, on coins of Zela *καὶ Πόντος*. *Πόντος* on coins of Amasia means Pontus Galaticus.

VOL. IV.—2

* Many excellent authorities, in defiance of this obvious and inevitable fact, regard him as a freedman. See Sanday-Headlam, *Romans*, p. 418 ff.

† The failure of Cilicia is due to its being part of the province Syria-Cilicia, and not included in the special group of provinces contemplated, viz. Asia Minor.

‡ See *The Church in the Roman Empire before 170*, p. 284.

and few persons were found to buy animals for sacrifice. This state of the province was of long standing (*diu*), and some who were accused declared that they had abandoned Christianity 20 or 25 years ago.* Hence we cannot believe that less than 40 to 50 years had elapsed since the evangelization of the province began. While it is evident that Pliny is speaking of the province in general, it is noteworthy that it was in Pontus that he finally became so strongly impressed with the evil, and wrote to Trajan for advice about it. Towards the middle of the 2nd cent. Lucian confirms the testimony of Pliny (not that any confirmation is needed to establish the truth of that official report), alluding incidentally to Pontus, the native country of Alexander the impostor of Abonouteichos, as 'filled full with Epicureans and atheists and Christians' (*Alex.* 25). Like Phrygia, Pontus appears in the 2nd cent. as a region where Christianity was so strong that its history was no longer that of a militant religion against paganism, but rather of a contest of sect against sect. The heretic Marcion was born at Sinope in Pontus about 120. Aquila, the translator of the OT into Greek, was also a native of Pontus.

From the coast lands of the province, however, Christianity spread inland only slowly. Incidentally we observe here that it is necessary to distinguish carefully between the different meanings of the name Pontus, for neglect to do so has led some good scholars into needless difficulties. Thus, when Gregory Thaumaturgus was made bishop of Neocaesarea in Pontus about A.D. 240, he is said to have found only seventeen Christians in the country;† and, though no reliance can be placed on the exact number, still a clear tradition, doubtless trustworthy, is implied that Gregory had gone to a practically pagan country. This has been often set in opposition to the facts implied in 1 P 1¹ and in Pliny. But Gregory preached in Pontus Polemoniacus, whose capital was Neocaesarea, while the older authorities speak of the province; and the contrast between the rapid spread in the one and the failure in the other is due to the tendency of the new religion to be restricted to the imperial bounds, to prefer civilized regions to uncivilized (Polemoniacus being remote and backward compared to the province), and to flourish best in districts where there had long been a strong Jewish element to prepare the soil.

Still the inner lands of Pontus appear to have been Christianized to a considerable extent during the 3rd cent. by the work of Gregory Thaumaturgus and other less famous missionaries. Such martyrs as Theodorus Tiro at Amasia, Theodorus the Soldier at Heracleopolis‡ and Eukhaita, with many others,§ are mentioned in the latest persecutions under Diocletian, Maximian, and Licinius. Before the time of Constantine the ecclesiastical system in all the districts of Pontus had been organized to a very considerable degree of completeness, not indeed so perfectly as in Pisidia and Lycaonia, but more thoroughly than in Galatia (see GALATIA, vol. ii. p. 85). For example, Hierocles gives a list of five cities in Pontus Polemoniacus, and three of these were represented at the Council of Nicaea in A.D. 325. But, as a whole, the evidence points to the 3rd and even the 4th cents. as the period when Christianity spread through inner Pontus, while

the 1st and 2nd cents. were the time when the sea-coast, i.e. the province Pontus, was evangelized. Hence it is on the coast, at Sinope, that we find an early martyr, like Phocas the bishop of Trajan's persecution.*

About A.D. 295 Diocletian reorganized the provincial system and broke up the large provinces. The Pontic districts were then completely rearranged. The province Pontus was partitioned between Paphlagonia and Diospontus. The latter, which was afterwards named Helenopontus, after the mother of Constantine, contained also parts of Paphlagonia, Pontus Galaticus, and Polemoniacus. Pontus Polemoniacus retained its name, but was reduced in size, losing Zela to Diospontus, and Sebasteia to Armenia Minor. Pontus Galaticus disappeared entirely, losing Amasia, etc., to Diospontus, Sebastopolis-Heracleopolis to Armenia Minor, Comana, Ibora, and Zela to Polemoniacus, and probably some parts to Galatia the Byzantine province. The ecclesiastical organization followed this new arrangement. W. M. RAMSAY.

POOL is the tr^a in OT of three Heb. words.—1. *בִּקְעָה* *ḥagām*, 'pond' of stagnant or muddy water, from *בָּקַע* to be troubled or muddy. The 'pools', RV 'pools', of Egypt (Ex 7¹⁹ 8⁵ *בִּקְעוֹתַי*, *paludes*), were probably the sheets of stagnant water left by the inundation of the Nile. In Ps 107³⁶ 114⁵ the word is rendered 'standing water,' RV 'a pool of water' (*לִמְוֶה*, *stagnum*); in Is 14²³ 35⁷ 41¹⁵ 42¹⁵ 'pool' or 'pools' (*עֲלוֹר*, *palus*, *stagnum*); and in Jer 51³⁸ it is put for 'reeds,' or reedy places (*סוֹרְעָמָה*, *paludes*). In Is 19¹⁰, whilst the Vulg. renders by *lacuna*, the LXX has *ζῆθος*, 'beer' (see art. FISH-POOL). 2. *מִקְוֶה* *mikveh*, or *מִקְוֶה* *mikvah*; a place where waters flow together, from *קָם* (Niph. 'assemble'). The word is tr^d differently upon each occasion of its use. In Gn 1¹⁰ it is rendered the 'gathering together' (of the waters) when the earth and the seas were created (*רָא סוֹרְעָמָה*, *congregationes* [*aquarum*]). In Ex 7¹⁹ the 'pools,' RV 'ponds' (*רָא עֲלוֹר*, *lacus*), of Egypt were probably reservoirs for the storage of water, as opposed to the stagnant water (*ḥagām*) left by the inundation. In Lv 11³⁶ it is translated 'plenty,' RV 'gathering' (of water) (*סוֹרְעָמָה*, *congregatio* [*aquarum*]). In Is 22¹¹ the 'ditch,' RV 'reservoir' (*בְּדֹשׁ*, *lacus*), made between the two walls at Jerusalem appears to have been formed by damming up the valley.

3. *בֵּרֶכְיָה* *berēkhah*, a 'pool,' or an 'artificial tank' hence the Arabic *birket*, and the Spanish *al-berca*. The LXX generally tr. the word by *κολυμβήθρα*, but in four instances (2 S 2¹³ 4¹³, 1 K 22³⁸, 2 K 20²⁰) by *κρήνη* and in one (Ca 7⁴) by *λίμνη*. The Vulg. has *piscina* and once (Neh 2¹⁴) *aqueductus*. In the NT (Jn 5⁴ 7⁹) *κολυμβήθρα* is used. In Ps 84⁶, where the plural occurs, AV reads 'fillet the pools,' whilst RV has 'covereth it with blessings' (i.e. *berākhot* instead of *berēkhōth*); with this may be compared the 'valley of Berachah,' *καλὰς εὐλογίας*, *vallis benedictionis*, 2 Ch 20²⁸.

The pools were formed by building a dam across a valley, or by excavation; and they were supplied by surface drainage, by springs, or by water brought from a distance by conduits. They allowed the water to deposit any sediment it contained; and they were often connected with aqueducts and baths. They also frequently supplied water for irrigation, and were open to the air. The pools near towns were usually rectangular in form, and had their sides lined with water-tight cement. They were sometimes surrounded by porticoes (*στοαί*), in which bathers undressed themselves and lounded before or after bathing. The

‡ Wrongly called Heracleia in the extant *Acta* (the best being the Armenian, translated by Conybeare, *Monuments of Early Christianity*, p. 224): it bore the double name Sebastopolis-Heracleopolis, and was not far from Eukhaita; see *Acta Sanctorum*, 7 Feb. vol. ii. pp. 23, 891.

§ In the *Martyrology*, *Hieronymus*, the martyrs' names are often very corrupt (see Duchesne's Index, s.v. Amasia, Neocaesarea, Sebastia); see also the Syriac *Martyrology*, 18th Aug.

* The best *Acta* are the Armenian in Conybeare's *Monuments of Early Christianity*, p. 103; see also *Acta Sanctorum*, July 14, vol. iii. p. 603 ff.

pool of Siloam had four such porticoes, and remains of them have been found by excavation; Bethesda, which was a *double* pool, had five porticoes (Jn 5²), one on each of the four sides, and the fifth in the middle between the two pools.

Pools are mentioned in the Bible at Hebron (2 S 4¹²), Gibeon (2 S 2¹²), Samaria (1 K 22³⁸), and Heshbon (Ec 2⁹); and in general terms in Is 14³⁻¹⁹ and Nah 2⁶. At or near Jerus. there were several pools: the Upper P. (2 K 18¹⁷, Is 7³ 36²); the Lower P. (Is 22⁹); the Old P. (Is 22¹¹); the King's P. (Neh 2¹⁴); the P. of Siloah, RV Shelah (Neh 3¹⁸), apparently the same as the P. of Siloam (Jn 9⁷); the 'P. that was made' (Neh 3¹⁶); 'a' P., RV 'the' P. made by Hezekiah (2 K 20²⁰); and the P. of Bethesda (Jn 5²⁻⁴ 7). Josephus also mentions the Serpents' P. (BJ v. iii. 2); Solomon's P. (BJ v. iv. 2); the P. Amygdalon, and the P. Struthius (BJ v. xi. 4). Many of the ancient pools may still be seen in Palestine. The best known are those at Hebron and Jerusalem, and the 'pools of Solomon,' near Bethlehem, which are possibly the 'pools of water' (Ec 2⁶) that Solomon constructed to irrigate his gardens and orchards. These pools are three in number, and they have been formed by building solid dams of masonry across the valley of Urtas. They have a total capacity of 44,147,000 gallons, and are so arranged that the water from each of the higher pools can be run off into the one immediately below it. The water was conveyed to Jerusalem by a conduit.

C. W. WILSON.

POOR.—1. This word, especially when it represents the Heb. *anā*, is used sometimes with a semi-religious connotation, the nature of which it is the object of the present article to explain. In order to understand the term satisfactorily, it is necessary to bear in mind the meaning of the cognate verb, Heb. *anā*, Arab. *anā* (*anā*²). The Arab. *anā* means *to be lowly, submissive, obedient*, especially by becoming a captive, and so the ptc. is often used simply in the sense of *a captive*:¹ the Heb. *anā* means analogously *to be humbled*, Is 31⁴ (RV 'abase himself'), in the causative conj. *to humble, mishandle*, esp. by depriving of independence, or liberty, or recognized rights (EV usually 'afflict'): cf. Gn 16⁶ (RV 'dealt hardly'), Jg 19²⁴ ('humble'),—in both, parallel with 'do to her (them) that which is good in thy (your) eyes,' Gn 31³⁰ (of the maltreatment of wives by a husband), Ex 22²²⁻²³ (of the ill-treatment of a widow or orphan), Jg 16³⁻⁶ 10 (of ill-using Samson); and often of the ill-treatment of a nation in bondage, as Gn 15¹³ ('to serve'), Ex 1¹¹⁻¹² (cf. v. 13 'make to serve'); see also 2 S 7¹⁰ (Ps 89²²), Ps 94⁴.

2. The subst. *anī* (EV mostly 'afflicted,' or 'poor') thus means properly *one humbled or bowed down*, especially by oppression, deprivation of rights, etc., but also, more generally, by misfortune: as the persons thus 'humbled' would commonly be the 'poor,' the term came to denote largely the class whom we should call the 'poor,' and 'poor' is thus one of the conventional renderings of the word: it must, however, be remembered that *anī* does not really mean 'poor,' and that while in the English word 'poor' the prominent idea is the poverty of the person or persons so described, in the Heb. *anī* the prominent idea is that of the ill-treated, or the miserable: in other words, the *anī*, while often, no doubt, a person in need, was primarily a person suffering some kind of social disability or distress.

3. *anī* *rāsh*, is the Heb. word which expresses distinctively the idea of poverty; but this occurs only 1 S 13²², 2 S 12¹⁻³ 4, Ps 89³ (RV 'destitute'), Ec 4¹⁴ 5⁸, and 15 times in Proverbs.

* See Rahlfs, *U und V in den Psalmen*, 1892, pp. 67-69.

¹ Comp. the cognate subst. *anī*, *state of being humbled or bowed down*, EV 'affliction,' Gn 16¹¹ 31⁴², Ex 3⁷⁻¹⁷, Is 43¹⁰ *al.*

It is worth noticing (Rahlfs, p. 75) that *anī*, 'rich,' never appears as the opposite of *anī*, while it is the true antithesis of *rash* (2 S 12¹⁻² 4, Pr 14³⁰ 18²² 22⁷ 29⁸).

'Poor' is also sometimes the tr. of *ebyon*, 'needy'; and often that of *dal* (prop. *thin, reduced, feeble*): cf. Driver, *Parallel Psalter*, pp. 450, 452. *Ebyon* is once opposed to *anī*, Ps 49²; and *dal* is opposed to it 5 times, Ex 30¹⁵ Pr 10¹⁵ 22¹⁶ 28¹¹ Ru 3¹⁰.

It is to be regretted that there is no English word which would both suit all the passages in which *anī* occurs, and also indicate its connexion with *anāh*, *innāh*, and *anī*.

4. In the laws of Ex 22²⁵, Lv 19¹⁰ (=23²²), Dt 15¹¹ 24¹² 14¹⁵, now, *anī* is used as a purely colourless designation of the persons whom we should describe as the 'poor.' But in the prophets and poetical books, esp. the Psalms, we see gradually other ideas attaching themselves to the term. Thus allusions are made, especially by the prophets, to the oppression of the *anīyyim*, at the hands of a high-handed and cruel aristocracy (Am 8⁴ [Heb. marg.], Is 3¹⁴ 10² 32⁷ [Heb. marg.], Ezk 16⁴⁰ [in Sodom], 18¹² 22²⁹; Job 24⁵ 9¹⁴, Pr 30¹⁴); so that they become the objects of special regard on the part of a righteous king (Jer 22¹⁸, Ps 72⁴⁻¹²), or individual (Ezk 18¹⁷, Is 58⁷, Zec 7¹⁰, Ps 82⁸, Pr 22²² 31⁹⁻¹⁰; cf. Pr 14³¹ [Heb. text], Dn 4²⁷), and especially of Jehovah (Is 14³², cf. v. 30; implicitly, also, in the other passages quoted).

5. Comp. the allusions to the oppressions of the 'needy' (*anī* in Am 2⁶ 4¹ 5¹² 8⁴ 6, Is 32⁷, Jer 24⁵ 30 and elsewhere, and of the 'reduced' (*anī*, EV 'poor') in Am 2⁷ 4¹ 5¹¹ 8⁵, Is 10² etc. (both words often in parallelism with *anīyyim*); and the manner in which it is promised that they will be in a special degree under the protection of the ideal king (Ps 72⁴⁻¹² 13, Is 11⁴), and that—like the *anīyyim* in Is 14³⁰—they will be the first to benefit, when society is regenerated, and J¹ establishes His ideal kingdom (Is 14³⁰ 25⁴ 29¹⁹).

6. So in Ps 18²⁷ God is spoken of as saving the 'afflicted (or humbled) people' (*anī* *anī*), but as abasing the 'haughty eyes'; and in Is 26⁶, when the tyrannical city has been destroyed, it is mentioned, as a special ground for satisfaction, that the *anī* and the *dallim* may then tread unmolested over its ruins. *Anī* is used also of Israel, suffering in the wilderness or in exile or war, and regarded as implicitly or ideally righteous, and eliciting in consequence Jehovah's compassion, Ps 68¹⁰, Is 41¹⁷ 49¹³ 51²¹ 54¹¹, cf. Hab 3⁴. In Zeph 3¹² the ideal Israel of the future, who survive after the coming judgment has removed from Jerusalem the 'proudly exulting' ones, so that none will any more be 'haughty' in God's holy mountain, are characterized as a 'humbled and poor people' (*anī* *anī*), who will 'take refuge' in the name of J¹, and (v. 13) be free from all iniquity. Perhaps, indeed, the expression means also Israel generally in Is 26⁶.

7. These passages show that *anī* ('afflicted,' 'poor'), as also its frequent parallel *ebyon* ('needy'), and, though somewhat less distinctly, *dal* (EV also mostly 'poor'), came gradually to imply more than persons who were merely in some kind of social subjection, or material need: they came to denote the *godly* poor, the suffering righteous, the persons who, whether 'bowed down,' or 'needy,' or 'reduced,' were the godly servants of Jehovah. It is evident that in ancient Israel, especially in later times, piety prevailed more among the humbler classes than among the wealthier and ruling classes: indeed the latter are habitually taken to task by the prophets for their cruel and unjust treatment of the former. In particular, as Rahlfs (p. 89) observes, *anī* acquired thus, not indeed a religious meaning, but a religious colouring. This colouring appears most frequently in the Psalms: note the following passages, in which, if they are compared carefully with the context, it will become evident that the *anīyyim* (frequently || with the 'needy') are substantially identical with those who are elsewhere in the same Psalms called 'the godly,' 'the righteous,'

'the faithful,' etc.: Ps 91² (Heb. text *; RV) 102². 9. 12 (Heb. text *; RV) [comp. 91² 'those that know thy name' and 'that seek after thee,' 101⁷ 'the humble' (see below)]; 12⁵ [see v. 1 'the godly,' 'the faithful']; 14² [v. 1 'for J' is his refuge']; 18²⁷ 22²⁴ 25¹⁶ ('I am solitary and 'ānī'; cf. 69²⁹ 88¹⁵, 34⁹ 35¹⁰. 10 (delivered by J'), 37¹⁴ (cf. v. 12), 40¹⁷ = 70⁵ ('I am 'ānī and needy'; so 86¹ 109²², 74¹⁹. 21 102¹⁰ 109¹⁶ 140¹³; see also Is 66², Joh 34²⁸ 36⁵. 15 (cf. the cognate subst. 'ōnī, AV 'trouble,' or 'affliction,' in Ps 91³ 25¹⁸ 31⁷ 88⁹ 119²⁰. 92. 153, of the Psalmists' own sufferings; also 44²⁴ 107¹⁰. 41). Most of these passages—indeed, except Ps 18²⁷, probably all—are post-exilic; and reflect the social and religious conditions of the post-exilic community: the religious 'colouring' of 'ānī, which had been previously in process of acquisition, was then confirmed. The troubles of which the 'ānī complains are, however, not *poverty*, but chiefly social and religious wrongs.

8. From 'ānī is to be carefully distinguished a word with which it has been sometimes very needlessly confused, 'ānāw. While 'ānī means one who is 'humbled' or 'bowed down' by adverse external circumstances, 'ānāw means one who is 'humble' in disposition and character, 'humble-minded' (Cheyne, *OP*, 98), or, to speak more specifically, one who bows voluntarily under the hand of God, and is 'submissive to the Divine will' (Cheyne, *Introd. to Is.* 64 f., 266). It thus, unlike 'ānī, has from the beginning an essentially moral and religious connotation. In AV and RV it is mostly rendered 'meek'; but meekness is predicated of a person's attitude towards other men, whereas 'ānāw denotes rather a man's attitude towards God; so that 'humble' would be the better rendering. 'Ānāw is less common than 'ānī: it occurs in Nu 12³ (of Moses); in the prophets, Am 2⁷ 8⁴ (Heb. text †), Is 11¹ 29¹⁹ 32⁷ (Heb. text †) 61¹, Zeph 2³; in the poet. books, Ps 91⁸ (Heb. text †), 101⁷ 22²⁵ 25⁹. 9 34³ 37¹¹ ('the humble shall inherit the earth'), 69³³ 78⁹ 147⁸ 149⁴, and the Heb. margin of Pr 3³⁴ (opposed to עָרַב 'scorners'), 16¹⁹ (opposed to 'the proud'; cf. Sir 10¹⁴ [Heb.]),—in all, of the 'humble,' either as victimized by wicked oppressors, or as the objects of Jehovah's regard, and recipients of His salvation. § The cognate subst. 'ānāwāh occurs Ps 18³⁵ (of J'), 45¹¹, Zeph 2³ ('seek righteousness, seek *humility*'), Pr 15³³ = 18¹² ('before honour is *humility*'), 22⁴.

9. The Heb. marg. (*Kerē*) substitutes thrice (Am 8⁴, Is 32⁷, Ps 91⁸) *humbled* ('poor') for *humble* of the text (*Kethibh*); and five times (Ps 91² 101², Pr 3³⁴ 14²¹ 16¹⁹) *humble* for *humbled* ('poor') of the text (*Kethibh*).—In each case, it seems (cf. Rahlfs, p. 54 f.), deeming the correction to express an idea better suited to the context (in Am 8⁴, Is 32⁷, Ps 91⁸ the parallel clause has *needy*; in Pr 3³⁴ 16¹⁹ *humble* forms evidently a juster antithesis to 'scorn' and 'proud' than *afflicted* or 'poor'). The correction is certainly right in Pr 3³⁴ 16¹⁹, probably also in Am 8⁴; in the other passages it does not seem to be necessary.

10. The two terms which have been here discussed seem, in fact, to have been two of the more prominent and distinctive designations of a party in ancient Israel, which appears to have first begun to form itself during the period of the later pre-exilic prophets, but which, during the Exile and subsequently, acquired a more marked and distinctive character—the party, viz., of the faithful and God-fearing Israelites, who held together, and formed an *ecclesiola in ecclesia*, as opposed to the

worldly and indifferent, often also paganizing and persecuting, majority. The Psalms, especially the Psalms of 'complaint,' abound with allusions to these two opposed parties, the opposition between which seems to have been intensified in the post-exilic period, till it culminated, in the age of Antiochus Epiphanes, in the struggle between the nationalists and the Hellenizers. The God-fearing party are described by many more or less synonymous designations, such as 'those that fear (or love) J', 'those that seek (or wait for) J', 'the servants of J', the 'godly' (*hāsīdīm*), the 'righteous,' etc.; from the point of view of their social condition they are specially the 'āniyyim or (to adopt the conventional rendering) the 'poor,' from the point of view of their character they are the 'ānāwim or the 'humble.' The party opposed to them are the 'wicked,' the 'evil-doers,' the 'proud,' the 'haters,' 'enemies,' or 'persecutors' of the Psalmists and their co-religionists, who are described as 'seeking their life' and 'delighting in their hurt,' etc., and as setting themselves in various ways to dishonour Jehovah, and bring reproach upon His servants (cf. Cheyne, *JRL* pp. 114-125).* The former party was that out of which a considerable number of the Psalms appear to have sprung, especially those which possess a *representative* character, and in which the Psalmist seems to give expression not simply to his own experiences and spiritual emotions, but also to those of a circle of similarly circumstanced godly compatriots.

See, further, Grätz, *Die Psalmen* (1882), 20-37 (whose view, however, that the 'ānāwim were Levites, is not probable); Isidore Loeb, 'La Littérature des Pauvres' in *REL*, 1890-92 (Nos. 40-42, 45, 46, 48), also published separately, Paris, 1892 (clever: exemplifies very fully the characteristics of the 'poor,' especially in the Psalms, but exaggerates the idealism of the Heb. poets, and also generalizes too freely); Rahlfs, *op. cit.* Hupfeld (on Ps 91³) contended that עָרַב and עָרַב were used without any distinction of meaning, both signifying *afflicted*, with the collateral idea of *humble*; but this view is antecedently improbable, and not required by the facts. † Ges. (*Thes.*) treated both words as meaning properly *afflicted*, but regarded 'ānāw as having always the collateral idea of *humble, meek*. Recent scholars, as Delitzsch and Cheyne (both on Ps 91³), Lagarde, *Mith.* i. 81, Rahlfs, pp. 62-66, 73-80 (cf. König, *Lph.* ii. 184, 76), more correctly distinguish 'ānī, 'bowed down,' from 'ānāw, 'one who bows himself,'—Del. and Cheyne, however, thinking also that, as affliction is the school of humility, and a man may be 'bowed down' with consent of his own will, 'ānī acquired secondarily the sense of 'humble.' It seems best, with Rahlfs, to keep the words entirely distinct: the 'āniyyim were, no doubt, known to be also 'humble,' and so could be opposed to the 'proud,' Ps 137, or classed with the 'stricken in spirit,' Is 66²; but the fact is not expressed by the term used. It would be easier, if necessary, to read one word for the other, than to give one word the meaning of the other. The LXX preserves, on the whole, a consciousness of the distinction between the two words: the translators render 'ānī (*Kt.*) by εἰς 13 times, by τρυφεύς 38 times, by ταπεινός 9-10 times, by ἁπλῆς only Zeph 31², Zec 9⁹, Is 26³; and 'ānāw (*Kt.*) by ἁπλῆς 8 times, by εἰς 3 times, by τρυφεύς 4 times, by ταπεινός 4 times: in view, however, of the frequency with which ε and ι are confused in LXX (Driver, *Samuel*, lxxv-lxxvii), we cannot be sure that they always read the Heb. text exactly as we do. In the Targ., also (especially in the Psalms, Rahlfs, p. 56 f.), the greatly predominant rendering of 'ānī is 'poor,' 'distressed,' etc., while that of 'ānāw is 'humble' (חַסִּדִּים). And the Vulg. nearly always renders 'ānī by *pauper, egenus, inops*, but 'ānāw by *mīlis* or *mansuetus*.

S. R. DRIVER.

POPLAR occurs twice in EV (Gn 30⁷, RVm 'styrax,' Hos 4¹³). The Heb. עֵץ לִבְנֵחַ, signifies 'a white tree.' The LXX in Genesis gives *στυράκιος* = *storax*, and in Hosea λεύκη = 'poplar.' The authority of the Arab. *lubna*, which signifies the *storax*, may be considered decisive as to the meaning of the Hebrew. *Styrax officinalis*, L., of the order

* Rahlfs, following Ewald, calls attention (pp. 5-29) to the numerous similarities of expression and situation characterizing in particular the group of Psalms, 22. 25. 31. 34. 35. 38. 40. 69. 71. 102. 109; he assigns the group (p. 30 ff.) to the close of the Exile or shortly after.

† The note is much abbreviated (the sentence on the original difference of עָרַב and עָרַב being added) in Nowack's revised ed. of Hupfeld's *Comm.* (1888).

* The Heb. marg. (*Kerē*) has in these passages the *humble* (RVm 'meek'): see § 9.

† The Heb. marg. (*āniyyē*), followed by RV, yields, however, a more suitable sense here; it would also be better to read 'āniyyē in 27 (cf. Is 10²).

‡ Heb. marg. (*Kerē*) the *poor*; see § 9.

§ With Is 61¹ (LXX, wrongly, τρυφεύς), and so in the quotation, Lk 41⁸ (cf. Mt 11⁵ = Lk 7²²).

¶ Where 'ride on on behalf of . . . meekness (humility)' means that the king addressed is to take the field on behalf of the humble against their proud oppressors (see Cheyne or Kirkpatrick, *ad loc.*).

Styracacea, is a shrub or tree 6 to 20 feet high, with ovate to round-ovate leaves, glabrescent at upper, and white-woolly at lower, surface. It bears numerous snowy-white flowers, resembling orange blossoms, 1 to 2 inches broad, and a green drupe-like berry. The officinal storax is the inspissated juice of the inner layer of the bark. It has an agreeable vanilla-like odour. It was formerly employed in medicine as a stimulant expectorant, but is little used now. The name *libneh*, 'white,' is well justified by the snowy-white under surfaces of the leaves, and the wealth of beautiful white blossoms. No wild tree of the country is more ornamental than this. It is common in thickets from the coast to the sub-alpine regions. In Syria it is called *hanz*. It has been objected to the rendering 'styrax' (Hos 4¹³) that it is not large enough to give the 'shadow' required, and that therefore 'poplar' should be retained. We have, however, indicated that *Styrax officinalis* attains a height of 20 feet, and such trees would give a better shade than the tall, cylindrical poplar. Moreover, the poplar is a tree of valleys and plains, growing only by water-courses, while *Styrax* grows on dry hillsides, in localities similar to those of the oak and terebinth.

G. E. POST.

PORATHA (מִרְיָה; B פֶּרַדְדָּה, נ פֶּרַדְדָּה, A בֶּרְדָּה).—The fourth of the sons of Haman, who were put to death by the Jews (Est 9⁸). The name is probably Persian, and the LXX reading suggests that the true form is Poradatha (מִרְיָה = 'given by fate').

PORCH.—A covered entrance to a building. It is generally outside the main building, and so differs from vestibule which is inside, and from which doors open into the several apartments of the house. Two words in OT denote porch, viz. Heb. מִלְּא (‘*elām*’), found in Ezk 40 only, and מִלְּא (‘*ulām*’), which occurs in 1 K, 1 and 2 Ch, Ezk, and Joel. As to the identical meaning of these Heb. words see under ARCH.

There is another Heb. word מִסְדֶּרֶן (*misdērōn*), which EV tr. by porch (Jg 3² 'Then Ehud went into the porch'). This word is not used elsewhere; and while we do know that some part of a house is denoted, we have no means of saying what part. The versions render little if any aid, nor do the cognates throw any light on the meaning. The root is סָדַר (*seder*), a row, series, order. So מִסְדֶּרֶן (*misdērōn*) might be expected, according to its etymology, to denote something built in line with or according to the form of something else, such as a wing, built along the outside walls of a porch, with sides at right angles to the main building.

The word ‘*ulām*’ or ‘*elām*’ is variously applied in OT.

1. It is used of the porch erected to the east of Solomon's temple, 1 K 6³ and 7¹⁹, and 2 Ch 15²⁹⁻³⁷. It was 20 cubits long by 10 broad; its height is not given in 1 K, but in 2 Ch 3⁴ it is said to be 120 cubits high. Now, a porch 20 cubits long, 10 broad, and 120 high would be a monstrosity; indeed the whole verse as it stands is senseless. Kautzsch, Bertheau, Oettli, and Kittel attempt a reconstruction, and all agree that 120 for the height is an evident mistake; A of the LXX, the Syr., and Arab. versions have 20, which is likely enough to be correct, though Bertheau prefers reading 30. Aug. Hirt (*Der Tempel Salomo's*, p. 4), together with the above authorities, excepting Bertheau, decide for 20. If the text is to be upheld, it is to be explained, as by Ewald (*Gesch.* iii. p. 42), according to the well-known leaning of the Chronicler to exaggeration; but in this case the exaggeration is one which

makes the writer ridiculous, and it is far better to emend the text. The similarly situated porch of Ezekiel's temple has the same name, Ezk 40⁴⁸ 41¹⁵ (read with Cornill, sing. 'porch'). 2. The same word is employed for each of the two porches belonging to Solomon's palace, the 'porch of pillars' 1 K 7⁶, and the 'throne porch' (or place of judgment), 1 K 7⁷. 3. In Ezk the word stands for the two large apartments, one lying at the inner end of the outer gate, the other at the outer end of the inner gate. It is in this connexion that the form ‘*elām*’ is mostly, though not exclusively, employed. Of these minor porches there were in all six: one at each of the three outer (N. E. S.), and one at each of the three corresponding inner gates.

In NT three separate Gr. words are translated in EV 'porch.'

1. Mk 14⁶⁸ 'And he (Peter) went into the porch.' The Gr. word (προαύλιον) denotes a covered way leading from the street into the court of a house; a sort of passage. 'Forecourt' is the word given in RVm. 2. Mt 26⁷¹ 'And when he (Peter) was gone out into the porch.' This passage is parallel with the former, and, though πύλον usually means door, doorway, there can be no doubt that it has here the same signification as προαύλιον in Mk. 3. Jn 5² 'Now there is in Jerus. by the sheep gate a pool, which is called in Heb. Bethesda, having five porches.' These porches (σκολα) are simply five covered ways joining the street with a pool. In three other places, in each case in the phrase 'Solomon's porch,' is the word σκολα found (Jn 10²³, Ac 3¹¹ 5¹²). This was a portico on the eastern side of the temple building, hence called by Jos. (*Ant.* XX. ix. 7) σκολα ἀνατολική, and supposed by him to have survived the destruction of the temple in B.C. 586, and to go back to Solomon's own day (*ib.* XIV. xi. 5, XX. ix. 2; *Wars*, v. v. 1). It is generally agreed that this eastern porch, as well as the other porches existing in our Lord's time, were due to Herod's restoration; yet, if this porch was built so near the time of Josephus, it is singular that he should have thought it to be the work of Solomon.

T. W. DAVIES.

PORCIUS FESTUS.—See FESTUS.

PORCUPINE.—See BITTERN.

PORPOISE.—See BADGER.

PORT.—This word has in its time played many parts. It has meant (1) carriage of the body, demeanour (from Lat. *portare*, to carry); (2) a harbour (from Lat. *portus*); (3) an entrance, a gate (from Lat. *porta*, through Fr. *porte*); and (4) a wine (from Oporto, in Portugal). Of these meanings (1) and (3) are now almost obsolete. In AV the only occurrence of the word is Neh 2¹³, where it means 'gate,' the same Heb. word (שַׁעַר) being translated 'gate' in the same verse. In Ps 9¹⁴ Pr. Bk. there is an instance of the same meaning, 'That I may shew all thy prayes wyth in the portes of the daughter of Syon.' Knox often uses the word, sometimes adding 'gate' as if the classical 'port' might not be familiar. Thus, *Hist.* p. 408, 'They caused to keep the Ports or Gates and make good Watch about the Towne'; *Works*, iii. 311, 'Let every man put his sworde upon his thygh, and go in and out from porte to porte in the tentes; and let every man kil his brother, his neyghbour, and every man his nigh kynsman'; p. 323, 'They begynne to syncke to the gates of hell and portes of desperation.' Davies quotes Scott's line in *Bonn's Dundee*—

'Unheuk the West Port, and let us gae free.'

J. HASTINGS.

PORTER (רִשְׁיָה, in Ezr 7²⁴ Aram. ܩܪܝܐ; LXX πυλωρός and θυρωρός, NT θυρωρός) occurs frequently in our English versions, especially in the Bks. of Chronicles and Ezra-Nehemiah. It has always the sense of *gatekeeper* (French *portier*), being a derivative from *porta*, 'a gate.' Owing to the ambiguity of the Eng. word, which also means the *carrier of a burden* (French *porteur*, from *porter*, 'to carry'), it would have been well if 'gatekeeper' had been uniformly adopted as the rendering of the Heb. and Gr. terms. RV has at least 'doorkeepers' in 1 Ch 15¹⁸ 16²⁸ 23⁵ 26^{1, 12, 19}, 2 Ch 8¹⁴.

For the employment of 'porters' in public or private buildings, as well as at sheepfolds (Jn 10³), see art. GATE in vol. ii. p. 113^a; and for the duties and the organization of the Levitical 'porters,' see art. PRIESTS AND LEVITES. J. A. SELBIE.

POSIDONIUS (Ποσιδώνιος).—An envoy sent by Nicanor to Judas Maccabæus (2 Mac 14¹⁹, cf. 1 Mac 7²⁷⁻³¹).

POSSESS.—The verbs *possidere* and *possidere* are said to be distinguished in Latin, the former meaning 'to have in possession,' 'own,' the latter to 'take possession of,' 'win.' The Eng. verb 'to possess' adopted both meanings. In AV it nearly always means 'to take possession of,' 'win.' This is sometimes evident, as Nu 13³⁰ 'Let us go up at once and possess it'; Jos 13¹ 'There remaineth yet very much land to be possessed.' But sometimes it is not so, as Gn 22¹⁷ 'Thy seed shall possess the gate of his enemies'; Lk 18¹² 'I give tithes of all that I possess'; 21¹⁹ 'In your patience possess ye your souls'; * 1 Th 4⁴ 'That every one of you should know how to possess his vessel in sanctification and honour.' Cf. Fuller, *Holy Warre*, 14, 'The Saracens had lately wasted Italy, pillaged and burned many churches near Rome it self, conquered Spain, invaded Aquitaine, and possessed some islands in the mid-land-sea'; and Ac 1¹⁸ Rhem. 'And he in deede hath possessed a field of the reward of iniquitie.'

Sometimes the meaning is to 'enter into possession,' 'inherit,' as Job 7³ 'So am I made to possess months of vanity' (לֹא יִרְשֶׁהָ יָמַי); Zec 8¹² 'I will cause the remnant of this people to possess all these things' (יִרְשֶׁהָ, RV 'I will cause . . . to inherit').

So 'to be possessed of' a thing is to inherit it, to have it in possession, Jos 22⁹ 'the land of their possession, whereof they were possessed.' Cf. Fuller, *Holy Warre*, 213, 'Charles subdued Manfred and Comadine his nephew . . . and was possessed of Sicilie, and lived there.' The active form is found in Knox, *Hist.* 285, 'Them hee possessed in the Land of Canaan.'

To be possessed with a spirit (of good† or evil) is in Ac 8¹⁷ 16¹⁸ simply to be 'held' by the spirit, but elsewhere means to be under the influence of a demon (δαμονιζόμενος). See next article.

J. HASTINGS.

POSSESSION means the control or mastery of the

* The Greek of this familiar passage is ἐν τῇ ὑπομονῇ ὑμῶν κτήσασθε τὰς ψυχὰς ὑμῶν. There is a various reading κτήσασθε for κτήσασθε well supported and adopted by Tischendorf. But with either form the meaning is 'gain possession of,' 'win' (RV), not 'hold in possession,' which would demand the perf. tense. The Vulg. gives *possidebitis*, after which Wyc. 'ye schulen welde'; Tind. has 'With youre patience possesse youre soules,' and he is followed pretty closely by subsequent versions, the meaning probably always being 'win.' But that the modern misunderstanding is not very modern may be shown from Clement Cotton's tr. of Calvin's *Isaiah* 40² (p. 400), 'He is earnest in giving of hope to the godly, wishing them to possesse their soules in patience, until the Prophets were sent unto them with this joyfull and comfortable message.' The Latin is *qua patienter deoerent morae tedium*.

† Cf. Tindale's *Works*, i. 97, 'The Faith only maketh a man safe, good, righteous, and the friend of God . . . and possesseth us with the Spirit of God.'

will of an individual by another and superhuman personality. This is a familiar feature in early Jewish psychological beliefs, bound up with the prevalent demonology and angelology of pre-exilic and post-exilic Israel. See art. DEMON in vol. i., and for NT especially, p. 593.

That psychological relations were in primitive times construed in material and spatial forms need not be argued here. It is obvious even from a superficial examination of the language employed. Thus in 1 S 16¹⁸ the 'evil spirit from God' is said to be *upon* (עַל) Saul, and the same preposition is employed in Is 61¹ of the spirit with which God inspires the prophet. Cf. the use of the phrase 'the hand of the LORD was upon . . .'. The spirit of God passed into (אֵין) Saul when he prophesied (1 S 10¹⁰ 18¹⁰). On the other hand, in 1 S 16¹⁴ the evil spirit is said to terrify (מַחַח) Saul. In the vision of Micah the deceiving spirit proceeds from the presence of Jehovah, and is 'in the mouth' of His prophets (1 K 22²³).

The same language, therefore, is employed of Divine inspiration as of possession by an evil spirit. The supernatural agency was considered to pass into the individual and take possession of him, and he became visibly affected thereby. The lips of the prophet were for the time under the control of the Divine supernatural will, which spake by the mouth of the holy prophets (Lk 1⁷⁰; but the same power might also cause dumbness, cf. vv. 20. 22). While admitting that in some cases we have no more than the inevitable language of metaphor, the cumulative evidence of analogy leads us to refrain from pressing this view unduly. Thus the necromancer was considered to be occupied for the time by the spirit of the dead, and was said to be *בְּחַיָּת הַמֵּת*, though language in this case appears to invert the relation (see *Necromancy* under SORCERY). Similarly, the demon or evil spirit was believed to enter or pass out of the human subject or to be driven out. While subject to his influence, the individual was said to be *δαμονιζόμενος* (in Arab. مَجْنُون *mejnún*, or possessed by a *Jinn*).

Demon-possession was manifested by anything abnormal in personal appearance, especially in the strange look of the eyes. Among the many stories about Jân related by Doughty in his *Arabia Deserta* (vol. ii. p. 188 ff.) the following statement by Amm Mohammed is a good illustration:—

'Last year a Jinn entered into this woman, my wife, one evening: and we were sitting here, as we sit now; I, and the woman, and Haseyn. I saw it come in her eyes, that were fixed, all in a moment; and she lamented with a labouring in her throat. . . . This poor woman had great white rolling eyes, and little joy in them' (p. 191).

Anything of an unhealthy nature, such as an uncanny expression; any disease, and especially epilepsy or insanity, was ascribed to demon-possession. Epilepsy, in fact, derives its name (*ἐπιληψία*, *ἐπιληψία*) from having been regarded as due to an assault by demons (cf. Mk 9¹⁸). In New Hebrew the epileptic patient is called *הֶפְזֵן* 'over-

powered' (cf. Syr. ܥܦܙܐ). In the NT the demon was said to 'bind' (δένειν), seize and rend (*καταλαβεῖν* and *ῥήσσειν* in the graphic passage Mk 9¹⁸), enter and pass out of (*εἰσερχέσθαι* and *ἐξέρχεσθαι*) the human subject. The terms predicated of the human subject may be found in art. DEMON, vol. i. p. 593. Animals were likewise affected, Mk 5¹⁴.

Among the Jews and other nations of antiquity magical formulae were employed in which the potent names of supernatural powers were recited. Among the Jews this was chiefly the name of Jehovah varied in all possible forms, while among the Christians the name of Christ was so employed. See article MAGIC and also EXORCISM.

Other remedies of a material character were also used. It is doubtful whether in Ja 5¹⁴ there is anything of a magical or semi-magical character, implying a belief in demon-possession. It should be noticed, however, that in this case the 'name' was invoked, just as in exorcisms.

OWEN C. WHITEHOUSE.

POST.—i. *Door or gate-post.*—1. לָא, rendered 'lintel' in 1 K 6³¹ (RVm 'posts'), where, probably, the stone case of the door is intended; as also in Ezk 40 and 41, where RV prefers 'jambs' to AV 'posts.' It is derived from לָא as indicating what projects in front of or around the door. 2. אָרָה (possibly from אָר in a metaphorical sense), once rendered by AV 'posts' (Is 6⁴); RV substitutes 'foundations.' 3. אָרָה, from an unused root אָר 'to move oneself about,' applied to the post on which the hinges turn. In later times the name was transferred to the small cylinder attached to the doorpost, containing a strip of parchment on which are written these two passages, viz. Dt 6⁴⁻⁹ and 11¹³⁻²¹. Every pious person on passing out or in touches this reverently, and then kisses his finger. 4. אָרָה, from root אָרָה 'to spread out,' rendered 'post' three times in AV (2 Ch 3⁷, Ezk 41¹⁶, Am 9¹). In each case RV rightly substitutes 'threshold.'

On the doorposts the blood of the lamb was sprinkled (Ex 12⁷ etc.); and here the words of the law were to be written (Dt 6⁹ etc., see No. 3, above). Moslems copy the Jews in writing verses from the Koran on their doorposts. The German Temple Christians in Palestine have engraved a text of Scripture over every doorway in their colonies. A servant who wished not to avail himself of the law of freedom was brought by his master 'unto God,' 'unto the doorpost,' and had his ear pierced with an awl (Ex 21⁶). A special sanctity seems in the East always to gather round the doorway (see art. THRESHOLD). To this it may be due that while the woodwork of the temple was of Lebanon cedar, the doorposts were made of native-grown olive (1 K 6³³).

ii. *Carrier of letters or despatches.*—רָץ, pl. רָצִים ('runners'), once (2 K 11¹³) רָצִין, from רָץ 'to run.' The 'runners' formed the royal guard (1 S 22⁷, see art. GUARD), kept the king's house, and were available for other service (1 K 14²⁶, 2 K 10²³ 11⁴⁶). From them were chosen the couriers, who conveyed royal mandates throughout the kingdom (2 Ch 30⁴, Est 3¹²⁻¹⁵). Those of the Persian monarch were mounted on 'swift steeds' (Est 8¹⁰⁻¹⁴ RV*). The swiftness characteristic of this service gives point to the saying of Job 9³ 'My days are swifter than a post.' W. EWING.

POT.—See FOOD in vol. ii. p. 40, s. 'Vessels.'

POTIPHAR (פּוֹתִיפָר; LXX in Gn 37³⁶ Α Πετεφρῆς, E Luc. Πετεφρῆς, in 39¹ ADE Luc. Πετεφρῆς; † Vulg. Putiphar).

The name is generally regarded (e.g. by Ebers, in Smith, *DB* i. ii. 1794*) as a Heb. abbreviation of Potiphara פּוֹתִיפָרָה, in which case it would be Egypt. *P'-dy-p'-R'*, and mean 'He whom the Ra (or the Sun-god) gave'; see Sethe, *De aleph prothetico in lingua aeg. verbi formis praeposito*, 1892, p. 31 (a reference, for which the writer is indebted to Mr. F. L. Griffith, who quotes as parallel formations *P'-dy-Imn* 'He whom Ammon gave,' *P'-dy-'st* 'He whom Isis gave.' Sethe also observes that in Greek transcriptions the first two syllables are commonly represented by Πτε-, as in Πτεφρῆς itself, Πτεφρῆς, Πτεφρῆς, Πτεφρῆς, etc., and refers, for a long list of such names, from papyri and other sources, to

Parthey, *Aeg. Personennamen*, 1864, p. 79 ff. Lieblein's proposal (*PSBA*, 1898, p. 208 f.) to identify 'Potiphar' with the isolated and uncertain *Pt-ber* (p. 24 n.*), does not make the etymology any clearer.

The name of the 'officer' (פָּרִיס, lit. *eunuch*) of Pharaoh, and 'captain of the body-guard' (פָּרִיסִים; see vol. ii. p. 768* n. †), to whom Joseph was sold by the Midianites (Gn 37³⁶), and who appointed Joseph to wait upon the prisoners confined in the state-prison (ib. p. 768 n. †), which was in his house (40¹⁶); in the existing text of Gn, also, the Egyptian who made Joseph superintendent of his household, and whose wife made the advances to Joseph which the latter rejected (39¹²).

It is doubtful whether these two personages are not in reality distinct. Gn 37³⁶ 40¹⁶ belong to E, and 39¹² to J; and there are strong reasons (cf. ib. pp. 767^b, 768 n. †) for supposing, as is done by nearly all modern critics, that the words 'Potiphar, an officer (eunuch) of Pharaoh's, the captain of the guard' in 39¹, are an addition made by the redactor, who identified Joseph's master, mentioned in ch. 39, with Potiphar, the 'captain of the body-guard,' of 37³⁶ 40¹⁶; if this view be correct, the original narrative of ch. 39 (J) knew nothing of 'Potiphar,' but simply mentioned 'an' (unnamed) 'Egyptian,' to whom the Ishmaelites sold Joseph. It may be noticed that, in the existing narrative, the description, 'an Egyptian,' attached in 39¹ to 'Potiphar, an eunuch of Pharaoh's,' etc., seems a rather pointless addition, whereas, standing alone, it would have an adequate *raison d'être*.

The 'captain of the guard' was not a specially Egyptian office; the same title (with only פָּרִיס being used also of a chief officer of Nebuc' ad-nezzar (2 K 25⁸ al.; see above, ii. 768* n. †). The number of court- and state-officials mentioned in Egypt. inscriptions is very great (Ebers, *Aeg. u. die Bb. Mose's*, p. 300; and esp. Brugsch, *Die Ägyptologie*, 1889, pp. 213 f., 222-227, 243 f., 299-301); but the office attributed to Potiphar does not appear to have been definitely identified: perhaps it was that of 'the general and eldest of the court' of the Hood-papyrus, an important official, whom Brugsch (p. 213) and Maspero (*Journ. As.* 1888 (xi.), p. 273) identify with the ἀρχισωματοφύλαξ, often mentioned in the Ptolemaic period; see Grenfell, *Greek Pap.* 1896, 38. 1, 42. 1; M. L. Strack, *Die dyn. der Ptol.* 1897, p. 219 ff., Inscr. Nos. 77 (=CIG 4677), 95, 97 (CIG 2617), 108 (CIG 4893), 109, 111, 171; Jos. *Ant.* xii. ii. 4 (cf. 2).* Eunuchs were apparently not as common in ancient Egypt as in other countries, though they seem to be represented on the monuments (Ebers, *l.c.* p. 298); it is, however, possible that *ḡarīs* is used in the more general sense of *officer*,—neither the 'captain of the body-guard,' nor the chief butler or baker (to both of whom the same term is applied in 40²⁻⁷), holding a kind of office which would be very naturally deputed to a eunuch (though cf. Jos. *Ant.* xvi. viii. 17,—cup-bearers at Herod's court); Ges., however (*Thes.* p. 973), doubts this general application of the term; and LXX, at any rate, have σκῶδων in 37³⁶ and εὐνοῦχος in 39¹. If the name Potiphar did not occur in the original text of ch. 39, the question of his marriage does not arise; it may be mentioned, however, that (assuming the word *ḡarīs* to have its proper force) cases are on record, in both ancient and modern times, of eunuchs being married (Burekhardt, *Arabia*, i. 290; Ebers, p. 299).

On the narrative of ch. 39 enough has been said above, vol. ii. pp. 768*, 772. It is remarkable that

* The rendering 'swift steeds' is probable, but not certain. פָּרִיס (a rare synonym of פָּרִיס) denotes a species of horse possessed of some valuable quality, which may likely enough have been swiftness.

† The form Πτεφρῆς is also found, as in ed. Ald., and a 15th cent. MS ap. Lagarde, *Gen. Gracee* (cf. p. 23); Philo, i. 134, 604 (Mang.); Cramer, *Anecd. Par.* ii. 174. 25 (Parthey, p. 78). But it is certainly false (Griffith).

* Of course פָּרִיסִים means properly 'chief (or superintendent) of the slaughterers (or cooks [1 S 9²³])'; and, in spite of 2 K 25⁸ etc., it might in Genesis have this meaning (cf. LXX ἀρχισωματοφύλαξ): in this case, the expression might (as Mr. Griffith suggests) denote the 'royal cook,' an official who acquired at Thebes in the New Empire many important administrative functions—leading expeditions to the quarries, investigating tomb-robbings, etc. (see Erman, *Egypten*, Index, s.v. 'Truchsess'; and comp. above, vol. ii. p. 774, the note on Ab).

names of the form 'Potiphera,' 'Potiphar' (if this be rightly regarded as really the same name), appear first in the 22nd dyn. (the dyn. of Shishak), and are frequent only in the 23th dyn. (B.C. 664-525); it is thus at least doubtful how far either one or the other really springs from the age of Joseph (see, further, vol. i. 665^b, ii. 775^a).

S. R. DRIVER.

POTIPHERA (פּוֹתִיפָר; LXX Α Περειφῆρς, E Luc. Περειφῆρς; † Vulg. *Putiphare*; on the etym. see under POTIPHAR).—The priest—i.e., no doubt, the chief priest—of ON (which see),—i.e. of the famous and ancient temple of the Sun, at On,—whose daughter Asenath was given by Pharaoh to Joseph for a wife (Gn 41⁴⁵, 46²⁰).

S. R. DRIVER.

POTSHERD.—This is the translation in Job 2⁸, Ps 22¹⁵, Pr 26²³, and Is 45⁹ of כֶּרֶס *heres*, which is rendered 'sherd' in Is 30¹⁴, Ezk 23³⁴, but elsewhere (usually with כֶּלִי) 'earthen vessel.' Potsherd occurs also in Sir 22⁷ as tr. of δορυακόν, which is the LXX word for *heres* in Job 2⁸, Ps 22¹⁵, Pr 26²³, Is 30¹⁴. The Eng. word, which is a sherd (shred) or fragment of pottery, is illustrated by Skelton's (*Skeat's Specimens*, 143)—

'But this maddē Amalecke,
Lyke to a Mamelek,
He regardeth lordles
No more than potshordes'—

and Spenser, *FQ* VI. i. 37—

'They hew'd their helmes, and plates asunder brake,
As they had potshares bene.'

In translating, the distinction has to be made between 'earthen vessel' and 'fragment of earthen vessel.' The latter is the meaning, according to *Oxf. Heb. Lex.*, in Job 2⁸ 41²², Is 30¹⁴, Ezk 23³⁴. RV makes two changes. Job 41³⁰ AV 'sharp stones are under him' is changed into 'his underparts are like sharp potsherds'; Pr 26²³ 'a potsherd' becomes 'an earthen vessel.' J. HASTINGS.

POTTAGE (נִיד *nāzid*, LXX εἴψημα, Vulg. *pulmentum*).—A kind of thick broth made by boiling lentils or other vegetables with meat or suet, usually in water, but sometimes in milk. Robinson says that lentil pottage made in this manner is very palatable, and that he 'could very well conceive, to a weary hunter, faint with hunger, they (lentils) might be quite a dainty' (i. 167). Thomson speaks of its appetizing fragrance, which it diffuses far and wide; and he gives an account of a meal in which this pottage was eaten out of a saucepan placed on the ground in the middle of the company, a cake of bread, doubled spoon-fashion, being dipped in the pot to carry the pottage to the mouth. 'European children born in Palestine are extravagantly fond of it' (*L. and B.* i. 252). The pottage prepared by Jacob was of the red lentil (see *FOOD*, vol. ii. 27), hence Esau's emphatic 'the red, this red' (Gn 25³⁰). For a mess of this, called in He 12¹⁶ βρώσις μία ('a mess of meat'), Esau sold his birthright. Labat in his account of the visit of the Chevalier d'Arvieux to Hebron in 1660 says that at the entrance to St. Helena's Church, now a mosque, there is a great kitchen where pottage is daily prepared of lentils and

* For the name 'Petu-baal' cited above, vol. ii. 774^a n. ¶, is very doubtful, Mr. Griffith informs the writer, in both meaning and date. It is properly *Pt-ber* (Lieblein, *Dict. des Noms Hébreux*, No. 553); and 'though *ber* is the correct spelling for Baal, there is no determinative to show that it was intended for that. *Pt*, also, is not the same as *P-dy* (in *P-dy-Imn*, etc., above); and it is difficult to find a meaning for it. The name is at present known only to occur once; and it may be wrongly copied, or may not be a compound at all. The period to which it belongs is also quite uncertain: it may be that of the Hyksos; but it may also be earlier, or much later.'

† Also Περειφῆρς, ed. Ald., and the MS cited p. 23 n. †; Euseb. *Præp. Ev.* ix. 21. 9; Cramer, *Anecd. Par.* ii. 175. 14; Fabric. *Cod. Pseudepigr.* ii. 86 (Parthey, p. 78).

other vegetables in commemoration of this event, which is supposed to have taken place here (?), and is freely distributed to all comers; 'We have partaken of it' (ii. p. 237). This practice does not seem to be kept up at the present day.

Pottage was known in Egypt at an early period, and was called *āshā* (Copt. ܐܫܐ). Wilkinson has copied a tomb-painting representing a man cooking this food (ii. 34, fig. 301, 9). In Palestine a variety of vegetables entered into its composition, as in Scotch broth. Apparently the globe cucumber (*Cucumis prophetarum*), a common plant about Samaria, was sometimes used to thicken it; and we are told in 2 K 4³⁹ that one of the 'sons of the prophets' mistook כֶּרֶס *nāzā*, probably the violently purgative *Citrullus colocynthis*, for this plant. The colocynth is common in the Shephelah and about the shores of the lower Jordan Valley, but not in the middle higher lands (see *FOOD*, vol. ii. p. 28).

The prophet Haggai names pottage with bread, wine, and oil as the common articles of diet which a priest, bearing holy flesh, would be likely to touch inadvertently with the skirt of his garment (2¹²). *Nāzid*, being chiefly made of vegetables, differs from *parāk* (only in const. *parāk*, Is 65⁴ *Kethibh*), which seems to have been a kind of minced collops made of meat disjointed, or finely cut up and boiled in water (cf. 'mortreues and potages' below). *Kerē* has *mērāk*, as in Jg 6¹⁸, a name which is also applied to the same dish. Some suppose these to be soup poured over broken bread.

The word 'pottage' was originally the same as the French *potage* and spelled like it, as in Chaucer's *Prologue to the Pardoner's Tale*, 82, and Piers Plowman, who writes 'potage and payn (bread) ynough' (Text B. xv. 310), 'mortreues (pounded meat) and potages' (ib. xiii. 41). In the *Boke of Curtasye*, whose date is uncertain, probably about 1460, potage is the first course at dinner (iii. 765), and is to be eaten without 'grete sowndyng' (i. 69). In the 1557 ed. of Seager's *Schoole of Vertus* (iv. 444), it appears with two t's, and it is spelled as we now have it in all editions of the English Bible from 1560 to the present. In Russell's *Boke of Nurture*, dating from about 1460, there is a section on different kinds of potages. A. MACALISTER.

POTTER, POTTERY.—The art of the potter (Heb. כֵּרָם or כֵּרֵר, ptep. of כָּרַר; 'to form or fashion'; Gr. *κεραμεύς*) can be traced back to a very early date in Egypt, and within recent years there have been considerable 'finds' in Palestine of specimens of pottery, some of which are much older than the date of the Israelite conquest. Upon the ground especially of the discoveries at Tell el-Hesi (? Lachish), Flinders Petrie has sought to construct a complete history of the pottery of Palestine, which he divides into three periods (see the following article, and compare Petrie and Conder in *PEFS*, 1891, p. 68 ff.; also Nowack, *Lehrb. der Heb. Arch.* i. 265 ff.; Benzing, *Heb. Arch.* 261 ff.). The products of the potter's industry would naturally be little used by the Israelites during the nomadic period of their existence, when vessels of skin or of wood must have been found more serviceable than those of earth (Nowack, *l.c.* p. 242; Benzing, *l.c.* p. 214). Even after they entered Canaan, the Israelites appear to have been slow to adopt the vessels of the potter; a skin is still used for holding milk (Jg 4¹⁹), wine (1 S 16²⁰), or water (Gn 21¹⁴); the Heb. in the first two of these passages is כֵּרָם, in the third כֵּרֵר, the Gr. in all three is *δακός*. The earliest mention of pottery in the OT is in 2 S 17²⁸, where, amongst the articles brought to David during his flight from Absalom,

were 'earthen vessels' (אֲרָצִית; B σκεύη δατράκινα, A om.).

Both in the OT and in the Apocrypha there are allusions to the various processes carried on by the potter. He treads the clay (אֲרָצָה) with his feet (Is 41²², Wis 15⁷), kneads it like dough and places it upon the wheel, or rather wheels (אֲרָצָה Jer 18²; LXX ἐπὶ τῶν λίθων, implying a reading אֲרָצָה). The 'obol' (a dual form used elsewhere only in Ex 1¹⁶ of the 'birth-stool') consisted, as the name implies, of two discs of wood, connected by a wooden pivot, and arranged the one above the other, the under wheel being the larger of the two. The wheels, which were capable of being revolved in opposite directions, were set in motion by the foot of the potter, who sat at his work. All these points, as well as the processes of firing and glazing, are referred to in Sir 38²⁰. (cf. the illustrations in Wilkinson, *Anc. Egypt*, 1837, iii. 164). The first of these processes, the firing, perhaps explains Ps 22¹⁵ 'My palate [reading אֲרָצָה for אֲרָצָה 'my strength'] is dried up like a potsherd' (אֲרָצָה, δατράκιον). The glazing process, in which the oxide of lead obtained in the course of refining silver was chiefly employed, gives point to the saying of Pr 26²³ 'Fervent [or perhaps 'smooth,' see Toy, *ad loc.*] lips and a wicked heart are like an earthen vessel overlaid with silver dross' (אֲרָצָה אֲרָצָה אֲרָצָה; LXX ἀργύριον διδόμενον μετὰ δόλου ὡς περ δατράκιον ἡγῆται).

Under the later kings the industry of the potter was so familiar as to furnish the prophets with figures in addressing their hearers. The classic instance of this is Jer 18, where the prophet describes how he paid a visit to the house of the potter,* and found him fashioning a work on the wheels. 'And when the vessel that he made of the clay was marred in the hand of the potter, he made it again another vessel, as seemed good to the potter to make it' (v. 4). The lesson drawn is, 'Cannot I do with you as this potter? saith the LORD. Behold, as the clay in the potter's hand, so are ye in mine hand, O house of Israel' (cf. Is 29¹⁶ 45⁹ 64¹, Wis 15⁷), and the famous argument of St. Paul in Ro 9²⁰, a passage which will be fully discussed in art. PREDESTINATION, along with which it will be well to refer to Sanday-Headlam's 'Romans' in *Internat. Crit. Comm.* *ad loc.*). Again, in Jer 19¹⁰, a potter's earthen bottle (אֲרָצִית, LXX βυβλίς τετρασμέτος δατράκιον) is purchased by the prophet, and afterwards broken in typical allusion to the approaching irretrievable ruin of the nation (cf. Ps 2²=Rev 2², Is 30¹⁴).

A guild of potters is mentioned by the Chronicler (1 Ch 4²³). In P the 'earthen vessel' (אֲרָצִית) is repeatedly mentioned: Lv 6²⁸ [Heb. 21] as used for boiling the flesh of the sin-offering; 11³² as defiled by contact with unclean animals; 14⁵⁻⁹ one of the two birds offered on behalf of the cleansed leper or leprous house is to be killed 'in an earthen vessel over running water' [i.e. so as to let the blood drop into the vessel and mingle with the water contained in it]; 15¹² as defiled by an issue; Nu 5¹⁷ as used to contain the water in the jealousy ordeal. In all these instances the LXX has σκεύος δατράκιον except in Lv 14⁵ and Nu 5¹⁷, in both of which it has ἀγγύιον δατράκιον. In Jer 32¹⁴ we read of a legal document (the deed of purchase of Hanamel's field) being kept in an earthen vessel.

The figure of the potter at work is more or less consciously present in a number of instances where the verb אֲרָצָה is employed to describe the Divine activity in creating or fashioning men or other objects: Jahweh forms man of dust from the ground, Gn 2⁷; beasts and birds from the ground, v. 19; Israel as a people, Is 27¹¹ 43¹ 44²¹ 45⁹ 64¹ 49⁶.

* Situated probably near the gate Harsith (Jer 19² RV), or 'gate of the potsherd' (A), a name perhaps derived from the quantity of potsherds thrown out there. See HARSITH.

(even from the womb) 64⁷; the individual Israelite, Is 43⁷; Jeremiah in the womb, Jer 1⁵; the eye of man, Ps 94⁹; the locust, Am 7¹; Leviathan, Ps 104²⁵; the dry land, Ps 95⁵; the earth, Is 45¹⁸ 64¹; the mountains, Am 4¹³; the universe (אֲרָצָה), Jer 10¹⁶=51¹⁹. The figure appears to be lost sight of, and אֲרָצָה simply = 'form,' in such instances as Is 45⁷ the forming of light, Ps 74¹⁷ summer and winter, Zec 12¹ the spirit of man, Ps 33¹⁵ the hearts of men. אֲרָצָה is also used figuratively of fashioning, i.e. foreordaining, an event or situation, Is 22¹¹ 37²⁵ (=2 K 19²⁵) 46¹¹, Jer 33², cf. Ps 139⁶.

The potter's clay and the vessels fashioned from it are emblems in Scripture of what is feeble or of little value. In Dn 2⁴ the feet of the image seen in vision by Nebuchadnezzar are described as part of iron and part of potter's clay (Aram. חֲסִי וְאֲרָצִית; Theod. B simply δατράκιον, A¹ δατράκιον κεραμίδιον; LXX δατράκιον κεραμικόν), which leads to the interpretation, 'the kingdom shall be partly strong and partly broken' (RVm 'brittle,' Aram. חֲסִי, Theod. συντριβόμενον, LXX συντριβόμενον). In La 4⁷ we have the forcible contrast: 'The precious sons of Zion, comparable to fine gold, how are they esteemed as earthen pitchers, the work of the hands of the potter' (אֲרָצִית, LXX εἰς ἀγγία δατράκινα, ἔργα χειρῶν κεραμίδων). Again, in 2 Co 4⁷ St. Paul declares, 'We have this treasure [sc. the ministry entrusted to him] in earthen vessels' (ἐν δατράκινος σκεύουσιν), perhaps in allusion especially to the weak bodily frame of the apostle. 'In a great house there are not only vessels of gold and of silver, but also of wood and of earth,' 2 Ti 2²⁰ (σκεύη δατράκινα); cf. also Is 29¹⁶ 45⁹.

Zec 11¹³ is a difficult passage, especially when considered in connexion with Mt 27⁹. The Massoretic text is thus rendered in RV: 'The LORD said unto me, Cast it unto the potter, the goodly price that I was prised (sic) at of them. And I took the thirty pieces of silver and cast them unto the potter in the house of the LORD.' Instead of אֲרָצִית 'unto the potter,' Gesenius (*Thes.*) follows the Syr. in reading אֲרָצִית 'into the treasury.' This is adopted also by G. A. Smith, Wellhausen, Nowack, and others. The LXX has εἰς τὸ χυμευτήριον, 'into the smelting furnace.' The words אֲרָצִית and אֲרָצָה might all the more readily be confused owing to the tendency of א to pass into ר between two vowels. It is not improbable, however, that the Massorettes purposely obscured the reading אֲרָצִית from a feeling that the paltry wage which was unworthy of the prophet's acceptance could not fittingly be cast into the treasury of God. In like manner the chief priests in Mt 27⁶ say of the thirty pieces of silver returned by Judas, 'It is not lawful to put them into the treasury, since it is the price of blood.' Accordingly, they took counsel and bought with them the potter's field to bury strangers in. In this Mt characteristically discovers a fulfilment of prophecy, and it is manifestly the prophecy of Zec 11¹³ that is in view, although it is attributed to Jeremiah, and quoted in a form that agrees neither with the MT, of which we have just quoted the translation, nor with the LXX. The substitution of *Jeremiah* for *Zechariah* is no doubt simply due to a *lapsus memoriae*, which might occur all the more readily in view of the allusions to the potter in Jer 18 and 19, and the narrative of the purchase of a field from Hanamel in 32¹⁴. The following are the readings of the LXX (B) of Zec 11¹³ and of the professed quotation in Mt 27⁹ (according to WH's text)—

Zec 11¹³.

Mt 27⁹.

Καὶ εἶπεν Κύριος πρὸς με, Καὶ ἔλαβον τὰ τριάκοντα
κάθες αὐτοὺς εἰς τὸ χυμευ- ἀγγύρια, τὴν τιμὴν τοῦ τετι-
τήριον, καὶ σκέψομαι (Α μημένου ὃν ἐτίμησαντο ἀπὸ

Zec 11¹³.Mt 27¹⁴.

σκέψαι αὐτό) εἰ δόκιμὸν υἱὸν Ἰσραὴλ, καὶ ἔδωκαν
 ἔστιν, ὃν τρεῖς πόντοι ἐδοκιμάσθη (A²·¹¹ εἰδωκεν, & εἰδωκα)
 (B²·¹⁰ ANQ ἐδοκιμάσθη) αὐτὰ εἰς τὸν ἀγρὸν τοῦ
 ὑπὲρ αὐτῶν. καὶ ἔλαβον κεραμέως καθὰ συνέταξεν
 τοὺς τριάκοντα ἀργύρους καὶ μοι Κύριος.
 ἐνέβαλον αὐτοὺς εἰς τὸν (A
 om. τὸν) οἶκον Κυρίου εἰς
 τὸ χωνευτήριον.

RV in Mt 'And they (marg. 'I') took the thirty pieces of silver, the price of him that was priced, whom (certain) of the children of Israel did price (marg. 'whom they priced on the part of the sons of Israel'), and they (marg. 'I') gave them for the potter's field, as the Lord appointed me.' The reading 'potter' is thus retained (although there appears to be in the context a consciousness also of the reading 'treasury'), the language is accommodated to cover the purchase by the priests of the potter's field, and the passage has manifestly a Messianic character imposed upon it (see, further, Wellhausen, *Die kleinen Propheten*, ad loc., and arts. AKELDAMA, and QUOTATIONS Ed loc. and J a).

J. A. SELBIE.

POTTERY.—Materials for the study of the pottery of Southern Palestine from 1700 to 300 B.C. were furnished by the systematic excavation of the mound Tell el-Hesi by Petrie and Bliss, 1890-93 (see art. LACHISH). At this site was found a series of superimposed mud-brick towns, eight in number, each distinguished by its own types of pottery. The already-dated foreign types (Greek and Phœnician) furnished a scale for approximately dating the local ware with which they were associated, or which they overlaid. The results obtained at Tell el-Hesi have since been confirmed and amplified by extensive excavations at three other mounds, Tell Zakariya, Tell es-Safi, and Tell ej-Judeideh, as well as at Jerusalem. Briefly, these results are as follows. The pre-Selucidan pottery may be divided into three groups—(1) earlier pre-Israelite; (2) later pre-Israelite; (3) Jewish.

(1) *The earlier pre-Israelite ware* has been found, unmixed with other styles, on the rock or virgin soil at three sites. The types include—(a) large bowls with very thick brims, the interior being faced with red or yellow and burnished with lines sometimes crossing; (b) large jars with flat disc bottom, innecked necks, and ornamented with a cable-moulding; (c) jars with surfaces scraped

EARLY PRE-ISRAELITE JAR.

over with a comb and having ledge-handles of a wavy shape. These handles are typical of certain Egyptian pottery, regarded by Petrie as pre-

historic; he suggests a Lybian origin. All these characteristics come down to later times, especially

LEDGE-HANDLE.
(Early Pre-Israelite.)

the patterned burnishing, which is found in a debased form in Jewish jars.

(2) *The later pre-Israelite ware* comes down to Jewish times, and is found in connexion with known 'Phœnician' types, ranging from about 1400 to 1000 B.C., and with Mycenaean ware of the same period. The most characteristic native forms are—(a) the open lamps and bowls, both with rounded bottom, often found purposely buried in groups; (b) ware with painted ornament, consist-

LATER PRE-ISRAELITE PAINTED WARE.

ing chiefly of birds, zigzags, and spirals; (c) small flasks with pointed bottoms; (d) stands for holding these; (e) female figurines (*teraphim*).

BOWLS (BURIED) WITH LAMP.

(3) The ware we call *Jewish* appears to be characteristic of the later Jewish monarchy, when the

local pre-Israelite and the Phœnician types had blended and had become debased. The commonest types are—(a) cooking pots (blackened with smoke), with large wide mouths and small handles; (b) open lamps, with thick disc bases;

JEWISH COOKING POT.

(c) tiny rude black jugs; (d) flasks with long neck and stand, out of all proportion to the small body; (e) large jars with ribbed handles, stamped. The stamps are of three classes: stars of various forms; ellipse containing name of the owner or maker in old Hebrew letters; royal stamps. The

ROYAL STAMP ON JAR HANDLE.

latter show a creature in two varieties, one with two expanded wings, the other with four. The second type is clearly a *scarabæus*. Above the symbol is invariably the legend *לסלך*; below, the name of a town, as *שכח*. As this ware appears to date from the time of the Jewish monarchy, the reading 'Belonging to the king of Shocoh' is untenable. Accordingly we should rather read: 'To the king: (dedicated by) Shocoh.' Thus far three names of known towns have been recovered, Shocoh, Hebron, and Ziph, as well as the name *שכח*, which is not mentioned in the Bible. As to the exact meaning of the stamp, several hypotheses have been brought forward. From the discovery of these stamped handles at Jerusalem it has been argued that they belonged to jars containing oil, wine, or other tribute sent to the capital by the towns mentioned. The wide geographical distribution (such as the finding of the stamp with Shocoh at five different sites) suggests that the place-names were those of royal potteries, situated at Hebron, Ziph, Shocoh, etc.

Associated with the above-mentioned Jewish types we find Greek pottery, chiefly ribbed bowls,

and large amphoræ with loop handles. The red and black figured ware was also imported.

The *post-Seleucid* pottery of Palestine has not been as carefully studied as the earlier types. The Seleucid forms are similar to those found at Alexandria. Rhodian jar-handles stamped with Greek names are common. Roman sites contain the well-known ribbed amphora, and tiles with the stamp of the tenth legion: LEG(10) X. FRE(TENSIS), are common about Jerusalem. In Chris-

STAMP OF THE 10TH LEGION.

tian graves are found many closed lamps, stamped with elaborate patterns, sometimes showing crosses or a Greek inscription, as *ATXNAPIA KAAA*.

CHRISTIAN LAMP.

The same general type extended to Arab times. Finally, we have the Arab glazed ware, found in Crusading sites, such as Blanche Garde at Tell es-Şafi.

LITERATURE.—Petrie, *Tell el-Hesi*; Bliss, *Mound of Many Cities*; Reports on the Excavations at Tell Zakariya, Tell es-Şafi, and Tell ej-Judeideh, *PEFSI*, 1899-1900; also the forthcoming volume on these Excavations.

POUND.—See MONEY, vol. iii. p. 428*, and WEIGHTS AND MEASURES.

POVERTY.—A. IN OLD TESTAMENT.—The paucity of abstract terms in Hebrew is illustrated by the fact that the words translated 'poverty' in EV occur chiefly in the Book of Proverbs, and other post-exilic works. These are (a) from *חָסַר*, 'to lack':—חָסַר (cf. *חָסַר*, *חָסַר*, *חָסַר*, *חָסַר*, *חָסַר*, etc., *egestas*, etc.); (b) from *רָשָׁע*:—רָשָׁע, *egestas*, etc. The poor are frequently mentioned, the following terms being so translated: (c) *קָהָר* [cf. (a)]; (d) *רָשָׁע*, *ptep*, of *רָשָׁע* [cf. (b)], *πένος*, *πτωχός*, etc., *pauper*, etc.; (e) from *עָנָה* 'be bowed down':—עָנָה (Aram.), *עָנָה*, 'afflicted,' 'poor,' *עָנָה*, 'humble,' 'lowly' (see art. POOR), *πένος*, *πτωχός*, *πρᾶτος*, *ταπεινός*, etc., *pauper*, etc.; (f) from *מָבַח* 'crave':—מָבַח, 'needy,' *πένος*, *πτωχός*, etc., *pauper*, etc.; (g) from *רָלַל* 'hang down':—רָלַל 'weak, depressed,' in Gn 41¹⁹ of *lean* cows, *πένος*, *πτωχός*, *ταπεινός*, etc., *pauper*, etc.; (h) *קָהָר* (Aram.) only in

Ecclesiastes, 'poor,' *πέρης*, *pauper*; (i) the obscure and doubtful *אֶבְיָוֹן*, *עֲנָוִי*, in Ps 108^{10, 14}, perhaps 'hapless,' *πέρης*, *πρωτός*, *pauper*.

The *causes of poverty*, apart from sloth, thoughtlessness, and extravagance, were specially—(i.) Failure of crops and loss of cattle through bad seasons; thus the Shunammite left her home-stead, by Elisha's advice, to avoid a famine (2 K 8¹⁻⁷, cf. Neh 5³). At such times the townsfolk would suffer from the high price of food, and the falling off of trade through the destitution of the farmers. (ii.) Raids and invasions. (iii.) Loss of property through the violence of the nobles, supported by corrupted law courts, e.g. Naboth's vineyard (1 K 21) and the appropriation of the Shunammite's land during her absence. (iv.) Ruinous taxation and forced labour (*corvée*) (Neh 5⁴⁻⁶). (v.) Extortionate usury, which took advantage of the distress caused by bad seasons and heavy taxes to lend at high interest on the security of land. In many instances the debtors could not pay, and forfeited land and liberty to their creditors (Neh 5¹⁻³).

In considering the *character and extent of poverty*, stress must be laid on the influence of polygamy and slavery. The almost universal habit of early marriage which seems to have existed amongst freemen, together with concubinage and polygamy, checked the growth of that destitution amongst unmarried women which is the most painful feature of modern poverty. Indeed, if the principles of family and clan life had been loyally carried out, a free Israelite could want only when the whole family or clan were destitute. But actual practice mostly fell far short of this ideal.

Again, with us, the last resort of the poor is either the workhouse, or crime, or slow starvation; in ancient Israel, the destitute became slaves. Indeed, the class corresponding to the great bulk of our poorer workers for wages, both domestic and industrial, was the slave-class. Hence the article SLAVE deals with the condition of the greater portion of the poor. There were, however, slaves whose position was much more honourable and comfortable than that of English labourers, and there were poor who were not slaves. The existence of slavery added to the resources of the poor man by enlarging his credit: he and his family could offer their persons as security for loans.

Again, the mere lack of means, if it did not amount to absolute destitution, was far less distressing than with us, because so little was needed in the way of house, furniture, clothes, firing, or even food.

The classes of the poor most often mentioned are widows and orphans, and the *gērīm*, or resident aliens. The former suffered because the family ties were not as real as they were supposed to be, the latter because they had no actual family ties, and the bond of hospitality was soon strained to breaking point (Lv 19¹⁰, Dt 14²⁹, Ps 94⁶, Jer 22³, Zec 7¹⁰, Mal 3⁵). See art. GER.

As regards poverty, however, the conditions were very different in the four great periods of OT history. (1) *The Nomadic period*. In a nomad tribe there were richer and poorer and slaves; but the bond of brotherhood in the tribe was kept alive by the constant necessity of mutual help and defence; and distressful poverty was possible for the individual only when the fortunes of the whole tribe were at a very low ebb.

(2) *The Judges and the Early Monarchy*.—During this period the clan and family system maintained a great, though perhaps diminishing, vitality; and its influence, as we have said, was against the growth of poverty. The great majority

of free Israelite families held land; they might suffer from bad seasons, and from invasion, or the oppression of powerful fellow-countrymen; whole families might be swept away by plague or famine, carried away captive by the enemy, or reduced to slavery by native oppressors; but with certain exceptions (see below) there was little permanent poverty. Gideon says (Jg 6¹⁵) 'My clan (*lit.* 'thousand') is the poorest (*לָפָא*) in Manasseh, and I am the least in my father's house'; but the context shows that Gideon was fairly well off. It is probably not a mere accident that the first mention in history of a class of poor freemen comes soon after the establishment of the Monarchy. 1 S 22² tells us that there resorted unto David 'every one that was in distress (*עָנָו*), or in debt, or discontented.'

In this period, however, certain classes of landless poor seem to have arisen. When the frontier receded through the successful attack of a neighbouring tribe, the Israelite refugees would seek shelter amongst their brethren. They could not always be provided with land, and probably formed a large portion of the *gērīm*, the *gēr* in this case being an Israelite settled in a strange tribe. In this period, too, the Levites are apparently both landless and poor, e.g. Micah's Levite, Jg 17. 18, and the Levite of Jg 19, both of whom were *gērīm*; cf. LEVI. The scant references to the poor in the older (JE) legislation, the Ten Commandments, the Book of the Covenant, etc., e.g. Ex 22²⁵ 23⁶, indicate that poverty was not very widespread in this period.

(3) *The Later Monarchy*.—We learn from the prophets of the 8th cent. that as the Israelite kingdoms advanced in wealth and civilization, pauperism developed. The rich added 'house to house, and field to field' (Is 5⁸), and the landless poor multiplied.

The growth in luxury led to an increase of the artisan class and the town population generally. When the tide of prosperity ebbed, these classes bore the brunt of bad times. The prophets tried to keep the land for the peasant farmers, but their efforts were futile. Deuteronomy shows that poverty was a serious and widespread evil (10¹⁷⁻¹⁹ 14²⁹ 25 15. 23¹⁹ 20 24¹⁰⁻²¹ 26¹²⁻¹⁵), and frequently refers to the Levites as an impoverished class (12¹² 19 18). The Deuteronomic legislation attempted to remedy the evil, but it came too late.

(4) *After the Exile*.—The community in Palestine was poor as a whole, and Neh 5 shows that the nobles and priests profited by the misfortunes of the peasants to absorb their land. The general tone of the Psalms, and the use of the term '*ānāw*, 'lowly,' for the pious Jews, suggest that the bulk of the people were permanently poor. See art. POOR. The Priestly Code shows great consideration for the poor (Lv 5⁷ 11 etc. 19⁹⁻¹⁵ 23²² 25).

As the Jews passed from the rule of the Persians to that of the Greek kings of Egypt and Syria, the bulk of the people, whether in the Dispersion or in Syria, became subject, in a measure, to the general conditions of social life; and the information as to the poor in the ancient classical world will apply to that extent to the scattered Jews. But in most cities, as in Alexandria, and in many country districts, the Jews formed communities bound by racial and religious ties. Such ties are very real, especially in small societies, when those who own them are in the midst of aliens of another faith. Poverty might be prevalent, but would be much alleviated by mutual helpfulness. In Jewish Galilee and Judah there were the agricultural settlements, where social conditions were comparatively simple; and the intensely Jewish city of Jerusalem, whose size implies a large poor popula-

* Cf. Nathan's parable, in which the rich man robbed his poor neighbour (2 S 12¹⁻⁶).

tion. The Bk. of Sirach, the work of a Jerusalem Jew, implies a measure of poverty and emphasizes the helplessness of the poor before the oppression of the rich (7³² 10³⁰. 31 13³. 18 21⁵ 29²² 35¹³ 41²); but conveys the impression that the wrongs and sufferings of the poor about B.C. 200 were far less grievous than in the time of Amos and Isaiah.

As regards *provision for the poor*, there was first of all, perhaps most efficacious of all, the possibility of finding sustenance in slavery, a fate probably regarded with less horror, and carrying with it less disgrace, than the modern workhouse. Before this, the poor might have recourse to their family or clan. In early times, when each clan inhabited its own district, the claims of poorer members commanded recognition; but as time went on, and the clan system broke up, this resource became less and less to be relied on. The successive codes sought to remedy the evil by various enactments. In Ex 22²⁶⁻²⁷ loans are to be without interest, so also Dt 15⁷. 24¹⁰. 13, Lv 25³⁵. 37; cf. Ps 15⁵ etc.; and in Ex 23¹¹ the poor are to have the produce of the land in Sabbatical years, so also Lv 25⁶. In Deuteronomy tithes are to be given to the poor (14²⁸ 26¹². 13); who are to be entertained at the great Feasts (16¹¹. 14; cf. Neh 8¹⁰); to be allowed to glean, and to have something left to glean, to have the right to take what grew in the corners of fields, and any sheaves that might be forgotten (24¹⁹. 21); cf. Lv 19⁹. 10, Ru 2². The most serious attempt to deal with poverty was the Law of the Jubilee Year in the Priestly Code (Lv 25³⁸⁻⁴⁴; cf. Dt 15¹²⁻¹⁵), which, if carried out, would have secured the periodical restoration of the landless poor to freedom and their return to the land, but this law remained an ideal. These various provisions were supplemented by ALMSGIVING (which see).

B. IN NEW TESTAMENT.—The term 'poverty, *πτωχία*, *paupertas*, *inopia*, is used only in 2 Co 8². 9. Rev 2², where it has a general or figurative sense; but the 'poor,' *πτένης* (2 Co 9⁹), *πεινῶν* (Lk 21²), *πτωχός* (frequently, especially in the Gospels and Ja 2), *pauper*, etc., are often mentioned. As regards poverty, the NT period did not differ in any essential features from the Greek period. On the one hand, the exactions of the Herodian and Roman officials were probably more severe than those of the Greek rulers; on the other, the duty of almsgiving was more diligently inculcated as a religious duty which would be richly rewarded. In this respect the Christian Church followed in the steps of the synagogue. The Church at Jerusalem made an abortive experiment in communism (Ac 2⁴⁴ 4³²), which probably aggravated its poverty; and gave opportunity for the collection for 'the poor saints at Jerusalem' which St. Paul organized amongst his Gentile converts (Ro 15²⁶, Gal 2¹⁰). The early Christian Churches followed the example of the synagogues in holding it a duty to provide for their poor (Ro 12¹³, 1 Ti 6¹⁸, 1 Jn 3¹⁷ etc.; cf. art. 'Alms' in Smith and Cheetham's *Dict. of Christian Antiquities*). But Ja 2²⁻⁶ shows that this duty was often neglected. In later times the Jews have usually set an example to Christendom by their care for their poor co-religionists.

While we read that 'the common people (ὁ πῶλος ἔχλος, Mk 12³⁷, cf. Jn 12⁹) heard' Jesus 'gladly,' we are not told that His actual disciples were poor; they rather seem to have belonged to the lower middle class—fishermen owning boats, tax-collectors, etc. The early Church included many poor, and few rich, powerful, or distinguished members (1 Co 1²⁶); but Prof. Orr, in his *Neglected Factors in the Study of the Early Progress of Christianity*, maintains that the strength of the Church lay in the middle classes. W. H. BENNETT.

POWER (chiefly *ἐξουσία*, *ἰσχύς*; *dynamis*, *ἐξουσία*).—

1. All the power in the universe is traced in Scripture to a spiritual source. God created all things by His word; and the word being the expression of the will, it is the spiritual God Himself who is the ground and origin of all that is (Gn 1. 2, Ps 33⁹ 148³, Pr 8⁷⁻⁹, Is 40¹², Jer 32¹⁷, Jn 1³. 10). While God is the Creator of the world, and continually rules all the agents in it for His own ends, there is real power made over to nature. There is no pantheistic identification of nature's power with God's. According to Gn 1, the earth has the function assigned to it of bringing forth grass and herbs, and the trees and all the living creatures bring forth fruit 'after their kind': nature follows its own laws (cf. He 6⁷). Or, again, the sea has a place and power which are definitely fixed, indeed, but are thereby proved to be real (Job 38¹¹, Pr 8²⁹). In like manner there is true power, though it is derivative, committed to man. He was made 'in the image of God' (Gn 1²⁶), and so his original endowment includes the gift of power like God's. It is proved by his exercising dominion over the other living creatures (1²⁸), and by his possessing freedom of choice (2¹⁶). The power of man is lost by sin (Gn 2¹⁷, 1 S 28²⁰, Ro 7¹⁸ etc.). Nevertheless, he is treated in every condition as a rational and moral being; the wicked are commanded on almost every page of Scripture to bestir themselves, to repent and turn to God.

2. God continually upholds the world by His power in *Providence*, i.e. (a) in the *preservation*, (b) in the *government* of the creation. (a) The fact of the world's persistence amid change, and while everything in it is characterized by transiency, is referred to the direct action of the Divine Will (Gn 8², Ps 104²⁴. 139, Jer 14², Ac 17², He 1³ etc.). Then (b) God's government of the world consists in His guiding all its processes for certain predetermined ends. Thus He causes grass to grow 'for the cattle,' and herb 'for the service of man' (Ps 104¹⁴). Human success is due to the favouring presence and power of God, and serves for the fulfilment of the Divine purposes, both as respects the earthly life (Jos 1¹¹ etc.) and the higher life of the soul (Ro 8²⁸, Ph 2¹³). All the ways of men are justly recompensed by the Almighty (Jer 32²⁰). Wickedness is overruled and brought to naught on the earth, a feature of God's providential action which is naturally emphasized in OT. God fulfils His purpose of love in spite of all opposing agents, whether visible or invisible, angelic or Satanic (Ro 8²⁸).

3. Special displays of power made by the Almighty. Israel was often saved by God from its enemies, the signal deliverance from Egyptian bondage which He effected for His people 'by a mighty hand and by an outstretched arm' being the type of these supernatural interventions (Dt 5¹⁵). The chosen people were guided in their career, and kept together as a nation, a remnant at least being preserved. God revealed His laws and ordinances; and these, duly honoured, were calculated to realize the highest good to the nation, to impart the blessing of 'life' and all that that implies (Dt 28¹. 30¹⁵, Pr 3). These influential manifestations of the Divine Will lead up to the completed revelation in Christ, who is superior to every world-power, and whose gospel is 'the power of God unto salvation to every one that believeth' (Ro 1¹⁶). The full manifestation of His power occurs when 'the kingdoms of this world are become the kingdoms of our Lord, and of his Christ: and he shall reign for ever and ever' (Rev 11¹⁵). The personality of Jesus in the

* Broadly speaking, *dynamis* in NT is power, and *ἐξουσία* authority to wield it. See Mason, *Conditions of Our Lord's Life on Earth*, p. 98 f.; Lightfoot on Col 1¹³; Swete on Mk 2¹⁰.

Gospels presents throughout the characteristics of spiritual power. He exhibits the unequalled power of perfect righteousness and love, e.g. in drawing disciples to Himself with a few words (Mt 4^{18b}, Mk 2¹⁴), refuting learned and influential adversaries, so that they could not answer Him a word or venture to question Him (Mt 22⁴⁶, Mk 12³⁴, Lk 14^{6 20⁴⁰}), driving out of the temple a crowd of those who dishonoured the building (Mt 21¹²), working miracles in kindness to men and for the furtherance of faith (Mt 11¹ etc.), extending pity and forgiveness to penitent sinners, and thereby raising them to a new and better life (Lk 7^{47a}). These qualities of holiness and love in Jesus appear at their best when He is under trial; His endurance of the cross proves them to be stronger than death. Hence it is when He is 'lifted up' that He 'will draw all men' unto Him (Jn 12³²). Then the resurrection of Christ proves His power over death and His glory as the triumphant Son of God (Ac 2, etc.).

4. Power restored in man. God works in man for the restoration of the soul's own power, and hence the believer should 'work out his own salvation with fear and trembling' (Ph 2¹²). At length the full power of the soul is recovered through the aid of the Holy Spirit (Ro 8¹⁵, Gal 5^{16a}). See HOLY SPIRIT. For the attainment of this end in man we have thus (a) the activity on God's side, and (b) the activity of man. (a) There is a providential leading or drawing by the Father before men can come to Christ (Jn 6⁴⁴). Then through the death of Christ believers become dead to the power of sin: there is a breach with it in principle (Ro 6), or sanctification is begun. 'Not that anything in human nature was actually changed as by magic in the moment when Christ died, but in the completion of this holy life there was established a universal and personal principle of victory (a *διναμὸς σωτηρίας*), which is able wherever it is received to break sin in the *σάρξ* and kill the natural selfishness, so that the man may walk no longer *κατὰ σάρκα*, but *κατὰ πνεῦμα*' (Beyschlag). Furthermore, through the resurrection of Christ men obtain power to accept salvation (1 Co 15¹⁷): faith not actuated by the risen, living Christ, but only by man's own natural endeavours, is 'vain' or powerless. The life of faith throughout its progress derives its power from the believer's communion with the risen and glorified Christ (Ro 5¹⁰, 2 Co 3^{17c}, Gal 2²⁰). Again, our Lord's resurrection imparts the power of a great hope; Christians have a sure hope beyond the present world. And they are empowered in consequence to be righteous in the world and worthy of their high calling, so that their hope may be fulfilled. (b) On man's side there has to be fervent prayer accompanied with righteousness (Ja 5¹⁶), faith which overcomes the world (1 Jn 5⁴), and to which nothing is impossible (Mt 17²⁰); and love, which leads to the keeping of Christ's words (Jn 14²³), and which casts out fear (1 Jn 4¹⁸). Or man has to walk in the Spirit (a process which presupposes the peace of forgiveness), and then he obtains the amplest power, shown by his not fulfilling the lust of the flesh (Gal 5¹⁶), and by his bringing forth the varied fruits of the Spirit, or growing without cessation into the likeness of Christ (Gal 5²²). By the interaction of these Divine and human means power is obtained by the Christian for the performance of any manifest duty, and the possession of sufficient power should be assumed. Christ is to him the Bread of Life, strengthening for the accomplishment of all righteousness (Jn 6^{77c}, Ph 4¹³), as food supplies the body with power for all its physical acts; though in neither case can we comprehend the steps of the process (so Dods in 'Expositor's Bible,' *John*, i. 220 n.).

A passage that has created much discussion is 1 Co 11³⁰ 'For this cause ought the woman to have power (*ἐξουσία*, RV 'a sign of authority') on her head because of the angels.' The apostle's argument seems to be, Because the woman was derived from (v. 9) and was created for (v. 9) the man, therefore she should have on her head a covering in token that she is under the authority of the man. The abstract 'authority' is put for the concrete 'sign of authority.' Then a new encouragement is added. If women will not do this out of natural seamliness, let them remember that the angels are present (cf. art. HEAD, vol. ii. p. 317*) in their assemblies, and for their sakes, the messengers of order, cover their heads. This is the interpretation of almost all modern expositors. For the presence of angels at Divine worship, see especially Meyer, *in loc.*

For Powers see under DOMINION.

G. FERRIES.

POWER OF THE KEYS.—The ecclesiastical connotation of these words must not be altogether identified with the meaning of them in the NT passage (Mt 16¹⁹) from which they are taken, although the first is included in the second. And the language about the keys in that passage must be distinguished again from the language about 'binding and loosing' which follows.

The image of the keys is not infrequent in Scripture (cf. Is 22²², Rev 1¹⁸). 'The key' (*מפתח*, also *קליר*) to the prophets, as well as to the Rabbis, was the symbol of physical and moral authority and power' (Wünsche, *Neue Beiträge*, p. 195). The kingdom of heaven, here to be understood of the Messianic theocracy about to be established, is likened to a house or palace, of which our Lord promises that St. Peter shall be the chief steward or major-domo, who is entrusted with full authority over everything which the house contains. The keys are not merely those of the outer doors of the house, which give the holder power to admit or to eject; the porter's office is only a part of the authority committed to St. Peter. They are the keys of inner chambers also, giving command, for example, of the 'treasures' from which it will be his duty (Lk 12³²) to feed the household. As the house is at the same time 'the kingdom,' it is evident that the authority is of very wide range. In the passage of Isaiah, which offers the nearest parallel (though it is to be observed that the sing. is there used, not the plur.), the thought of the key suggests an indisputable power of ingress and egress, both for the holder and for others at his discretion—a power (as interpreted in Rev 3²) of granting or withholding opportunities and facilities of various kinds.

In this last view the 'power of the keys' leads on naturally to the power of 'binding and loosing,' which, though not the same as the power of the keys, may be regarded as one of the chief exercises of that power. The 'binding' and 'loosing' is not the binding and loosing of persons but of things—not 'whomsoever thou shalt loose,' but 'whatsoever.' To 'bind' (*לכבד*), in rabbinic language, is to forbid; to 'loose' (*להר*) is to permit. Lightfoot says that 'thousands of examples' of this usage might be produced. One instance may suffice. 'Concerning the moving of empty vessels [on the Sabbath day], of the filling of which there is no intention; the school of Shammai binds it, the school of Hillel looseth it' (Hieros. *Shabb.* fol. 16, 2, quoted by Lightfoot, *Exercit. upon St. Matt.* p. 238). It is the power of laying down the law for his fellow-disciples, like a true Rabbi, which is thus bestowed upon St. Peter. Or perhaps it is more exact to say that it is the power of interpreting in detailed application the law which God has laid down in general terms. Authority is given him to say what the law of God allows, and what it forbids; and the promise is added that his ruling shall be upheld in heaven,—and is consequently to be regarded as binding upon the consciences of Christians. The power of binding and loosing is in fact the power of legislation for the Church.

The gift of 'the keys' is not expressly bestowed on any one else besides St. Peter, but the legislative power is afterwards extended to others (Mt 18¹⁸). It is not certain who are the persons there addressed. 'The disciples' mentioned in v.¹ are doubtless the apostles, or at any rate include some of the apostles; but it is not easy to prove that the power of binding and loosing is there bestowed upon them exclusively. That opinion, however ancient and however widely held, involves the further conclusion that the promises which follow, and upon which the binding and loosing power is made to depend, are to be similarly restricted. It is, according to this interpretation, to the apostles alone that Christ promises that the prayer of two of them shall be heard, and that where two or three are gathered in His name, He will be there. This is difficult to suppose. We must accordingly conclude that the binding and loosing power first bestowed upon St. Peter is not represented in NT as an exclusive privilege of the apostles. It is the common privilege of the Christian society—even of a small branch of it—when acting in agreement (v.¹⁹) and solemnly assembled in (or 'to') Christ's name as its ground of union (v.²⁰). In this case, however, the power appears to be connected with judicial discipline over individual members of the society. The 'binding and loosing' are not, in this case any more than elsewhere, to be interpreted as the absolving and retaining of sins; they seem to mean the prescribing what the offender is to do and not to do. But, in case of his refusal to comply with these requirements of 'the Church,' he is to be treated as 'a heathen man and a publican,' i.e. as excommunicate; and the resistance to the authority of the Church is to be considered as resistance to the will of Heaven. The prayer of the slighted Church will be heard, for Christ Himself is present at the gathering, and Heaven will give its sanction to the sentence (see interesting parallels in Wünsche, p. 218).

There is, accordingly, a close connexion between the authority to bind and loose and the authority to absolve and retain sins (Jn 20²³). The discipline which prescribes what the sinner must do, on pain of encountering a sentence at once earthly and heavenly, cannot but involve a 'power of the keys' in the (inaccurate) sense which that term has borne in the Church since patristic times.

Christians of all ages have rightly seen a signal instance of St. Peter's use of the keys in the admission of Cornelius to the Church. He thus 'opened' the door indeed to the Gentiles, 'and no man' has ever since 'shut' it to them. But there is no reason to think that this one act was all that was in our Lord's mind when He made the promise; nor is it likely that He referred only to the authority to baptize at discretion exercised by the apostle. The whole of his chief-stewardship was included in the promise; and both in his appointments of other Christians to sacred offices, in the administration of the Christian sacraments at large, and in his expositions of Christian truth, he was exercising the power of the keys.

An equally signal instance of 'binding and loosing' on a large scale is the regulation laid down by St. Peter, along with 'the apostles and the elders,' for the discipline of the Gentile Christians in regard to meats and manner of life (Ac 15²⁸). They 'loosed' for them all other kinds of food; they 'bound' for them 'things offered to idols, and blood and things strangled, and fornication.' Similarly, at a later time, St. Paul at Corinth 'loosed' even the eating of things offered to idols,—though he 'bound' it in certain circumstances (1 Co 10²⁸),—and laid down various rules concerning marriage (1 Co 7), and concerning

public worship (1 Co 11–14). 'So ordain I in all Churches' is his formula (1 Co 7¹⁷).

Of 'binding and loosing' in relation to the individual, the case which we are able to follow with the greatest degree of clearness is that of the incestuous man at Corinth; which recalls with remarkable exactness the language of Mt 18¹⁸. St. Paul was evidently surprised that the Church of Corinth had not dealt with the case on its own responsibility. It ought to have 'mourned,' with a view to the removal of the offender (1 Co 5²). The 'mourning' he would have expected was clearly a public and united humiliation of the Church before God, to the intent that God might 'take away' the man who had done the deed (see Godet, *ad loc.*). In answer to the solemn and concerted prayer, a stroke from heaven would have fallen upon him, as upon Ananias and Sapphira, or, without such prayer, upon the profaners of the Eucharist at Corinth itself (1 Co 11³⁰). Probably this appeal to God would have been preceded or accompanied by an act of formal separation from the sacramental fellowship of the Church; certainly by an exclusion of the sinner from social intercourse with the brethren (1 Co 5¹¹). As the Corinthian Church had not thus acted, the apostle informs them of his own intended procedure, with which he demands that they should co-operate. Though absent from them in body, he calls upon them to assemble; he himself will spiritually be present in the assembly, armed with 'the power (not merely with the authority) of our Lord Jesus.' The sentence which he has already passed upon the man 'in the name of the Lord Jesus' will then be formally pronounced. He will be 'delivered unto Satan for the destruction of the flesh, that the spirit may be saved in the day of the Lord.' Delivery to Satan was not a rabbinical formula for excommunication in any form (Lightf. *Exercitationes, ad loc.*). The phrase is probably derived from Job 1¹² 26. St. Paul seems to have intended that either by a judicial death, or by some wasting disease, the man should be so punished as to bring him to repentance (cf. 1 Ti 1²⁰). The discipline seems to have had the desired effect. The majority of the Corinthian Church (2 Co 2⁶) administered a 'rebuke' to the man,—which was probably excommunication in its less severe form ('reproof with the Babylonian writers was the same with excommunication,' Lightf. p. 183). The man was overwhelmed with sorrow,—so much so that the apostle feared lest the excess of it should be fatal to his soul (2 Co 2⁷). He bids the Corinthians therefore 'forgive and comfort him.' He himself, acting as Christ's representative (*ἐν προσώπῳ Χριστοῦ*) has already forgiven him, though he will not consider his forgiveness as absolute (*εἰ τι κεχώρισται*) until the Corinthian Church has joined in it. The solemn gathering 'in the name of the Lord,' the confidence that His 'power' would be present to ratify what was done by His representatives upon earth, the punishment and the release, all appear to be directly based upon the language of our Lord recorded by Mt.

Of the exercise of discipline in less unusual cases we naturally have scantier evidence in NT. Perhaps the most interesting reference to it is that in Ja 5¹⁴. The sick man is there advised to call for the presbyters of the Church, who are to pray over him, 'anointing him with oil in the name.' In answer to this action of the Church represented by its local heads, the writer says that the sick man will recover (for to interpret *σώσει* and *ἐγχείρει* otherwise seems impossible in the context), and adds that 'if he have committed sins,' i.e. obviously, grave and marked sins, 'he shall be forgiven' (*καὶ ἁμαρτίας ἢ πεποιηκώς, ἀφεθήσεται αὐτῷ*). That the *ἀφεθήσεται αὐτῷ* is a promise of what God will do in

answer to the prayer of the presbyters, and not an instruction to the presbyters themselves, seems to be required by the structure of the sentences. It is parallel in sense to *σώσει* and *ἐγερει*. If St. James had intended the word to mean that the presbyters were to absolve the man, he would probably have put it in the imperative, like *προσκαλεσάσθω* and *προσευξάσθωσαν*. But the forgiveness of God is a blessing granted to the faithful prayers of the presbyters; and, in order to encourage such prayers, the apostle proceeds to insist upon the value of them. 'Confess therefore your sins one to another, and pray one for another,' he says, 'that ye may be healed.' By 'one to another' he means 'to your fellow-men,' i.e. not to God only. It is clear that he cannot mean mutual confession in the ordinary sense of the term, for (1) he assumes that the prayers to which he ascribes such efficacy are those of 'righteous men,' not those of men who 'have committed sins'; (2) the special object with which the prayers are to be offered (not indeed the contents of the prayers, which are directly connected with forgiveness) is 'that ye may be healed' (*ὅπως ἰάσθῃτε*); if, therefore, the prayers are to be in the strict sense mutual prayers, it is implied that both parties, praying and prayed for, are alike sick, and the mutual confession would be only between sick man and sick man, which is absurd. Evidently, the sick man is exhorted to make his confession to the presbyters whom he has called in, and they in turn are exhorted to pray for his forgiveness, upon which his recovery is made to depend, and are reminded what power their prayers have, if only they are what they ought to be. The apostle selects from the OT history the example of one who exercised the 'power of the keys' upon a national scale, both 'shutting' and 'opening' the stores of heaven for his people. Though but 'a man of like passions with us,' Elijah by his (unrecorded) prayers shut up the rain from his guilty countrymen for three years and a half; and on their showing signs of repentance, he opened it again for them. We need not therefore wonder (such is St. James' argument) if, when we confess our sins to beings of the same make as ourselves, their intercession is able to obtain for us the remission of them. (On the rabbinic view of Elijah and the 'Keys,' see Wünsche, p. 195).

Our accounts of life within the Christian communities of the first age are so fragmentary that we cannot be surprised at not finding many references to the penitential discipline which existed among them. That there should have been some power on earth answering to what was occasionally exhibited even in OT times—as in the absolution of David by Nathan (2 S 12¹⁵)—is only what was to be expected in the covenant of grace. When Christ claimed to forgive sins as 'the Son of Man,' the multitudes 'glorified God which had given such authority unto men' (Mt 9⁸). The last word may mean either that the authority to absolve was committed by God to men, to use on His behalf; or that by delegation of such an authority God had bestowed a blessing upon men: in other words, the 'men' spoken of may be either the holders of the authority, or those on whose behalf it was given. But in either case it was recognized that the assurance of forgiveness had been made accessible in a new way; and Christ, in His first appearance to the assembled Church after His resurrection, gave His disciples to understand that the authority which He had exercised in relation to absolving and retaining of sins was henceforth vested in them, as the continuators of His own mission (Jn 20²¹). It is not an exhaustive interpretation of these words which would see in them only a commission to impose or to remove ecclesiastical censures. All acts of the Christian society, according to the

NT conception of it, are fraught with spiritual efficacy.

It may be added that some eminent interpreters consider the 'laying on of hands' in 1 Ti 5²² to be the sign of absolution (see art. LAYING ON OF HANDS); but the interpretation is far from certain. A. J. MASON.

PRÆTORIAN GUARD.—See PRÆTORIUM.

PRÆTORIUM (Gr. τὸ πραιτώριον).—This Lat. word, adopted in the later Gr., signified originally the general's (*prætor's*) tent (e.g. Livy, *Hist.* vii. 12, x. 33). Then it was applied to the council, composed of the chief officers of the army, which assembled in the general's tent (e.g. Livy, *Hist.* xxvi. 15, xxx. 5, xxxvii. 5); then to the official residence of the governor of a province (e.g. Cic. in *Verr.* II. iv. 28, II. v. 35; Tert. *ad Scap.* 3) then, in the post-Augustan age, to any princely house (e.g. Juv. *Sat.* x. 161), and even to a large villa or country-seat (e.g. Suet. *Octav.* 72, *Calig.* 37, *Tib.* 39; Juv. *Sat.* i. 75; Statius, *Sylv.* I. iii. 25); and finally to the imperial bodyguard, whose commander was *præfectus prætorio* or *prætorii* (e.g. Tac. *Hist.* I. 20, II. 11, 24, iv. 46; Suet. *Nero.* 9; Pliny, *NH* xxv. 2). No certain example occurs of its application either to the prætorian camp or barracks or to the emperor's residence in Rome, though it was often used of the emperor's residence away from Rome.

In AV the word appears only once (Mk 15¹⁶); but in the Gr. of NT it is used in Mt 27²⁷ (AV 'the common hall'; marg. 'governor's house'; RV 'the palace'), Mk 15¹⁶ (AV 'the hall, called Prætorium'; RV 'within the court which is Prætorium'; marg. 'palace'), Jn 18²⁸ (AV 'the hall of judgment'; marg. 'Pilate's house'; RV 'palace'), 18³³ and 19⁹ (AV 'judgment hall'; RV 'palace'), Ac 23³⁵ (AV 'Herod's judgment hall'; RV 'Herod's palace'), Ph 1¹³ (AV 'in all the palace'; marg. 'Cæsar's court'; RV 'throughout the whole prætorian guard').

In the Gospels the term denotes the official residence in Jerus. of the Roman governor, and the various trms² of it in our versions arose from a desire either to indicate the special purpose for which that residence was used on the occasion in question, or to explain what particular building was intended. But whatever building the governor occupied was the Prætorium. It is most probable that in Jerus. he resided in the well-known palace of Herod, since Philo (*ad Gaium*, 31) states that Pilate hung there the shields which offended the Jews (see PILATE), and Josephus (*BJ* II. xiv. 8, II. xv. 5) speaks of Gessius Florus as living in 'the king's palace,' and since in Cæsarea (see Ac xxiii. 35) Herod's palace is known to have been used for the same purpose. Herod's palace in Jerus. was a magnificent structure in the upper or western part of the city, and was connected by a causeway over the valley of Tyropœon with the western wall of the temple. It is described by Josephus (*BJ* v. iv. 4, *Ant.* xv. ix. 3) in admiring terms. It was surrounded by a wall, rising to the height of 30 cubits, and adorned with towers at equal distances. The enclosure was large enough to contain a small army. The building had two marble wings, called by Herod the Cæsareum and the Agrippæum. It contained large rooms within and spacious porticoes without. It was sumptuously furnished, and was surrounded by a beautiful park. Here the governor with his guards lived when in Jerus., while the regular garrison occupied the castle of Antonia; and it was doubtless before this building that the Jews presented themselves with the demand for Jesus' execution. Tradition, indeed, has placed the residence of Pilate in the lower city, a short

distance north of the temple. Not a few also have identified it with the castle of Antonia (Rosenmüller, *Alterthumskunde*, II. ii. 228; Caspari, *Introd.* p. 225; Wieseler, *Chron. Syn.*, Eng. tr. p. 372; Weiss, *Life of Christ*, iii. 346 n.; Westcott, *St. John*)—partly because tradition has located the house of Pilate near the site of the castle; partly because, since the castle was the regular barracks for the garrison, and was sufficiently large for the purpose, it is thought probable that the governor also used it; and also because many identify 'the place called the Pavement, but, in the Hebrew, Gabbatha,' with the elevated, paved area between the castle and the temple (see GABBATHA). But, for the reasons given above, the identification with Herod's palace is probably to be preferred (so Meyer, Winer, Alföldi, Schürer, Edersheim, and others). In like manner, as already observed, Herod's palace in Cæsarea was used as the Prætorium there. The expression in Ac 23³⁵ ('Herod's Prætorium') is abbreviated from 'the prætorium of Herod's palace,' and thus describes both the particular building and the purpose for which it was used.

In Ph 1¹³ 'in the whole Prætorium' has been very variously explained. Many commentators, ancient and modern, have tr^d it 'palace' (so AV), coupling it with 4²², where allusion is made to believers who belonged to 'Cæsar's household.' But no other instance appears of the application of the term to the emperor's residence in Rome. Such an application would have been intolerable to the Romans, since it would have shocked the republican traditions under which the empire was organized. Hence many, as Perizonius (*De orig. signif. et usu voc. prætoris et prætorii*, 1687, *Disquisitio de prætorio*, 1690), Clericus, Michaelis, Hoeleman, Wiesinger, Milman, Weiss, Ellicott, Meyer, understand it of the barracks of the prætorian guard (*castra prætorianorum*). But Lightfoot (*Com. on Phil.* p. 99) has shown that neither can this use of the word be established. Wieseler (*Chron. d. Apost. Zeit.* p. 403), followed by Conybeare and Howson, refers it, not to the prætorian camp, but to the barracks of the palace guard, which Augustus established (Dio Cass. liii. 16) in the imperial enclosure on the Palatine hill; but, after the establishment of the *castra prætorianorum* by Tiberius, the word would naturally refer to it, if to any barracks. The following phrase (τοῖς λοιποῖς πᾶσι) also more naturally describes persons than places, *λοιρός* being never in NT applied to places (Ellicott, *in loc.*). Presumably, therefore, 'prætorium,' too, is descriptive of persons. Hence Lightfoot has ably defended the meaning 'prætorian guard.' St. Paul is supposed to have been chained to soldiers of the guard, and thus, through the change of guards, his message spread throughout the whole body of soldiers. This meaning of Prætorium is frequent, and has been adopted in Ph 1¹³ in RV. Recently, however, Mommsen (*Sitzungsber. der Königl. preuss. Acad. d. Wissensch.* 1895, p. 495, etc.), followed by Ramsay (*St. Paul the Trav.* p. 357), has proposed another view. He considers it improbable that St. Paul was put in charge of the prætorian guard. He believes that Julius, the centurion who brought Paul to Rome, belonged to the corps of *militæ frumentarii* or *peregrini*, a corps drafted from legions in the provinces, whose duty it was to supervise the corn supply, and also probably to perform police service: and that Julius probably delivered his prisoners to the commander of his corps, *princeps peregrinorum*, whose camp perhaps was already, as it was afterwards, on the Cælian hill. But while St. Paul was not in charge of the prætorian guard, his case came before the prætorian council, consisting of the *præfecti prætorio* and their assistants. This council then,

according to Mommsen and Ramsay, is the *prætorium* alluded to by the apostle, and τοῖς λοιποῖς πᾶσι refers to the audience at the trial.*

G. T. PURVES.

PRAISE IN OT.—'Praise,' whether as a verb or a noun, has various applications in the OT, but its commonest use is to denote an act of homage or worship offered to God by His creatures, particularly by man. The object of this article will be mainly to examine the meaning and usage of the terms which our English versions render by 'praise,' and to sketch, as far as the data enable us to do so, the occasions, the modes, and the history of praise in Israel.

i. THE TERMS.—1. *ללה*. The original sense of this root is perhaps 'break out (in a cry),' especially of joy (cf. the name *Hallel* applied to Ps 113-118, the Aram. *הליל* 'marriage-song,' and the Assy. *alālu* 'shout for joy'; see also Cheyne, *OP* 460), although it is possible that, as W. R. Smith (*RS* 411) suggests, among the Semites 'the shouting (*hallel*) that accompanied sacrifice may, in its oldest shape, have been a wail over the death of the victim, though it ultimately took the form of a chant of praise (*Hallelujah*). The idea of *making a noise* is what appears to be prominent. The same writer points out that the roots *לה* 'to chant praises' and *לל* 'to howl' are closely connected, and he thinks it possible that shouting in mourning and shouting in joy may have both been primarily directed to the driving away of evil influences. The sense of 'praise' is conveyed by the above root in the Piel *ללה*. This may have for its object (1) *man or woman*: Gn 12¹⁸ (J) 'they praised (LXX ἐπῄνεσαν, AV 'commended') her (Sarah) to Pharaoh'; Pr 27² 'let another man praise thee (LXX ἐγκωμιάζω σε), and not thine own mouth'; 28⁴ 'they that forsake the law praise (LXX ἐγκωμιάζουσιν) the wicked'; 31^{28, 31} the virtuous woman is praised by her husband and by her works (LXX in both *αἰνεῖν*, but in v. 31 a different reading from that of MT is followed: καὶ αἰνέσθω ἐν πύλαις ὁ ἀνὴρ αὐτῆς, 'and let her husband be praised in the gates'); Ca 6⁹ (here and in the following passages, unless otherwise noted, LXX *αἰνεῖν*) of the Shulammitte; 2 S 14²⁵ of Absalom's beauty (*alverós*); 2 Ch 23¹² of king Joash. (2) The object is once a *false god*: Jg 16²⁴ of the Philistines praising (ὠμνεῖν) Dagon; (3) very frequently *God* (עֲבָדָה or מַחֲמָה): Ps 69³⁴ (where 'heaven and earth, the seas, and everything that moveth therein' are called on to praise Him; cf. Ps 148); often of public worship in the sanctuary: Is 62⁹, cf. 64¹¹ (ἐυλογεῖν), Ps 22²² (ὠμνεῖν, cf. v. 26 ὁ ἱερὸς μου) 35¹¹ 84⁴ 107³² 109³⁰ 146² 149⁶. Sometimes the object is 'the name of Jahweh or of God' (מִן הַשָּׁמַיִם or מִן הָאָרֶץ, τὸ ὄνομα τοῦ θεοῦ): Ps 69³⁰ 74²¹ 145³ 148⁵, Jl 2²⁶; or His word (דָּבָר, λόγος, ῥῆμα): Ps 56⁴ (ἐπαῖνεῖν) ^{10 bis} [v. 10^b may be an editorial addition, so Hupfeld, Cheyne *et al.*]; or the object may be unexpressed: Jer 31 [Gr. 38]⁷, Ps 63⁵ (ἐπαῖνεῖν). The expression 'praise ye Jah' (*Hallelujah*), in Ps 135³ אֲלֵלֵיָּהּ [*αἰνεῖτε τὸν Κύριον*], elsewhere always as one word אֲלֵלֵיָּהּ, Ἀλληλουιά [once Ps 104³⁵ אֲלֵלֵיָּהּ, LXX omits here] has generally a liturgical application and is mostly confined to late psalms. It occurs at the beginning of Ps 106. 111. 112. 113. 135. 146. 147. 148. 149, and at the end of 104. 105.

* Mommsen denies that *στρατοπρόεδρος* (AV *captain of the guard*), found Ac 28¹⁶ in some authorities (cf. Blass, *ad loc.*), but omitted by WH, Tisch., and RV, could have been applied to a *præfectus prætorio*. This reading is evidently 'Western,' and Mommsen finds in the text of the Stockholm Latin MS ('Gigas'), *princeps peregrinorum*, at least a 2nd cent. interpretation of it, one which confirms his inference that the *castra peregrinorum* had been established in Rome in St. Paul's time. Positive evidence, however, for the existence of this corps and camp, under this name, appears only in the time of Severus, and the Latin MS may interpret the Gr. text before it by the light of later custom; while *στρατοπρόεδρος* itself was evidently a popular title, and really supplies no information as to who took charge of the apostle.

106. 113. 115. 116. 117. 135. 146. 147. 148. 149. 150. See, further, art. HALLELUJAH. Instead of the direct object, לל is generally followed, in the writings of the Chronicler, by ליה, in the account of the technical Levitical (or priestly) function of praising Jahweh: 1 Ch 16²³ 23³⁰ 25³, 2 Ch 5¹³ 20¹⁹ 29³⁰ (ὕμνεῖν) 30²¹ (καθυμνεῖν), Ezr 3¹¹; but the simple לל occurs in Ezr 3¹⁰, as it does also in Neh 5¹³ (Nehemiah's own Memoirs). The object is unspecified in Neh 12²⁴ (Chronicler), cf. 1 Ch 23⁶, 2 Ch 7⁶ ('when David praised by their ministry', LXX ἐν ὕμνοις Δαυὶδ διὰ χειρὸς αὐτῶν) 8¹⁴ 23¹³ ('the singers also played on instruments of music and led the singing of praise' לל וכלי נגיף וכלי נשוח ליה), LXX οἱ ἀδοντες ἐν τοῖς ὄργάνοις, ψῶδοι καὶ ὕμνοῦντες αὐτὸν) 31², in all of which לל has its technical sense. Similarly, the passive sense 'be praised' is conveyed by the Pual, and once (Pr 31³⁰) by the Hithpael: (1) of human subjects and things: Pr 12⁸ 'a man shall be praised (AV; RV 'commended', LXX ἐγκωμιάσθαι) according to his wisdom'; Ps 78³ 'their maidens were not praised' (in marriage-song; see Cheyne *ad loc.*), so Aquila οὐκ ὑμνήθησαν, Symm. and Theod. οὐκ ἐπηνέθησαν, but LXX οὐκ ἐπένθησαν, 'did not raise the dirge'; Ezk 26¹⁷ of Tyre the 'praised (AV; RV 'renowned') city' (LXX ἡ πόλις ἡ ἐπαινετή); (2) of God, only in ptep. (ללה) with gerundive force='to be praised', 'worthy of praise': 2 S 22⁴ (αἰνεῖν ἐπικαλέσμαι Κύριον) = Ps 18³ (αἰνῶν ἐπικαλέσμαι Κύριον), Ps 48¹ 96⁴ (= 1 Ch 16²³) 145³ [in these last four the LXX has αἰνεῖς]; in Ps 113³ the subject is His name (αἰνεῖται τὸ ὄνομα Κυρίου).

The noun for 'praise' from the root לל is הללה (once ללה, Pr 27²¹ 'the fining pot is for silver and the furnace for gold, and a man [is to be estimated] according to his praise,' where ללה לל probably means 'according to his reputation' [so Toy *et al.*, cf. LXX ἀνὴρ δὲ δοκιμάζεται διὰ στόματος ἐγκωμιαζόντων αὐτὸν; see *Oxf. Heb. Lex.* for other possible explanations]). The word הללה is used (1) of praise offered to Jⁿ, sometimes individual, but more frequently general and public: Ps 34¹ 48¹⁰ (both αἰνεῖς) 65¹ ('unto Thee stillness is praise [ללה לך הללה], O God, in Zion,' but text and tr. are both doubtful; LXX Σοὶ πρέπει ὕμνος, 'praise is a fitting tribute to thee'; see Comm. *ad loc.*, and Driver, *Par. Psalter*), 71⁶ (δυνάμεις), 8⁶ (αἰνεῖς), 100⁴ (ὕμνοι); particularly of praise as sung: Ps 22³ ('O Thou that sittest [throned] upon the praises of Israel,' an imitation of ללה לך, the idea perhaps being that the praises, ascending like clouds of incense, form, as it were, the throne upon which Jⁿ sits [so Kirkpatrick *et al.*, but see Duhm *ad loc.*, and cf. the LXX σὺ δὲ ἐν ἁγίοις κατοικεῖς, ὁ ἔκτατος Ἰσραὴλ]), 33¹ (αἰνεῖς), 40³ (ὕμνος), 106¹² Neh 12⁴⁶ (both αἰνεῖς), Is 42¹⁰ (δοξάζετε τὸ ὄνομα αὐτοῦ). (2) The word הללה is used for a song of praise in the title of Ps 145 (αἰνεῖς); cf. the New Heb. name for the Book of Psalms, הללה וקק וליס 'ס, or 'לי. (3) It is used of qualities, deeds, etc., of Jⁿ which demand praise: Ex 15¹¹ הללה וקק 'terrible in praises' (i.e. in attributes that call for praise; LXX θαυμαστός ἐν δόξαις), cf. Ps 91⁴ ('that I may show forth all Thy praise'), 78⁴ ('telling the praises of the LORD'), 79¹³ ('we will show forth Thy praise'), 102²¹ ('that men may declare His praise in Jerusalem'), 106² ('who can show forth all His praise?'), v. 47 = 1 Ch 16³³ ('to triumph in Thy praise') [in the last six passages LXX αἰνεῖς], Is 43²¹ ('this people shall show forth My praise,' LXX ἀπειρά), 60⁶ ('they shall proclaim the praises of the LORD,' LXX τὸ σωτήριον Κυρίου εὐαγγελιούσται), 63⁷ ('I will make mention of the praises of the LORD,' LXX ἀπειρά). (4) הללה may = *renown, fame, glory, or the object of these*: (a) of Jⁿ: Hab 3³ 'the earth was full of His praise' (ללה לך וקק וקק, LXX ἀλέσεως αὐτοῦ πλήρης ἡ γῆ) || 'His glory covered the heavens' (ללה וקק וקק, LXX ἐκάλυψεν οὐρανοὺς ἡ

ἀρετὴ αὐτοῦ), cf. Dt 10²¹ 'He is thy praise,' Jer 17¹⁴ 'Thou art my praise' (both καύχημα); (b) of other objects: Israel or Jerusalem, Dt 26¹⁰ (καύχημα), Is 62⁷ (BA ἀγαυία, Theod. καύχημα), cf. 60¹⁰ ('thou shalt call thy walls Salvation and thy gates Praise,' i.e. probably 'thy fame or renown shall take the place of protecting walls'; LXX κληθήσεται Σωτήριον τὰ τείχη σου, καὶ αἱ πύλαι σου Γλύμμα), and 61¹¹ (ἀγαλλίαμα); Moab, Jer 48 [Gr. 31]² (ἀγαυία); Damascus, 49²⁵ [Gr. 30]¹⁴, LXX follows a different reading; Babylon, 51 [Gr. 28]⁴¹ (καύχημα). Is 61³ 'the garment of praise' (ללה נעצר) is doubtful. It may = 'praise (renown) as a garment' (Delitzsch) or 'a splendid garment' (Dillmann), but perhaps the clauses should, with Bickell, Cheyne, Oort, Duhm, be arranged thus: נעצר ללה נעצר נעצר נעצר נעצר נעצר 'oil of joy for the garment of mourning, a song of praise for a failing spirit.' The LXX has δέξαν ἀντὶ σποδοῦ, δάμμα εὐφροσύνης τοῖς πενθοῦσι, καταστολήν δέξης ἀντὶ πνεύματος ἀκηδίας.

In Lv 19²⁴ the fruit of trees offered in the fourth year of their bearing is הללה לך לך (lit. 'holiness of praise to Jⁿ'), LXX ἁγίος αἰνεῖς τῷ Κυρίῳ, cf. Jg 9²⁷ [the only other occurrence of the Heb. word], where the Shechemites hold a vintage rejoicing or merry-making (ללה נעצר, LXX Β ἐτοίησαν ἐλλουλεῖν, A ἐπ. χοροῖς) in the house of Baal-berith.

2. The root נל whose primary sense is 'throw or cast.' The only occurrence of the Qal is in Jer 50 [Gr. 27]¹⁴ 'shoot at her' (Babylon; נל נל, LXX ταξέυσατε ἐπ' αὐτήν), but perhaps we should read here נל. This sense is borne also by the Piel in the only two passages where this stem occurs, namely, La 3³⁵ (נל נל נל 'and they cast stone(s) at me,' LXX καὶ ἐπέθησαν λίθον ἐπ' ἐμοί), and Zec 2⁴ [Eng. 1³¹] (נל נל נל 'hands', LXX, by confusion with the Heb. word for 'hands,' reads eis χεῖρας αὐτῶν τὰ τέσσαρα κέρατα). All the other occurrences of the root show the Hiphil and Hithpael (the latter only in P, the Chronicler, and Daniel) stems, which have the sense of 'praise' or 'confess,' a sense which it is somewhat difficult to connect with the primary signification, although it has been suggested that the connecting link may be found in gestures accompanying the act of praise.

The Hiph. נלה (cf. Palmyrene נלה 'render thanks,' frequent in votive inscriptions) is used occasionally of praising men: Gn 49⁶ of Judah [with play upon name, 'Judah, thee shall thy brethren praise' (jōdūkhā), LXX αἰνεῖν]; Ps 45¹⁷ of the king (AV 'praise,' RV 'give thanks'); 49¹⁸ 'men praise thee when thou doest well to thyself' (both ἐξομολογεῖσθαι); Job 40¹⁴ of Job, spoken ironically by the Almighty (LXX ὁμολογεῖν, AV and RV 'confess'). This sense of 'confess' is borne by the Heb. word also in 1 K 8³³ 2 = 2 Ch 6³⁴ (all ἐξομολογεῖν), 28² (αἰνεῖν), Ps 32³ (ἐξαγορεύειν), Pr 28¹³ (ἐξηγγεῖσθαι); cf. [in Hithp.] Ezr 10¹ (προσαγορεύειν), Neh 1⁶ 9² 3 (all ἐξαγορεύειν), Dn 9⁴ (LXX and Theod. ἐξομολογεῖσθαι) 20 (LXX ἐξομολογεῖσθαι, Theod. ἐξαγορεύειν), Lv 5³ 16²¹ 26³⁰, Nu 5⁷ (all ἐξαγορεύειν).—Much more frequently the object of praise is God: Gn 29²⁵ where J explains the name Judah (which he takes as = 'praised,' as if from Hoph. of נל) by the saying he puts in the mouth of Leah, 'this time will I praise (Heb. 'odeh) the LORD' (ἐξομολογήσομαι Κυρίῳ); very frequently, especially in Ps and Ch, of praise offered in the ritual worship, the object being Jahweh explicitly or implicitly: e.g. Is 12¹ (εὐλογεῖν), 4 (ὕμνεῖν), 38¹⁸ (αἰνεῖν, εὐλογεῖν), Jer 33 [Gr. 40]¹¹, Ps 7¹⁷ 9¹ 30⁹ 12 32⁴ 11 (all ἐξομολογεῖσθαι). Ps 76¹⁰ 'surely the wrath of man shall praise Thee, the residue of wrath shalt Thou gird upon Thee' (AV and RVm 'restrain') is doubtful. The MT reads נלה נלה נלה נלה נלה נלה, LXX δὲ ἐν θυμῷ ἀνθρώπου ἐξομολογήσεται σοι, καὶ ἐνκατάλιμμα ἐνθυμίου

ἐορταίει σοι. Duhm emends $\pi\alpha\lambda\iota$ to $\pi\alpha\lambda$, and π to λ , and in the next clause follows the LXX in reading $\eta\lambda$ $\pi\alpha$, thus obtaining the sense, 'all the tribes of men shall praise Thee, the residue of the tribes shall keep (pilgrimage) festival to Thee.' Wellhausen makes the same change, $\eta\lambda$ $\pi\alpha$, in the last clause; on $\pi\alpha\lambda$ he remarks that by this word the *pious* are meant, but that the pronunciation and the meaning of the word are quite uncertain. Ps 139¹⁴ reads 'I will praise (RV 'give thanks unto') Thee, for I am fearfully and wonderfully made' (lit. 'fearfully wondrous,' there being no 'made' in the Hebrew [Driver, *Par. Psalter*]). The LXX (BA $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$ σοι $\delta\tau\iota$ φοβερώς $\epsilon\theta\alpha\upsilon\mu\alpha\sigma\tau\acute{\omega}\eta\varsigma$, but κ' $\epsilon\theta\alpha\upsilon\mu\alpha\sigma\tau\acute{\omega}\eta\varsigma$), the Syr. and the Vulg. (*quia terribiliter magnificatus es*) have 'Thou art fearfully wondrous,' and this is adopted by Wellh. in *SBOT*, i.e. $\pi\alpha\lambda$ for $\pi\alpha\lambda\iota$. The more radical emendations proposed by Duhm appear to be uncalled for.—In other instances the object is the name of God: Is 25¹ ($\delta\mu\epsilon\iota\upsilon\upsilon$), Ps 44⁸ 54⁹ 99² 138² 142⁷; or His wonders ($\kappa\alpha\lambda\omega\varsigma$, $\tau\alpha$ $\theta\alpha\upsilon\mu\acute{\alpha}\sigma\iota\alpha$) Ps 89⁵ (all $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$). Instead of a simple accusative, $\pi\alpha\lambda$ may be followed by λ , always referring to the ritual worship, e.g. $\pi\alpha\lambda$ Ps 106⁴⁷ 'to give thanks unto Thy holy name,' cf. 122⁴ 140¹⁵ (all $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$); $\pi\alpha\lambda$ λ $\pi\alpha\lambda$ (τῇ $\mu\eta\tau\eta\mu\iota$ τῆς $\alpha\gamma\iota\omega\sigma\upsilon\eta\varsigma$ αὐτοῦ) Ps 30⁴ 97¹² (AV 'at the remembrance of His holiness,' RV 'to His holy name,' both $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$); $\pi\alpha\lambda$ 1 Ch 16⁴ 7⁴¹ (all $\alpha\lambda\epsilon\iota\upsilon\upsilon$), 23³⁰ ($\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$), 25² (where $\pi\alpha\lambda$ and λ occur together, LXX $\alpha\lambda\alpha\kappa\rho\upsilon\mu\epsilon\tau\omicron\varsigma$ $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$ $\kappa\alpha\iota$ $\alpha\lambda\epsilon\iota\upsilon\upsilon$), 2 Ch 5¹³ (similarly $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$ $\kappa\alpha\iota$ $\alpha\lambda\epsilon\iota\upsilon\upsilon$) 7⁸ 20²¹ 30²² (Hithp.), Ps 33² 92¹ (all $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$) 105¹=1 Ch 16⁸=Is 12⁴ ($\delta\mu\epsilon\iota\upsilon\upsilon$); cf. the familiar 'Give thanks to J' for He is good' ($\beta\iota\omega\varsigma$ $\pi\alpha\lambda$ $\eta\lambda$ $\eta\lambda$, $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$ $\tau\omega$ $\kappa\upsilon\lambda\iota\omega$, $\delta\tau\iota$ $\chi\alpha\rho\iota\sigma\tau\acute{\omicron}\varsigma$ or $\alpha\gamma\alpha\theta\acute{\omicron}\varsigma$) Ps 106¹ 107¹ 118¹ 136¹, 1 Ch 16²⁴ (here, perhaps by a scribal error, $\alpha\gamma\alpha\theta\acute{\omicron}\varsigma$), cf. Jer 33 (Gr. 40)¹¹.

It will be observed that very frequently both AV and RV render $\pi\alpha\lambda$ by 'give thanks to' instead of 'praise,' and in many instances (2 Ch 7³ 20²¹, Ps 7¹ 9¹ 33² 44⁸ 45¹⁷ 52⁵ 54⁹ 57⁸ 108³ 109³⁰ 111¹ 118¹⁰ 119⁷ 138² 139¹⁴ 142⁷ 145¹⁰, Is 12⁴, Jer 33¹), although not uniformly, RV substitutes 'give thanks to' for AV 'praise.' It might be well to adopt this rendering in all instances where $\pi\alpha\lambda$ describes a religious exercise, except those in which 'confess' is the appropriate sense, and to retain 'praise' for λ .

The noun from this root is $\pi\alpha\lambda\iota\alpha$ 'praise,' 'thanksgiving.' It is used of giving praise to Jⁿ by confession of sin: Jos 7¹⁹ JE; $\pi\alpha\lambda\iota\alpha$ $\delta\delta\epsilon$ $\tau\eta\eta$ $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$, cf. Ezr 10¹; but especially of the songs of thanksgiving, in liturgical worship: Ps 26⁷ ($\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$), 42⁴ ($\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$), 69³⁰ ($\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$), 95² 147⁷ (both $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$), Jon 2⁹ ($\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$ $\kappa\alpha\iota$ $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$), Neh 12⁷ (κ' $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$, BA om.). In all these instances both AV and RV have 'thanksgiving'; in Ps 100 title and v.⁴ (both $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$) AV has 'praise,' RV 'thanksgiving.'—The word $\pi\alpha\lambda\iota\alpha$ is used in Neh 12³¹ 36 of the 'two companies that gave thanks' ($\pi\alpha\lambda\iota\alpha$ $\pi\alpha\lambda$, $\delta\upsilon\omicron$ $\pi\epsilon\pi\lambda$ $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$), and possibly a similar sense ('choirs') is intended in Jer 30 [Gr. 37]¹⁹ (AV and RV 'out of them shall proceed thanksgiving,' LXX B $\alpha\delta\omicron\upsilon\tau\epsilon\varsigma$). In several instances $\pi\alpha\lambda\iota\alpha$ means a thank-offering: Am 4⁵ ($\delta\mu\lambda\omicron\gamma\iota\alpha$, Lv 7¹² 13¹⁵, $\theta\upsilon\sigma\iota\alpha$ [$\tau\eta\varsigma$] $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$) 22²⁸ ($\eta\gamma\iota\alpha\pi\eta\tau\eta$, $\theta\upsilon\sigma\iota\alpha$ $\epsilon\iota\chi\eta$), 2 Ch 29³¹ 33¹⁶ (both $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$), Ps 50¹⁴ 28 (the latter verse reads in AV 'whoso offereth praise glorifieth Me,' RV 'whoso offereth the sacrifice of thanksgiving,' Driver [*Par. Psalter*] 'he that sacrificeth thanksgiving,' LXX $\theta\upsilon\sigma\iota\alpha$ $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$ $\delta\alpha\delta\acute{\omicron}\sigma\epsilon\iota$ $\mu\epsilon$) 56¹³ 107²² 116⁷, Jer 17³⁶ (all $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$) 33¹¹ ($\delta\alpha\delta\alpha$). A doubtful form occurs in Neh 12⁶ 'Mattaniah who was over the thanksgiving,' AV and RV; Avm 'i.e. the psalms of thanksgiving'; RvM 'or the choirs.' The Hebrew

is $\pi\alpha\lambda\iota\alpha$, for which LXX, evidently by a confusion with the Heb. word for 'hands,' gives $\epsilon\pi\iota$ $\tau\omega\upsilon$ $\chi\epsilon\iota\rho\omega\upsilon$; the Vulg. has *super hymnos*. Ewald, Bertheau, Keil, and Oettli read the abstract noun $\pi\alpha\lambda\iota\alpha$, Olshausen reads the infin. $\pi\alpha\lambda\iota\alpha$. It is not improbable that JEDUTHUN (which see) also belongs to this root, and that it was originally a musical term and not a proper name.

As 'give thanks to' was suggested above as the most suitable rendering for $\pi\alpha\lambda$ in its liturgical sense, 'thanksgiving' might be adopted for $\pi\alpha\lambda$, and 'praise' retained for λ .

3. In two instances, Jg 5² and Ps 72¹⁸, where AV has 'praise,' RV substitutes 'bless,' which is the more exact rendering of $\pi\alpha\lambda$, the verb employed (LXX in both $\epsilon\upsilon\lambda\omicron\gamma\epsilon\iota\upsilon$).

4. $\pi\alpha$, only in Piel. According to Hupfeld (*Psalmen*, 1862, iv. 421 f.), the original reference of this root* (which in the Heb. literature known to us is used either of playing or singing [cf. Lat. *canere*]) is to the *hum* of a stringed instrument, and $\pi\alpha$, used in 57 titles as a designation of psalms, would be, properly, a song sung to a musical accompaniment. It is this word $\pi\alpha$ which the LXX reproduces by $\psi\alpha\lambda\mu\acute{\omicron}\varsigma$ (whence *psalm*) from $\psi\alpha\lambda\lambda\omega$, the usual LXX equivalent for $\pi\alpha$, and in Cod. Alex. (A) the Book of Psalms is entitled $\psi\alpha\lambda\tau\eta\mu\iota\omicron\upsilon$ (whence *Psalter*). The word $\pi\alpha$, with two exceptions (Jg 5², in the Song of Deborah, 'I will sing praise [$\psi\alpha\lambda\omega$] to the LORD,' || $\pi\alpha$; and Is 12⁴ 'sing [$\psi\alpha\lambda\tau\epsilon$] unto the LORD, for He hath done excellent things') is confined to the Book of Psalms, where it occurs in the following collocations: (a) with λ and $\alpha\lambda\epsilon\iota\upsilon\upsilon$ or $\pi\alpha$, usually rendered in EV by 'sing praise(s) unto'; LXX in this and in all the following constructions, unless otherwise noted, $\psi\alpha\lambda\lambda\epsilon\iota\upsilon$: Ps 27⁶ 101¹ 104³³ 105²=1 Ch 16⁸ ($\delta\mu\epsilon\iota\upsilon\upsilon$) [in all these || $\pi\alpha$] 91² 30⁶ [both || $\eta\eta\alpha$] 47⁶ ('to our king') 66⁴ 71²² ('to Thee,' || $\pi\alpha$) 75¹⁰ (|| $\eta\eta\alpha$) 146³ (|| λ); once $\pi\alpha$ instead of λ , Ps 59¹⁸ 'unto Thee, O my strength, will I sing praises'; or with $\pi\alpha$ || to the name of God: Ps 18⁵⁰=2 S 22⁵⁰ (|| $\pi\alpha$) 92² (|| $\eta\eta\alpha$) 135³ (|| $\eta\eta\alpha$); —(b) with an object, either a pronominal suffix, 'sing Thee,' 'praise Thee in song': Ps 30¹³ 57¹⁰ 108⁴ 138¹ (all || $\pi\alpha$); or an accusative, God or the Lord: Ps 47⁷ 68³² (|| $\pi\alpha$) 147¹; His name: 71⁸ (|| $\pi\alpha$) 91² 61⁶ 66⁴ 68⁸ (|| $\pi\alpha$); the glory of His name: 66²; His power ($\kappa\alpha\tau\alpha$): 21¹⁴ (|| $\pi\alpha$); once the accusative of the song: 47⁸ ($\pi\alpha$ $\pi\alpha$ 'make ye melody with a skilful strain,' LXX $\psi\alpha\lambda\tau\epsilon$ $\sigma\upsilon\upsilon\epsilon\tau\omega\varsigma$); —(c) absolutely: 57⁸ (|| $\pi\alpha$) 98⁴ (|| $\pi\alpha$, $\pi\alpha$, $\pi\alpha$) 108³ (|| $\pi\alpha$). Instrumental accompaniment to the song appears in 106³, and the word is used directly of playing upon an instrument in 33² 71²² 98⁴ 147⁷ 149².

Two nouns (besides $\pi\alpha$) from the root $\pi\alpha$ are found in the OT.—(1) $\pi\alpha$, which is used of instrumental music in Am 5²⁶, where 'the melody of thy harps' ($\pi\alpha$ $\pi\alpha$, $\psi\alpha\lambda\mu\acute{\omicron}\varsigma$ $\delta\omicron\gamma\mu\alpha\tau\omega\upsilon$ σου) is || 'the noise of thy songs' ($\pi\alpha$ $\pi\alpha$, $\eta\chi\omega\upsilon$ $\psi\acute{\omicron}\delta\omega\upsilon$ σου); but of singing in Is 51³ ($\pi\alpha$ $\pi\alpha$ $\pi\alpha$, $\xi\sigma\mu\lambda\omicron\gamma\iota\sigma\theta\alpha\iota$ $\kappa\alpha\iota$ $\psi\omega\eta\eta$ $\alpha\lambda\epsilon\iota\upsilon\upsilon\varsigma$), and prob. in Ps 81² ($\pi\alpha$ $\pi\alpha$ 'take up the melody,' $\lambda\alpha\beta\epsilon\tau\epsilon$ $\psi\alpha\lambda\mu\acute{\omicron}\varsigma$) and 98⁵ ($\pi\alpha$ $\pi\alpha$ 'the voice of melody,' $\psi\omega\eta\eta$ $\psi\alpha\lambda\mu\acute{\omicron}\varsigma$). In both the last instances, however, there is, in any case, an instrumental accompaniment implied.—Like $\pi\alpha$ and $\pi\alpha$ (see above), $\pi\alpha$ is used also for the subject of song: Ex 15², Is 12⁴, Ps 118¹⁴ 3; ($\pi\alpha$ $\pi\alpha$ 'Jahweh is my strength and my [theme of] melody.' It may be noted that while MT is exactly the same in all three passages, LXX reads in Exodus [δ $\kappa\upsilon\lambda\iota\omega\varsigma$] $\beta\omicron\eta\theta\acute{\omicron}\varsigma$ $\kappa\alpha\iota$ $\sigma\kappa\epsilon\pi\alpha\sigma\tau\acute{\omicron}\varsigma$, in Isaiah η $\delta\acute{\omicron}\xi\alpha$ $\mu\omicron\upsilon$ $\kappa\alpha\iota$ η $\alpha\lambda\epsilon\iota\upsilon\varsigma$ $\mu\omicron\upsilon$ $\kappa\upsilon\lambda\iota\omega\varsigma$, in Psalms $\iota\sigma\chi\upsilon\varsigma$ $\mu\omicron\upsilon$

* Its relation, if any, to $\pi\alpha$ Qal='trim or prune' is obscure (see Hupfeld, *Psalmen*, loc. cit. *supra*, footnote). It is uncertain whether in Ca 2¹² $\pi\alpha$ $\pi\alpha$ means 'the time of the singing (of birds)' or 'the time of the pruning (of vines).' The LXX ($\kappa\alpha\tau\alpha$ $\tau\eta\varsigma$ $\tau\omicron\mu\eta\tau\epsilon\varsigma$) and other versions take the latter view.

καὶ θυμῷ μου ὁ Κύριος.—(2) A by-form of the same word is זָרָק. Its occurrences are: 2 S 23¹ [in the epithet applied to David זָרָק: זָרָק: זָרָק, AV and RV 'the sweet psalmist of Israel,' RVm 'pleasant in the psalms of Israel'; on the construction see Driver on 2 S 8¹⁰. H. P. Smith, who renders 'the Joy of the songs of Israel' (cf. Cheyne, *OP* 22, 'the darling of Israel's songs'), thinks the translation 'the sweet singer of Israel' can hardly be obtained from the Heb. expression. The LXX has εὐπρεπείς ψαλμοὶ Ἰσραὴλ; Job 35¹⁰ 'none saith, Where is God my Maker, who giveth songs in the night'; i.e. perhaps (Dillm., Dav.; differently Duhm), who by sudden acts of deliverance gives occasion for songs of triumph in the midst of the night of trial; LXX, reading or interpreting differently, ὁ κατατάσσων φυλακὰς νυκτερινὰς]; Is 24¹⁶ ['from the uttermost parts of the earth have we heard songs (LXX τέρατα), Glory to the righteous']; Is 25¹ ['the melody of the terrible ones' (זָרָק: זָרָק) || 'the noise of strangers' (זָרָק: זָרָק); both wanting in LXX, i.e. their hostile song of triumph, 'shall be brought low']; Ps 95¹ ['let us shout unto Him with melodies' (זָרָק: זָרָק); LXX ἐν ψαλμοῖς ἀλαλόμεν αὐτῷ] || 'let us come to meet His face with thanksgiving' (זָרָק: זָרָק); LXX προφθάσμεν τὸ πρῶτον αὐτοῦ ἐν ἐξομολογήσει]; 119⁹⁴ ['Thy statutes have been (the subject of) melodies to me' (זָרָק: זָרָק); LXX ψαλτὰ ἦσαν μοι τὰ δικαιώματά σου].

AV and RV usually render the verb זָרָק by 'sing praises.' For the nouns זָרָק and זָרָק they give 'song,' except in Is 51³, Am 5²³ where both have 'melody,' Ps 81³ 95² where both have 'psalm,' and Ps 98⁵ where RV has 'melody' and AV 'psalm' (for 2 S 23¹ see above). Driver (*Par. Psalter*) consistently renders the verb throughout the Psalms by 'make melody,' and the nouns by 'melody,' and probably no closer equivalents in English could be found for the Hebrew terms.

5. שָׁבַח in Piel and Hithp. only; a late word, confined to Psalms (4 t.) and Ecclesiastes (once). Its Aram. form is found in Daniel (see below). It is doubtful whether it should be connected with שָׁבַח (Piel and Hithp.) = 'to still or calm' (in Pr 29¹¹ of anger, in Ps 65⁸ 89¹⁰ of the sea). Gesenius would find the connecting link in the notion of *stroking* or *smoothing*, hence 'to soothe with praises' (cf. the expression used of prayer, 'שָׁבַח פָּנֵי' 'to make the face of any one sweet or pleasant'). Its occurrences are: Ps 63⁴ ['my lips shall praise Thee' (LXX ἐπαυείν) || 'I will bless Thee' (זָרָק: זָרָק) and 'I will lift up my hands' (זָרָק: זָרָק) 117¹ (אֲשָׁוֶיִן, A ἐπαυείν) 147¹² (αὐείν; both || הלל) 145⁴ (B ἐπαυείν, A* αὐείν; || הודו), Ec 4² (ἐπαυείν; 'I praised the dead which are already dead'), Dn 2³ (αὐείν; || הודו, of Daniel praising God when the secret of Nebuchadnezzar's dream had been revealed to him) 434³⁷ (αὐείν; in v. 34 || בָּרַךְ 'bless' and הוֹדוּ 'honour'; in v. 37 || רָם 'extol' and הוֹדוּ; of Nebuchadnezzar praising God after the restoration of his reason) 54²³ (Theod. in both αὐείν, so LXX in v. 23, but in v. 4 εὐλογεῖν; of Belshazzar and his guests praising the gods of gold and silver, etc.).—The Hithp. = 'make the subject of praise or boast' occurs in Ps 106⁴⁷ = 1 Ch 16³⁶ (לְהַשְׁבִּיחַ) 'that we may make our boast of Thy praise'; LXX in Psalms τοῦ ἐκκαυχῆσθαι ἐν τῇ αἰνέσει σου, in 1 Chronicles καὶ καυχῆσθαι ἐν ταῖς αἰνέσεσιν σου).

The verb שָׁבַח in Piel is everywhere rendered in AV 'praise,' and so in RV except in Ps 117¹ [but not, inconsistently enough, 147¹²] 145⁴, where we have 'laud.' This last term, which is that employed in Driver's *Par. Psalter*, might, with advantage, be adopted uniformly, at least in the Psalms, where there are so many words that receive in the English versions the one rendering 'praise.' See art. LAUD.

ii. HISTORY OF PRAISE IN ISRAEL.—Like sacrifice and other branches of the cultus, the praise offered to Jahweh had in early times a more unconventional and spontaneous character than it afterwards assumed, especially in the second Temple. From the first, both vocal and instrumental music were employed in this exercise, of which heartiness and loud noise (cf. the meaning of *tēhillāh* above) were leading characteristics. A typical example is the song of the children of Israel after the passage of the Red Sea (Ex 15), which, although in its present form it contains much that belongs to a later age, yet is undoubtedly to some extent archaic, while the description of the part played by Miriam and the women, with their timbrels and dances (v. 20¹), may be regarded as a true picture of the manners in ancient Israel (cf. also the Song of Deborah in Jg 5, one of the most ancient of the undoubtedly genuine relics of early Heb. poetry). So in 2 S 6⁵ (= 1 Ch 13⁸) 'David and all the house of Israel played before the LORD with all their might, even with songs [reading, with 1 Ch 13⁸, זָרָק: זָרָק] for זָרָק: זָרָק of 2 S 6⁵, cf. the same phrase זָרָק: זָרָק used in v. 14 of David's dancing] and with harps and with psalteries, and with timbrels, and with castanets, and with cymbals.' In short, praise to God, whether upon the occasion of any great act of deliverance, or when the people assembled at the sanctuaries either of the Northern or the Southern kingdom, partook largely of the noisy character of vintage and bridal rejoicings (Jg 9²⁷, Lv 19²⁴, Ps 78²³). When the prophet Amos denounces the crass unspiritual worship of his day, he delivers this message from Jahweh, 'Take thou away from Me the noise of thy songs, for I will not hear the melody of thy harps' (Am 5²³, cf. 8¹⁰). Isaiah promises to the people, 'Ye shall have a song as in the night when a holy feast is kept, and gladness of heart as when one goeth with a pipe to come unto the mountain of the LORD, to the Rock of Israel' (Is 30²⁹). The author of La 2⁷ can say of the rude plundering Chaldean soldiery in the temple, 'They have made a noise in the house of the LORD as in the day of a solemn assembly.' The same impression is conveyed by some of the phrases which occur in the musical titles of the earlier psalms. For instance, Ps 57. 58. 59. 75 are set to the tune of *Al-tashheth*, 'destroy not,' probably the opening words of a vintage song (Is 65⁸). Cf., further, on this point W. R. Smith, *OTJC* 209, 223 f.

We should have individual songs of praise in the Song of Hannah (1 S 2¹⁷) and the Song of Hezekiah (Is 38¹⁰⁻²⁰), were it not that neither of these can be supposed to have belonged originally to their present context (see on the former, Driver, *Text of Sam.* 21 f., and on the latter, Cheyne, *OP* 117 f., and cf. the analogous cases of the Prayer of Jonah and the Psalm of Habakkuk).

As to the arrangements for praise in the pre-exilic Temple, we have no precise information. In particular, we are left very much in the dark as to how far any special class performed or directed this service. The statements on this subject contained in the Books of Chronicles are unfortunately of little use, owing to the tendency of the Chronicler to antedate the institutions of his own day. But while it will be generally admitted that the part he attributes to David is greatly exaggerated, it is probable enough that this king, whose skill as a musician is witnessed to in Am 6⁵, as well as in 2 S 6⁵⁻¹⁴, used his talents in organizing the Temple music, whether he furnished to any appreciable extent the hymns used or not. It is undoubtedly the case that, down to the Exile, praise was the privilege of the congregation at large (Cheyne, *OP* 194), but this is

not inconsistent with at least the rudiments of the elaborate system which we meet with in Chronicles having been in existence in pre-exilic times. It is hardly likely that the singers, who are first expressly named in Neh 7⁴⁴ (=Ezr 2⁴¹), and of whom 148 (128) returned, or were believed to have returned, with Zerubbabel, represent a class that had been instituted during the Exile, when no elaborate cultus was possible, or during the early years of the Return, when the circumstances were by no means favourable to such a new departure. It seems more reasonable to conclude that they were the representatives or descendants of singers who had performed this office in the pre-exilic Temple (see art. PRIESTS AND LEVITES, p. 74^b). But it is equally beyond question that after the Return the whole system of praise was re-organized by Ezra and Nehemiah.

At the Return the singers appear to have formed a single guild, 'the sons of Asaph' * (Neh 7⁴⁴=Ezr 2⁴¹), and are distinguished from the Levites (Ezr 10³⁴, Neh 7¹⁻⁷²). In Neh 12⁷¹ the musical service at the dedication of the wall is divided between the Levites and 'the sons of the singers'. Such passages as Neh 11¹⁵⁻¹⁹, 22, 23, 12⁹, 24, 25, where the singers are included among the Levites, do not belong to the Memoirs of Nehemiah, at least in a pure form, and their account approximates to the condition of things represented in 1 Ch 15^{16a}, 23³⁻⁵, 2 Ch 29²⁵ etc. (cf. Ezr 3¹⁰, where 'the Levites the sons of Asaph' is the phrase of the Chronicler). The guild of Asaph at a later period shared the musical service with the Korahites (cf. 2 Ch 20¹⁹ and the titles of Ps 42-49 and 84, 85, 87, 88), who, by the time of the Chronicler, have become porters and doorkeepers (1 Ch 9¹⁹ 26¹⁻¹⁹ etc.). The Chronicler himself is acquainted with three guilds,—HEMAN, ASAPH, and JEDUTHUN or ETHAN (1 Ch 6^{33, 39, 44} 15¹⁷ 16^{41f}, 25^{1a}), to whom a Levitical origin is attributed, Heman being descended from Kohath, Asaph from Gershon, and Ethan from Merari (1 Ch 6³³⁻⁴⁷). These three the Chronicler characteristically represents as choirmasters appointed by David, to whom the whole organization of the service of praise is attributed, and who is said to have divided the singers into 24 courses (1 Ch 6^{31a}, 15¹⁶⁻¹⁹ 16⁴ 25^{1a}, 2 Ch 5¹² 29²⁵, cf. Sir 47⁹).

When we pass to the question of the use of a hymnal or similar forms in the Temple service, we encounter fresh uncertainties. Whatever view be taken of the contents of the Psalter (and there is a growing tendency to increase the proportion not only of post-exilic but of Maccabean psalms), it will be generally admitted that, in its present form, the whole collection bears marks of having been intended for use in the second Temple. To what extent it may contain older (possibly even Davidic) psalms, which have been adapted for later congregational use, to what extent Nehemiah found the work of collecting already done for him, and how far a later hand, say that of Simon the Maccabee (Cheyne, *OP* 12 and *passim*), is responsible for the book as we now have it, are questions that cannot be said to be yet finally decided. Even so cautious a scholar as W. R. Smith was inclined to think that certain 'facts seem to indicate that even Book I. of the Psalter did not exist during the Exile, when the editing of the historical books was completed, and that in psalmody as in other matters the ritual of the second Temple was completely reconstructed' (*OTJC* 219). 'It would be absurd to maintain that there were no psalms before the Exile. But it is not absurd to question whether Temple-hymns can have greatly resembled those in the Psalter' (Cheyne, *OP* 213 f.).

It is a fair question whether praise was not

* This guild gives its name to one of the collections in the Psalter, consisting of Ps 50 and 73-83.

offered in the SYNAGOGUE as well as in the Temple. This is usually denied (see Gibson, *Expositor*, July 1890, pp. 25-27, and cf. Schürer, *HJP* II. ii. 76, where the parts of the Synagogue service are enumerated), but Cheyne (*OP* 12, 14, 363) urges forcible considerations in favour of a different conclusion. There is all the less difficulty in conceiving of the Psalter as a manual of praise in the Synagogue when we observe that, even in post-exilic times, praise might be offered at other times and places than public worship. Thus, not only was Ps 118 sung in the Temple on high festival days (as on the eight successive days of the Feast of Booths and that of the Dedication), but the *Hallel* (Ps 113-118), of which it forms a part, was sung in two sections (113, 114, and 115-118) in every dwelling-place where the Passover was celebrated. It is to the singing of the second part of the *Hallel* over the fourth and last cup that the *ὑμνοῦντες* of Mt 26³⁰, Mk 14²⁶ refers. Again, the 'Songs of the Ascents' (Ps 120-134) are perhaps most plausibly explained as 'Songs of the Pilgrimages,' i.e. songs with which the caravans of pilgrims enlivened their journey to the stated festivals. See, further, Duhm, 'Psalmen' (*Hdcom.*), p. xxiv.

How far in post-exilic times the general body of the people took part in the public service of praise is not clear, but the analogy of other parts of the ritual suggests that they participated in it to a very limited extent. In Sir 50^{16a} (referring to the time of Simon the high priest) the people 'fell down upon the earth on their faces to worship the Lord' and 'besought the Lord Most High in prayer' (cf. Lk 1¹⁰, Ac 3¹). It is of the sons of Aaron that it is said that they 'shouted and sounded the trumpets of beaten work,' while 'the singers also praised him with their voices.' This corresponds closely with 2 Ch 7³ 'all the people . . . bowed themselves with their faces to the ground upon the pavement and worshipped and gave thanks unto the LORD (יהוה יתרו ויִתְּנוּ, καὶ προσεκύνησαν καὶ ἔθρουν τῷ Κυρίῳ), saying, 'For he is good, for his mercy endureth for ever.' Even this last formula appears to be in this instance not so much the language of praise as of prayer. A similar remark applies to 1 Mac 4⁵³ 'all the people fell upon their faces and worshipped and gave praise (ὑμολόγησαν) unto heaven, which had given them good success.' So in 2 Ch 29²⁵ 'all the congregation worshipped, and the singers sang, and the trumpets sounded' (on all these passages see Büchler, as cited in the Literature below). On the other hand, that some part in the service of praise was taken by the people is clear from such a liturgical direction as 'let all the people say Amen, Hallelujah' (Ps 106⁴⁸, cf. 1 Ch 16³⁶, where the citation of this Psalm is followed by the affirmation, 'and all the people said Amen, and praised the Lord'). Moreover, it is extremely probable that, in antiphonal psalms like Ps 118, the congregation as well as the Levitical choirs took part. Büchler (*ZATW* xix. [1899] p. 103 n.) will have it that the call in Ps 150² 'praise him with the sound of the trumpet' (*shôphâr*, 'horn,' mainly a secular instrument, whereas the official sacred trumpet is *hăzôzêrâh*, cf. Driver, *Joel and Amos*, p. 144 f.) is addressed not to the Levites but to the congregation. He compares Ps 81^{3f}, and Jth 16^{1a} where Judith leads off and all the people take up the song.

Many psalms, e.g. 95, 96, 98, 99, 100, not to speak of the Hallelujah psalms (which are all post-exilic), were evidently composed from the first for liturgical use, and others may have been transformed from a more private and individual use to be the expression of the church-nation's praise. It is of course only to a limited extent that the Talmudic accounts of the service of praise in the Temple can be accepted as correct even for the

closing period of OT history, but there is good reason to believe that the list given in *Tamid* (vii. 4) of the psalms that were sung on each day of the week, at the morning sacrifice, is an ancient one. These psalms were as follows: Sunday 24 (B *τῆς μιᾶς σαββάτου*), Monday 48 (B *δευτέρᾳ σαββάτου*), Tuesday 82, Wednesday 94 (B *τρίτῃ σαββάτου*), Thursday 81, Friday 93 (B *ἐν τῇ ἡμέρᾳ τοῦ προσαββάτου ὅτε κατέκισται ἡ γῆ*), Sabbath 92 (Heb. *הַיּוֹם הַזֶּה יוֹם שַׁבָּת*, B *ἐν τῇ ἡμέρᾳ τοῦ σαββάτου*). See, further, Neubauer, *Stud. Bibl.* ii. 1 ff. The singing and playing of the Levites on these occasions was accompanied by the blowing of silver trumpets (*hăzûzêrôth*) by two priests (cf. Nu 10¹⁻¹⁰, Ezr 3¹⁰, Neh 12³⁸, 1 Ch 15²⁴ 16⁸, 2 Ch 5¹² 7⁶ 29²⁸⁻²⁹, Sir 50¹⁶).

See, further, on the whole subject, the articles MUSIC, PRIESTS AND LEVITES, PSALMS, TEMPLE, WORSHIP.

LITERATURE.—On the Heb. terms see the *Oxf. Heb. Lex.*, to which the first part of the present article has very special obligations. On the history, etc., of praise: Büchler, 'zur Gesch. d. Tempelmusik u. d. Tempelpsalmen,' in *ZATW* xix. (1899) i. 98 ff., ii. 329 ff., xx. i. 97 ff.; Koberle, *Die Tempeländerungen* in AT, 1899; Cheyne, *O.P.*, 1899, *passim*; W. R. Smith, *OTJC*, 1892, esp. pp. 190-225; Van Hoonacker, *Le sacerdoce lévitique*, 1899, *passim*; Nowack, *Lehrb. d. Heb. Arch.*, 1894, i. 271 f.; Schürer, *GVF*, 1898, ii. 240 ff., 293 ff. (*HJP* ii. i. 225 ff., 290 ff.); and the Commentaries on the Psalms. J. A. SELBIE.

PRAISE IN NT.—Praise (*αἶνος, ἔπαινος* (1 P 2¹⁴ = *ἡμῶν*), *αἰνεσις*, *δόξα*, *ἀρετή*, *αἰνεῖν*, *ἐπαινεῖν*, *δοξάζειν*) plays a large part in the NT, both the praise of God by angels and by men, and the praise of man by God and his fellow-man.

i. The praise of God is the work of the angels (Lk 2¹³ 14²⁹ 19³⁸), and also of man. The chief object of the existence of the redeemed is to show forth the praises of Him who called them out of darkness into light (1 P 2¹⁰): Gentiles join now in the work of praise (Ro 15⁹⁻¹¹); and all, Jew and Gentile alike, exist to the praise of the glory of His grace (Eph 1³⁻¹⁴, Ph 1¹¹, 2 Th 1¹⁰, 1 P 2¹⁵): Christians offer their sacrifice of praise to God (He 13¹⁶): universal praise will be the characteristic of the last day (Rev 19³): whereas failure to give God praise for His mercies is the note of heathenism (Ro 1²¹, Rev 11¹⁷ 14⁷ 16⁷, cf. Ac 11²²). The subjects of praise are God's intrinsic excellences (*ἀρετάς*, 1 P 2¹⁰, where see Hort); His universal gifts of creation, of providence, of redemption (Rev 15³⁻⁴, Ac 2⁴⁴ and *passim*); His promises to individuals (Ro 4²⁰); His blessings to individuals, especially for the miracles of our Lord's lifetime (Lk 18⁴² 19³⁷, cf. 2 Co 1³). One idiomatic phrase in the mouth of the 'Jews' *δοξάζαν τῷ θεῷ* (Jn 9²⁴ 'Give God the praise' AV, 'Give glory to God' RV) is remarkable, meaning, 'Confess thy sins' (cf. Joshua's words to Achan in Jos 7¹⁹), and implying that truthful confession of the real facts of life brings glory to God.

The tone of praise to God is specially marked in the Gospel of St. Luke, the Acts, the Ep. to the Ephesians, and the Apocalypse. It finds its expression in semi-rhythmical language and formal hymns (see HYMN), and also in doxologies. The latter were primarily liturgical (cf. 2 Co 1²⁰ *δοξολογίαν*), and are adaptations from existing Jewish liturgies. The fountain-head of them may perhaps be traced to 1 Ch 29¹⁰, from which originated two types—(a) beginning with the word 'Blessed' (*εὐλογητός*, i.e. blessing-worthy, worthy of receiving blessing), implying 'an intelligent recognition of His abiding goodness, as made known in His past or present acts,' Lk 1⁶³, 2 Co 1³ 11³¹, Ro 1²⁵ 9⁸, Eph 1³ (where see Lightfoot), 1 P 1³ (where see Hort); (b) ascribing to God glory (power, might, dominion) for ever. This is the commoner type in the NT and in subsequent Christian liturgies: the simplest form *ὡς ἡ δόξα ἐν τοῖς αἰῶνας ἀμήν* (Ro 11³⁶) is varied by the several writers to suit the exact context

(Gal 1⁵, Ro 16²⁷, Ph 4²⁰, Eph 3²¹, 1 Ti 1¹⁷ 6¹⁶, 2 Ti 4¹⁸, He 13²¹ [see Westcott, Additional Note], 1 P 4¹¹ 5¹¹, 2 P 3¹⁸, Jude ²⁶, Rev 1⁶ 5¹³ 7¹³), and it left its ultimate mark on the Lord's Prayer in the addition of the doxology, perhaps originally made when that prayer was used in Eucharistic worship (Chase, *The Lord's Prayer in the Early Church*, 'Texts and Studies,' i. iii. pp. 168-174).

On praise as a part of public worship, see art. CHURCH in vol. i. p. 428^a, art. HYMN in vol. ii., and cf. the preceding article.

ii. 'The idea of man as praised by God is not distinctly recognized in the OT' (Hort on 1 P 1⁷). There God is spoken of as well pleased with men; but the NT goes beyond this in the word 'praise,' which implies not only moral approbation, but the public expression of it. The difference may have arisen from our Lord's life; He had moved about among men, accepting praise and homage where it was simple and genuine (Mt 21¹⁶); giving His own praise without stint to John the Baptist (Mt 11¹¹), to all acts of faith (Mt 8¹⁰ 9²² 15²⁸ 16⁸, Lk 7⁹), to good and loyal service (Mt 25²¹⁻²², Lk 19¹⁷), to all generosity of gift (Mk 12⁴² 14⁶), to self-devotion (Lk 10⁴¹), to prudence (Lk 16⁸). Hence the ascended Lord is represented as sending His messages of praise as well as of blame to the Seven Churches of Asia (Rev 1⁴); and the praise of God is the ultimate verdict to which Christians appeal (1 P 1⁷), which will correct hasty judgments of men, and be the true praise exactly appropriate to each man's actions (1 Co 4¹⁻⁵ *ὁ ἔπαινος*): the true Jew, who bears rightly the name of Judah (= 'praised'), is he whose praise comes from God not from men (Ro 2²⁸, where see Gifford in 'Speaker's' Com.).

The praise of man by his fellow-men is naturally of more doubtful value. On the one hand it is liable to be unreal, shallow, flattering, and to lead to a false self-satisfaction; our Lord avoided the shallow praise of the crowds, and of individuals who did not weigh the meaning of their words (Lk 18¹⁹); He warned His followers against the desire for such praise (Mt 6¹, Lk 6²⁶); He traced the rejection of the truth by the Pharisees to the fact that they sought honour from each other, and did not seek the honour that comes from the only God (Jn 5⁴¹⁻⁴⁴, cf. 12⁴³): St. Paul refused to seek glory from men (1 Th 2⁶), and was ever on his guard against pleasing men (Gal 1¹⁰).

On the other hand, St. Paul appeals to the consideration of any praise of men as a proper incentive to Christians (*ἐν τῷ ἔπαινῳ*, Ph 4⁸): the proper function of human government is the praise of well-doers (Ro 13³, 1 P 2¹⁴): St. Paul praises whole Churches for their virtues (1 Co 11² and *passim*): he lavishes the highest praises on each of his fellow-workers (1 Co 4¹⁷ and *passim*): their praise runs through all the Churches (2 Co 8¹⁰): his aim is, and that of all Christians should be, to provide things honest in the sight of men as well as of God (2 Co 8²¹, Ro 12¹⁷). Praise of men is treated as a danger when it stands in antithesis to the praise of God; but when it reflects the praise of God in the mirror of the Christian's conscience, it is a welcome incentive to good.

W. LOCK.

PRAYER.—An attempt will be made to treat the subject historically, keeping separate the evidence supplied by different portions of the Bible as to human practice and Divine teaching on the subject of Prayer. With regard to the OT, it will be assumed, for the purpose of the article, that the books which it contains, whatever their respective dates may be, are on the whole trustworthy guides as to the religious beliefs and practices of the periods which they describe.*

* It can scarcely be denied, however, that a writer like the Chronicler is apt to antedate the beliefs and practices of his own age.

I. IN THE OLD TESTAMENT.—i. *Prefatory.*—It will first be necessary to limit the subject of inquiry. Prayer (תַּפִּלָּה) may be understood widely, so as to include every form of address from man to God, whatever its character. Hannah's song (1 S 2) is a thanksgiving, yet it is introduced by the words 'Hannah prayed and said,' and the prayer of Hab 3 is a psalm. But address by way of petition must form the main subject of this article, though it is impossible to isolate this division of prayer, see, e.g., Is 63⁷-64¹², where praise, thanksgiving, pleading, confession, and supplication are blended.

Certain axioms with regard to prayer are taken for granted, viz. (1) God hears prayer; (2) God is moved by prayer; (3) prayer may be not merely a request, but a pleading, or even an expostulation. It may here be added that OT prayer is little occupied with what becomes the main subject of prayer in NT, viz. spiritual and moral needs. This remark, however, applies only partially to the Psalms.

The terms for 'prayer' must next be considered. The verbs are: 1. תַּפִּל (Gn 4³, where see Dillmann's note), or simply תַּפַּל; this is the oldest and simplest phrase. It is perpetuated in NT (ἐκκαλεῖσθαι τὸ θεοῦ, Ac 2²¹ 9¹⁴ al.). The correlative word is אָנָה 'answer' (sometimes wrongly, e.g. Hos 2²¹, tr. 'hear'), Gn 35³ and Psalms, *passim*. It signifies an answer either by external or spiritual help, or by inward assurance. 2. תַּפִּלָּה primarily of intercessory prayer, Gn 20⁷, Job 42¹⁰, but also of prayer generally, 1 S 12⁷ and elsewhere. From this verb comes the common name for prayer in its widest sense, תַּפִּלָּה, noticed above. 3. נָצַח, lit. 'to fall upon,' so 'to approach' in order to supplicate. See Is 53¹², where the 'approaching' is on behalf of others, and cf. ἐντροχάδην in NT. 4. שָׁאַל 'to ask' (a) for some grace or deliverance, (β) for information or guidance. The correlative is again אָנָה 1 S 28⁶. 5. "מִן הַפָּנִים אֶת־הוֹדֵי עֲבָדֶיךָ" Ex 32¹¹, an anthropomorphic phrase ('make the face sweet or pleasant'), never literally tr. in AV, but rendered 'beseech,' etc. 6. בָּקַשׁ 'cry,' used of those who pray for the redressing of a wrong.

Another detached point may be taken before entering on 'the historical treatment, viz.—

Postures in Prayer.—(1) *Standing.* This was the commonest attitude, e.g. Abraham, Gn 18²²; Hannah, 1 S 1². It continues in NT times (but cf. below on Acts); and in Jewish usage the *Shemoneh Esreh* had the name of *Amidah* (standing), because the congregation stood during their recital.

(2) *Kneeling*, Ps 95⁶; Solomon, 1 K 8⁵⁴; Daniel, Dn 6¹⁰; see, further, art. KNEEL.

(3) *Prostration*, i.e. kneeling with face bent to the ground in case of urgency, Nu 16¹⁶, 1 K 18²⁸ (and in NT Mt 26³⁹).

(4) *Sitting*, 2 S 7¹⁸, a doubtful instance (but see H. P. Smith, *ad loc.*). In addition to these postures of the body the attitude of the hands should be noticed. These were: (1) *lifted*, Ps 63⁴ (cf. 1 Ti 2⁸), and (2) *spread out*, i.e. with open upturned palms symbolical of the act of receiving from God, Ex 9²⁹, Is 1¹⁵.

ii. *Patriarchal Religion.*—Leaving these prefatory matters, we come to prayer as it appears in patriarchal religion. 'Then began men to call upon the name of the LORD' (Gn 4²⁶). This first notice is of real importance. There had been abundant consciousness of God before, but tradition fixed the commencement of habitual prayer at the beginning of the third generation. Thence we pass over a long interval to Abraham, and enter with him into the fullest and freest exercise of prayer. (1) His prayer is dialogue. It consists not merely in man drawing near to God, but God

to man, inviting it and disclosing His purposes. The same thing occurs in the case of Moses, and something of the kind is supposed in certain psalms, where God Himself speaks, e.g. Ps 91. (2) Intercession is prominent in patriarchal prayer, Gn 17¹⁸ 18²²⁻²³ 20⁷; cf. below on prophets as intercessors. (3) There are also personal prayers: Gn 15², a prayer for a son; Gn 24¹², Eliezer's on his journey; more prominent still in Jacob's life. Jacob's first prayer was a vow, Gn 28²⁰; his prayer in Gn 32⁹⁻¹² is in fear of Esau; his wrestling with the angel (32²⁴) is described in Hos 12 ('made supplication') as involving prayer. (4) Patriarchal blessings are prayers. When man blesses man, it is (a) primarily a vision of the Divine purpose for the person blessed and a declaration of it; it is prophetic (e.g. Gn 49¹), but it is (b) also a prayer. This is especially clear in a blessing attributed to the next period, Dt 33, e.g. v. 11. As blessing is partly prayer, so also is cursing, as will be seen in considering the imprecatory psalms; cf. also Neh 13²⁹; Sir 4⁸, where the curse is called a supplication. (5) The oath in Gn 14²² ('I have lift up mine hand') is a kind of prayer, being an imprecation, not on another, but on the speaker in case of his failing in his intention. The phrase becomes so fixed in common use that without regard to its original meaning it is even used of God Himself, Ezk 36⁷. (6) The vow. See art. VOW.

iii. *The Law.*—The evidence of the Law as to prayer is negative. With one exception (Dt 26¹⁻¹⁶), there is nothing about prayer in the Law. There is no ordinance as to the employment of the formulæ (or charms) common in the ritual of other nations. This did not tend to the undervaluing of prayer, but rather kept it in its proper place. It is not recognized as a means of doing service, but it is left to be a spontaneous expression of human needs. The lasting effect of this negative teaching may be seen in *Berakhoth* iv. 4. If prayers are said only to fulfil a duty (as a charge), they will not be heard by God. But to return to the exception, the formulæ of worship in Dt 26. Even these are not strictly prayers, vv. 11-12 are a thanksgiving, vv. 12-14 a profession of past obedience, and v. 15 alone contains supplication. Vv. 12-14 are strangely like the so-called prayer of the Pharisee in Lk 18¹¹⁻¹². There also is the claim of past obedience, and in respect to the same point, viz. the payment of tithe (the hallowed things). But we cannot doubt that private prayer was habitually connected with sacrifice from early times. Instances are spread over the OT, e.g. Abraham (Gn 12⁸), Solomon (1 K 3⁴), Job (42⁸). There remains for consideration the typical character of incense. Incense (see INCENSE) was taken up into Hebrew usage from the stock of primitive religious customs among the nations around, and was originally an anthropomorphic form of propitiation by sweet odours (cf. Dn 2²⁶). But as time went on it was regarded as typical of prayer and associated with it. See Ps 141², and in NT Lk 1¹⁰, Rev 5⁸. But if the Law teaches nothing about prayer, the lawgiver teaches much. No biblical life is fuller of prayer than that of Moses. The history of his call (Ex 3. 4) gives prayer in the form of 'colloquy' with God as noticed above. There are his private prayers in times of difficulty (Ex 5²², Nu 11¹¹⁻¹⁵), and, above all, his frequent intercessory prayers (1) for Pharaoh to obtain relief from plagues; (2) for Israel in all the times of the murmuring and rebellion, e.g. Ex 32¹¹⁻¹². What Moses did not lay on Israel as a precept he taught them by example, though it may be doubted whether access to God in prayer was not looked upon as the prerogative of a prophet.

iv. *The Period of the Kingdom.*—This may be taken next, though in the intermediate time Jos

7⁹⁻¹⁰ 10¹⁴ and Jg 6 are to be noted, and the raising up of judges is almost always introduced by the phrase, 'the children of Israel cried unto the Lord.' Samuel next appears to carry on the great intercessory tradition. In Jer 15¹ Moses and Samuel stand together as chief representatives of this form of prayer. And the narrative justifies the Divine words. Twice over Samuel makes great efforts of intercession for the nation (1 S 7⁸⁻¹²); and again in regard to their desire for a king throughout chs. 8 and 12. He testifies himself to his continuous pleading for them, and expresses his sense that it is part of the obligation of his prophetic office, 'God forbid that I should sin against the Lord in ceasing to pray for you' (1 S 12²⁵). Besides his national, there is also his personal intercession. The rejection of Saul grieved Samuel, and he cried unto the Lord all night, 15¹¹. And something of prayer is implied in the mourning for Saul, recorded in 15³⁵ and 16¹. David, being himself regarded as a prophet, is represented as praying without an intercessor. This appears in 2 S 7¹⁸⁻²⁰. It is hardly necessary to prove that both the lesser and the greater prophets of the kingly period are regarded as intercessors. It is mainly in this character, as intercessor for a nation perishing by famine, that Elijah stands before us in the great drama of 1 K 18. And the test which is there applied to decide between Jehovah and Baal is, which of the two hears prayer. Intercession, as part of the prophetic function, will come out more clearly still when we deal with the prophets who have left writings; but there is a special interest in finding it in men of action, such as Samuel, Elijah, Isaiah, Jeremiah, and another leader who was not a prophet, namely, Nehemiah. Their prayer is not merely to put the matter in the Lord's hand, but to strengthen themselves for action.

The Books of Samuel and Kings contain prayers which suggest the subject of the **place of prayer**. The ark denoted the local presence of God, and therefore the place of prayer. So Hannah (1 S 1) and David (2 S 7) resort thither. But as sacrifice is offered at 'high places,' prayer may be offered there also. So Samuel at Mizpah (1 S 7⁹), and Solomon at Gibeon (1 K 3). When the temple is dedicated, it is as a house of prayer, if, notwithstanding its affinities to Deut., we may take 1 K 8 as in some degree representing the mind of the founder. If, however, the prayer belongs in form and spirit to another period, it is no less worthy of attention in two important respects. (1) At the dedication of the centre of a great sacrificial cultus, not a word is said in the prayer about the sacrifices, but only about prayer to be offered there, or 'toward' that 'place.' For prayer 'toward' a place, cf. Ps 28², Dn 6¹⁰; and, even for Islam, Jerusalem was at first the Kibla. The temple is the house of prayer in Is 56⁷; and it will be seen to have been so regarded in NT. (2) The other point to notice in Solomon's prayer is the apparent conflict of two conceptions—that of some local habitation of God therein, and that of the impossibility of limiting His presence.—We have also two prayers attributed to Hezekiah—the first in Is 37¹⁶⁻²⁰, offered in the temple, a prayer for God's glory in the spirit of Ps 115; the second (Is 38³) a prayer for himself, recalling his righteousness in the spirit of Ps 26, yet none the less accepted.

v. *The Exile and Return*.—Ewald (*Hist. Isr.* (Eng. tr.) v. 23) has justly emphasized the importance assumed by prayer in this period. There were two main causes for this. (1) The necessary cessation of sacrifice after the destruction of the temple. This threw the burden of worship wholly on prayer. (2) A sense of abandonment by God, which produced earnestness in seeking for an ex-

planation of His dealings, and a return of His favour. The evidence in support of Ewald's assertion is twofold—(a) the great prayers extant from this period; (b) the personal habits of individuals recorded in the narrative. (a) *Great prayers extant*. First and greatest is Is 63^{7-64¹²}. The prophet comes forward and 'leads the devotions of the Church of the Exile.' The prayer is remarkable as appealing to the Fatherhood of God, 63¹⁶ 64⁹. The other four are, Ezr 9⁸⁻¹⁵ chiefly confession; Neh 1; Levites' prayer in Neh 9, in the form of historical retrospect (cf. Ps 106); Daniel's confession, Dn 9. On these last four some general remarks may be made. Confession is prominent, acknowledgment of the sin of Israel and the righteousness of God. They are cast in the same model, and contain the same phrases. Fasting has become connected with prayer (cf. Zec 7⁵). The confession in these prayers is representative confession, e.g. Nehemiah (Neh 1⁶) takes the sins of Israel upon himself and confesses them as a whole. He is an intercessor, but he does not stand apart; he regards himself as involved in the guilt. (b) *Personal habits of individuals*. Ezra at the river Ahava (Ezr 8²¹⁻²²) relies on prayer for the safety of his expedition. As to Nehemiah, it is unnecessary to show in detail that constant prayer is the characteristic of his journal. It is his resource in difficulty and discouragement, and takes a distinctly personal character, 'remember me, O my God.' Again, Dn 6 is an illustration of how prayer to God had become a distinctive mark of the Jews in exile. In it the enemies of Daniel decide to find their opportunity, and on it base their attack. In this narrative (Dn 6¹⁰) we first find unmistakable mention of the hours of prayer as afterwards practised by the Jews, though perhaps Ps 55¹⁷ may be taken to denote them. As is usually the case in ritual, an endeavour was made to find sanction for the three hours of prayer in the earliest times, and Gn 19²⁷ 24⁶³ 28¹¹ were referred to by the Jews for this purpose.

vi. *The Prophets*.—'The Latter Prophets,' i.e. the prophetic writings, may now be considered as a whole, and without reference to date, in order to see what special characteristics are to be attributed to the prayers of prophets. It has already been seen that the latter were intercessors in virtue of their calling. The ground of this was twofold. The prophet was an acceptable person; but, further, he had the Spirit (e.g. Ezk 2²), and the possession of it enabled him not only to interpret the mind of God to man, but also the mind of man to God (cf. Ro 8²⁶). The prophet thus knew what the needs of the nation were, much better than the nation itself. Intercession in the OT is not generally the duty of the priest. For an exception see Jl 2¹⁷, Mal 1⁹; and in Apocr. 1 Mac 7³⁴⁻³⁸, when, of course, prophets had ceased to exist. Beyond this general intercessory function we may trace three special aspects of prayer in the prophetic writings, which may be illustrated almost exclusively from Jeremiah. (a) *Personal prayer*. In Jeremiah intermixed with and in reference to the difficulties and trials of his own mission (e.g. Jer 20). (b) *Seeking to know*. It is by prayer (in part, at least) that the prophet obtains the Divine revelations, Jer 33³ 42¹ (where ten days pass before the answer is received). (c) *Interceding to avert present or predicted evil*. See Am 7 and Jer 14. 15. The latter passage is an important example. In ch. 14 we have—(1) intercession, vv. 2-9; (2) answer forbidding intercession, 10-12; (3) renewed pleading in spite of prohibition; (4) renewed Divine threatenings, 14-18; (5) a wail from the prophet ending in fresh intercession, 17-22. To this again comes an answer (15¹⁻⁹) of final condemnation; but even this does not close the dia-

logue of prayer, which continues to 15²¹. This record of intercession throws a light upon the inner life of the prophets, and their intimate relations with God, which we hardly find elsewhere in OT. The limits here set to intercession are an anticipation of 1 Jn 5¹⁶. And the persistence of the prophet, although rejected, is nevertheless an inspired persistence.

vii. *Psalms, Proverbs, Job*.—Although the prayers in the Psalter exceed in amount and variety all other prayers in OT, yet they do not contribute to our study of the subject so much as they would do if the circumstances and persons from which they proceeded were known to us. Although the title 'Prayers of David' is implied in the subscription closing the second book (Ps 72²⁰), yet only one psalm in these two books (Ps 17) is entitled 'a prayer.' And in the whole Psalter only five (including Ps 17) are so described. *Tehillim* (praises), not *tephilloth* (prayers), is the recognized name of the book; but the latter would be almost as accurate a title as the former. Prayer in the Psalms will be considered under six heads. (1) Prayer is regarded in the Psalms as the *pouring out of the heart*, 42⁵ 62⁸ 102 (title) 142². Outside the Psalter, see 1 S 1¹⁶ and 7⁶ compared with La 2¹⁹. That which is poured out may be either the heart or its musing (תָּוֹ, AV 'complaint'). In prayer the psalmist does not so much go before God with fixed orderly petition, as simply to pour out his feelings and desires, whatever they are, sweet or bitter, troubled or peaceful. (2) As a consequence of this aspect, *various moods are blended* in prayer. It passes from praise and commemoration to complaint, supplication, confession, despondency. Few psalms are entirely prayers in a strict sense. There is, however, another reason for the rapid transitions which occur. In some cases the moment of a felt answer to prayer is marked in the Psalm itself by transition to praise. Here we have an approach to the colloquy in prayer noticed in the cases of Abraham, Moses, and Jeremiah. In 143⁷ an answer is distinctly expected; again in 68¹⁰ it is received, as also in 31²²⁻²⁴. For strongly marked transitions see 57⁶⁻¹¹ 69³⁰⁻³⁶. There is a sense that God has heard, and that is equivalent to His granting the petition, cf. 1 Jn 5¹⁶. Yet this answer sometimes fails, and psalms from which it is absent strike us as abnormal, e.g. Ps 88. Here we come near what is frequent in Job, prayer struggling in the darkness, without a reply. It is that 'shutting out' of prayer which is described in La 3⁸. (3) *National and personal prayer*, how far can they be distinguished? Some prayers in the Psalter are evidently national, e.g. 60. 79. 80. But while 44 is no less evidently national, 'I' and 'me' occur in vv. 6 and 15. Hence it is evident that the 1st pers. sing. is no proof that a psalm, e.g. 102, is personal. It may well be an expression of the complaint and needs of the nation. It may almost be said that the psalmist never felt himself alone, but always connected his personal joys or griefs with those of the nation. Cheyne (*OP* 276) quotes a Rabbinic saying, 'In prayer a man should always unite himself with the community.' The question then will generally be which of the two elements predominates, not which is exclusively present. (4) *Material and external blessings are the principal subjects of prayer in the Psalms*. Account must be taken, in considering this matter, of changes which have taken place in the meaning of words by the legitimate spiritualizing effect of Christian use. 'Say unto my soul, I am thy salvation' (35²) is a good instance of how a prayer for temporal deliverance has come to acquire the appearance of being a prayer for spiritual blessing. But although the Psalms are far more

largely occupied with temporal and material than with spiritual needs, yet there are distinctly spiritual topics of prayer which fill a considerable place in them. These are: (a) Communion with God, prayer for the intercourse of prayer, as in 63. (b) Forgiveness of sins, besought with the greatest earnestness in 51 for its own sake, but more frequently taking the form of prayer for that deliverance from suffering and chastisement which was held to mark the forgiveness of sin (see art. SIN IN OT). (c) Ps 119 stands on a different footing. It contains much prayer for a knowledge of God's will. The prayer for quickening ('quicken' occurs 11 times) seems distinctly to have a spiritual sense. The 'He' division, with its initial verbs in Hiphil, is almost entirely prayer. The development of prayer in a spiritual direction has been carried some way in the Psalms, and prayer for external blessings has been cast in a form which will lend itself afterwards to spiritual interpretation. We must not, however, suppose that prayer of this kind differentiates the Psalms from the prayers of all other religions. Prayer for spiritual and moral gifts is found elsewhere (Tylor, *Prim. Culture*, vol. ii. pp. 373, 374). (5) *Urgency of Prayer*. There is a feeling that God must be induced to hear. This comes out in the anthropomorphic phrases which speak to Him as though He needed to be awakened, urged, or persuaded. We can scarcely suppose that this is, all of it, no more than a sacred irony. While NT put aside the thought of awakening Him, it retained that of pleading. On this subject see Ps 28¹ 44²³, and in correction of these Ps 121 throughout. (6) *Prayer of imprecation*, for vengeance. This is both frequent and urgent. It occurs in the highest strains of devotion, e.g. Ps 69²²⁻²⁸, as well as in psalms of a lower level, e.g. 59. It reaches its extreme point in 109. In this Psalm attempts have been made to explain it away, but here no separate dealing is possible with a conception which enters into the tissue of so many psalms. It is certainly remarkable that the phrase which above any expresses the absorption of the psalmist in prayer ('I am prayer,' 109⁴) should occur where it does. Various considerations may help us to bear with this feature, but one is sufficient here. The devout Israelite of that day believed deeply in God, was perhaps more closely conscious of Him than we are, and yet looked out on a world of treachery, cruelty, and lust. The vision which we have before us of a future retribution in another life was entirely shut out from him. If his sense of justice was not dead, how could he help crying out for some manifestation of Divine righteousness by way of retribution, even apart from human instinct for revenge? An inspiration which ran counter to such desires would have disturbed the very foundations of his faith. See, further, art. PSALMS, p. 160.

Proverbs.—Only two points need be noticed: (1) Three passages in which the character of the person praying determines the acceptance of the prayer, 15² 28⁹. This feeling, legitimate as it is, and admitted in the formularies of to-day, would tend to grow into that mistaken view of the matter which is corrected in the parable of the Pharisee and the Publican. (2) The prayer of Agur (30⁷⁻⁹), with its modest request for the middle state on account of the effect of riches and poverty on his relation with God. Cf. the prayer of Socrates (Plato, *Phædrus*, *sub fin.*, and also Thom. Aquinas, *Summa*, ii. 2, lxxxiii. 5).

Job.—The earlier part of the book is in the form of a dialogue between Job and his friends; but in fact, when his friends pause, it is often the case that Job, instead of answering them, turns away to God, and lets his address to God stand as

an answer to them. Thus, much of the book is prayer. See chs. 6. 7. 9. 10. 13. 14. The boldest of these is 10. Though full of doubt, rebelliousness, and half-way to renouncing God, it is nevertheless prayer. These chapters are, in fact, prayer for what at times is the most urgent of all needs, some explanation of pain and suffering. It is prayer for wisdom. So, long afterwards, St. James, writing to those who have fallen into manifold trials, bids them ask wisdom from God, that they may understand the purpose of His discipline (Ja 1²⁻⁵).

To sum up, the axioms stated at the outset have been abundantly justified. It has plainly appeared that God hears and is moved by prayer, especially by persistent pleading prayer. This was the conviction not only of the mass of the nation, but also of a large number of highly gifted persons. Their experience of prayer, as attested by their writings, must always constitute an important element in that portion of the evidences for the being of God which is drawn from human consciousness. In the spiritual sphere it corresponds to the testimony which St. John gives to God manifest in the flesh, 1 Jn 1²⁻⁴.

II. IN THE APOCRYPHA.—The Apocr. as a whole confirms strongly what has been said as to the increased prominence of prayer after the Exile. The Apocr. books incorporate, or even consist of prayers. The Additions to Esther are mainly two long prayers of Esther and Mordecai. See also Bar 1¹²⁻³⁸; the Prayer of Azarias (Abednego) prefixed to the Song of the Three Children; and the Prayer of Manasses: the two narratives Tobit and Judith both attest the power of prayer. In Tobit the miraculous interpositions and the happy issue of the story are entirely the result of the simultaneous prayers of Tobit and Sarah recorded in To 3, see esp. 3¹⁶. And the place given to prayer in an ideal Jewish family is shown by the paternal injunctions of To 4¹⁹. The Book of Tobit, although a fiction, engages respect and interest by its high moral tone; but the same cannot be said of the Book of Judith, in which the prayer of the heroine is tainted with the treachery which is glorified throughout the book. Her prayer in Jth 9¹⁰ is prayer for the success of deceit, and it would be hard to find anything baser in conception than her pretended scheme of inquiring by prayer as to the sins of her countrymen, that she may tell Holofernes when to attack them, Jth 11¹⁷⁻¹⁸. The necessity of washing, before prayer, for those living among the heathen appears in Jth 12⁷⁻⁸. In 1 Mac we pass from fiction to history. As Ezr-Neh showed prayer in men of action, so also 1 Mac, e.g. 4³⁰⁻³³ 5²³ and 11⁷¹⁻⁷², prayer was the secret of the Maccabæan victories. That it was so, is nowhere better expressed than in 2 Mac 15²⁷, 'contending with their hands and praying unto God with their hearts.' The notice of Mizpeh in 1 Mac 3⁴⁶ as an ancient place of prayer, links the prayer and victory of Judas with those of Samuel in former time, and is proof of the surviving holiness of the ancient sanctuaries. 2 Mac does but renew in legendary guise the evidence of 1 Mac as to the frequency of prayer in the great patriotic struggle. But it contains two passages which favoured, if they did not suggest, later developments in Christian times. With 2 Mac 12⁴⁰⁻⁴⁵ before them as canonical Scripture, it is no wonder that men thought they had ample justification for offering sacrifice (in the Mass) on behalf of the dead. And the vision of Onias and Jeremiah (2 Mac 15¹²⁻¹⁴) was a clear testimony to the intercession of saints on behalf of the living. Cf. also Bar 3⁴ if the text be correct.

The sapiential books of the Apocr. should next be considered. The Book of Wisdom from 9¹ onward

is a continuous address to God, and may be regarded as a prayer, though the character of supplication is not clearly discernible beyond the end of ch. 9. But 16²⁷⁻²⁸ contains a beautiful illustration with regard to prayer. As manna had to be gathered at daybreak, lest it should melt in the heat of the sun, so we must rise at daybreak to gather spiritual food by prayer.

If the Book of Wisdom contributes little, Sirach compensates, as might be expected from the respective origin of the two books. It contains prayers, e.g. 22²⁷⁻²⁸ (personal); 36¹⁻¹⁷ (national); 50²²⁻²⁴ partly thanksgiving, the source of Rinkart's famous hymn, 'Nun danket alle Gott.' Sir 7¹⁰⁻¹⁴ 23²⁻⁴ prepare the way for our Lord's teaching on prayer, and may have been present to His mind: 38⁹⁻¹⁴ was certainly in St. James' mind when he wrote Ja 5¹⁴⁻¹⁶. Sir 38²⁴ may perhaps be the source of the proverb, 'Laborare est orare.' Taking the book generally, it is remarkable that the principal subject of prayer in Sirach is the forgiveness of sins, thus advancing the movement begun in OT to spiritualize the aims of prayer.

One more book of Apocr. requires notice, an apocalypse, the so-called 2 Esdras. Though chs. 3-14 inclusive are certainly post-Christian, and therefore do not, like the books hitherto considered, illustrate inter-Testamental Jewish thought, there is much that is of great interest in them, and not least in regard to prayer. The question is raised in 7¹⁰²⁻¹¹² (RV text) whether the intercession of prophets and leaders which had played so great a part in the history of Israel will not also be availing in the day of judgment, and the answer is a twice-repeated negative.

III. IN THE NEW TESTAMENT.—It will be convenient to state at once the main points in which the doctrine of prayer makes advance in NT. (1) Further development of prayer for spiritual blessings. It is the light here thrown on the possibilities of a higher life by the example and teaching of Christ which enlarges and raises the scope of prayer. (2) Extension of the guidance of the Holy Spirit to all believers, enables them for prayer. Power in prayer was a characteristic of the prophets in the OT, because they had the Spirit. Now all can pray, because all have the Spirit. (3) Prayer in the name of Jesus. This is absolutely new (Jn 16²⁴). The verse just cited gives the turning-point in the history of prayer. It does not divert prayer from the Father to the Son, but gives new access to the Father. Thus the normal idea of prayer is to pray in the Spirit, through the Son, to the Father.

NT words for 'prayer' must be briefly noticed.

1. Prayer to God with implication of worship is *προσεύχασθαι*. 2. *εὐχεσθαι* barely exceeds an earnest wish, and needs *πρὸς τὸν θεόν* to give it the sense of prayer as in 2 Co 13⁷. Its subst. *εὐχή* means a vow except in Ja 5¹⁶. 3. *δέσμαι, δέσποις*, though used of supplication to God even by our Lord Himself (Lk 22³²), may also be used of prayer to man (e.g. Lk 9⁴⁰), which is not the case with *προσεύχασθαι*. 4. *αἰτεῖν*, a simple word belonging to our childlike relation (Lk 11¹¹), contains no thought of worship; in RV always 'ask,' but disguised in AV by five different renderings, namely 'ask,' 'desire,' 'beg,' 'crave,' 'require.' The mid. voice (*αἰτεῖσθαι*) gives intensity to the request (see Mayor on Ja 4³). 5. *ἐρωτάω*, usually explained as involving a certain freedom in the manner and form of request. 6. *ἐντυγχάνειν, ὑπερεντυγχάνειν*, tr. 'intercede,' though the sense is primarily to draw near the person addressed, and only secondarily on behalf of another. See below under 'Epistles.'

i. *Gospels*.—The example and teaching of our Lord: (1) His personal example. His prayer was real prayer, not merely offered by way of example

to disciples, but as real and intense as any ever uttered. Nothing brings out His true humanity more than His dependence on the Father in prayer. His prayers may be considered under three heads: (a) *At or before the great events of His life on earth*: at Baptism (Lk 3²¹); before choice of apostles (Lk 6¹²⁻¹³); before transfiguration, which is almost represented as the effect of prayer (Lk 9²⁹); before Gethsemane (Jn 17, the earlier verses of which refer to the consummation of His own work); during the agony (Lk 22³⁹⁻⁴⁶, He 5⁷). It is to be observed that, for these notices, we are mainly indebted to St. Luke, and his special interest in our Lord's teaching as to prayer will appear under other heads also. (b) *Prayer before performance of miracles*: implied in the case of Lazarus, Jn 11⁴¹⁻⁴²; probably implied Mk 7²⁴. Cf. Mt 17²¹ (TR); but much more frequent in miracles wrought by disciples. (γ) *Intercessory prayer*: for disciples and future believers, Jn 17²⁰⁻²⁶, and continued after ascension, Ro 8²⁶, He 7²⁵ (this continued intercession is not denied by Jn 16²⁶, which merely guards against the thought that our prayer is of itself unacceptable; His heavenly intercession is but another aspect of our asking in Jesus' name); prayer for individuals: St. Peter, Lk 22³²; soldiers at the cross, Lk 23³⁴. See Monrad, *World of Prayer*, p. 72, Eng. tr.

(2) The Lord's direct teaching in various ways. This may be considered under the following heads: (a) the Lord's Prayer; (b) parables; (γ) incidental sayings; (δ) last discourses.

(a) **The Lord's Prayer.**—There are grounds which appear to the present writer to be sufficient, but which cannot be stated here, for believing that the prayer was given on two occasions, and in two distinct forms. The latter circumstance would seem to show that stress was not laid on the repetition of the exact words, but on the teaching which the prayer conveyed as to the topics, proportion, and order of all prayer. There is but one clause in the Lord's Prayer relating to temporal wants, and even that not merely to the wants of the individual ('give us'). Moreover, it is capable of including spiritual needs, and is constantly so interpreted. On the other hand, it does legitimate prayer for temporal wants. In this connexion notice the direction given Mt 24³⁶. This tendency of the Lord's Prayer to fix desires on spiritual things is summed up in one of the *agrapha* quoted by Origen, *Sel. in Ps 4 LXX* (Lomm. xi. 432) and elsewhere, and probably authentic, 'Ask the great things, and the little things shall be added to you; ask the heavenly things, and the earthly things shall be added to you' (Resch, *Agrapha*, Logion 41). Another characteristic of the Lord's Prayer is its *catholicity*. There is nothing of particularism in it. It is already conscious of its world-wide destiny. A merely Jewish prayer of this date would certainly have been addressed to the Lord God of Israel (of our fathers), and would have contained a petition for the nation. See Latham, *Pastor Pastorum*, p. 416. See, further, art. LORD'S PRAYER.

(b) **Parables.**—(1) Two parables on importunity in prayer. This characteristic of prayer has already been taught by OT, and is here approved by our Lord. The 'Friend at Midnight' (Lk 11⁵⁻⁸) follows immediately the delivery of the Lord's Prayer. While it should be interpreted in the broadest way of all prayer, it may have special application to teachers, as being a prayer for bread for others. The second parable, the Importunate Widow (Lk 18¹⁻⁸), has throughout a special reference to the prayer of suffering believers in expectation of the Second Advent. The need of importunity in prayer expressed in both parables should be interpreted with Trench's words before us, 'We must not conceive of prayer as an over-

coming of God's reluctance, but as a laying hold of His highest willingness' (*Parables*, xviii., the substance of which comes from the passage of Dante which he quotes, *Parad.* xx. 94-99). (2) A parable on right disposition in prayer follows immediately in Lk 18⁹⁻¹⁴. Compare above on Dt 26¹³⁻¹⁵ under OT. In this parable we see a great step in advance. Under the new covenant a profession of ritual righteousness has no longer any place in prayer. On the contrary, we have Lk 17¹⁰, which may, like the precept of forgiveness which it follows, have been spoken with reference to prayer and its conditions. It should be observed that these parables are preserved by St. Luke alone, and to them may be added the prayer of the prodigal son, 'Father, I have sinned,' etc. (Lk 15^{18, 19}).

(γ) **Incidental sayings.**—(1) As to conditions of prayer. One of these is *humility*, as in the parable referred to above, Lk 18⁹. Another is *forgiveness* of our brother men. This condition of prayer had already been strikingly stated in Sir 28²⁻⁴. Mt 6^{14, 15} and Mk 11^{24, 25} do but repeat it, and the parable of the Unmerciful Servant grows out of the same root. A third condition of prayer is *to avoid outward show and to avoid repetition*. Our Lord's practice throws light on both these requirements. We read of His retirement to the mountain for prayer. Privacy in a house is difficult to obtain in the East. The other direction does not forbid all repetition. Words may be repeated to express urgent entreaty, as in Mt 26⁴⁴. A fourth condition is more important and more difficult of explanation—that of *faith*. It is obvious that faith must be a condition; a prayer which is, so to speak, an experiment, will not be answered. But Mk 11²⁴ 'All things whatsoever ye pray and ask for, believe that ye have received them and ye shall have them,' seems to represent faith not merely as 'sine qua non,' but as 'cum qua semper.' Literally interpreted, the words would assign to every believer a kind of vicarious omnipotence. In interpreting any saying of our Lord, it must be remembered that the words as spoken by Him were not isolated, and were addressed to those who had heard other words which limited and explained them. It is reasonable to receive this saying with the explanation which St. John puts upon it, 1 Jn 5^{14, 15} ('if we ask anything according to his will, he heareth us'). The illustrations used to emphasize the power of prayer in faith, viz. the uprooting of mountains and trees, are taken from the language of the Jewish schools; and the same source supplies a parallel expression, 'If a person applies his whole attention during prayer, he may be sure that his prayer has been granted' (R. Samuel in *Berakhoth*, tr. p. 111). It is probable that our Lord, foreseeing that the power of prayer would be undervalued, preferred to state its force in this almost paradoxical way. It will follow that assurance of receiving the *precise* thing asked for is not what is required. There is a great instance in Ac 12 which may be taken here by anticipation. The Church is gathered together praying continuously and earnestly for the release of St. Peter. But when he is released and sent back to them, they keep him outside the gate because they cannot believe that their prayer has been granted. Yet who will say that that prayer was not a prayer of faith? The last condition of prayer to be mentioned is not a universal one, but carries special promise, namely, the condition of *union* in prayer, Mt 18^{19, 20}. It does not necessarily imply public prayer, for two persons are enough. The effect of this saying appears in the frequent mention of united prayer in Acts.

(δ) **Last discourses.**—As in all other respects these discourses give new and distinctive teaching,

so in respect of prayer. It is henceforth to be in *Jesus' name*. 'Thus is given not a mere devotional form, but a new ground on which the worshipper stands, a new plea for the success of his petitions; and, in fact, a wholly new character to prayer, since it must be brought into unison with the mind of Him in whose name it is presented' (T. D. Bernard, *Central Teaching of Jesus Christ*, p. 156; and see preceding page). As this teaching was not possible in the early days when the Lord's Prayer was given, 'in Jesus' name' was not added to it. But that prayer being His, and in accordance with His will, is a prayer in His name, without the addition of 'through Jesus Christ,' which the Church has never presumed to make. This instance shows that the direction is not to be taken in a narrow, verbal way.

(3) Finally, the Gospels afford us teaching on prayer given in an entirely different way. Under (1) the Lord's example was considered on its human side, teaching about prayer by His own prayer. But even during His ministry the Divine nature, though in a certain sense hidden, began to show itself, and He is the recipient of prayer from those who need His help. Their requests are not described by the highest term *προσεύχουμαι*, but by *δέουμαι*, *δέσους*. But since these requests were made to the Son of God, His way of dealing with them instructs all who pray. (a) Requests are granted where there is faith. 'Believe ye that I am able to do this?' (b) Granting requests is delayed to produce importunity and test character (Mk 7³⁷). A saying of Seneca's well illustrates the difference between what the Stoic thought of the attitude of importunate prayer and the way in which Christianity regards it: 'Nihil carius emitur quam quæ precibus emta est.' Christianity would substitute 'nihil dulcius.' (c) Man's ignorance in prayer is insisted on in the case of the sons of Zebedee, Mt 20²²; and it is shown by experience in the case of St. Peter, whose request is granted that he may learn that it was presumptuous, Mt 14²⁸⁻³¹, cf. Ro 8²⁶. Here it may be added that the disciples who had asked Jesus daily and hourly for help and guidance while He was with them in the flesh, evidently continued to do so after God had 'exalted him to be a Prince and a Saviour.' St. Stephen says, 'Lord Jesus, receive my spirit'; and Christians are described by St. Paul as those who 'call upon (or invoke in prayer) the name of our Lord Jesus Christ,' 1 Co 1², cf. Ac 9¹⁴ 22¹⁶. It is therefore going too far to say with Origen (*de Orat.* 15) that all prayer must be offered to the Father. Yet it is the case that Jesus teaches His disciples to pray, not to Himself, but to the Father in His name. Liddon (*Bampton Lectures*, note F) appears to press his argument further than a consideration of the whole evidence will justify.

ii. *Acts*.—The teaching and guidance given by our Lord manifests its results in the Acts and Epistles. Acts will show its external results in the Church as a whole, not, however, without some evidence of private practice. The Epp. will give its inward effect on the devotional life of individuals, especially of St. Paul, but here also something may be gathered as to external and corporate usages.

(1) Acts supplies notices of *times and places of prayer*. St. Peter observes the sixth hour (Ac 10⁹), and he and St. John go up to the temple at the ninth hour, which is described as the hour of prayer (Ac 3¹). It is probable that the gathering described in Ac 2¹ was for worship, and this is fixed by 2¹⁵ as having taken place at the third hour, so we have recognition of all the three Jewish hours of prayer.

In the matter of prayer, as in most other external matters, the Christian body remained at first

within the pale of Judaism. To ordinary observers they were only a new sect (*αἰρεσις*) of Judaism. They had their private worship (Ac 2⁴²), but they did not on that account forsake the temple; and it is possible that they still attended the synagogues, though there is no evidence on this point beyond the practice of St. Paul on his missionary journeys (in which case he had a special object in view), and Ja 2² (where 'synagogue' may mean a distinctively Christian assembly, cf. He 10²⁵). But with regard to the private worship of Christians, there is ample evidence in Acts, e.g. 4²³⁻³⁰ where the actual prayer used is recorded, and 12¹² the assembly for prayer in the house of Mary the mother of Mark. Two farewell prayers from St. Paul's life may be added—the one at Miletus with tears and embraces (Ac 20³⁶), the other on the beach at Tyre (Ac 21⁵). In both these cases they *knelt* in prayer. Kneeling is also the attitude of St. Stephen (Ac 7⁶⁰), St. Peter (Ac 9⁴⁰), and St. Paul (Eph 3¹⁴). On the other hand, our Lord's words had authorized *standing* to pray (Mk 11²⁸).

(2) *Fulfillment of prayer*.—Acts is remarkably strong in its testimony on this point. There are: the release of St. Peter (Ac 12), the sending of St. Peter to Cornelius (10⁴), the preservation of the crew and passengers who sailed with St. Paul (27²⁴). And there are the cases in which prayer is recorded as the means of working miracles (9⁴⁰ 28⁹). Passing to the Epp. we may take here the great instance of non-fulfilment of believing prayer, the thrice-repeated prayer of St. Paul to be delivered from the thorn in the flesh (2 Co 12⁸⁻⁹). Yet the prayer was not frustrate; what was granted was the power to rejoice in the infirmity.

(3) *Prayer in connexion with laying on of hands*.—In Acts there are mentioned three more or less distinct uses of the laying on of hands: (a) in healing as by Ananias (9¹⁷), St. Paul (28⁸); (β) as a complement to baptism by St. Peter and St. John at Samaria (8¹⁷) and St. Paul at Ephesus (19⁶); (γ) on appointment to ministries (6⁶ 13³). Now in each of these three classes of instances, though not in every instance, there is a distinct mention of prayer, as though to show that those who use the form are not in possession of the gift so as to transfer it at their will, but rather have authority to ask for it to be given. See, further, art. LAYING ON OF HANDS.

(4) The passages in which prayer accompanies the appointment to ministries naturally raise another question. In Ac 13³ 14²³ *fasting* accompanies prayer, cf. Lk 2²⁷. The connexion between fasting and prayer has already been observed in OT, but was it continued in the Apostolic Church? These two passages go in that direction, and it would be natural that the Christians should not abandon a practice in which as Jews they had been trained, and which appeared to have a possible sanction from Mt 9¹⁵. But, in considering fasting as subsidiary to prayer, it should be observed that in four passages where it appears in that light in AV, viz. Mt 17²¹, Mk 9²⁹, Ac 10³⁰, 1 Co 7⁵, RV, following textual evidence, omits all mention of the subject. See, further, art. FASTING.

(5) One other point of interest from Acts is that prayer here bears out what was said under OT of prayer as *colloquy with God*. Such is the prayer in the visions of Ananias (Ac 9¹³⁻¹⁶) and St. Paul (Ac 22¹⁷⁻²¹).

iii. *The Epistles and Apocalypse*.—(1) *St. James*.—This Ep. takes up and applies to daily life the teaching of the gospel, and is especially related to Mt. Hence there is much as to prayer. The need of faith in prayer, and the fatal effect of doubting (Ja 1⁶⁻⁸, observe same word [*διακρίνωμαι*] for 'doubt' as in Mt 21²¹); the neglect of prayer, and character of wrong prayer (Ja 4²⁻³), are put in a practical way.

But the most important passage is Ja 5¹³⁻¹⁸. There in an emphatic position almost at the close of the Epistle we have the recommendation of a particular act of prayer on the part of the elders of the congregation, accompanied with the use of oil (in accordance with the early apostolic practice described Mk 6¹³). This prayer is not only to effect bodily but also spiritual healing. The sufferer's sins will be forgiven. And then the power of prayer is still further urged, and the example of Elijah given. Intercession for one another is to be the rule of the Church (cf. 1 Jn 5¹⁶).

(2) *Epp. of St. Paul.*—Only a few points can be noticed. (a) The co-operation of the Holy Spirit in prayer comes out clearly. In Ro 8¹⁵ the Spirit enables us to cry 'Abba, Father,' and in v.²⁶ intercedes for us (ὁ ἀνεπαύτως ἰσχυρὸς) along with our defective prayers. There is a special fitness in the use of ἐνθυνησάμενος (and its compound) with regard to the Spirit (as here) and the Son (v.²⁴ and He 7²⁵), as it signifies close approach. For the help of the Spirit in prayer see also Eph 6¹⁸ and Jude 20. Further, the gift of tongues was used in prayer as well as in praise (1 Co 14¹⁴⁻¹⁵). The distinction which St. Paul here draws between the office of his (own) spirit and his mind in prayer is well illustrated by Thom. Aquin. ii. 2. lxxxiii., who says that prayer is 'rationis actus.' There must be some arrangement of petitions (*ordinatio*), and for this the mind must take part. (β) The reciprocal prayer of St. Paul and his converts. He constantly prays for them, he tells them so, and they pray for him. His prayer for them is sometimes in anxiety and sometimes with joy (Ph 1⁴). It included mention of persons by name, e.g. Timothy and Philemon, and no doubt countless others. He looks on this reciprocal prayer as a bond. He begins and often closes his Epp. with mention of it. He regards the circumstances of his own life and his movements as in part determined by the prayers of the saints (2 Co 1¹¹, Philem 22). (γ) Prayer is *striving*, an ἀγών (like Jacob's wrestling, see Ro 15³⁰, Col 2¹ and 4²). (δ) Some light is given as to the prayers of the congregation. There is the injunction in 1 Ti 2¹, where we find the rudiments of a fixed order of prayer. Clem. Rom. 61 shows how this command was obeyed. The chapter above quoted, 1 Ti 2, gives negatively in v.⁸ the same conditions of acceptable prayer 'without wrath and doubting' as are given positively in Mk 11²⁵, where forgiveness and faith are required for prayer. 'Wrath' here means refusal to forgive; such a condition condemns a literal use of the Imprecatory Psalms. (ε) In the Pastoral Epp. prayer has already become the *special duty of a certain class* (1 Ti 5³).

(3) *Epp. to Hebrews.*—The great lesson here is *freedom of access to God in prayer*. This Christ has obtained for us (He 4¹⁶ 10²²). The latter verse reminds us that the baptized no longer need the ritual washing of their bodies before prayer (see above on prayer in Apocrypha).

(4) *Epp. of St. John.*—Here again is the same thought as in He 4¹⁶, expressed by the same word (παρρησία). But in 1 Jn there is no question of entrance and approach (εἰσόδος, προσέρχεσθαι); we are already near. Thus παρρησία has more distinctly its primary sense of 'freedom of utterance' in prayer. See 1 Jn 3²¹⁻²², where the promises of the certain fulfilment of prayer given in Jn 14¹³⁻¹⁴ 15⁷⁻¹⁶ 16²⁴⁻²⁵ are concentrated and dwelt upon. The still stronger repetition of this assurance in 1 Jn 5¹⁴⁻¹⁵ explains any difficulty that might attach to it, by substituting 'according to His will' for 'in His name.' These two conditions are really equivalent. We cannot truly associate ourselves with Christ in prayer (in His name) without His spirit of entire submission to the Father's will.

(5) *The Apocalypse.*—Here the prayer for vengeance (Rev 6¹⁰) is an echo of Lk 18¹⁻⁸, but it is the prayer of the dead (cf. Bar 3⁴). In Rev 5³ and 8³ the prayers of the saints are offered to God, but this is the prayer of the living which ascends from the earth. This prayer is mediated, being offered in one case by the elders, and in the other having incense added to it by angels. For this idea (common among the Jews) cf. To 12¹²⁻¹⁵. The passages in Revelation are clearly symbolical, and do not warrant man in addressing angels for such a purpose. The mistranslation of Vulg. (Job 5¹) probably encouraged the error. For the connexion of prayers and incense see above, p. 39^b. Lastly, the Apocalypse ends with a prayer from the highest level of Christian faith and hope befitting the place assigned to it at the end of the Canon. It is a threefold prayer. It is the prayer of the Spirit, which animates all faithful prayer under the NT (22¹⁷). It is the prayer of the Bride, i.e. the Church (ib.). It is also the prayer of the individual, the writer of the book (22²⁰). All other prayer resolves itself at last into prayer for the coming of the Lord Jesus, which will accomplish all desires.

LITERATURE.—Jerus. Talmud, *Berakhoth*, tr. Schwab; Origen, *de Oratione Libellus*; the art. in Herzog on 'Gebet,' 'Gebet bei den Hebräern'; Bp. Monrad, *World of Prayer*, tr. Banks. The standard works on Biblical Theology, e.g. Oehler, Schultz, Beyerlag, have very scanty references to Prayer. Modern works on the efficacy of Prayer are not mentioned, being outside the scope of the present article. E. R. BERNARD.

PRAYER OF MANASSES.—See MANASSES (PRAYER OF).

PREACHER.—See ECCLESIASTES.

PREACHING (Heb. מְדַבֵּר, Jon 3², from דָּבַר 'cry out,' 'proclaim'; Gr. κήρυγμα, 'the message proclaimed,' from κηρύσσω, 'declare as a herald,' 'preach'; in NT used in marked distinction from διδάχῃ, 'teaching,' and διδάσκω, 'teach,' and always preserving in some degree the idea of the root-word κήρυξ, 'herald').—Strictly speaking, Christian preaching is the proclamation of the gospel, which is to be followed by the more elaborate but less startling process of teaching. This limitation is observable in the NT accounts of our Lord's ministry where He first appears *preaching*, i.e. proclaiming the advent of the kingdom of God (e.g. Mt 4¹⁷), following on the preaching of John the Baptist (e.g. Mt 3¹⁻²), and then proceeds to *teach* the nature and laws of the kingdom (e.g. Mt 5¹). The word εὐαγγελίζω is frequently used for Christian preaching, as the declaration of glad tidings (e.g. Lk 3¹⁸). But although the NT words rendered 'preaching' have this limitation of meaning, it would be undesirable to confine the consideration of the subject of preaching to the cases in which they are strictly applicable, that subject, as we now understand it, including all instruction in religion which takes the form of popular discourse, and especially that which is associated with public worship.

i. **JEWISH PREACHING.**—Of the two streams of religious life and practice that are seen in the history of Israel—the priestly and the prophetic—preaching attaches itself to the latter. The sumptuous pageantry of the sacrifices spoke to the eye and taught by dramatic representation. The prophet was emphatically the preacher. In the earlier periods, indeed, his teaching is usually by means of the brief oracle. But the great 8th cent. prophets composed and delivered elaborate discourses. They were preachers before they were writers, falling back on the pen only when the living voice was silenced: in the case of Jeremiah, for the preservation of the warnings which his

contemporaries refused to hear (Jer 30⁹); in the case of Ezekiel, because the circumstances of the Exile compelled the prophet to resort to literary channels for making his message known. Still even Ezekiel's prophecies may have been originally spoken (see Smend, *Der Prophet Ezechiel*, xxii.). On the other hand, Ewald held that Ezekiel wrote his oracles instead of speaking them because he felt a decay of the prophetic spirit (*Prophets of the OT*, iv. 2, 9). For the most part, at all events, the prophecies contained in OT are written discourses which had been preached or which were intended for preaching. Still there are two important differences between this preaching of the prophets and what we understand by the term to-day. (1) The preaching of the prophets was not a normal function of public worship taking its place in the ritual of the sanctuary. It was an utterance demanded by special crises, or prompted by a special revelation, and spoken in the court or the market-place, wherever the prophet could find the audience he was urged to address. (2) For the most part it dealt with public questions, national sins, judgments, and deliverances, rather than with individual conduct and need (see W. R. Smith, *Prophets of Israel*, Lect. II.). In Ezekiel, on the other hand, more personal preaching appears (see Cornill, *Der Prophet Ezechiel*, pp. 51, 52).

For a closer approach to what is commonly understood as preaching, we must come to the period of the return from the Captivity. The law is now the centre of the religion of Israel, and the law is now popularized in public teaching. The very meaning of the word rendered law (*תורה instruction*) points in this direction. Accordingly, the Divine instruction given through priests or prophets at an earlier period is called by the same name (Hos 4⁶, Am 2⁴ [see Driver's note]). With the rise of the synagogue, preaching becomes a recognized function of public worship. The need of translating the Heb. text into the vernacular introduced the interpreter, who followed the reader sentence by sentence in the case of the law, but with a division into longer passages with the prophets (Schürer, *HJP* II. ii. 81; *Megilla*, iv. 4, 6, 10). The Targum thus originated prepared for the more lengthy exposition. While the Halacha is didactic and suited to the schools, the Haggada contains the legends and allegories which would be more acceptable to the popular audience in the synagogue service. In the time of Philo the popular discourse was the chief part of the service (see Schürer, II. ii. 76). There was no one appointed preacher. According to Philo, 'some (*τις*) priest who is present (*ὁ παρών*), or some one of the elders, reads the sacred laws to them, and expounds (*ἐξηγεῖται*) each of them separately till eventide' (Fragm. in Euseb. *Præp. Evang.* viii. 7). Indeed we learn from the same authority that any competent person (*ἀναστὰς τις τῶν ἐμπειροτέρων*) could take this part of the service (*de Septenario*, c. 6, Mang. II. 282). From the latter passage it would seem that the preacher stood up to speak, the word *ἀναστὰς* being used. But possibly Philo is thinking only of his act of rising to present himself before the people and offer his discourse. In delivering his sermon the preacher was seated in an elevated place (Lk 4²⁰; Zunz, *Die gottesdienstlichen Vorträge*, p. 337; Delitzsch, *Ein Tag in Capernaum*, p. 127f.).

ii. CHRISTIAN PREACHING.—John the Baptist was acknowledged as a prophet, and he revived the prophet's mission of preaching to the people apart from the normal religious services. His work consisted chiefly in preaching and baptizing, though with the necessary addition of private conversation with inquirers (Lk 3¹⁰⁻¹⁴). The burden

of his message was the call to repentance, and the announcement of the approach of the kingdom of God, with a promise of the forgiveness of sins (Mt 3¹, Mk 1⁴). This was the burden of the earlier preaching of Jesus (Mk 1¹⁴⁻¹⁵). This earlier preaching of our Lord was carried on in the synagogues of Galilee (Mk 1²⁰). The incident in the Nazareth synagogue of which we have a full account, indicates that our Lord's method was to found His discourse on the portion of Scripture He had previously read (Lk 4¹⁶). This would be in accordance with the custom at the Sabbath meeting. When He preached in the open air it was under freer circumstances. Then, though He would frequently appeal to the OT in confirmation of His words, and especially in arguing with the scribes in the form of an *argumentum ad homines*, He did not adopt the method of the exposition of Scripture; He would start immediately from His great topic 'the kingdom of God,' and expound that. The evangelists are careful to point out the transition from this public teaching to the private training of the inner circle of disciples. His method was not the same in the two cases. It cannot be said that He had any esoteric doctrine which He deliberately withheld from the uninitiated, although His language on one occasion seemed to indicate this (Mk 4¹¹⁻¹²), because He always invited all capable hearers (e.g. Mk 4^{9, 22-23}). The public discourse more often took the form of parable; the private instruction was more direct and conversational. But even when delivering a public discourse Jesus was always liable to interruption, and this would frequently develop into discussion. Moreover, the reports of our Lord's discourses preserved in the Gospels appear to be abbreviated in some cases, or perhaps we have salient points, memorable epigrams, etc., selected from His discourses rather than full reports of them. Sometimes, as in the case of the Sermon on the Mount, it may be that we have a number of the sayings of Jesus uttered on various occasions collected and strung together by the reporter (perhaps Matthew in his *Logia*; see MATTHEW). In Lk we more often meet with utterances springing out of incidents, the event and the saying being both given by the third evangelist. For these reasons we cannot look to the Gospel accounts of the teachings of Jesus to furnish us with typical sermons. Still those accounts not only contain the teachings themselves, they illustrate our Lord's method of preaching—(1) His freshness and originality (*διδάχῃ καὶ αὐτῇ*, Mk 1⁷); (2) His tone of authority (*ὡς ἐξουσίαν ἐχὼν*, Mk 1²²); (3) His winning grace—a point characteristically noted by the third evangelist (*ἐθαύμαζον ἐπὶ τοῖς λόγοις τῆς χάριτος*, Lk 4²²); (4) His graphic picturesqueness in illustration (Mk 4²³).

The Book of Acts supplies several specimens of apostolic preaching. In the earliest instances the text and starting-point are found in some event, e.g. the 'tongues' at Pentecost (Ac 2¹⁴), the healing of the lame man at the gate of the temple (Ac 3¹²). The OT is appealed to for the confirmation of what is said (e.g. Ac 2^{14, 25, 34} 7⁴² 8²⁷). With his marvellous versatility St. Paul employed the same method when speaking to pagans at Athens, illustrating his words by a citation from classic literature (Ac 17²⁸), though personally he attached unique importance to the inspiration of the OT, and cited this to Jews in the manner of the other apostles (e.g. Ac 13^{40, 47} 15¹⁵). In substance the preaching of the apostles to Jews was a declaration of the Messiahship of Jesus with the confirmation of two arguments—(1) The resurrection; (2) the OT predictions. On this followed promises of the forgiveness of sins (e.g. Ac 2³⁸ 3¹⁹), and salvation through Christ (e.g. 4¹²). The essential genuineness of the early speeches in Acts is proved by the

fact that they do not contain the Pauline doctrine of the Atonement, which was not developed at the time in which they are dated (Lechler, *Apost. and post-Apost. Times*, i. 266 f.). They refer to the death of Christ, charging the Jews with the crime, pointing out that it was predicted by the prophets, and therefore was foreknown by God and in His counsels, and showing that in spite of it the resurrection proved Jesus to be Christ. The apostolic preaching to the heathen, represented especially by St. Paul, exposes the absurdity of anthropomorphic polytheism (e.g. Ac 14¹⁵), idolatry (17²⁰), and sorcery (19¹⁹); declares the spirituality and fatherhood of God (17³⁴); denounces sin, and warns of judgment to come through one whom God has appointed (17³¹); offers deliverance through faith in Jesus Christ (16³¹). The allusions to the definite preaching of Jesus Christ are very brief. But it is evident that there must have been some account of His life, death, and resurrection in St. Paul's preaching. Gal 3¹ plainly points to this. Similarly, if the second Gospel is St. Mark's record of 'the preaching of Peter', it is plain that that apostle preached the facts of the life of Jesus.

In the churches of NT times great freedom of utterance was allowed. The right to preach depended on gifts, not on offices. At Corinth, in particular, the gift of prophecy, to which St. Paul assigns the first place (1 Co 14¹), was found among the private members, and was freely exercised in the assembly (v. 31). Nevertheless, the duty of admonishing the assembly rests especially with the leading authorities (e.g. 1 Th 5¹³). The chief functions of the elders or bishops was, not preaching, but the administration of practical affairs. But ability to teach is recognized, at all events, by the time of the Pastoral Epistles as the one necessary qualification of a bishop (1 Ti 3²) which is not also shared by the deacon. In course of time it was considered improper for a presbyter to preach in the presence of the bishop, universally so in the West (Possid. *Vit. S. Aug. v.*; *Conc. Hisp. ii.* (A.D. 619) can. 7), but not universally in the East, only in *quibusdam ecclesiis* (Jerome, *ad Nepot. Epist. 2*). W. F. ADENEY.

- v. The Bible Doctrine of Predestination. Literature.

i. THE TERMS.—The words 'predestine,' 'predestinate,' 'predestination' seem not to have been domiciled in English literary use until the later period of Middle English (they are all three found in Chaucer: *Troilus and Criseyde*, 966; *Orisoun to the Holy Virgin*, 69; tr. of *Boethius*, b. 1, pr. 6, l. 3844; the Old English equivalent seems to have been 'forestiltian,' as in *Ælfric's Homilies*, ii. 364, 366, in renderings of Ro 1⁴ 8³⁰). 'Predestine,' 'predestination' were doubtless taken over from the French, while 'predestinate' probably owes its form directly to the Latin original of them all. The noun has never had a place in the English Bible, but the verb in the form 'predestinate' occurs in every one of its issues from Tindale to AV. Its history in the English versions is a somewhat curious one. It goes back, of course, ultimately to the Latin 'prædestinatio' (a good classical but not pre-Augustan word; while the noun 'prædestinatio' seems to be of Patristic origin), which was adopted by the

Vulgate as its regular rendering of the Gr. *προορίζω*, and occurs, with the sole exception of Ac 4²³ (Vulg. *decerno*), wherever the Latin translators found that verb in their text (Ro 1⁴ 8³⁰, 30, 1 Co 2⁷, Eph 1⁵ 11). But the Wyclifite versions did not carry 'predestinate' over into English in a single instance, but rendered in every case by 'before ordain' (Ac 4²³ 'deemed'). It was thus left to Tindale to give the word a place in the English Bible. This he did, however, in only one passage, Eph 1¹¹, doubtless under the influence of the Vulgate. His ordinary rendering of *προορίζω* is 'ordain before' (Ro 8³⁰, Eph 1⁵; cf. 1 Co 2⁷, where the 'before' is omitted apparently only on account of the succeeding preposition into which it may be thought, therefore, to coalesce), varied in Ro 8³⁰ to 'appoint before'; while, reverting to the Greek, he has 'determined before' at Ac 4²³ and, following the better reading, has 'declared' at Ro 1⁴. The succeeding Eng. versions follow Tindale very closely, though the Geneva omits 'before' in Ac 4²³ and, doubtless in order to assimilate it to the neighbouring Eph 1¹¹, reads 'did predestinate' in Eph 1⁵. The larger use of the word was due to the Rhemish version, which naturally reverts to the Vulg. and reproduces its *prædestino* regularly in 'predestinate' (Ro 1⁴ 8³⁰, 30, 1 Co 2⁷, Eph 1⁵ 11; but Ac 4²³ 'decreed'). Under this influence the AV adopted 'predestinate' as its ordinary rendering of *προορίζω* (Ro 8³⁰, 30, Eph 1⁵ 11), while continuing to follow Tindale at Ac 4²³ 'determined before,' 1 Co 2⁷ 'ordained,' as well as at Ro 1⁴ 'declared,' m. 'Gr. determined.' Thus the word, tentatively introduced into a single passage by Tindale, seemed to have intrenched itself as the stated English representative of an important Greek term. The RV has, however, dismissed it altogether from the English Bible and adopted in its stead the hybrid compound 'foreordained' (cf. art. FOREKNOW, FOREORDAIN) as its invariable representative of *προορίζω* (Ac 4²³, Ro 8³⁰, 30, 1 Co 2⁷, Eph 1⁵ 11),—in this recurring substantially to the language of Wyclif and the preferred rendering of Tindale. None other than a literary interest, however, can attach to the change thus introduced: 'foreordain' and 'predestinate' are exact synonyms, the choice between which can be determined only by taste. The somewhat widespread notion that the 17th cent. theology distinguished between them, rests on a misapprehension of the evidently carefully-adjusted usage of them in the *Westminster Confession*, iii. 3ff. This is not, however, the result of the attribution to the one word of a 'stronger' or to the other of a 'harsher' sense than that borne by its fellow, but a simple sequence of a current employment of 'predestination' as the precise synonym of 'election,' and a resultant hesitation to apply a term of such precious associations to the foreordination to death. Since then the tables have been quite turned, and it is questionable whether in popular speech the word 'predestinate' does not now bear an unpleasant suggestion.

That neither word occurs in the English OT is due to the genius of the Hebrew language, which does not admit of such compound terms. Their place is taken in the OT, therefore, by simple words expressive of purposing, determining, ordaining, with more or less contextual indication of previousness of action. These represent a variety of Hebrew words, the most explicit of which is perhaps *רָצָה* (Ps 139¹⁶, Is 22¹¹ 37²⁶ 46¹¹), by the side of which must be placed, however, *רָצָה* (Is 14²⁴, 25, 27 19¹³ 19¹⁷ 23⁹, Jer 49³⁰ 50⁴³), whose substantival derivative *רָצָה* (Job 38³ 42³, Jer 23¹⁹, Pr 19²¹, Ps 33¹¹ 107¹¹, Is 14²⁵, 46¹⁰, 11, Ps 106¹³, Is 51¹⁷, Jer 49³⁰ 50⁴³, Mic 4¹²) is doubtless the most precise Heb. term for the Divine plan or purpose,

although there occurs along with it in much the same sense the term *קָדַשׁ* (Is 18¹¹ 29¹¹ 49³⁰ 50⁴⁰ 65³, Jer 51²⁰, Mic 4¹², Ps 9²⁰), a derivative of *קָדַשׁ* (Gn 50³⁰, Mic 2³, Jer 18¹¹ 26³ 29¹¹ 36³ 49³⁰ 50⁴⁰, La 2⁶). In the Aramaic portion of Daniel (4:17-24) the common later Hebrew designation of the Divine decree (used especially in an evil sense) *נִזְדָּר* occurs: and *קָדַשׁ* is occasionally used with much the same meaning (Ps 27, Zeph 2², Ps 105¹⁰=1 Ch 16¹⁷, Job 23¹⁴). Other words of similar import are *נִזְדָּר* (Jer 4²⁸ 51¹², La 7¹³, Zec 1⁶ 8¹⁴, 10) with its substantive *קִדְּשׁוֹ* (Job 42², Jer 23²⁰ 30²⁴ 51¹¹); *קָדַשׁ* (Ps 115³ 135⁶, Pr 21¹, Is 55¹¹, Jon 1¹⁴, Jg 13²⁵, La 2⁶, Is 53¹⁶) with its substantive *קִדְּשׁוֹ* (Is 46¹⁰ 44²⁸ 48¹⁴ 53¹⁰); *קָדַשׁ* (Job 14⁵, Is 10²², 22 28²², Dn 9²⁶, 27 11²⁶); *קָדַשׁ* (Dn 9²⁴); *קָדַשׁ* (Is 12²², 1 Ch 17²⁷, 2 S 7²⁹). To express that special act of predestination which we know as 'election,' the Hebrews commonly utilized the word *בָּחַר* (of Israel, Dt 4³⁷ 7⁶, 7 10¹⁵ 14², Is 41⁸, 9 43¹⁰, 20 44¹, 2 45¹, Jer 33²⁴; and of the future, Is 14¹ 65⁷, 10, 22; of Jehovah's servant, 42¹ 49⁷; of Jerusalem, Dt 12¹⁴, 18, 28 14²⁵ 15²⁰ 16⁷, 15, 18 17⁸, 10 18³ 31¹¹, Jos 9³⁷, 1 K 8¹⁴, 43 11¹³, 22, 53 14²¹, 2 K 21⁷ 25⁷) with its substantive *בְּחִירָה* (exclusively used of Jehovah's 'elect,' 2 S 21⁶, 1 Ch 16¹³, Ps 89⁴ 105⁶, 43 106⁶, 22, Is 42¹ 43²⁰ 45⁴ 65⁹, 10, 22), and occasionally the word *בָּחַר* in a pregnant sense (Gn 18¹⁹, Am 3², Hos 13⁵, cf. Ps 1⁶ 31⁷ 37¹⁸, Is 58⁷, Neh 1⁷); while it is rather the execution of this previous choice in an act of separation that is expressed by *הִבְדִּיל* (Lv 20²⁴ 20²⁴, 1 K 8³³).

In the Greek of the NT the precise term *προορίζω* (Ac 4²⁸, 1 Co 2⁷, Ro 8²⁹, 30, Eph 1⁵, 11) is supplemented by a number of similar compounds, such as *προτάσσω* (Ac 17²⁶); *προτίθημι* (Eph 1⁹) with its more frequently occurring substantive, *πρόθεσις* (Ro 8²⁸ 9¹¹, Eph 1¹¹ 3¹¹, 2 Ti 1⁹); *προετοιμάζω* (Ro 9²³, Eph 2¹⁰) and perhaps *προβλέπω* in a similar sense of providential pre-arrangement (He 11⁴⁰), with which may be compared also *προείδον* (Ac 2²¹, Gal 3⁸); *προγινώσκω* (Ro 8²⁹ 11², 1 P 1²⁰) and its substantive *πρόγνωσις* (1 P 1², Ac 2²³); *προχειρίζω* (Ac 22¹⁴ 3²⁸) and *προχειροτονέω* (Ac 4⁴). Something of the same idea is, moreover, also occasionally expressed by the simple *δράω* (Lk 22²², Ac 17²⁸, 31 2²², He 4⁷, Ac 10⁴²), or through the medium of terms designating the will, wish, or good-pleasure of God, such as *βούλη* (Lk 7³⁰, Ac 2²³ 4²⁸ 13²⁸ 20²⁷, Eph 1¹¹, He 6¹⁷, cf. *βούλημα* Ro 9¹⁹ and *βούλομαι* He 6¹⁷, Ja 1¹⁸, 2 P 3⁹), *θέλημα* (e.g. Eph 1⁵, 9, 11, He 10⁷, cf. *θέλησις* He 2⁴, *θέλω*, e.g. Ro 9¹⁸, 22), *εὐδοκία* (Lk 2¹⁴, Eph 1⁵, 9, Ph 2¹³, cf. *εὐδοκέω* Lk 12²², Col 1¹⁹, Gal 1¹⁰, 1 Co 12¹⁸). The standing terms in the NT for God's sovereign choice of His people are *ἐκλέγεσθαι*, in which both the compos. and voice are significant (Eph 1⁴, Mk 13²⁰, Jn 15¹⁶, 16, 19, 1 Co 12⁷, 27, Ja 2⁶; of Israel, Ac 13¹⁷; of Christ, Lk 9³⁵; of the disciples, Lk 6¹³, Jn 6⁷⁰ 13¹⁸, Ac 1²; of others, Ac 1²⁴ 15⁷), *ἐκλεκτός* (Mt [20¹⁶] 22¹⁴ 26²², 24, 31, Mk 13²⁰, 22, 27, Lk 18⁷, Ro 8³³, Col 3¹², 2 Ti 2¹⁰, Tit 1¹, 1 P 1¹ [20], Rev 17¹⁴; of individuals, Ro 16¹³, 2 Jn 1¹, 12; of Christ, Lk 23³⁵, Jn 13¹⁸); of angels, 1 Ti 5²¹), *ἐκλογή* (Ac 9¹⁰, Ro 9¹¹ 11⁵, 7, 28, 1 Th 1⁴, 2 P 1¹⁰),—words which had been prepared for this NT use by their employment in the LXX—the two former to translate *בָּחַר* and *בְּחִירָה*. In 2 Th 2¹³ *αἰρέομαι* is used similarly.

ii. PREDESTINATION IN OT.—No survey of the terms used to express it, however, can convey an adequate sense of the place occupied by the idea of predestination in the religious system of the Bible. It is not too much to say that it is fundamental to the whole religious consciousness of the Biblical writers, and is so involved in all their religious conceptions that to eradicate it would transform the entire scriptural representation. This is as true of the OT as of the NT, as will become sufficiently manifest by attending briefly

to the nature and implications of such formative elements in the OT system as its doctrines of God, Providence, Faith, and the Kingdom of God.

1. *Fundamental OT ideas implying Predestination.*—Whencesoever Israel obtained it, it is quite certain that Israel entered upon its national existence with the most vivid consciousness of an almighty personal Creator and Governor of heaven and earth. Israel's own account of the clearness and the firmness of its apprehension of this mighty Author and Ruler of all that is, refers it to His own initiative: God chose to make Himself known to the fathers. At all events, throughout the whole of OT literature, and for every period of history recorded in it, the fundamental conception of God remains the same, and the two most persistently emphasized elements in it are just those of might and personality: before everything else, the God of Israel is the Omnipotent Person. Possibly the keen sense of the exaltation and illimitable power of God which forms the very core of the OT idea of God belongs rather to the general Semitic than to the specifically Israelitish element in its religion; certainly it was already prominent in the patriarchal God-consciousness, as is sufficiently evinced by the names of God current from the beginning of the OT revelation,—*El, Eloah, Elohim, El Shaddai*,—and as is illustrated endlessly in the Biblical narrative. But it is equally clear that God was never conceived by the OT saints as abstract power, but was ever thought of concretely as the all-powerful Person, and that, moreover, as clothed with all the attributes of moral personality,—pre-eminently with holiness, as the very summit of His exaltation, but along with holiness, also with all the characteristics that belong to spiritual personality as it exhibits itself familiarly in man. In a word, God is pictured in the OT, and that from the beginning, purely after the pattern of human personality,—as an intelligent, feeling, willing Being, like the man who is created in His image in all in which the life of a free spirit consists. The anthropomorphisms to which this mode of conceiving God led were sometimes startling enough, and might have become grossly misleading had not the corrective lain ever at hand in the accompanying sense of the immeasurable exaltation of God, by which He was removed above all the weaknesses of humanity. The result accordingly was nothing other than a peculiarly pure form of Theism. The grosser anthropomorphisms were fully understood to be figurative, and the residuary conception was that of an infinite Spirit, not indeed expressed in abstract terms nor from the first fully brought out in all its implications, but certainly in all ages of the OT development grasped in all its essential elements. (Cf. the art. GOD).

Such a God could not be thought of otherwise than as the free determiner of all that comes to pass in the world which is the product of His creative act; and the doctrine of Providence (*רַחֲמָנָא*) which is spread over the pages of the OT fully bears out this expectation. The almighty Maker of all that is is represented equally as the irresistible Ruler of all that He has made: Jehovah sits as King for ever (Ps 29¹⁰). Even the common language of life was affected by this pervasive point of view, so that, for example, it is rare to meet with such a phrase as 'it rains' (Am 4⁷), and men by preference spoke of God sending rain (Ps 65⁹, Job 36²⁷ 38²⁸). The vivid sense of dependence on God thus witnessed extended throughout every relation of life. Accident or chance was excluded. If we read here and there of a *קָדַשׁ* it is not thought of as happening apart from God's direction (Ru 2⁸, 1 S 6⁹ 20²⁶, Ec 2¹⁴, cf. 1 K 22³⁴, 2 Ch 18³³), and accordingly the lot was an accepted means of ob-

taining the decision of God (Jos 7¹⁶ 14² 18², 1 S 10¹⁹, Jon 1⁷), and is didactically recognized as under His control (Pr 16³³). All things without exception, indeed, are disposed by Him, and His will is the ultimate account of all that occurs. Heaven and earth and all that is in them are the instruments through which He works His ends. Nature, nations, and the fortunes of the individual alike present in all their changes the transcript of His purpose. The winds are His messengers, the flaming fire His servant: every natural occurrence is His act: prosperity is His gift, and if calamity falls upon man it is the Lord that has done it (Am 3⁶, La 3³²⁻³³, Is 47⁷, Ec 7¹⁴, Is 54¹⁶). It is He that leads the feet of men, wit they whither or not; He that raises up and casts down; opens and hardens the heart; and creates the very thoughts and intents of the soul. So poignant is the sense of His activity in all that occurs, that an appearance is sometimes created as if everything that comes to pass were so ascribed to His immediate production as to exclude the real activity of second causes. It is a grave mistake, nevertheless, to suppose that He is conceived as an unseen power, throwing up, in a quasi-Pantheistic sense, all changes on the face of the world and history. The virile sense of the free personality of God which dominates all the thought of the OT would alone have precluded such a conception. Nor is there really any lack of recognition of 'second causes,' as we call them. They are certainly not conceived as independent of God: they are rather the mere expression of His stated will. But they are from the beginning fully recognized, both in nature—with respect to which Jehovah has made covenant (Gn 8²¹⁻²², Jer 31³⁵⁻³⁶ 33²⁰⁻²², Ps 148⁹, cf. Jg 5², Ps 104⁷, Job 38¹⁰⁻³³ 14⁵), establishing its laws (מִשְׁפָּטֵי Job 28²³⁻²⁸, Is 40¹², Job 38¹¹⁻¹², Pr 8²², Jer 5², Ps 104⁹ 33⁷, Jer 40²⁶)—and equally in the higher sphere of free spirits, who are ever conceived as the true authors of all their acts (hence God's proving of man, Gn 22¹, Ex 16⁴ 20²⁰, Dt 8²⁻¹⁶ 13³, Jg 3¹⁻⁴, 2 Ch 32²¹). There is no question here of the substitution of Jehovah's operation for that of the proximate causes of events. There is only the liveliest perception of the governing hand of God behind the proximate causes, acting through them for the working out of His will in every detail. Such a conception obviously looks upon the universe teleologically: an almighty moral Person cannot be supposed to govern His universe, thus in every detail, either unconsciously or capriciously. In His government there is necessarily implied a plan; in the all-pervasiveness and perfection of His government is inevitably implied an all-inclusive and perfect plan: and this conception is not seldom explicitly developed (cf. art. PROVIDENCE).

It is abundantly clear on the face of it, of course, that this whole mode of thought is the natural expression of the deep religious consciousness of the OT writers, though surely it is not therefore to be set aside as 'merely' the religious view of things, or as having no other rooting save in the imagination of religiously-minded men. In any event, however, it is altogether natural that in the more distinctive sphere of the religious life its informing principle of absolute dependence on God should be found to repeat itself. This appears particularly in the OT doctrine of faith, in which there sounds the keynote of OT piety.—for the religion of the OT, so far from being, as Hegel, for example, would affirm, the religion of fear, is rather by way of eminence the religion of trust. Standing over against God, not merely as creatures, but as sinners, the OT saints found no ground of hope save in the free initiative of the Divine love. At no period of the development of OT religion was it permitted to be imagined that blessings might be wrung from the hands of an unwilling God, or gained in the strength of man's own arm. Rather it was ever inculcated that in this sphere, too, it is God alone that lifts up and makes rich, He alone that keeps the feet of His holy ones; while by strength, it is affirmed, no man shall prevail (1 S 2⁹). 'I am not worthy of the least of all thy mercies' is the constant refrain of the OT saints (Gn 32¹⁰); and from the very beginning, in narrative, precept and prophetic declaration alike, it is in trust in the

unmerited love of Jehovah alone that the hearts of men are represented as finding peace. Self-sufficiency is the characteristic mark of the wicked, whose doom treads on his heels; while the mark of the righteous is that he lives by his faith (Hab 2⁴). In the entire self-commitment to God, humble dependence on Him for all blessings, which is the very core of OT religion, no element is more central than the profound conviction embodied in it of the free sovereignty of God, the God of the spirits of all flesh, in the distribution of His mercies. The whole training of Israel was directed to impressing upon it the great lesson enunciated to Zerubbabel, 'Not by might, nor by power, but by my Spirit, saith the Lord of hosts' (Zec 4⁶)—that all that comes to man in the spiritual sphere, too, is the free gift of Jehovah (cf. art. FAITH).

Nowhere is this lesson more persistently emphasized than in the history of the establishment and development of the kingdom of God, which may well be called the cardinal theme of the OT. For the kingdom of God is consistently represented, not as the product of man's efforts in seeking after God, but as the gracious creation of God Himself. Its inception and development are the crowning manifestation of the free grace of the Living God working in history in pursuance of His loving purpose to recover fallen man to Himself. To this end He preserves the race in existence after its sin, saves a seed from the destruction of the Flood, separates to Himself a family in Abraham, sifts it in Isaac and Jacob, nurses and trains it through the weakness of its infancy, and gradually moulds it to be the vehicle of His revelation of redemption, and the channel of Messianic blessings to the world. At every step it is God, and God alone, to whom is ascribed the initiative; and the most extreme care is taken to preserve the recipient of the blessings consequent on His choice from fancying that these blessings come as their due, or as reward for aught done by themselves, or to be found in themselves. They were rather in every respect emphatically not a people of their own making, but a people that God had formed that they might set forth His praise (Is 43²³). The strongest language, the most astonishing figures, were employed to emphasize the pure sovereignty of the Divine action at every stage. It was not because Israel was numerous, or strong, or righteous, that He chose it, but only because it pleased Him to make of it a people for Himself. He was as the potter, it was as the clay which the potter moulds as he will; it was but as the helpless babe in its blood cast out to die, abhorred of man, which Jehovah strangely gathers to His bosom in unmerited love (Gn 12¹⁻³, Dt 7⁷⁻⁸ 9⁴ 10¹⁵ 16, 1 S 12²², Is 41⁸⁻⁹ 43²⁰ 48⁹⁻¹¹, Jer 18¹ 31², Hos 2²⁰, Mal 12³). There was no element in the religious consciousness of Israel more poignantly realized, as there was no element in the instruction they had received more insisted on, than that they owed their separation from the peoples of the earth to be the Lord's inheritance, and all the blessings they had as such received from Jehovah, not to any claim upon Him which they could urge, but to His own gracious love faithfully persisted in in spite of every conceivable obstacle (cf. art. KINGDOM OF GOD).

In one word, the sovereignty of the Divine will as the principle of all that comes to pass, is a primary postulate of the whole religious life, as well as of the entire world-view of the OT. It is implicated in its very idea of God, its whole conception of the relation of God to the world and to the changes which take place, whether in nature or history, among the nations or in the life-fortunes of the individual; and also in its entire scheme of religion, whether national or personal. It lies at the basis of all the religious emotions, and lays the foundation of the specific type of religious character built up in Israel.

2. *Cosmical Predestination in OT.*—The specific teaching of OT as to predestination naturally revolves around the two foci of that idea which may be designated general and special, or, more properly, cosmical and soteriological predestination; or, in other words, around the doctrines of the Divine Decree and the Divine Election. The former, as was to be expected, is comparatively seldom adverted to—for the OT is fundamentally a soteriological book, a revelation of the grace of God to sinners; and it is only at a somewhat late period that it is made the subject of speculative discussion. But as it is implied in the primordial idea of God as an Almighty Person, it is postulated from the beginning and continually finds more or less clear expression. Throughout the OT, behind the processes of nature, the march of history and the fortunes of each individual life alike, there is steadily kept in view the governing hand of God working out His preconceived plan—a plan broad enough to embrace the whole universe of things, minute enough to concern itself with the smallest details, and actualizing itself with inevitable certainty in every event that comes to pass.

Naturally, there is in the narrative portions but

little formal enunciation of this pervasive and all-controlling Divine teleology. But despite occasional anthropomorphisms of rather startling character (as, e.g., that which ascribes 'repentance' to God, Gn 6⁸, Jl 2¹³, Jon 4², Jer 18⁸, 10 26^{2, 13}), or rather, let us say, just because of the strictly anthropomorphic mould in which the OT conception of God is run, according to which He is ever thought of as a personal spirit, acting with purpose like other personal spirits, but with a wisdom and in a sovereignty unlike that of others because infinitely perfect, these narrative portions of the OT also bear continual witness to the universal OT teleology. There is no explicit statement in the narrative of the creation, for example, that the mighty Maker of the world was in this process operating on a preconceived plan; but the teleology of creation lies latent in the orderly sequence of its parts, culminating in man for whose advent all that precedes is obviously a preparation, and is all but expressed in the Divine satisfaction at each of its stages, as a manifestation of His perfections (cf. Ps 104³¹). Similarly, the whole narrative of the Bk. of Genesis is so ordered—in the succession of creation, fall, promise, and the several steps in the inauguration of the kingdom of God—as to throw into a very clear light the teleology of the whole world-history, here written from the Divine standpoint and made to centre around the developing Kingdom. In the detailed accounts of the lives of the patriarchs, in like manner, behind the external occurrences recorded there always lies a Divine ordering which provides the real plot of the story in its advance to the predetermined issue. It was not accident, for example, that brought Rebecca to the well to welcome Abraham's servant (Gn 24), or that sent Joseph into Egypt (Gn 45⁸ 50²⁰; 'God meant [מָצָא] it for good'), or guided Pharaoh's daughter to the ark among the flags (Ex 2), or that, later, directed the millstone that crushed Abimelech's head (Jg 9⁵³), or winged the arrow shot at a venture to smite the king in the joints of the harness (1 K 22³⁴). Every historical event is rather treated as an item in the orderly carrying out of an underlying Divine purpose; and the historian is continually aware of the presence in history of Him who gives even to the lightning a charge to strike the mark (Job 36³²).

In the Psalmists and Prophets there emerges into view a more abstract statement of the government of all things according to the good pleasure of God (Ps 33¹¹, Jer 10¹² 51¹³). All that He wills He does (Ps 115³ 135⁶), and all that comes to pass has pre-existed in His purpose from the indefinite past of eternity ('long ago' Is 22¹¹, 'of ancient times' Is 37²⁸ = 1 K 19²⁸), and it is only because it so pre-existed in purpose that it now comes to pass (Is 14^{24, 27} 46¹¹, Zec 1⁸, Job 42², Jer 23²⁰, Jon 1¹⁴, Is 40¹⁰). Every day has its ordained events (Job 14⁸, Ps 139¹⁶). The plan of God is universal in its reach, and orders all that takes place in the interests of Israel—the OT counterpart to the NT declaration that all things work together for good to those that love God. Nor is it merely for the national good of Israel that God's plan has made provision; He exercises a special care over every one of His people (Job 5¹⁸, Ps 91. 121. 63³ 37. 27^{10, 11} 139¹⁶, Jon 3⁸, Is 4³, Dn 12¹). Isaiah especially is never weary of emphasizing the universal teleology of the Divine operations and the surety of the realization of His eternal purpose, despite the opposition of every foe (14²⁴⁻²⁷ 31² 40¹³ 58⁸⁻¹¹)—whence he has justly earned the name of the prophet of the Divine sovereignty, and has been spoken of as the Paul, the Augustine, the Calvin of the OT.

It is, however, especially in connexion with the OT doctrine of the Wisdom (חָכְמָה) of God, the chief depository of which is the so-called *Hokhmah* litera-

ture, that the idea of the all-inclusive Divine purpose (מְצָאָה and מְצָאָה) in which lies predetermined the whole course of events—including every particular in the life of the world (Am 3⁷) and in the life of every individual as well (Ps 139¹⁴⁻¹⁶, Jg 1⁵)—is speculatively wrought out. According to this developed conception, God, acting under the guidance of all His ethical perfections, has, by virtue of His eternal wisdom, which He 'possessed in the beginning of his way' (Pr 8²³), framed 'from everlasting, from the beginning,' an all-inclusive plan embracing all that is to come to pass; in accordance with which plan He now governs His universe, down to the least particular, so as to subserve His perfect and unchanging purpose. Everything that God has brought into being, therefore, He has made for its specific end (Pr 16⁴, cf. 3^{10, 20}, Job 28²³ 38. 41, Is 40¹², Jer 10^{12, 13}); and He so governs it that it shall attain its end,—no chance can escape (Pr 16²³), no night or subtlety defeat His direction (Pr 21^{30, 31} 19³¹ 16⁹, cf. Is 14^{24, 27}, Jer 10²³), which leads straight to the goal appointed by God from the beginning and kept steadily in view by Him, but often hidden from the actors themselves (Pr 20⁴, cf. 3⁸ 16¹⁻² 19²¹, Job 38² 42³, Jer 10²³), who naturally in their weakness cannot comprehend the sweep of the Divine plan or understand the place within it of the details brought to their observation—a fact in which the OT sages constantly find their theodicy. No different doctrine is enunciated here from that which meets us in the Prophets and Psalmists,—only it is approached from a philosophical-religious rather than from a national-religious view-point. To prophet and sage alike the entire world—inanimate, animate, moral—is embraced in a unitary teleological world-order (Ps 19²³ 33⁶ 104²⁴ 148⁸, Job 9⁴ 12¹³ 37); and to both alike the central place in this comprehensive world-order is taken by God's redemptive purpose, of which Israel is at once the object and the instrument, while the savour of its saltiness is the piety of the individual saint. The classical term for this all-inclusive Divine purpose (מְצָאָה) is accordingly found in the usage alike of prophet, psalmist, and sage,—now used absolutely of the universal plan on which the whole world is ordered (Job 38² 42³, cf. Delitzsch and Budde, *in loc.*), now, with the addition of 'of Jehovah,' of the all-comprehending purpose, embracing all human actions (Pr 19²¹ and parallels; cf. Toy, *in loc.*), now with explicit mention of Israel as the centre around which its provisions revolve (Ps 33¹¹ 107¹¹, cf. Delitzsch, *in loc.*; Is 14²⁸ 25¹ 46^{10, 11}), and anon with more immediate concern with some of the details (Ps 106¹³, Is 5¹⁸ 19¹⁷, Jer 49³⁰ 50⁴⁸, Mic 4¹²).

There seems no reason why a Platonizing colouring should be given to this simple attributing to the eternal God of an eternal plan in which is predetermined every event that comes to pass. This used to be done, e.g., by Delitzsch (see, e.g., on Job 28²⁸⁻²⁹, Is 22¹¹; *Biblical Psychology*, i. ii.), who was wont to attribute to the Biblical writers, especially of the *Hokhmah* and the latter portion of Isaiah, a doctrine of the pre-existence of all things in an ideal world, conceived as standing eternally before God at least as a pattern if not even as a quasi-objective mould imposing their forms on all His creatures, which smacked more of the Greek Academics than of the Hebrew sages. As a matter of course, the Divine mind was conceived by the Hebrew sages as eternally contemplating all possibilities, and we should not do them injustice in supposing them to think of its 'ideas' as the *causa exemplaris* of all that occurs, and of the Divine intellect as the *principium dirigens* of every Divine operation. But it is more to the point to note that the conceptions of the OT writers in regard to the Divine decree run rather into the moulds of 'purpose' than of 'ideas,' and that the roots of their teaching are planted not in an abstract idea of the Godhead, but in the purity of their concrete theism. It is because they think of God as a person, like other persons purposeful in His acts, but unlike other persons all-wise in His planning and all-powerful in His performing, that they think of Him as predetermining all that shall come to pass in the universe, which is in all its elements the product of His free activity, and which must in its form and all its history, down to the least detail, correspond with His purpose in making it. It is easy, on the other hand, to attribute too little 'philosophy' to the Biblical writers. The conception

of God in His relation to the world which they develop is beyond question anthropomorphic; but it is no unreflecting anthropomorphism that they give us. Apart from all question of revelation, they were not children prattling on subjects on which they had expended no thought; and the world-view they commend to us certainly does not lack in profundity. The subtleties of language of a developed scholasticism were foreign to their purposes and modes of composition, but they tell us as clearly as, say, Spanheim himself (*Decad. Theol.* vi. § 5), that they are dealing with a purposing mind exalted so far above ours that we can follow its movements only with halting steps,—whose thoughts are not as our thoughts, and whose ways are not as our ways (Is 55⁹; cf. 40^{13, 28, 28²⁹}, Job 11⁷, Ps 92⁶ 139¹⁴, 147⁵, Ec 3¹¹). Least of all in such a theme as this were they liable to forget that infinite exaltation of God which constituted the basis on which their whole conception of God rested.

Nor may they be thought to have been indifferent to the relations of the high doctrine of the Divine purpose they were teaching. There is no scholastic determination here either; but certainly they write without embarrassment as men who have attained a firm grasp upon their fundamental thought and have pursued it with clearness of thinking, no less in its relations than in itself; nor need we go astray in apprehending the outlines of their construction. It is quite plain, for example, that they felt no confusion with respect to the relation of the Divine purpose to the Divine foreknowledge. The notion that the almighty and all-wise God, by whom all things were created, and through whose irresistible control all that occurs fulfils the appointment of His primal plan, could govern Himself according to a foreknowledge of things which—perhaps apart from His original purpose or present guidance—might haply come to pass, would have been quite contradictory to their most fundamental conception of God as the almighty and all-sovereign Ruler of the universe, and, indeed, also of the whole OT idea of the Divine foreknowledge itself, which is ever thought of in its due relation of dependence on the Divine purpose. According to the OT conception, God foreknows only because He has pre-determined, and it is therefore also that He brings it to pass; His foreknowledge, in other words, is at bottom a knowledge of His own will, and His works of providence are merely the execution of His all-embracing plan. This is the truth that underlies the somewhat incongruous form of statement of late becoming rather frequent, to the effect that God's foreknowledge is conceived in the OT as 'productive.' Dillmann, for example, says (*AT Theologie*, p. 251): 'His foreknowledge of the future is a productive one; of an otiose foreknowledge or of a *proscientia media* . . . there is no suggestion.' In the thought of the OT writers, however, it is not God's foreknowledge that produces the events of the future; it is His irresistible providential government of the world He has created for Himself; and His foreknowledge of what is yet to be rests on His pre-arranged plan of government. His 'productive foreknowledge' is but a transcript of His will, which has already determined not only the general plan of the world, but every particular that enters into the whole course of its development (Am 3⁷, Job 22^{6, 27}), and every detail in the life of every individual that comes into being (Jer 1⁹, Ps 139¹⁴⁻¹⁶, Job 23^{13, 14}).

That the acts of free agents are included in this 'productive foreknowledge,' or rather in this all-inclusive plan of the life of the universe, created for the OT writers apparently not the least embarrassment. This is not because they did not believe man to be free,—throughout the whole OT there is never the least doubt expressed of the freedom or moral responsibility of man,—but because they did believe God to be free, whether in His works of creation or of providence, and could not believe He was hampered or limited in the attainment of His ends by the creatures of His own hands. How God governs the acts of free agents in the pursuance of His plan there is little in the OT to inform us; but that He governs them in even their most intimate thoughts and feelings and impulses is its unvarying assumption: He is not only the creator of the hearts of men in the first instance, and knows them altogether, but He fashions the hearts of all in all the changing circumstances of life (Ps 33¹⁵); forms the spirit of man within him in all its motions (Zec 12¹); keeps the hearts of men in His hands, turning them whithersoever He will (Pr 21¹); so that it is even said that man knows what is in his own mind only as the Lord reveals it to him (Am 4¹³). The discussion of any antinomy that may be thought to arise from such a joint assertion of the absolute rule of God in the sphere of the spirit and the freedom of the creaturely will, falls obviously under the topic of Providential Government rather than under that of the Decree (see PROVIDENCE); it requires to be adverted to here only that we may clearly note the fact that the OT teachers, as they did not hesitate to affirm the absolute sway of God over the thoughts and intents of the human heart, could feel no embarrassment in the inclusion of the acts of free agents within the all-embracing plan of God, the outworking of which His providential government supplies.

Nor does the moral quality of these acts present any apparent difficulty to the OT construction. We are never permitted to imagine, to be sure, that God is the author of sin, either in the world at large or in any individual soul—that He is in any way implicated in the sinfulness of the acts performed by the perverse misuse of creaturely freedom. In all God's working He shows Himself pre-eminent the Holy One, and prosecutes His holy will, His righteous way, His all-wise plan; the blame for all sinful deeds rests exclusively on the creaturely actors (Ex 32⁷ 10¹⁶), who recognize their own guilt (2 S 24^{10, 17}) and receive its punishment (Ec 11⁹ compared with 11⁵). But neither is God's relation to the sinful acts of His creatures ever repre-

sented as purely passive: the details of the doctrine of *concursum* were left, no doubt, to later ages speculatively to work out, but its assumption underlies the entire OT representation of the Divine modes of working. That anything—good or evil—occurs in God's universe finds its account, according to the OT conception, in His positive ordering and active concurrence; while the moral quality of the deed, considered in itself, is rooted in the moral character of the subordinate agent, acting in the circumstances and under the motives operative in each instance. It is certainly going beyond the OT warrant to speak of the 'all-productivity of God,' as if He were the only efficient cause in nature and the sphere of the free spirit alike; it is the very delirium of misconception to say that in the OT God and Satan are insufficiently discriminated, and deeds appropriate to the latter are assigned to the former. Nevertheless, it remains true that even the evil acts of the creature are so far carried back to God that they too are affirmed to be included in His all-embracing decree, and to be brought about, bounded and utilized in His providential government. It is He that hardens the heart of the sinner that persists in his sin (Ex 42⁷ 73^{10, 17} 14⁴ 14⁸, Dt 2³⁰, Jos 11²⁰, Is 69¹⁰ 63¹⁷); it is from Him that the evil spirits proceed that trouble sinners (1 S 16¹⁴, Jg 9²³, 1 K 22, Job 1); it is of Him that the evil impulses that rise in sinners' hearts take this or that specific form (2 S 16⁹ 24¹, 1 K 12¹⁰). The philosophy that lies behind such representations, however, is not the pantheism which looks upon God as the immediate cause of all that comes to pass; much less the pandemonism which admits no distinction between good and evil; there is not even involved a conception of God entangled in an undeveloped ethical discrimination. It is the philosophy that is expressed in Is 47⁵ 'I am the LORD, and there is none else; beside me there is no God. . . . I am the LORD, and there is none else. I form the light and create darkness; I make peace and create evil; I am the LORD that doeth all these things'; it is the philosophy that is expressed in Pr 16⁴ 'The LORD hath made everything for its own end, yea, even the wicked for the day of evil.' Because, over against all dualistic conceptions, there is but one God, and He is indeed God; and because, over against all cosmoeistic conceptions, this God is a PERSON who acts purposefully; there is nothing that is, and nothing that comes to pass, that He has not first decreed and then brought to pass by His creation or providence. Thus all things find their unity in His eternal plan; and not their unity merely, but their justification as well; even the evil, though retaining its quality as evil and hateful to the holy God, and certain to be dealt with as hateful, yet does not occur apart from His provision or against His will, but appears in the world which He has made only as the instrument by means of which He works the higher good.

This sublime philosophy of the decree is immanent in every page of the OT. Its metaphysics never come to explicit discussion, to be sure; but its elements are in a practical way postulated consistently throughout. The ultimate end in view in the Divine plan is ever represented as found in God alone; all that He has made He has made for Himself, to set forth His praise; the heavens themselves with all their splendid furniture exist but to illustrate His glory; the earth and all that is in it, and all that happens in it, to declare His majesty; the whole course of history is but the theatre of His self-manifestation, and the events of every individual life indicate His nature and perfections. Men may be unable to understand the place which the incidents, as they unroll themselves before their eyes, take in the developing plot of the great drama; they may, nay, must, therefore stand astonished and confounded before this or that which befalls them or befalls the world. Hence arise to them problems—the problem of the petty, the problem of the inexplicable, the problem of suffering, the problem of sin (e.g. Ec 11⁵). But, in the infinite wisdom of the Lord of all the earth, each event falls with exact precision into its proper place in the unfolding of His eternal plan; nothing, however small, however strange, occurs without His ordering, or without its peculiar fitness for its place in the working out of His purpose; and the end of all shall be the manifestation of His glory, and the accumulation of His praise. This is the OT philosophy of the universe—a world-view which attains concrete unity in an absolute Divine teleology, in the compactness of an eternal decree, or purpose, or plan, of which all that comes to pass is the development in time.

3. *Soteriological Predestination in OT.*—Special or Soteriological Predestination finds a natural place in the OT system as but a particular instance of the more general fact, and may be looked upon as only the general OT doctrine of predestination applied to the specific case of the salvation of sinners. But as the OT is a distinctively religious book, or, more precisely, a distinctively soteriological book, that is to say, a record of the gracious dealings and purposes of God with sinners, soteriological predestination naturally takes a more prominent place in it than the general doctrine itself, of which it is a particular application. Indeed, God's saving work is thrown out into such prominence, the OT is so specially a record of the establishment of the kingdom of God in the world, that we easily get

the impression in reading it that the core of God's general decree is His decree of salvation, and that His whole plan for the government of the universe is subordinated to His purpose to recover sinful man to Himself. Of course there is some slight illusion of perspective here, the materials for correcting which the OT itself provides, not only in more or less specific declarations of the relative unimportance of what befalls man, whether the individual, or Israel, or the race at large, in comparison with the attainment of the Divine end; and of the wonder of the Divine grace concerning itself with the fortunes of man at all (Job 22³¹, 35⁴, 38, Ps 8⁴): but also in the general disposition of the entire record, which places the complete history of sinful man, including alike his fall into sin and all the provisions for his recovery, within the larger history of the creative work of God, as but one incident in the greater whole, governed, of course, like all its other parts, by its general teleology. Relatively to the OT record, nevertheless, as indeed to the Biblical record as a whole, which is concerned directly only with God's dealings with humanity, and that, especially, a sinful humanity (Gn 3⁹ 6⁵ 8²¹, Lv 18²⁴, Dt 9⁴, 1 K 8⁴⁶, Ps 14¹ 51⁵ 130³ 143³, Pr 20⁹, Ec 7²⁰, Is 1⁴, Hos 4¹, Job 15¹⁴ 25⁴ 14¹), soteriological predestination is the prime matter of importance; and the doctrine of election is accordingly thrown into relief, and the general doctrine of the decree more incidentally adverted to. It would be impossible, however, that the doctrine of election taught in the OT should follow other lines than those laid down in the general doctrine of the decree,—or, in other words, that God should be conceived as working in the sphere of grace in a manner that would be out of accord with the fundamental conception entertained by these writers of the nature of God and His relations to the universe.

Accordingly, there is nothing concerning the Divine election more sharply or more steadily emphasized than its graciousness, in the highest sense of that word, or, in other terms, its absolute sovereignty. This is plainly enough exhibited even in the course of the patriarchal history, and that from the beginning. In the very hour of man's first sin, God intervenes *sua sponte* with a gratuitous promise of deliverance; and at every stage afterwards the sovereign initiation of the grace of God—the Lord of the whole earth (Ex 19⁶)—is strongly marked, as God's universal counsel of salvation is more and more unfolded through the separation and training of a people for Himself, in whom the whole world should be blessed (Gn 12³ 18¹⁸ 22¹⁸ 26⁴ 28¹⁴): for from the beginning it is plainly indicated that the whole history of the world is ordered with reference to the establishment of the kingdom of God (Dt 32⁸, where the reference seems to be to Gn 11). Already in the opposing lines of Seth and Cain (Gn 4²⁵⁻²⁶) a discrimination is made; Noah is selected as the head of a new race, and among his sons the preference is given to Shem (Gn 9²⁵), from whose line Abraham is taken. Every fancy that Abraham owed his calling to his own desert is carefully excluded,—he was 'known' of God only that in him God might establish His kingdom (Gn 18¹⁹); and the very acme of sovereignty is exhibited (as St. Paul points out) in the subsequent choice of Isaac and Jacob, and exclusion of Ishmael and Esau; while the whole Divine dealing with the patriarchs—their separation from their kindred, removal into a strange land, and the like—is evidently understood as intended to cast them back on the grace of God alone. Similarly, the covenant made with Israel (Ex 19-24) is constantly assigned to the sole initiative of Divine grace, and the fact of election is therefore appropriately set

at the head of the Decalogue (Ex 20²; cf. 34⁶⁻⁷); and Israel is repeatedly warned that there was nothing in it which moved or could move God to favour it (e.g. Dt 4⁷ 7⁸ 8¹⁷ 9⁴ 10¹¹, Ezk 16¹, Am 9⁷). It has already been pointed out by what energetic figures this fundamental lesson was impressed on the Israelitish consciousness, and it is only true to say that no means are left unused to drive home the fact that God's gracious election of Israel is an absolutely sovereign one, founded solely in His unmerited love, and looking to nothing ultimately but the gratification of His own holy and loving impulses, and the manifestation of His grace through the formation of a heritage for Himself out of the mass of sinful men, by means of whom His saving mercy should advance to the whole world (Ps 8⁷, Is 40. 42. 60, Mic 4¹, Am 4¹³ 5⁸, Jer 31⁷, Ezk 17²² 36²¹, Jl 2²⁸). The simple terms that are employed to express this Divine selection—'know' (יָדָע), 'choose' (בָּחַר)—are either used in a pregnant sense, or acquire a pregnant sense by their use in this connexion. The deeper meaning of the former term is apparently not specifically Hebrew, but more widely Semitic (it occurs also in Assyrian; see the *Dictionaries* of Delitzsch and Muss-Arnolt *sub voc.*, and especially Haupt in *Beiträge zur Assyriologie*, i. 14, 15), and it can create no surprise, therefore, when it meets us in such passages as Gn 18¹⁹ (cf. Ps 37¹⁸ and also 1⁶ 31⁸; cf. Baethgen and Delitzsch *in loc.*), Hos 13⁵ (cf. Wünsche *in loc.*) in something of the sense expressed by the scholastic phrase, *nosse cum affectu et effectu*; while in the great declaration of Am 3² (cf. Baur and Gunning *in loc.*), 'You only have I known away from all the peoples of the earth,' what is thrown prominently forward is clearly the elective love which has singled Israel out for special care. More commonly, however, it is בָּחַר that is employed to express God's sovereign election of Israel: the classical passage is, of course, Dt 7⁶⁻⁷ (see Driver *in loc.*, as also, of the love underlying the 'choice,' at 4³⁷ 7⁸), where it is carefully explained that it is in contrast with the treatment accorded to all the other peoples of the earth that Israel has been honoured with the Divine choice, and that the choice rests solely on the unmerited love of God, and finds no foundation in Israel itself. These declarations are elsewhere constantly enforced (e.g. 4³⁷ 10¹⁵ 14²), with the effect of throwing the strongest possible emphasis on the complete sovereignty of God's choice of His people, who owe their 'separation' unto Jehovah (Lv 20²⁴⁻²⁶, 1 K 8³³) wholly to the wonderful love of God, in which He has from the beginning taken knowledge of and chosen them.

It is useless to seek to escape the profound meaning of this fundamental OT teaching by recalling the undeveloped state of the doctrine of a future life in Israel, and the national scope of its election,—as if the sovereign choice which is so insisted on could thus be confined to the choice of a people as a whole to certain purely earthly blessings, without any reference whatever to the eternal destiny of the individuals concerned. We are here treading very close to the abyss of confusing progress in the delivery of doctrine with the reality of God's saving activities. The cardinal question, after all, does not concern the extent of the knowledge possessed by the OT saints of the nature of the blessedness that belongs to the people of God; nor yet the relation borne by the election within the election, by the real Israel forming the heart of the Israel after the flesh, to the external Israel: it concerns the existence of a real kingdom of God in the OT dispensation, and the methods by which God introduced man into it. It is true enough that the theocracy was an earthly kingdom, and that a prominent place was given to the promises of the life that now is in the blessings assured to Israel; and it is in this engrossment with earthly happiness and the close connexion of the friendship of God with the enjoyment of worldly goods that the undeveloped state of the OT doctrine of salvation is especially apparent. But it should not be forgotten that the promise of earthly gain to the people of God is not entirely alien to the NT idea of salvation (Mt 6³⁷, 1 Ti 4⁸), and that it is in no sense true that in the OT teaching, in any of its stages, the blessings of the kingdom were summed up in worldly happiness. The covenant blessing is rather

declared to be *life*, inclusive of all that that comprehensive word is fitted to convey (Dt 30¹⁵; cf. 41 31, Pr 12²⁸ 833); and it found its best expression in the high conception of 'the favour of God' (Lv 26¹¹, Ps 48 102.3 638); while it concerned itself with earthly prosperity only as and so far as that is a pledge of the Divine favour. It is no false testimony to the OT saints when they are described as looking for the city that has the foundations and as enduring as seeing the Invisible One: if their hearts were not absorbed in the contemplation of the eternal future, they were absorbed in the contemplation of the Eternal Lord, which certainly is something even better; and the representation that they found their supreme blessedness in outward things runs so grossly athwart their own testimony that it fairly deserves Calvin's terrible invective, that thus the Israelitish people are thought of not otherwise than as a 'sort of herd of swine which (so, forsooth, it is pretended) the Lord was fattening in the pen of this world' (*Inst.* ii. x. 1). And, on the other hand, though Israel as a nation constituted the chosen people of God (1 Ch 16¹³, Ps 89 106¹³ 106²), yet we must not lose from sight the fact that the nation as such was rather the symbolical than the real people of God, and was His people at all, indeed, only so far as it was, ideally or actually, identified with the inner body of the really 'chosen'—that people whom Jehovah formed for Himself that they might set forth His praise (Is 43¹⁰ 65¹⁵ 22), and who constituted the real people of His choice, the 'remnant of Jacob' (Is 61³, Am 9⁸⁻¹⁰, Mal 3¹⁰, cf. 1 K 19¹⁸, Is 61¹⁸). Nor are we left in doubt as to how this inner core of actual people of God was constituted; we see the process in the call of Abraham, and the discrimination between Isaac and Ishmael, between Jacob and Esau, and it is no false testimony that it was ever a 'remnant according to the election of grace' that God preserved to Himself as the salt of His people Israel. In every aspect of it alike, it is the sovereignty of the Divine choice that is emphasized,—whether the reference be to the segregation of Israel as a nation to enjoy the earthly favour of God as a symbol of the true entrance into rest, or the choice of a remnant out of Israel to enter into that real communion with Him which was the joy of His saints,—of Enoch who walked with God (Gn 5²²), of Abraham who found in Him his exceeding great reward (Gn 15¹), or of David who saw no good beyond Him, and sought in Him alone his inheritance and his cup. Later times may have enjoyed fuller knowledge of what the grace of God had in store for His saints—whether in this world or that which is to come; later times may have possessed a clearer apprehension of the distinction between the children of the flesh and the children of the promise: but no later teaching has a stronger emphasis for the central fact that it is of the free grace of God alone that any enter in any degree into the participation of His favour. The kingdom of God, according to the OT, in every circle of its meaning, is above and before all else a stone cut out of the mountain 'without hands' (Dn 2³⁴ 44 46).

iii. PREDESTINATION AMONG THE JEWS.—The profound religious conception of the relation of God to the works of His hands that pervades the whole OT was too deeply engraved on the Jewish consciousness to be easily erased, even after growing legalism had measurably corroded the religion of the people. As, however, the idea of law more and more absorbed the whole sphere of religious thought, and piety came to be conceived more and more as right conduct before God instead of living communion with God, men grew naturally to think of God more and more as abstract unapproachableness, and to think of themselves more and more as their own saviours. The post-canonical Jewish writings, while retaining fervent expressions of dependence on God as the Lord of all, by whose wise counsel all things exist and work out their ends, and over against whom the whole world, with every creature in it, is but the instrument of His will of good to Israel, nevertheless threw an entirely new emphasis on the autocracy of the human will. This emphasis increases until in the later Judaism the extremity of heathen self-sufficiency is reproduced, and the whole sphere of the moral life is expressly reserved from Divine determination. Meanwhile also heathen terminology was intruding into Jewish speech. The Platonic *πρόνοια*, *προνοεῖν*, for example, coming in doubtless through the medium of the Stoa, is found not only in Philo (*πρόνοιας*), but also in the Apocryphal books (Wis 6⁷ 14³ 17², 3 Mac 4²¹ 5²⁰, 4 Mac 9²⁴ 13¹⁸ 17²; cf. also Dn 6¹⁸ 19 LXX); the perhaps even more precise as well as earlier *ἐποπά* occurs in Josephus (*BJ* ii. viii. 14), and indeed also in the LXX, though here doubtless in a weakened sense (2 Mac 12²² 15², cf. 3 Mac 2²¹, as

also Job 34²⁴ 28²⁴ 22¹³, cf. 21¹⁶; also Zec 9¹); while even the fatalistic term *εἰμαρμένη* is employed by Josephus (*BJ* ii. viii. 14; *Ant.* XIII. v. 9, XVIII. i. 3) to describe Jewish views of predestination. With the terms there came in, doubtless, more or less of the conceptions connoted by them.

Whatever may have been the influences under which it was wrought, however, the tendency of post-canonical Judaism was towards setting aside the Biblical doctrine of predestination to a greater or less extent, or in a larger or smaller sphere, in order to make room for the autocracy of the human will, the *מַשְׁלָט*, as it was significantly called by the Rabbis (*Bereshith Rabba*, c. 22). This disintegrating process is little apparent perhaps in the Book of Wisdom, in which the sense of the almightiness of God comes to very strong expression (11²³ 12⁸⁻¹²). Or even in Philo, whose predestinarianism (*de Legg. Allegor.* i. 15, iii. 24, 27, 28) closely follows, while his assertion of human freedom (*Quod Deus sit immut.* 10) does not pass beyond that of the Bible: man is separated from the animals and assimilated to God by the gift of 'the power of voluntary motion' and suitable emancipation from necessity, and is accordingly properly praised or blamed for his intentional acts; but it is of the grace of God only that anything exists, and the creature is not giver but receiver in all things; especially does it belong to God alone to plant and build up virtues, and it is impious for the mind, therefore, to say 'I plant'; the call of Abraham, Isaac, Jacob was of pure grace without any merit, and God exercises the right to 'dispose excellently,' prior to all actual deeds. But the process is already apparent in so early a book as Sirach. The book at large is indeed distinctly predestinarian, and such passages as 16²⁸⁻³⁰ 23³⁰ 33¹¹⁻¹³ 39³⁰ 21 echo the teachings of the canonical books on this subject. But, while this is its general character, another element is also present: an assertion of human autocracy, for example, which is without parallel in the canonical books, is introduced at 15¹¹⁻²⁰, which culminates in the precise declaration that 'man has been committed to the hand of his own counsel' to choose for himself life or death. The same phenomena meet us in the Pharisaic Psalms of Solomon (B.C. 70-40). Here there is a general recognition of God as the great and mighty King (2³⁴ 36) who has appointed the course of nature (18²⁰) and directs the development of history (2³⁴ 9¹⁷), ruling over the whole and determining the lot of each (5⁶ 18), on whom alone, therefore, can the hope of Israel be stayed (7³ 17²), and to whom alone can the individual look for good. But, alongside of this expression of general dependence on God, there occurs the strongest assertion of the moral autocracy of the human will: 'O God, our works are in our own souls' election and control, to do righteousness or iniquity in the works of our hand' (9⁷).

It is quite credible, therefore, when Josephus tells us that the Jewish parties of his day were divided, as on other matters, so on the question of the Divine predestination—the Essenes affirming that fate (*εἰμαρμένη*, Josephus) affected Grecizing expression for predestination) is the mistress of all, and nothing occurs to men which is not in accordance with its destination; the Sadducees taking away 'fate' altogether, and considering that there is no such thing, and that human affairs are not directed according to it, but all actions are in our own power, so that we are ourselves the causes of what is good, and receive what is evil from our own folly; while the Pharisees, seeking a middle ground, said that some actions, but not all, are the work of 'fate,' and some are in our own power as to whether they are done or

not (*Ant.* XIII. v. 9). The distribution of the several views among the parties follows the general lines of what might have been anticipated—the Essenic system being pre-eminently supernaturalistic, and the Sadducean rationalistic, while there was retained among the Pharisees a deep leaven of religious earnestness tempered, but not altogether destroyed (except in the extreme circles), by their ingrained legalism. The middle ground, moreover, which Josephus ascribes to the Pharisees in their attempt to distribute the control of human action between 'fate' and 'free will,' reflects not badly the state of opinion presupposed in the documents we have already quoted. In his remarks elsewhere (*BJ* II. viii. 14; *Ant.* XVIII. i. 3) he appears to ascribe to the Pharisees some kind of a doctrine of *concursum* also—a *κράσις* between 'fate' and the human will by which both co-operate in the effect; but his language is obscure, and is coloured doubtless by reminiscences of Stoic teaching, with which philosophical sect he compares the Pharisees as he compares the Essenes with the Epicureans.

But whatever may have been the traditional belief of the Pharisees, in proportion as the legalistic spirit which constituted the nerve of the movement became prominent, the sense of dependence on God, which is the vital breath of the doctrine of predestination, gave way. The Jews possessed the OT Scriptures in which the Divine lordship is a cardinal doctrine, and the trials of persecution cast them continually back upon God; they could not, therefore, wholly forget the Biblical doctrine of the Divine decree, and throughout their whole history we meet with its echoes on their lips. The laws of nature, the course of history, the varying fortunes of individuals, are ever attributed to the Divine predestination. Nevertheless, it was ever more and more sharply disallowed that man's moral actions fell under the same predetermination. Sometimes it was said that while the decrees of God were sure, they applied only so long as man remained in the condition in which he was contemplated when they were formed; he could escape all predetermined evil by a change in his moral character. Hence such sayings as, 'The righteous destroy what God decrees' (*Tanchuma* on *דברים*); 'Repentance, prayer, and charity ward off every evil decree' (*Rosh-hashana*). In any event, the entire domain of the moral life was more and more withdrawn from the intrusion of the decree; and Cicero's famous declaration, which Harnack says might be inscribed as a motto over Pelagianism, might with equal right be accepted as the working hypothesis of the later Judaism: 'For gold, land, and all the blessings of life we have to return thanks to God; but no one ever returned thanks to God for virtue' (*de Nat. Deorum*, iii. 36). We read that the Holy One determines prior to birth all that every one is to be—whether male or female, weak or strong, poor or rich, wise or silly; but one thing He does not determine—whether he is to be righteous or unrighteous; according to Dt 30¹⁵ this is committed to one's own hands. Accordingly, it is said that 'neither evil nor good comes from God; both are the results of our deeds' (*Midrash rab.* on *דברים*, and *Jalkut* there); and again, 'All is in the hands of God except the fear of God' (*Megilla* 25a); so that it is even somewhat cynically said, 'Man is led in the way in which he wishes to go' (*Maccoth* 10); 'If you teach him right, his God will make him know' (*Is* 28⁶; *Jerus. Challah* i. 1). Thus the deep sense of dependence on God for all goods, and especially the goods of the soul, which forms the very core of the religious consciousness of the writers of the Old Testament, gradually vanished from the later Judaism, and was super-

seded by a self-assertiveness which hung all good on the self-determination of the human spirit, on which the purposes of God waited, or to which they were subservient.

iv. PREDESTINATION IN NT.—The NT teaching starts from the plane of the OT revelation, and in its doctrines of God, Providence, Faith, and the Kingdom of God repeats or develops in a right line the fundamental deliverances of the OT, while in its doctrines of the Decree and of Election only such advance in statement is made as the progressive execution of the plan of salvation required.

1. *The Teaching of Jesus*.—In the teaching of our Lord, as recorded in the Synoptic Gospels, for example, though there is certainly a new emphasis thrown on the Fatherhood of God, this is by no means at the expense of His infinite majesty and might, but provides only a more profound revelation of the character of 'the great King' (Mt 5²⁰), the 'Lord of heaven and earth' (Mt 11²³, Lk 10²¹), according to whose good pleasure all that is comes to pass. He is spoken of, therefore, specifically as the 'heavenly Father' (Mt 5⁴⁸ 6¹⁴ 21. 22 15¹³ 18²³ 23⁹, cf. 5¹⁶ 45 6¹ 7¹¹ 21 10²² 23 12²⁰ 16¹⁷ 18¹⁴ 19, Mk 11²⁵ 28, Lk 11¹³) whose throne is in the heavens (Mt 5³⁴ 23²³), while the earth is but the footstool under His feet. There is no limitation admitted to the reach of His power, whether on the score of difficulty in the task, or insignificance in the object: the category of the impossible has no existence to Him 'with whom all things are possible' (Mt 9²⁶, Mk 10²⁷, Lk 18²⁷, Mt 22²⁹, Mk 12²⁴ 14³⁶), and the minutest occurrences are as directly controlled by Him as the greatest (Mt 10²⁹ 30, Lk 12⁷). It is from Him that the sunshine and rain come (Mt 5⁴⁵); it is He that clothes with beauty the flowers of the field (Mt 6²⁹), and who feeds the birds of the air (Mt 6²⁶); not a sparrow falls to the ground without Him, and the very hairs of our heads are numbered, and not one of them is forgotten by God (Mt 10²⁹, Lk 12⁷). There is, of course, no denial, nor neglect, of the mechanism of nature implied here; there is only clear perception of the providence of God guiding nature in all its operations, and not nature only, but the life of the free spirit as well (Mt 6⁶ 8¹³ 24²³ 7⁷, Mk 11²³). Much less, however, is the care of God thought of as mechanical and purposeless. It was not simply of sparrows that our Lord was thinking when He adverted to the care of the heavenly Father for them, as it was not simply for oxen that God was caring when He forbade them to be muzzled as they trod out the corn (1 Co 9⁹); it was that they who are of more value than sparrows might learn with what confidence they might depend on the Father's hand. Thus a hierarchy of providence is uncovered for us, circle rising above circle,—first the wide order of nature, next the moral order of the world, lastly the order of salvation or of the kingdom of God,—a preformation of the dogmatic schema of *providentia generalis, specialis, and specialissima*. All these work together for the one end of advancing the whole world-fabric to its goal; for the care of the heavenly Father over the works of His hand is not merely to prevent the world that He has made from falling into pieces, and not merely to preserve His servants from oppression by the evil of this world, but to lead the whole world and all that is in it onwards to the end which He has appointed for it,—to that *πρωτεύουσα* of heaven and earth to which, under His guiding hand, the whole creation tends (Mt 19²⁸, Lk 20³⁴).

In this divinely-led movement of 'this world' towards 'the world that is to come,' in which every element of the world's life has part, the central place is naturally taken by the spiritual preparation, or, in other words, by the develop-

ment of the Kingdom of God which reaches its consummation in the 'regeneration.' This Kingdom, our Lord explains, is the heritage of those blessed ones for whom it has been prepared from the foundations of the world (Mt 25³⁴, cf. 20²³). It is built up on earth through a 'call' (Mt 9¹², Mk 2¹⁷, Lk 5²⁹), which, however, as mere invitation is inoperative (Mt 22¹⁴, Lk 14¹⁶⁻²³), and is made effective only by the exertion of a certain 'constraint' on God's part (Lk 14²³),—so that a distinction emerges between the merely 'called' and the really 'chosen' (Mt 22¹⁴). The author of this 'choice' is God (Mk 13³⁰), who has chosen His elect (Lk 18⁷, Mt 24^{22, 24, 31}, Mk 13²⁰⁻²²) before the world, in accordance with His own pleasure, distributing as He will of what is His own (Mt 10^{14, 15}); so that the effect of the call is already predetermined (Mt 13), all providence is ordered for the benefit of the elect (Mt 24²²), and they are guarded from falling away (Mt 24³⁴), and, at the last day, are separated to their inheritance prepared for them from all eternity (Mt 25³⁴). That, in all this process, the initiative is at every point taken by God, and no question can be entertained of precedent merit on the part of the recipients of the blessings, results not less from the whole underlying conception of God in His relation to the course of providence than from the details of the teaching itself. Every means is utilized, however, to enhance the sense of the free sovereignty of God in the bestowment of His Kingdom; it is 'the lost' whom Jesus comes to seek (Lk 19¹⁰), and 'sinners' whom He came to call (Mk 2¹⁷); His truth is revealed only to 'babes' (Mt 11²⁵, Lk 10²¹), and He gives His teaching a special form just that it may be veiled from them to whom it is not directed (Mk 4¹¹), distributing His benefits, independently of merit (Mt 20¹⁻¹⁶), to those who had been chosen by God therefor (Mk 13²⁰).

In the discourses recorded by St. John the same essential spirit rules. Although, in accordance with the deeper theological apprehension of their reporter, the more metaphysical elements of Jesus' doctrine of God come here to fuller expression, it is nevertheless fundamentally the same doctrine of God that is displayed. Despite the even stronger emphasis thrown here on His Fatherhood, there is not the slightest obscuration of His infinite exaltation: Jesus lifts His eyes up when He would seek Him (11⁴¹ 17¹); it is in heaven that His house is to be found (14²); and thence proceeds all that comes from Him (1²² 3¹³ 6³¹ 32 23 26 41 49 50 6³⁸); so that God and heaven come to be almost equivalent terms. Nor is there any obscuration of His ceaseless activity in governing the world (5¹⁷), although the stress is naturally thrown, in accordance with the whole character of this Gospel, on the moral and spiritual side of this government. But the very essence of the message of the Johanneine Jesus is that the will (*θέλημα*) of the Father (4²¹ 5³⁰ 6^{38, 39, 40} 7¹⁷ 9³¹, cf. 3⁸ 5²¹ 17²⁴ 21^{22, 23}) is the principle of all things; and more especially, of course, of the introduction of eternal life into this world of darkness and death. The conception of the world as lying in the evil one and therefore judged already (3¹⁸), so that upon those who are not removed from the evil of the world the wrath of God is not so much to be poured out as simply abides (3³⁶, cf. 1 Jn 3¹⁴), is fundamental to this whole presentation. It is therefore, on the one hand, that Jesus represents Himself as having come not to condemn the world, but to save the world (3¹⁷ 8¹² 9⁶ 12⁴⁷, cf. 4⁴²), and all that He does as having for its end the introduction of life into the world (6^{33, 51}); the already condemned world needed no further condemnation, it needed saving. And it is for the same reason, on the other hand,

that He represents the wicked world as incapable of coming to Him that it might have life (8^{42, 43} 14¹⁷ 10²⁵), and as requiring first of all a 'drawing' from the Father to enable it to come (6^{44, 65}); so that only those hear or believe on Him who are 'of God' (8⁴⁷, cf. 15¹⁹ 17¹⁴), who are 'of his sheep' (16²⁸).

There is undoubtedly a strong emphasis thrown on the universality of Christ's mission of salvation; He has been sent into the world not merely to save some out of the world, but to save the world itself (3¹⁶ 6³¹ 12⁴⁷ 17²¹, cf. 1²⁹, 1 Jn 4¹⁴ 2²). But this universality of destination and effect by which it is 'the world' that is saved, does not imply the salvation of each and every individual in the world, even in the earlier stages of the developing salvation. On the contrary, the saving work is a process (17²⁰); and, meanwhile, the coming of the Son into the world introduces a crisis, a sifting by which those who, because they are 'of God,' 'of his sheep,' are in the world, but not of it (15¹⁹ 17¹⁴), are separated from those who are of the world, that is, of their father the devil (8⁴⁴), who is the Prince of this world (12³¹ 14³⁰ 16¹¹). Obviously, the difference between men that is thus manifested is not thought of as inhering, after a dualistic or semi-Gnostic fashion, in their very natures as such, or as instituted by their own self-framed or accidentally received dispositions, much less by their own conduct in the world, which is rather the result of it,—but, as already pointed out, as the effect of an act of God. All goes back to the will of God, to accomplish which, the Son, as the Sent One, has come; and therefore also to the consentient will of the Son, who gives life, accordingly, to whom He will (5²¹). As no one can come to Him out of the evil world, except it be given him of the Father (6⁶⁵, cf. 6⁴⁴), so all that the Father gives Him (6^{37, 39}) and only such (6⁶⁵), come to Him, being drawn thereunto by the Father (6⁴⁴). Thus the Son has 'his own in the world' (13¹), His 'chosen ones' (13¹⁸ 15^{16, 19}), whom by His choice He has taken out of the world (15¹⁹ 17^{6, 14, 16}); and for these only is His high-priestly intercession offered (17⁹), as to them only is eternal life communicated (10²¹ 17², also 3^{15, 36} 5²⁴ 6^{40, 54} 8¹²). Thus, what the dogmatists call *gratia preveniens* is very strikingly taught; and especial point is given to this teaching in the great declarations as to the new birth recorded in Jn 3, from which we learn that the recreating Spirit comes, like the wind, without observation, and as He lists (3⁹), the mode of action by which the Father 'draws' men being thus uncovered for us. Of course this drawing is not to be thought of as proceeding in a manner out of accord with man's nature as a psychic being; it naturally comes to its manifestation in an act of voluntary choice on man's own part, and in this sense it is 'psychological' and not 'physical'; accordingly, though it be God that 'draws,' it is man that 'comes' (8²¹ 6^{33, 41} 14⁶). There is no occasion for stumbling therefore in the ascription of 'will' and 'responsibility' to man, or for puzzling over the designation of 'faith,' in which the 'coming' takes effect, as a 'work' of man's (6²⁹). Man is, of course, conceived as acting humanly, after the fashion of an intelligent and voluntary agent; but behind all his action there is ever postulated the all-determining hand of God, to whose sovereign operation even the blindness of the unbelieving is attributed by the evangelist (12³⁹), while the receptivity to the light of those who believe is repeatedly in the most emphatic way ascribed by Jesus Himself to God alone. Although with little use of the terminology in which we have been accustomed to expect to see the doctrines of the decree and of election expressed, the substance of these doctrines is here set out in the most impressive way.

From the two sets of data provided by the Synoptists and St. John, it is possible to attain quite a clear insight into the conception of predestination as it lay in our Lord's teaching. It is quite certain, for example, that there is no place in this teaching for a 'predestination' that is carefully adjusted to the foreseen performances of the creature; and as little for a 'decree' which may be frustrated by creaturely action, or an 'election' which is given effect only by the creaturely choice: to our Lord the Father is the omnipotent Lord of heaven and earth, according to whose pleasure all things are ordered, and who gives the Kingdom to whom He will (Lk 12³², Mk 11³⁶, Lk 10²¹). Certainly it is the very heart of our Lord's teaching that the Father's good pleasure is a good pleasure, ethically right, and the issue of infinite love; the very name of Father as the name of God by preference on His lips is full of this conception; but the very nerve of this teaching is, that the Father's will is all-embracing and omnipotent. It is only therefore that His children need be careful for nothing, that the little flock need not fear, that His elect may be assured that none of them shall be lost, but all that the Father has given Him shall be raised up at the last day. And if this elective purpose of the Father cannot fail of its end, neither is it possible to find this end in anything less than 'salvation' in the highest sense, than entrance into that eternal life to communicate which to dying men our Lord came into the world. There are elections to other ends, to be sure, spoken of: notably there is the election of the apostles to their office (Lk 6¹³, Jn 6⁷⁰); and Christ Himself is conceived as especially God's elect one, because no one has the service to render which He has (Lk 9³⁵ 23³⁵). But the elect, by way of eminence; 'the elect whom God elected,' for whose sake He governs all history (Mk 13³⁰); the elect of whom it was the will of Him who sent the Son, that of all that He gave Him He should lose nothing, but should raise it up at the last day (Jn 6³⁹); the elect whom the Son of Man shall at the last day gather from the four winds, from the uttermost parts of the earth to the uttermost part of heaven (Mk 13³⁷): it would be inadequate to suppose that these are elected merely to opportunities or the means of grace, on their free cultivation of which shall depend their undecided destiny; or merely to the service of their fellow-men, as agents in God's beneficent plan for the salvation of the race. Of course this election is to privileges and means of grace; and without these the great end of the election would not be attained: for the 'election' is given effect only by the 'call,' and manifests itself only in faith and the holy life. Equally of course the elect are 'the salt of the earth' and 'the light of the world,' the few through whom the many are blessed; the eternal life to which they are elected does not consist in oneness with the silence and coldness of death, but only in and with the intensest activities of the conquering people of God. But the prime end of their election does not lie in these things, and to place exclusive stress upon them is certainly to gather in the mist and unise and cummin of the doctrine. That to which God's elect are elected is, according to the teaching of Jesus, all that is included in the idea of the Kingdom of God, in the idea of eternal life, in the idea of fellowship with Christ, in the idea of participation in the glory which the Father has given His Son. Their choice, and the whole development of their history, according to our Lord's teaching, is the loving work of the Father: and in His keeping also is the consummation of their bliss. Their segregation, of course, leaves others not elected, to whom none of their privileges are granted; from whom none of their services are expected; with whom their glorious destiny is not shared. This, too, is of God. But this side of the matter, in accordance with Jesus' mission in the world as Saviour rather than as Judge, is less dwelt upon. In the case of neither class, that of the elect as little as that of those that are without, are the purposes of God wrought out without the co-operation of the activities of the subjects; but in neither case is the decisive factor supplied by these, but is discoverable solely in the will of God and the consonant will of the Son. The 'even so, Father; for so it seemed good in thy sight' (Mt 11²⁶, Lk 10²¹), is to our Lord, at least, an all-sufficient theodicy in the face of all God's diverse dealings with men.

2. *The Teaching of the Disciples.*—The disciples of Jesus continue His teaching in all its elements. We are conscious, for example, of entering no new atmosphere when we pass to the *Epistle of James*. St. James, too, finds his starting-point in a profound apprehension of the exaltation and perfection of God,—defining God's nature, indeed, with a phrase that merely repeats in other words the penetrating declaration that 'God is light' (1 Jn 1⁵), which, reflecting our Lord's teaching, sounds the keynote of the beloved disciple's thought of God (Ja 1⁷),—and particularly in a keen sense of dependence on God (4¹⁵ 5⁷), to which it was an axiom that every good thing is a gift from Him (1¹⁷). Accordingly, salvation, the pre-eminent good, comes purely as His gift, and can be ascribed only to His will (1¹⁸); and its exclusively Divine origin is indicated by the choice that is made of those who receive it—not the rich and prosperous, who have somewhat

perhaps which might command consideration, but the poor and miserable (2⁵). So little does this Divine choice rest on even faith, that it is rather in order to faith (2⁵), and introduces its recipients into the Kingdom as firstfruits of a great harvest to be reaped by God in the world (1¹⁸).

Similarly, in the *Book of Acts*, the whole stress in the matter of salvation is laid on the grace of God (11²³ 13⁴³ 14²⁶ 15⁴⁰ 18²⁷); and to it, in the most pointed way, the inception of faith itself is assigned (18²⁷). It is only slightly varied language when the increase in the Church is ascribed to the hand of the Lord (11²¹), or the direct act of God (14²⁷ 18¹⁰). The explicit declaration of 2⁴⁷ presents, therefore, nothing peculiar, and we are fully prepared for the philosophy of the redemptive history expressed in 13⁴³, that only those 'ordained to eternal life' believed—the believing that comes by the grace of God (18²⁷), to whom it belongs to open the heart to give heed to the gospel (16¹⁴), being thus referred to the counsel of eternity, of which the events of time are only the outworking.

The general philosophy of history thus suggested is implicit in the very idea of a promissory system, and in the recognition of a predictive element in prophecy, and is written large on the pages of the *historical books* of the NT. It is given expression in every declaration that this or that event came to pass 'that it might be fulfilled which was spoken by the prophets,'—a form of statement in which our Lord had Himself betrayed His teleological view of history, not only as respects details (Jn 15²⁵ 17¹²), but with the widest reference (Lk 21²²), and which was taken up cordially by His followers, particularly by Matthew (12²¹ 21⁵ 22⁴¹ 8¹⁷ 12¹⁷ 13³⁵ 21²⁶ 26³⁴, Jn 12³⁵ 18⁹ 19⁴⁴ 28³⁶). Alongside of this phrase occurs the equally significant 'δὲι of the Divine decree,' as it has been appropriately called, by which is suggested the necessity which rules over historical sequences. It is used with a view now to Jesus' own plan of redemption (by Jesus Himself, Mt 8³¹, Lk 2⁴⁰ 4⁴³ 9² 13³³ 17²⁵ 24⁷, Jn 3¹⁴ 10¹⁶ 12²⁴; by the evangelist, Mt 16¹⁴), now to the underlying plan of God (by Jesus, Mt 24⁵, Mk 13⁷ 10, Lk 21¹⁹; by the writer, Mt 17¹⁰, Mk 9¹¹, Ac 3²¹ 9¹⁶), anon to the prophetic declaration as an indication of the underlying plan (by Jesus, Mt 26⁵⁵, Lk 22⁵⁷ 24²⁸ 44; by the writer, Jn 20⁹, Ac 1¹⁶ 17³). This appeal, in either form, served an important apologetic purpose in the first proclamation of the gospel; but its fundamental significance is rooted, of course, in the conception of a Divine ordering of the whole course of history to the veriest detail.

Such a teleological conception of the history of the Kingdom is manifested strikingly in the speech of St. Stephen (Ac 7), in which the developing plan of God is rapidly sketched. But it is in such declarations as those of St. Peter recorded in Ac 2³ 4²⁸ that the wider philosophy of history comes to its clearest expression. In them everything that had befallen Jesus is represented as merely the emerging into fact of what had stood beforehand prepared for in 'the determinate counsel and foreknowledge of God,' so that nothing had been accomplished, by whatever agents, except what 'his hand and his counsel had foreordained to come to pass.' It would not be easy to frame language which should more explicitly proclaim the conception of an all-determining decree of God governing the entire sequence of events in time. Elsewhere in the *Petrine discourses* of Acts the speech is coloured by the same ideas: we note in the immediate context of these culminating passages the high terms in which the exaltation of God is expressed (4²⁴), the sharpness with which His sovereignty in the 'call' (προσκαλέσται) is declared (2²⁹), and elsewhere the repeated emergence of the idea of the necessary correspondence

of the events of time with the predictions of Scripture (1¹⁶ 2²⁴ 3²¹). The same doctrine of predestination meets us in the pages of *St. Peter's Epistles*. He does, indeed, speak of the members of the Christian community as God's elect (I 1²⁰ 5¹³, II 1¹⁰), in accordance with the apostolic habit of assuming the reality implied in the manifestation; but this is so far from importing that election hangs on the act of man that St. Peter refers it directly to the elective foreknowledge of God (I 1²), and seeks its confirmation in sanctification (II 1¹⁰),—even as the stumbling of the disobedient, on the other hand, is presented as a confirmation of their appointment to disbelief (I 2⁸). The pregnant use of the terms 'foreknow' (*προγινώσκω*) and 'foreknowledge' (*πρόγνωσις*) by St. Peter brought to our attention in these passages (Ac 2²³, I P 1²⁰), where they certainly convey the sense of a loving, distinguishing regard which assimilates them to the idea of election, is worthy of note as another of the traits common to him and St. Paul (Ro 8²⁹ 11², only in NT). The usage might be explained, indeed, as the development of a purely Greek sense of the words, but it is much more probably rooted in a Semitic usage, which, as we have seen, is not without example in OT. A simple comparison of the passages will exhibit the impossibility of reading the terms of mere prevision (cf. Cremer *sub voc.*, and especially the last discussion in K. Müller's *Die Göttliche Zuvorerscheidung und Erwahlung*, etc. pp. 38 f., 81 f.; also Gennrich, *SK*, 1898, 382-395; Pfeiderer, *Urchristenthum*, 289, *Paulinismus*, 268; and Lorenz, *Lehrsystem*, etc. 94).

The teaching of *St. John* in Gospel and Epistle is not distinguishable from that which he reports from his Master's lips, and need not here be reverted to afresh. The same fundamental viewpoints meet us also in the Apocalypse. The emphasis there placed on the omnipotence of God rises indeed to a climax. There only in NT (except 2 Co 6¹³), for example, is the epithet *παντοκράτωρ* ascribed to Him (1⁸ 4⁸ 11¹⁷ 15¹⁶ 16⁷ 14 19⁶ 15 21²², cf. 15² 6¹⁰); and the whole purport of the book is the portrayal of the Divine guidance of history, and the very essence of its message that, despite all surface appearances, it is the hand of God that really directs all occurrences, and all things are hastening to the end of His determining. Salvation is ascribed unvaryingly to the grace of God, and declared to be His work (12¹⁰ 19¹). The elect people of God are His by the Divine choice alone: their names are from the foundation of the world written in the Lamb's Book of Life (13³ 17⁸ 20¹²⁻¹⁵ 21²²), which is certainly a symbol of Divine appointment to eternal life revealed in and realized through Christ; nor shall they ever be blotted out of it (3⁵). It is difficult to doubt that the destination here asserted is to a complete salvation (19⁹), that it is individual, and that it is but a single instance of the completeness of the Divine government to which the world is subject by the Lord of lords and King of kings, the Ruler of the earth and King of the nations, whose control of all the occurrences of time in accordance with His holy purposes it is the supreme object of this book to portray.

Perhaps less is directly said about the purpose of God in the *Epistle to the Hebrews* than in any other portion of NT of equal length. The technical phraseology of the subject is conspicuously absent. Nevertheless, the conception of the Divine counsel and will underlying all that comes to pass (2¹⁰), and especially the entire course of the purchase (6¹⁷, cf. 10⁴⁻¹⁰ 2⁹) and application (11²⁰, cf. 9¹⁵) of salvation, is fundamental to the whole thought of the Epistle; and echoes of the modes in which this conception is elsewhere expressed meet us on every hand. Thus we read of God's eternal counsel

(*βουλή*, 6¹⁷) and of His precedent will (*θέλημα*, 10¹⁰) as underlying His redemptive acts; of the enrolment of the names of His children in heaven (12²³); of the origin in the energy of God of all that is good in us (13²¹); and, above all, of a 'heavenly call' as the source of the whole renewed life of the Christian (3¹, cf. 9¹⁵).

When our Lord spoke of 'calling' (*καλῶν*, Mt 9¹³, Mk 2¹⁷, Lk 5²⁸, and, parabolically, Mt 22² 4⁵ 9, Lk 14⁸ 9. 10. 12. 13. 16. 17. 24; *καλεῖν*, Mt 22¹⁴ (20¹⁶)) the term was used in the ordinary sense of 'invitation,' and refers therefore to a much broader circle than the 'elect' (Mt 22¹⁴); and this fundamental sense of 'bidding' may continue to cling to the term in the hands of the evangelists (Mt 4²¹, Mk 1³⁰, cf. Lk 14⁷, Jn 2²), while the depth of meaning which might be attached to it, even in such a connotation, may be revealed by such a passage as Rev 19¹⁰ 'Blessed are they which are bidden to the marriage supper of the Lamb.' On the lips of the apostolic writers, however, the term in its application to the call of God to salvation took on deeper meanings, doubtless out of consideration of the author of the call, who has but to speak and it is done (cf. Ro 4¹⁷). It occurs in these writers, when it occurs at all, as the synonym no longer of 'invitation,' but rather of 'election' itself; or, more precisely, as expressive of the temporal act of the Divine efficiency by which effect is given to the electing decree. In this profounder sense it is practically confined to the writings of St. Paul and St. Peter and the Epistle to the Hebrews, occurring elsewhere only in Jude¹, Rev 17¹⁴, where the children of God are designated the 'called,' just as they are (in various collocations of the term with the idea of election) in Ro 16⁷, 1 Co 1², Ro 8³⁰, 1 Co 12¹³ (cf. Ro 1¹, 1 Co 1¹). *Καλεῖν*, as used in these passages, does not occur in the Epistle to the Hebrews, but in 3¹ *καλεῖται* occurs in a sense indistinguishable from that which it bears in St. Paul (Ro 11²⁹, 1 Co 1², Eph 1¹⁸ 4¹, Ph 3¹⁴, 2 Th 1¹¹, 2 Ti 1⁹) and St. Peter (2 P 1¹⁰); and in 9¹⁵ (cf. special applications of the same general idea, 54 11⁵), *καλεῖται* bears the same deep sense expressed by it in St. Paul (Ro 8³⁰ 30 9¹¹⁻²⁴, 1 Co 1² 1² 7¹⁵ 17. 18. 18. 20. 21. 22. 22. 24, Gal 1⁶ 15. 58. 13, Eph 4¹ 4, Col 3¹⁵, 1 Th 2¹² 4⁷ 5²⁴, 2 Th 2¹⁴, 2 Ti 1⁹) and in St. Peter (1¹⁵ 29. 21 2⁹ 5¹⁰, II 1¹³, cf. *προκαλεῖται*, Ac 2²⁸, and in the language of St. Luke, Ac 13² 16¹⁰). The contrast into which the 'called' (3¹) are brought in this Epistle with the 'evangelized' (4² 6), repeating in other terms the contrast which our Saviour institutes between the 'elect' and 'called' (Mt 22¹⁴), exhibits the height of the meaning to which the idea of the 'call' has climbed. It no longer denotes the mere invitation,—that notion is now given in 'evangelize,'—but the actual ushering into salvation of the heirs of the promise, who are made partakers of the heavenly calling, and are called to the everlasting inheritance just because they have been destined thereunto by God (1¹⁴), and are enrolled in heaven as the children given to the Son of God (2¹³).

3. *The Teaching of St. Paul.*—It was reserved, however, to the Apostle Paul to give to the fact of predestination its fullest NT presentation. This was not because St. Paul exceeded his fellows in the strength or clearness of his convictions, but because, in the prosecution of the special task which was committed to him in the general work of establishing Christianity in the world, the complete expression of the common doctrine of predestination fell in his way, and became a necessity of his argument. With him, too, the roots of his doctrine of predestination were set in his general doctrine of God, and it was fundamentally because St. Paul was a theist of a clear and consistent type, living and thinking under the influence of the profound consciousness of a personal God who is the author of all that is and, as well, the upholder and powerful governor of all that He has made, according to whose will, therefore, all that comes to pass must be ordered, that he was a predestinarian; and more particularly he too was a predestinarian because of his general doctrine of salvation, in every step of which the initiative must be taken by God's unmerited grace, just because man is a sinner, and, as a sinner, rests under the Divine condemnation, with no right of so much as access to God, and without means to seek, much less to secure, His favour. But although possessing no other sense of the infinite majesty of the almighty Person in whose hands all things lie, or of the issue of all saving acts from His free grace, than his companion apostles, the course of the special work in which St. Paul was engaged, and the exigencies of the special controversies in which he was involved, forced him

to a fuller expression of all that is implied in these convictions. As he cleared the whole field of Christian faith from the presence of any remaining confidence in human works; as he laid beneath the hope of Christians a righteousness not self-wrought but provided by God alone; as he consistently offered this God-provided righteousness to sinners of all classes without regard to anything in them by which they might fancy God could be moved to accept their persons,—he was inevitably driven to an especially pervasive reference of salvation in each of its elements to the free grace of God, and to an especially full exposition on the one hand of the course of Divine grace in the several acts which enter into the saving work, and on the other to the firm rooting of the whole process in the pure will of the God of grace. From the beginning to the end of his ministry, accordingly, St. Paul conceived himself, above everything else, as the bearer of a message of undeserved grace to lost sinners, not even directing his own footsteps to carry the glad tidings to whom he would (Ro 1¹⁰, 1 Co 4¹⁹, 2 Co 2¹²), but rather led by God in triumphal procession through the world, that through him might be made manifest the savour of the knowledge of Christ in every place—a savour from life unto life in them that are saved, and from death unto death in them that are lost (2 Co 2¹⁵⁻¹⁶). By the 'word of the cross' proclaimed by him the essential character of his hearers was thus brought into manifestation,—to the lost it was foolishness, to the saved the power of God (1 Co 1¹⁸): not as if this essential character belonged to them by nature or was the product of their own activities, least of all of their choice at the moment of the proclamation, by which rather it was only revealed; but as finding an explanation only in an act of God, in accordance with the working of Him to whom all differences among men are to be ascribed (1 Co 4⁷)—for God alone is the Lord of the harvest, and all the increase, however diligently man may plant and water, is to be accredited to Him alone (1 Co 3⁵⁻⁶).

It is naturally the soteriological interest that determines in the main St. Paul's allusions to the all-determining hand of God,—the letters that we have from him come from Paul the evangelist,—but it is not merely a soteriological conception that he is expressing in them, but the most fundamental postulate of his religious consciousness; and he is accordingly constantly correlating his doctrine of election with his general doctrine of the decree or counsel of God. No man ever had an intenser or more vital sense of God,—the eternal (Ro 16²⁶) and incorruptible (1²⁸) One, the only wise One (16²⁷), who does all things according to His good-pleasure (1 Co 15³⁸ 12¹⁸, Col 1⁹⁻¹⁰), and whose ways are past tracing out (Ro 11³³); before whom men should therefore bow in the humility of absolute dependence, recognizing in Him the one moulding power as well in history as in the life of the individual (Ro 9). Of Him and through Him and unto Him, he fervently exclaims, are all things (Ro 11³⁶, cf. 1 Co 8⁶); He is over all and through all and in all (Eph 4⁶, cf. Col 1¹⁶); He worketh all things according to the counsel of His will (Eph 1¹¹): all that is, in a word, owes its existence and persistence and its action and issue to Him. The whole course of history is, therefore, of His ordering (Ac 14¹⁶ 17³⁰, Ro 1¹⁸, 3³⁻⁹ 11, Gal 3. 4), and every event that befalls is under His control, and must be estimated from the view-point of His purposes of good to His people (Ro 8²⁸, 1 Th 5¹⁷⁻¹⁸), for whose benefit the whole world is governed (Eph 1²², 1 Co 2⁷, Col 1¹⁸). The figure that is employed in Ro 9²² with a somewhat narrower reference, would fairly express St. Paul's world-view in its relation

to the Divine activity: God is the potter, and the whole world with all its contents but as the plastic clay which He moulds to His own ends; so that whatsoever comes into being, and whatsoever uses are served by the things that exist, are all alike of Him. In accordance with this world-view St. Paul's doctrine of salvation must necessarily be interpreted; and, in very fact, he gives it its accordant expression in every instance in which he speaks of it.

There are especially *three chief passages* in which the apostle so fully expounds his fundamental teaching as to the relation of salvation to the purpose of God, that they may fairly claim our primary attention.

(a) The first of these—Ro 8²⁸⁻³⁰—emerges as part of the encouragement which the apostle offers to his readers in the sad state in which they find themselves in this world, afflicted with fears within and fightings without. He reminds them that they are not left to their weakness, but the Spirit comes to their aid: 'and we know,' adds the apostle,—it is no matter of conjecture, but of assured knowledge,—'that with them that love God, God co-operates with respect to all things for good, since they are indeed the called according to [His] purpose.' The appeal is obviously primarily to the universal government of God: nothing takes place save by His direction, and even what seems to be grievous comes from the Father's hand. Secondly, the appeal is to the assured position of his readers within the fatherly care of God: they have not come into this blessed relation with God accidentally or by the force of their own choice; they have been 'called' into it by Himself, and that by no thoughtless, inadvertent, meaningless, or changeable call; it was a call 'according to purpose,'—where the anarthousness of the noun throws stress on the purposiveness of the call. What has been denominated 'the golden chain of salvation' that is attached to this declaration by the particle 'because' can therefore have no other end than more fully to develop and more firmly to ground the assurance thus quickened in the hearts of the readers: it accordingly enumerates the steps of the saving process in the purpose of God, and carries it thus successively through the stages of appropriating foreknowledge,—for 'foreknow' is undoubtedly used here in that pregnant sense we have already seen it to bear in similar connexions in NT,—predestination to conformity with the image of God's Son, calling, justifying, glorifying; all of which are cast in the past tense of a purpose in principle executed when formed, and are bound together as mutually implicative, so that, where one is present, all are in principle present with it. It accordingly follows that, in St. Paul's conception, glorification rests on justification, which in turn rests on vocation, while vocation comes only to those who had previously been predestinated to conformity with God's Son, and this predestination to character and destiny only to those afore chosen by God's loving regard. It is obviously a strict doctrine of predestination that is taught. This conclusion can be avoided only by assigning a sense to the 'foreknowing' that lies at the root of the whole process, which is certainly out of accord not merely with its ordinary import in similar connexions in the NT, nor merely with the context, but with the very purpose for which the declaration is made, namely, to enhearten the struggling saint by assuring him that he is not committed to his own power, or rather weakness, but is in the sure hands of the Almighty Father. It would seem little short of absurd to hang on the merely contemplative foresight of God a declaration adduced to support the assertion that the lovers of God

are something deeper and finer than even lovers of God, namely, 'the called according to purpose,' and itself educating the joyful cry, 'If God is for us, who is against us?' and grounding a confident claim upon the gift of all things from His hands.

(b) The even more famous section, **Ro 9. 10. 11**, following closely upon this strong affirmation of the suspension of the whole saving process on the predetermination of God, offers, on the face of it, a yet sharper assertion of predestination, raising it, moreover, out of the circle of the merely individual salvation into the broader region of the historical development of the kingdom of God. The problem which St. Paul here faces grew so directly out of his fundamental doctrine of justification by faith alone, with complete disregard of all question of merit or vested privilege, that it must have often forced itself upon his attention,—himself a Jew with a high estimate of a Jew's privileges and a passionate love for his people. He could not but have pondered it frequently and deeply, and least of all could he have failed to give it treatment in an Epistle like this, which undertakes to provide a somewhat formal exposition of his whole doctrine of justification. Having shown the necessity of such a method of salvation as he proclaimed, if sinful men were to be saved at all (¹⁸⁻³⁰), and then expounded its nature and evidence (³¹⁻⁵¹), and afterwards discussed its intensive effects (⁶⁻⁸), he could not fail further to explain its extensive effects—especially when they appeared to be of so portentous a character as to imply a reversal of what was widely believed to have been God's mode of working heretofore, the rejection of His people whom He foreknew, and the substitution of the alien in their place. St. Paul's solution of the problem is, briefly, that the situation has been gravely misconceived by those who so represent it; that nothing of the sort thus described has happened or will happen; that what has happened is merely that in the constitution of that people whom He has chosen to Himself and is fashioning to His will, God has again exercised that sovereignty which He had previously often exercised, and which He had always expressly reserved to Himself and frequently proclaimed as the principle of His dealings with the people emphatically of His choice. In his exposition of this solution St. Paul first defends the propriety of God's action (^{9^a-24}), then turns to stop the mouth of the objecting Jew by exposing the manifested unfitness of the Jewish people for the kingdom (²⁵⁻¹⁰²), and finally expounds with great richness the ameliorating circumstances in the whole transaction (¹¹⁻³⁰). In the course of his defence of God's rejection of the mass of contemporary Israel, he sets forth the sovereignty of God in the whole matter of salvation—'that the purpose of God according to election might stand, not of works, but of Him that calleth'—with a sharpness of assertion and a clearness of illustration which leave nothing to be added in order to throw it out in the full strength of its conception. We are pointed illustratively to the sovereign acceptance of Isaac and rejection of Ishmael, and to the choice of Jacob and not of Esau before their birth and therefore before either had done good or bad; we are explicitly told that in the matter of salvation it is not of him that wills, or of him that runs, but of God that shows mercy, and that has mercy on whom He wills, and whom He wills He hardens; we are pointedly directed to behold in God the potter who makes the vessels which proceed from His hand each for an end of His appointment, that He may work out His will upon them. It is safe to say that language cannot be chosen better adapted to teach predestination at its height.

We are exhorted, indeed, not to read this language in isolation,

but to remember that the ninth chapter must be interpreted in the light of the eleventh. Not to dwell on the equally important consideration that the eleventh chapter must likewise be interpreted only in the light of the ninth, there seems here to exhibit itself some forgetfulness of the inherent continuity of St. Paul's thought, and, indeed, some misconception of the progress of the argument through the section, which is a compact whole and must express a much pondered line of thought, constantly present to the apostle's mind. We must not permit to fall out of sight the fact that the whole extremity of assertion of the ninth chapter is repeated in the eleventh (¹¹⁴⁻¹⁰); so that there is no change of conception or lapse of consecution observable as the argument develops, and we do not escape from the doctrine of predestination of the ninth chapter in fleeing to the eleventh. This is true even if we go at once to the great closing declaration of ¹¹³², to which we are often directed as to the key of the whole section—which, indeed, it very much is: 'For God hath shut up all unto disobedience, that he might have mercy upon all.' On the face of it there could not readily be framed a more explicit assertion of the Divine control and the Divine initiative than this; it is only another declaration that He has mercy on whom He will have mercy, and after the manner and in the order that He will. And it certainly is not possible to read it as a declaration of universal salvation, and thus reduce the whole preceding exposition to a mere tracing of the varying pathways along which the common Father leads each individual of the race severally to the common goal. Needless to point out that thus the whole argument would be stultified, and the apostle convicted of gross exaggeration in tone and language where otherwise we find only impressive solemnity, rising at times into natural anguish. It is enough to observe that the verse cannot bear this sense in its context. Nothing is clearer than that its purpose is not to minimise but to magnify the sense of absolute dependence on the Divine mercy, and to quicken apprehension of the mystery of God's righteously loving ways; and nothing is clearer than that the reference of the double 'all' is exhausted by the two classes discussed in the immediate context,—so that they are not to be taken individually but, so to speak, racially. The intrusion of the individualistic-universalistic sentiment, so dominant in the modern consciousness, into the interpretation of this section, indeed, is to throw the whole into inextricable confusion. Nothing could be further from the nationalistic-universalistic point of view from which it was written, and from which alone St. Paul can be understood when he represents that in rejecting the mass of contemporary Jews God has not cast off His people, but, acting only as He had frequently done in former ages, is fulfilling His promise to the kernel while shelling off the husk. Throughout the whole process of pruning and ingrafting which he traces in the dealings of God with the olive-tree which He has once for all planted, St. Paul sees God, in accordance with His promise, saving His people. The continuity of its stream of life he perceives preserved throughout all its present experience of rejection (¹¹¹⁻¹⁰); the gracious purpose of the present confinement of its channel, he traces with eager hand (¹¹¹¹⁻¹³); he predicts with confidence the attainment in the end of the full breadth of the promise (¹¹¹⁵⁻³²),—all to the praise of the glory of God's grace (¹¹³³⁻³⁶). There is undoubtedly a universalism of salvation proclaimed here; but it is an eschatological, not an individualistic universalism. The day is certainly to come when the whole world—inclusive of all the Jews and Gentiles alike, then dwelling on the globe—shall know and serve the Lord; and God in all His strange work of distributing salvation is leading the course of events to that great goal; but meanwhile the principle of His action is free, sovereign grace, to which alone it is to be attributed that any who are saved in the meantime enter into their inheritance, and through which alone shall the final goal of the race itself be attained. The central thought of the whole discussion, in a word, is that Israel does not owe the promise to the fact that it is Israel, but conversely owes the fact that it is Israel to the promise,—that 'it is not the children of the flesh that are the children of God, but the children of the promise that are reckoned for a seed' (^{9^b}). In these words we hold the real key to the whole section; and if we approach it with this key in hand we shall have little difficulty in apprehending that, from its beginning to its end, St. Paul has no higher object than to make clear that the inclusion of any individual within the kingdom of God finds its sole cause in the sovereign grace of the choosing God, and cannot in any way or degree depend upon his own merit, privilege, or act.

Neither, with this key in our hand, will it be possible to raise a question whether the election here expounded is to eternal life or not rather merely to prior privilege or higher service. These too, no doubt, are included. But by what right is this long section intruded here as a substantive part of this Epistle, busied as a whole with the exposition of the power of God unto salvation to every one that believeth, to the Jew first and also to the Greek, if it has no direct concern with this salvation? By what chance has it attached itself to that noble grounding of a Christian's hope and assurance with which the eighth chapter closes? By what course of thought does it reach its own culmination in that burst of praise to God, on whom all things depend, with which it concludes? By what accident is it itself filled with the most unequivocal references to the saving grace of God 'which hath been poured out on the vessels of his mercy which he afore prepared for glory, even on us whom he also called, not from the Jews only, but also from the Gentiles'? If such language has no reference to salvation, there is no language in the NT that need be interpreted of final destiny. Beyond question this section does

explain to us some of the grounds of the mode of God's action in gathering a people to Himself out of the world; and in doing this, it does reveal to us some of the ways in which the distribution of His electing grace serves the purposes of His kingdom on earth; reading it, we certainly do learn that God has many ends to serve in His gracious dealings with the children of men, and that we, in our ignorance of His multifarious purposes, are not fitted to be His counsellors. But by all this, the fact is in no wise obscured that it is primarily to salvation that He calls His elect, and that whatever other ends their election may subserve, this fundamental end will never fail; that in this, too, the gifts and calling of God are not repented of, and will surely lead on to their goal. The difficulty which is felt by some in following the apostle's argument here, we may suspect, has its roots in part in a shrinking from what appears to them an arbitrary assignment of men to diverse destinies without consideration of their desert. Certainly St. Paul as explicitly affirms the sovereignty of reprobation as of election,—if these twin ideas are, indeed, separable even in thought: if he represents God as sovereignly loving Jacob, he represents Him equally as sovereignly hating Esau; if he declares that He has mercy on whom He will, he equally declares that He hardens whom He will. Doubtless the difficulty often felt here is, in part, an outgrowth of an insufficient realization of St. Paul's basal conception of the state of men at large as condemned sinners before an angry God. It is with a world of lost sinners that he is representing God as dealing; and out of that world building up a Kingdom of Grace. Were not all men sinners, there might still be an election, as sovereign as now; and there being an election, there would still be as sovereign a rejection: but the rejection would not be a rejection to punishment, to destruction, to eternal death, but to some other destiny consonant to the state in which those passed by should be left. It is not indeed, then, because men are sinners that men are left unelected; election is free, and its obverse of rejection must be equally free: but it is solely because men are sinners that what they are left to is destruction. And it is in this universalism of ruin rather than in a universalism of salvation that St. Paul really roots his theodicy. When all deserve death it is a marvel of pure grace that any receive life; and who shall gainsay the right of Him who shows this miraculous mercy, to have mercy on whom He will, and whom He will to harden? (See REPROBATE).

(c) In Eph 1:1-13 there is, if possible, an even higher note struck. Here, too, St. Paul is dealing primarily with the blessings bestowed on his readers, in Christ, all of which he ascribes to the free grace of God; but he so speaks of these blessings as to correlate the gracious purpose of God in salvation, not merely with the plan of operation which He prosecutes in establishing and perfecting His kingdom on earth, but also with the all-embracing decree that underlies His total cosmical activity. In opening this circular letter, addressed to no particular community whose special circumstances might suggest the theme of the thanksgiving with which he customarily begins his letters, St. Paul is thrown back on what is common to Christians; and it is probably to this circumstance that we owe the magnificent description of the salvation in Christ with which the Epistle opens, and in which this salvation is traced consecutively in its preparation (vv. 4-6), its execution (6-7), its publication (8-10), and its application (11-14), both to Jews (11, 12) and to Gentiles (13, 14). Thus, at all events, we have brought before us the whole ideal history of salvation in Christ from eternity to eternity—from the eternal purpose as it lay in the loving heart of the Father, to the eternal consummation, when all things in heaven and earth shall be summed up in Christ. Even the incredible profusion of the blessings which we receive in Christ, described with an accumulation of phrases that almost defies exposition, is less noticeable here than the emphasis and reiteration with which the apostle carries back their bestowment on us to that primal purpose of God in which all things are afore prepared ere they are set in the way of accomplishment. All this accumulation of blessings, he tells his readers, has come to them and him only in fulfilment of an eternal purpose—only because they had been chosen by God out of the mass of sinful men, in Christ, before the foundation of the world, to be holy and blameless before Him, and had been lovingly predestinated unto adoption through Jesus Christ to Him, in accordance with the good-

pleasure of His will, to the praise of the glory of His grace. It is therefore, he further explains, that to them in the abundance of God's grace there has been brought the knowledge of the salvation in Christ, described here as the knowledge of the mystery of the Divine will, according to His good-pleasure, which He purposed in Himself with reference to the dispensation of the fullness of the times, to sum up all things in the universe in Christ,—by which phrases the plan of salvation is clearly exhibited as but one element in the cosmical purpose of God. And thus it is, the apostle proceeds to explain, only in pursuance of this all-embracing cosmical purpose that Christians, whether Jews or Gentiles, have been called into participation of these blessings, to the praise of the glory of God's grace,—and of the former class, he pauses to assert anew that their call rests on a predestination according to the purpose of Him that works all things according to the counsel of His will. Throughout this elevated passage, the resources of language are strained to the utmost to give utterance to the depth and fervour of St. Paul's conviction of the absoluteness of the dominion which the God, whom he describes as Him that works all things according to the counsel of His will, exercises over the entire universe, and of his sense of the all-inclusive perfection of the plan on which He is exercising His world-wide government—into which world-wide government His administration of His grace, in the salvation of Christ, works as one element. Thus there is kept steadily before our eyes the wheel within wheel of the all-comprehending decree of God: first of all, the inclusive cosmical purpose in accordance with which the universe is governed as it is led to its destined end; within this, the purpose relative to the kingdom of God, a substantive part, and, in some sort, the hinge of the world-purpose itself; and still within this, the purpose of grace relative to the individual, by virtue of which he is called into the Kingdom and made sharer in its blessings: the common element with them all being that they are and come to pass only in accordance with the good-pleasure of His will, according to His purposed good-pleasure, according to the purpose of Him who works all things in accordance with the counsel of His will; and therefore all alike redound solely to His praise.

In these outstanding passages, however, there are only expounded, though with special richness, ideas which govern the Pauline literature, and which come now and again to clear expression in each group of St. Paul's letters. The whole doctrine of election, for instance, lies as truly in the declaration of 2 Th 2:13 or that of 2 Ti 1:9 (cf. 2 Ti 2:19, Tit 3:5) as in the passages we have considered from Romans (cf. 1 Co 1:26-31) and Ephesians (cf. Eph 2:10, Col 1:7 3:12, 15, Ph 4:3). It may be possible to trace minor distinctions through the several groups of letters in forms of statement or modes of relating the doctrine to other conceptions; but from the beginning to the end of St. Paul's activity as a Christian teacher his fundamental teaching as to the Christian calling and life is fairly summed up in the declaration that those that are saved are God's 'workmanship created in Christ Jesus unto good works, which God afore prepared that they should walk in them' (Eph 2:10).

The most striking impression made upon us by a survey of the whole material is probably the intensity of St. Paul's practical interest in the doctrine—a matter fairly illustrated by the passage just quoted (Eph 2:10). Nothing is more noticeable than his zeal in enforcing its two chief practical contents—the assurance it should bring to believers of their eternal safety in the faithful hands of God, and the ethical energy it should arouse within them to live worthily of their vocation. It is one of St. Paul's most persistent exhortations, that believers should remember that their salvation is not committed to their own weak hands, but rests securely on the

faithfulness of the God who has called them according to His purpose (e.g. 1 Th 5²⁴, 1 Co 1²⁶ 10¹³, Ph 1⁶). Though the appropriation of their salvation begins in an act of faith on their own part, which is consequent on the hearing of the gospel, their appointment to salvation itself does not depend on this act of faith, nor on any fitness discoverable in them on the foresight of which God's choice of them might be supposed to be based, but (as 1 Th 2¹³ already indicates) both the preaching of the gospel and the exercise of faith consistently appear as steps in the carrying out of an election not conditioned on their occurrence, but embracing them as means to the end set by the free purpose of God. The case is precisely the same with all subsequent acts of the Christian life. So far is St. Paul from supposing that election to life should operate to enervate moral endeavour, that it is precisely from the fact that the willing and doing of man rest on an energizing willing and doing of God, which in turn rest on His eternal purpose, that the apostle derives his most powerful and most frequently urged motive for ethical action. That tremendous 'therefore,' with which at the opening of the twelfth chapter of Romans he passes from the doctrinal to the ethical part of the Epistle,—from a doctrinal exposition the very heart of which is salvation by pure grace apart from all works, and which had just closed with the fullest discussion of the effects of election to be found in all his writings, to the rich exhortations to high moral effort with which the closing chapters of this Epistle are filled,—may justly be taken as the normal illustration of his whole ethical teaching. His Epistles, in fact, are sown (as indeed is the whole NT) with particular instances of the same appeal (e.g. 1 Th 2¹², 2 Th 2¹³⁻¹⁵, Ro 6, 2 Co 5¹⁴, Col 1¹⁰, Ph. 1²¹ 2¹²⁻¹³, 2 Ti 2¹⁹). In Ph 2¹²⁻¹³ it attains, perhaps, its sharpest expression: here the saint is exhorted to work out his own salvation with fear and trembling, just because it is God who is working in him both the willing and the doing because of His 'good-pleasure'—obviously but another way of saying, 'If God is for us, who can be against us?'

There is certainly presented in this a problem for those who wish to operate in this matter with an irreconcilable 'either, or,' and who can conceive of no freedom of man which is under the control of God. St. Paul's theism was, however, of too pure a quality to tolerate in the realm of creation any force beyond the sway of Him who, as he says, is over all, and through all, and in all (Eph 4⁶), working all things according to the counsel of His will (Eph 1¹¹). And it must be confessed that it is more facile than satisfactory to set his theistic world-view summarily aside as a 'merely religious view,' which stands in conflict with a truly ethical conception of the world—perhaps even with a repetition of Fritzsche's jibe that St. Paul would have reasoned better on the high themes of 'fate, free-will, and providence' had he sat at the feet of Aristotle rather than at those of Gamaliel. Antiquity produced, however, no ethical genius equal to St. Paul, and even as a teacher of the foundations of ethics Aristotle himself might well be content to sit rather at his feet; and it does not at once appear why a so-called 'religious' conception may not have as valid a ground in human nature, and as valid a right to determine human conviction, as a so-called 'ethical' one. It can serve no good purpose even to proclaim an insoluble antinomy here: such an antinomy St. Paul assuredly did not feel, as he urged the predestination of God not more as a ground of assurance of salvation than as the highest motive of moral effort; and it does not seem impossible for even us weaker thinkers to follow him some little way at least in looking upon those twin bases of religion and morality—the ineradicable feelings of dependence and responsibility—not as antagonistic sentiments of a hopelessly divided heart, but as fundamentally the same profound conviction operating in a double sphere. At all events, St. Paul's pure theistic view-point, which conceived God as in His providential *concursus* working all things according to the counsel of His will (Eph 1¹¹) in entire consistency with the action of second causes, necessary and free, the proximate producers of events, supplied him with a very real point of departure for his conception of the same God, in the operations of His grace, working the willing and the doing of Christian men, without the least infringement of the integrity of the free determination by which each grace is proximately attained. It does not belong to our present task to expound the nature of that Divine act by which St. Paul represents God as 'calling' sinners 'into communion with his Son,' itself the first step in the realization in their lives of that conformity to His image to which they are predestinated in the counsels of eternity, and of which the first manifestation is that faith in the Redeemer of God's elect out of which the whole Christian life unfolds. Let it only be observed in passing that he obviously conceives it as an act of God's almighty power, removing old inabilities and creating new abilities of living, loving action. It is enough for our present purpose to perceive that even in this act St. Paul did not conceive God as dehumanizing man, but rather as energizing man in a new direction of his powers; while in all his subsequent activities the analogy of the *concursus* of Providence is express. In his own view, his strenuous assertion of the predestination in God's purpose of all the acts of saint and sinner alike in the matter of salvation, by which the discrimination of men into saved and lost is carried back to the free counsel of God's will, as little involves violence to the ethical spontaneity of their activities on the one side, as on the other it involves unrighteousness in God's dealings with His creatures. He does not speculatively discuss the methods of the Divine providence; but the fact of its universality—over all beings and actions alike—forms one of his most primary presuppositions; and naturally he finds no difficulty in postu-

lating the inclusion in the prior intention of God of what is subsequently evolved in the course of His providential government.

V. THE BIBLE DOCTRINE OF PREDESTINATION.

—A survey of the whole material thus cursorily brought before us exhibits the existence of a consistent Bible doctrine of predestination, which, because rooted in, and indeed only a logical outcome of, the fundamental Biblical theism, is taught in all its essential elements from the beginning of the Biblical revelation, and is only more fully unfolded in detail as the more developed religious consciousness and the course of the history of redemption required.

The subject of the DECREE is uniformly conceived as God in the fulness of His moral personality. It is not to chance, nor to necessity, nor yet to an abstract or arbitrary will,—to God acting inadvertently, inconsiderately, or by any necessity of nature,—but specifically to the almighty, all-wise, all-holy, all-righteous, faithful, loving God, to the Father of our Lord and Saviour Jesus Christ, that is ascribed the predetermination of the course of events. Naturally, the contemplation of the plan in accordance with which all events come to pass calls out primarily a sense of the unsearchable wisdom of Him who framed it, and of the illimitable power of Him who executes it; and these attributes are accordingly much dwelt upon when the Divine predestination is adverted to. But the moral attributes are no less emphasized, and the Biblical writers find their comfort continually in the assurance that it is the righteous, holy, faithful, loving God in whose hands rests the determination of the sequence of events and all their issues. Just because it is the determination of God, and represents Him in all His fulness, the decree is ever set forth further as in its *nature* eternal, absolute, and immutable. And it is only an explication of these qualities when it is further insisted upon, as it is throughout the Bible, that it is essentially one single composite purpose, into which are worked all the details included in it, each in its appropriate place; that it is the pure determination of the Divine will—that is, not to be confounded on the one hand with an act of the Divine intellect on which it rests, nor on the other with its execution by His power in the works of creation and providence; that it is free and unconditional—that is, not the product of compulsion from without nor of necessity of nature from within, nor based or conditioned on any occurrence outside itself, foreseen or unforeseen; and that it is certainly efficacious, or rather constitutes the unchanging norm according to which He who is the King over all administers His government over the universe. Nor is it to pass beyond the necessary implications of the fundamental idea when it is further taught, as it is always taught throughout the Scriptures, that the *object* of the decree is the whole universe of things and all their activities, so that nothing comes to pass, whether in the sphere of necessary or free causation, whether good or bad, save in accordance with the provisions of the primal plan, or more precisely save as the outworking in fact of what had lain in the Divine mind as purpose from all eternity, and is now only unfolded into actuality as the fulfilment of His all-determining will. Finally, it is equally unvaryingly represented that the *end* which the decreeing God had in view in framing His purpose is to be sought not without but within Himself, and may be shortly declared as His own praise, or, as we now commonly say, the glory of God. Since it antedates the existence of all things outside of God and provides for their coming into being, they all without exception must be ranked as means to its end, which

can be discovered only in the glory of the Divine purposer Himself. The whole Bible doctrine of the decree revolves, in a word, around the simple idea of purpose. Since God is a Person, the very mark of His being is purpose. Since He is an infinite Person, His purpose is eternal and independent, all-inclusive and effective. Since He is a moral Person, His purpose is the perfect exposition of all His infinite moral perfections. Since He is the personal creator of all that exists, His purpose can find its final cause only in Himself.

Against this general doctrine of the decree, the Bible doctrine of ELECTION is thrown out into special prominence, being, as it is, only a particular application of the general doctrine of the decree to the matter of the dealings of God with a sinful race. In its fundamental characteristics it therefore partakes of all the elements of the general doctrine of the decree. It, too, is necessarily an act of God in His completeness as an infinite moral Person, and is therefore eternal, absolute, immutable—the independent, free, unconditional, effective determination by the Divine will of the objects of His saving operations. In the development of the idea, however, there are certain elements which receive a special stress. There is nothing that is more constantly emphasized than the absolute *sovereignty* of the elective choice. The very essence of the doctrine is made, indeed, to consist in the fact that, in the whole administration of His grace, God is moved by no consideration derived from the special recipients of His saving mercy, but the entire account of its distribution is to be found hidden in the free counsels of His own will. That it is not of him that runs, nor of him that wills, but of God that shows mercy, that the sinner obtains salvation, is the steadfast witness of the whole body of Scripture, urged with such reiteration and in such varied connexions as to exclude the possibility that there may lurk behind the act of election considerations of foreseen characters or acts or circumstances—all of which appear rather as results of election as wrought out in fact by the *providentia specialissima* of the electing God. It is with no less constancy of emphasis that the roots of the Divine election are planted in His unsearchable love, by which it appears as the *supreme act of grace*. Contemplation of the general plan of God, including in its provisions every event which comes to pass in the whole universe of being during all the ages, must redound in the first instance to the praise of the infinite wisdom which has devised it all; or as our appreciation of its provisions is deepened, of the glorious righteousness by which it is informed. Contemplation of the particular element in His purpose which provides for the rescue of lost sinners from the destruction due to their guilt, and their restoration to right and to God, on the other hand draws our thoughts at once to His inconceivable love, and must redound, as the Scriptures delight to phrase it, to the praise of His glorious grace. It is ever, therefore, specifically to the love of God that the Scriptures ascribe His elective decree, and they are never weary of raising our eyes from the act itself to its source in the Divine compassion. A similar emphasis is also everywhere cast on the *particularity* of the Divine election. So little is it the designation of a mere class to be filled up by undetermined individuals in the exercise of their own determination; or of mere conditions, or characters, or qualities, to be fulfilled or attained by the undetermined activities of individuals, foreseen or unforeseen; that the Biblical writers take special pains to carry home to the heart of each individual believer the assurance that he himself has been from all eternity the particular object of the Divine choice, and that

he owes it to this Divine choice alone that he is a member of the class of the chosen ones, that he is able to fulfil the conditions of salvation, that he can hope to attain the character on which alone God can look with complacency, that he can look forward to an eternity of bliss as his own possession. It is the very nerve of the Biblical doctrine that each individual of that enormous multitude that constitutes the great host of the people of God, and that is illustrating the character of Christ in the new life now lived in the strength of the Son of God, has from all eternity been the particular object of the Divine regard, and is only now fulfilling the high destiny designed for him from the foundation of the world.

The Biblical writers are as far as possible from obscuring the doctrine of election because of any seemingly unpleasant corollaries that flow from it. On the contrary, they expressly draw the corollaries which have often been so designated, and make them a part of their explicit teaching. Their doctrine of election, they are free to tell us, for example, does certainly involve a corresponding *doctrine of preterition*. The very term adopted in NT to express it—*ἐκλέγεσθαι*, which, as Meyer justly says (Eph 1⁴), 'always has, and must of logical necessity have, a reference to others to whom the chosen would, without the *ἐκλογή*, still belong'—embodies a declaration of the fact that in their election others are passed by and left without the gift of salvation; the whole presentation of the doctrine is such as either to imply or openly to assert, on its every emergence, the removal of the elect by the pure grace of God, not merely from a state of condemnation, but out of the company of the condemned—a company on whom the grace of God has no saving effect, and who are therefore left without hope in their sins; and the positive just reprobation of the impenitent for their sins is repeatedly explicitly taught in sharp contrast with the gratuitous salvation of the elect despite their sins. But, on the other hand, it is ever taught that, as the body out of which believers are chosen by God's unsearchable grace is the mass of justly condemned sinners, so the destruction to which those that are passed by are left is the righteous recompense of their guilt. Thus the discrimination between men in the matter of eternal destiny is distinctly set forth as taking place in the interests of mercy and for the sake of salvation: from the fate which justly hangs over all, God is represented as in His infinite compassion rescuing those chosen to this end in His inscrutable counsels of mercy to the praise of the glory of His grace; while those that are left in their sins perish most deservedly, as the justice of God demands. And as the broader lines of God's gracious dealings with the world lying in its iniquity are more and more fully drawn for us, we are enabled ultimately to perceive that the Father of spirits has not distributed His elective grace with niggard hand, but from the beginning has had in view the restoration to Himself of the whole world; and through whatever slow approaches (as men count slowness) He has made thereto—first in the segregation of the Jews for the keeping of the service of God alive in the midst of an evil world, and then in their rejection in order that the fulness of the Gentiles might be gathered in, and finally through them Israel in turn may all be saved—has ever been conducting the world in His loving wisdom and His wise love to its destined goal of salvation,—now and again, indeed, shutting up this or that element of it unto disobedience, but never merely in order that it might fall, but that in the end He might have mercy upon all. Thus the Biblical writers bid us raise our eyes, not only from the justly condemned

lost, that we may with deeper feeling contemplate the marvels of the Divine love in the saving of sinners no better than they and with no greater claims on the Divine mercy; but from the relatively insignificant body of the lost, as but the prunings gathered beneath the branches of the olive-tree planted by the Lord's own hand, to fix them on the thrifty stock itself and the crown of luxuriant leafage and ever more richly ripening fruit, as under the loving pruning and grafting of the great Husbandman it grows and flourishes and puts forth its boughs until it shall shade the whole earth. This, according to the Biblical writers, is the end of election; and this is nothing other than the salvation of the world. Though in the process of the ages the goal is not attained without prunings and fires of burning,—though all the wild-olive twigs are not throughout the centuries grafted in,—yet the goal of a saved world shall at the end be gloriously realized. Meanwhile, the hope of the world, the hope of the Church, and the hope of the individual alike, is cast solely on the mercy of a freely electing God, in whose hands are all things, and not least the care of the advance of His saving grace in the world. And it is undeniable that whenever, as the years have passed by, the currents of religious feeling have run deep, and the higher ascents of religious thinking have been scaled, it has ever been on the free might of Divine grace that Christians have been found to cast their hopes for the salvation alike of the world, the Church, and the individual; and whenever they have thus turned in trust to the pure grace of God, they have spontaneously given expression to their faith in terms of the Divine election.

See also ELECTION, REPROBATE, WILL.

LITERATURE.—The Biblical material can best be surveyed with the help of the Lexicons on the terms employed (esp. Cremer), the commentaries on the passages, and the sections in the several treatises on Biblical Theology dealing with this and cognate themes; among these last, the works of Dillmann on the OT, and Holtzmann on the NT, may be especially profitably consulted. The Pauline doctrine has, in particular, been made the subject of almost endless discussion, chiefly, it must be confessed, with the object of softening its outlines or of explaining it more or less away. Perhaps the following are the more important recent treatises:—Poelman, *de Juru Apostolorumque, Pauli præsertim, doctrina de prædestinatione divina et morali hominis libertate*, Gron. 1851; Weiss, 'Prædestinationslehre des Ap. Paul,' in *Jahrb. f. D. Theol.* 1857, p. 54 f.; Lamping, *Pauli de prædestinatione decretorum enarratio*, Leov. 1858; Goens, *Le rôle de la liberté humaine dans la prédestination Paulinienne*, Lausanne, 1884; Ménégos, *La prédestination dans la théologie Paulinienne*, Paris, 1885; Dalmer, 'Zur Paulinischen Erwählungslehre,' in *Greifswälder Studien*, Gütersloh, 1895. The publication of Karl Müller's valuable treatise on *Die Göttliche Zurechnung und Erwählung*, etc. (Halle, 1892), has called out a new literature on the section Ro 9-11, the most important items in which are probably the reprint of Betschlag's *Die Paulinische Theodicee* (1896, first published in 1868), and Dalmer, *Die Erwählung Israels nach der Heilverkündigung des Ap. Paul.* (Gütersloh, 1894), and Kuhl, 'Zur Paulinischen Theodicee,' in the *Theologische Studien*, presented to B. Weiss (Göttingen, 1897). But of these only Goens recognizes the double predestination; even Müller, whose treatise is otherwise of the first value, argues against it, and so does Dalmer in his very interesting discussions; the others are still less in accordance with their text (cf. the valuable critical note on the recent literature in Holtzmann's *NT Theologie*, ii. 171-174).

Discussions of the doctrine of post-Canonical Judaism may be found in *Hamburger, Real-Encyc.* ii. 102 f., art. 'Bestimmung'; Weber, *Jüd. Theol.* 148 ff., 206 ff.; Schürer, *HJP* ii. ii. 14 f. (cf. p. 2 f., where the passages from Josephus are collected); Edersheim, *Life and Times of Jesus*, i. 316 ff., art. 'Philo' in Smith and Wace, 383*, and *Speak. Com.* on Ecclesiasticus, pp. 14, 16; Ryle and James, *Palms of Solomon* on 9th and Introd.; Montet, *Origines des partis saducéen et pharisaïen*, 258 f.; Holtzmann, *NT Theologie*, i. 32, 55; P. J. Müller, *De Gotsleer der middeleeuwische Joden*, Groningen, 1898; further literature is given in Schürer.—For post-Canonical Christian discussion, see the literature at the end of art. ELECTION in the present work, vol. i. p. 681.

PREDICTION.—See PROPHECY, p. 120 f.

PRE-EXISTENCE OF SOULS.—The only hint in NT of a belief in the existence of human souls prior

to birth is in Jn 9th, where the disciples of Jesus put the question, 'Rabbi, who did sin, *this man*, or his parents, that he should be *born blind*?' The *prima facie* interpretation of this passage certainly is that the disciples believed it possible that the soul of this man had sinned before the man was born. Many commentators, as, e.g., Dr. David Brown, hold this to be untenable, because 'the Jews did not believe in the pre-existence of souls.' If by this is meant that this belief did not form part of the older Jewish religion, that would be correct, for the tenor of OT teaching is distinctly traducian. In Gn 2nd we are taught that the soul of the first man was due to the Divine in-breathing; and Gn 5th tells that 'Adam begat a son, after his image.' But to affirm that Jews in Christ's time did not believe in pre-existence, is simply inaccurate. The disciples of Jesus had at all events some points of affinity with the Essenes; and Josephus expressly states that the Essenes believe that the souls of men are immortal, and dwell in the subtlest ether; but, being drawn down by physical passion, they are united with bodies, as it were in prisons (*BJ* ii. viii. 11). In Wis 8th the doctrine is clearly taught: 'A good soul fell to my lot: nay rather, being good I came into a body that was undefiled.' Philo also believed in a realm of incorporeal souls, which may be arranged in two ranks: some have descended into mortal bodies and been released after a time; others have maintained their purity, and kept aloft close to the ether itself (Drummond, *Philo Judæus*, i. 336). In the Talmud and Midrash, pre-existence is constantly taught. The abode of souls is called *Guph*, or the Treasury (רִמְזָה), where they have dwelt since they were created in the beginning. The angel Lilith receives instruction from God as to which soul shall inhabit each body. The soul is taken to heaven and then to hell, and afterwards enters the womb and vivifies the fetus. (Weber, *Lehren des Talmud*, 204, 217 ff. [*Jüd. Theologie auf Grund des Talmud*], etc. 212, 225 ff.).

Whence did Judaism derive a creed so much at variance with its earlier faith? Most probably from Plato. There are some scholars, however, who find support for the doctrine even in the OT: e.g. Job 1st 'Naked came I from my mother's womb, and naked shall I return thither.' To find pre-existence here, one must suppose the mother's womb to be the abode of souls, and 'I' to be the naked soul. Sir 40th seems to be explaining the word 'thither' in Job 1st, when it says, 'Great travail is created for every man, from the day they go forth from their mother's womb to the day of their return to the mother of all living.' Again, in Ps 139th some scholars find an account of the origin, first, of the body, then of the soul: 'Thou hast woven me in the womb of my mother. My substance was not hid from thee, when I was formed in the secret place, when I was wrought in the depths of the earth.' Since the doctrine of pre-existence is not in the line of Revelation, most divines are reluctant to admit that it is taught in these passages. Dr. Davidson on Job 1st says, 'The words "my mother's womb" must be taken literally; and "return thither" somewhat inexactly, to describe a condition similar to that which preceded entrance upon life and light.' And as for Ps 139th, Oehler, Dillmann, and Schultz prefer to interpret it of the formation of the *body* in a place as dark and mysterious as the depths of the earth. The passage in Jn 9th simply represents the earlier creed of the disciples. There is no evidence that it formed part of their mature Christian faith.

J. T. MARSHALL.

PREPARATION DAY (ἡ παρασκευή).—In the Gospels the day on which Christ died is called 'the

Preparation' (Mt 27⁶², Mk 15⁴², Jn 19³¹), 'the day of (the) Preparation' (Lk 23⁵⁴), 'the Jews' Preparation (day)' (Jn 19³²), 'the Preparation of the pass-over' (Jn 19³⁴). In Mk and Lk it is further defined by the clauses, 'that is, the day before the Sabbath' (προσάββατον), and 'the Sabbath drew on.' 'The Preparation' therefore appears to have been the regular name for the sixth day of the week as 'Sabbath' was for the seventh. This is confirmed by Jos. (*Ant.* XVI. vi. 2), where it is said that Augustus relieved the Jews from certain legal duties on the Sabbath and on 'the Preparation which preceded it from the ninth hour.' In Jth 8⁶ mention is made of προσάββατα as well as σάββατα, and also of προνομηνιαί (day preceding the festival of new moon); cf. also the LXX in Ps 92 (93) title: εἰς τὴν ἡμέραν τοῦ προσάββατου. In the Talm. also the sixth day is called ערב (evening), and the same word is used in the Syriac Gospels (*Arubhā*); while, in ecclesiastical writers beginning with the *Teaching of the Apostles* (viii.), παρασκευή is the regular name for Friday, as it still is in modern Greek. The title naturally arose from the need of preparing food, etc., for the Sabbath (see SABBATH). It was apparently applied first to the afternoon of the sixth day and afterwards to the whole day.

The phraseology in Jn 19³⁴ ('it was the Preparation of the Passover') is, however, held by many expositors to indicate that by this term St. John meant the preparation for the paschal feast, i.e. Nisan 14. Some conclude that he used the term differently from the Synoptists, and as equivalent to the rabbinic ערב תשעה באדר (passover-eve); this being part of the alleged difference between him and them as to the date of Christ's death. Westcott (*Introd. to Gosp.* 1875, p. 339), on the other hand, argues that the Synoptists also meant 'preparation for the passover.' But the latter view forces their language, and St. John's phrase may properly mean 'the Preparation (day) of the paschal feast,' i.e. the Friday of passover-week. This is made the more probable by the Synoptists' use of it, and by its appearance, as the name for Friday, in so early a work as *The Teaching of the Apostles*. Its use in Jn 19³¹⁻³² also best accords with this interpretation.

G. T. PURVES.

PRESBYTER.—See BISHOP, CHURCH GOVERNMENT, and following article.

PRESBYTERY (πρεσβυτέριον).—The Gr. word is used in NT for the Jewish Sanhedrin (Lk 22⁶³, Ac 22³). See SANHEDRIN. It also occurs once where the connexion shows that it refers to the body of elders in a church, Timothy receiving a spiritual gift through the imposition of the hands of the presbytery (1 Ti 4¹⁴). This implies a certain corporate unity in the collective action of the elders. Wherever the eldership appears in NT there is a plurality of elders. We have no means of discovering how many there were in each presbytery. The only numerical reference to the subject in NT is descriptive of the heavenly presbytery (Rev 4⁴ etc.), where the number 'twenty-four' is evidently mystical, referring perhaps to the double of the 'twelve,' which is drawn from the twelve tribes of Israel, or the twelve patriarchs together with the twelve apostles, or to the twenty-four courses of the priests (Simcox, *Rev.* p. 31). Probably the number would vary according to the size of the church, as the number of elders in a synagogue varied according to the population of Jews in its locality.

We have no evidence that in the earliest times there was a presbytery in every church. The references to discipline in Romans, Galatians, and esp. in 1 and 2 Corinthians, show that if presbyteries existed in the churches addressed they were not very prominent or powerful. The silence of

St. Paul on the subject suggests the inference that at Corinth, at all events, and possibly also elsewhere, no presbytery had yet been formed. On the South-Galatian theory, however, Ac 14²³ would indicate that there must have been elders in the churches to which the Ep. to Gal. was sent. At first the presbytery was almost, if not entirely, confined to Jewish churches (Hatch in *Dict. Chr. Ant.* art. 'Priest,' p. 1699 f.). Still the title πρεσβύτερος and the organization of local government in Gr. cities, still more the use of this title in religious guilds, must have prepared for the acceptance of a presbytery in Gentile circles of Christians (Löning, *Die Gemeindeverfassung*, p. 9). Even among the Jews, however, it does not appear that there were elders in connexion with every synagogue (Schürer, *HJP* II. ii. 27). It is reasonable, therefore, to conclude that at first the organization of a presbytery proceeded more rapidly in some churches than in others.

In teaching, of course, the presbyters would have acted separately according to their individual gifts and opportunities. It would be in government and discipline that the corporate presbytery discharged its principal functions. These appear to have been the chief functions of the presbyters, as they are the most frequently referred to. It was not every elder who undertook the work of teaching (1 Ti 5¹⁷); but there is no indication that any of the elders were excepted from the duty of ruling. The function of exercising a general oversight of their church is implied in the use of the words ἐπισκοπεῖν (1 P 5¹⁷) and ἐπισκοπῆς (Clem. Rom. 1st Ep. xlv. 1) for the duties of elders. At Jerusalem the presbytery served as a board of church finance, the contributions for the poor being delivered into the hands 'of the elders' (Ac 11³⁰). These elders acted jointly at the 'Jerusalem council,' where they appear associated with the apostles—'the apostles and the elders, with the whole church' (Ac 15²²). The reference to the ordination of Timothy shows that in performing that function the elders acted in concert (1 Ti 4¹⁴). The analogy of the synagogue would suggest that in the discharge of their administrative and judicial functions the presbyters were united into a council, corresponding to the local Jewish συνέδριον. We have no account of the way in which they came to a decision. The precedent of the Sanhedrin would suggest that they would discuss questions and decide by vote. There is no indication that there was ever a serious discord in a presbytery during NT times. The question of the presidentship in the primitive presbytery is most obscure. St. James is president of the church at Jerusalem; but his case is altogether exceptional. As the brother of Jesus, he seems to have had a personal pre-eminence given to him. It does not appear that he was a presbyter. No similar pre-eminence is seen in any other church. The apostles, when they visit a church, naturally take the lead. But that is only temporary. The emergence of one elder over the head of his brethren with the exclusive use of the name 'bishop,' which was previously given to a plurality, if not to the whole, of the elders, is not found in NT, nor does it appear before the 2nd cent. In the NT the presbytery seems to consist of a body of elders of equal rank. See BISHOP, CHURCH, CHURCH GOVERNMENT, ELDER.

W. F. ADENEY.

PRESENT.—See GIFT.

PRESENTLY in AV always means 'at once' instead of, as now, 'soon, but not at once.' It occurs in 1 S 21⁶ (עַתָּה, AVm 'as on the day,' RVm 'first'); Pr 12¹⁶ (עַתָּה, AVm 'in that day,' RVm 'openly'); Sir 9¹³ (no Greek, RV omits); Mt 21¹³

(παροχρημα, RV 'immediately'); 26³³ (παρστήσει μοι, AV 'will presently give me,' RV 'will even now send me'); Ph 2²⁵ (ἐξαιτήσῃ, RV 'forthwith'). In the same sense it is used also in the Preface to AV, as 'Neither were we barred or hindered from going over it again, having once done it, like Saint Hierome, if that be true which himself reporteth, that he could no sooner write anything, but presently it was caught from him and published, and he could not have leave to mend it.' Cf. Fuller, *Holy Warre*, 178, 'The Dominicans and Franciscanes . . . were no sooner hatched in the world, but presently chirped in the pulpits'; and *Holy State*, 14, 'Base is their nature who . . . will let go none of their goods, as if it presaged their speedy death; whereas it doth not follow that he that puts off his cloke must presently go to bed.'

J. HASTINGS.

PRESIDENT occurs in EV only in Dn 6^{2, 3, 4, 6, 7}, as tr² of πρ (only in plur. πρῆς, emphat. κρῆς), which is probably a loanword from some Persian derivative of *sar* 'head,' and thus = 'chief' (Prince, *Dan.* p. 234). Daniel is said to have been one of the three 'presidents' who were set by Darius over the 120 satraps of his empire. Theod. renders in the above passage by τακτικοί except in v.⁷, where he has στρατηγοί: LXX by ἡγούμενοι in v.³, where alone the term is directly translated.

PRESS (δύλος) is used for a crowd in Mk 2⁴ 57³⁰, Lk 8¹⁹ 19¹; RV always 'crowd.' Cf. Jn 5¹³, Tind., 'Jesus had gotten him selfe awaye, because that there was preace of people in the place'; Elyot, *Governour*, ii. 292, 'Such noble courage was in great kyng Alexander, that in hys warres agayne Darius, he was sene of all hys people fightynge in the prease of his enemyes bare heded'; and Spenser, *FQ* i. iii. 3—

'Yet she most faithfull ladie all this while
Forsaken, wofull, solitarie mayd,
Far from all peoples preace, as in exile,
In wilderness and wastfull deserts strayd,
To seeke her knight.'

The verb to press is used in the same sense: Gn 19⁹ 'They pressed sore upon the man, even Lot, and came near to break the door' (σπῆναι); but in v.⁵ AV 'press upon,' RV 'urge,' and in 33¹¹ AV and RV 'urge,' the same word is used figuratively; 2 Mac 14⁹ 'Be careful for . . . our nation which is pressed on every side' (τοῦ περισταμένου γένους ἡμῶν, RV 'our race, which is surrounded by foes,' RVm 'is hardly bested'); Mk 3¹⁰ 'Insomuch that they pressed upon him for to touch him' (ὥστε ἐπιπίπτει αὐτῷ, AVm 'rushed upon him,' RVm 'fell upon him'); Lk 5¹ 'As the people pressed upon him to hear the word of God' (ἐν τῷ τὸν δῆλον ἐπικεῖσθαι αὐτῷ); 8⁴⁵ 'The multitude throng thee and press thee' (οἱ δῆλοι συνέχουσιν σε καὶ ἀποθλίβουσιν, RV 'the multitudes press thee and crush thee'). From this it is easy to pass to the sense of urgent endeavour, as Lk 16¹⁶ 'Since that time the kingdom of God is preached, and every man presseth into it' (πᾶς εἰς αὐτὴν βιάζεται, RV 'every man entereth violently into it'); and Ph 3¹⁴ 'I press toward the mark' (κατὰ σκοπὸν διώκω, RV 'I press on toward the goal'). In Ac 18³ we have an application of the same meaning, but more figurative: 'Paul was pressed in the spirit and testified' (συνείχετο τῷ πνεύματι, edd. τῷ λόγῳ, RV 'was constrained by the word'). Cf. Lv 21¹⁷ Tind., 'No man of thii seed in their generations that hath any deformyte apon him, shall prese for to offer the bred of his God'; Lk 14⁷ Tind., 'He put forthe a similitude to the gastes, when he marked how they preased to the hyst rounes'; Holland, *Marcellinus*, p. 70 (ed. 1609), 'Whiles the barbarous enemies preassed on all in plumpes and heapes.'

J. HASTINGS.

PRESS, PRESSFAT.—See FAT and WINE.

PREVENT.—This word is more frequently used in AV than in any previous version. It does not occur in Wyclif, and in Tindale but rarely. The AV was translated at the time of its greatest popularity. Its meaning is, after the Lat. *prævenire* and the Fr. *prévenir*, 'to be before,' 'to anticipate.' Very often the word has practically the opposite of its modern meaning. In a note to Jn 3¹⁸ the Rhemish translators say, 'The obstinate Heretike is condemned by his owne judgement, preventing in him self, of his owne free wil, the sentence both of Christ and of the Church.' The Heb. verb so translated in AV is always (צָרַף), chiefly in the Piel, twice (Job 41¹¹, Am 9¹⁰) in the Hiphil. The Greek verbs are φθάνω (Wis 4⁷ 6¹³ 16²⁵, 1 Th 4¹⁵), or προφθάνω (1 Mac 10²³, Mt 17²⁶), and once προκαταλαμβάνω (1 Mac 6²⁷).

1. *To be before, anticipate:* Ps 88¹³ 'In the morning shall my prayer prevent thee' (LXX προφθάσει σε, Vulg. *præveniet te*, Cov. 'cometh my prayer before thee,' Perowne 'cometh to meet thee,' RV as Cov. 'shall come before thee'); 119^{147, 148} 'I prevented the dawning of the morning and cried' . . . 'mine eyes prevent the night watches' (LXX προφθάσαν με . . . προφθάσαν οὐ φθαλμοί μου, Vulg. *præveni in maturitate . . . prævenērunt oculi mei*, Purvey 'I befor cam in ripenesse . . . myn eyen befor camen to thee ful eerli,' Cov. 'Early in the mornynge do I erie unto the . . . myne eyes prevente the night watches,' Cheyne 'I forestalled the daylight and cried for help . . . mine eyes outgo the night watches,' de Witt 'I am up before dawn . . . mine eyes forestall every watch in the night'); Wis 4⁷ 'Though the righteous be prevented with death, yet shall he be in rest' (ἐάν φθάσῃ τελευτήσῃ, Vulg. *si morte præoccupatus fuerit*, Cov. 'be overtaken with death,' Gen. 'be prevented with death,' RV 'though he die before his time'); 6¹³ 'She [Wisdom] preventeth them that desire her, in making herself first known unto them' (φθάνει τοὺς ἐπιθυμοῦντας προγνωσθῆναι, Vulg. *Præoccupat qui se concupiscunt, ut illis se prior ostendat*, Cov. 'She preventeth them that desyre her,' RV 'She forestalleth them that desire to know her'); 16²⁸ 'We must prevent the sun to give thee thanks' (δεῖ φθάνειν τὸν ἥλιον, Vulg. *oportet prævenire solem*, Gen. 'We oght to prevente the sunne rising to give thanks unto thee,' RV 'We must rise before the sun to give thee thanks'); Mt 17²⁸ 'When he was come into the house, Jesus prevented him, saying, What thinkest thou, Simon?' (προφθάσεν αὐτὸν ὁ ἰησοῦς, Vulg. *prævenit eum Iesus*, Wyc. 'Jhesus came before hym,' Tind. 'Jesus spake fyrst to him,' Cov. 'Jesus prevented him,' RV as Tind. 'Jesus spake first to him'); 1 Th 4¹⁵ 'We which are alive and remain unto the coming of the Lord shall not prevent them which are asleep' (οὐ μὴ φθάσωμεν τοὺς κοιμηθέντας, Vulg. *non præveniemus eos qui dormierunt*, Wyc. 'schulen not come before hem that slepten,' Tind. 'shall not come yerre they which slepe,' Gen. 'shal not prevent them which slepe'; RV 'shall in no wise precede them that are fallen asleep').

The following quotations illustrate this first meaning:—

Udall, *Erasmus' Paraphrase*, fol. vii., 'the Gentyles that wer far of do prevente the Jewes which wer thought to be next unto God'; Hall, *Contemplations*, ii. 122, 'When he was upon the sea of Tiberius . . . they followed him so fast on foot that they prevented his landing'; North's *Paraphrase*, 879, 'The conspirators, having prevented this danger, saved themselves'; Mk 14⁸ Rhem. 'She hath prevented to anoint my body to the burial'; Milton, *Hymn on the Nativity*—

'See how from far upon the eastern roade
The star-led Wizards haste with Odours sweet
O run, prevent them with thy humble ode,
And lay it lowly at his blessed feet;
Have thou the honour first thy Lord to greet.'

2. To anticipate for one's good: Job 41¹¹ 'Who hath prevented me that I should repay him?' (ὁπότε ἔσται μοι, * Vulg. *Quis ante dedit mihi ut reddam ei?* Cov. 'Who hath given me eny thynge afore hande, that I am bounde to rewarde him agayne?' RV 'Who hath first given unto me, that I should repay him?'); Ps 21³ 'Thou preventest him with the blessings of goodness' (LXX *πρόφθασας αὐτὸν ἐν εὐλογίαις χρηστότητος*, Vulg. *prævenisti eum in benedictionibus dulcedinis*; Wyc. 'thou wentist befor him in blessingus of sweetnesse,' Cov. 'thou hast prevented him with liberall blessings'); 59¹⁰ 'The God of my mercy shall prevent me' (LXX *ὁ θεὸς μου, τὸ ἔλεος αὐτοῦ πρόφθάσει με*, Vulg. *Deus meus, misericordia ejus præveniet me*, Gen. 'My merciful God will prevent me'; Perowne, 'My God with his loving kindness shall come to meet me'); 79⁸ 'Let thy tender mercies speedily prevent us' (LXX *ταχὺ προκαταλάβετσαν ἡμᾶς οἱ οἰκτιρμοὶ σου*, Vulg. *cito anticipent nos misericordiae suae*, Gen. 'Make haste and let thy tender mercies prevent us,' de Witt 'Let thy mercies with speed come to meet us'); Is 21¹⁴ 'They prevented with their bread him that fled' (LXX *ἄρτοις συναντᾶτε τοῖς φεύγουσιν*, Vulg. *cum panibus occurrere fugienti*, Wyc. 'With loaves agencometh to the fleende,' Purvey 'Renne ye with looves to hym that fleeth'; Cov. 'Meet those with bread that are fled,' Gen. 'Prevent him that fleeth with his bread,' Cheyne 'With his bread meet the fugitive,' Skinner 'Meet the fugitive with bread [suitable] for him'; RV 'The inhabitants of Tema did meet the fugitives with their bread' [so Dt 23⁴ AV itself for same Heb.]).

Illustrations of this meaning are:

Pr. Bk. (1649) *End of Communion*, 'Prevent us, O Lord, in all our doings with thy most gracious favour'; Art. X. 'We have no power to do good workes pleasaunt and acceptable to God, without the grace of God by Christe preventing us'; Archbishop Hamilton's *Catechism*, fol. xvii, 'We preventit nocht God with our life, I understand him first, but he preventit us first with his life'; Udall, *Erasmus's Paraphrase*, fol. xcvi, 'Whereas the gospel of my death shall bee preached throughout all the worlde, this woman also shall be mencioned, whiche, with a godly and an holy duty hath prevented my sepulture and buriall'; Hall, *Works*, 466, 'He whose goodnesse is wont to prevent our desires will not give denials to our importunities'; Ro 12¹⁰ Rhem. 'With honour preventing one another.'

3. To get before or forestall so as to hinder: 2 S 22⁵ || Ps 18⁵ 'The snares of death prevented me' (LXX *πρόφθασάν με σκληρότητες* [Ps 18⁵ *παγίδες*] *θανάτου*, Vulg. *prævenierunt* [Ps 18⁵ *præoccupaverunt*] *me laquei mortis*, Wyc. 'There wenten before me the gnaris of deth,' Dou. 'The snares of death have prevented me,' RV 'The snares of death came upon me'; 22¹⁹ || Ps 18¹⁸ 'They prevented me in the day of my calamity' (LXX *πρόφθασάν με ἡμέραι θλίψεως μου* [Ps 18¹⁸ *ἐν ἡμέρᾳ κακώσεώς μου*], Vulg. *Prævenit* [Ps 18¹⁸ *prævenierunt*] *me in die afflictionis mee*, Cov. in Ps 18¹⁸ 'They prevented me in the tyme of my trouble,' Cheyne ['Parchment' ed.] 'They surprised me in the day of my calamity,' RV 'They came upon me in the day of my calamity'; Job 3¹³ 'Why did the knees prevent me?' (LXX *ἵνα τί δὲ συνήτησαν μοι τὰ γόνατα*; Vulg. *Quare exceptus genibus?* Gen. 'Why did the knees prevent me?' RV 'Why did the knees receive me?'); 30⁷ 'The days of affliction prevented me' (LXX *πρόφθασάν με ἡμέραι πτωχίας*, Vulg. *prævenierunt me dies afflictionis*, Cov. 'The dayes of my trouble are come upon me,' Dou. 'The dayes of affliction have prevented me,' RV 'Days of affliction are come upon me'; Am 9¹⁰ 'The evil shall not overtake nor prevent us' (LXX *οὐ μὴ ἐγγίῃ οὐδὲ μὴ γένῃται ἐφ' ἡμᾶς τὰ κακά*, Vulg. *non veniet super nos malum*, Driver 'come in front about us'); 1 Mac 6⁷ 'If thou dost not prevent them quickly, they will do greater things

than these' (ἐὰν μὴ προκαταλάβῃ αὐτοὺς, Vulg. *Nisi prævenieris eos*, Cov. 'If thou dost not prevent them,' RV 'If ye are not beforehand with them'); 10²⁸ 'What have we done that Alexander hath prevented us in making amity with the Jews to strengthen himself?' (προέφθακεν ἡμᾶς, Vulg. *præoccupavit nos*, Cov. 'hath prevented us,' RV 'hath been beforehand with us'); 2 Mac 14²¹ 'Knowing that he was notably prevented by Judas' policy (ὅτι γενναίως ὑπὸ τοῦ ἀνδρὸς ἐστρατήγηται, Vulg. *fortiter se a viro præventum*, Cov. 'When he knewe that Machabeus had manfully prevented him,' RV 'When he became aware that he had been bravely defeated by the stratagem of Judas').

Take the following as illustrations:

Fuller, *Holy Warre*, 214, 'Was he old? let him make the more speed, lest envious death should prevent him of this occasion of honour'; *Holy State*, 154, 'Expect not, but prevent their craving of thee'; Adams, *Exposition upon 2nd Peter*, 55, 'Satan's employment is prevented, when he finds thee well employed before he comes'; Knox, *Works*, iii. 319, 'Peter was syncking downe, and looked for no other thynge but present death, and yet the hande of Christe prevented hym'; Milton, *Sonnets*—

'Doth God exact day-labour, light denied?
I fondly ask. But Patience, to prevent
That murmur, soon replies, God doth not need
Either man's work or his own gifts.'

J. HASTINGS.

PREY.—Prey, from Lat. *præda*, booty (perhaps from *præ-hendo*, to seize beforehand), through Old Fr. *præie*, *præie*, is now narrower in meaning than formerly. In AV it includes *booty* or *spoil*. Heb. words properly denoting a wild beast's prey are (1) *תֶּרֶף* *tereph*, from *תָּרַץ* to tear, to rend (the verb itself is tr. 'prey' in Ps 17¹² 'Like as a lion that is greedy of his prey,' *תֶּרֶף* *tereph*, AVm 'that desireth to ravine,' Cheyne 'longing to tear in pieces'). *Tereph* is tr. 'prey' in Gn 49⁹, Nu 23²⁴, Job 4¹¹ 24⁵ (RV 'meat'), Ps 76⁴ 104²¹ 124⁵, Is 5²⁸ 31⁴, Ezk 19³ 22²⁵⁻²⁷, Am 3⁴, Nah 2¹² 13³¹. This is also the proper meaning of (2) *הֶתֶפֶח* *hetheph* (from *תָּפַח* to seize), and it is so tr. in its only occurrence, Pr 23²⁸ 'She also lieth in wait as for a prey,' AVm 'as a robber,' which is the RV text, RVm 'as for a prey.' Also (3) *אֶד* *ad* (from *אָדָה* to attack?), means 'prey,' and is so tr. in Gn 49²⁷, Is 33², Zeph 3⁸, its only occurrences (against the view of Hitzig and others that it is *אֶד* in this sense that appears in *אֶדָה* of Is 9⁵ 6¹, see Dillmann, *ad loc.*). And (4) *לֶחֶם* *lechem*, which means 'food,' is legitimately tr. 'prey' in Job 9²⁸ 39²⁸. But all the remaining words mean *booty* or *spoil* taken in war or snatched as one's share. The chief word is *בַּז* *baz* (from *בָּזַח* to plunder, take as spoil; the verb itself is rendered 'take for a prey' in Dt 2²⁵ 3⁷, Jos 8² 27¹¹, Est 3¹⁵ 8¹¹; 'make a prey' in Ezk 26¹²; and 'prey upon' in Jer 30¹⁶). A late form of *baz*, *הָבַז*, is tr. 'prey' in Neh 4⁴ ('give them for a prey,' RV 'give them up to spoiling,' Amer. RV 'for a spoil'), Est 9¹³ 16 (RV 'spoil'), Dn 11²⁴ (so RV). The common word *שָׁלַל* *shalal* (from *שָׁלַח* to plunder, the Hithpolel is tr^d 'make oneself a prey' in Is 59¹⁵), which over sixty times is rendered 'spoil,' is tr^d 'prey' in Jg 5³⁰ 1er 8²⁴ 25 (RV 'spoil'), Is 10² (RV 'spoil'), Jer 21⁹ 38² 39¹⁸ 45⁵ (so RV). The only remaining word is *מַלְכָּאֵה* *mal'kôah*, which simply means something captured (from *קָחַ* to take), which is given as 'prey' in AV and RV in Nu 31¹¹ 12²³ 27, Is 49²⁴ 25; in Nu 31²³ AV gives 'booty,' RV 'prey.'

For prey meaning booty cf. Merlin (in Early Eng. Text. Soc.), ii. 152, 'So thei entred in to the londe, and toke many prayes, and brent townes and villages, and destroyed all the countrees'; Chapman, *Iliads*, ii. 205—

'Come, fly
Home with our ships; leave this man here to perish
with his preys';

* The LXX is differently, *τίς ἀντιπρόσεται μοι καὶ ὑπομνή;* St. Paul therefore is nearer to the Heb. than to the LXX in Ro 11²³ *τίς προειπάκει αὐτὸν, καὶ ἀνταποδίδεται αὐτῷ;*

and Shaks. *II Henry VI.* iv. iv. 51—

'The rascal people, thirsting after prey,
Join with the traitor, and they jointly swear
To spoil the city and your royal court.'

J. HASTINGS.

PRICE (from Lat. *pretium*, worth, value, through Old Fr. *pris*, *preis*) means in AV the worth of a person or thing in the widest sense, and not in money only. See especially Mt 13⁴⁶ 'When he had found one pearl of great price' (ἐνα πολύτιμον μαργαρίτην), and 1 P 3⁴ 'the ornament of a meek and quiet spirit, which is in the sight of God of great price' (πολυτελής). Cf. Chaucer, *Sir Thopas*, 185, 'Men speke of romances of prys'; He 13⁴ Tind. 'Let wedlocke be had in pryce in all poyntes.'

The verb to price (spelt 'prise') occurs in Zec 11¹³ 'A goodly price that I was prised at of them.' Cf. Mt 27⁹ Rhem. 'They tooke the thirtie pieces of silver, the price of the priced, whom they did price of the children of Israel.' J. HASTINGS.

PRICK.—See GOAD in vol. ii. 194^b.

PRIESTS AND LEVITES.—

1. The names *kōhēn* and *lēwt*.
2. The priesthood in the earliest times.
3. The priesthood from David to Josiah.
4. The priesthood according to Deuteronomy.
5. The priesthood from Josiah's reform to the Exile.
6. The priesthood in Ezekiel's State of the future.
7. The priesthood from Ezekiel to Ezra.
8. The priesthood according to the law contained in the 'Priestly Writing.'
 - a. The priests in the Law of Holiness and in particular *tôrôth*.
 - b. The Aaronite priests.
 - c. The high priest.
 - d. The Levites.
 - e. The serving women.
 - f. The revenues of the priests and Levites.
 - g. The date of the priestly system in the 'Priestly Writing.'
9. The priesthood from Ezra to the Chronicler.
10. The priesthood after OT times.
 - a. Priests and Levites.
 - b. The revenues of the priests and Levites.
 - c. The duties and offices of the priests.

Literature.

[Throughout this article the abbreviation *Gesch.*, when not preceded by an author's name, stands for Baudissin's *Geschichte des alttest. Priesterthums*, Leipzig, 1889. Whenever a citation consists simply of an author's name and the number of a page, the reference is to that work of his whose title will be found in the Literature at the end of the article.]

1. THE NAMES *KÖHEN* AND *LEWI*.—The name for 'priest' in the OT is *kōhēn* (כֹּהֵן). The same word (כֹּהֵן) is met with in Phœnician inscriptions as the official name of the priest, as well as the feminine form כֹּהֵנִי. The corresponding word in Arabic, *kāhin*, is employed to designate the soothsayer. It is *per se* quite conceivable that the priests of the Hebrews were originally soothsayers (Stade, *GVI*, Bd. i., Berlin, 1887, p. 471; cf. Kuenen, *De Godsdienst van Israël*, Bd. i., Haarlem, 1869, p. 101). There are, certainly, no traces in the OT of ecstatic conditions on the part of the priests, but one of their most important functions in the earlier history of Israel was the giving of oracles by means of the lot. A reference to this is to be discovered in the Urim and Thummim which are described as still present in the dress of the high priest. But the Arabic usage is not decisive for the original meaning of the word *kōhēn*; the sense borne by *kāhin* may be secondary, for the Arabs borrowed largely, in matters connected with the cultus, from the Israelites (so also Van Hoonacker, *Sacerdote*, etc. p. 235 f.). The ecstatic form of prophecy appears in the OT coupled with priestly functions only in the story of the youth of Samuel, to whom God speaks in a revelation, while he is officiating as priest at the sanctuary (1 S 3¹⁰). This unusual coupling of the priestly and

the prophetic office may be due in this instance to the combination of two conceptions of the person of Samuel: one of which thought of him, as is the case for the most part in the story of his youth, as priest; whereas the other, which alone has survived in the narratives relating to his later activity, thought of him as prophet.

The root meaning of the word *kōhēn* does not appear to speak in favour of its being a designation of the 'seer.' Derived from a verb *kāhan*, probably equivalent in meaning to *kūn* 'stand,' *kōhēn* will be explained most simply as 'he that stands.' In other instances, too, the expression 'stand (עמד) before Jahweh' is used of the priestly office, especially of the service at the altar which the priest performs standing. This last, then, is perhaps what is referred to also in the name *kōhēn*, which will then designate the priest as offerer, or, since 'stand before one' is said of service in general, as servant of the deity. This general conception deserves the preference, because in ancient times it is not the offering of sacrifice but other functions that appear as the special duty of the priests. The sense of 'servant' is obtained for *kōhēn* also by Hitzig (on Is 61¹⁰), who connects the word with the Piel *kīhēn* (Is 61¹⁰ = יָכִין 'make ready'; elsewhere, indeed, *kīhēn* is a derivative from *kōhēn* [see Ewald, *Heb. Sprache*, § 120e]), to which he assigns the sense 'parare, aptare, and then ministrare.'

The word *kēmārim* (כִּמְרִים) is used in the OT only of heathen priests. It answers to the word כִּמְרִי found in Aramaic inscriptions, Syr. *kūmrā* 'priest,' and hence in the OT is manifestly a word borrowed along with their idolatry from the Arameans.

In Deuteronomy the priests are called 'Levite priests' (לֵוִיתִים כֹּהֲנִים), and already in a very ancient narrative in the Bk. of Judges (chs. 17 f.) we find a 'Levite' (לֵוִי) regarded as having a special call to priestly functions. In like manner the Jehovistic book of the Pentateuch (JE) contains a tradition, according to which Moses assigned priestly rights to the 'sons of Levi' (Ex 32²⁸). [whether 32²⁸, belonged to the original Jehovistic book has, indeed, been doubted by Kuenen, *De boeken des ouden verbonds*², Leiden, 1887 ff., § 13, note 21]; cf. Jos 13¹⁴.³³ 187, see *Gesch.* p. 100 f.). In the prophetic writings the name 'Levites' occurs for the first time in the Bk. of Jeremiah (33¹⁷). 'Levite priests' (לֵוִיתִים כֹּהֲנִים), in a section which is wanting in the LXX, and is pretty certainly not the work of Jeremiah, but, judging from v. 24, was probably composed by an exile in Babylon. During the Exile the term 'Levites' is witnessed to by Ezekiel. But, in view of Jg 17 f., there can be no doubt of the higher antiquity of the term, even apart from the passages cited above, regarding which doubts have been expressed whether they belong to the pre-Deuteronomic elements of the Jehovistic book. The Bk. of Dt presupposes the name as generally current, and Dt 33, in which (vv. 8-11) Levi is represented as holder of the priesthood, dates to all appearance from a period prior to the Fall of Samaria.

The view of the author of the Deuteronomic law (18¹), as well as that expressed in the Blessing of Moses (Dt 33⁸⁻¹¹), and in the tradition embodied in the 'Priestly Writing' of the Pentateuch (also in Jos 13¹⁴.³³ [JE?]), is that the term 'Levites' indicates that the priests belong to a tribe of Levi. The origin of this priestly designation and this tribal name is obscure. The Blessing of Jacob, which as a whole is not earlier than the monarchical period, presupposes a tribe of Levi without any allusion to its call to priestly functions (Gn 49⁵⁻⁷). On the other hand, the OT contains certain indications which appear to presuppose that the

word *lêwi* was once regarded as the official name of the priest. In the Jehovistic book Aaron is distinguished from Moses as called 'the Levite' (Ex 4th), although the two are conceived of as brothers. In this passage there is certainly no reason to pronounce (with Nowack, p. 99) the designation an interpolation introduced under the influence of the Priests' Code, for such an influence would have led to Aaron's being called, not 'the Levite,' but 'the priest.' The Levite who figures in Jg 17 f. is of the tribe of Judah, and hence, apparently, does not belong to a special tribe of Levi, unless perhaps he belonged to Judah merely as a settler, as appears to be the interpretation adopted in what should probably be pronounced a gloss, namely, 17^f (cf., however, *Gesch.* p. 184 f.). In any case, it is conceivable that the word *lêwi* was originally an official name, and only came afterwards to be treated as the patronymic for the particular family or guild which was considered to have been called to priestly service. At all events the coincidence of a tribal name with the priestly designation cannot be accidental, and accordingly one may not assume on the ground of Gn 49th that there was a tribe of Levi which afterwards disappeared, and that the Levitical priests have no connexion with it.

If the word *lêwi* was once an official name, then it might be possible that a reminiscence of this original sense has survived in an explanation of the word found in the Priests' Code (Nu 18th), although in itself this explanation is nothing more than a word-play. According to this passage, those who belong to the tribe of Levi are to attach themselves (*yillâwû, nilwû*) to Aaron, for the service of the tabernacle. The word *lêwi* is, as a matter of fact, probably to be derived from *lâwâh*, 'to twine, to attach oneself,' and might perhaps be used to designate an escort 'attaching itself,' such as the troop that escorted the wandering sanctuary of the nomad period of Israel's history (so *Gesch.* p. 73 f., following others, especially de Lagarde). The word would thus be not strictly a designation of the priest, but of a body from which by preference the priests were chosen. Since a special body with a genealogical connexion had presumably to be conceived of as set apart for the above-named duty of escorting the ark, it might happen in the end that *lêwi* was taken as the tribal name of this body.

This explanation of the word *lêwi* as an official name, finds, however, no certain support in the history that has come down to us, and it must always remain a difficulty to conceive of an alleged tribal name having originated from an official name, especially as in Gn 49th we have a view of the tribe of Levi presented in which there is no allusion to its being a priestly tribe. For this reason also it is not likely that *lêwi* is the name for foreigners, say Egyptians, who had 'attached' themselves to the Hebrews (so, following others, Renan, *Hist. du peuple d'Israël*, vol. i., Paris, 1887, p. 149 f., who makes Levi = *inquilinus*; see, further, on this point, *Gesch.* p. 70 f.). Besides, the view that the Levites were originally non-Israelites is extremely improbable, for the reason that Moses, the deliverer of Israel, who is reckoned to the tribe of Levi, was certainly a Hebrew. Moreover, Levi, the father of the tribe, is represented as son of one of those two wives of Jacob whose birth was equal to his own, and who were his relations. Levi's descent then was regarded as a pure Hebrew one. Hence, taking everything into account, the more probable conclusion is that *lêwi* was at first actually a tribal name, and only afterwards in a secondary way came to be treated as the official name of the priests because these were chosen from this tribe.

It is not impossible that the tribal name *Levi* is connected with the name *Leah* (לֵוִי) which is given as that of the mother of Levi (Wellhausen, *Geschichte Israels* [Prolegomena]¹, 1878, p. 149; Stade, *ZATW*, 1881, p. 115 f.), in which case it may remain an open question whether in *Leah* we are to find, with Stade (i.e., following Wetzstein), an animal name, 'wild cow.' The difficulty involved in the circumstance that Gn 49th is acquainted with a tribe of Levi but does not represent it as a priestly one, is not to be obviated by the assumption that this passage relates to pre-Mosaic conditions (so Van Hoonacker, *Sacerdoce*, etc. pp. 309, 311); for all the other sayings in the so-called Blessing of Jacob have to do with the time when Israel was settled in Canaan, and even the scattering of Levi among Israel, spoken of in Gn 49th, presupposes the settlement. There remains hardly any resource but to suppose that to the author of Gn 49th the want of a Levitical tribal territory presented itself so strongly as a punishment occasioned by the conduct of the father of the tribe, that he did not look beyond this penal condition of things to the honourable priestly vocation of the members of this tribe. What the conduct of the tribe had really been which occasioned the unfavourable judgment passed upon it, is a question we cannot answer. It is held by H. Guthe (*Geschichte des Volkes Israel*, Freiburg i. B., 1899, p. 169 f.) that certain descendants of a non-priestly dowerless tribe of Levi had procured maintenance for themselves by undertaking priestly functions, and that in this way *Levi* became a priestly appellation. But this view, which might otherwise be a possible one, can hardly be regarded with favour, because such a condition of things would not account for the relatively ancient tradition as to the relations of the tribe of Levi to the person of Moses (see below, § 2).

The above is the result of a consideration of the OT data. But if it should be established that in the Minean inscriptions the word *lawi'u* is a term for 'priest,' and that this is connected with the OT *lêwi* (Fr. Hommel, *AHT*, London, 1897, p. 278 f.), it will be necessary after all to think of the latter as an official name, and that an ancient Semitic one (otherwise Van Hoonacker, *Sacerdoce*, etc. p. 312 ff.).

On *bênê ha-lêwi* and *bênê ha-lêwiyym* (rare and late for the usual *bênê lêwi*), forms in which *lêwi* is treated as a gentile name, see Ed. König, 'Synaktische Excursus zum AT,' in *SK*, 1898, p. 537 ff.

2. THE PRIESTHOOD IN THE EARLIEST TIMES.—As everywhere in the history of religion, there may be recognized also in the beginning of Hebrew history a period when no special priestly class existed. Of course it is upon an artificially constructed basis that the view presented in the 'Priestly Writing' (P) of the Pentateuch rests, according to which neither sanctuary nor sacrificial acts nor a priestly class had any existence before the Divine revelation given through Moses. Even in the narratives of the Jehovistic book, relating to the pre-Mosaic period, there are scarcely to be discovered any reminiscences of the then condition of the cultus; but these narratives will hardly be wrong in representing relations which still persisted at a later period, as the only ones present in the patriarchal period, as when they describe the head of the family in the patriarchal house as exercising the priestly function of offering sacrifice. Besides this, we have in the Jehovistic book a single mention, during the patriarchal period, of inquiring at an oracle (Gn 25th), and also one reference to the giving of tithes (Gn 28th). Both these allusions imply the existence of a sanctuary with a priest in charge of it. Here the narrators

have momentarily forgotten the ancient situation which is assumed elsewhere, yet without expressly naming the priest on either occasion. The author of the prologue of the Bk. of Job, again, introduces his hero, whom he conceives of as a shepherd-prince living in remote antiquity in the land of Uz, as offering sacrifices for his family (Job 1⁸; cf. 42^{8d}, and contrast 12⁹ *kôhânim*). The story of Gn 14¹⁸⁻²⁰, where Abraham is represented as giving tithes to Melchizedek the priest-king of Salem, is, in its present form, a glorification of the later priesthood of Salem, i.e. Jerusalem.

According to a narrative contained in the Jehovistic book, Moses instituted a special priestly body when he set apart the 'sons of Levi' for this purpose (Ex 32²⁶⁻²⁸). In the first instance, Moses himself, according to this book, performs the sacrificial act (Ex 24⁶). In that descriptive narrative, which makes him receive the Divine revelations in the holy tent outside the camp to which the people went 'to seek Jahveh' (Ex 33^{7a}), the function of communicating oracles appears as a distinction conferred only upon Moses personally. But in this way he is clearly thought of as the presiding authority over the holy tent—in other words, as a priest. The Priestly Writing, on the other hand, makes Moses officiate as priest only upon the occasion of the instalment of the priests in their office (Ex 29); and from this point onwards, according to this source, priestly functions are discharged only by Aaron and his sons, who are selected from the body of the tribe of Levi for this purpose. According to a prophetic discourse interpolated into the older text of the history of the youth of Samuel (1 S 2^{27c}), God, during the bondage in Egypt, revealed Himself to the fathers' house of Eli, the priest of Shiloh, and chose this house out of all the tribes of Israel, to be priests. Here too, then, without any mention indeed of Aaron or Levi, appears the conception of an institution of the priesthood in the time of Moses. This conception, in the form in which it here makes its appearance, cannot be of quite recent origin, since in opposition to the later claims of the Zadokite priesthood, which existed from the time of Solomon, it represents the Elidæ, who were different from these, as the original legitimate priests. It is in itself quite credible that Moses, in his arrangements for the Israelitish nation and its cultus, made provision for the performance of religious service by a special body, and it is a very plausible supposition that he who is represented as belonging like Aaron to the tribe of Levi, selected his own family for this office. Among the ancient Arabs as well, the priesthood was largely in possession of special families, which did not belong to the tribe amongst whom they exercised their office (Wellhausen, *Reste*², p. 130 f.). Guthe (*Geschichte*, p. 21 f.) opposes the view that Moses belonged to the tribe of Levi, and holds that the priestly tribe first originated in Canaan. This later origin, however, is difficult to prove, and along with it the objections fall, which are brought against a genealogical connexion between Moses and the priestly tribe.

If *l'avi* actually stood originally for the retinue of the sacred ark, only individuals from this body would have been priests proper. Apart from this, it is in any case not incredible that Moses should have destined his own family in the narrower sense to be priests, but that he should have chosen precisely the family of his brother Aaron is less likely. Aaron, it is true, is not only represented in P as the father of the priests, but even in JE as 'the Levite' *καὶ ἐξ ὧν* (Ex 4¹⁴). Yet he does not appear to be known to all the strata of this last book; and in all the passages where mention is made of him he is a less individualized figure,

to which features from the later history are transferred in a prefigurative way (*Gesch.* p. 199). It is not impossible that in his case we have to do with a personification, although no satisfactory explanation of his name 'Aharôn' has yet been discovered. With 'arôn the designation of the sacred ark (a combination proposed, following the lead of others, by Renan, *l.c.* p. 179), this name can hardly, in view of the different way in which it is written, have anything to do.

In an ancient gloss to the narrative in the Bk. of Judges about the Levite who first on Mt. Ephraim and afterwards at Dan officiated as priest, this Levite, to whom the priesthood at Dan traced its descent down to 'the carrying captive of the land' (i.e. down to the overthrow of Ephraim in the Assyrian period), is described as a 'son of Gershom the son of Moses' (in Jg 18³⁰ *Ménashsheh* is an alteration of the original *Môsheh*). Here, then, Moses himself may be viewed as father of the priests in general. But all the same it is difficult to understand the person of Aaron as a purely fictitious one, because there is no apparent reason why the priesthood should have exchanged the more glorious descent from the lawgiver for descent from a brother of his. Moses has been supposed to be referred to in Dt 33⁸ as the representative, and then, presumably, as the father, of the priesthood; but the context of this passage favours rather a reference to Aaron in this capacity (*Gesch.* p. 76), in harmony with which is the circumstance that Dt 33 probably had its origin in Ephraim, and we find traces that it was in Ephraim that Aaron first came to be looked upon as father of the priests (see below, § 3, on the bull-worship of Aaron).

If really from the time of Moses one special body was regarded as called to the priesthood, yet it is by no means the case that from that time it alone exercised priestly functions. Long after Moses, it is not contested that men of non-Levitical descent discharged the priest's office occasionally or even permanently. In the latter case they probably passed as adopted into the tribe of Levi, which accordingly we are not to think of as having originated in a purely genealogical way. Only, one can hardly, with Wellhausen, appeal in favour of this to what is said in Dt 33⁸ about Levi's having renounced his kinship. Seeing that in this passage the denying of his sons is also spoken of, the reference must be understood not of the loosening of connexion with a family, but of impartial official action, without regard to family interests, in allusion to the narrative of Ex 32²⁷⁻²⁹ (*Gesch.* p. 77; Sellin, p. 110 ff.; Van Hoonacker, *Sacerdoce*, etc. p. 133). As in Dt 33 the whole tribe of Levi appears as in possession of the priesthood, so elsewhere down to a late period no trace is to be found of a distinction between Levites and priests proper.

No special weight is to be laid on the circumstance that, according to the statement of one source of the Jehovistic book, Moses employed 'young men of the children of Israel' to offer sacrifice (Ex 24⁵; it is impossible that either here or in 1 S 2^{13, 15} *na'ar*, in its sense of 'servant,' can be a designation of the priest as the servant ['ministre'], namely, of the cultus or of the people 'in the celebration of Divine worship' [so Van Hoonacker, *Sacerdoce*, etc. p. 140 f.]), for this happened prior to the appointment (recorded, indeed, as it seems, by a different narrator) of the Levites to the priestly service (Ex 32^{26ff.}). As early as the arrival at Sinai we read in Ex 19^{22, 24} (a narrative in any case from another hand than 32^{26ff.}) of priests (*Gesch.* p. 58 ff.) without being told whether these are to be thought of as Levites or not. It is mentioned in the Jehovistic book, as

an arrangement in force all through the lifetime of Moses, that his attendant, Joshua, who is represented as of non-Levitical descent (Nu 13⁹, P), did not depart out of the holy tent (Ex 33¹¹). The Ephraimite Micah, in the period of the Judges, appoints as priest in his private sanctuary, first of all one of his sons (Jg 17⁵). Gideon, of the tribe of Manasseh (Jg 6^{26f.}), and Manoah of the tribe of Dan (13¹⁹), offer sacrifice with their own hands. Under Saul the Israelites pour out the blood of the captured animals at the altar stone without any priestly interposition (1 S 14²⁴). At a still later period the non-priestly prophet Elijah sacrifices with his own hand (1 K 18^{36f.}). While the sacred ark, in the course of its wanderings, tarried in the house of Abinadab, who was plainly no priest, it was served by his sons (1 S 7¹, 2 S 6^{3f.}; the emendation of Van Hoonacker, *Sacerdote*, etc. p. 171, is unwarranted). Of the ancient priestly prerogative of the father of the house, a relic was preserved down to the latest times of the Jewish cultus, in the slaughtering of the Paschal lamb by the father of the house without any priest taking part in the ceremony (Ex 12^{6f.} [P] vv. 10^{f.} [JE]), although it is true, at the same time, that the sacrificial character of the Paschal lamb had been obliterated.

Sacrificing was, then, manifestly, in early times not the exclusive function of a priestly class. The latter was certainly in existence. Yet even for admittance to this no special descent was requisite. Samuel, by birth an Ephraimite, yet, according to the representation contained in the history of his childhood, becomes, in fulfilment of a vow of his mother, a servant of Jahweh, clothed with the priestly ephod, at the sanctuary at Shiloh (1 S 1^{10f.} 21^{1, 18}). The fact that Samuel becomes a priest in consequence of a vow, shows that he was not one by descent; and the representation of the Chronicler (1 Ch 6^{13, 18}), according to which he is a Levite, is not, with Van Hoonacker (*Sacerdote*, etc. p. 265 f.) and Girdlestone ('To what tribe did Samuel belong?' in *Expositor*, Nov. 1899, pp. 385-388), to be justified, as if Samuel were a Levite from Ephraim. In the descriptions of Samuel's later life he appears not as a priest, but as one who, in the extraordinary capacity of *shōphēṭ* and *nābī*, presents the offerings of the people (1 S 7^{9f.} 16^{2f.}). A priestly class is presupposed by the oldest collection of laws, the so-called Book of the Covenant (Ex 22⁹), and yet, in an enactment later prefixed to this, the general right to sacrifice is assumed in the demand made of the Israelites as a whole: 'An altar of earth thou shalt make unto me, and shalt sacrifice thereon thy burnt-offerings and thy *shēlāmim*-offerings' (Ex 20²⁴). When, on the other hand, in the Jehovistic book the people of Israel is called 'a kingdom of priests' (Ex 19⁶), this is certainly to be understood not of the actual exercise of priestly rights, but in a transferred sense as meaning that the whole of Israel stands in a priestly relation to God.

Where a professional priest was not available, young men appear to have, by preference, replaced the father of the house in the exercise of his priestly function, or even to have acted as priests for a larger body. Of Moses we found it recorded that he appointed young men to offer sacrifice. The Ephraimite Micah installs one of his sons as priest. Certain traces appear to point to a preference at one time for making firstborn sons priests, or even to indicate that in earlier times the whole of the firstborn sons were regarded as destined for holy service—an idea which certainly can hardly at any time have been strictly carried out in practice. The circumstance that Samuel, according to the story of his childhood, was a firstborn son, is of no importance, because it was not as such that he was set apart for priestly functions,

but in consequence of a vow of his mother. But in the ancient code, the Book of the Covenant (Ex 22²⁸ [Eng. 29]), the demand is made that the firstborn son be given to Jahweh. The spirit of this book, whether it belongs to the time of the Judges or to the earlier monarchical period, appears to exclude the interpretation that the firstborn is to be offered in sacrifice to the deity; and then there remains scarcely any other possibility except to understand the 'giving' to mean consecration to holy service (*Geach*, p. 55 ff.; Smend, *Alttest. Religionsgeschichte*, Freiburg i. B., 1899, p. 282 f., note 3; cf. Kamphausen, *Das Verhältnis des Menschenopfers zur israel. Religion*, Bonn, 1896, p. 66). In the Priestly Writing it is said of the Levites that they are 'given' to Jahweh (Nu 8¹⁶), and even the consecration of Samuel is described by the term 'given' (1 S 1¹¹).

In spite of this freedom in the matter of sacrificial arrangements, from early times it was considered an advantage in the regular and constant service of a sanctuary to have a 'Levite' for priest. When one of these happens to pass the sanctuary of Micah the Ephraimite, the latter gives the preference to him as priest over his own son (Jg 17^{2f.}); and the Danites who wish to establish for themselves a new sanctuary in their new home, do not let the opportunity slip to obtain by force the services of this same Levite (18^{10f.}). Even if in the time of Moses a single family amongst the Levites had possession of the priesthood proper, in subsequent times, at all events, this was viewed not as their exclusive privilege, but as that of the Levites in general. Nevertheless, the term 'Levite' nowhere occurs as the exact equivalent of 'priest,' a circumstance which is not without importance in its bearing upon the origin of the term. The above-named Micah the Ephraimite is represented as saying, 'The Levite has become my priest' (Jg 17¹³).

As to the instalment in the priestly office, even that ancient narrative in the Bk. of Judges mentions certain formalities which in a modified form are retained in the later ceremonial law of the Pentateuch. Micah 'fills the hand' of one of his sons, so that he becomes his priest (Jg 17⁹). He does precisely the same thing afterwards to the Levite (v. 12). Wherein this 'filling of the hand' consisted is not clear. It has been suggested that it means the handing over of the earnest money (Vatke, Wellhausen), which appears to be favoured by the fact that the Levite who renders priestly services to Micah certainly speaks of himself as 'hired' by the latter (Jg 18⁴). This hiring, however, need not refer to a sum of money paid down, but may consist in the arrangement about an annual salary, clothing, and maintenance (17¹⁰). It is not at all likely that Micah hired his own son with a piece of earnest money, and in any case the narrator in the Jehovistic book (Ex 32²⁸) was not thinking of earnest money when he makes Moses say to the sons of Levi themselves: 'Fill your hands to-day for Jahweh.' Still less likely is it that the expression 'fill the hand' refers to the handing over of the arrows which are alleged to have been used in giving the priestly oracle (Sellin, p. 118 f.). This interpretation is based upon Ex 32², where, however, *lê-Jahweh* standing alone cannot mean 'on behalf of Jahweh' (sc. take hold of the arrows), but shows that 'fill your hand' refers in some way to a consecration to Jahweh, an instalment into service related to Him (still another interpretation of the 'filling the hand' in Ex 32²⁸ is adopted by Van Hoonacker, *Sacerdote*, etc. p. 135). In the Priestly Writing the expression 'fill the hand' is retained in speaking of instalment into the priestly office (Ex 28⁴¹ *al.*), and the term 'fill-offering' (*millū'im*, Ex 29²² *al.*)

is used of the offering which was presented at the consecration of Aaron and his sons to the priestly office. This offering has the characteristic rite that Moses places certain portions of the sacrificial animal upon the hands of Aaron and his sons—in other words, fills the hands of those about to be consecrated with these portions of the sacrifice. What are specified are the parts of the animal which in sacrifice were burned upon the altar or which fell to the priests. The consecration ceremony was meant thus to express that the priest is empowered to lay these pieces upon the altar, or, as the case may be, to take them for himself. Accordingly, it is, to say the least, not improbable that the expression 'fill the hand,' used of installation in the priestly office, had in view from the first such a handing over of sacrificial portions as pointed to the priestly functions (*Gesch.* p. 183 f.; so also Weinel, art. 'מָלַךְ und seine Derivate,' in *ZATW* xviii. [1898] p. 61). Such a solemn introduction to office might well be employed even by the layman Micah in the case of the Levite, as of one who was not installed by him as a priest in general but as his own priest (otherwise Nowack, p. 121).

But it may be, further, that the expression 'fill the hand' had not originally a special reference to introduction to the priestly office, for in Assyrian the corresponding *kātū mullū* has the general sense of 'give, appoint, enfeoff, present' (Nowack, p. 120 f., following Halévy; cf. on the Assyrian expression, Frd. Delitzsch, *Assyr. Handwörterb.* s.v. מָלַךְ, p. 409). Even if the above was the original sense of the Hebrew expression, it was no longer understood in Ex 32²⁸.

In early times the priest, even when he was a young man, was called by the title of honour, 'father' (Jg 17¹⁰ 18¹⁰). The priests who served at any of the sanctuaries of ancient Israel were marked outwardly by the linen ephod they wore (1 S 2¹²). They lived, as we learn in the case of Eli and Samuel, in the sanctuary (1 S 3²²). There they offered the sacrifices on the altar, a work in which at the more frequented places of worship they were assisted by servants (1 S 2¹³ 12). Portions of the offerings presented were assigned them for their maintenance (1 S 2¹³); whether these were definitely fixed (*Gesch.* p. 208, and against this Nowack, p. 125), or were left to the pleasure of the offerer, can scarcely be determined.* At the private sanctuaries, as we are told of Micah the Ephraimite, the owner of the sanctuary paid his priest a salary and supplied his clothing and his food (Jg 17¹⁰). While the offering of sacrifice was in early times open to others as well as to the priests, it is only of professional priests that it is recorded that they gave oracles. Micah's Levite consults God at the request of others (Jg 18⁸; on the giving of oracles by the priests among the ancient Arabs, see Wellhausen, *Reste*², p. 131 ff.).

As would appear from what we hear of Ahijah (Ahimelech) the descendant of Eli (1 S 14³), and his son Ebiathar (ABIATHAR) the priest of Nob (1 S 23⁶), it was only the chief priest of a considerable sanctuary who had another ephod different from the linen one, by means of which he gave oracles (1 S 14³), where for *drōn* read *ēphōd*). In this must have been kept the oracle-lots, the prototype of the Urim (cf. 1 S 28⁶) and Thummim of the later high priest. In the Blessing of Moses (Dt 33⁹), Thummim and Urim are thought of as the special dower of Levi, and probably more specifically as that of Aaron. The name *thummim*,

* We find traces that among the Phœnicians and the Babylonians, as was doubtless the case with all highly developed cults, the priests had their allowance from the offerings (see F. C. Movers, *Das Opferwesen der Karthager*, *Commentar zur Opfertafel von Marseille*, Phœnizische Texte, Theil II., Breslau, 1847, pp. 118, 126 ff.).

'right,' points to the fact that the giving of priestly oracles originally served mainly the interests of the administration of justice, which was in the last resort the task of the priests. In order to decide a difficult lawsuit the parties are required by the Book of the Covenant to appear 'before God' (Ex 22⁸), i.e. to appeal to a decision by the priestly lot. The same place which bears the name *Kādeš*, 'sanctuary,' is called also *En-mishpāt*, 'well of decision' (Gn 14⁷).

In the administration of justice, but no doubt also in the indication of what was ritually proper, and in general of what was well-pleasing to the deity, will thus have consisted the *tōrāh*, 'instruction,' or 'direction' (see LAW IN OT, vol. iii. p. 64^b), which from ancient times appears as the duty of the priests (Dt 33¹⁰). It has been suggested that the root-word (*hōrāh*) in this notion of 'instructing' should be traced back to the casting of the sacred lots. But this is scarcely probable in view of the use of *tōrāh* also for the teaching of the prophets, which has nothing to do with oracles obtained by lot. Rather had *hōrāh*, which is used of shooting arrows (1 S 20³⁶ al.), the meaning of 'aim at something,' and then 'lead to a goal,' 'point out something' (Gn 46²⁸), 'instruct' (*Gesch.* p. 207, note 1).

When they settled in Canaan, the Israelites had taken over the sacred places of the Canaanites and set up the worship of Jahweh at them. These sanctuaries did not all enjoy the services of a Levitical priest, as we see from the fact that a son of Micah the Ephraimite acted as priest. The numbers of the Levites were probably insufficient to meet the needs of such service. They will have settled only at the more important sanctuaries. A reminiscence of this is preserved in the Priestly Writing of the Hexateuch, which conceives of specially appointed Levitical or priestly cities. Some of the names of cities specified in this connexion clearly point to ancient places of worship (cf. below, § 8, *end*, and *g*).

The most important sanctuary in the time of the Judges was the temple at Shiloh, whose annual festivals were resorted to by a wide circle of worshippers. There officiated Eli and his house, which traced back its priestly rights to the time of the Exodus from Egypt (1 S 2²⁷), and thus at all events belonged to the category of the Levites. It may be that the house of Eli also laid claim to descent from the priestly brother of Moses, namely Aaron; so at least the matter was viewed by those in later times who traced the descent of the Elidae to Ithamar a son of Aaron (1 Ch 24³). But it may be also, as we have seen, that originally the priest of the Exodus, and even the ancestor of the house of Eli was held to be Moses himself, for whom his brother might come to be substituted only in after-times (Wellhausen, *Prolegomena*¹, p. 146 f.). In the history of the childhood of Samuel, Eli is introduced abruptly (1 S 1⁹); a passage paving the way for the mention of him must have been lost, and in this his genealogy was probably given. Eli, as no doubt was the case equally with the head of the family elsewhere, held the position of chief priest in the temple, as may be gathered from the relation to him of Samuel and of his own sons. Eli's sons perished in the wars with the Philistines, and with them probably also the sanctuary of Shiloh, which is never afterwards mentioned as existing (1 S 4¹¹). The house of Eli was not, however, completely extinguished; a great-grandson of his, Ahijah the son of Ahitub, the son of Phinehas, the son of Eli, bore the ephod in the time of Saul (1 S 14³). He is evidently identical with the son of Ahitub whom another source calls Ahimelech. This Ahimelech, apparently as chief priest, had his residence, along with his fathers' house, at Nob (1 S 21²² 22²²),

the 'city of the priests' (22¹⁹). Here then it would appear that the ancient priestly family of the Exodus gathered itself together after the downfall of Shiloh. Renan (*Histoire*, i. 420, note 1) finds difficulty in the identification of Ahijah with Ahimelech, because the priests of Nob can, he thinks, hardly have belonged to the family of the priests of Shiloh. But why not, and why should it be necessary to impute an error to 1 K 2²⁷, where Ebiathar (Ahimelech's son) is reckoned to the house of Eli? There was similarly at Dan a Levitical priesthood which traced its descent to the before-mentioned Levite of Micah the Ephraimite, and consequently to Moses (Jg 18³⁰).

3. THE PRIESTHOOD FROM DAVID TO JOSIAH.—When David had acquired for his capital the Jebusite citadel, he conferred upon it the distinction of transferring the sacred ark to the summit of its hill, the threshing-floor of Araunah the Jebusite. By this act he established a royal sanctuary of which the king was the proprietor, in the same sense in which the private person Micah was the owner of the sanctuary set up by him. David and, subsequently to the building of the temple by Solomon on Mt. Zion, his successors assumed a kind of chief priestly position at the sanctuary of Jerusalem.* David presented offerings, manifestly discharging priestly functions in person, for it is said that he 'made an end of offering' (2 S 6¹⁷); he pronounced the liturgical blessing (v. 18), and danced in the priestly garb, the linen ephod, before the ark of the covenant (v. 14). Of Solomon, too, it is recorded that, at the dedication of the temple, he offered sacrifice (1 K 8⁶), and that three times in the year he offered burnt-offerings, and peace-offerings and 'sweet smoke' (1 K 9²⁵). There is no mention of priests on this occasion; their presence may, however, be taken for granted as self-evident, for, of course, Solomon could not, without help of some kind, have overtaken all the dedicatory offerings. From the above statements, then, it is not clear to what extent Solomon in his offering discharged priestly functions in person. But it is difficult to suppose him to have acted in this matter differently from David. In any case the blessing which, standing by the altar, he pronounced upon the people (1 K 8³⁵) is a priestly act. Of the first king of the Northern kingdom, Jeroboam, we are expressly told that he ascended the altar of Bethel and made the offering (1 K 12²⁹), although he too had priests at his command (v. 31). The position of the kings of the Northern kingdom in relation to its chief sanctuary at Bethel will have been practically the same as that of the kings of Judah to the temple at Jerusalem. Under Jeroboam II. Amaziah the priest at Bethel speaks of the sanctuary there as a royal one (Am 7¹³); Amaziah, that is to say, officiated under the king's commission. Of one of the later kings of Judah, Ahaz, it is expressly recorded that he ascended the temple altar, kindled the offering, poured out the drink-offering, and sprinkled the altar with the sacrificial blood (2 K 16¹²). Consequently it is at least not an incorrect condition of things that is presupposed in Chronicles when we are told how Uzziah, the second predecessor of Ahaz, offered incense upon the altar of incense (2 Ch 26¹⁶). All that belongs to the later standpoint of the Chronicler is the notion that this offering by the king in person was an illegitimate encroachment upon the priestly privileges, and that Uzziah was on that account punished with leprosy; perhaps also the assumption of a special altar for incense bespeaks a later viewpoint.

At least the earliest kings looked upon the

* Among the Assyrians as well the king was at the same time the chief priest (see Alf. Jeremias, *Die bab.-assyrischen Vorstellungen vom Leben nach dem Tode*, Leipzig, 1887, p. 97, note 1).

Jerusalemite priests as subordinate officials whom they could appoint and depose. From the massacre which Saul perpetrated amongst the priests at Nob who held with David (1 S 22^{16a}), none escaped of the family of Eli but Ebiathar, who fled for refuge to David, carrying with him the oracle-ephod (1 S 22²⁰ 23⁶). He was installed by David as priest in attendance on the sacred ark on Mt. Zion. Along with him Zadok is named as David's priest (2 S 8¹⁷, where read 'Ebiathar son of Ahimelech'). Both have their sons at their side as priests (2 S 15³⁷ 38). Ebiathar must have held the higher rank of the two, for we are told in 1 K 2²⁶ that Solomon, after deposing Ebiathar, gave his post to Zadok. Ebiathar, with his son Jonathan, had taken the side of Adonijah when the latter conspired against his father David (1 K 1²⁵ 42²⁷). By command of David, Zadok anointed Solomon king (1 K 1^{32a}), and Ebiathar was banished. He retired to his landed property at Anathoth (1 K 2^{26c}), where in the time of Jeremiah we still find a priestly family settled, to which Jeremiah himself belonged (Jer 1¹ 32²⁵). Accordingly Jeremiah was probably a descendant of Ebiathar, and thus of the ancient priestly family which dated its possession of the dignity from the time of the Exodus (see above, § 2).

The house of Zadok continued in possession of the Jerusalemite priesthood. This we know from the exilian prophet Ezekiel, who constantly speaks of the Jerusalemite priests as 'the sons of Zadok.' What was Zadok's descent is not clearly to be seen. This much only is plain, that he did not belong, like Ebiathar, to the old-privileged priestly family, for a prophecy, put into the mouth of an unnamed man of God in the time of Eli, announces that God, after He had chosen in Egypt the fathers' house of Eli for the priesthood, had now rejected this house, and would appoint for Himself a trustworthy priest who should walk after Jahweh's heart and mind, for whom Jahweh would build an enduring house, and who should walk before Jahweh's anointed for ever (1 S 2²⁷). This prophecy is in 1 K 2²⁷ understood of the installation of Zadok in the Jerusalemite priesthood, and was certainly so intended from the first, for—the only other conceivable supposition—to refer it to the priestly Samuel will not answer, seeing that Samuel is never represented as a king's priest. Thus, then, Zadok did not belong to the family or the fathers' house of Eli, and consequently not to the ancient priesthood. Zadok cannot, therefore, as Poels supposes, have really belonged, although, to be sure, later generations represented him as belonging, to an ancient Aaronite family, namely that of the Eleazarites. This family, according to Poels, had discharged the priestly duties at Nob, and when the national sanctuary was transferred to Jerusalem, Zadok came from Nob to the capital (so, already, essentially, Movers, *Kritische Untersuchungen über die biblische Chronik*, Bonn, 1834, p. 294 f., according to whom Zadok was at first chief priest in the Mosaic tabernacle at Gibeon [which Poels identifies with the sanctuary of Nob]). It is maintained by Van Hoonacker (*Sacerdoce*, etc. p. 168 ff.) that according to 1 S 2²⁷ the house of Eli was chosen 'non pas isolément,' but, together with others, as one particular family of the priesthood which included a plurality of families; but this notion is read into the text. Zadok is called the son of Ahitub (2 S 8¹⁷). In the state of the case just described, we are not to think of this Ahitub as the same as the grandson of Eli (1 S 14³). The above-cited oracle of the man of God gives undoubtedly the correct account of Zadok, for in later times, when the sons of Zadok had exclusive possession of the priesthood, men would not have attributed to them a prestige as priests less lofty

in its origin than that of the Elidæ who had now fallen into the background. Under these circumstances it may be doubted whether Zadok was a Levite at all. No certain decision can be pronounced, because we do not know how much is included in the expression 'fathers' house' of Eli in the above oracle. If it means the same thing as 'sons of Levi,' then Zadok was no Levite; but it may be intended in a narrower sense, perhaps, to mean the house of Aaron. Since even prior to the time of David, as we saw from the story of the Levite of Micah the Ephraimite, it was considered desirable to have a Levite for priest, David is unlikely to have overlooked this advantage in the selection of Zadok, who primarily was his priest. Subsequent generations naturally did full honour to the genealogy of Zadok, whose descent was traced back to a son of Aaron, nay, to his eldest son Eleazar (1 Ch 24³). In the circumstance that the later writers made the Elidæ to be descended from another son of Aaron, namely Ithamar (1 Ch, *l.c.*), there is preserved a reminiscence of the difference in the descent of the two priestly families.

The descendants of Ebiathar, when expelled from the priesthood at Jerusalem, are hardly likely to have all remained settled at Anathoth. Probably a portion of them found employment at the sanctuaries of the Northern kingdom, where they took part in the official worship of Jahweh under the figure of a bull. In this way we may explain the narrative in the Jehovistic book, which attributes to Aaron a part in bull-worship, Ex 32¹⁷. (*Gesch.* p. 199; so previously Th. Nöldeke, *Untersuchungen zur Kritik des AT*, Kiel, 1869, p. 55, note). At all events the Northern kingdom too had an organized priestly body, as may be gathered from the story that, after the downfall of Samaria, a priest from amongst the exiles was sent back to Ephraim, to instruct the inhabitants of the land in the worship of the god of the land, *i.e.* Jahweh (2 K 17³⁴).

Besides Ebiathar and Zadok and the son of Ebiathar and the son of Zadok, there is mention of another otherwise unknown 'Ira as priest under David (2 S 20²⁶). According to the traditional text he was a *Jairite*, *i.e.* belonged to a Gileadite family, and was consequently no Levite; but perhaps the statement should be emended to the effect that he was a *Jattirite*, *i.e.* belonged to the priestly city Jattir in Judah (so [following Thenius, *ad loc.*] *Gesch.* p. 192, and Löhr, *ad loc.*), in which case the possibility is not excluded that he was a Levite. In addition to him, David's own sons are called in 2 S 8¹⁸ *kōhānim*. In itself there is nothing impossible in the view that David appointed members of his own non-Levitical family to be actual priests, for we see from the picture of Samuel as a priest that at that time and probably for long afterwards the priestly status was not at all bound up with a special descent. But, on the other hand, against understanding *kōhānim* in the literal sense, when applied to David's sons (as is done by Löhr and H. P. Smith, *ad loc.*), is the circumstance that just immediately before (v. 17) the priests of David, namely Zadok and Ebiathar, have been already enumerated amongst the other court officials. Hence it is perhaps probable rather that the sons of David only bore the title of *kōhānim* in the same way as, in the time of Solomon, we find Zabud, a son of Nathan (probably the son of David), called '*kōhēn*, friend of the king' (1 K 4⁵ [Van Hoonacker, *Sacerdoce*, etc. p. 280 f., and Benzinger, *ad loc.*, following B and Luc. of the LXX, strike out the כהן; but Kittel, *ad loc.*, defends its genuineness]), where in any case 'friend' is a title. But *kōhēn* can scarcely be the title of a court official in the sense of 'representa-

tive,' *scilicet*, of the king (so Klostermann, *ad loc.*, who reads 2 S 8¹⁸ *kōhānē ha-melek*). As little justification is there for giving up the statement in Samuel in favour of the different expression of the Chronicler (1 Ch 18¹⁷), as is done by Van Hoonacker, *Sacerdoce*, etc. p. 275 f. Hitzig's emendation of *kōhānim* to *šōkhēnim*, 'administrators' (Is 22¹⁵), which is adopted afresh by Cheyne, rests upon the correct impression that from the context it must be a court office that is in view, and the emendation is not demonstrably wrong. Yet it would be surprising if in two passages copyists erroneously introduced the word *kōhēn* in a context where this word must have struck them as strange. Perhaps, then, *kōhēn* is in both instances the original reading after all. Such a title as *kōhēn* may be an imitation of the Phœnicians, amongst whom members of the royal house were often invested with priestly offices (so Movers, and similarly Ewald; see *Gesch.* p. 191 f., and cf., further, Driver on 2 S 8¹⁸, who is not quite decided as to the sense of *kōhānim* in this passage, although he believes that it means *priests* of some kind).

Although the Judean kings always reserved for themselves a kind of chief priestly position, yet in view of the importance of the temple at Jerusalem as the central sanctuary, and the considerable number of priests which such a sanctuary presupposes, it is hardly possible to avoid supposing that amongst the Jerusalemite priests there was one who claimed the first place, as had already been done at Shiloh by the head of the priestly family. The priest who evidently claimed this first place is in the Books of Kings called for the most part simply 'the *kōhēn*'; so Jehoiada (2 K 11¹⁰ *al.*), Urijah (16¹⁰ *1st.*), and Hilkiah (22¹⁰ *al.*). The same title is given in Is 8² to Uriah, and in Jer 29⁶ to Jehoiada.* Along with this we have once in Kings (2 K 25¹⁸=Jer 52²⁴) the term 'head-priest' (*kōhēn hā-rō'sh*) applied to Seraiah. This title in this instance (differently in 2 S 15²⁷ where we should read *ha-kōhēn hā-rō'sh*) is certainly not due to later insertion (Nowack, p. 107, note 1), for in that case the designation 'high priest,' sanctioned by the Priests' Code of the Pentateuch, would have been employed. The title 'head-priest,' found nowhere else except in Ezr 7⁵ and in Chronicles, where it occurs along with 'high priest,' is certainly, for the very reason that it is not found in the Priests' Code, derived from earlier antiquity. On the other hand, it is possible that the title by which the later high priest is distinguished, namely *ha-kōhēn hā-gādōl*, which is once applied to Jehoiada (2 K 12¹¹) and thrice to Hilkiah (22⁴ 23⁴), is due to antedating of this title on the part of the redactor of Kings who wrote during the Exile, or it may even be a later insertion. The Deuteronomic law uses the simple title 'the *kōhēn*' to designate the chief priest.

The dignity and influence of the chief priest of Jerusalem must even in early times have been great. This comes out especially in the commanding rôle which, about the middle of the 9th cent. B.C., was played by the chief priest Jehoiada in connexion with the overthrow of queen Athaliah and the proclamation of her grandson Joash as king, in whose name Jehoiada at first directed the government (2 K 11⁴ 12³).† The authority

* It may, indeed, be doubted whether in Jeremiah the reference is to the same Jehoiada, who was chief priest under Joash. Renan (*Hist.* ii. [1889] 323, note) and Van Hoonacker (*Sacerdoce*, etc. p. 158 f.) contest it; but see Hitzig and Graf on Jer 22²⁶.

† Tradition furnishes no warrant for reconstructing the history with Renan (*Hist.* ii. 323, 409, note 1), who introduces, alongside of Jehoiada the priest, in 2 K 11⁴, an officer of the guard of the same name. No priest, it is true, had the right to summon the army, but the priest Jehoiada could act in accord with the chiefs of the army. That the latter allowed themselves to be led by him is an indication of the respect paid to his position.

of the chief priest, however, scarcely extended, as a rule, beyond the sphere of the temple at Jerusalem, besides which there continued to exist even in Judah other places of worship with their own priests, down to the time of Josiah's reformation. Yet the prediction above referred to regarding the downfall of Eli's house represents the survivors of this house as begging of the royal priest to put them into one of the priests' offices that they might obtain a morsel of bread (1 S 2³⁰). This may indicate that the chief priest of Jerusalem, so long as the existence of the smaller sanctuaries of Judah was not opposed in the interest of the temple at Jerusalem, exercised a certain supremacy over these, and made appointments to their staff of priests. It can scarcely be that we are to think of reception of the Elide into priestly offices at Jerusalem, where the Zadokites would be very slow to suffer the intrusion of strangers.

Alongside of the head-priest Seraiah there is mention in 2 K 25¹⁸ (Jer 52²⁴) of Zephaniah as *kōhēn mishneh* (*kōhēn ha-mishneh*), lit. 'priest of the repetition,' i.e. probably representative of the head-priest. The same title occurs in 2 K 23⁴, where, instead of the plural *kōhānē ha-mishneh*, the singular is to be read with the Targum, since a plurality of 'priests of the second rank,' beside the high priest, who is here named, and the keepers of the threshold, would come in strangely when there has been no mention of priests of the first rank (it is therefore not permissible, with Van Hoonacker, *Sacerdote*, etc. p. 162, to find in the *kōhānē ha-mishneh* the Levites of the Priestly Writing). The Zephaniah in question appears in Jer 29²¹, as principal overseer of the police arrangements in the temple. The keepers of the threshold (*shōmrē ha-šaph*) are also named in 2 K 25¹⁸ (Jer 52²⁴) along with the head-priest and the 'second' priest; according to this passage the keepers of the threshold were three in number. Plainly we must think here of a fairly exalted priestly office, different from the humbler station of the post-exilic doorkeepers (*shō'ārīm*), of whom there were a great many (2 Ch 34⁹ confuses these with the keepers of the threshold who are reckoned among the Levites). The keepers of the threshold already appear in the time of Joash (2 K 12¹⁰) as having to guard the entrance to the inner fore-court with the altar of burnt-offering. According to this same passage as well as 2 K 22⁴, one of the duties of the keepers of the threshold was to collect the people's contributions to the temple. We must suppose that other priests or temple attendants were at their command in the discharge of their duties, which could scarcely have been overtaken by only three persons. Beyond all doubt we have in the keepers of the threshold to do with an actual pre-exilic priestly office, for it is an office which is unknown in later times.

According to 2 K 19² (Is 37³), the priestly body was arranged in groups as early as the time of Hezekiah, for here we read of 'elders of the priests,' who can be nothing else than chiefs of groups.

In only a few passages, apart from Chronicles, where post-exilic relations are everywhere transferred to earlier times, are Levites named during the monarchical period. In 1 S 6¹⁵ and 2 S 15²⁴ they appear as bearers of the ark of Jahweh, just as in the Priestly Writing and in Deuteronomy. The first of these passages, where the Levites make their appearance quite abruptly, is manifestly interpolated. On the other hand, in the second passage the Levites, who are found here in the retinue of the priest Zadok, are not out of place; but it must be confessed that the text of the whole passage is corrupt, and on this account doubt is here again cast upon the presence of the

Levites. In Kings there is only a single mention of Levites, namely in 1 K 8²⁴. Here they are clearly thrust into the text by means of a later interpolation (the close of v. 4 is found in the LXX only in A), for it is said first of all that priests took up the ark, the tent of meeting and its vessels, and only afterwards is the supplementary remark made that priests and Levites did this. All the same, however, the term 'sons of Levi' for those who were entitled to exercise the priestly office was known to the author of Kings, who blames Jeroboam for making priests 'from among all the people, which were not of the sons of Levi' (1 K 12³¹).

The existence of a class of sanctuary attendants, different from the priests or subordinate to them, and who were called 'Levites,' cannot be proved for the monarchical period. But there are clear enough allusions, during this period, to temple attendants or slaves. According to Jos 9²³, the Gibeonites, on account of the fraud they perpetrated upon the Israelites, were pronounced by Joshua accursed and degraded to be serfs, namely hewers of wood and drawers of water for the house of his God. This passage, from the mention of 'the house of God' (not 'tabernacle,' as in the Priestly Writing), is seen to be from the Jehovistic book (differently P in v. 21, cf. v. 27 [JE and P, with a Deuteronomistic addition]). In this account of the institution of temple-slaves the writer of the Jehovistic book is thinking unquestionably of those that belonged to the Jerusalem temple as *kar' ēxōtē* the house of God, and thus anticipates the temple and its set of attendants. Saul had not quite succeeded in exterminating the Gibeonites (2 S 21¹⁵); what survived of them belonged no doubt to the remnants of the Canaanites in the midst of Israel, of whom it is related that Solomon put them to forced service (1 K 9²⁰). Even in the post-exilic period there were still 'servants of Solomon,' along with other temple-slaves, the *Nethinim*, i.e. 'those given' (Ezr 2³⁴ *et al.*). After the Exile we hear also of *Nethinim*, who are said to have been given by David and the princes 'for the service of the Levites,' i.e. for the temple (Ezr 8²⁰).

Even the pre-exilic period would appear to have been acquainted with other grades, in addition to this lowest grade, of sanctuary attendants, who were also distinct from the priests proper. In the time of Nehemiah there was in the new community a large body of temple-singers and doorkeepers, who were then, or at a later period, considered to have returned from the Exile with Zerubbabel (Neh 7⁴⁴ = Ezr 2⁴⁴). It is difficult to suppose that these groups of sanctuary servants took their rise in the cultus-lacking period of the Exile, and equally so to believe that they were a new creation during the miserable beginnings of the restored religious service in the period between the First Return and the advent of Nehemiah. The post-exilic temple-singers and doorkeepers are therefore, in all probability, descendants of those who had discharged the same offices in the pre-exilic temple (so also A. Kuenen, *Hist.-krit. onderzoek naar het ontstaan en de verzameling van de boeken des Ouden Verbonds*, vol. iii. Leiden, 1865, p. 288 f.; and especially Köberle, whose assumptions, however, regarding the pre-exilic period go much farther).

4. THE PRIESTHOOD ACCORDING TO DEUTERONOMY.—The relations of the cultus personnel at the close of the monarchical period are unquestionably portrayed in the Deuteronomistic law, not but that the attempt is made by the legislator to modify these relations upon the ground of the centralization of the cultus for which he contends. The Deuteronomistic law in its primitive form, which

has to be recovered from the present Bk. of Dt, is that book of the law which was found in the temple in the reign of Josiah, and which was the occasion of his reform of the cultus. The law-book proper is in any case contained in chs. 12-26. As a whole it cannot be much older than the date of its discovery, since its standpoint and its language both point to the time of Jeremiah. A ritual code proper it is not, rather are regulations about the cultus treated of only in so far as they touch the one demand of the legislator directly affecting the cultus, namely that for a single sanctuary, or have a bearing upon the social relations about which he is concerned. Even the demand for a single place of worship is not really made in the interest of the cultus, but rather in that of the form of the belief in God. In the course of his legislation, which is not directed specially from the point of view of the Divine service, the author of the Deuteronomic law is far from giving a complete picture of the existing priestly relations, or of those to be established. In what he says about them there are gaps which must be filled up from what we know from other sources. This cannot be done with complete certainty on all points.

The priests are constantly referred to in Dt as 'the Levite priests' (*ha-kōhānīm ha-lēwīyīm*, 17.²⁸ 18¹ *al.*). The legislator evidently has in view, in this expression, a special descent, for in 21⁵, in an older enactment, as it seems, borrowed by the author, there occurs the other expression, 'the priests, the sons of Levi' (so also 31⁹). The same inference follows from 18¹ 'the Levite priests, the whole tribe of Levi,' where the second designation is probably in apposition with the first, in which case the author of the Deuteronomic law would not distinguish between 'Levite priests' and 'Levites.' Since he recognizes only the one place chosen by Jahweh, namely Jerusalem, as a place of worship, it is only there that in his estimation real priests are to be found. But he knows of Levites who live scattered up and down in the land, and appears to be willing to concede to the whole of these, if they come to reside at Jerusalem, the same rights at its temple as the Levite priests who are settled there. Such at least is the simplest way of understanding Dt 18²⁸: 'And if a Levite come from any of thy gates out of all Israel, where he sojourneth, and come with all the desire of his soul unto the place which Jahweh shall choose, to minister there in the name of Jahweh his God like all his brethren, the Levites, who stand there before Jahweh, he shall eat the same portion [as they].' This last expression appears to refer to the priest's right to the sacrificial portions mentioned in v.³² and to the *rēshith*. Every Levite thus appears to acquire priestly rights as soon as he takes up his abode at Jerusalem. It is true that 18⁷ does not say that [the Levite] serves there 'like all his brethren the Levite priests,' but 'like all his brethren the Levites.' Hence the interpretation is not absolutely excluded that the passage means to say that every member of the tribe of Levi who comes to Jerusalem may discharge functions there, according to his special station, whether as priestly or as serving Levite, and that he is entitled to the payment corresponding to the particular service rendered (so Van Hoonacker, *Sacerdoce*, etc. p. 174). This explanation, however, is not a probable one, because even in this passage there is not the slightest hint of any distinction amongst the Levites; and the expression here used of the Levites at Jerusalem, 'stand before Jahweh,' appears also outside Dt as the designation of the specifically priestly service (Ezk 44¹³).

In Dt 21⁵ it is prescribed that the 'priests, the

sons of Levi,' are to assist in the atoning ceremony for a murder that has been committed in the neighbourhood of a city of Israel; those meant then are apparently priests from this particular city. In like manner in 24⁸, where the treatment of leprosy is entrusted in quite general terms to the Levite priests, the existence of priests outside Jerusalem appears to be presupposed, for the Jerusalem priests could hardly have exercised the supervision in question for the whole country. Both these passages, which appear to be out of harmony with the Deuteronomic conception that there are priests only at Jerusalem, are probably borrowed from older laws which recognized a priesthood scattered up and down throughout the land.

A distinction between priests and Levites is equally unknown to the expansions of the Deuteronomic law. The parenthetic introduction to Dt assumes that the tribe of Levi, after the destruction of the golden calf (10¹, cf. 9^{18a}), was chosen by Jahweh to bear the ark of the covenant, to stand before Jahweh to serve Him, and to bless in His name (10⁸). This serving (*shārēth*) and blessing are specially priestly functions. The meaning of this passage might, indeed, be that these functions and the bearing of the ark (which, according to another conception, that of the Priests' Codex [see below, § 8 d], is not a specially priestly office) were divided amongst different branches of the tribe of Levi. But in the passage belonging to some redactor of the Deuteronomic law, 31⁹, the ark is borne by 'the priests, the sons of Levi,' while in v.²⁸ its bearers are the Levites. The preservation of the law is, according to 31²², the business of the Levites; according to v.⁹ (and 17¹³), it is the business of the priests, the sons of Levi (the Levite priests). Everywhere here there appears to be no difference recognized between Levites and priests. In ch. 27, which is also a section belonging to a redactor of the Deuteronomic law, the same persons who in v.⁹ are called Levite priests, appear to be called in v.¹⁴ Levites (but cf., on this passage, Kautzsch, p. 288). Taking everything into account, neither in the Deuteronomic law nor in the additions to it is 'Levite' employed as the special designation for a class of temple-servants subordinate to the priests. The supposition is, indeed, not absolutely excluded that priests and temple-servants are both included in the name 'Levites,' but even this is not likely. Rather would it appear that all through the Bk. of Deuteronomy we are to understand by Levites those only who are called to the priesthood proper. There can, indeed, be no doubt, after what we know from the Jehovistic account in the Bk. of Joshua (see above, § 3) about temple-slaves, that the author of the Deuteronomic law and those who expounded his law were acquainted with lower grades of temple-servants, but to all appearance they did not reckon these among the Levites.

In the words of Dt 28³ 'the priest who shall be in those days,' there appears to be an allusion to one special priest, a chief priest. In 17¹², on the other hand, 'the priest' may be taken rather as a typical designation for any priest (although it is against this interpretation that in v.⁹ we have the sing. 'the judge' side by side with 'the Levite priests' in the plural). Certainly in the redactory addition to the narrative introduction to Deuteronomy, namely 10⁶, a chief priest is taken for granted: 'Aaron died, and his son Eleazar became priest in his stead,' i.e. Eleazar then became chief priest, he was a priest already (*Gesch.* p. 88 f.).

If no undoubted mention of a chief priest can be found in the Deuteronomic law proper, still less does it speak of the other priestly dignities which,

according to the Books of Kings (see above, § 3), already existed in the pre-exilic period. This shows the incompleteness of the Deuteronomic data regarding priestly relations.

Deuteronomy shows a distinct advance upon the older relations witnessed to in the Jehovistic book, in this, that no longer do we hear of lay priests. It is plainly assumed in Dt that only Levite priests are entitled to offer sacrifice. The whole duty of the priests is summed up in the expression 'serve Jahweh' (*shārēth Jahweh*, 17¹² 21⁵, also *shārēth* absolutely, 18⁵⁻⁷), or in the equivalent expression, 'stand before Jahweh' (18⁵⁻⁷). To this service belongs the pronouncing of the blessing upon the people (21⁶ 10⁸). Besides their special functions in connexion with the cultus, the priests are entrusted with the supervision of leprosy (24⁸). Further, the priest has to give a hortatory address to the host of Israel before it moves out to battle (20^{7a}). The ancient priestly task of giving judicial decisions still persists in Deuteronomy. To deal with difficult lawsuits, a superior court is established at Jerusalem (17^{8a}), in which Levite priests have a seat along with a lay judge (*shōphēt*). By the body of judges mentioned in 19¹⁷ as consisting of priests and a plurality of *shōphētim*, we should probably understand the local court. According to the decision of 'the priests, the sons of Levi,' shall every controversy and every offence be judged, hence the priests have to take part in the atoning ceremony performed when a man has been murdered by an unknown hand (21⁵). Moreover, according to a passage, whose place as a constituent of the primitive Deuteronomy is not uncontested, 'the priests, the sons of Levi,' have to see to the preservation of the book of the law (17¹³; cf. 31⁹ and also v. 20).

The tribe of Levi has, according to Dt, no inheritance in the land; Jahweh is their inheritance, i.e. the Levite priests are to live by their holy service (18¹⁴ *al.*, also in the introduction 10⁹). Personal ownership of land on the part of a Levite is not thereby excluded (18⁹). As he discharges his holy office, certain specified portions of the sacrifices and the dedicated gifts fall to the officiating priest. He receives the shoulder, the cheek, and the maw of all offerings in cattle and sheep (18³). The priest is to have the *rē'shith*, the best, of corn, must, oil, and (cf. 15¹⁹) wool of sheep (18⁴). According to 26^{10a}, however, the whole of the *rē'shith* did not fall to the priest, at least not that of the fruit of trees (vv. 2-4); on the contrary, a feast is to be made of this, which does not, however, exclude the supposition that a portion of this meal had to be given to the priest. In what relation this *rē'shith* stands to the tenth, and whether the regulations about the *rē'shith* belong to the original elements of the Deuteronomic law, is not quite clear (Nowack, p. 126); there is no mention of the officiating priest having a share of the meals held with the tithes.

Quite peculiar weight is laid by the author of the Deuteronomic law on injunctions of kindness to the Levites. These manifestly cannot have in view the Levites who exercise priestly functions at Jerusalem, for they had their fixed perquisites from the offerings, and did not require kindness. Rather has the lawgiver in his mind the Levites of the country who did not discharge holy services, and he refers to them clearly in the expression, 'the Levite that is within thy gates' (12¹², 18 *al.*). It is expressly enjoined that the Levites, along with other needy persons, are to be invited to the meals held with the tithes (14²⁷, 29), to the sacrificial meals (12¹², 18, 26¹¹), especially to the joyous celebration of the festivals (16¹¹, 14), and that the third year's tithe is to be given to them and to other needy ones (26¹²). One is not, as it is expressed in

these enactments, to 'forsake' the Levite (12¹⁹ 14²⁷), who is thus in need of religious charity. It is not clear at the outset what kind of Levites outside Jerusalem the author of the Deuteronomic law has in view in the above injunctions. It is generally supposed that he refers to the country Levites in general, in so far as these, owing to the centralization of the cultus demanded by the Deuteronomic law, would be deprived of their former income derived from the numerous places of worship in the country, the *bāmōth*. But it is not at all likely that the author of the Deuteronomic law should confess to so special an interest in the priests of the *bāmōth* service which he prohibits, and which was largely mingled with idolatry. Moreover, he evidently conceives of the Levites, who are commended to charitable support, as already in destitution; it is not as of the future but as of something present that he speaks, when he refers to the Levite 'who is within thy gates.' Probably he is thinking of those Levites who had not taken part in the service on the high places, and yet, as not belonging to the Jerusalem priesthood, were excluded from officiating in the cultus of the temple. He may also have had this class specially in view in speaking of the Levites to whom he desires to open the entrance to the cultus at Jerusalem whenever they take up their abode there. That there were such Levites in the time of Josiah is not to be doubted. The priestly family to which Jeremiah belonged lived at Anathoth, probably traced its origin to the Elidæ (see above, § 3), and can hardly be supposed to have been admitted by the Zadokite priests at Jerusalem to a share in the temple service. On the other hand, it is not conceivable, at least in the case of Jeremiah himself, that he took part in the *bāmōth* service, and thus his priestly descent brought him no income. Other Levites, too, may have found themselves in the same situation.

The attitude of the author of the Deuteronomic law to the non-Jerusalemite Levites is of great importance for the forming of a judgment on his legislation and its origin. It is accordingly, in the opinion of the present writer, improbable that the author of the Deuteronomic law belonged, as is mostly held at present, to the Jerusalemite priesthood, and it is further extremely probable that although, like the prophets long before him, he stands up for Jerusalem as the legitimate place of worship, the cultus forms he describes are not specifically Jerusalemite. To this may be ascribed many of the differences between the Deuteronomic prescriptions and those of other codes in the Pentateuch. In any case the author of the Deuteronomic law, in view of the many points of contact between Jeremiah and the laws in Dt, must have stood near to the circle in which Jeremiah moved, that is to say, at once the prophetic and the non-Jerusalemite Levitical circle. The circumstance that it was Hilkiah, the chief priest under Josiah, who caused the 'book of the law' (i.e. Deuteronomy), which he found in the temple during the execution of some repairs, to be submitted to the king (2 K 22^{8a}), is no evidence that this book was the genuine expression of the then aims of the Jerusalemite priesthood. We have no reason to doubt that Hilkiah *bonâ fide* regarded the book which he had found, and whose origin he need not have known, as the ancient book of the law, and gave weight to it as such, without regard to the convenience or inconvenience of its contents. Besides, we may suppose that the requirement of the centralization of the cultus, which underlies the whole of Dt, was so extremely welcome to the Jerusalemite chief priest that it would go less against the grain for him to take into the bargain other requirements which did not exactly serve the special interests of

the Jerusalemite priesthood. Further, we have no reason to think of Hilkiah as prejudiced in favour of this special interest.

5. THE PRIESTHOOD FROM JOSIAH'S REFORM TO THE EXILE.—The requirements of Dt on behalf of the Levites were not carried out to their full extent in Josiah's reform. Even from this circumstance it may be inferred that Hilkiah, under whose guidance probably the reform was conducted, is not to be credited with the formulating of the Deuteronomic legislation. A consistent carrying out of the letter of the Deuteronomic prescriptions would have required that, after the abolition by Josiah of all places of worship except the temple at Jerusalem, all non-Jerusalemite Levites who desired it should be equally admitted to the cultus at Jerusalem; for Dt sets up no distinction amongst the Levites outside Jerusalem, between those who are entitled to this and those who are not. Notwithstanding, in so far as the narrative in Kings is correct, and in this instance its correctness hardly admits of doubt, nothing like a general admission of Levites took place. Hilkiah, if he was the moving agent in formulating Dt, must thus either have failed to carry out thoroughly his own aims, or he did not in the Deuteronomic programme give correct expression to these aims. Little probability attaches to either of these suppositions.

According to the narrative of Kings (2 K 23), Josiah, in his purification of the cultus by the suppression of the *bāmōth* worship, appears to have distinguished between three categories of priests outside Jerusalem. The *kēmārīm* he deposed (v. 5). By these are meant, in accordance with the uniform OT use of this word (see above, § 1), and in view of the way in which the *kēmārīm* are introduced in connexion with the suppression of the Baal worship which found expression in the adoration of sun, moon, and stars—idoltrous priests. The *kōhānīm* from the cities of Judah were assembled by the king (v. 8), but he did not permit the priests of the high places to ascend the altar of Jahweh at Jerusalem, but allowed them to 'eat *mazzōth* in the midst of their brethren' (v. 9). By this is perhaps meant that they had to remain in their respective places and there find their bread. In this sense the expression would certainly be somewhat strange, and there would be no indication then that these *bāmōth* priests were treated with any less severity than the *kēmārīm*, although it must be assumed that they were. We must therefore suppose that the expression 'eating of *mazzōth*' has reference to some favour shown them in the matter of maintenance (*Gesch.* p. 225 f.). Of a third class of non-Jerusalemite priests there is not express mention; but since it is said that the *kōhānīm* (in a body) were assembled at Jerusalem, and then the special treatment of the *kōhānīm* of the high places is indicated, the assembling can hardly have had any object except to separate these *bāmōth* priests from other non-Jerusalemite priests who had not been priests of the high places. Kuenen (*ThT*, xxiv. [1890] p. 27) objects, indeed, to this explanation, with apparent right, when he says that then the order of words in 2 K 23⁹ would require to be '*akh kōhānē ha-bāmōth lō' ya'ālū*. But the contrast is between 'he brought to Jerusalem' (v. 8) and 'the priests of the high places went not up,' so that the order of words ('*akh lō' ya'ālū*') can be justified also on our view. Those non-Jerusalemite priests who had not been priests of the high places were then probably admitted by Josiah, in accordance with the directions of Dt regarding the Levites, to a share in the cultus at Jerusalem. If this was done, the requirements of Dt were satisfied in the spirit, although certainly not to the extent of what, taken in the letter, they

might express. On the other hand, if by the priests of the high places (v. 9) who were excluded by Josiah from the service of the altar, we are to understand all non-Jerusalemite Levites, it must be held that the Deuteronomic demands in favour of the admission of the non-Jerusalemite Levites had no regard paid to them at all. Considering the impression which the law made upon Josiah, this is not exactly probable, for Dt demands in no ambiguous terms that the non-Jerusalemite Levites should be admitted to some share in the holy service. It is possible, no doubt, that in the narrative of Kings the admission of non-Jerusalemite Levites to the cultus is passed over in silence, not without intention, because it might appear objectionable to the author. In the cities of the old kingdom of Samaria, which were likewise purified of the *bāmōth*, Josiah, according to the narrative of Kings, offered all the *bāmōth* priests upon the altars (v. 20). Whether this bloody measure was literally carried out may indeed be doubted. On other points the story of the reform of the cultus makes the impression of being based upon good authority. For instance, in the mention of the eating of *mazzōth* (or whatever may have been the original expression in what is perhaps now a corrupt text) by the former priests of the high places in the midst of their brethren, the author must have had in view a special arrangement no longer clearly intelligible to us, which cannot have been invented by him after the analogy of certain relations in which the priests found themselves at a later period, or which were known from other sources.

The Bk. of Jeremiah calls the prophet's relatives at Anathoth *kōhānīm* (1¹); they would have been called in Dt *Levites*. Besides this, in a passage which it is difficult to assign to Jeremiah himself, the Deuteronomic expression 'Levite priests' is employed (33¹⁸), and in the same place there is mention of 'the Levites, the priests, my (sc. Jahweh's) ministers' (v. 21), or, more briefly, 'the Levites that minister to me' (v. 22). The Bk. of Jeremiah bears no witness to the existence of a class of Levites distinct from the priests. But it certainly witnesses to an organization of the priestly body. There is mention of elders of the priests (19¹), the office of chief superintendent in the temple (20¹ 29²⁵), as well as that of keeper of the threshold (35⁴). The priests, even the higher grades of them, appear to be still regarded as court officials; at least the chief superintendent Zephaniah (29²⁵ 29) makes his appearance as a messenger of king Zedekiah (21¹ 37³).

6. THE PRIESTHOOD IN EZEKIEL'S STATE OF THE FUTURE.—During the Exile, the prophet Ezekiel, the son of Buzi, of priestly descent (Ezk 1³), drew up a set of statutes for the future theocracy. These statutes are thoroughly imbued with a priestly spirit, and in view of the commanding position which is assigned in them to the sons of Zadok, the Jerusalemite priestly family, there can be no doubt that Ezekiel himself belonged to this family.

In the State of the future, in what shall then be the sole existing temple, that at Jerusalem, he permits (44¹⁵) none but the Levite priests (cf. 43⁹), the sons of Zadok, to enjoy priestly rights, to offer to Jahweh fat and blood, to enter His sanctuary and to approach His table; this prerogative is to belong to them because they kept the charge of the sanctuary of Jahweh when the children of Israel went astray. The prophet's meaning clearly is, that the Zadokites kept the service of Jahweh pure when the people deviated into idolatry—a statement which, of course, has only a measure of truth, for the intrusion of idolatry into the temple at Jerusalem in the reign of Manasseh cannot

have taken place without some complicity on the part of the Jerusalemite priests. The Zadokites are contrasted by Ezekiel with the Levites who went astray from Jahweh when Israel apostatized, who left the service of Jahweh for that of idols. They are to bear their iniquity, they shall not approach Jahweh to exercise the office of priest to Him, nor approach His holy things; on the contrary, they are to take the place of the foreigners who have hitherto been allowed to enter the sanctuary as keepers of it, and in their room they are to keep watch at the doors of the temple, to be ministers of the house, to slay the burnt-offering and the sacrifice of the people, and to stand before them (the Israelites) to minister to them (44⁴⁵). Besides slaughtering the victims, the 'ministers of the house,' i.e. the non-Zadokite Levites, have, further, to cook the sacrifices of the people (46²⁴).

It is plain that by the non-Zadokite Levites, Ezekiel means the former priests of the high places, who had abetted the people's practice of idolatry on the high places. For this they are to be deprived of their former priestly rank and degraded to the position of temple-servants. From this it may be seen that Josiah's reform had not been able to destroy the former *bāmōth* priests' claim to priestly rights. They could, in face of that reform, appeal to the enactment of Dt, whereby an equal share in the priestly service at Jerusalem was open to all Levites who might come to attach themselves to the cultus there.

The explanation of Ezekiel's 'Levites' as the former priests of the high places has been rightly maintained, especially by Graf, Kuenen, and Wellhausen. On the other hand, one cannot infer, as has been done by the writers just named, from Ezekiel's presentation of the case, that up till then there were in the temple at Jerusalem no other servants of the priests or of the temple beyond the foreigners spoken of. Ezekiel demands merely that the foreigners who had previously given service in the sanctuary, and who are known from the Jehovistic passages in the Bk. of Joshua (see above, § 3) as temple-slaves, should have their place taken in future by the former priests of the high places. But besides such servants, there may, even prior to the time of Ezekiel, have been Israelites, possibly even Levites in particular, who held in the temple a position subordinate to the priests and intermediate between them and the laity. Ezekiel speaks of a degradation not of the Levites as a body, but only of those of them who had been priests of the idol-worship. Only in a later passage (48¹¹) does he say of the 'Levites' generally, in distinction from the sons of Zadok, that they 'went astray,' but, after the previous description of the manner of this going astray, it may be so put for the sake of shortness. That besides those who went astray and the Zadokites there is yet another group of Levites recognized by Ezekiel, namely those who had even at an earlier period occupied the position now assigned to the former *bāmōth* priests, of this there is certainly nowhere a clear expression. One might think to deduce it from 40⁴⁵, where—before the degrading of the idolatrous Levites is spoken of—a distinction is made between 'the priests, the keepers of the charge of the house,' and 'the priests, the keepers of the charge of the altar, which are the sons of Zadok, who from among the sons of Levi draw near to Jahweh to minister to him' (*Gesch.* p. 106). Smend (*ad loc.*) and Kuenen (*ThT*, 1890, p. 23) would refer the words 'these are the sons of Zadok' to both the preceding definitions of the *kōhānim*, so that by 'keepers of the charge of the house' we should not have to understand Levites as distinguished from Zadok-

ites. This does not appear to the present writer to be permissible, seeing that in 44¹¹ it is expressly said of the Levites that they are to be 'ministers of the house,' and in 44¹⁴ that it is they that are to be 'keepers of the charge of the house' (cf. 46²⁴), whereas 44¹⁶ says of the sons of Zadok that they are to draw near to the table of Jahweh, which corresponds to the definition 'to keep the charge of the altar.' Kuenen appears to be decidedly wrong when, in answer to the present writer's distinguishing of two classes of priests in 40⁴⁵, he objects that the south hall and the north hall in 40⁴⁵, of which the first is for the keepers of the charge of the house, and the second for the keepers of the charge of the altar, are, according to 42¹³, both intended for the priests proper, 'who draw near to Jahweh,' i.e. the Zadokites. The south hall and the north hall of 40⁴⁵ are quite different from the north halls and south halls of 42¹³ (observe halls to the north and halls to the south, both times in the plural). The two single halls of 40⁴⁵ lie outside the inner gate, i.e. the south gate and the north gate leading to the inner fore-court, by the side of the gate (v. 4). The north halls and south halls of 42¹³ are situated opposite the inner fore-court, i.e. outside the latter, on its north and south sides (see Smend, *ad loc.*). From 42¹³ it cannot then be inferred that the *kōhānim* mentioned in 40⁴⁵ are all to be regarded as Zadokites. But even if in this passage a distinction is already made between priests of first and second rank, it is possible that there is in this a proleptic reference to the later statements about the degrading of the priests of the high places. If so, it is certainly surprising that only in 40⁴⁵ are even the lower class spoken of as *kōhānim*. The two classes are elsewhere distinguished by Ezekiel in the same fashion, but the designation *kōhānim* for the lower class occurs no more after the rule has been laid down in ch. 44 that the Levites who went astray are no longer to discharge priestly services. On the contrary, 45⁴ speaks of 'the priests, the ministers of the sanctuary, who draw near to minister to Jahweh,' and, along with these, of 'the Levites, the ministers of the house.' Therefore it seems to follow from the peculiar form of designation, *kōhānim*, applied only in 40⁴⁵ to the lower class, that the distinction of *kōhānim* of two grades was familiar to Ezekiel from already existing relations (so Van Hoonacker, *Sacerdote*, etc. p. 195), but that in his later utterances he purposely avoided giving to the lower class the name of 'priests,' after he had denied the priestly character to the apostate Levites who were assigned to this class. That there should have been a second class of priests even prior to the Exile is not astonishing in view of the various priestly dignities recognized in the Bks. of Kings (see above, § 3). If this were really the case, the priests of secondary rank will, of course, have been different from the foreigners, the temple-slaves. The latter are required by Ezekiel to be in future wholly discarded. His Levites, i.e. the former priests of the high places, are, on this presupposition, to discharge in the future cultus the duties which hitherto have been discharged by the priests of the second rank and the foreigners.

A chief priest is not known to the future theocracy of Ezekiel any more than a king, but only a 'prince' (*nāsī'*), to whom certain priestly prerogatives belong, as they had done to the pre-exilic king. The prince may upon certain occasions enter the east gate of the inner fore-court, but not this court itself; he is to defray the cost of the daily offering and the material for the offerings at the great festivals, and for the people (*Gesch.* p. 129 f.). 'The priest' who officiates at the atonement for the sanctuary on the first day

of the first and seventh months (45^{10c}) can hardly be the chief priest (Smend, *ad loc.*), but may rather be regarded as the particular Zadokite who happens to officiate. It has frequently been assumed that these ordinances of Ezekiel imply the non-existence of a 'high priest' up to his time. It may be, indeed, that prior to Ezekiel no priest bore the exact title 'high priest'; but there can be no doubt, from the account of things in the Bks. of Kings, that prior even to the Exile there was a chief priest at Jerusalem. In Ezekiel's theocracy Jahweh is directly present, hence it has no room for a human king, and is just as little in want of a single priestly mediator (this also against Van Hoonacker, *Sacerdoce*, etc. p. 368, who holds that Ezekiel intends, by the emphasis he lays on Zadok as the father of the Jerusalemite priesthood, to recognize in his State of the future a 'high priest' such as Zadok was). Ezekiel's temple has no sacred ark, to which such a priest had to draw near, but God Himself dwells in the temple. It may be that in the words, 'Away with the tiara (*miẓnepheth*, elsewhere only as the designation of the high priest's turban in the Priests' Code, cf. *ẓānīph* in *Zec* 3⁵), hence with the crown' (Ezk 21³¹ [Eng. 30]), there is a distinct rejection both of the kingship and of the high priesthood expressed (*Gesch.* p. 118 f.). At all events, in view of the dropping of the title of 'king' in Ezekiel's theocracy, it would not be surprising if he meant a hitherto existing high priesthood to be also discarded.

Ezekiel gives special injunctions to the priests. They are to perform the holy service, clothed in linen, not in wool, in order to avoid sweat (44^{17c}). This official dress they are to put off when they go out to the outer court, that they may not sanctify the people with their holy garments (v. 19). In like manner, in order to avoid sanctifying the people, it is enacted that the priests are to boil the guilt-offering and the sin-offering and to bake the *minhāk* in chambers of the inner court, but not to bring them into the outer court (46^{19c}). Their hair they are neither to let grow long nor to shave off, but to cut; when they go into the inner court they may not drink wine (44^{30c}). They may not marry a divorced woman, but only a virgin of the house of Israel or the widow of a priest (v. 22). They are not to defile themselves with dead bodies except in the case of the nearest relations; in the event of such defilement the priest is not to be allowed to enter the inner court and present his sin-offering till the seventh day after his purification (v. 26c). An injunction, which was indeed of general application (cf. Ex 22³⁰), is addressed with special emphasis to the priests, namely that they are not to eat of animals that have died of themselves or been torn (v. 31). Amongst the functions assigned to the priests, besides the offering of sacrifice, there is the instruction of the people in the difference between holy and profane, clean and unclean, as well as the giving of judicial decisions (v. 26c).

The principle already laid down in Dt, and repeated by Ezekiel, that the priests are to have no inheritance in the land of Israel, that Jahweh is their inheritance (44²⁸), is not carried through consistently by Ezekiel. He assigns to the priests the land immediately surrounding the temple, as a holy *tērāmāh* or 'portion' to dwell on (45^{10c} 48^{10c}); the Levites receive the district touching on the priests' land (45³ 48¹³). The land of the priests and Levites is an inalienable possession (48¹⁴). Besides this the priests have, as in Dt, but after a different arrangement, definite portions assigned them of the sacrifices and sacred gifts. The *minhāk*, the sin-offering and the guilt-offering they have to consume in the chambers of the temple (42¹³ 44²⁹). Every 'devoted thing' in Israel falls

to them (44²⁹), and, in the case of the consecrated gifts, the best (the *rēshith*) of all the first-fruits of everything, and of every heave-offering (*tērāmāh*), of everything of all heave-offerings, along with which special mention is made, further, of the best (the *rēshith*) of the dough (44³⁰). By the heave-offering appears to be meant vegetable products of the land, along with the first-fruits already mentioned. Of the heave-offering also only the *rēshith* is assigned to the priest. What is to be done with the rest is not indicated, perhaps it goes to the State (*Gesch.* p. 126 f.).

7. THE PRIESTHOOD FROM EZEKIEL TO EZRA. —Ezekiel's ordinances were of an ideal character, calculated upon a hoped-for restoration of the theocracy. During the Exile, when there was no holy service performed, we learn nothing about the condition of the priestly arrangements. Only Deutero-Isaiah speaks of 'holy princes' (43³⁰), by which probably priest-princes are meant, and in that case a priesthood organized in different grades is presupposed, such as we make acquaintance with in Kings. A prophet writing in the period after the Return, who appears to have belonged to the school of Deutero-Isaiah, but can scarcely have been identical with him, rises to the broad-minded expectation that Jahweh in the future will take to Himself even Gentiles 'for priests, for Levites' (Is 66²¹, where read לְכֹהֲנִים לְלֵוִי; see *Gesch.* p. 249 f.). Whether the prophet understands the terms 'priests' and 'Levites' to be identical in meaning, or distinguishes between them (so, recently, again, Van Hoonacker, *Sacerdoce*, etc. p. 206 ff.), is not perfectly clear; but the probability is that the two terms are regarded as equivalent, as otherwise there would be an anti-climax in the order 'priests, Levites.' The statement assumes the simplest character if one emends (with Kuenen, Duhm [*ad loc.*], Kittel [*ad loc.*], and Cheyne [*Introd. to the Book of Isaiah*, London, 1895, p. 377]) לְלֵוִי לְכֹהֲנִים 'for Levite priests.'

From the post-exilic community we have authentic information about the condition of the priesthood, first of all from Haggai and Zechariah in the second year of king Darius (Hystaspis), B.C. 520. Both these prophets speak of Joshua, the head of the priestly body, as 'high priest' (*ha-kōhēn ha-gādōl*, Hag 1¹ 12¹⁴, Zec 3¹ 8¹ *et al.*), a designation of which we have found hitherto only isolated occurrences in Kings, without having any guarantee from these that we are entitled to look upon it as a pre-exilic title. When, in the vision of Zechariah, the Satan accuses the high priest, his complaint is repelled by the angel of Jahweh, in the name of Jahweh 'who has chosen Jerusalem' (Zec 3²). The high priest then is clearly viewed as the representative of Jerusalem, and thus, in all probability, of the whole community. Without the high priest, Zechariah cannot portray the consummation of all things under the *Zemāh*, i.e. the Messiah. He thinks of a priest as standing on the right (LXX) of the future king (6¹³). In another passage in this same prophet, the Messiah himself appears to be represented as in possession of priestly prerogatives, when it is said of Joshua and his companions, i.e. the rest of the priests, that they are 'mon of the sign,' in allusion to the coming of the *Zemāh*, under whom the sin of the land is to be taken away in one day (3^{8c}). To Joshua the promise is made that, if he will walk in Jahweh's ways and keep His charge, he shall judge Jahweh's house (i.e. Israel; *tādin* would scarcely be used of the management of the temple [Wellhausen, Nowack], although the temple appears to suit better the mention of 'courts' in the same context), keep His courts, and have a place to walk among those who stand before God (3⁷). Joshua is thus thought of as the culminating head of the people, the director

of the cultus, the mediator between the community and God. The high priest is manifestly conceived of by Zechariah as anointed (as in the Priests' Code), for the 'two sons of oil' of Zec 4¹⁴ can hardly stand for anything else than the Davidically descended Zerubbabel and the high priest Joshua.

All this marks a view of the dignity of the chief priest which is diametrically opposed to the programme of Ezekiel, and which cannot be understood as a direct expansion of what we have learned from Dt or the prophets or the historical books to have been the development of things hitherto. Of course, through the restoration of Israel, after the Exile, the dignity of the chief priest acquired extra elevation, because he was now head of the community with no longer a king by his side. But in spite of all this it appears to the present writer inconceivable, that in the course of the 52 years which had elapsed since Ezekiel in the five and twentieth year of his captivity (B.C. 572) had his vision of the new Jerusalem with its new ordinances (40¹), the high priestly dignity should have made its appearance as a wholly new creation. If Ezekiel is silent about a chief priest, this is—as the statements in the Bks. of Kings show—plainly not because there had been no chief priest at Jerusalem up till then, but is due to an intentional reaction against a then actually existing office. But even if this be so, the rank of the chief priest must, in the interval between Dt and Zechariah, or even between Ezekiel and Zechariah, have been raised in a way of which there is no evidence in the sources as yet adduced, and which is not intelligible on the ground simply of the changed circumstances. We shall have to return later on to inquire to what influence this alteration is to be ascribed (see below, § 8 g).

In Haggai the priests are asked for *tôrâh*, i.e. oral direction, and this with reference to the distinction of clean and unclean (2^{11a}). From the fact that the reply is given by word of mouth, it does not follow that there was as yet no written *tôrâh* at all on this subject; even where such exists, oral direction as to its application in any particular case is still requisite. By Zechariah, too, it is regarded as the business of the priests—as well as the prophets—to give information about a question affecting religious observances (7³).

Neither Haggai nor Zechariah make any mention of Levites alongside of priests. Our first authentic witness to Levites is in the time of Ezra. According to the account given in Ezra's own Memoirs (indicated hereafter by M, which stands also for the Memoirs of Nehemiah), Ezra was accompanied to Palestine by two priestly houses, that of Gershom of the sons of Phinehas, and that of Daniel of the sons of Ithamar (Ezr 8² M). No Levites came forward at first to join him (v. 16 M). It was only at Ezra's special request that 38 Levites were at length prepared to go with him (v. 18^a M). Of the Nethinim, 'whom David and the princes had given for the service of the Levites,' there went with Ezra 220 men (v. 20 M). The fact that so few Levites, and these only after much pressing, consented to follow Ezra, must have been due to special circumstances. The Levites, who in Ezr and Neh are everywhere sharply distinguished from the priests, must be understood to be those whom Ezekiel had called Levites in the narrower sense, i.e. the descendants of the non-Jerusalemite priests of the high places. The station which Ezekiel had assigned to them in the State of the future must have presented few attractions. Still the distinction between priests and Levites among those who returned with Ezra can scarcely be based merely upon the ordinance proposed by Ezekiel, but, like the appearance of the high priest in Zechariah, is

probably to be attributed to the influence of another classification which had meanwhile come into force (cf. below, § 8 g). But even apart from such, and even if there was no thought of introducing the ideal constitution of Ezekiel, the situation was not a favourable one for these 'Levites.' As Ezra himself, according to what is quite a credible account of his descent (Ezr 7¹⁴), was a Zadokite, the descendants of the former priests of Jerusalem would, as a matter of course, take the lead amongst the returned exiles, so that other 'Levites,' who were not in a position to claim that they belonged to the priestly aristocracy, must give way to them.

The Memoirs of both Ezra and Nehemiah make a distinction, which the Bks. of Ezr and Neh do not make everywhere throughout, between the Levites and the singers and doorkeepers of the temple (e.g. Ezr 10²⁴ M; see *Gesch.* p. 142, and cf. below, § 9). These are classes which meet us for the first time in the post-exilic period (the 'singers' of Ezk 40⁴⁴ are based upon a textual error, see Smend, *ad loc.*; otherwise Köberle, p. 17 ff.). But it is not likely that these classes constitute a really new phenomenon, which first took its rise in the Exile, for, during a period when there was neither temple nor cultus, professional classes like these can scarcely have been formed. And as little—even if the representation given in Neh 7 (? M) = Ezr 2, that already amongst those who returned with Zerubbabel there were singers and doorkeepers, should be incorrect—can these classes have come into being for the first time under the wretched conditions that marked the beginnings of the cultus in post-exilic Jerusalem. Rather, it may be inferred, in the post-exilic singers and doorkeepers we have to do with the descendants of doorkeepers and singers of the pre-exilic temple, just as in the Nethinim with descendants of pre-exilic temple-slaves. The post-exilic singers, doorkeepers, and Nethinim are consequently an argument in favour of the existence of a numerous non-priestly personnel of servants in the pre-exilic temple.

In a statistical account of the Astarte temple, inscribed on stone, found on the site of the ancient Kition, and belonging perhaps to the 4th cent. B.C. (*CIS*, I. 86A and B), there is mention of a whole series of different servants of the temple, who correspond in part to the Jerusalem temple-servants: those who had charge of the curtains, gatekeepers, those who had to attend to the slaying of the sacrificial victims, female singers or dancers (נָחֳמִי). A personnel of a similar kind was, in fact, required by every considerable temple.

The post-exilic Levites in the narrower sense, on the other hand, cannot be identified with any office in the pre-exilic temple. Although the class known in post-exilic times as 'Levites' owed its origin, to all appearance, to the programme of Ezekiel, yet the presence of special doorkeepers, alongside the Levites, in the post-exilic temple, shows that the Levites had not become precisely what he intended, for he had assigned to them the charge of the temple doors (see above, § 6). From the same circumstance it may be inferred with probability that the class of doorkeepers existed prior to Ezekiel, and that he intended to amalgamate his Levites with these. If the list contained in Neh 7 is what in the present text it gives itself out to be, namely a catalogue of those who at the first returned from the Exile with Zerubbabel (Neh 7¹), the first *gôlâh* that returned already included all the above classes of sanctuary servants. Along with 4289 priests the list mentions 74 Levites, 148 (128) singers, 138 (139) doorkeepers, 392 Nethinim and sons of

Solomon's servants (Neh 7^{30f.}, cf. Ezr 2^{35f.}). But perhaps the probability is greater that we have to do here with a list of the population of Judah at the time of Nehemiah. The very small number of Levites will have to be explained in this passage in the same way as in the notice regarding those that returned with Ezra (see above). Another list (Neh 11¹⁰⁻¹⁹), which likewise has reference perhaps to the time of Nehemiah (the Chronicler, at all events, understands it so), gives, amongst the numbers of those dwelling in Jerusalem, for the priests 1192; for the Levites, to whom the singers are here reckoned, 284; for the doorkeepers 172. This list, however, as it does not distinguish between Levites and singers, may not have been drawn up till after the time of Nehemiah. Ezra himself says nothing of singers and doorkeepers having returned with him; it is only in the later narrative, Ezr 7, that they are mentioned, but without any statement of their numbers, amongst the different classes of those who accompanied Ezra. It may be that they had already returned in such numbers, that, when Ezra set out, there were either no more singers and doorkeepers in Babylon at all (Vogelstein, p. 38 f.), or none that were prepared to go with him. On the other hand, 220 Nethinim returned with Ezra (Ezr 8²⁰ M).

The same list in Neh 7, whose date is uncertain, lays great stress on the priests being able to prove their priestly genealogy: the families that could not do this were excluded from the priesthood (v. 58^{f.}). What was demanded in the matter of this genealogy is not evident from the expressions used, whether perchance descent from Zadok had to be proved, in accordance with the ordinance of Ezekiel, or from Aaron, as is required by the Priests' Code.

The above were the constituent elements of the service of the temple, when, according to the usually accepted date, in B.C. 445 or 444, during the governorship of Nehemiah, Ezra caused the Law to be read aloud in solemn assembly (Neh 8 ff.). This law—probably the whole Pentateuch, otherwise only the so-called Priests' Code, i.e. the ceremonial law contained in the middle books of the Pentateuch—contained also regulations regarding the priesthood which up till then had not possessed normative force, at whatever time they may have originated. In the position, however, answering to that in the Priests' Code, which was assumed by the high priest in the new Jewish community, even before the arrival of Ezra (see above), we shall have to recognize an influence exerted, prior to its public promulgation, by the legislation of the Priests' Code which was gradually arranged or collected, if not composed, by the scribes in Babylon. In this Code, as is well known, the high priest has a unique position given to him. The influence of the same legislation is probably to be traced likewise in the explicit distinction between priests and Levites amongst those who returned with Ezra, and still more clearly in the circumstance that some priests who returned with Ezra traced their descent to Aaron (Ithamar), but not to Zadok (Phinehas). This influence of the Priests' Code upon the relations of the new community prior to Ezra's appearance in Palestine, is enough to exclude the view, which is sometimes put forward, that Ezra composed the Priests' Code after his arrival, i.e., according to the usual chronology, between the years B.C. 458 and 445 or 444. At least the rudimentary stage of the Priests' Code must be placed, in view of the position of the high priest in the time of the prophet Zechariah, not less than about a century before the time of Ezra.

In all probability the publication of the Law was

VOL. IV.—6

preceded by the appearance of the short prophetic writing which has come down to us under the name *Malachi*, which is derived from one of its catch-words, or may even be a title of honour given to its author. It was probably written after the arrival of Ezra, as it occupies itself with the question of the mixed marriages, which, so far as we know, was first agitated by him. The covenant with the priests is called in Malachi the covenant with Levi or with the Levites (2^{4, 8}), which does not agree with the terminology of the Priests' Code, and hence appears to point to a date prior to its publication. It cannot, surely, be supposed that, with reference to an oppression of the serving Levites by the priests, the latter are reminded by Malachi that Jahweh has entered into covenant with the whole tribe of Levi (Vogelstein, p. 24 f.), for what Malachi complains of is not ill-treatment of the Levites by the priests, but that the priests handle the *tôrâh* wrongly and with respect of persons (2⁶), i.e. of course in their dealings with the community. Malachi calls those who present the offerings 'sons of Levi' (3⁹), and betrays no acquaintance with the term 'Levites' in the special sense of the Priests' Code, namely as the appellation of a class of inferior ministers of the sanctuary. The terminology of the Priests' Code had thus, at all events, not become current in the time of Malachi. It is true that in Malachi the paying of the tithes is demanded, not for the holding of feasts, as in Dt, but for the store-house of the temple, as 'food,' i.e. for those who live by their temple service (3^{8, 10}). This agrees with the requirement of the Priests' Code published by Ezra, but this particular ordinance may have come into force even prior to the publication of the Code.

8. THE PRIESTHOOD ACCORDING TO THE LAW CONTAINED IN THE 'PRIESTLY WRITING.'—We do not know what was the compass of the law-book which obtained recognition under Ezra. Probably we should understand by it the whole Pentateuch. The narrative of the reading of the law and the binding of the people to obey it is scarcely, it is true, taken directly from the Memoirs of Ezra, but certain traces indicate that it goes back to these. The indications which the narrative of the reading of the law gives as to its contents point in part (the prohibition of marriage with the Canaanites, Neh 10³¹) to Deuteronomy, or even to the still older legislation contained in the Jehovistic book, but in great measure to enactments which are to be found only in the code contained in that source of the Pentateuch which it has become customary to call as a whole the 'Priestly Writing' (Neh 8^{16, 18} 10^{34, 35f.}). This portion of the law of Ezra is a new factor which, at whatever time it may have originated, had not hitherto obtained public recognition or been generally known. It is true that in certain new ordinances regarding the situation of the priests, introduced in the period between the First Return and the arrival of Ezra (see above, § 7), influences are to be traced which proceeded from this code, whether already in existence or in process of coming into being.

The Priestly Writing occupies itself more than any of the collections of laws that had hitherto obtained validity, with the relations of the priesthood, and, on this account and because of its having undeniably originated in the circle of the priests, may be called after them. Its legislation, which deals mainly with ritual, is not, indeed, specially designed for the priests. It is not meant to be a manual of rules for the discharge of the priestly service. These, indeed, are not fully given on many points; rather are the readers or hearers it has in view, primarily the members of the con-

gregation. The latter, however, are instructed mainly about the organization of the holy service and of those who perform it, about the rights and duties appertaining to the priests. Nevertheless, for the sake of brevity, the law contained in the 'Priestly Writing' may be called, after the example of others, the Priests' Code.

a. *The priests in the Law of Holiness and in particular 'tôrôth.'*—It is owing only to redaction by a single hand that the Priests' Code has reached a harmonious character; this redaction has clearly welded it together from a variety of components. Even the views it gives of the priestly relations have not been all cast in one mould. In those components of the Priests' Code which manifestly are to be recognized as the oldest, the so-called 'Law of Holiness,' i.e. the main stock of Lv 17-26, as well as particular *tôrôth* akin to this, which were perhaps originally combined with it or may have had currency by themselves (Lv 6 f., 11 [12-15, 27], Nu 5^{11a}, 6¹⁻²¹, 15²⁷⁻⁴¹), we hear only of 'the priests' or 'the priest,' namely the one officiating; but the priests are not more clearly defined as to their descent, and there is no mention of Levites or other sanctuary servants along with them. It is a later process of redaction that has introduced into these passages the designation of the priests with reference to Aaron and his sons. In Lv 6⁷ (Eng.¹⁴) 'sons of Aaron' appears to stand in the place of an original 'the priest,' for this subject is followed in v.⁸⁽¹⁵⁾ by the singular of the verb. The quite isolated mention of the Levites in these portions (Lv 25³²⁻³⁴) is certainly an interpolation. On the other hand, even the original Law of Holiness probably contained very minute prescriptions as to purity on the part of the priests (Lv 21^{10a}). This law appears, further, to have been acquainted with a chief priest, for the connexion of the section which lays down special rules for his purity (Lv 21^{10a}) with the Law of Holiness scarcely admits of a doubt (it is doubted, indeed, by H. Weinell, 'נָזִיר und seine Derivate,' in *ZATW*, 1898, p. 28 ff.). In favour of this connexion is the expression, not used elsewhere in the Priests' Code, 'the priest who is greater than his brethren' (v.¹⁰). To the older elements probably belongs also the prescription that this first priest is not to leave the sanctuary in the event of a bereavement (Lv 21¹²), which presupposes that he lives in the sanctuary (as Eli did), a view which is taken nowhere else in the Priests' Code.

To what date these oldest components of the Priests' Code should be attributed it is hard to decide. At present they are usually assigned to the Exile, near the time of Ezekiel. So much is unquestionably right, that the Law of Holiness still existed as a collection by itself during the Exile, and that it received then its conclusion which fits only that period (Lv 26^{3a}). But, beyond this, it does not follow necessarily from the special points of contact between Ezekiel and this law, that both belong to nearly the same period. These points of contact may be due to the fact that Ezekiel made quite a special use of the Law of Holiness, and specially attached himself to it. The demand which stands at the head of this law (Lv 17^{10a}), that all slaying of animals must take place before the sanctuary (which was afterwards brought by a redactor into relation to the tent of meeting, which was not originally mentioned), could be obeyed only at a time when there were more sanctuaries than one (so, following Dillmann, *Gesch.* p. 47). This would lead us to think of the pre-Deuteronomic period. That the author of the Deuteronomic law was acquainted with the *tôrâh* about leprosy which has come down to us in Lv 13 f., outside the specially so-called 'Law of Holiness,' but belonging to those special *tôrâth* akin to this law (see above), is not improbable, seeing that, at all events, some leprosy-*tôrâh* entrusted to the priests is known to him (Dt 24⁸).

If the Law of Holiness originally presupposed the existence of a plurality of sanctuaries, it remains doubtful whether it thinks of a single chief priest for all the sanctuaries, or assumes that there will be a number of chief priests taking charge of the different sanctuaries.

b. *The Aaronite priests.*—The other components of the Priests' Code exhibit a harmonious system of organization of the priesthood; although even here, in matters of detail, differences of various strata and innovations are not to be overlooked. A priesthood, according to the Priestly Writing, first came into being in Israel in the time of Moses, when the one legitimate place of sacrifice, the tent of meeting, was by Divine direction established. Previously, according to this writing, the fathers of Israel had offered no sacrifices, and consequently required no priests. Moses installed as priests his brother Aaron and the latter's sons. Only to the descendants of these do the priestly rights pass on. The terms 'sons of Aaron' and 'priests' are thus synonymous (Ex 28¹, 29⁴⁴, 40^{12a}, etc.). Only two of Aaron's sons, Eleazar and Ithamar, perpetuate the family. A preference, however, is given to the sons of Eleazar above those of Ithamar, when, on the occasion of a propitiatory action on the part of Phinehas, the son of Eleazar, the covenant of an everlasting priesthood is entered into only with him and his seed (Nu 25^{12a}).

For the exercise of the holy office the sons of Aaron are provided with a special *priestly attire*, Ex 28^{40a}—linen breeches and a long coat (*kêth-oneth*), besides a girdle and a turban. The upper garments are, according to Ex 39^{2a}, to be all of *shêsh*, i.e., borrowing an Egyptian term, *byssus*, therefore white, till we come to the girdle, which, according to Ex 39^{2b} (if here it is the girdle of the priests in general and not that of the high priest that is spoken of), is composed of the four colours of the sanctuary, namely white, crimson, blue-purple, and red-purple. At all events, according to Josephus (*Ant.* III. vii. 2), the white ground of the priest's girdle had flowers of the four colours wrought into it. Shoes, which are nowhere mentioned, are apparently not to be worn by the priests while performing the sacred office; they probably go barefooted (Ex 3⁵ [JE]), just as the Phœnician priests wore not shoes but linen socks (Pietschmann, *Gesch. der Phönizier*, Berlin, 1889, p. 223). The white garments of *shêsh* correspond to the linen robe, the '*ephôd bad*, which in older times was worn by the Hebrew priests (1 S 2¹³). Linen was the material of the priest's dress also among the Babylonians (Gunkel, *Archiv f. Religionswissenschaft*, i. [1898] p. 297) and the Egyptians (Annessi, p. 102 ff.; Renan, *Hist. du peuple d'Israël*, i. 149; *Gesch.* p. 70 f.). The employment of *shêsh* instead of the more common linen is to be set down as a later refinement.

The *ritual functions* of the priests, specified in the Priests' Code, are of a manifold character. The priests have to sprinkle the blood of the victim in the sanctuary (Lv 1⁵, 11¹⁵, etc.), to offer the sacrifices (i.e. lay them upon the altar and cause them to go up in the sacred fire (Lv 1⁷⁻⁹, 12¹, 15-17 etc.); they alone may accomplish the *kappārâh* ('covering') effected by the presentation of the offerings (Lv 4^{2a}, 33 etc.). On the other hand, the killing, flaying, and cutting up of the victim is, according to the Priests' Code (differing in this from Ezekiel), the business of the person making the offering, even should he be a layman (Lv 1⁴, *al.*; see *Gesch.* p. 114 f.). The priests have,

further, to pour out the drink-offering (Nu 6¹⁷), they have to perform the whole service connected with the altar of burnt-offering (Ex 30²⁰) and (spoken with special reference to Aaron) the altar of incense (Ex 30⁷). Only an Aaronite, and 'no stranger' may offer incense at all (Nu 17⁵ [Eng. 16¹⁰]). The Aaronites alone have charge of the table of shewbread (Lv 24⁵, spoken specially of Aaron) and the candlestick (Ex 27²¹). From Ex 30⁷, Lv 24⁵, Nu 8²⁴ it does not result that, according to another older enactment, only the high priest had charge of the candlestick (Vogelstein, p. 63). When 'Aaron' alone is spoken of here, it is as the representative of the priesthood in general. As such he performs in the Priests' Code the whole of the priestly service, and in other passages as well he is named alone as standing for the priests in general. Ex 27²¹ 'Aaron and his sons' will not be incorrect, then, as the explanation of the other passages which speak of Aaron alone. Only the priests may go within the sanctuary (Ex 30²⁰). A 'stranger,' i.e. a non-Aaronite, who approaches the altar or the space inside the curtain shall die (Nu 18⁷). Amongst the holiest articles which may be approached only by holy persons, i.e. only by the priests, is reckoned even the laver in the fore-court (Ex 30²²).

Even outside the sanctuary there are special duties assigned to the priests. They have to remove the ashes from the altar to a clean place without the camp (Lv 6⁴ [Eng. 11]); they have (specially Eleazar, but this while Aaron was yet alive) charge of the holy anointing oil (Nu 4¹⁶, which is perhaps to be assigned to a redactor, see Dillm. *Numeri*, etc., 1886, p. 14 f.). They alone may pronounce the blessing upon the people (Nu 6²²), and in war or at the festivals are to blow with the sacred trumpets (Nu 10¹⁰ 31⁶). They have to watch over the distinction between holy and profane, unclean and clean, and to instruct the children of Israel in all statutes which Jahweh has spoken to them through Moses (Lv 10¹⁰), whereby probably those statutes are specially intended which have regard to holy and profane, clean and unclean.

The priests have, further, to pronounce the curse on the woman who is accused of adultery, and to give her the water of bitterness to drink (Nu 5¹²); they have to reconsecrate the head of the Nazirite who has been defiled (Nu 6¹¹), to determine the presence of leprosy in human beings, in houses, and in clothes, as well as to pronounce the declaration of cleanness from leprosy, and, in the latter case, to carry out the sprinkling of the man to be cleansed with the sacrificial blood, as well as the sprinkling and pouring out of oil (Lv 13 f.). At the slaying and burning of the red heifer, from whose ashes the water of purification for those who have been defiled by touching a dead body is to be prepared, the priest (Eleazar in the lifetime of Aaron) is to be present; he has to sprinkle the blood, and to throw various ingredients into the burning (Nu 19²). The priests have, further, to determine the valuation of persons that have been vowed (Lv 27⁸), of vowed unclean beasts (v. 11 f.), of the consecrated house (v. 14) or field (v. 15 f.).

Aaron and his sons are installed in office by a solemn consecration, with 'filling of the hand,' i.e. by the presenting of a dedicatory offering placed in their hand, the 'fill-offering' (Ex 29, Lv 8 *al.*; cf. on the filling of the hand, above, § 2). That this act of consecration is to be repeated in the case of every priest afterwards is not said, and how far this was actually done is questionable (Schürer, p. 231 f., note 25). In other passages an anointing of the priests is spoken of (Ex 28⁴¹ 30³⁰ *al.*). But at the same time the title 'the anointed' as an expression of honour is used only of the high priest

(Lv 4^{3. 5. 16} *al.*). At the ceremony of consecrating the priests there is mention only of the anointing of Aaron (Ex 29⁷), and the anointing is viewed as the sign of the high-priestly succession (v. 29).

Clearly we have to do here (as Wellhausen was the first to see) with two strata of the Priests' Code; one of which assumes the anointing of all priests, the other only that of the high priest. Through combining the two views, the description has originated which makes it appear as if originally all priests were anointed, while in future the high priest alone is to be anointed (*Gesch.* pp. 25, 48 f.). Nowhere in the OT outside the Priests' Code is the anointing of ordinary priests assumed, but that of the high priest is assumed in several passages (Weinel in *ZATW*, 1898, p. 28).

Full priestly rights belong to such Aaronites as are free from bodily defects. No one who suffers from any such blemish is to go within the sanctuary or approach the altar. On the other hand, even such persons are entitled, like the other Aaronites, to eat of the holy and the most holy offerings (Lv 21¹⁶). On pain of being cut off, the priests have to refrain from sacrificing and from eating of the sacrificial flesh as long as they are tainted with any *Levitical uncleanness* (Lv 22²). The prohibition which applied to all Israelites (Lv 17¹⁵) against eating the flesh of an animal that had died of itself or been torn, is addressed with special emphasis to the priests (Lv 22⁸). Before performing the sacred office they have to wash their hands and feet in the brazen laver (Ex 30¹⁸ 40³¹), and may not, before going into the sanctuary to perform their duties, drink wine or strong drink (Lv 10⁹). They are forbidden to marry a harlot, a polluted, or a divorced woman (Lv 21⁷). A priest's daughter who by harlotry has profaned the office of her father is to be burned with fire (v. 9). The priests are forbidden to defile themselves through the dead, with the exception of defilement by the corpse of the nearest blood relations (Lv 21¹¹). In all cases of bereavement they are forbidden to exhibit signs of mourning by making a baldness upon their heads, cutting their beards at the corners, or making cuttings in their flesh (v. 5).—These prescriptions for the maintaining of purity on the part of the priests are found to a large extent in the Law of Holiness, and may already have belonged to its main stock, and thus have been merely adopted by the Priests' Code.

c. *The high priest.*—At the head of the priestly body stands, in the time of Moses, his brother Aaron, and in later times always one of the descendants of the latter (Ex 29³⁰ etc.). After the death of Aaron the functions of chief priest are undertaken by his eldest son Eleazar, who in turn is succeeded by his son Phinehas (Nu 25¹¹); which seems to assume an arrangement for the succession of the firstborn. Aaron, like the other priests, usually bears the simple title *ha-kōhēn* (Ex 29³⁰ 31¹⁰ etc.). There are few passages in which the chief priest receives the name of honour 'the anointed priest' (*ha-kōhēn ha-māshiah*, Lv 4^{3. 5. 16} 6¹⁸; cf. *Gesch.* p. 26; these passages, and, in general, the majority of those in P in which an anointing is mentioned, are considered by Weinel [*ZATW*, 1898, p. 30 ff.] to be additions). Equally seldom, three times only, does the chief priest bear the title 'high priest' (*ha-kōhēn ha-gādōl*, Lv 21¹⁰, Nu 35^{26. 28}). The high-priestly dignity is clearly thought of as conferred for life (Nu 35^{23. 29}). With solemnities lasting for seven days each new high priest is to be installed in office, with putting on of the holy attire, anointing, and filling the hand (Ex 29²⁹); he has on this occasion, like Aaron on the day of his anointing, to offer a *minhāh* (Lv 6¹³; so at least according to the present text, see Dillm. *ad loc.*).

The chief priest is distinguished by two minutely described *official costumes*.—One of these is wholly of linen. He wears this only when he goes into the Holy of Holies on the Day of Atonement (Lv 16²³⁻²⁴). In discharging the rest of his functions, he has to wear above the white *kithōneth* of *shēsh* worn by all the priests, a variegated dress of the four colours of the sanctuary, blue-purple, red-purple, crimson, and white, interwoven with gold (Ex 28^{35a}, Lv 8^{7a} *al.*). The different parts of this dress are described in detail, yet their exact structure is not quite clearly recognizable. Above his undergarment the high priest wears his distinguishing ephod, kept together at the shoulders by a couple of clasps formed of *shōham* stone, upon each of which are engraved six names of the tribes of Israel (cf. art. EPHOD). Upon his breast, above the ephod, the high priest wears the four-cornered *hōshēn* suspended by little chains. Set in this externally are twelve precious stones in four rows, having engraved upon them the names of the twelve tribes. The *hōshēn* must be conceived of as a species of pocket (cf. art. BREASTPLATE OF THE HIGH PRIEST), for in it are deposited the Urim and Thummim, which evidently are to be thought of as tangible objects (cf. art. URIM AND THUMMIM). Upon the hem of the upper-garment (*mē'il*) which was attached to the ephod, there hang alternately pomegranates and little bells. In the front of his turban (*miznepheth*) the high priest wears upon his forehead a golden diadem inscribed 'Holy to Jahweh.' The high priest alone is entitled to carry the Urim and Thummim (Ex 28³⁰, Lv 8⁸), and to pronounce the 'judgment of the Urim' before Jahweh; and by this decision, as that of a Divine oracle, Israel has to abide (Nu 27²¹).

None but the high priest may go into the Holy of Holies on the yearly Day of Atonement, to make propitiation for the priests and the congregation, and carry through the ceremony with the two goats, in which he has to make atonement also for the sanctuary (Lv 16^{35a}, cf. Ex 30¹⁰). Above all, it rests with him alone to make atonement for his own guilt and that of his house (Lv 4^{3a}, cf. 9^{8a}), as well as for the community as a whole (Lv 4^{16a}, cf. 9^{13a}; differently, as it would appear, Nu 15²⁵, see *Gesch.* p. 27, note). He has to offer a daily *minhah* (Lv 6¹²⁻¹⁶, where 'on the day of his anointing' [v. 13] is probably a later addition, by which the daily offering is transformed into one offered once for all at the time of his installation in the priestly office). Moreover, he has to take his share in the service rendered by the other priests (Ex 27²¹). The rôle of mediator, apart from the above-mentioned atoning transactions, he assumes by bearing upon his breastplate the names of the children of Israel, when he goes into the sanctuary (Ex 28²⁹).

The high priest Eleazar is named in the first rank, along with Joshua, the prince of the tribes (Nu 34^{17a}, cf. Jos 14¹). At his word, spoken by means of the Urim, the whole congregation is to go out and come in (Nu 27^{20a}). After the death of the high priest the manslayer is safe to leave the city of refuge (Nu 35²⁵⁻²⁸). The duration of the high priest's office is treated in this enactment as an epoch at whose close certain questions that have remained open are to be regarded as now settled (the interpretation proposed in *Gesch.* p. 28, and approved by Van Hoonacker, *Sacerdote*, etc. p. 340, finds no justification either in the Priests' Code or in the OT generally). The high priest holds no other position of secular authority. When Moses and Aaron together number the people (Nu 1³⁻¹⁷), Aaron acts in this matter simply as the brother of Israel's leader.

Special injunctions regarding purity are laid

upon the high priest, which are stricter than those for the rest of the priests. Like the latter, they are found in the Law of Holiness. According to them, 'the priest who is greater than his brethren' may marry only a virgin of his people, and not, as is permitted to the other priests, a widow (Lv 21^{13a}). He is not to defile himself through any dead body, even that of a father or mother (v. 11). He is forbidden, as a sign of mourning, to let his hair grow long or to rend his clothes (v. 10).

If the high priest have brought guilt upon the people through any sin of his, he has to present a sin-offering, with ceremonies specially prescribed for this particular case (Lv 4^{35a}), because a sin on the part of the spiritual head of the people is looked on as bringing special trouble upon the whole community. Sins affecting the priesthood, i.e. violations of the laws given to the priests, have to be expiated by Aaron and his sons (Nu 18¹; not by the high priest alone [Benzinger, p. 422], but by him and the rest of the priests).

d. *The Levites*.—The Aaronite priests are, in the Priests' Code, a special family of the tribe of Levi. The designation 'Levites' is only in isolated instances used of all that belong to this tribe, including the Aaronites (Ex 6²⁵, Lv 25^{32a}, Nu 35^{10a}); it is usually applied to the non-Aaronite Levites alone. The whole tribe is, like the other tribes, divided into 'fathers' houses' with their heads or princes (Ex 6²⁵, Nu 34^{15a}). The tribe as a whole is considered as consecrated to God, this by way of compensation for the firstborn of man in Israel who all rightfully belonged to the Deity (Nu 34^{15a} *al.*). The Levites in the narrower sense are not, like the Aaronites, servants of Jahweh, but are given to the priests or to Jahweh for the service of the tabernacle, as is emphatically expressed in the designation of the Levites as *nēthūnim*, 'given' (Nu 3⁹ 8¹⁹ 18⁶), which clearly stands in some relation to the name applied to the foreign temple-slaves in the Bks. of Ezr and Neh, namely, *Nethinim*. In other passages, without the term *nēthūnim* being employed, it is said of the Levites that they serve the dwelling-place of Jahweh, or that they serve Aaron, or the congregation. Here, as in the case of the priestly service, the verb *shārēth* is used, but not, as in that case, absolutely, but with the object of service: the 'dwelling-place,' i.e. the tent of meeting, 'Aaron,' or 'the congregation' (Nu 1⁵⁰ 3⁶ 16⁹ 18²). The Levites minister to the priests 'before' the tent of meeting. The Levites are forbidden to approach, like the priests, the vessels in the inner sanctuary or the altar; by doing so they would bring death upon themselves and upon the priests (Nu 18^{2a}). The technical term for the service of the Levites is *shāmar*, 'guard,' which suits the Levites of the Priests' Code in so far as they, in the arrangement of the camp, have to encamp with the priests immediately around the tabernacle, so that in point of fact they do guard the latter (Nu 1^{50.33} *al.*). A 'stranger,' i.e. one who is neither priest nor Levite, who intrudes into this circle round the holy dwelling-place, shall die (Nu 3³⁹). The standing employment of the verb *shāmar* for the service of the Levites indicates clearly that the prescription for the (purely ideal) arrangement of the camp corresponds to some actual duties performed by those whom the Priests' Code calls Levites. Surely the *shāmar* of the Levites has some connexion with the work of the doorkeepers of the temple in the Bk. of Ezra. The Levites are called in the Priests' Code directly *shōmrē mishmēreth*, 'guardians' of the sanctuary or 'the dwelling-place' of Jahweh (Nu 3^{28.32} 31^{30.47}). In Nu 3³⁸ the term is extended even to the priests, with reference to the arrangement of the camp. Besides, the same verb *shāmar*

is employed in an untechnical sense, in a few isolated instances in the Priests' Code (Nu 3¹⁰ 18⁷), of the priestly service in general (so also in the post-exilic Zechariah), and then, further (so *shāmar* is used in the Priests' Code), of the service of God in general, i.e. of one's attitude towards His commandments (Gn 26⁵). All this shows that we have here to do with a very ancient terminology, which probably reaches back far beyond the time when there was a special class of doorkeepers of the temple. Perhaps it preserves a trace that the Levites were originally the 'guarding' escort of the sacred ark, which would be quite conceivable, even if the name *lēwī* has nothing to do with this duty (see above, § 1). In any case, it may be gathered from the above use of *shāmar* that the guarding of a sanctuary in some form was at one time the essential task of the Levites. It has been suggested that it was the guarding of a divine image, as was the main duty of the priest among the ancient Arabs (Wellhausen, *Reste*², p. 130). But there appears to be a special reference to the escorting of the sacred ark, which accompanied Israel in their journeyings and campaigns, in the remarkable term, likewise used very occasionally of the Levites' service, *zābā*, 'to render military service' (Nu 4²³ *al.*).

When the host of Israel is upon the march, the Levitical family of the Kohathites has charge of carrying the tabernacle and its vessels, after these have been covered by the priests from the view of the Levites, who may not look upon them (Nu 4³⁶). None but Levites may attend to the carrying and the setting-up of the tabernacle; any non-Levite doing so must be put to death (Nu 1⁵¹ 18⁴ 22). Hence the service of the Levites is spoken of as a 'covering' for the children of Israel, that no plague come upon them when they come nigh to the sanctuary (Nu 8¹⁹). Then it is the Levites who, according to Ex 38², under the direction of the Aaronite Ithamar, take charge of the 'numbering of the dwelling of the testimony', i.e. the keeping account of the gifts offered for its construction. There is no indication of any other duties performed by the Levites than those of carrying the tabernacle, encamping around the sanctuary, and keeping the account just mentioned. Wherein, apart from encamping round the sanctuary, consisted the charge assigned to the Levites over the dwelling of the testimony and all its vessels and everything belonging to it (Nu 1⁵⁰), or 'the keeping of the charge' of the dwelling of the testimony and its vessels (Nu 1⁵³ 3³ *al.*), or the 'work' of the Levites 'about the tabernacle' (Nu 4³), or their 'service' about the dwelling or the tabernacle (Nu 3⁷ 4²³ *al.*)—is not indicated. Thus we do not learn what the Levites have to do when the sanctuary is set up and the service is being conducted in it, and thus have, further, no indication of what is to be the work of the Levites once Israel has reached the goal of its wanderings and attained to a settled mode of life. It may only be supposed from the designation of the Levites' work as 'service of the congregation,' that the intention of the law was to assign to the Levites some kind of intermediate function between the congregation and the priests. The lower services at the sanctuary, once it was set up, appear also to be pointed to in Nu 1⁵⁰, where the service of the tabernacle is presented as a duty distinct from that of carrying it.

The data regarding the period of service of the Levites are not harmonious. In Nu 4³⁶ it is given as from the thirtieth to the fiftieth year; Nu 8²³⁻²⁶, on the other hand, enacts that the Levites have to serve from their twenty-fifth year, and it is added that from their fiftieth year onwards they are no longer to serve, but to assist their brethren

(the serving Levites). This enactment is clearly a later addition (*Gesch.* p. 34).

In Nu 8²⁶ a ceremony for the installation of the Levites is described: the children of Israel (no doubt the elders) lay their hands upon them as upon an offering, and the Levites are waved before Jahweh as a gift of the Israelites—a representation which manifestly results from the conception of the Levites as a substitute for the offering of the firstborn of man. They are to be treated in this ceremony—which cannot be thought of as literally performed, but simply gives expression to a theory—like those sacrificial portions which fall to the priests, because the Levites also are given to the latter to be their own (so rightly A. Van Hoonacker, *Le vœu de Jephthé*, Louvain, 1893, p. 40 ff.).

The 'tribe of Levi,' i.e. probably the Levites and also the Aaronites, is exempted from being numbered amongst the children of Israel (Nu 1⁴⁰ 2³²), i.e. from military service.

Sins affecting the sanctuary, i.e. any defilement of it, have to be expiated by the Aaronites and Aaron's father's house, the Kohathites, that branch of the Levites who have to carry the holiest vessels (Nu 18¹). The Levites, without distinction, have to expiate the sins of their service (Nu 18²³).

The distinction between priests and Levites is not represented as having gained validity without opposition. The narrative of the rebellion of the Levite Korah against Aaron and Moses (Nu 16) serves to exhibit this distinction as one divinely determined: the prerogatives of Aaron are established in opposition to Korah. In this account, however, a still older narrative, belonging to another stratum of the Priests' Code, may be disentangled, in which Korah stands up, not for the prerogatives of the Levites as against the Aaronites, but for those of the whole congregation as against the Levites. To this older stratum attaches itself the narrative of Nu 17²⁶, in which the budding of Aaron's rod confirms the unique position, not of the Aaronites, but of the whole tribe of Levi (*Gesch.* p. 34 ff.; cf. art. KORAH, DATHAN, ABIRAM).

6. *The serving women.*—Only in a single passage in the Priests' Code is there mention of serving women (Ex 38⁸). They minister at the door of the tabernacle; and this service, like that of the Levites, is described by the term *zābā*; but wherein it consisted we have not a word of information. We learn merely that these women were provided with mirrors of brass. The only other reference in the whole of the OT to such women as serving at the sanctuary is in 1 S 2²² (wanting in LXX except in A and Luc.), where they are introduced as if they had been in existence in the time of Eli at Shiloh; but as in this passage the 'tent of meeting' is spoken of, as in the Priests' Code, whereas, in other passages, at Shiloh a built temple is presupposed, we have to do, no doubt, with an interpolation based upon the Priests' Code.

7. *The revenues of the priests and Levites.*—The priests, like the Levites, have a fixed revenue assigned them in return for their services. It is presupposed in this that they are without possessions, i.e. they have not, like the other tribes, a tribal territory (Nu 18²⁰ 23¹ 26⁵²).

The priests' dues from the offerings, the *tērū-mōth*, 'heave-offerings' (Nu 18⁸ 19), are calculated on a more liberal scale than in Dt and even than in Ezk, or at all events they are specified more exactly than in the latter book, which does not name the tithe and the firstlings. The skin of the burnt-offering falls to the officiating priest (Lv 7⁹); from the *shēlāmim*-offerings he is entitled to a cake (v. 14), as well as to the wave-breast and the heave-thigh (Ex 29²⁷ *al.*); in the case of the

shēlāmīm-offering of the Nazirite he receives not only the wave-breast and heave-thigh, but also the shoulder of the ram and two cakes as a wave-offering (Nu 6^{18a}). Of the 'holy,' i.e. not 'most holy,' offerings the male and female members of the house of Aaron are to eat in a clean place the wave-breast and the heave-thigh, and in general the *tērūmōth* that fell due of these offerings (Lv 10¹⁴, Nu 18¹⁹); the priest who presents the offering may thus bring these portions into his house and there distribute them. The members of the priest's house who are entitled to participate in these meals are exactly specified; any one who by mistake and without warrant eats of the holy thing is to restore to the priest what he has taken, with a fifth part added to it (Lv 22^{10a}). Every *tērūmāh* belongs to the particular priest to whom on any occasion one hands it over, and not to the whole of the priests (Nu 5^{9a}). Of the 'most holy' offerings—the *minhāh*, the guilt-offering, and the sin-offering—nothing may be taken into the priests' houses; whatever portion of these does not find its way to the altar, or is not in certain specified instances burned (Lv 6²³), is to be eaten only by Levitically clean male Aaronites in the holy place, according to the different regulations for the respective offerings, it may be by the priest who presents the offering, it may be by all male Aaronites (Lv 2³ 5¹³ 6¹⁹ etc.). The shewbread also, as most holy, is to be eaten by male Aaronites in the holy place (Lv 24⁹).

Besides the above, the priests have firstling-dues. To them belong the firstborn of clean beasts; those of unclean beasts and of man are to be redeemed (Nu 18^{15a}). The redemption price, for arriving at which a mode of reckoning is given, probably falls, as a logical consequence, to the priests, although this is not expressly stated (*Gesch.* p. 41). In later times, at all events, it was so arranged (Schürer, p. 254). In the case of the firstborn of clean beasts, the flesh, in so far as this is not the portion of the altar, falls to the priest, and may be eaten by him and the male and female members of his household (Nu 18^{17a}). The *re'shith* that has to be offered of oil, must, and corn, as well as the first-fruits (*bikkūrim*) of everything, belong to the priests; all clean persons in the priest's house, male and female, may eat of them (Nu 18^{17a}). The question whether *re'shith* and *bikkūrim* have both to be paid from the same products of the ground may remain open (*Gesch.* p. 124 ff.; Schürer, p. 245). The two leavened firstling-loaves of the Feast of Pentecost, along with the two lambs to be added as a *shēlāmīm*-offering, are assigned to the priest (Lv 23²⁰). Further, of the devoted things that which is called *hērem* belongs to the priests (Nu 18¹⁴); likewise in the year of jubilee there falls to them the field regarded as *hērem*, which has been dedicated, not redeemed, and yet sold (Lv 27²¹). The *re'shith* of dough, which, according to Nu 15¹⁷⁻²¹, is to be paid to Jahweh, is probably to be understood as falling to the priests, although this is not expressly said. In the case of a withholding of the proper dues, restitution has to be made to the priest, with the addition of a fifth part (Lv 5¹⁶). If any one has unwittingly taken from his neighbour anything belonging to him, and if restitution to the injured party is not possible, the articles which require to be restored belong to the priest who offers the guilt-offering for the offender (Nu 5⁸).

Of sacred dues the tenth belongs to the Levites, who in turn have to pay a tenth of this to the priests (Nu 18^{21-24a}). Originally, according to Nu 18²⁰, all that was in view here was the tenth of field and vineyard produce. It appears to be a later expansion when Lv 27^{32a} demands, in addition to this, the tenth of cattle and sheep. Priests

and Levites receive a fixed percentage of the spoil taken in war (Nu 31^{28a}).

The Priests' Code enjoins, further, in what is perhaps an addition subsequent to the time of Nehemiah, a tax for the sanctuary (Ex 30^{11a}; see *Gesch.* p. 219 f.); this does not fall to the priests, but is spent on the 'service of the tent of meeting,' i.e. for the expense of the regular cultus.

The idea that the tribe of Levi has no inheritance finds strange expression in the purely theoretical and evidently late added (*Gesch.* p. 42 f.) statement (Nu 3¹¹⁻⁴⁵) that Jahweh has taken to Himself the cattle of the Levites in place of the firstborn of the cattle of the children of Israel. The matter is meant thus to be viewed as if the Levites had not an absolute property in their cattle, but only the usufruct of them. In speaking of the possession of cattle the Priests' Code is thinking of the injunction (which is not quite in harmony with the absence of possessions on the part of the tribe of Levi) that 48 cities in the Promised Land should be set apart for the tribe of Levi to dwell in, along with the surrounding pasture lands to feed their cattle (Nu 35^{1a}). These cities, with their houses and pasture lands, are an inalienable possession; whatever may have been sold of them is redeemable at any time, and, if it is not redeemed, it returns to the Levites in the year of jubilee (Lv 25^{32a}). The carrying out of this enactment about Levitical cities is recorded in a narrative in the Bk. of Joshua (ch. 21), belonging to the Priestly Writing; and here a distinction, not found in the earlier directions, is made between Levitical and priestly cities; the sons of Aaron receive 13 of the 48 cities.

§. *The date of the priestly system in the 'Priestly Writing.'*—Even apart from the older elements (P¹, see above, § 8 a) which detach themselves from the main body of the Priests' Code, the date of the priestly system exhibited by this Code is not a single one. In general the consistent character of the system (P²) is not to be denied, but certain smaller constituents detach themselves as clearly new to it (P³). But, even after the removal of these elements, everything (in P²) is not of one cast; in the view taken of the Levites, for instance, apart from an innovation (Nu 8²⁻²² [see, further, below] and vv. 23-26 [see above, § 8 d]), there is no mistaking the presence of two different strata (in Nu 16, cf. ch. 17; see, further, below).

At present it is commonly held that the whole of the priestly system of the Priests' Code, and in general this whole Code itself, belongs to the post-exilic period, and that Ezekiel's enactments regarding the priests, especially his distinction between Levites and priests, paves the way for the Priests' Code (so the adherents of the Graf hypothesis). On one point there can be no doubt, namely this, that the affinity between the law of Ezekiel and the Priests' Code is so great that it can be explained only by the dependence of one of these upon the other. For the priority of Ezekiel it is quoted as decisive that in his State of the future he knows no high priest such as stands at the head of the priestly body in the Priests' Code. Ezekiel, it is argued, does not mention the one unique function assigned to the high priest in the Priests' Code, namely the propitiatory transactions on the Day of Atonement, and it is hard to suppose him to have been acquainted with them. But the law concerning the Day of Atonement in Lv 16 bears quite a peculiar character which, e.g. in the conception of AZAZEL (which see), distinguishes it from the rest of the Priests' Code. This law has its place immediately before the Law of Holiness (Lv 17-26), which, as it appears to the present writer necessary to assume, was incorporated in the system of the Priests' Code, not by the real

author of P^a but by a later redactor; probably the section contained in Lv 16 was also a later addition (*Gesch.* p. 128 f.), and so were also, in that case, as a matter of course, the merely brief allusions to the Day of Atonement which are found elsewhere in the Priests' Code. Ezekiel has no Day of Atonement, but merely certain propitiatory transactions on two days every year, which look like a first step towards the Day of Atonement. There is no period at which the law of the Day of Atonement, of which there is not a trace in the pre-exilic history, can be more readily conceived to have originated than during the great chastening of the Exile, or even it may be shortly thereafter. Zec 3^a appears to contain the earliest allusion to the Day of Atonement. If the function assigned by the Priests' Code to the high priest on the Day of Atonement is a later insertion, the original high priest of this Code has no station left to him but that of *primus inter pares*. Even the distinctive dress he wears appears to mean nothing more (see below). A chief priest, however, was, beyond all doubt, found at Jerusalem prior to Ezekiel (see above, § 3). As to the further argument in favour of the priority of Ezekiel's system to that of the Priests' Code, namely that Ezekiel was the first to introduce the distinction between priests and Levites, this rests upon an interpretation, which *per se* is a possible one, but which is not to be deduced unconditionally from the language of Ezekiel. It is true that Ezekiel gave a new arrangement to the station of those Levites who had formerly been priests at the high places, but his language by no means excludes or even renders improbable the supposition that in the pre-exilic temple there were other Levites besides these, or that there were, besides the foreign temple-slaves, other temple-servants not called Levites, or priests of the second rank side by side with the priests proper, i.e. the Zadokites (see above, § 6). We will seek to show further, below, that Ezekiel's designating of the priests as 'Zadokites,' in contrast to their being called in the Priests' Code 'Aaronites,' is by no means an evidence of Ezekiel's priority.

On two points, it is true, the Priests' Code contains regulations affecting the priests which cannot be separated from its system (P^a), and which yet undoubtedly go beyond what is found in Ezekiel. In the Priests' Code the tenth falls to the Levites and the tenth of the tenth to the priests, to whom belong also the firstborn of clean beasts. Ezekiel says nothing about either of these things. But in the Deuteronomic regulations it is clear that neither the tenth nor the firstborn are considered as belonging to the Levites or priests (cf., further, below).

Other differences between the law of Ezekiel and that of the Priests' Code appear to the present writer to speak necessarily in favour of the priority of the Priests' Code, or at least of the system represented by it. In this Code the killing, flaying, and cutting up of the sacrificial animal has to be done by the layman presenting the offering (Lv 1st, 11th, etc.; see *Gesch.* p. 114); in Ezekiel the Levites have to perform the killing. There can be no doubt that in this instance the Priests' Code represents the earlier custom, which was based upon the view that by slaying his sacrifice the offerer himself presents his gift to the deity, and thereby expresses the fact that it is meant for him. In Ezekiel, on the other hand, this action is undertaken by the Levites as a class intermediate between laity and priests, in order to remove the layman a stage further from sacred functions. Vogelstein (p. 67), indeed, reverses the chronological order, and holds that the flow of an anti-Levite current has withdrawn from the Levites the slaying of the sacrificial

victims; but surely the slaughter by the hand of the sacrificing layman is a relic of primitive times when every Israelite was entitled to offer sacrifice. Besides, by setting down the killing of the animal by the lay offerer as a later custom, a very improbable course would be given to the development of the practice in this matter (as it cannot be imagined that the regulations of the Priests' Code we are considering are due to a later alteration of the text); that is to say, the Chronicler, who makes the Levites take part in the slaying of the victims (see below, § 9), would, on this view, have taken a step backwards from the Priests' Code in the direction of Ezekiel. The practice of later times in regard to the temple service appears, indeed, to have excluded both laymen and Levites from the slaying of the sacrificial animals, and to have reserved this for the priests alone (Büchler, *Priester*, 136 ff.); it is probably a matter of pure theory when the Talmud, in agreement with the Priests' Code (Vogelstein, p. 68, note 1), represents laymen as performing the act of slaughter. Amongst the ordinances of Ezekiel which go beyond the Priests' Code in the sense of keeping the laity at a distance, besides the one we have considered, there are the enactments that the priests are not to come out amongst the people with their holy garments or with the sacrificial portions, lest the people be hallowed thereby—regulations which are wanting in the Priests' Code. We find expressed here a materialistic conception of holiness as if it were something that could be transferred by external contact. The same conception shows itself in the Priests' Code only, on what is not an impossible explanation, in the case of the sin-offering (whoever touches the flesh of this offering 'becomes holy' [?], Lv 6th [Eng. 27]), and the 'most holy' offerings in general (Lv 6th [Eng. 15]; cf. Ex 29th 30th). But in these passages the thought of 'becoming holy' (*Heiligwerden*) by touching can hardly be really present, rather would it appear that it is 'being holy' (*Heiligsein*), i.e. 'being a priest,' that is specified as the condition of touching (see Baudissin, *Studien zur semit. Religionsgeschichte*, ii., Leipzig, 1878, p. 54 f. note). The post-exilic Haggai (2nd) denies that contact with the skirt of a garment in which one carries holy flesh makes holy; but he does not deny that direct contact with sacrificial flesh has this effect. In this way he does not, as Kuenen (*ThT*, 1890, p. 17) supposes, contradict Ezekiel; and, therefore, we may not infer from Haggai's language that Ezekiel's view was an older one, which was abandoned in the post-exilic period (and so also in the Priests' Code, on the assumption of its post-exilic composition).

It is alleged that Ezekiel was not acquainted with Lv 21st, where, perhaps, the priest is forbidden (although this is extremely questionable) to defile himself for a dead wife. But this does not follow (Nowack, p. 115, note 1) from the fact that in Ezk 24th mourning on the part of the priest for his wife is assumed as a matter of course, for it is not mourning in general that is forbidden in Lv 21st, but only certain specified mourning customs, besides the defilement by the corpse (v. 5; cf. Ezk 44th; cf. Joh. Frey, *Tod, Seelenglaube und Seelenkult im alten Israel*, Leipzig, 1898, p. 74 f.).

Ezekiel's arrangements about the Levitical and priestly land are much more practical than in the Priests' Code. In Ezekiel's State of the future, priests and Levites live in the immediate neighbourhood of the temple where they have to serve; according to the Priests' Code they are distributed among different cities throughout the land, where they have nothing to do. It is hardly conceivable that the author of the Priests' Code should have so changed for the worse the arrangements of Ezekiel, if these were the earlier. Rather does the Priests'

Code in this instance still adhere more than Ezekiel to the conditions which really existed in the pre-exilic period. Amongst the priestly cities named in Jos 21 (P), is Anathoth, which we know from Jeremiah as a city where priests lived. Among the Levitical cities are, further, included the six Cities of Refuge. The latter were old sanctuaries to whose altar the manslayer fled. Besides, in the case of four of these Cities of Refuge which are named in Jos 21^{13a}, it may be shown either from history or from the names themselves that they were places of worship (Hebron, Shechem, Kadesh, Ramoth [probably identical with Mizpah of Hos 5¹]).

If the system represented by the Priests' Code is prior to Ezekiel, then the silence of the latter about the tenth and the firstborn as priestly dues, can be explained only by assuming that these particular ordinances had not obtained practical recognition before Ezekiel's time, and that he purposely passes them over, presumably because he had doubts as to the possibility of carrying them out. He is silent also as to the tithe-meals of Dt, and the sacrificial meals which, according to Dt, are to be held with the firstborn of cattle and sheep. He must have been acquainted with both these regulations, and has thus not sought to interfere with the treatment of the tenth and the firstborn. The old view, as represented in the Jehovistic book (Gn 28²²), is that the tenth is to be given to the Deity. The same demand is expressly made by the Book of the Covenant (Ex 22²⁹) in the case of the firstborn of cattle and sheep. The arrangement in the Priests' Code, in so far as it assigns tithes and firstborn to the servants of the Deity, comes nearer to this view than the common meals of Dt (see Dillmann on Lv 27³²). The term 'tenth' can originally have been applied only to an impost, and not to the material for a sacrificial meal (so also Van Hoonacker, *Sacerdoce*, etc. p. 393). Only in this particular is something secondary to be recognized in the Priests' Code, namely that it assigns the tenth—differently with the firstborn—not, or at least only indirectly, to the proper servants of the Deity, namely the priests, but in the first instance to the servants of the sanctuary, the Levites.

That the priestly legislation of the Priests' Code (P²) is to be placed prior to Ezekiel, appears to the present writer to result also from the circumstance that it shows no regard to the special conditions of the *personnel* of the sanctuary at the Return from the Exile. In the early days of the Jewish colony, at all events at the time of Ezra, if not earlier, we find, alongside of the priests, these classes—Levites, singers, and doorkeepers (both these originally distinct from the Levites), and Nethinim; the Priests' Code, on the other hand, knows only the two classes—priests and Levites. The Levites, called in the Priests' Code *nēthānim*, are evidently intended to replace the foreign Nethinim who are no less disapproved of in the Priests' Code indirectly than they are in the direct polemic of Ezekiel. It may be seen from the narrative portions of the Bk. of Joshua which belong to the Priestly Writing, that the latter does not, indeed, mean to set aside the Nethinim entirely; for in Jos 9²¹, which evidently belongs to this source, it is said that the inhabitants of Gibeon and the neighbouring cities were set aside by the princes of Israel to be hewers of wood and drawers of water 'for the congregation.' These serfs are thus looked upon here, not as servants of the temple or the priests, but as servants of the congregation, i.e. the laity. As far as the temple service is concerned, their place is to be taken by the Levites. But the latter have in this matter, as it would appear, to discharge the functions, not so much of

the Nethinim as of the post-exilic doorkeepers, for they are called 'keepers.'—It is difficult to suppose that a legislator, who was face to face with the complicated relations of the temple *personnel* in post-exilic times, should have imagined that he could come to an adjustment with them by simply throwing all non-priestly temple-servants, without any further argument or justification, into a single class.

In particular, upon any theory which makes the Priests' Code exilic or post-exilic, we miss in it that regard we should expect to the former priests of the high places, who, since the centralization of the cultus under Josiah, gave rise to difficulties. Josiah sought to exclude them from the Jerusalem cultus, but evidently was unable to set aside their pretensions to a share in the priestly service in the temple; for Ezekiel considered it necessary to announce to them in unambiguous terms that it was God's decree that they should be removed from the priesthood. In Ezra's time only a few of the descendants of the old priests of the high places, those who, in Ezekiel's terminology, are called 'Levites,' had accommodated themselves to the position assigned to them. It is true that the Priests' Code contains a clear trace of a conflict between the Levites and the priests, in the narrative of the rebellion of the Levite Korah against Moses and Aaron. But that the conflict here spoken of has regard to the claims of the deposed priests of the high places is not to be gathered. On the contrary, Korah cannot be the representative of these whilom *bāmōth* priests, for in the post-exilic period the Korahites belong to the singers or to the doorkeepers (1 Ch 6²² 9¹⁹ *al.*), and hence not to the Levites in the sense of that term as used by Ezekiel, and in the Memoirs of Ezra and Nehemiah, whose use of the term is fashioned upon Ezekiel's model. Instead of a conflict between former priests of the high places and the old Jerusalem priests, one might see in the narrative about Korah the description of a conflict in the time after Ezra, when the singers were reckoned to the Levites. This is the view of Vogelstein (p. 45 ff.), who, upon the ground of very precarious combinations, places an attempt of these later Levites to seize the right of offering incense, in the time of the high priest Johanan I. (the son of Joiada) and the Persian satrap Bagoses, who probably belong to the reign of Artaxerxes II. (B.C. 404-359). But the narrative of Korah's rebellion, i.e. the later account of the Priests' Code about this rebellion (see above, §8 *end.*, and cf., further, below), can scarcely be separated from the Priests' Code of Ezra (P²) and assigned to a later innovation (P³); for then the law of Ezra would merely have contained a narrative giving expression to the priestly prerogatives of the whole tribe of Levi as against the rest of the congregation. But this is not to be supposed, seeing that the Priests' Code (P²) everywhere insists most distinctly on the priestly rights of the Aaronites alone. This it does, in the opinion of the present writer, not in opposition to claims of non-Jerusalemite priests, which do not come into view with P² at all, but rather—and so also in the story of Korah—in opposition to pretensions put forward by the *personnel* at the Jerusalem temple who were not counted as belonging to the (Zadokite) priestly family.

The duties of the Levites of the Priests' Code and their relations to priests and people are so vaguely defined as to give rise to the impression that these 'Levites,' as servants of the priests, are simply an innovation of the legislator, not corresponding at all to the actually existing relations. In other words, the legislator appears to have written at a time when, in addition to a special priestly family, namely the Aaronites of the

Priests' Code, there was not a class, who from their descent might be called Levites, serving as lower officials at the sanctuary; and the employment of Levites for this office appears to be a matter of pure theory on the part of the legislator, whose system elsewhere also is based in large measure upon ideal construction. He appears to substitute the name 'Levites' for the lower grade of sanctuary servants, singers, and doorkeepers. In the priestly system of the Priests' Code, so far as this has a real basis, the only parties in view would, in this way, be the *personnel* of the old Jerusalem temple—a circumstance most easily capable of explanation if this system took its rise at a time when one had no motive for taking into consideration the non-Jerusalemite priests or their descendants.

The Priests' Code is acquainted, on the other hand, with a class amongst the *personnel* of the sanctuary with which we meet nowhere in the post-exilic period, namely the *serving women* (see above, § 8 a). These may be connected with the consecrated women, the *kēdeshōth* of the ancient Canaanite sanctuaries, who in certain pre-exilic periods were found even in the Jerusalem temple (*Gesch.* pp. 36 f., 179 f.; cf. Ismar J. Peritz, 'Woman in the ancient Hebrew Cult,' in *JBL*, 1898, pt. ii. p. 145 ff.), although a legislator of the Jahweh religion could not think of women at the sanctuary serving the purpose of the Canaanite *hierodouloi*, but only as employed in cleaning and such like. A later age did away with these serving women entirely, as tending to recall the *hierodouloi*, and as furnishing occasion for moral abuses.

The designation chosen for priests in the Priests' Code, namely 'Aaronites,' appears to the present writer to point to the time before Josiah's reform, or at least before Ezekiel. Its result was that a priestly family returned with Ezra, which traced its descent, not, like the Zadokites, to the family of Phinehas or Eleazar, but to that of Ithamar (Ezr 8² M), and thus did not belong to the old Jerusalem priesthood. The real existence of such non-Zadokite 'Aaronites' is also probable from other indications. As we found occasion to conclude (see above, § 3, cf. § 2) from the history of Eli's descendant Ebiathar, who was banished to Anathoth, and of the priests at Anathoth in Jeremiah's time, who probably traced back their descent to Ebiathar, the priesthood of Anathoth, in distinction from the house of Zadok, held itself to be derived from the ancient priestly family at the time of the Exodus, and perhaps from Aaron. Consequently, the enactment of the Priests' Code, that the sons of Aaron are all entitled to exercise the priestly office, was not, when the new community was set up, fitted to serve the special interest of the Zadokites, for it required these to treat even those priests who did not belong to their family as equally entitled to sacred functions with themselves. Now there can be no doubt that the author of the priestly legislation of the Priests' Code (P²) belonged to the priesthood of Jerusalem, for otherwise he could not be so familiar as he is with the ritual of the one legal place of worship, the tabernacle, i.e. the antedated single temple. But it is extremely improbable that a Zadokite of the period after Ezekiel should, in divergence from this prophet, have conceded to non-Zadokite priests equal rights with the Zadokites. The substitution of the ancient Aaron for the relatively modern Zadok cannot be a mere play with names on the part of an exilic or post-exilic legislator, for, as Ezr 8² shows, there were actually non-Zadokite 'Aaronites.' While the adherents of the Graf hypothesis had hitherto for the most part seen in the term 'Aaronites' simply an archaism for 'Zadokites,' Kuenen (*ThT*, 1890,

p. 28 ff.), latterly agreeing with Oort, the present writer, and Vogelstein, came to the conclusion we have reached. The connotation of the term 'Aaronites' is—and this not merely in theory, but as applied in practice—even in the post-exilic period wider than that of 'Zadokites.' Kuenen, accordingly, following Oort and Vogelstein, held that a compromise took place between the Zadokites after Ezekiel's time and non-Zadokite priestly families, and that to this compromise the enactments of the Priests' Code owed their origin (so also Schürer, p. 239, note 49; cf., for the same explanation, as the first after Oort [1884], Stade, *GVI* ii., Berlin, 1888, p. 104). But it is not at all likely that on the one hand Ezekiel's distinction between non-Zadokite Levites and Zadokites should have gained acceptance, as it undoubtedly did, to such an extent that a new class, 'the Levites,' was formed out of the former priests of the high places; but that, on the other hand, this same distinction found so little acceptance that, in direct opposition to it, new regulations were introduced, by which non-Zadokites had to be admitted into the number of the priests. About the year 572 Ezekiel had made the first attempt to have all non-Zadokite Levites declared to be sanctuary servants. A movement of non-Zadokite priestly families must, as Oort and his followers think, have formed itself in opposition to this ordinance, and must have been not without effect, so that, when Ezra returned in the year 458, Ezekiel's limitation of the priesthood was already forgotten so far that a non-Zadokite family of priests joined Ezra, and no opposition was offered to the recognition of their priestly rights. Of a decisive contest of the non-Zadokite priestly families with the Zadokites in this matter, tradition shows no trace, and the development subsequently to Ezekiel's time is much more easily explained if the rule entitling all Aaronites to the priesthood was an older one, with which an adjustment had to be made. With what right the house of Ithamar, which does not appear in the history prior to Ezr 8² (M), was traced back to Aaron, as is done in the Priests' Code, it is impossible to say (cf. Nowack, p. 105, note 2). But it is not likely that the connexion of Ithamar with Aaron was first put forward after the Ithamarites under Ezra had gained entrance to the priesthood, for in that case it would not be intelligible by what other title this entrance could have been gained by the Ithamarites in opposition to the Zadokites and to the statutes of Ezekiel. Seeing that the family of Eli in any case was, even in pre-exilic times (in view of 1 S 2³⁶, and probably also 1 K 2²⁷, the oracle of 1 S 2^{27a} cannot be exilic or post-exilic), traced back (1 S 2^{27a}) to the priest of the Exodus (who is not, indeed, named), the assumption is, to say the least, not improbable that even in pre-exilic times there were non-Zadokite priests who traced their descent to Aaron as the priest of the Exodus. The very same conclusion results from the account in the Jehovistic book of Aaron's part in the worship of the golden calf, for he is thus presented as the type, nay probably also as the ancestor, of the priests of the Northern kingdom. If from pre-exilic times there were 'Aaronites' who did not belong to the house of Zadok, the fact that the name 'Aaron' or 'sons of Aaron' is employed by a legislator belonging to the priesthood of the only legitimate sanctuary, the temple of Jerusalem, for this very priesthood, appears to the present writer to be intelligible only at a time when the participation of non-Jerusalemite 'Aaronites' in the temple cultus did not form the subject of question, because at that time they did not desire such participation, i.e. at a time when, besides the temple at Jerusalem, there were other sanctuaries at which they could dis-

charge priestly service—in other words, before Josiah's reform.

The Priests' Code appears to the present writer to betray quite clearly the circumstance that, at the time when it was written, all Aaronites did not *de facto* enjoy priestly rights, but only that branch to which (so Ezr 7^{12c}) the Zadokites were reckoned, namely the branch of Phinehas (cf. Ezr 8² M). In Nu 25^{12c} it is only to Phinehas, of all the Aaronites, that an everlasting priesthood is promised. And yet Ezra had to admit priests who were not reckoned to the house of Phinehas. This appears to us to be explicable only on the supposition that that saying about the everlasting priesthood of Phinehas alone belongs to a different age from that of Ezra. This cannot be the age after Ezra, for the non-Zadokite Ithamarites who under him were admitted to the priesthood at Jerusalem were not afterwards removed from this office (*Gesch.* p. 139). No doubt the Zadokites, as is shown by the term *Sadducees* derived from their family name, formed still later a special priestly aristocracy; but this does not authorize our taking, with Kuenen (*ThT*, 1890, p. 37), the promise of an everlasting priesthood to Phinehas alone, as a later interpolation, for the everlasting priesthood was from the time of Ezra not an exclusive characteristic of Phinehas, i.e. of the Zadokites.

In the narrative of the Priests' Code regarding the destruction of two of Aaron's sons, Nadab and Abihu, without issue (Lv 10¹⁻⁷, Nu 3⁴ 26⁶¹, cf. Lv 16¹), we should apparently find either a reminiscence of priestly families that actually died out (so, fancifully, Ad. Moses, *Nadab und Abihu oder der Untergang der Sauliden und des grössten Theils des Stammes Benjamin*, Berlin, 1890: Nadab = Abinadab, 1 S 7¹; Abihu = Abiel, 1 S 9¹), or even a polemic against the claim of certain families to belong to 'Aaron.' If the latter is the case, the genuineness of the genealogy of these families, which went back to Nadab and Abihu, would be denied, since these sons of Aaron perished without leaving any issue behind them. It is impossible to find in the narrative of their fate any indication of conditions pointing to a particular period of time, unless we are to hold, with Oort (p. 331), that the 'strange fire' which Nadab and Abihu brought 'before Jahweh' has reference to their participation in *bāmōth* worship. The effect of this would be that in this narrative the Aaronite families Nadab and Abihu would stand for the non-Jerusalemite priests (as 'Aaron' stands elsewhere for the priests of the bull-worship) who were displaced by Aaron's son Eleazar, whom the Zadokites regarded as their ancestor. Such an interpretation, however, is not very probable, for the 'strange fire' is at least offered to Jahweh, which appears to presuppose that it is offered at the legal sanctuary and not in the high places (see, further, art. NADAB).

The designation of the priests as 'Aaronites' does not belong to the oldest strata of the Priests' Code, even apart from the Law of Holiness and the *tôrōth* akin to it. In a version of the story of Korah which has been worked over, and which does not belong to the Jehovistic book but to the Priests' Code, Korah is regarded as the champion of the congregation against Moses and Aaron (Nu 16³), i.e. the Levites. Here the Levites as a body are thought of as priests, just as in the narrative of the rod that blossomed (Nu 17^{16a}) Aaron is the representative of the tribe of Levi, which in its totality is thought of as invested with priestly prerogatives. In opposition to this older conception of the Levites as priests, the main body (P²) of the Priests' Code seeks to establish the exclusive right of the Aaronites, i.e., in the view of the legislator, the Jerusalem priesthood.

A different procedure, again, is followed by a recent addition to the legislation, which seeks to present the Levites as more like the priests. We refer to what evidently was never carried into actual practice, the consecration of the Levites (Nu 8^{6c}), which is intended to be an analogue to the consecration of the priests. This representation, which shows a higher estimate of the Levites, will belong to the exilic or post-exilic period (P³), when by 'Levites' were understood the families of the former priests of the high places, and it was desired to give to these a priest-like rank corresponding to their pretensions.

Among the later elements of the Priests' Code would have to be reckoned also the description of the vestments of the high priest, if we are to see in the latter an investiture with the insignia of royalty, of which, of course, there could be no word before the post-monarchical period, when the high priest was the only visible head of Israel. But the purple in the high priest's robe can hardly be the symbol of royalty; the principal colour of the high priest's garments is not red but blue-purple. The diadem, to be sure, is a sign of princely rank, but 'holy princes' (*sārīm*) appear already in the exilic Isaiah (43²⁸), surely not as a new creation of the Exile. The chief priest of royal Tyre assumed a very high dignity as 'next after the king' (Movers, *Die Phönizier*, II. i. 1849, p. 542 ff.). The circumstance that the high priest of the Priests' Code bears, as the most important item in his attire, the Urim and Thummim, is not favourable to an exilic or post-exilic date for the composition of the passage embodying this view, for the post-exilic period had no Urim and Thummim (Neh 7⁶⁵). The priests in old Israel were in possession of them prior to the overthrow of the Northern kingdom (Dt 33⁹). Perhaps these insignia, and probably also the sacred ark, were lost when the temple was destroyed by Nebuchadnezzar. That the author of the Priests' Code had before his mind's eye the post-exilic high priest as also the secular head of the community, does not follow from Nu 27²¹ (Benzinger, p. 423), where it is said that Joshua and all the children of Israel and the whole congregation are 'to go out and come in at the word of Eleazar.' Eleazar gives this direction on the ground of the Urim and Thummim, that is, God issues His commands through him. No other means of ascertaining the will of God was open to the congregation after the death of Moses; there is no thought here of a ruling position occupied by the high priest himself, least of all of the position of the post-exilic high priest who had not the Urim and Thummim at all. The circumstance that in Nu 34¹⁷ and Jos 14¹ the priest Eleazar is mentioned first, before Joshua, among the heads of the people, is due to the fact that Eleazar, as Aaron's son, stands in a closer relation to Moses, the former leader of the people, than does Moses' servant Joshua or any of the other then princes of the people (on the relation between the high priest in P and in the post-exilic period, cf. Van Hoonacker, *Sacerdotee*, etc. p. 324 ff.).

It is scarcely possible to arrive at a definite date for the various strata of the priestly system in the Priests' Code, and thus for the Priests' Code as a whole. The probable conclusion from the preceding considerations, if these are justified,—differing from what is reached on the view of the case adopted by the majority of modern critics,—would be that the main stock of the Priests' Code (P²) is prior to Ezekiel, and, in that case, belongs probably even to the period preceding Josiah's reform of the cultus. The programme of Ezekiel, which in one way or other is of decisive importance for the dating of the Priests' Code, appears to the present writer to be intelligible,

if the prophet considers an older cultus-legislation to have been abolished with the overthrow of the ancient temple, and if he substitutes a new system for use in his new temple. But it appears difficult to comprehend how a legislator posterior to Ezekiel should have displaced the law of the prophet written down for the new Israel by a legislative scheme of his own. On the other hand, again, it is readily intelligible that through the impulse of the law of Ezekiel, and owing to the new conditions and the new conceptions that grew up during the Exile, expansions and modifications should have been made by exilic priests upon an ancient law, in order to fit it for application to the new community. The form of the Bk. of Ezekiel, apparently intermediate between Deuteronomy and the Priests' Code, is more simply explained if Ezekiel is dependent, not only, as he clearly is, upon Deuteronomy and Jeremiah, but also upon an older code emanating from the Jerusalem priesthood, than if he makes an original start in dealing with the cultus. The same remark applies to his language, which on the one hand recalls Deuteronomy and Jeremiah, and on the other hand the Priests' Code.

The different views held as to the date of the system of the Priests' Code do not affect essentially the actual history of the priesthood itself except on a few points, as, for instance, in the view which is to be taken of the position of the chief priest prior to the time of Ezekiel, if the Code is to be placed thus early. This is owing to the fact that the organization of the priesthood in the Priests' Code is of a theoretical character, for as a whole it does not fit the real conditions of any period whatever. Of much more importance is the question of the date of the Priests' Code for the history of sacrifice.

But, whatever date may be fixed for the redaction of the system of this legislation, it will not be possible to avoid the conclusion that the whole body of ritual set up in it could not have taken its rise in its special form—i.e. in its deviation from Dt and Ezk—during the relatively short period between Ezekiel (B.C. 572) and Ezra (B.C. 458), namely some 110 years, but that it represents a long development of cultus-practice as well as cultus-language. The beginnings of this development go back in any case to the pre-exilic period, and are not unintelligible there, when we consider, what to the mind of the present writer is clear, that the Deuteronomic law did not emanate from the priesthood at Jerusalem, in which case no specimen of the cultus-language and cultus-practice of this priesthood prior to Ezekiel has been preserved outside the Priests' Code, and when we note, further, that Jeremiah (8⁹) is acquainted with a literary activity exercised in the way of giving form to the *tôrâh*, an activity of which he disapproves, and which therefore cannot be taken to refer to the codifying of the Deuteronomic law, with which the prophet undeniably sympathized. What incurs his disapproval can scarcely be anything else than the resolving of God's will, which he interprets ethically (7²¹), into ritual demands. Here, then, in Jeremiah we find pretty clear traces of a priestly literary activity answering to the rise of the Priests' Code. These literary productions, however, as may be gathered from the same reference in Jeremiah, have not yet gained the position of a generally accepted ceremonial law. Even the Deuteronomic law betrays no acquaintance with this last, but knows only of some particular *tôrâh* for the priests (Dt 24⁹), which may afterwards have been taken over by the Priests' Code (see above, § 8 a). On the other hand, a point which cannot be more fully discussed here, the redaction of the Deuteronomic law and the position it assigns to

this as a farewell address of Moses, presupposes an acquaintance with the Priests' Code, and an acceptance of it as the law proper, of which Dt is meant to appear as a recapitulation. The redaction of Dt is, in view of its relations to the Deuteronomic law, not to be placed at a very great distance from the latter; it cannot belong to so late a period as the rise of the new post-exilic community.

If the system of the Priestly Writing is earlier than the Exile, and thus probably prior to Josiah's reform, it can have originated at such a time purely as an ideal picture sketched by a Jerusalem priest, and not, or at least only very partially, as a description of the actually existing state of things. At whatever time the Priests' Code was written, the first unmistakable trace which at the same time is capable of being dated with certainty, of the influence of the system embodied in it, is to be found in the place given to the high priest in Zechariah, and the first evidence of its close is found in the reading aloud of the law in the time of Ezra.

9. THE PRIESTHOOD FROM EZRA TO THE CHRONICLER.—After the Pentateuch had, under Ezra, obtained recognition as the lawbook, we find, as could not but have been expected, that the relations of the sanctuary servants were moulded according to the finished system set forth in the Priests' Code. The Deuteronomic views of these relations, not being rounded off into one well-compacted whole, must give place to this system.

Thus, with the author of the chronicle written between B.C. 300 and 200, i.e. in the Books of Chronicles and in the redaction by his hand of the Books of Ezra and Nehemiah, we find the relations of the *personnel* of the sanctuary, as these had existed in the time of Ezra and Nehemiah, modified in various points, in order to bring them more into harmony with the requirements of the Priests' Code. The Chronicler transfers the relations existing in his own time without distinction to earlier times, as if everything had been in force in the same way from the time of David downwards. It is possible, indeed, that his descriptions do not in every single point correspond to the actual conditions of his own day. It cannot, however, be inferred from this, with Van Hoonacker, that the Chronicler portrays the pre-exilic conditions as these really existed, for this conclusion is opposed by all that we know from earlier writings. The Chronicler may be assumed to have used for the pre-exilic history, at least indirectly if not directly, ancient sources that have not come down to us, but for his account of the condition of the priesthood prior to the Exile he certainly had no such sources at his disposal. Wherever this account exhibits a deviation from the conditions after the Exile, the Chronicler evidently puts forward, as a rule, not something corresponding to any actual state of things, but only what appeared to him desirable. His descriptions tend to glorify the Levites, to whom he everywhere shows regard even more than to the priests. Probably he was himself a Levite, and, in view of his special interest in the temple singers, he may have belonged to this group of the Levites.

The Chronicler is acquainted with 24 divisions or families of priests, which, after his manner, he carries back to the time of David (1 Ch 24^{7a}). Since in the list of these divisions, as it lies before us, the first place is occupied by the family of Joiarib, from which the Hasmonæans sprang, it may perhaps be inferred that this list was first drawn up in the Hasmonæan period (Schürer, p. 237, note 44). These 24 priestly families are referred to, in some instances clearly, in others at least to all appearance, by the

terms *mahlēkōth*, 'divisions' (1 Ch 24¹ 28^{12, 21}, 2 Ch 8¹⁴ [23⁸ ?] 31^{2, 18}); *bēth 'ābōth*, 'fathers' houses' (1 Ch 24⁴ *al.*); and *mishmārōth*, 'watches' (2 Ch 31¹⁶), this last occurring already in Nehemiah (13³⁰ M). According to the Rabbinic tradition, the 24 classes, with which Josephus (*Ant.* VII. xiv. 7; *Vita*, 1) is acquainted as still existing in his time, are held to have been in existence from the time of the Exile (Schürer, p. 232 f.). This cannot be quite correct. The list in Neh 7^{30ff.} names only four priestly families (cf. Ezr 10¹⁸⁻²²), and two returned with Ezra (Ezr 8² M). But Neh 12¹⁻⁷ mentions, for the time of Zerubbabel and Joshua, 22 divisions of priests, and the same, with one omission, are given in Neh 12¹²⁻²¹ for the time of Joiakim the son of Joshua. Neh 10²⁻⁹, on the other hand, names 21 divisions, in which, indeed, the names show changes (cf. Ed. Meyer, p. 168 ff.). Those four families in Neh 7 should therefore probably be thought of as falling into subdivisions. The two groups that returned with Ezra do not necessarily represent other two families besides those four; they are representatives of the two great branches into which, according to the Priests' Code, the whole body of priests falls, namely Phinehas (or Eleazar) and Ithamar, i.e. Zadokites and non-Zadokites. The heads of the 21 to 24 divisions are spoken of as *rā'shim* of fathers' houses (Neh 12¹², 1 Ch 24⁴ *al.*), with whom we should probably identify the priest-princes (*sārīm*) of Ezr 8²⁴, 29 M, 10⁵, 2 Ch 36¹⁴.

The Chronicler divides the singers likewise into 24 classes (1 Ch 25), and appears to have designed to give in like manner, for the Levites in general, a list of 24 classes, which has certainly not reached us in a correct form in the present text of 1 Ch 23⁶⁻²⁴. Since the division of the Levites into 24 classes is witnessed to in the period posterior to the OT (*Jos. Ant.* VII. xiv. 7; cf. Schürer, p. 242, and, on the other side, Van Hoonacker, *Sacerdote*, etc. p. 41 ff.), these statements of the Chronicler are probably due to the circumstance that with him the classes of singers and Levites are practically identical (see below, § 10). Divisions of the Levites, without specification of the number of these, are presupposed by the Chronicler in various ways (*mahlēkōth*, 1 Ch 28^{12, 21} *al.*; *mishmārōth* of the Levites [singers] and *mahlēkōth* of the doorkeepers, 2 Ch 8¹⁴; [*bēth*] *'ābōth* of the Levites, 1 Ch 9³⁴ *al.*), and even Nehemiah (13³⁰ M) speaks of *mishmārōth* of the Levites. The heads of the divisions of the Levites, like those of the priests, are called by the Chronicler *sārīm* (Ezr 10⁵, 1 Ch 15⁴⁸ *al.*) or *rā'shim* (Neh 12²¹, 1 Ch 9³⁴ [of the singers and doorkeepers, vv. 14-22] *al.*). In the Priests' Code *nāsī'* is the designation of the heads of the Levitical fathers' houses (Nu 3^{22ff.}), along with which we find *rā'shim* used of the heads of the whole tribe of Levi (Ex 6²⁰).

In the position of the high priest no essential change can be traced since the time of Ezra. The very first of the post-exilic high priests assumed the place claimed for him in the Priests' Code. Nehemiah (31²⁰ M, 13²⁸ M) and the Chronicler give to the high priest the title of *ha-kōhēn ha-gādōl* (2 Ch 34⁹), the Chronicler has also the older title [*ha-*] *kōhēn ha-rō'sh* (Ezr 7⁵, 2 Ch 19¹¹ *al.*). In addition, the Chronicler employs the designation, not found in the Pentateuch, 'prince (*nāgīd*) of the house of God' (1 Ch 9¹¹ *al.*; cf. 'prince of Aaron,' 1 Ch 27^{16f.}), which marks the later time when the high priest was at the same time the head of the political community. Usually, however, the Chronicler (1 Ch 16³⁹), as well as Nehemiah (Neh 13⁴ M), calls the high priest simply 'the priest,' as is likewise done frequently in the Priests' Code.

By the Chronicler, as in the Priests' Code, the priests recognized are the Aaronites, including both the Eleazarites and the Ithamarites (1 Ch 24^{3ff.} *al.*). The equalizing of the latter with the Zadokites (i.e. Eleazarites), which as a necessary concession to the system of the Priests' Code appears to have been first recognized under Ezra (Ezr 8² M), has thus become permanent.

A difference, as compared with the conditions in the time of Ezra, reveals itself with the Chronicler only in regard to the inferior *personnel* of the temple, and in some points concerning the relation of this to the priests. A distinction between Levites on the one hand and **singers and doorkeepers** on the other, such as we noted (see above, § 7) in the time of Ezra, is no longer made. The written source in which the Chronicler would appear to have found at the same time the Memoirs of Ezra and those of Nehemiah, appears to have still made this distinction, seeing that even outside the Memoir passages in the Bks. of Ezr and Neh the singers are only very occasionally, and the doorkeepers not at all, reckoned to one comprehensive class, the Levites (*Gesch.* p. 143 f.). On the other hand, for the Chronicler singers and doorkeepers are subdivisions of the one class, the Levites (1 Ch 16^{6ff.} [note v. 32] 9³⁶ *al.*, see *Gesch.* p. 151 ff.). C. C. Torrey (*The Composition and Historical Value of Ezra-Nehemiah*, Giessen, 1896, p. 22 f.) is decidedly wrong when he denies the existence of a difference in this respect between the Chronicler and the older portions of the Bks. of Ezra and Nehemiah (see above, § 7). Still less, in view of the material evidence that exists, can it be held, with Köberle and Van Hoonacker (*Sacerdote*, etc. p. 49, cf. 70), that the reckoning of the singers and doorkeepers to the Levites, as we find done by the Chronicler in the Bks. of Chronicles themselves and in his working over of the sources of Ezr and Neh, is presupposed by Ezra and Nehemiah as existing, and rests even upon a pre-exilic application of the name 'Levites' to those classes of sanctuary servants. On the contrary, the application of the name 'Levite' even to the singers and doorkeepers is plainly introduced through the influence of the Priests' Code, which knows of only the one class besides the priests, namely the Levites. The Nethinim, who under Ezra were received into the community (Neh 10²⁹), appear to have disappeared at the time of the Chronicler, who mentions them only once, namely at the time of the founding of the first post-exilic community (1 Ch 9²). Whether they were removed from the service of the sanctuary or by a genealogical device were absorbed among the Levites can scarcely be determined, but even here the influence of the Priests' Code is unmistakable.

For the priests the Chronicler sometimes uses the expression, which is somewhat strange for him, *ha-kōhānim ha-lewiyyim*. It is not, indeed, quite certain that he actually uses it, for the copulative *waw* may easily have dropped out between the two appellations just quoted, and the readings of the MSS vacillate (*Gesch.* p. 154 ff.). But there is an *a priori* probability in favour of the reading without *waw*, for this form of expression is just what does not correspond with the ordinary usage of later times, and in any case in 2 Ch 30²⁷, where it is said of the 'Levite priests' that they blessed the people, this reading is undoubtedly correct, since blessing is the function of the priests exclusively. In this instance, by way of exception, the terminology of Dt has again forced itself to the front, as in like manner the designation 'Levites' is also occasionally still used by the Chronicler in a wider sense so as to include the priests (*Gesch.* p. 136). In the employment of the title 'Levite priests' we may find an approxima-

tion of the position of the Levites to that of the priests, which would have to be viewed as a concession to the pretensions of those whom Ezekiel and Ezra called Levites, namely the descendants of the deposed priests of the high places.

Such a raising of the dignity of the Levites would not be without analogies in Chronicles. In point of fact they have in these books a more priest-like standing. This is shown, in particular, by the services they have to render at the offering of the burnt-offering on the Sabbaths, and at the new moons and great festivals (1 Ch 23³¹), and by their (in an exceptional way) helping the priests to slay the victims on the occasion of extraordinary offerings for the whole people (2 Ch 29³⁴). From the latter passage it may be inferred that the service of the Levites at the offering of the burnt-offering also on holy days consisted in the slaying, and, it may be, in accordance with Ezekiel's enactment, the slaying of the victims. At all events, in Chronicles it is the Levites who undertake the killing and slaying of the Paschal lambs, hand to the priests the blood for sprinkling (2 Ch 30^{10, 35¹⁰}), and attend to the roasting of the Paschal offering (2 Ch 35¹²); whereas in the Priests' Code it is the head of the house who kills and roasts the Paschal lamb (Ex 12⁶; *Gesch.* p. 163). On the other hand, in 2 Ch 29³²⁻³⁴ it is the priests who slay the sacrifices, probably because we have here to do with extraordinary sacrifices for the whole people. By the 'Kohathite Levites' who prepare the shewbread (1 Ch 9²²), the Chronicler appears to mean not the Aaronites (who, to be sure, belonged to the Kohathites), to whom alone that duty falls in the Priests' Code (but cf. *Gesch.* p. 161 f.). While, further, in the Priests' Code the duty of teaching belongs only to the priests, this duty, particularly that of instructing in the *tôrâh*, is assigned in Neh 8⁷⁻⁹ (cf. v. 11), 2 Ch 17³¹, 35³ also to the Levites (*Gesch.* p. 163 f.). The more priest-like position of the Levites finds quite peculiar expression in the fact that in Chronicles not only the priests, as in the Priests' Code, but also the Levites are called holy (2 Ch 23³ 35³; cf., further, Ezr 8³⁰ M, where already the Levites seem to be included [with the priests] in the 'Ye are holy to Jahweh').

Regarding the service of the *doorkeepers* in particular, we learn that they had daily to set in all 24 watches, under four chiefs belonging to the doorkeepers, at the four quarters of the temple (1 Ch 26¹²⁻¹⁸)—an arrangement which, although given as existing in the time of David, will really have reference to the temple of Zerubbabel. As concerns the *singers*, Büchler (*ZATW*, 1899, p. 97 ff.) seeks to prove that the data regarding temple music and temple singing were not found in the authority used by the Chronicler, and are thus added by himself. This is not impossible; but so sharp a distinction between the Chronicler and his authority (the lost Midrash on Kings), with which we are wholly unacquainted, appears to the present writer incapable of being carried out.

There is, moreover, an 'external activity,' i.e. one outside the sanctuary, assigned to the Levites in Chronicles (1 Ch 26²⁰). They are employed as overseers and, like the priests, as judges (1 Ch 23⁴ 26²⁰ *at.*). In particular, their charge of measures is referred to in 1 Ch 23²⁰ (*Gesch.* p. 162). While the Priests' Code fixes the commencement of the Levites' service at their thirtieth, or, according to an innovation, their twenty-fifth year, they have, according to 1 Ch 23²⁰, and other passages, to serve from their twentieth year onwards—an arrangement which the Chronicler is aware is a deviation from the legal statute, and which he seeks to justify as a change made by David.

In the matter of the *revenues* falling to the priests and Levites, from the time of Ezra an

attempt was made to carry out the prescriptions of the Priests' Code. But the setting-up of *Levitical cities* was as little carried into practice after Ezra as it had been up till then. When the Chronicler represents these cities as having existed in the time of David (1 Ch 13²) and later, this is simply due to his theory, which he forgets in 2 Ch 23², where the Levites, at the accession of Joash, are assembled out of all the cities of Judah. Nor is the meaning of the *migrâsh* of the Levitical cities quite clear to the Chronicler (2 Ch 31¹⁹). According to Neh 7⁷³ = Ezr 2⁷⁰, and other passages, in the post-exilic period priests, Levites, singers, doorkeepers, and Nethinim dwelt dispersed in various localities, which did not, however, bear the character of the Levitical cities of the Priests' Code. So also in the period subsequent to the OT, the priests did not all live at Jerusalem: the Maccabees came from Modein (1 Mac 2¹), to which, indeed, they had retired from Jerusalem only in consequence of the troubles under Antiochus Epiphanes; and the priest Zacharias (Lk 1³⁰) had his home in the hill-country of Judah (cf. Büchler, *Priester*, pp. 159-205: 'Die Priester ausserhalb Jerusalem's'). The doorkeepers, according to 1 Ch 9²², betook themselves every seven days, according to their divisions, from their villages to Jerusalem to perform their service. The Levites and singers (and so, no doubt, the priests also) in Nehemiah's time possessed at their places of residence fields, from whose produce they supported themselves when their dues were not paid (Neh 13¹⁰ M), and probably in general when they were not on duty, for the tenth in the time of Nehemiah was paid at the temple (Neh 13⁵ 12² M), and thus will hardly have extended to the Levites and priests outside Jerusalem. The Nethinim lived in Nehemiah's time on the OPHEL (which see) at Jerusalem (Neh 3^{26, 31} M); the (officiating) priests had houses in Jerusalem, situated apparently on the temple area (Neh 3³⁰ M).

On the subject of the dues falling to the temple *personnel*, we have a certain amount of information for the time of Nehemiah. The latter tells us in his Memoirs (Neh 13⁵) that before his departure from Jerusalem the tenth of corn, must, and oil was paid and deposited in the storehouses as the portion of the Levites, temple-singers, and doorkeepers, which three classes received the tenth, and the priest the *têrîmâh*. The *têrîmâh* here might possibly mean the tenth of the tenth, but linguistic usage favours rather our referring it to the handing over of the first-fruits. In that case the paying of the tenth of the tenth to the priests is not witnessed to for the time of Nehemiah. The tenth of the tenth in Neh 10³⁸⁻⁴⁰ owes its presence apparently to a later hand (*Gesch.* p. 171 f.), to which is due also the additional enactment, which perhaps suits even the time of Nehemiah, but in any case is characteristic of the later development, that an Aaronite priest is to superintend the operations of the Levites, as they receive the tithes (v. 39). After a while remissness in paying the tithes set in, so that Nehemiah at his second visit had to adopt drastic measures in order to bring the payment of them into force again (Neh 13¹⁰ M). There is no mention in Nehemiah of the tenth of cattle. The demand for this made by the Priests' Code is probably an innovation, the result of purely theoretical construction, and is perhaps not earlier than the period subsequent to Nehemiah. The Chronicler, on the other hand, is acquainted with the requirement of the tenth of cattle (2 Ch 31⁶). Priests and Levites were appointed by Nehemiah to take charge of the wood that had to be delivered at fixed times, and of the *bikkûrim* (Neh 13³⁰ M). According to Neh 10³⁸ those contributions of wood

for the requirements of the altar of burnt-offering were imposed upon the priests, the Levites, and the people—a prescription which is not contained in the Pentateuch, although this passage in Nehemiah appeals to the Torah (but cf. *Lv* 6³¹).

The Chronicler or his predecessor in the redaction of the Memoirs of Nehemiah had no longer a clear understanding of the whole of the regulations respecting dues. It is impossible to gain a distinct view from the confused picture he draws (*Gesch.* p. 169 ff.). Only in Chronicles is there any allusion to a tenth of honey (2 Ch 31⁴); the tenth of dedicated gifts which is likewise mentioned (v. 6), rests upon a confusion of the tenth with the *tērāmāh*. The various kinds of dues are most concisely enumerated in *Neh* 12⁴⁴, a passage regarding which it is doubtful whether it belongs to the Memoirs of Nehemiah. Three species are named in it: *tērāmāh*, *rēshith*, and tenth. On this is based the Talmudic distinction of three kinds of dues, which finds no direct support in the Torah.

10. THE PRIESTHOOD AFTER OT TIMES.—Several further developments in the relations of the *personnel* of the sanctuary still show themselves in the period subsequent to the OT.

a. *Priests and Levites*.—The consequence of the inclusion of the singers and doorkeepers among the Levites was that these two classes, which at the time of Ezra and Nehemiah were much more numerous than the Levites so-called in the narrower sense, dispossessed these of their unique character. At least the tendency to this result is already discoverable in the OT in Chronicles, where singers and doorkeepers play a more important part than the Levites so-called in the narrower sense, so that one might be tempted to suggest that the latter had even for the Chronicler merely a theoretical existence (Vogelstein, pp. 30, 102 ff.). It is doubtful whether in 1 Ch 9¹⁴⁻²⁴ other 'Levites' (vv. 14, 33¹) besides the doorkeepers (vv. 17, 22, 33²) and the singers (v. 33³) are assumed to exist (*Gesch.* p. 157 f.). The Talmud at all events knows only two kinds of Levitical service, that of song and that of watching in the temple (cf. Maimonides, *ap.* Vogelstein, p. 85; and, further, Büchler, *Priester*, p. 113 ff., esp. 136 ff.). This is a result that is not surprising in view of the origin of the Levites in the narrower sense. The ancient, i.e., as would appear, pre-exilic (see above, § 3 *end*), classes of sanctuary servants included, besides the priests, only the singers and doorkeepers. The class known to Ezekiel and in the time of Ezra as 'Levites' was an artificial creation, which served only the purpose of disposing of the old non-Jerusalemite priests. In so far as these were not, like the Ithamarites, admitted to the post-exilic priesthood, they received as 'Levites' an intermediate place, which is hard to define, between the priests on the one hand and the singers and doorkeepers on the other. Thus it came about that at last the Levites *κατ' ἐξοχήν* were absorbed in the singers and doorkeepers, who constituted the only two surviving professional classes of Levites. In this way the arrangement gained ground, which the author of the Priests' Code, if we judged rightly, had in view. He thought of his Levites as singers (for he reckons to them the singer-family of the Korahites) and doorkeepers (for he employs to describe their service the technical term 'keep'). Of any other kind of Levites he for his part seems to know nothing, and the close of the history of the Israelitish cultus *personnel* knows as little.

In fixing the position of the cultus *personnel*, a later age accepted on other points as well the simpler and more natural arrangement, and disregarded ordinances which had for some time enjoyed validity, thanks to an artificial theory or

to historical confusion. The *tenth* as a sacred due is readily intelligible if it is either devoted to a sacrificial meal (as proposed in Dt), or even given to the priests, as representatives of the deity, but not when it falls to subordinate servants of the sanctuary. The Priests' Code, which assigns it to the Levites, shows by this very circumstance that the name 'Levites' was originally a designation of the priests (*Gesch.* p. 52 f.). After the tithe regulation of the Priests' Code had been actually put in force under Nehemiah in later times, according to the testimony of Josephus (*Ant.* XX. viii. 8, ix. 2; *Vita*, 12, 15) and the Talmud (see the references in Graetz, *Monatsschrift*, 1886, p. 97 ff.), the tithes were withdrawn from the Levites and assigned exclusively to the priests (cf. Van Hoonacker, *Sacerdoce*, etc. p. 40). The Mishna (*Maaser sheni*, v. 6) appears, indeed, to assume as the correct practice that some receive the first tenth and others the *tērāmāh* of the tenth. The first class could be only the Levites (Schürer, p. 258, note 44); but then this description, as it seems, would not correspond with the actually existing relations of later times. It is possible that, as Vogelstein (p. 72 ff.) holds, the tradition handed down in the Mishna, to the effect that the high priest Johanan abolished 'the prayer of thanksgiving and confession at the tithe', refers to the abolition of the paying of the tithe to the Levites, and that by this Johanan is to be understood the contemporary of the Persian satrap Bagoses (cf. above, § 8 g; so also Van Hoonacker, *Sacerdoce*, etc. p. 401, who, according to his chronological scheme [p. 60 f.], regards this Johanan as a contemporary of Ezra; on the other hand, Biberfeld, p. 18, holds that the Johanan who abolished the tithe prayer was John Hyrcanus). Our earliest evidence that the priests received the tenth comes from a much later time. Josephus (*l.c.*) assumes it as a matter of right that the priests receive the tenth, and complains only that some priests take it by force. He is speaking of the time of Agrippa II. Since Josephus describes the priests as taking the tithe at the hands of the laity, he cannot have in view the tenth that had to be paid by the Levites to the priests. He appears thus to be quite unacquainted with the paying of the tenth to the Levites as a usual thing. From the fact that the Talmud looks upon it as a punishment that the tithe was withdrawn from the Levites and paid to the priests instead, which was the custom after the destruction of the temple (Graetz, *Monatsschrift*, 1886, p. 107 f.), it has been inferred by Graetz (*l.c.* p. 98 ff.) that the offence in view as punished may be the presumption of the Levites, who—but only the temple singers—in the time of Agrippa II. succeeded in obtaining the right to wear the linen garment of the priests (see below). The historical motive for deviating from the law cannot be determined, but it is readily conceivable that any opportunity would be seized for altering the awkwardly complicated tithe law of the Priests' Code.

Not only the tithe but other previous rights were withdrawn from the Levites. They were no longer trusted with the whole of the *watch service* of the temple, but had, according to the Mishna, to keep watch only on the outside at 21 points, whereas the three stations in the inner court were occupied by priests. The guard supplied by the Levites was under the control of a captain of the temple, i.e. a priest (*Middoth* i. 1, 2).

Seeing that the Nethinim, who apparently were no longer even in the time of the Chronicler employed as a special class for the service of the temple, although still mentioned at a later period, are not mentioned in connexion with the temple service, the *lower services* must have been discharged by others. Philo assigns not only the

watch service but also the cleaning of the temple to the *νεωκόμοι*, i.e. the Levites; for other duties, growing boys of the priests were employed (Schürer, p. 279). In addition, we hear (*Sukka* iv. 4; *Tamid* v. 3) of 'attendants' (צופים), without its being clear whether they were Levites (so Büchler, *Priester*, p. 149 ff.) or non-Levites that were thus employed. In any case the only class of Levites that could enter into consideration would be the doorkeepers, for the singers were doubtless regarded as holding too dignified a position to have such a name applied to them.

Shortly before the destruction of the temple, the singers succeeded in obtaining from Agrippa II. and the Sanhedrin permission to wear the 'linen' garment of the priests (*Jos. Ant.* xx. ix. 6). The desire to do this was not new; according to 1 Ch 15²⁷, 2 Ch 5¹², in the time of David and Solomon not only the singers but the Levites in general wore the priestly *byssus* robe—a statement which shows merely that at the time of the Chronicler this practice was an object of desire. Agrippa II. not only granted the desire of the singers, but allowed a portion of the Levites, by whom only doorkeepers can be meant, to learn the singing of hymns (*Jos. l.c.*), i.e. to hold an equal place with the division of singers.

It is to the Levites apparently that we should refer the designation of γραμματεῖς τοῦ ἱεροῦ, 'the teachers of the law of the temple,' which occurs in the letter of Antiochus the Great, *ap. Jos. Ant.* xii. iii. 3. As these γραμματεῖς are named between the *λεπῆς* and the *λεποφάτραι*, they can hardly be other than Levites (Sam. Krauss, p. 675). The mention of them tallies with what we learn from Neh 8⁷⁻⁹ about the instruction in the Torah which was given by the Levites.

b. *The revenues of the priests and Levites.*—The dues demanded for the priests by the Priests' Code were augmented by that imposed by Deuteronomy upon sheep's wool (*Chullin* xi. 1, 2). By combining the requirements of Dt with those of the Priests' Code, the income of the priests was further augmented, inasmuch as those portions of the sacrificial victims which, according to Dt, fell to the priests, had at a later period to be paid to them from all animals that might legitimately be offered in sacrifice, even when these were slaughtered for a common use, namely the foreleg, the cheek, and the maw of cattle, sheep, and goats (*Chullin* x. 1; cf. Schürer, p. 255). The *bikkûrim* were more specifically defined as having to be paid from seven sources, adopted from Dt 8⁸, namely wheat, barley, grapes, figs, pomegranates, olives, and honey. According as the parties concerned resided near to or far from Jerusalem the *bikkûrim* were to be handed over fresh or dried, and were to be brought in general processions to Jerusalem (Schürer, p. 249). A distinction, based on Neh 12⁴⁴, was made between the *bikkûrim* and the *têrûmâh* in the narrower sense, i.e. the due levied on the best not only of the above seven kinds but on all fruits of field and tree. There was no fixed measure prescribed for these dues, but on an average they were to amount to 1/10th of one's income. This *têrûmâh* was to be eaten, according to Nu 18¹², by priests alone (Schürer, p. 249 f.). The due to be presented of dough was also more specifically defined, as well as the products of the ground which had to be regarded as tithable (Schürer, p. 250 ff.).

According to the Mishna (*Menahoth* x. 4), a portion of the firstling sheaf that was waved by the priest before Jahweh (Lv 23^{10f.}) falls to the priest—an arrangement of which there is no indication in the OT. According to Josephus (*Ant.* iv. 4), the redemption price for the vow of one's own person is considered to belong to the priests,

whereas in the Priests' Code (Lv 27) this is not expressly said, as it is in the case of the *hêrem*. Perhaps the statement of Josephus is inexact; as a rule, at least the things vowed appear to have been used for general cultus purposes (Schürer, 256 f.).

In one point the practice of later times took a turn less favourable to the temple-servants than the Priests' Code had intended. Not only the so-called second tenth, i.e. the one which, upon the ground of the tithe regulations in Dt was levied besides the tithe of the Levites, but also the tithe of cattle, are required by the Rabbinical rules to be devoted to sacrificial meals at Jerusalem. The latter thus did not fall, as is unquestionably the intention of the Priests' Code, to the Levites and priests (Schürer, p. 251 f., note 22).

Those dues of the priests which did not consist of portions of the offerings, and which were not therefore necessarily brought to Jerusalem, were paid 'everywhere where there was a priest,' i.e. on the spot to any priest who happened to be present, and this was enjoined to be continued even after the destruction of the temple (Schürer, p. 257).

c. *The duties and offices of the priests.*—The enactments concerning the priests were in later times simply made more precise, upon the basis of the Priests' Code; for instance, the *laws about their marriage* (Schürer, p. 227 f.), and the *requirements of freedom from bodily blemish* (ib. p. 230 f.). It would appear that in later times it was, not indeed a law but a custom that the principal priests married only the daughters of priests (Büchler, *Priester*, p. 88 ff.). A particular age for admittance to the priestly service was no more fixed in the period following the OT than is done by the Priests' Code in the case of the Aaronites; but, as a matter of practice, those admitted required apparently to have passed their twentieth year (Schürer, p. 231).

Among the priestly duties, the *blowing of trumpets* takes a wider scope than in the Priests' Code or the statements of the Chronicler, according to which this ceremony was practised only in war and at the regular festivals and on special festive occasions. In later times it took place also in connexion with the sabbatical and daily offerings (*Jos. Ant.* iii. xii. 6), and to announce the beginning of the Sabbath from the battlements of the temple (*BJ* iv. ix. 12; cf. Schürer, p. 278 f.). In addition to the *washing*, required in the Priests' Code, of hands and feet in the brazen laver before performing the sacred office (on the mode of performing this washing see Büchler, *Priester*, p. 74, note 1), the priests had in later times to take a plunge-bath every morning before commencing the work of the day (Schürer, p. 283). In the last days of the temple it would appear that the higher ranks of priests took no part in the work of sacrifice, with the exception of the offerings presented by the high priest on the feast days, as this non-participation in sacrificial work is to all appearance to be assumed in the case of the priest Flavius Josephus (Büchler, *Priester*, p. 70 ff.).

The 24 divisions of priests, of which we know as early as Chronicles, served for the performance of the cultus to which they attended in turn. The 24 divisions are distinguished, in the literature posterior to the OT, as the *mishmārôth*, from the subdivisions not mentioned in the OT, the *battê'abôth*. Each principal division included, according to tradition, from five to nine subdivisions (Schürer, p. 235 f.). A principal division is called in Greek *παρπία* (*Jos. Ant.* vii. xiv. 7), or *ἐφημερία* (Lk 1⁵⁻⁸), or *ἐφημερίς* (*Jos. Vita*, 1); a subdivision, *φωλή* (*Jos. Vita*, 1). Each of the 24 divisions went on duty for a week, the exchange with the next division taking place on the Sabbath. At the three great annual festivals all the 24 divisions officiated simultaneously (Schürer, p. 279 f.).

The position of the *high priest* underwent a change towards the close of the Jewish hierarchy through respect being no longer paid to the office as one that was to be held for life and to be hereditary. The elevation of the Hasmonæans to the high-priestly dignity had already marked a breaking with the past, for thereby the hereditary succession of high priests was interrupted. The Hasmonæans sprang from the priestly class of Joiarib (1 Mac 2¹ 14²⁹). Whether the latter was reckoned to the Zadokites or not, cannot be determined. In the lists contained in the Book of Nehemiah (12¹⁻⁷, 12-21) it holds a subordinate position; a list, perhaps not earlier than the time of the Hasmonæans (cf. above, § 9), found in 1 Ch 24^{7ff}, assigns to it the first place. In one of the recently discovered fragments of the Hebrew original text of Jesus Sirach, namely 51^{12c(9)}, the house of Zadok is highly exalted: 'O give thanks unto Him that chose the sons of Zadok to be priests' (S. Schechter and C. Taylor, *The Wisdom of Ben Sira, Portions of the Book Ecclesiasticus*, Cambridge, 1899). The whole hymn to which this passage belongs, namely vv. 12c(1)-12c(15), is omitted in the Greek translation of the grandson of Jesus Ben Sira, perhaps as Schechter (p. 35 f.) suggests (cf. Th. Nöldeke, *ZATW*, 1900, p. 92), because in the interval between the composition of the original text and that of the translation (i.e. between c. 200 and 130 B.C.) the family of the previous Zadokite high priests had been superseded by the Hasmonæans. But after this latter event the high priesthood again became hereditary in the Hasmonæan line. At a later period Herod and the Romans set up and deposed high priests at their pleasure. From these non-acting high priests arose the group known as ἀρχιερείς. But the custom was always rigidly adhered to of selecting the high priests only from certain special priestly families (Schürer, p. 215 ff.). The anointing of the high priest, which is ordained in the Priests' Code, was not in later times carried out in the case of all high priests, perhaps it was in general omitted; the Mishna knows of high priests who were installed in office simply by clothing them with the official robes (*Horajoth*, iii. 4; cf. *Gesch.* p. 140; Schürer, p. 232, note 26; Weinel, *ZATW*, 1898, p. 66 f.; Van Hoonacker, *Sacerdote*, etc. p. 351 f.). The high priest, who, during the period of Jewish independence, was the head also of the State, was at least in later times president of the Sanhedrin, and in so far also the representative of the people in political matters in dealing with the Romans. As regards his participation in the performance of the cultus, it was a later custom for him to offer the daily offering during the week preceding the Day of Atonement; any other share he might take in the work of sacrifice was simply according to his pleasure (*Joma* i. 2). Josephus states that the high priest offered as a rule on the Sabbath, at the new moon, and at the yearly festivals (*BJ* v. v. 7; Büchler, *Priester*, p. 68 ff., doubts whether in later times the high priest offered except at the yearly festivals). The daily *minhah*, which according to the original intention of Lv 6^{12ff} he had to offer (see above, § 8 c), was not always offered by the high priest in person, but he defrayed the cost of it (Jos. *Ant.* iii. x. 7, where *tepeis* can be none but the high priest), a duty which Ezekiel imposed upon the 'prince.' In the Roman period a conflict arose on the question of the keeping of the high priest's robes (Jos. *Ant.* xv. xi. 4, XVIII. iv. 3, XX. i. 1, 2); when Jerusalem was taken, his robe of state fell into the hands of the Romans (*BJ* vi. viii. 3).

Besides the high-priestly office, we hear in the Rabbinical literature of an exalted priestly office, that of the *šegan* (שֶׁגָּן), of which there is no mention

in the OT. The *šegan* has usually been viewed as the high priest's substitute, who had to take his place if he was prevented by Levitical uncleanness from discharging the duties of his office. But the existence of a standing *vicarius* for the high priest is rendered improbable by the statement of the Mishna (*Joma* i. 1) that seven days before the Day of Atonement 'another priest' was to be set apart to act for the high priest in the event of his being prevented from officiating. It is not at all likely that this statement in the Mishna relates to an earlier practice, and that afterwards (subsequent to the year A.D. 63) the *šegan* was appointed as substitute for the high priest (Büchler, *Priester*, p. 113), for there is nothing known of such a change. Since the LXX usually reproduces the word *šegānim*, which is used in the OT for non-priestly officials, by σπαρρηγολ, Schürer (p. 264 f.) is probably right in seeing in the *šegan* the captain of the temple (σπαρρηγός τοῦ ἱεροῦ), who is repeatedly mentioned in the NT and by Josephus, and in attributing to him the principal oversight of the external order of the temple. Yet *Joma* 39^a (Büchler, *Priester*, p. 105) looks upon the *šegan* as in some measure the representative of the high priest. The *šegānim* in the plural (*Bikkurim* iii. 3) are doubtless, like the σπαρρηγολ (Lk 22⁴ 52), heads of the temple police subordinate to the *šegan*. In the Mishna (*Bikkurim* iii. 3) there are mentioned as going to meet the festive procession which accompanied the *bikkūrim*—the *paḥōth* (מַחֹה), the *šegānim*, and the *gizbārim*. It may be inferred that by the first of these designations, as by the two following, priests are intended, although *paḥōth* is used also for secular governors. But a special priestly office can hardly be connoted by the word, which apparently corresponds to the NT ἀρχιερείς (Schürer, p. 266). The *gizbārim* (גִּזְבָּרִים, *Peah* i. 6 end) or γαζοφύλακες (Jos. *Ant.* xv. xi. 4, XVIII. iv. 3) had charge of the rich temple treasures. From the description of the Chronicler, it appears necessary to hold that in his time the administration of the temple revenue and capital was in the hands of the Levites. At a later period the higher posts as treasurers appear to have been held by priests, for the *gizbārim* appear as high temple officials alongside of the *šegānim* (*Bikkurim* iii. 3), and Josephus (*Ant.* xx. viii. 11) names the γαζοφύλαξ, i.e. probably the head of the treasurers, immediately after the high priest. It is possible that the Chronicler, in his account of the management of the temple treasury, has, in his preference for the Levites, arbitrarily put these in the foreground (but cf. Ex 38²¹). But, seeing that in the matter of other duties and rights the Levites were in point of fact displaced in later times by the priests, the same may have happened with the holding of treasury offices. Under Nehemiah (Neh 13¹³ M) a priest was at the head of the treasurers (i.e. those who were set over the 'ōzārōth, 'store-houses'), among whom only one is stated to have been a Levite. Sam. Krauss (p. 673 f.) doubts, however, whether the *gizbārim* were priests, they being, as far as is known to the present writer, nowhere directly called such. To the treasury officials probably belonged also the 'amarkēlin (אֲמָרְכֵלִין), who, without a more particular definition of the term, are mentioned in the Mishna only once, along with the *gizbārim* (*Shekalim* v. 2), and are named also in later literature, as a rule, together with the *gizbārim* (Schürer, p. 270 f.). Sam. Krauss (p. 673) holds the 'amarkēlin also to have been laymen, drawing this inference from the Midrash *Wajikra Rabba* (Par. v. ch. v. 3; in A. Wünsche's *Bibliotheca Rabbinica*, Liefer. 26, 1884, p. 36), according to which the 'amarkēl had a right to partake of the holy things, but not, like the high priest, of the offerings. But Schürer (p. 270) is probably right in referring to *Tosefta Horajoth*, end (*Tosefta*,

ed. by M. S. Zuckerman, 1880, p. 476, *bottom*), where in a graduated list the *amarköl* and the *gizbār* are above the ordinary priest, the latter is above the Levite, and this last again above the Israelite, i.e. the layman (cf. also Graetz, *Monatschrift*, 1885, p. 194). It is correct, however, that the official name *amarköl* is used to designate the office not only of priest, but of administrator in general (Büchler, *Priester*, p. 100 ff.; Schürer, p. 270). According to Büchler (p. 90 ff.), there were, in addition to the regular priestly *gizbārīm* and *amarkēlīm*, others who were selected from the successive divisions of officiating priests; but no express testimony is known of the use of these two names for heads of these divisions. Only in the Jerusalem Talmud is the office of the *katolikin* (קטליקין, καθολικοί) named (Schürer, p. 271).

The cultus was, according to the Law, to be performed by all priests; but in course of time the different functions became so complicated and in part difficult, that, according to the Mishna, they were apportioned among different priestly officials, and certain duties, such as that of preparing the shewbread and the incense, became hereditary in particular families (Schürer, p. 275 ff.).

In addition to their service in the temple, the priests are known to Josephus as administrators of the most important concerns of the community, under the presidency of the high priest (c. *Apion*. ii. 21). He has in view primarily Jerusalem. But in all cities there were, according to him (*Ant.* iv. viii. 14), as Moses had enjoined, men of the tribe of Levi appointed, two for each court of seven, to assist the members as *ὑπέρται*. Such an enactment is not found in the Pentateuch; Josephus must then have in view arrangements existing in his own time in Judaea under the Romans (differently Van Hoonacker, *Sacerdote*, etc. p. 45 f.). From the designation *ὑπέρται* it is more likely that these two assessors were Levites (Schürer, p. 178) than that priests are meant (Büchler, *Priester*, p. 180). According to the Mishna (*Sanhedrin* i. 3), priests are in certain instances to be called in as judges (cf. *Jos. c. Apion*. ii. 21). This judicial activity of the priests, perhaps also of the Levites, is a continuation of the corresponding duties assigned to the priests in Deuteronomy and Ezekiel, and to the priests and Levites in Chronicles. In the last resort this species of activity on the part of the *personnel* of the sanctuary goes back to the practice, with which we make acquaintance in the Book of the Covenant, of having certain lawsuits decided at the sanctuary, by means of the oracle of the Deity communicated by the priests.

LITERATURE.—Jn. Lightfoot, *Ministerium Templi quale erat tempore nostri Salvatoris descriptum ex scriptura et antiquissimis Iudaeorum monumentis* (Opera, Roterodami, 1636, vol. i. pp. 671–768); Joh. WOLF BAUDISSIN.

PRIEST IN NT.—1. The word 'priest' (ἱερεύς) is used in the NT of the sacrificing ministers of any

religion. The priest of Zeus is mentioned in Ac 14¹³, the priest of the true God in Mt 8⁴. References, indeed, are numerous in the NT, especially in the Gospels, to the priests of the OT. In Lk 1²⁻⁸ allusion is made to the twenty-four *ἐφημερίαι* into which they were divided, and to the assignment of certain of their duties by lot. The NT throws little light, however, on the standing of the priests generally, or on the service they rendered to the nation. The Gospels speak almost exclusively of those whom they call the *ἀρχιερείς*, or chief priests. The high priest was chosen, as a rule, from one of a small number of priestly families, and, when the office ceased to be held for life, there might be a number of persons entitled by courtesy to the name. An ex-high priest, if a man of unusual force of character, might actually exercise a greater influence in the direction of ecclesiastical or political affairs than the proper holder of the office, and either overshadow the latter in the common mind, or practically share his distinction. It is thus we must explain such expressions as Lk 3² *ἐν ἀρχιερείᾳ Ἰωάννου καὶ Καϊάφα* = 'in the high priesthood of Annas and Caiaphas,' and the part taken by Annas (while Caiaphas was titular high priest) in the trial of Jesus (Jn 18¹³). So also in Ac 4⁶ the dignity of the high priesthood is reflected on if not extended to all the members of the *γένος ἀρχιερατικόν*; there was a kind of aristocracy among the priests, and it was from it that the high priest proper was chosen. Though the *ἀρχιερείς* made common cause with the Pharisees in their hostility to Christianity, they were themselves on the Sadducean side (Ac 5¹⁷), and the most determined opposition to the preaching of the resurrection came from them. Probably the inferior members of the priestly order, who had but a nominal share in its prerogatives, were more free from its prejudices; it would be among them that the great multitude of priests was found which 'became obedient to the faith' (Ac 6⁷). On the whole subject of the Jewish priests in NT times, see Schürer, *GJV* ii. 214-305 [*HJP* ii. i. 195-305], and the preceding article, esp. § 10c.

2. A more important subject is that which is suggested by the use of the word 'priest' in the interpretation of the Christian religion. In the NT it is only in the Epistle to the Hebrews that Jesus is spoken of as *ιερεὺς*, *μέγας ιερεὺς*, and *ἀρχιερεὺς*—terms which are not to be distinguished from each other, the last two only signifying Christ's eminence in the priestly character. In the highest sense of the term, so to speak, He is a priest. But what is a priest? In the Ep. to the Hebrews, it may be said, the priest is the person through whom and through whose ministry people draw near to God, through whom they are 'sanctified'; that is, made a people of God, and enabled to worship. The writer does not think of such a thing as a religion without a priest. Men are sinful men, and without mediation of some kind they cannot draw near to God at all. The people of God had mediators under the OT, and they have a mediator under the NT. It is on the character of the mediator that the character of the religion depends. If he is imperfect the religion will be imperfect; there will be no real or permanent access to God, no real liberation of the conscience. But if he is what he should be, then the perfect, and therefore the final, religion has come. The conscience will be effectually purged, sin as a barrier between God and man will be effectually removed, the way into the holiest of all will be opened, and the covenant realized in the abiding fellowship of God and His people. It is from this point of view that the writer works out the contrast between the OT and the NT. The Jewish religion

was a true one, for God had given it; but it was not *the* true and therefore not the final one, for its priesthood was imperfect. Everything about it was imperfect. The priests themselves were imperfect. They were mortal men, and could not continue because of death. They were sinful men, too, and had to offer for their own sins before they could offer for those of the people. The sanctuary was imperfect, a *δύον κοσμητόν*, not the real dwelling-place of God. The sacrifices were imperfect; the blood of bulls and goats and other animals, whatever its virtue, could not make the worshippers perfect touching the conscience; that is, could not bring them to the desired goal of a fearless peace toward God. The very repetition of the sacrifices showed that the work of removing sin had not really and once for all been achieved. And, finally, the access to God was imperfect. The priests had no access at all into the Holiest Place, and when the high priest did enter on one day in the year it was no abiding entrance; the communion of the people with God, which his presence there symbolized, was lost, it might be said, as soon as won; he came out from the shrine and the veil closed behind him, 'the Holy Ghost this signifying, that the way into the holiest of all had not yet been made manifest.' Everything in the old religion had imperfection written upon it—the imperfection involved in the nature of its priests (*οὐδὲν γὰρ ἐτελέσωσαν ὁ νόμος*, He 7¹⁹).

It is in contrast with this that Christ's priesthood is set forth. Christianity is the perfect and final religion, because Christ is the perfect priest. An OT foundation for this doctrine is found in Ps 110⁴, where the Messiah is addressed by God as 'a priest for ever, after the order of Melchizedek.' Perhaps one should call it rather a point of attachment than a foundation, for though it probably served the writer's purpose in arresting the attention of his readers, the ideas which he connects with the priesthood of Christ are not, strictly speaking, derived from it. The order of Melchizedek is contrasted with that of Aaron: the two orders exclude each other. Christ is not a priest after the order of Aaron upon earth, and afterwards, in heaven, a priest after the order of Melchizedek: being what He is, the Son of God, in the sense understood in this Epistle, His priesthood can be of the Melchizedek order alone. In Him and through His ministry a fellowship with God has been realized on the behalf of men which is perfect and which abides. The word which is used to express this in the Epistle is *αἰώνιος*. Inasmuch as He is the true priest, Christ's blood is the blood of an *eternal* covenant, He offered Himself through *eternal* spirit, He has become the author of *eternal* salvation, has obtained *eternal* redemption, and enables men to get hold of the *eternal* inheritance (5⁹ 9¹² 14¹⁵ 13²⁰). All these are ways of indicating the perfection and finality of His priesthood, i.e. of His function to mediate between the holy God and sinful men, and to realize in Himself, and enable sinful men to realize, a complete and abiding fellowship with God.

Among the aspects or constituents of Christ's priesthood on which the writer lays emphasis are these. (1) His *commission*, He 5⁴. God must appoint the priest, for he is to be the minister of His grace. No man can take this honour to himself. The writer seems to find the Divine commission in the psalms quoted in He 5⁶ (Ps 2⁷ 110⁴), but he connects these immediately in v. 7¹ with what seems to be a reference to the agony in Gethsemane, as though it were there, historically, that Jesus received this high and hard calling. (2) His *preparation*. This is a point on which great stress is put. To be a merciful and trustworthy high priest (2¹⁷), it is necessary that he

should be to the utmost possible extent one with those whom he represents before God. Hence he becomes like them a partaker of flesh and blood (2¹⁴), is tempted in all points like us (4^{1b}), learns obedience by the things which he suffers (5⁸), knows what it is to worship with others and to wait upon God (2^{12c}), and at last to taste death. Sin apart (4¹⁵), nothing human is alien to him; in virtue of his nature and his experience he can sympathize with us; through suffering, especially, he has been made 'perfect,' i.e. been made all that he ought to be as a 'captain of salvation,' or a priest to stand before God for sinful men, able truly to enter into their case. On the word 'perfect' (τελειῶσαι) see Davidson, *Hebrews*, p. 207 f. (3) His offering. Every priest is appointed to offer gifts and sacrifices (8³) for sins (5¹), and this one also must have something to offer. What is it? In a word, it is himself. This is more easily said than interpreted. There is a passage in the Epistle (10⁴⁻⁹) in which, following Ps 40⁷⁻⁹, what Christ did is contrasted with 'sacrifices and offerings and whole burnt-offerings and sin-offerings,' as 'doing the will of God'; and it is said that Scripture puts away the first to establish the second. From this it is often inferred that Christ's work was not sacrificial, and especially that His death is not to be conceived as an offering for sin; sacrifice, it is said, is abolished to make room for obedience. But this is certainly not the contrast in the writer's mind. The conception of offering or sacrifice is essential to him, and to Christ as priest. This priest, like every other, must have somewhat to offer. Indeed, immediately after the remark that He puts away the first (the OT sacrifices) to establish the second (the doing of God's will), he adds, 'in which will we have been sanctified through the offering of the body of Jesus Christ once for all.' What He opposes is not sacrifice and obedience *simpliciter*, but the OT sacrifices, in which the victims were involuntary, and the offering therefore morally imperfect, not to say meaningless, and Christ's willing sacrifice of Himself, which was an act of obedience to the Father. As a voluntary act of obedience this sacrifice had a significance and a moral worth which no animal sacrifice could have. But the obedience involved in it was not simply the obedience required of man as such; it was the obedience required of the Son whom the Father had commissioned to be the mediator of a new covenant, the restorer of fellowship between Himself and sinful men; in other words, it was the obedience of a priest, who had 'to annul sin by the sacrifice of himself' (9²⁷), to be 'offered once for all to bear the sins of many' (9²⁸), to enter into the sanctuary 'through his own blood' (9¹²), 'by one offering to perfect for ever them that are being sanctified' (10¹⁴). In short, it is not sacrifice and obedience that are blankly contrasted here, but unintelligent will-less animal sacrifice, and the sacrificial obedience of the Priest who willingly dies to make purgation of sins (1³). As the perfect priest Christ made once for all the perfect sacrifice for sin; that is why the Levitical sacrifices have passed away. (4) The scene of His ministry, or the sanctuary. The true offering is made in the true sanctuary, i.e. heaven. It is there that Christ appears in the presence of God for us. It is there, in His person, that there is realized the abiding fellowship of God and man into which the gospel calls us. But this does not mean that what has been spoken of under the head of His offering, namely His death, is not included in His priestly work. To break the work of the perfect priest into pieces in this way is foreign to the writer's mode of thought. The priest's work, his offering, is not consummated till he enters with it (and by means of it) into God's presence; it is

then that he is in the full sense a priest. Hence Christ is conceived as exercising His priestly function in the sanctuary above; but He could not be priest there except in virtue of the commission, the preparation, and the offering, which have just been described. All these therefore belong to the conception of the priesthood as much as what is done in the heavenly sanctuary itself. (5) His intercession. He is able to save to the uttermost those who draw near to God through Him, seeing He ever liveth to make intercession for them. In what the intercession consists is nowhere explained. The writer to the Hebrews does not define it as the perpetuating, or making prevalent for all time, of an atoning work achieved on earth; he does not conceive of the atoning work as achieved at all except through the entrance of the priest into the presence of God διὰ τοῦ ἱεροῦ αἵματος. On the other hand, it seems to be less than what he means, if we say that His mere appearing in God's presence, even with the virtue of His sin-annulling work in Him, is itself the intercession—a continuous and prevailing plea with God to receive even those who have sinned into fellowship with Himself, and not to let sin annul His covenant. It is a fair inference from 4¹⁶ (that we may find grace for timely succour), taken in connexion with what precedes, that the intercession of the great High Priest is not a continuous unvarying representation of man before God, but relates itself sympathetically to the variously emergent necessities and crises of individual life. (6) The result of Christ's priesthood. The result is, in a word, the establishment of the new covenant between God and man. In Christ, and on the basis of His work, God is our God again, and we are His people. Because Christ is all that a priest should be, the new relation of God and man realized in Him is all that such a relation should be; Christianity is a new, but also the final, because the perfect religion. There are various ways in which this is expressed in detail. Those who have the perfect priest are freed from the fear of death (2¹⁵); can come with boldness to God's throne and find it a throne of grace (4¹⁶); have a hope of immortality that nothing can shake, knowing as they do that Jesus has entered within the veil as their forerunner (6²⁰); have an assurance, in the indissoluble life of Christ (7¹⁶), in the priesthood which as founded on it never passes to another or can never be treasured upon by another (7²⁴), and in the intercession of their deathless representative, that complete salvation awaits them; in their worship are made perfect as touching the conscience, i.e. completely delivered from sin as that which hinders access to God (9⁹⁻¹⁴). And as the blessings of the covenant are infinite, so the deliberate and wilful rejection of them, and the relapse from the fellowship with God assured in Christ to any inferior religious standpoint (6^{16-10²⁶}), is the unpardonable sin.

3. The Epistle to the Hebrews does not attribute to believers as priests any of the special functions involved in the unique priesthood of Christ. In Ex 19⁶ Israel is spoken of as אֱלֹהִים, i.e. God's people are His kingdom, and they are priests, with the right of access to Him. As the NT point of view is that there is only one people of God through all time, this conception is found in the NT also: see especially Rev 1⁵ 20⁶, 1 P 2⁹ (ἱεράτευμα ἁγίων, βασιλείων: βασιλείαν, ἱερεῖς τῷ θεῷ καὶ πατρὶ αὐτοῦ). In substance, the same thing is meant when we read in Hebrews of the right to 'draw near with boldness,' or in Eph 2¹⁷ that through Christ all Christians alike have 'their access (τὴν προσεγγύην): the characteristic privilege of the new religion, Ro 5², 1 P 3¹⁸ in one spirit to the Father.' To the Father: for in experience the

sonship of believers and their priesthood are one and the same thing. Sonship and priesthood are two figures under which we can represent the characteristic relation of man to God, his characteristic standing toward God, in the new religion instituted by Christ. Formally distinguishable, they are really and experimentally the same. Christ Himself was perfect priest only because He was true Son of God; His priesthood, though it was His vocation, was grounded in His nature: it had nothing official in it, but was throughout personal and real. So it is with the priesthood of believers: it also is involved in sonship, is one element or function of sonship, and only as such has it any meaning. The writer to the Hebrews speaks of Christians as offering to God sacrifices of praise, the fruit of lips making confession to His name. He bids them remember beneficence and charity, for with such sacrifices God is well pleased. So St. Peter says Christians are a holy priesthood to offer spiritual sacrifices, acceptable to God through Jesus Christ (1 P 2⁹); and St. Paul bids the Romans present their bodies a living sacrifice, holy, acceptable to God, which is the rational worship required of them (Ro 12¹). Praise, self-consecration, charity,—if we include Rev 8³, we may add, after the analogy of Ps 141², prayer,—these are the only sacrifices which the priestly people of God may offer now. There is no such thing in the NT as a sacrifice for sin except the sacrifice which Christ offered once for all.

4. The NT does not apply the word *lepeús* to any Christian minister, nor indeed to any Christian at all, except so far as the people of God are spoken of as a 'royal priesthood.' It is easy to see why. Christianity is what it is—a perfect and abiding fellowship with God—because it is realized in the Eternal Son of God. It cannot be realized or guaranteed in any other. He is the Mediator of it, to whom it owes its character. To introduce into it, no matter how we define their relation to Him, official mediators, is to relapse from the Melchizedek priesthood to the Aaronic; it is in principle to apostatize from Christianity. The pictorial use of language borrowed from the old religion is, of course, intelligible enough. St. Paul, e.g., can speak of himself as *λεπουργών τὸ εὐαγγέλιον τοῦ θεοῦ*, discharging a sacred function toward the gospel, and presenting the Gentiles as an offering to God (Ro 15¹⁶; cf. Ph 2¹⁷). But there is not, as in the nature of the case there could not be, any trace in the NT of a Christian priest making sacrifice for sin, and mediating again (in the Aaronic, official, mortal, never perfect, and never to be perfected fashion) between God and man.

LITERATURE.—Schürer, as above; the books on NT theology, Weiss, Pfeiderer, Beyer, Holtzmann; the commentaries on Hebrews, esp. the extended notes in Davidson; Bruce, *Ep. to the Hebrews*, and art. *HEBREW* in this Dictionary; Milligan, *Ascension and Heavenly Priesthood*; Westcott, *Hebrews*; also *Priesthood and Sacrifice* (Report of Conference at Oxford), edited by W. Sanday, 1900.

J. DENNEY.

PRINCE is the AV tr. of no fewer than 16 Hebrew or Hebraized terms in OT and 3 Greek ones in NT.

1. *מָלֵךְ*, lit. 'exalted one' from *מָלַךְ* 'lift up.' This word is practically confined (the only exceptions are Ex 22²⁷ (30) [J or E], 1 K 8¹ 11³⁴ [both R¹], and Pr 25¹⁵) to the writings of P, the Chronicler, and Ezekiel. It is used in Gn 17²⁰ (LXX *ἐθνῶν* 'nations') 25¹⁶ (*ἀρχόντες*) of the twelve 'princes' descended from Ishmael; in 23⁶ it is put by P in the mouth of the 'children of Heth' as a designation of Abraham (LXX *βασιλεῖς*); in 34² it is applied to Shechem the son of Hamor (*ἀρχων*; so, or *ἀρχοντες*, in the LXX of all the following passages, unless otherwise noted); in Nu 25¹⁸ of a prince of Midian; in Jos 13²¹ of the princes of Sihon. It is especially frequent for the heads of the Isr. tribes: Ex 16²²

34²¹, Lv 4²³ (AV and RV in these three passages 'rulers'), Nu 2⁵ 7²². 31¹³ etc., Jos 9¹⁶. 18. 19. 21 17⁴ 22¹⁴. 30. 32, so also 1 Ch 2¹⁰ 4³⁸ 5⁶ 7⁴⁰ etc., cf. Ex 22²⁷ (30) ('Thou shalt not revile God nor curse a ruler of thy people'), and 1 K 8¹ (A *ἐπημένοι*, prob. error for *ἐπημένοι*, Aq. s tr. of *מָלֵךְ* in Ex 22²⁸; B om.) = 2 Ch 5² (*ἀρχοντες*), where the princes of the fathers' houses of the children of Israel were assembled by Solomon. In 1 K 11²⁴ the term *nāsī'* is used of Solomon himself ('I will make him prince,' *מָלֵךְ אֶתְּכָם*, LXX *ἀντιπασόμενος ἀντιτάξομαι*), and in Ezr 1⁸ the Chronicler applies it to Sheshbazzar. In Ezk not only is it used of the king of Judah (12¹⁰. 13 21³⁰ [Eng. 25] [*ἀφ' ἡγουμένων*]), and of Isr. and foreign princes (7²⁷ 21¹⁷ [Eng. 12] [*ἀφ' ἡγουμένων*] 26¹⁶ 30¹³ 32²⁰ etc.), but *han-nāsī'* is the special designation of the head of the future ideal State (34²⁴ 37²⁰ [both *δ' ἀρχων*] 44³ [*δ' ἡγούμενος*] 45⁷. 16. 17. 22 46². 4. 8. 10. 12. 16. 17. 18 48²¹. 22 [all *δ' ἀφ' ἡγουμένων*]). For the later Talmudic use of *nāsī'* as the technical title for the president of the Sanhedrin see art. *SANHEDRIN*; Kuenen, *Gesamm. Abhandl.* [Budde's tr.] p. 58 f.; Schürer, *HJP* II. i. 180 ff.; Weber, *Jüd. Theologie*, p. 140. The title *nāsī'* was also assumed by Simeon bar-Cochba (the leader of the Jewish revolt A.D. 132), whose coins are stamped 'Simeon *nāsī'* of Israel' (see art. *MONEY* in vol. iii. p. 430^b, and Schürer, *HJP* I. ii. 299).

2. *שָׂר* occurs with extreme frequency. The verbal form *שָׂר* is found 4 times in Qal (Jg 9²², Is 32¹, Pr 8¹⁶, Est 1²), twice in Hithp. (Nu 16¹³ *בָּרָא*), and once in Hiph. (Hos 8⁴). In Jg 9²² and Hos 8⁴ it is pointed in MT as if from *שָׂר*, but see König, i. 328, 352. It is uncertain whether this is the primitive root = 'have power,' 'exercise rule,' or whether it is a denominative from *שָׂר*. Amongst other applications, *שָׂר* [in the following passages reproduced in LXX, unless otherwise noted, by *ἀρχων*] is used of officers or rulers whether military Ex 18²¹ (AV and RV 'rulers'), Nu 21¹⁸, Is 21⁵, 2 Ch 32²¹ || *רָמַי* (AV and RV 'captains'), or civil 1 Ch 27³¹ (*προστάται*, AV and RV 'rulers'), cf. 29⁸ etc., particularly of royal officials Gn 12¹⁵, 2 K 4¹³, Hos 3⁴, Ezr 8²⁰; of the chiefs of foreign nations Jg 7²² 8³ (Midian), 1 S 18³⁰ (Philistines); of leaders in war 1 S 22² (*ἡγούμενοι*, AV and RV 'captains'), cf. 2 S 24⁴ and Neh 2⁹ (*ἀρχηγοί*); of the 'ruler of the city' Jg 9³⁰, cf. 1 K 22²⁶ (*βασιλεῖς*, AV and RV 'governor'), Neh 7²; of the chief of the eunuchs Dn 1⁷. *שָׂר* (*ἀρχιευνοῦχος*); the chief of the butlers or bakers Gn 40². 30 (*ἀρχιουνοχός*, *ἀρχισιτισποιός*), etc.; the head of the priestly or Levitical classes Ezr 8²⁸ 10⁶, 1 Ch 15¹⁶. 22 etc.; the directors of the post-exilic community Neh 4¹⁰, cf. Ezr 9¹ 10¹⁴, Neh 11¹. With the sense of 'prince' proper, *שָׂר* is mainly post-exilic, Est 1⁴, Job 29⁹ (*ἀδρὸς*) || *מְלִיכִים*, Ps 119²³. 161; of the Messiah, 'the prince of peace' Is 9⁶ (A *ἀρχων εἰρήνης*, B follows a different text); of the guardian angels of the nations Dn 10¹³. 20. 21 12¹ (Theod. in all *ἀρχων*, LXX in first three *στρατηγός*, in last *ἀγγελός*); of God Dn 8¹¹ ('prince of the host,' *ἀρχιστράτηγος*) 25 ('prince of princes,' LXX follows a different text).

The noun 'princess' in EV always represents *מַלְכָּה* (cf. the proper name SARAH). Its only two occurrences in AV are 1 K 11³ (of the seven hundred wives of Solomon; LXX *ἀρχουσάι*), La 1⁴ (of Jerusalem 'princess among the provinces'; LXX *ἀρχουσα*). To these RV adds Est 1⁸ (AV 'ladies,' LXX *τυραννίδες*). There are only two other occurrences of *מַלְכָּה* in the Hebrew Bible. The one is Jg 5²⁹ *תְּקוּמַת שְׂרָתָה* (AV and RV 'her wise ladies,' Moore [cf. his note on the text], 'the sagest of her princesses'; LXX *ἀρχουσάι*); the other is Is 49²³ (AV and RV 'queens,' AVm 'princesses'; LXX *ἀρχουσάι*).

3. *נָגִיד*. The root meaning is probably 'one in front,' 'a leader.' This word is used in general of rulers or princes in Job 29¹⁰ (AV and RV 'nobles,' LXX wants this verse) 31³⁷ (LXX follows

a different text), Ps 76¹² (13) (δρχων), Pr 28¹⁶ (βασιλεύς). More particularly it is the designation of (a) *the king of Israel*: Saul 1 S 9¹⁶ 10¹ [the use of *ῥῆ* is peculiar to the earlier of the two narratives of Saul's election, ῥῆ 'king' being used in the other; the same distinction is observed in the LXX δρχων and βασιλεύς]; David 13¹⁴ (δρχων; in the following passages ἡγούμενος unless otherwise noted) 25³⁰, 2 S 5² (εἰσηγούμενος) 6³¹ 7⁵, 1 Ch 11² 17¹, 2 Ch 6⁸ [in all these passages relating to Saul and David, RV has 'prince,' AV has 'captain' in all except 1 S 25³⁰, 2 S 6³¹ 7⁵, 1 Ch 11² 17¹, 2 Ch 6⁸, where it has 'ruler'], Is 55⁴ (AV and RV 'leader,' RVM 'prince,' LXX δρχων); Solomon 1 K 1³⁵ (AV 'ruler'), 1 Ch 29²² (AV 'chief governor,' LXX βασιλεύς); Jeroboam 1 K 14⁷; Baasha 16⁷; Hezekiah 2 K 20⁸ (AV 'captain'); Abijah 2 Ch 11²² (AV 'ruler'); cf. the choice of Judah 1 Ch 28⁴ (AV 'ruler,' LXX ἐν τοῖς ἡγέταις τὸ βασιλεῖον).—(b) *A foreign ruler or prince*: the prince of Tyre Ezk 28² (δρχων); perhaps also 'the prince that shall come' Dn 9²⁶ (? Antiochus Epiphanes, see below; Theod. ὁ ἡγούμενος ὁ ἐρχόμενος, LXX βασιλεῖα ἐθνῶν).—(c) *A high temple official*: Pashhur Jer 20¹ (AV 'chief governor,' RV 'chief officer'); cf. 1 Ch 9¹¹, 2 Ch 31¹³ 35⁸ (AV and RV 'rulers'), LXX in last δρχοντες, Neh 11¹¹ (AV and RV 'ruler,' LXX ἀπέναντι οἰκοῦ τοῦ θεοῦ); the high priest Dn 11²² ('the prince of the covenant'), and perhaps 9²⁵, 26 (AV in v. 26 'the Messiah the prince,' RV 'the anointed one, the prince'; Theod. χριστὸς ἡγούμενος). The prince in v. 26 is frequently understood of Cyrus, and in v. 26 of Epiphanes, but Bevan argues in favour of understanding the reference in both instances to be to the high priest, the first being to Joshua the son of Jozadak (Ezr 3², Hag 1¹, Zec 3¹), and the second [reading *עַל הַמִּזְבֵּחַ* 'shall be destroyed with,' for *עַל הַמִּזְבֵּחַ* 'the people shall destroy'] to Jason, the brother and successor of Onias III.—(d) *A ruler in other capacities*. This use of the word is late: the 'ruler' of each tribe 1 Ch 27¹⁶, 2 Ch 19¹¹; the 'ruler' of the Korahites 1 Ch 12⁷; the 'leader' of an army division 1 Ch 13¹ 27⁴ (AV and RV 'ruler,' LXX δρχων), 2 Ch 11¹¹ ('captain' of a fortress) 32²¹ (in the Assyrian army; AV and RV 'leaders,' LXX δρχοντες); the 'ruler' over the temple treasures 1 Ch 26²⁴ (ὁ ἐπὶ τῶν θησαυρῶν), cf. 2 Ch 31¹² (ἐπιστάτης). In 2 Ch 28⁷ the 'house' (בֵּית) of which Azrikam was ruler (AV 'governor'), is probably the palace; cf. the familiar בֵּית מֶלֶךְ *Is* 22¹⁵ 36³, 1 K 4⁶, 2 K 15⁵ etc.

4. רָצִי, lit. 'willing,' e.g. לֵב רָצִי 'willing of heart' Ex 35²², 2 Ch 29²¹; רָצִי נִירָה 'a willing (AV and RV 'free') spirit' Ps 51¹⁴ (12); cf. the use of the verb רָצִי 'to volunteer' Jg 5², 2 Ch 17¹⁸, Neh 11², and the noun רָצִי 'freewill offering' Ex 35²² 36³, Ezr 1⁶ et al. Hence רָצִי may mean *generous or noble* in disposition: Pr 17⁹ (AV 'princes,' RV 'the noble,' || רָצִי), v. 7 (LXX δίκαιος; AV and RV 'a prince' is quite misleading, see Toy, *ad loc.*), Is 32⁸ (AV and RV 'the liberal'; opposed here, as in Pr 17⁷, to בָּזִי). The word is used of noble or princely rank in Nu 21¹⁸ (the Song of the Well; AV and RV 'the nobles,' LXX βασιλεῖς, || רָצִי 'princes,' δρχοντες. In the following passages, unless otherwise noted, δρχων is used by LXX to רָצִי), 1 S 2⁶ ('to make them sit with princes, μετὰ δυναστῶν λαόν), Job 12²¹=Ps 107⁴⁰ ('He poureth contempt upon princes') 21²⁸ ('Where is the house of the prince?') B οἶκος δρχοντος, but A οἶκος ἀρχαῖος) 34¹⁰, Ps 47¹⁰ (9) 83¹² (11) (AV and RV 'nobles') 113⁸ bis 118⁹ 146⁷, Pr 8¹⁶ (|| רָצִי, LXX μεγαλῶνες and τύραννοι respectively) 19⁶ (AV and RVM 'prince' seems preferable to RV 'liberal man'; LXX βασιλεῖς) 25⁷ (δυναστής), Ca 7¹ ('O prince's daughter,' B θύγατερ Ναδάβ, A θυγ. Ἀμινάδab).
5. רָצָה (Assyr. *nasiku*), from root נָצַח 'install' (cf.

Ps 2⁶ רָצָה לִּי מֶלֶךְ אֶרֶץ צִיּוֹן 'I have installed my king upon Zion'), occurs 4 times in OT: Jos 13²¹ 'the princes (AV 'dukes,' LXX δρχοντες [but the Gr. text is confused]) of Sihon'; Ezk 32³⁰ 'the princes (δρχοντες) of the north'; Mic 5⁴ (5) 'eight principal men' (מְלָכִים רִבְעָה, RVM 'princes among men,' LXX ἀρχαῖα ἀνθρώπων); Ps 83¹² (11) 'make their princes (|| רָצִי, see above; LXX δρχοντες) like Zebah and Zalmunna.' In Dn 11⁸ רָצָה, which is rendered in AV and RVM 'their princes,' is much more likely from another רָצָה, a by-form of רָצָה, and means 'their molten images' (so RV, *Oxf. Heb. Lex.* etc.; cf. LXX and Theod. τὰ χυμένα). We reach the same result by simply changing the Massoretic reading to רָצָה. See, further, Bevan, *ad loc.*

6. שַׂרְסָרָה (Ezr 8³⁶, Est 3¹² 8⁹) or שַׂרְסָרָה (Dn 3² 5²⁷ 6² 4⁵ 7⁶) is uniformly rendered by RV *satrap*s, while AV gives 'lieutenants' in the passages in Ezra and Esther, 'princes' in those in Daniel. See art. *LIEUTENANT*.

7. שָׂרֵפֶת in Ps 68³¹ (32) is rendered by both AV and RV 'princes.' The LXX has πρέσβεις 'ambassadors,' *Vulg. legati*; but all these renderings are purely conjectural, founded upon the context. Probably we ought, with Nestle (*JBL*, 1891, p. 152), to emend to שָׂרֵפֶת 'they shall come with oils or ointments' (so Duhm, *et al.*).

8. שָׂרֵפֶת is rendered 'princes' in AV of Job 12¹⁹, but there is no reason for departing from the usual meaning 'priests' (so RV, LXX ἱερεῖς).

9. שָׂרֵפֶת Is 41²⁶ 'he (Cyrus) shall come upon princes (RV 'rulers,' RVM 'deputies') as upon mortar.' The LXX has δρχοντες. *Sēgānim* (found only in the plural) is a loan-word from the Assyrian, where it appears as *šaknu* 'prefect' of a conquered city or province. For the other OT uses and the later meaning of *sēgānim* see art. *PRIESTS AND LEVITES*, p. 96^b.

10. שָׂרֵפֶת, a Persian loan-word, probably=*fratama*, 'first,' occurs 3 times: Dn 1³ 'certain of the children of Israel, even of the seed royal and of the nobles' (AV 'princes'; LXX ἐκ τῶν ἐπιλεκτῶν, Theod. B ἀπὸ τῶν φορδομειν, A . . . πορδομειν, Symm. and Pesh. tr. 'Parthians'); Est 1³ (AV and RV 'nobles,' || רָצִי; LXX ἐνδοξοί); 6⁸ 'one of the king's most noble princes' (רָצִי שָׂרֵפֶת רָצִי שָׂרֵפֶת, LXX ἐν τῶν φίλων τοῦ βασιλεως τῶν ἐνδόξων).

11. קָדִי (= Arab. *kādī*, from *kadā* 'to decide,' 'to pronounce a sentence') is a term used of both military and civil leaders: Jos 10²⁴ ('the chiefs of the men of war'), Jg 11⁶, 11 (of Jephthah), Pr 6⁷ (in a saying about the ant, joined with רָצִי and רָצִי), Is 10³⁸, 7 22⁵. The OT passages where it is tr. 'prince' in AV are: Pr 25¹⁵ 'By long forbearing is a prince (RV 'ruler,' RVM 'judge') persuaded' (LXX ἐν μακροθυμίᾳ εὐδοκία βασιλεῦσιν; there appears to be no sufficient reason for Toy's and Frankenberg's emendation of the last two words of the MT קָדִי קָדִי to קָדִי קָדִי; or קָדִי קָדִי: 'is anger [or an angry man] pacified'); Mic 3¹ 'ye princes (RV 'rulers') of the house of Israel' (LXX οἱ κατάλοιποι; in both verses || שָׂרֵפֶת 'heads'); Dn 11¹⁸ 'a prince (RVM 'captain') shall cause the reproach offered by him to cease.' The reference is to the Roman general Lucius Scipio who defeated Antiochus the Great at Magnesia, B.C. 190 (see Bevan, *ad loc.*). There is nothing in Theod. or the LXX text here corresponding to the word קָדִי.

12. 13. רָב, which is especially familiar as the first part of official titles like RAB-MAG, RAB-SARIS, RAB-SHAKEH (see the artt. on these names), is twice tr. 'prince' in AV: Jer 39¹³ 41¹ of the princes (RV 'chief officers') of the king of Babylon; LXX in the first passage [46⁷] ἡγούμενος, in the second the term is dropped. In Dn 4³³ (36) 51², 3 9 10 23 61¹⁷ the form רָבִי occurs. Both AV and RV render uniformly by 'lords' except in 52³ where AV has 'princes'; Theod. has μεγί-

στᾶτες in every instance, so LXX in 5²³ and 6¹⁸ (17), om. in the other passages.

14. 15. *ἡγ* (cf. the proper name REZON, 1 K 11²⁵) only Pr 14²⁵ 'in the want of people is the destruction of the prince' (LXX *δυναστεύς*); elsewhere *ἡγ*, namely Jg 5⁸ 'Give ear, O ye princes' (B *σατραπῆαι*, A adds *δυνατοί*), Ps 2² (*ἀρχόντες*, AV and RV 'rulers'), Pr 8¹⁵ (*δυνασταί*) 31⁴, Hab 1¹⁰ (*τύραννοι*), Is 40²⁵ (*ἀρχόντες*). In all these passages *ἡγ* or *ἡγ* is *ἡγ* 'king,' except in the last, where *ἡγ* is *ἡγ* 'judges of the earth.' Cf. Arab. *razin*, 'grave,' 'steady,' from *razuna*, 'to be heavy.'

16. *ἡγ* is once (Ezk 23¹⁵) tr. 'prince.' A better rendering would be 'officer' or 'captain.' The word, which means literally 'third' (cf. the LXX, but not in above passage, *τρίτῳ*), is usually explained to have denoted originally the man who, in addition to the driver, stood beside the king on his war-chariot, holding his shield or the like. But the adequacy of this as an explanation of the general usage of the term is questioned by Dillmann (on Ex 14⁷), Kraetzschmar ('Ezechiel' in Nowack's *Hdkomm.*), and others. Kraetzschmar prefers to make the meaning simply *third in military rank* (comparing the obsolete titles 'first lieutenant,' 'second lieutenant'), or to regard *shālīsh* as a loan-word. The term occurs frequently elsewhere in OT in the same sense (e.g. Ex 14⁷ 15⁴, 2 K 9²⁵ 10²⁵ 15²⁵, AV and RV always 'captain').

In the NT the terms rendered in AV 'prince' are 1. *ἀρχηγός*:—Ac 3¹⁵ 'ye killed the Prince (AVm and RVm 'Author') of life.' 'Author' appears to be the better rendering here (cf. He 2¹⁰ 'the author [AVm and RVm 'captain'] of their salvation'). The only other instance where *ἀρχηγός* is tr. 'prince' (AV and RV) is Ac 5³¹ 'Him did God exalt with his right hand to be a Prince and a Saviour.' The Gr. term occurs once more in NT, namely in He 12² 'Jesus the author (AVm 'beginner,' RVm 'captain') and finisher (RV 'perfecter') of our faith,' where the meaning is probably 'leader' or 'antesignanus.' 2. *ἀρχων*: Mt 9³⁴ 12²⁴, Mk 3²² (Beelzebub) 'the prince of the demons'; Mt 20²⁵ 'the princes of the Gentiles,' cf. 1 Co 2⁸ 'the princes of this world' (*οἱ ἀρχόντες τοῦ αἰῶνος τούτου*); Jn 12³¹ 14³⁰ 16¹¹ 'the prince of this world' (*ὁ ἀρχων τοῦ κόσμου τούτου*); Eph 2² 'the prince of the power of the air' (*ὁ ἀρχων τῆς ἐξουσίας τοῦ ἀέρος*); on this expression see art. SATAN; Rev 1⁵ 'the Prince of the kings of the earth' (*ὁ ἀρχων τῶν βασιλέων τῆς γῆς*), probably a reminiscence of Ps 89 (88)²⁷. 3. *ἡγεμών* is tr. 'prince' only in Mt 2² 'thou art not the least among the princes of Judah.' On the surprising variations between St. Matthew's quotation and the original passage Mic 5⁴, and the possible explanation of these, see art. QUOTATIONS, i. D. J. A. SELBIE.

PRINCESS.—See PRINCE, No. 2, *ad fin.*

PRINCIPALITY.—In Jer 13¹⁸ *נִשְׁכָּרְתָּ* (from *שָׂרָא* the head) is tr. 'principalities,' apparently in the sense of privilege, pre-eminence, as in Jer. Taylor, *Worthy Communicant*, i. 83, 'If any mystery, rite, or sacrament be effective of any spiritual blessings, then this is much more, as having the prerogative and illustrious principality above everything else.' This is better than the tr. 'from your head' or 'from your heads' of the previous versions (Vulg. *de capite vestro*, LXX *ἀπὸ κεφαλῆς ὑμῶν*); but the meaning is evidently, as in AVm and RV, 'head-tires.'

In 2 Mac 4²⁷ 5⁷ the high priesthood is called the 'principalty,' i.e. principal office or supreme power (*ἀρχή*). Cf. Milton, *Reform*, ii. 'The Bishops of Rome and Alexandria, who beyond their Priestly bounds now long agoe had stept into principality.'

For the 'principalities' (*ἀρχαί*) of Ro 8³⁸, Eph 1²¹ (*ἀρχή*, RV 'rule') 3¹⁰ 6¹², Col 2¹⁰, Tit 3¹ (RV 'rulers'), see DOMINION in vol. i. p. 616^b.

J. HASTINGS.

PRINCIPLE.—See ELEMENT in vol. i. p. 682^a.

PRISCA or PRISCILLA (Πρίσκα, Πρίσκιλλα).—The wife of AQUILA. The name is Latin, Priscilla being the diminutive form. In the three places in Acts where the word is used (18², 18²⁶), the form is always Priscilla; in the three places in St. Paul's Epistles (Ro 16³, 1 Co 16¹⁹, 2 Ti 4¹⁹) it is in the best MSS always Prisca. In Ac 18¹⁸, Ro 16³, 2 Ti 4¹⁹ the wife's name appears first, in the other two places the husband's.

There is some variation in the MSS and VSS. In Ac 18²⁶ *ΚΑΒΕ* vulg. boh. read Πρίσκιλλα καὶ Ἀκύλας; DHLP, etc., *gig*, *syrr*, *mh*, read Ἀκ. καὶ Πρ. In Ro 16³ and 2 Ti 4¹⁹ the evidence for Πρίσκα is preponderating; in 1 Co 16¹⁹ Πρίσκα is read by *MBMP* vulg. codd., boh. arm.; Πρίσκιλλα by ACDEFGKL and most later MSS, vulg. codd., *syrr*, Chrys., Thdr., Dam. and TR; the former reading is undoubtedly right. In 2 Ti 4¹⁹ there is a curious addition after Ἀκύλας in 46, 109, and 100 lat. *Λίπτεται (sic) τῇ γυναίκα αὐτοῦ καὶ Σήμερον (sic) καὶ Ζήνηα τοῖς υἱοῖς αὐτοῦ*.

The variations in the text of Ac 18²⁷ have been examined very carefully by Harnack, who shows that the longer text (usually called the Western, or by Blass *β*) is clearly formed out of the shorter, and suggests that it has been modified by an interpolator who objected to the too great prominence given to a woman, and has made the position of Priscilla less prominent. With his conclusion we may compare the remarks of Ramsay (*Church in the Roman Empire*, p. 101) on the omission of Damaris in the Western text, Ac 17³⁴.

Prisca is always mentioned with her husband. He is described as a Jew of Pontus, and a tent-maker. St. Paul is associated with them first at Corinth, whither they had retired after the decree expelling the Jews from Rome. After remaining there about eighteen months, they went with St. Paul to Ephesus, and remained there while he went on to Jerusalem. At Ephesus they were concerned in the instruction of Apollos, and seem to have remained throughout St. Paul's residence, their house being used for Christian meetings. Later, probably in consequence of the uproar in the theatre, when there seem to have been considerable riots, they returned to Rome, where again their house was used for Christian worship; and ultimately we again find them at Ephesus. These numerous changes between Rome, Ephesus, and Corinth have caused difficulty to critics, who have for this and other causes suggested that Ro 16 was really addressed to Ephesus. A sufficient explanation is, however, afforded by the nomadic character of the Jewish world in general, of Aquila and Priscilla in particular, and by their occupation as Christian missionaries interested in the spread and support of the Christian Churches. They were evidently persons of prominence in the early Christian community. St. Paul speaks of them with affection, and says that they had endangered their lives for his sake (Ro 16⁴).

The above is all that we learn from the New Testament, but the traditions of the Roman Church, where the name Prisca was of considerable importance, suggest the possibility of some interesting discoveries being made. The name occurs in two connexions.

(1) There is a church on the Aventine bearing the name of St. Prisca which gives a title to one of the Roman cardinals. This church bore the name of the *Titulus Aquilae et Priscæ* from the 4th to the 8th cent. (*Liber Pontificalis*, ed. Duchesne, i. 501, 517^{ab}); later, under Leo III. (795-816), it is called the *Titulus Aquilae et Priscæ* (*ib.* ii. 20). There are legendary *Acts of St. Prisca*, dating from the 10th cent., in which it is stated that the body of St. Prisca was translated from the place on the Ostian Way where she had been buried and transferred to the Church of St. Aquila and Prisca on

the Aventine (*Acta Sanctorum*, Jan. ii. p. 187). An inscription of the 10th cent. (*C. Ins. Christ.* ii. p. 443) also calls it *domus Aquilae seu Prisciae*.

(2) In the legendary account of Pudens, Pudenziana, and Praxedis, Priscilla is stated to have been the mother of Pudens (*Acta Sanct.* May, iv. 295).

(3) One of the oldest of the catacombs of Rome is the *Cimiterium Priscillae*, outside the *Porta Salaria*, and there seems to be some evidence to connect the name Prisca with the Acilian gens, members of which were buried there.

Now it has been noticed that the name Prisca in four out of six places is mentioned before that of her husband. Hort, following out this point, suggests that she was a member of a distinguished Roman family who had married a Jew. This would account both for the prominence given to her, and the connexion of the name with one of the oldest cemeteries. A more plausible suggestion is that both Prisca and Aquila were freedmen of the Acilian or some other gens; that through them Christianity had reached a distinguished Roman family, whose name they had taken, and that this accounted for the prominence of the name Prisca in the early Church. More discovery and investigation are needed, but the point of interest is that the name Prisca in some way or other occupied a prominent position in the Rom. Church.

An interesting suggestion, which has the merit of novelty, has been made by Professor Harnack, that in Priscilla and Aquila we have the authors of the Epistle to the Hebrews. Prisca and Aquila were, we know, teachers of prominence who had turned Apollos to Christianity; they belonged to the intimate circle of St. Paul's friends; they were close friends of Timothy, and personally received St. Paul. They had for some time been connected with a small Christian community in Rome, and the Epistle to the Hebrews was clearly, he argues, written to Rome, and not to the Church as a whole, but to a small circle within the Church. They were with Italian connections, but living outside Italy. In the Epistle there is a curious interchange of 'We' and 'I.' Lastly, the authorship of Priscilla will explain why the writing is now anonymous. The Church of the 2nd cent. objected very strongly to the prominent position of women in the Apostolic age. This had caused the gradual modification of various passages in the Acts, and the desire to separate this work from the name of Priscilla. The whole argument is as ingenious as Professor Harnack always is, but it does not succeed in being quite convincing.

LITERATURE.—De Rossi, *Bull. Arch. Christ.* Ser. i. No. 5 (1867), p. 45 ff.; Ser. iv. No. 6 (1888-89), p. 129; Duchesne, *Liber Pontificalis*; Hort, *Rom. and Eph.* pp. 12-14; Plumptre, *Biblical Studies*, p. 417; Sanday-Headlam, *Romans*, pp. xxvii, 418 ff.; Ramsay, *St. Paul the Traveller*, 268 f.; Harnack, *Sitzungsberichte der K. Preussischen Akademie der Wissenschaften*, 1900, i., and *Zeitschrift für die neutestamentliche Wissenschaft und die Kunde des Urchristentums*, 1900, p. 10.

A. C. HEADLAM.

PRISON.—Joseph was imprisoned in an Egyptian prison (עֲבָדָה, perhaps 'house of enclosure,' i.e. walled, or 'fortress,' cf. cognate Syriac סְרַח 'palace,' and Targumic סְרַח 'to go round,' 'surround'; δχύρωμα, δεσμοσθήριον; *carcer, custodia*, Gn 39²⁰⁻²³ 40² [JE]; also בֵּית 'pit,' EV 'dungeon'; λάκος, δχύρωμα; *lacus, carcer*, Gn 40¹⁵ 41¹⁴ [JE]; in 40², עֲבָדָה, בֵּית 'house of the captain of the executioners,' i.e. the guard). 'Fortress' suggests the use, always common, of fortresses as prisons; 'house of the captain of the guard' suggests that the care of prisoners was one of the duties of that official. Ebers, *Aegypten*, p. 317 ff., identifies this 'fortress' with that at Memphis, mentioned in inscriptions as the 'White Wall'; see, further, art. JOSEPH in vol. ii. p. 768, note II. In Egypt, in addition to the royal prisons, the great temples had prisons of their own (Erman, *Life*, etc. p. 304). Imprisonment is mentioned as a penalty; and the great gold and other mines of Ethiopia and Sinai, which were worked by convicts and captives under conditions of barbarous cruelty, were really vast prisons (Maspero, *Dawn*, etc. 337). Joseph's brethren are said (Gn 42¹⁷⁻¹⁹) to have been kept in custody, עֲבָדָה, φυλακή.

Samson was imprisoned by the Philistines in a

סְרַחָה נִזְּ (Kt. סְרַחָה) 'house of those who are bound,' οἶκος τοῦ δεσμοσθηρίου, *carcer*, Jg 16²¹⁻²³. The terms עֲבָדָה (נִזְּ), עֲבָדָה, עֲבָדָה 'house of confinement,' φυλακή, are used of the places of imprisonment of Micaiah, 1 K 22²⁷; Hoshea (in Assyria), 2 K 17⁴; Jehoiachin (in Babylon), 2 K 25²⁷; and Jeremiah, Jer 37⁴⁻¹⁸ etc.; also in Is 42⁷⁻²². Jeremiah's place of confinement is also called עֲבָדָה 'place of guard,' φυλακή, *carcer*; and נִזְּ נִזְּ, 37¹⁸=סְרַחָה נִזְּ (see above, Samson). In 2 Ch 16¹⁰, Jer 29²⁸, עֲבָדָה (AV 'prison,' φυλακή), etc., should be 'stocks.' Zedekiah was imprisoned at Babylon in a עֲבָדָה נִזְּ 'house of inspection,' οἶκος μύλωνος, *domo carceris*, Jer 52¹¹. Other terms used are עֲבָדָה 'enclosure,' δχύρωμα, φυλακή, etc. *carcer*, Ps 142⁷, Is 24²² 42⁷; γῆ, rather 'oppression,' Is 53⁸; עֲבָדָה='ward, custody,' Gn 42¹⁹. 'Prison' is supplied in Is 61¹. The case of Samson suggests buildings like the Roman *ergastulum*, in which malefactors and slaves were confined and kept at work. Jeremiah's prison was at one time part of the palace, 32², cf. 37²¹, 1 K 22²⁷, Neh 3²⁵, 2 K 25²⁷; at another a private house, Jer 37¹⁸. As עֲבָדָה in Jer 32²= 'guardhouse,' it seems that the care of prisoners was one of the duties of the body-guard, and that the prisoners were confined in rooms attached to their quarters. The 'pit' (נִזְּ, Jer 38⁶⁻¹¹, cf. Gn 37²⁴) may have been an empty cistern, or possibly an oubliette.

Our available evidence points to places of confinement being parts of palaces, temples, fortresses, etc., rather than special buildings set apart for the purpose. For the crimes punished by confinement, and the conditions and treatment of prisoners, see CRIMES AND PUNISHMENTS in vol. i. p. 525, s. 'Imprisonment.'

In NT, John the Baptist (Mt 14³ etc.), Peter (Ac 5¹⁹ etc.), Paul and Silas (16²³ etc.), and others were confined in a φυλακή 'prison, place of guarding'; John (Mt 11²), Paul, etc. (Ac 16²³) in a δεσμοσθήριον 'prison,' 'place of bonds.' The apostles (Ac 5²¹⁻²³) were confined in the δεσμοσθήριον, also τήρησις (5¹⁸) 'place of keeping.' In Ac 12² οἶκημα 'house,' is τῆς 'prison.' According to Jos. (*Ant.* XVIII. v. 2), John was imprisoned at the royal fortress of Machærus. The prison at Jerusalem mentioned in Ac 5 was under the control of the priests, and probably attached to the temple or the high priest's palace. Paul was imprisoned in the fort Antonia (Ac 23¹⁰) at Jerusalem, in the Prætorium (or Palace) of Herod at Cæsarea (Ac 23³⁵). At Rome he was allowed to live in his 'own hired house' (Ac 28³⁰), doubtless in charge of a soldier. Before his trial, however, he may have been transferred to prison, perhaps the *carcer* specially so called (named in mediæval times *Mamertinus*), and consisting of a larger oblong upper storey and a smaller circular underground dungeon—the *Tullianum*. This *carcer* may have been Paul's place of confinement in his second imprisonment. Cf. 'Carcer' in Smith's *Dict. of Class. Antiquities*.

On 'the spirits in prison' of 1 P 3¹⁹ see vol. i. p. 754 and vol. iii. p. 795. W. H. BENNETT.

PRIVY, PRIVILEY.—These words, which came into the Eng. language through the Old Fr. *prive*, have now been displaced (except in some compounds) by 'private,' 'privately,' which were taken direct from the Lat. *privatus*, and which are also found in AV. Cf. Mk 4² Tind. 'There is nothing so prevy that shall not be opened' (AV 'nothing hid which shall not be manifested'); Jn 7¹⁰ Tind. 'Then went he also up unto the feast; not openly, but as it were prevely' (AV 'in secret'); Erasmus, *Exposition of the Crede*, 'By the spirite he doth understand and meane privye or secrete grace of faythe'; More, *Utopia*, 43, 'Howe should a man, that in no parte of his apparell is like other men, flye prevelie and unknown?'

To be privy to a thing (1 K 24, Ac 5³) is simply to have a knowledge of it. Cf. Calderwood, *History of the Church of Scotland*, 140, 'Argile came to St. Andrews the day following, privie, as appeared, to the purpose'; *Bishops' Bible*, Ps 19¹¹ 'Who can knowe his owne errors? Oh clense thou me from those that I am not privie of'; Spenser, *Shep. Cal.* viii. 153—

'Ye carelesse byrds are privie to my cries.'

J. HASTINGS.

PROCHORUS (Πρόχορος).—One of the 'seven' appointed, Ac 6⁵. Later tradition made him bishop of Nicomedia, and a martyr at Antioch. He was commemorated by the Latins on April 9, by the Greeks on July 28. See Baronius, i. *ad ann.* 44; *Acta Sanctorum*, Ap., i. 818. There is published in *Magna Bibliotheca Patrum*, Colon. Agr. 1618, i. 49–69, a spurious *Historia Prochori, Christi Discipuli, de vita B. Ioannis Apostoli*.

A. C. HEADLAM.

PROCONSUL (Lat. *proconsul*; Gr. ἀνθύνατος).—The technical term for the governor of a senatorial province, used Ac 13⁷.⁸,¹² of Sergius Paulus in Cyprus; 18¹² of Gallio at Corinth; 19³⁸ of the governors of Asia. Some little difficulty has been felt by the use of the plural in the last case, but it quite normally expresses what is habitual: 'If any man has a definite charge, there are law courts and judges,' as we should say. The proconsuls were of two classes—those who were ex-consuls, viz. the rulers of Asia and Africa, who were therefore correctly (according to republican usage) proconsuls, and those who were only ex-prætors. For fuller details see under PROVINCE.

A. C. HEADLAM.

PROCURATOR.—The technical term to describe the office held by Pontius Pilate and the other governors of Judea. The word means originally a bailiff or steward; under the empire it was used for the imperial officials, sometimes of equestrian rank, sometimes only freedmen, who were appointed in the provinces to collect the imperial revenue or *fiscus*. In imperial provinces they managed the whole of the revenue; in senatorial provinces, where there were quæstors, only that part which belonged to the emperor. Even in senatorial provinces their authority had a tendency gradually to increase, and they obtained judicial powers in revenue cases; but in addition to that there were certain provinces which were governed directly by a procurator, who possessed all the powers of an ordinary governor. The provinces so governed were usually those in a transitional state—provinces which had not been thoroughly romanized, and were passing from the rule of one of the *reges socii* to the conditions of a province. The following provinces were governed in this way (at any rate at certain periods):—Mauritania, Rætia, Noricum, Thrace, Cappadocia, the Maritime Alps, the Alps of Savoy, and Judæa. These provinces, governed by procurators, were in some sense subordinate to the governor of the neighbouring province: for instance, Cappadocia was subordinate to Galatia, and Judæa to Syria. With this limitation, the procurator had the full power of the governor. He commanded such troops as were within his province, he held the power of life and death, and full judicial, administrative, and financial authority.

The technical term in connexion with Judæa is given in Tacitus, *Annal.* xv. 44: *Christus Tiberio imperitante per procuratorem Pontium Pilatum supplicio adfectus est*. The proper Greek translation would be ἐπίτροπος, but in the NT we find the vaguer term ἡγεμὼν, which might include rulers of other categories (Mt 27². 11. 14. 15. 21. 27 28¹⁴, Lk 3¹ 20²⁰, Ac 23²⁴. 26. 33 24¹. 10 26³⁰). In Josephus we find both ἐπίτροπος and ἡγεμὼν.

A. C. HEADLAM.

PROFANE.—The Eng. word comes from Lat. *profanus* (through Fr. *profane*), which is taken to be *pro* 'before' and *fanum* 'the temple,' hence outside the temple limits,* outside the limits of that which is holy, unholy, secular.†

The incorrect spelling *prophane* became common in the 16th cent., and is the spelling in the 1611 ed. of AV everywhere except Ezk 23²⁸. 29, 1 Mac 3²¹, 2 Mac 6⁵, Ac 24⁶.

The Heb. word so tr^d in AV is לָמַד to pollute, with its derivatives לָמָד pollution, and לָמָד (adj.) polluted. Once also (Jer 23¹¹) the verb לָמַד, and once (Jer 23¹²) its deriv. לָמָד are tr^d '[is] profane' and 'profaneness.' AVm gives 'hypocrisy' in the second passage, Amer. RV prefers 'ungodliness.' In Greek, the verb is βεβήλω and the adj. βεβήλος. The subst. βεβήλωσις is thrice (Jth 4³. 12, 1 Mac 1⁴³) tr^d 'profanation.' The ptep. ἀποδυσταλμένος is also tr^d 'profane' in 2 Mac 6⁵ (RV 'abominable'). In 2 Mac 4¹³ the subst. tr^d 'profaneness' is ἀναγνεια. Finally in 2 Es we find the vb. *profanare* tr^d 'to profane' (10²²), and the adv. *irreligiose* tr^d 'profanely' (15⁶). See UNCLEAN, UNCLEANNESS.

J. HASTINGS.

PROFESS, PROFESSION.—The verb to 'profess' and the subst. 'profession' have acquired a narrow 'professional' meaning; in AV they still have the sense of 'speak out,' 'declare openly' (from *profiteri*, ptep. *professus*). Thus Dt 26³ 'I profess this day unto the Lord thy God, that I am come unto the country which the Lord swore unto our fathers for to give us' ('אָמַרְתִּי); Mt 7²³ 'And then will I profess unto them, I never knew you' (ὁμολογήσω αὐτοῖς); 1 Ti 6¹³ 'Thou hast professed a good profession before many witnesses' (ὁμολόγησας τὴν καλὴν ὁμολογίαν, RV 'didst confess the good confession'); He 3¹ 'Consider the Apostle and High Priest of our profession' (τῆς ὁμολογίας ἡμῶν, RV 'of our confession,' that is, says Rendall, 'whom our Christian confession of faith acknowledges in this character').

J. HASTINGS.

PROGNOSTICATOR.—In Is 47¹³ the 'monthly prognosticators' (מְחַנְנֵי הַיָּרֵחַ, AVm 'that give knowledge concerning the months') are mentioned along with the 'astrologers' and the 'star-gazers' as unable to help Babylon in her hour of need. The meaning of מְחַנְנֵי is probably 'at (the) new moons,' the reference being to the forecasts which it was usual to make at that season of what was likely to happen during the coming month. The lucky and unlucky days of each month were duly noted in the Assyrian and Babylonian calendars, and reports were given in monthly by the official astronomers and astrologers (cf. Sayce in *TSBA* iii. p. 229, and see also art. *ASTROLOGY* in vol. i. p. 194^a). The LXX has nothing answering to 'monthly prognosticators,' the text reading in such a way that the 'astrologers' are called on to stand forth and save their votaries, and the 'star-gazers' are challenged to make known (ἀναγγεῖλάτωσαν, representing somehow מְחַנְנֵי) what is going to happen.

J. A. SELBIE.

PROLOGUE.—The Book of Sirach opens with a preface by the author's grandson, which bears in BA the title πρόλογος (C πρ. Σιράχ, & om.). For its contents see art. *SIRACH*. The opening verses of the Fourth Gospel are also frequently called the Prologue to that Gospel. See JOHN (GOSPEL OF).

PROMISE.—The word 'promise' is used in Scripture with the same latitude as in language generally, but the present art. takes account only of

* Cf. Ezk 42²⁰ 'to make a separation between the sanctuary and the profane place.'

† Cf. Tymme's tr. of Calvin's *Genesis*, on 47 'When Jacob is said to bless the king, Moses thereby meaneth not a common and prophane salutation, but a godlie and holie prayer of the servant of God.'

the technical or semi-technical sense of it which comes into view when we read of 'the promise' without any qualification. God is the author of the promise, and it is spontaneously put forth on His part; this is what is signified by *ἐπαγγελῆσθαι* as opposed to *ὁρκισθῆναι*, the latter signifying *to come under an obligation, as part of a contract*. The promise was originally given to Abraham; and though, in its largest scope, it covers the whole future guaranteed to him by God, it is defined at different times in different ways. Sometimes the thing promised is the possession of a country—Canaan is 'the land of the promise' (He 11⁹); sometimes it is the birth of a son or of a numerous posterity, a seed like the stars of heaven or the dust of the earth (Gn 13¹⁶ 15⁶)—Isaac is the first of 'the children of the promise' (Ro 9⁸); more generally it is a divinely-secured greatness and felicity so conspicuous that all nations will make it a standard of congratulation (Gn 12²). The OT, though the promises of God may be said to be the contents of His covenant (so that St. Paul speaks of 'the covenants of the promise,' Eph 2¹²), does not make much use of this category to interpret the experience of Israel. The future of the nation does depend on God, but it is seldom related to His 'promise' in the technical sense with which we are here concerned. There is an approach to the general idea in Jer 29¹¹ 'I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you a future and a hope.' This conception of some good unrealized, but to be realized through faith in the sure word of God, is what is meant by the promise. But there is a nearer approach still to the technical sense in Ps 105⁴² 'He remembered his holy word, and Abraham his servant.' The whole future of Israel, all the deliverances wrought for it, are here conceived as bound up in something which God said to Abraham; the history of the nation is the revelation of what was involved in the primitive promise, and not only its revelation but its fulfilment. It is a witness to God's faithfulness to His word.

It is at this point that the NT takes up the idea. We see in the *Magnificat* and in the *Benedictus* how pious souls in Israel were preoccupied with it: 'He hath holpen Israel his servant that he might remember mercy (as he spake unto our fathers) toward Abraham and his seed for ever' (Lk 1⁵⁴, cf. v. 72 'the oath which he swore unto Abraham our father,' etc.). In NT times, however, the significance of the promise was determined *ex eventu*; it had been at last fulfilled in Christ, and it was by looking at Christ that men discovered what it meant. 'For how many soever are the promises of God [the separate blessings into which the one all-embracing *ἐπαγγελία* can be resolved] in him is the Yea,' that is, the Divine confirmation and fulfilment of them all (2 Co 1²⁰). The substance of NT teaching on this subject can be arranged under these heads: (1) the contents of the promise; (2) the heirs of it; (3) the conditions of its fulfilment.

(1) The contents of the promise are always related to Christ, but they are defined in various ways under the influence of various OT ideas. Sometimes the original idea of a 'country of our own' reappears, a land in which we shall not be strangers and pilgrims as on earth, 'a city with foundations,' rather 'the city with the foundations,' a rest like the Sabbath rest of God, into which we may enter after we have traversed the wilderness, an eternal inheritance. This may be said to be the aspect of the promise which pervades the Epistle to the Hebrews. See He 11⁹⁻¹⁶ 4¹ 9¹². In the preaching of St. Peter, as we find it in the early chapters of Acts, it is the Risen Jesus, made by God 'both Lord and Christ,' in whom the promise

has been fulfilled, and its contents may be said to be mainly the two divinely-bestowed possessions of the Christian Church—the forgiveness of sins and the gift of the Holy Ghost. The latter is specially spoken of as 'the promise of the Father' (Lk 24⁴⁹, Ac 1⁴); Jesus has received from the Father 'the promise of the Spirit' (Ac 2³³), and it is with this in view that St. Peter says, 'the promise is unto you and your children' (2³⁹). There is no doubt here a reference to the fact that Jesus had promised to send the Spirit to His disciples; but the last passage quoted shows how this special promise of Jesus coalesced in the apostle's mind with the great Messianic promises in which the future of Israel was assured.—When we pass to St. Paul we find at first a general conception of the same character. The promise made to the fathers God has fulfilled in all its import (*ἐκπεπλήρωκεν*, Ac 13²⁵) by raising up Jesus—the raising up having reference either to the bringing of Jesus on to the stage of history, or to the Resurrection; in either case it is 'according to promise' that God has 'brought to Israel the Saviour Jesus' (Ac 13²³). At a much later date, as he stands before Agrippa, St. Paul can represent himself as involved in such troubles 'for the hope of the promise made by God to our fathers' (Ac 26⁶, cf. 28²⁰ 'for the hope of Israel I am bound with this chain'). The hope of Israel, all that God has promised to do for it, is in these passages regarded as bound up in the Risen and Exalted Jesus. What the content of that hope is, it would require an exposition of all the apostle's theology to show; for Christ and the promise are practically synonymous terms. All that is in Christ is meant by the promise; all the promises of God are summed up in Christ. Special aspects of this are set in relief by St. Paul as by other NT writers. Thus he speaks of Christians as sealed with the Holy Spirit of the promise (Eph 1¹³), and as receiving the promise of the Spirit through faith (Gal 3¹⁴). The gift of the Spirit has something of promise in it; it is the earnest of a heavenly inheritance, an inheritance with the saints in the light (Eph 1¹⁴, Col 1¹²); as the spirit of sonship it is the assurance that we are joint heirs with Christ, and shall yet be conformed to the image of God's exalted Son (Ro 8¹⁵⁻¹⁷), and have an entrance into that kingdom of God which for St. Paul is always a transcendent and glorious mode of being. In Gal 3 'the promise of the Spirit,' or the Spirit as the essential blessing of the promise, has its peculiar value in this, that it is the principle of a new life and righteousness to which sinful men could never attain on any other terms.—Other references to the promise in the NT are more dubious, though Tit 1² Ja 1¹² 2⁵ (the crown of life, the kingdom which God hath promised to them that love Him) are in the line of that conception of the promise which was common to St. Paul with all primitive Christians. On the other hand, a distinctively Johannine thought has availed itself of this mode of expression in 1 Jn 2²⁵.

(2) The second question concerns the *heirs* of the promise: to whom is it given? It was given at first to Abraham, or to Abraham and his seed. Isaac and Jacob were 'heirs with him of the same promise' (He 11⁹). It might seem as if 'the seed of Abraham' were an expression not capable of two interpretations, and yet the proper interpretation of it was the great subject of controversy in the primitive Church. Even when the promise was seen to be fulfilled in Jesus, it seemed obvious to say that it was fulfilled to Israel—that Israel alone had a part in it. Even St. Paul can say that Jesus Christ was a minister of the circumcision, on behalf of the truth of God, to confirm the promises of the fathers, i.e. belonging to the fathers, because made to them (Ro 15⁸). In enumer-

ating the prerogatives of Israel, he says frankly, 'to whom belong the promises' (Ro 9^a). In describing the pre-Christian condition of a Gentile Church he says its members had been 'strangers to the covenants of the promise,' and therefore without hope. No pagan people had that kind of assurance as to its own future which pious Israelites derived from the word of God, and hence the pessimism with which paganism generally contemplated the issues of human existence. It was the work of St. Paul to show that the promise was not subject to physical or historical limitations, and that no physical or historical accident, such as Jewish birth or upbringing, could give one a claim as of right against God for its fulfilment. The chief passages in which he deals with the problem are Gal 3 and Ro 9-11. In the former he discusses rather the conditions on which the promise is inherited, to which we shall refer below, and comes to the conclusion that all who are Christ's by faith are Abraham's seed, the Israel of God, and heirs according to promise. In the latter he is confronted with the fact that the promise—to judge by the results of his own preaching—is not being fulfilled to those to whom it belongs, and is being fulfilled (according to him) to those to whom it does not belong. What strikes one most in this extraordinary passage is the extent to which St. Paul's heart is on the side of those against whom he argues. Thus, after proving in ch. 9 that no man can claim unconditionally that God shall fulfil the promise to him, and in ch. 10 that the Jews, by persistent disobedience, have forfeited all title to be counted God's people and the heirs of His promise, he falls back in ch. 11 on the abstract theological principle that the gifts and calling of God are without repentance. It is as if he said—After all, there is no denying that Israel is God's people. God has given them the promise, and He cannot deny Himself. In spite of all their unbelief they are beloved for the fathers' sakes; God will remember His oath to Abraham, and 'so all Israel shall be saved.' Such faith may well seem bewildering to Gentiles who calmly assume that the promise is their own *ab initio*, and ignore even the historic prerogative of the Jew. But to the last the Jew was to St. Paul the root, the first-fruits; and the Gentiles were only *συμμέτοχα τῆς ἐπαγγελίας* (Eph 3^a), not its original and proper heirs.—In later NT writings the echoes of this conflict die away, and the scope of the promise is universalized as instinctively as Christ is felt to be Lord of all. 'The promise,' in short, is a historically conditioned way of conceiving the grace of God, and once the critical stage had been passed—as it was in St. Paul's lifetime—the discussions as to its range lost interest. Men could question who were the true heirs of the promise, but not under the same forms who were the objects of the redeeming love of God in Christ.

(3) The conditions on which the promise are fulfilled are discussed in various connexions. As already remarked, the very idea of *ἐπαγγελία* is spontaneity on the part of the promiser. The promise is of grace. In Ro 4 and Gal 3 St. Paul labours to show that it is subject to no control on the part of law, or of works of law. In Galatians he gives a historical proof of this. The promise was given to Abraham, and to his faith, 430 years before the law was heard of; and this late intrusion of law, whatever it may mean, cannot mean that we must *earn* the fulfilment of the promise; if this were the case it would be an *ἐπαγγελία*—a free spontaneous motion on the part of God—no more. In Ro 4 the proof is rather speculative or experimental than historical. Certain ideas and experiences hang together, and certain others do not. Promise, grace, and faith are parts of one whole; wages, debt, and works

are parts of another whole; but these two wholes, and the parts of them, exclude each other. Hence the promise, in all the fulness of its content, explained above, is fulfilled, not to works of law, not to merit, but to faith in Jesus Christ. All that God holds out to us becomes ours as in faith we attach ourselves to Him. Where the blessings of salvation are presented as 'promise,' there is always, of course, the suggestion that they are not yet realized, and hence faith (when this conception is prominent, as in the Epistle to the Hebrews) assumes some of the characteristics of hope and of patience. We read of those who 'through faith and patience' inherit the promises; we have 'need of patience' that after 'having done the will of God' we may receive the promise (He 6¹³ 10³⁶). It is part of the heroism of faith that having God's promise to go upon it can maintain a strong conviction as to the things it hopes for, and give reality to things unseen (He 11¹). It is the mark of an evil time that scoffers ask, in regard to the one great promise of the NT, *ποῦ ἐστὶν ἡ ἐπαγγελία τῆς παρουσίας αὐτοῦ*, 2 P 3^a. J. DENNEY.

PROPER.—Like the Lat. *proprium*, from which it is derived through the Fr. *propre*, 'proper' means *one's own*. Thus Udall, *Erasmus' Paraphrase*, i. 77, 'Onely God chaungeth the myndes and heartes of riche men, that they will cherefully eyther cast awaie that which they doe possesse, or els possesse them as common and not proper'; Tindale, *Expositions*, 124, 'Forsooth I have no goods, nor anything proper, or that is mine own; it is the convent's'; Rhem. NT, note on Mt 9^b 'The faithlesse Jewes thought (as Heretikes now a daies) that to forgeve sinnes was so proper to God, that it could not be communicated unto man'; and especially Adams, *Works*, i. 60, 'Salvation is common, as St Jude speaketh, ver. 3, "When I gave all diligence to write unto you of the common salvation"; but few make it proper to themselves: that God is *my* salvation and *thy* salvation, this is the comfort.' This meaning occurs in AV five times. For 1 Ch 29^a see PECULIAR. The other instances are Wis 18²¹ 19^a, Ac 1¹⁰, 1 Co 7^a. The Gr. is always *ἴδιος*. RV adds Wis 2² and Jude^a where the Gr. is also *ἴδιος*.

Another meaning, a derivative of the above, is 'of good appearance,' 'handsome,' as in Fuller's *Holy War*, ii., 'What a pitie is it to see a proper Gentleman to have such a crick in his neck that he cannot look backward'; and in *Holy State*, 319, of the 'Embassadour,' he says 'He is of a proper, at least passable person.' This is the sense of 'proper' in He 11² 'By faith Moses, when he was born, was hid three months of his parents, because they saw he was a proper child' (*δοτεῖον τὸ παιδίον*; RV 'goodly'—see FAIR).

J. HASTINGS.

PROPHECY AND PROPHETS.—Under this heading four subjects fall to be treated: the history of prophecy; the psychology of prophecy; the prophetic teaching; and the verification in history of the prophetic ideas of the future.

A. THE HISTORY OF PROPHECY.

i. THE ORIGIN OF PROPHECY.

ii. THE NAME PROPHET.

iii. HISTORICAL STRENGTH.

1. The Age of Samuel.

2. The Early Monarchy.

3. The Age of the Literary Prophets.

4. The Decline and Expiry of Prophecy.

B. THE PROPHETIC MIND.

i. THE IDEA OF THE PROPHET.

ii. INSPIRATION.

iii. THE FALSE PROPHETS.

* See Deissmann on *Die Bibelstudien*, p. 120 f. (Eng. tr. p. 123 f.).

C. THE TEACHING OF THE PROPHETS.

i. GENERAL TEACHING.

ii. PREDICTIVE PROPHECY.

1. Prediction in General.

2. Messianic Prophecy.

D. INTERPRETATION AND FULFILLMENT OF PROPHECY.

i. PROPHECY PORTAL AND IDEAL.

ii. PROPHECY MORAL AND CONTINGENT.

iii. PROPHECY NATIONAL AND RELATIVE LIKE OT RELIGION.

A. THE HISTORY OF PROPHECY.—Hebrew prophecy, though the deepest movement of the human spirit and in many ways the most mysterious, has, like other movements of the spirit, a history. There is the period of its obscure beginnings; the period of its highest purity and loftiest achievements; and the period of its decline and expiry, when its work being accomplished other agencies in the education of mankind took its place. Its expiry can be spoken of only in the sense that it ceased to be a creative power; its results remain an imperishable heritage of the race, and the agencies in Israel that succeeded it, such as scribes and proverbialists or wise men, were only the conduits and channels that distributed the waters of its great stream over the individuals of the nation.

i. ORIGIN OF PROPHECY.—Something to which the general name of prophecy might be given seems to have existed among all peoples. It originated from beliefs or feelings common to men everywhere, such as (1) that there was a supernatural, a God or gods, on whose will and power the wellbeing and the destiny of men depended; (2) that these supernatural powers had communion with men and gave them intimations of their will and their purposes; and (3) that these intimations were not given to men indiscriminately, but to certain favoured men, who communicated them to others. Having these beliefs, ordinary men or States desirous of living or acting in accordance with the mind of the deity, and particularly when in perplexity in regard to what lay in the future, had recourse to those through whom the deity spoke, and consulted them.

The supernatural powers, it was supposed, gave intimation of their will and disposition towards men in two ways: (1) in an external way, by objective signs or omens in the region of nature, as by the flight or cry of birds. These creatures coming from heaven were the bearers of a message from heaven. Other creatures also were the means of significant indications from the deity, for example, in the way they met a man, or the side, the right or the left, from which they crossed before him.* In all countries the sacrificial victim offered to the gods was held to exhibit signs from them, particularly in the convulsive movements of the liver and entrails of the freshly slain creature (Ezk 21). Less commonly omens were observed outside the animal world, e.g. in the rustling of the leaves of trees (Dodona; cf. Gn 12^d, Jg 9⁷, 2 S 5²⁴). In the East the movements and conjunctions of the stars were regarded as prophetic, though in this case the influence on man's destiny may have been supposed to be exerted by the stars themselves, which, however, were often identified with deities. (2) Besides this external or objective revelation, there was an inward revelation given in the mind of man. In this case the deity possessed the man, inspired him, and spoke through him. It is possible, indeed, that the animal omens may have sometimes been regarded as forms assumed by the deity or as possessed by him. And from the curious feelings of antiquity regarding the rapport existing between animals and men, the animals may sometimes have been supposed to come to men not as messengers of the deity, but on their own impulse, knowing themselves what they told to men (W. R. Smith, *RS*² 443). But this, if

* Ahlwardt, *Chalef el Ahmar*, p. 45 ff.

true, belongs to a different circle of ideas. Examples of this second kind of revelation are common in the heathen world, as the Pythia in Greece, the *kāhin* in Arabia, the sibyl, and the like. Even in Greece this inward inspiration was considered something higher than divination by omens, and in ancient times, at least, the Oracle subserved high ethical and national ends. The divine omens were not intelligible to ordinary men, hence they required persons either of special endowment, or of skill acquired from tradition or by practice, to interpret them. Such persons, augurs, soothsayers, diviners, or prognosticators (Is 47), might be called prophets of the deity to men. The Pythia, being wholly overpowered by the deity, uttered her oracles with no consciousness of their meaning. The oracles were often enigmatic, requiring an interpreter. The interpreter was called *prophet* (προφήτης, in which the *pro* is not temporal).

The methods of divination practised in Israel will have more affinity with those usual among the Shemitic peoples than with those of the general heathen world.* The feelings prevalent in the East appear from the fact that a message from the deity might be brought to one by a person of another nation (Jg 3²⁰, 2 K 31²⁵); from the frequent mention of diviners, as among the Philistines (1 S 6², 1 S 29), and of localities to which they had given names (Jg 71 937); from the weight laid on omens (Jg 6³⁷ 73, 2 S 5²⁴), and particularly on dreams (Jg 71¹¹, 2 S 23⁹); and from the use of the oracle by the sacred lot (Jg 8²⁷ 17⁵ 18³, Ezk 21²¹). An exhaustive list of the practices appears to be given in Dt 1810.11. The passage states that the practices were in use among the aboriginal tribes which Israel dispossessed; but as these tribes had been absorbed into Israel and formed one people with it, the practices no doubt continued to maintain themselves in Israel. The difference might be that they were now performed in the name of J', and not in that of the native deities. The terms describing the practices are used by Heb. writers rather indiscriminately, but perhaps three distinct forms can be discovered: (1) the oracle gained by certain methods from a god or idol (DDP), (2) interpretation of omens (ḡn), and (3) utterances of one possessed or inspired by the deity. (1) The oracle was common, perhaps, to most of the Shemitic peoples; at least it appears in Arabia and Babylon, as well as in Israel. Mesha of Moab, too, states that Chemosh gave him commandments, but the method of receiving them is not indicated (cf. Ezk 21²⁹). Lots (which were usually headless arrows or rods) were shaken and drawn in the presence of the idol, e.g. Hobal at Mecca, and the teraphim (one image) by Nebuchadnezzar (Ezk 21²¹). The question put by the inquirer usually took the form of an alternative, 'yes' or 'no,' 'this' or 'that,' though several possibilities might be proposed. In the story of Nebuchadnezzar the alternative was 'Rabbath-ammon' or 'Jerusalem,' and the decision came out 'Jerusalem.' In method the sacred lot in Israel, Urim and Tummin, did not differ. This also gave a reply to an alternative proposed. It is possible that LXX of 1 S 141.42 suggests the original reading: 'And Saul said, If the guilt be in me or in Jonathan my son, give Urim, O Lord God of Israel; but if thou say it is in my people Israel, give Tummin.' The first time Saul and Jonathan were taken and Israel left; the second time Jonathan was taken and Saul left. The form of the sacred lot is unknown, and in later times its real nature seems to have been forgotten. Nebuchadnezzar drew the lots before the teraphim, certainly an image. In Israel the ephod was used, and hence the ephod is supposed by many to have been an image of J'. Ephod and teraphim are named together (Jg 17⁵, Hos 3⁴), but it remains uncertain whether they were things different though used together, or things of the same class, the two names being cumulative, or the one used as interpretative of the other. In the time of Saul and David the ephod was in common use; later it fell into desuetude. Hosea, however, mentions it as one of the appliances of religion in his day, and certainly not with approbation (3⁴). If the root *kāṣam* originally referred to this particular kind of divination, its use ceased to be exact. Saul uses the word of divination by the 'ōb (1 S 28⁹), and the canonical prophets call the false prophets *kāṣim*, diviners, and their oracles *kāṣem*, divination (pl. *kāṣimim*), even when these prophets spoke (as they thought) by inspiration of J' or by dreams. (2) The root *nahash* (used in Piel ḡn) appears to be used properly of divination from omens. Joseph divined with a cup, the significant indications being afforded by the play of light in the fluid, or by the bells and movements of the fluid itself, or, as some think, by the behaviour of oil poured into the cup of water (Gn 44³⁻¹³). The word as well as its noun is used of divination by omens, but the different kinds of omen are not discriminated (Lv 19²⁶, Nu 23²³ 24¹); in an enfeebled sense the word meant to infer from signs or indications generally (Gn 30²⁷, 1 K 20³⁵). (3) Oracles by inspiration or possession by deity were common to the heathen

* An excellent account of general heathen manticism is given in K. Köhler, *Der Prophetismus der Hebräer, u. die Mantik der Griechen*, 1890. The work of P. Scholz, *Götzendienst u. Zaubereien bei den alten Hebräern u. den benachbarten Völkern*, 1877, is less critical.

and to Israel. And here manticism and prophecy come in contact. The two agree in form, and have to be distinguished by other tokens, e.g. by the god in whose name the oracle was given, and perhaps by the fact that in the mantic ecstasy the consciousness was overpowered and lost, while in prophecy there was only exaltation of mind and loss of the consciousness of external things.

The other things mentioned in Dt 18¹⁰⁻¹² are of the nature of magic or sorcery, and were always proscribed in the religion of J^h (Ex 22¹⁸, 1 S 28⁹), though they continued in Israel till very late times. Saul names as legitimate sources of knowledge of the will of the deity, dreams, Urim, and prophets (1 S 28⁹). Unlike divination, which seeks to ascertain the mind of the deity, magic was a means of binding superhuman powers (chiefly demonic or chthonian), either to restrain them from injuring oneself, or to constrain them to injure others, and put them under a spell, or to reveal what to mortal man was unknown. The magical means might be—(1) protective, such as amulets (Gn 38¹⁸, Is 38¹⁹); or (2) both protective and constraining, such as formulas of incantation (Ps 58⁴, Dt 18¹¹, Is 47⁹, 12); and (3) necromancy. The last had several forms: (a) consulting the 'ob, (b) consulting the *yid'oni*, and (c) consulting the dead. The forms (a) and (b) are embraced in (c), though whether they exhaust (c) is somewhat uncertain (Is 8¹⁹, 20¹, Lv 20²⁷). Cf. W. R. Smith, *Jour. of Philology*, vol. xiii. 273 ff., xiv. 113 ff.; and Driver on Dt 18¹⁰⁻¹².

ii. THE NAME PROPHET.—In 1 S 9⁹ it is said, 'He that is now called "the prophet" (נָבִי *nābī*) was beforetime called "the seer" (רֹעֶה *rō'eh*). The passage is an annotation, much later in date than the context, and cannot have been written before the name 'prophet' had been long current and attached to a succession of men. The radical meaning of the word *nābī* is uncertain. Two terms are used for 'seer,' *rō'eh* and *hōzeh* (חֹזֶה), though without difference of sense. The annotator's remark might be supposed an inference from the fact that in the ancient record before him Samuel is called 'the seer.' Still that fact is of importance; and the possibility that there was a time when the word 'seer' was in common use may seem supported by the other fact that the word 'vision' (חֹזֶן, חֹזֶן, etc.) connected with 'seer' is used all down the literature for 'prophecy,' the term 'prophecy' (*nēbū'ah*) connected with 'prophet' being a late word (Neh 6¹², 2 Ch 9² 15^a). Much weight may not be due to this consideration, and on the other side may be urged the extraordinary rarity of the word 'seer,' though this again may be explained by supposing that all references to early times in which 'seer' might have been expected to occur belong to writings which are posterior to the time when the word 'prophet' had become the usage.* The author of the annotation 1 S 9⁹ is familiar with 'prophets' who were great isolated personages, like Elijah and probably the canonical prophets; and he considers the 'seer' Samuel to have been quite like one of these. This is certainly true of Samuel, though how far true of other seers of his day, if such existed, may be doubtful. The seer was an isolated personage like the great prophets. But, further, the characteristic of the true 'prophet' was that he pursued national religious ends. Samuel did this with more splendid initiative than the greatest of his successors. He created the nation by giving it a king; they only sought to preserve it. But the seers of his day, if there was such a class, may have ministered rather to personal and private interests, as Samuel himself seems to have done on some occasions (1 S 9). In 1 S 3¹ it is said that 'vision' when Samuel was young 'was not widely diffused'; but 'vision' is here used of true prophecy such as the author was familiar with in his own time. History leaves us in complete ignorance in regard to the seers. In fact, the only 'seer' we know of is Samuel, and his history is told us in a very fragmentary way. The historian gives a beautiful picture of his birth and childhood, narrating how he was dedicated by his mother to the Lord, and how J^h spoke to him in Shiloh as He

did to the canonical prophets afterwards (1 S 1-3); but the narrative is suddenly broken off, and when we hear of Samuel again he is already an old man, dwelling in Ramah, and known as 'the seer.' We learn from Jer 7¹² that the house at Shiloh was at some time completely overthrown—no doubt at the hands of the Philistines; and Samuel driven from there took up his abode at Ramah. Though called a priest, the rôle of prophet was that accepted by him, as it is that usually assigned to him (1 S 9¹⁵, Jer 15¹, Ps 99⁶, Ac 3⁴); and it was in the exercise of his rôle as prophet—statesman in the kingdom of God—that he interfered in so decisive a manner in the national politics. It is true that the religion of J^h did not as a rule create new agencies, but served itself of those already existing, into which it infused its own spirit, which gradually threw off all heathen elements originally belonging to them. There may have been a class of 'seers' in the time of the Judges whose methods may not have been greatly unlike those in use among other Shemitic peoples. But we know nothing of them. Samuel is the only 'seer' known to history.

The meaning of the root and the form נָבִי is uncertain. (1) The form is not likely a *pass. ptep.*, but more probably, like *רֹעֶה* *harvester* and many words of similar form, has active sense. The word itself *nābī* occurs in Arab., but may be a loan-word from Heb., as it is in other dialects (Nöldeke, *Geogr. d. Korans*, p. 1). (2) The sense of the word is obscure. The root has probably no connexion with נָבִי to bubble up, as if *nābī* were one who bubbles up under inspiration (Ges., Kuenen, *Prophets*, 42, cf. Ps 45¹). The root *nābā* in Arab. means to come forward or into prominence, and causative (conj. ii) to bring forward, specially to do so by speech, to announce; and in Eth. *nababa* means to speak (Dillm. *AT Theol.* p. 475). The word *nābī* therefore would mean he who announces, or brings a message. The term, however, has not in usage the general sense of announcer or speaker, but always means one who speaks from God, i.e. a prophet, and the Hithp. frequently means to speak in an excited manner, to rave (*מְנַבֵּן*). This connotation might suggest the question whether the root *nābā* did not originally express some mental emotion, the reflexive forms (Niph. Hithp.) meaning to exhibit or display this emotion, as is the case with so many reflexives, e.g. נָמַן to groan, מְנַחֵם to exhibit grief, מְנַחֵם to show anger. It is usually supposed, however, that the verbal forms are denominatives from *nābī*. In this case the original verbal root would not be found in Heb., and the word *nābī* would either be an old noun surviving after the verbal root was lost, or else a new word learned from the Canaanites. The word *nābī* is said (1 S 9⁹) to have become a substitute for *rō'eh* 'seer,' and unfortunately the literature is all later than the time when *nābī* with its derivatives had become the usage. The 70 elders of Nu 11 (according to Wellhausen, *Comp.* 2 102 f., J working on older materials) 'prophecy' quite after the manner of the 'prophets' of the days of Samuel (1 S 10) or of Ahab (1 K 22), i.e. their 'prophecy' is a joint exercise. It is possible that 'prophets' of this kind may have appeared in the earliest times, though we do not hear of them. Others (e.g. Kuenen, *Proph.* ch. 15) are inclined to think that the name *nābī* is Canaanite, and borrowed by the Hebrews, who applied it to the bands of enthusiasts of Samuel's day because they seemed to resemble the Canaanite 'prophets.' But the existence of Canaanite 'prophets,' i.e. bands of Dervish-like enthusiasts, is purely conjectural. We do not hear of such 'prophets' till 200 years later, and these are not Canaanite, but the priest-prophets of the Tyrian Baal maintained at the cost of Jezebel (1 K 18¹⁹). Wellhausen (*Hist.* p. 449) remarks: 'Among the Canaanites such Nebilim—for so they are styled—had long been familiar.' It would not be easy to furnish the evidence. Again, the prophetic movement in the days of Samuel was a religious national one, and it is not just probable that the Hebrews would borrow terms from the Canaanites to describe it, particularly as the Canaanites were more than probably in league with the Philistines (1 S 31¹⁰). The Can. and Heb. languages must have been virtually identical; at the same time the root-word appears to exist in Assyr., e.g. in Nebo the interpreter of the gods, and *nabū* to announce (Delitzsch, *Assyr. HWB*), and the term may have entered Canaan from Babylon. The date when the change from 'seer' to 'prophet' took place cannot be ascertained, and the change itself is difficult to explain. Possibly as persons of individuality and power arose among the 'prophets' they took a more independent position like that of 'seer,' though the name 'prophet' continued attached to them. Some personages like Gad bore both names (2 S 24¹¹).

The term *rō'eh* is used chiefly of Samuel, 7 times out of 9 (twice of Hanani, 2 Ch 16¹⁻¹⁰). The word *hōzeh* is more common, 2 S 24¹¹, 2 K 17¹², Am 7¹², and often in the Chronicler, who affects archaic phraseology, e.g. 1 Ch 21⁹ (Gad), 2 Ch 29¹² (Iddo), 2 Ch 12²⁴ (Jehu), 2 Ch 23²⁰ (Asaph), 1 Ch 25⁵ (Heman), 2 Ch 35¹⁵ (Jeduthun). In the plur. both *rō'im* and *hōzīm* are used as parallel to 'prophets,' Is 29¹⁰ (a gloss), 30¹⁰, Mic 3⁷,

* For example Gn 20⁷ (Abraham), Ex 15²⁰ (Miriam), Nu 11²⁶. (Eldad and Medad), Dt 18¹⁵, Jg 4⁴ 6², 1 S 3²⁰, cf. 22⁷.

2 Ch 33:18. The seers were so named from having visions, and possibly the priest Amaziah applied the name *hōzeh* to Amos (7:13) on account of the visions which he narrated (7:13). On *hōzeh* (Arab. *hāzī*) cf. Hoffmann, *ZdW*, 1883, pp. 90-96; and on *kāhin* (= *hāzī*) Wellhausen, *Reste 2*, p. 130 ff.

iii. HISTORICAL STEPS.—1. *Time of Samuel*.—In the Book of Judges, beyond the reference to Deborah (Jg 4), and a 'prophet' in the days of Midianite oppression (6⁷, cf. 1 S 2²⁷), nothing is said about prophets. Deborah was a 'prophetess,' and 'judged,' that is, ruled or governed, Israel. Both terms, 'prophetess' and 'judge,' imply that Deborah played a political rôle. She was a mother in Israel, and took the leadership in a national crisis. In the times of Samuel men called 'prophets' appear to have existed in great numbers.

(a) Those called 'prophets' in this age formed communities; they were cenobites, though not celibates (2 K 4¹). They are first mentioned in connexion with Saul at Gibeah of God, Saul's home (1 S 10⁶). When dismissing him Samuel predicted that he would meet a band of prophets coming down from the high place with music, and engaged in 'prophesying' (1 S 10⁶⁻¹⁰). Another company had its home at Ramah, where Samuel himself dwelt (1 S 19¹⁹). It has usually been supposed that the term *naioth* means 'dwellings,' and describes such a prophetic settlement (2 K 6¹⁻⁷, see *NAIOTH*). In the times of Elijah and Elisha other localities are mentioned as residences, e.g. Bethel (2 K 2²), Jericho (2 K 2²), and Gilgal (2 K 4³⁸, cf. 2 K 6¹). The residents are called 'prophets' and 'sons of the prophets,' i.e. members of the prophetic societies (a single member is *ben-nābī*, Am 7¹⁴). Between Samuel and Elijah (1 K 20³⁰) no mention is made of the 'sons of the prophets,' though it is probable that the succession was still maintained. Amos, a hundred years after Elijah, appears to be acquainted with prophetic societies (7¹⁴), and at all times prophets continued to be numerous (1 K 22⁵⁻¹⁸). As at the places named as residences there was a 'high place' or sanctuary, it was probably around these sanctuaries where J^r was worshipped that the prophets settled. In early times the distinction between priest and prophet does not seem to have been sharp. The Arab. *kāhin* was both seer and priest. Samuel was both priest and prophet. Jeremiah and Ezekiel both came out of priestly families. The connexion, indeed, of priests and prophets was always close (Is 8⁹). Those prophets whom Jer. denounces as false act in concert with the temple priesthood. Pashhur, who put Jer. in the stocks, was prophet as well as priest (Jer 20¹⁻⁹); and it was the 'priests and prophets' who arraigned Jer. before the princes for blasphemy against the temple (Jer 26).

(b) The multiplication of 'prophets' at this epoch indicates a rising spirit of devotion to J^r, and fervour in His service. Some have supposed that this new fervour and religious elevation were due to the influence of Samuel, and that the origin of the prophetic societies must be traced to him. But all that we have history for is that Samuel was in close relation with the prophetic communities. We see him on some occasions at their head (1 S 19²⁰); but that he did not usually reside among the 'prophets' appears from the statement that when David fled to him at Ramah the two together then went and dwelt at Naioth (19¹⁸). It is evident that the prophets looked up to him and learned from him; but it is also evident that he felt that the impulses which moved them were common also to himself, and he was not ashamed to direct them, and share in their prophesyings (cf. Elisha, 2 K 4³⁸). It is probable, therefore, that the rise of the 'prophets' was due to something which swept both Samuel and the people into the same stream of national-religious enthusiasm.

(c) This can hardly have been anything else

than the crisis that had arisen in the nation's fortunes. The people had been subdued by the Philistines, and were threatened with national extinction. And in Israel of this age national and religious were virtually the same thing. The idea of later prophets, that national autonomy might be lost, while the religion of J^r remained, had not yet been reached. It was J^r that created Israel, and made it a nation; faith in Him was the bond of its national existence, and the hour of the nation's peril awoke a new religious-national fervour. The nation's fortunes and history was from the beginning the great lesson-book in which men read the nature of J^r their God, and His disposition towards them (2 S 21¹², 24¹²). The national disasters were evidence of J^r's anger, and they awoke the national conscience. The 'prophets' were not individual enthusiasts; they were inspired by common sentiments, and animated each other, and, as a society, reacted on the surrounding population. Their 'prophesying' was a kind of public worship at the high place or sanctuary, to which they went up with pipe and song, as continued to be done in after-days (Is 30²⁹). And the songs were not songs without words. They had religious contents, as much as those of the singers who afterwards 'prophesied with harps' in the temple (1 Ch 23²⁻³, cf. 2 S 23¹). However rude, they would be celebrations of 'the righteous acts of J^r, the righteous acts of his rule in Israel' (Jg 5¹¹). They would be such songs as were afterwards collected in 'the Book of the Wars of J^r' and in 'the Book of the Upright' (Bk. of Jashar). Some of the poetical fragments still to be found in the historical books may well belong to this age. Whether writing was practised by the 'prophets' may be uncertain (though cf. 1 Ch 29²⁹); but if they did not write, they prepared by their 'prophesying' a language for the literary prophets who came after them. In Amos, the oldest literary prophet, we find a religious nomenclature already complete; we find also in him, almost more than in his successors, the prophetic mannerism and technique, such as the phrases 'oracle of J^r' ('*amā*'), 'thus saith J^r,' and much else. It is not too much to suppose that it was in these 'schools of the prophets' all down the history that this nomenclature and technique were formed.

(d) The new prophetism was a national-religious movement, though the emphasis lay on the religious aspect of it. Like their great successors, the prophets hoped that the national restitution would be the shape in which the religious regeneration would verify itself. Nevertheless, the national claimed expression. The monarchy was the creation of prophecy, not merely in the sense that the prophet Samuel, by inspiration of J^r, gave the people a king. The national direction of prophecy embodied itself in the kingship. The first king of Israel was a prophet as well as the second. When Saul turned to go from Samuel, God gave him another heart, and when he met the prophets the spirit of God came on him and he prophesied. His excitation was not mere contagious sympathy. There was mind under it; it was the thought awakened by Samuel of his high destiny and of the task before him taking fire from contact with the national-religious enthusiasm of the prophets. The exclamation of the populace, Is Saul also among the prophets? has been taken as an expression of wonder that a solid yeoman like Saul should join himself to a company of ranting enthusiasts. This view is wholly improbable. It was not in this way that religious exaltation was looked on in the East. It was just the visible excitation that suggested to the onlooker that the enthusiast was possessed by the deity. Even the insane, just because he had no mastery over

his mind, which seemed moved by another, was held inspired. A multitude of passages show the popular reverence for the prophets, e.g. 2 K 4¹². ⁸⁷ (cf. 6⁹), particularly 2 K 4²², which describes how a person 'brought the man of God bread of the first fruits,' as people did to the sanctuary of J" (cf. 1 K 12²²). Neither can Amos' disclaimer of being a prophet or one of the sons of the prophets mean that 'he felt it an insult to be treated as one of them.'* Amos (7¹⁴) merely states a historical fact, viz. that he had not been an isolated prophet such as Elijah and others were, nor a member of one of the 'prophetic schools,' but had been suddenly called from behind the flock to 'prophecy' to God's people Israel. The respect with which he mentions prophets elsewhere as God's greatest gift to the people (2¹¹ 3'), is sufficient evidence of his feeling.†

2. *Early Monarchy.*—During the time of the Judges and the early monarchy the means of ascertaining the will of J" was chiefly the sacred lot and ephod. This was employed by Gideon (Jg 8²⁷) and Micah (Jg 17. 18), by Saul, and by David and his priests in the early period of his history (1 S 23⁴⁻⁶). At a later time it is little referred to, the king's advisers being the prophets. Side by side with this there existed seers through whom J" spoke. The Arab. *kāhin* or seer was also supposed to be possessed by a spirit, which spoke through him (Wellhausen, *Reise*, 134). The seer was absorbed into the class of 'prophets,' and the name 'prophet' remained common to the isolated individual and the member of the community. And from this time forward the will of J" was chiefly asked at the mouth of the prophet (1 K 14¹⁸). The early waters of prophetism may have been somewhat turbid, but they gradually ran clear, and became that stream of ethical prophecy to which there is nothing like in the religious history of mankind. J" spoke in the mind of man and to his mind; the prophet stood in the council of God. The two ways of ascertaining the will of J" in the age of Samuel are reflected in the two narratives of the election of Saul. Both narratives ascribe the institution of the monarchy to the will of J", but in the one (1 S 9¹–10¹⁶ 11) his will is declared through prophetic inspiration, in the other (1 S 8. 10¹⁷ 12) through the oracle of the lot. The latter tradition, though further removed from the actual events, is at least true to the historical conditions of the period.

The true causes of the rupture between Samuel and Saul can scarcely be ascertained. The prophetic spirit in Saul never obtained the mastery within him, it was always in conflict with contrary currents in his nature. Latterly the spirit became troubled and obscured, and its place was taken by an evil spirit from God (cf. 1 K 22²¹). David was a man according to God's heart, that is, in all things subject to the will of J" (cf. 1 S 15²³), and the prophets are found supporting his throne. Special designations are given to some of them suggestive of the offices they performed, e.g. mention is made of 'the prophet Gad, David's seer' (2 S 24¹¹, 1 Ch 21⁹, 2 Ch 29²⁵). These prophets indirectly influenced the government and acted on the affairs of the kingdom as a whole, although through the king (2 S 24¹¹ 7¹², 12¹², 1 K 12²²). So long as the prophets and kings were in accord this may have continued, but when kings arose who were mere national rulers and unprogressive or retrograde

in religion,—of course no king of that age was irreligious in the sense of neglecting the traditional religion,—naturally the prophets, at least those among them who were ethically progressive, took another side. It might have been well for the peaceable development of the kingdom of J" if the prophets and rulers had always been in harmony, and it might seem a calamity when a dissidence arose between them; but undoubtedly, though the disagreement was often fruitful of trouble and revolution, it contributed to the independence of the prophetic order. Prophecy resumed the 'national' element in it, which it had divested itself of and delegated to the monarchy, and stood forth against all classes and functions as the immediately inspired guardian of the kingdom of J" in all its interests. Moses was the type of the true prophet (Hos 12³, Dt 18¹⁵).

3. *The Canonical Prophets.*—Prophets like Nathan, Elijah, and Elisha, following the example of Samuel, directly interfered in the government of the State. Nathan determined the succession to the throne (1 K 1²²); Elijah denounced the dynasty of Omri, and Elisha set in motion the revolution that overthrew it (2 K 9). The latter prophet was the very embodiment of the national spirit in the Syrian wars, and took the field in the campaign against Moab (2 K 3¹⁶). Elijah and he were the national bulwark—'the chariots of Israel and the horsemen thereof' (2 K 2¹²). But after Elisha the prophets withdraw from external national, and party, conflicts. They no more head revolutions. Nevertheless, they remain statesmen as much as their great predecessors. They could not cease to be politicians as long as the kingdom of J" had the form of a State. They oppose, warn, and counsel kings and State parties according to the exigencies of the time. Hosea, indeed, thinks the monarchy impotent for good, if it has not been from the beginning the source of all evil (13¹⁰). But Isaiah, so long as the State was independent, warned Ahaz against involving his kingdom in the struggles of the nations, in the collision of which his country would be crushed (Is 7); and when the dream of independence had passed away he resisted with equal strenuousness the meditated revolt of Hezekiah and the Egyptian party against the Assyrian power (Is 30¹⁸–31¹⁶). The same principles guided Jer. and Ezk. in the Chaldean age (Jer 21⁹ 38², Ezk 17). But the only weapon which the prophets now use is the word of God which is in their mouth. Jer., though set over the nations to pluck up and break down, wields only the word of J", which is like a hammer breaking the rocks in pieces (Jer 1¹⁰ 23²⁹), and which has a self-fulfilling energy (Is 55¹⁰). J" hews the people by the prophets, and slays them with the words of His mouth (Hos 6⁶). But in this age new thoughts, difficult to account for, filled the minds of the prophets. Formerly, J", as God and ruler of His people, rejected dynasties, and by the prophets overthrew them (Hos 13¹¹); now, it is the conviction of all the prophets, both of the north and south, that J" has rejected the nation, that Israel as an independent State is doomed to perish. Side by side with this thought, or as a consequence of it, another thought appears. The complex notion 'national-religious' seems reflected on and analyzed, and the 'religious' assumes such preponderating weight that the 'national' appears of little value. The ideal kingdom of J" is a religious community faithful to the Lord. Another thing, closely connected with the two just mentioned, is the lofty spiritual and ethical conception of J" God of Israel reached by the prophets of this age, and, what is but the obverse side of it, their severe judgment on the moral condition of the people. This lofty con-

* Wellhausen, *Hist.* 293. Wellhausen's remark that 'the point of the story narrated of Saul (1 S 19²²) can be nothing but Samuel's and David's enjoyment of the disgrace of the naked king' (p. 268), is merely the cynical sally of a modern humourist.

† This view of Am 7¹⁴ is rightly taken by J. C. Matthes, art. 'The False Prophets,' *Mod. Rev.*, July 1884. See also J. Robertson, *Early Relig. of Israel*, p. 90.

ception of J" and this pure ideal of what His people must be, cannot be an unmediated and inexplicable leap upward of human religious genius, neither can it be a sudden divine creation. It did not, like Jonah's gourd, grow up in a night. History, unhappily, does not enable us to follow its growth. But it is the perfect efflorescence of a tree whose roots stood in the soil of Israel from the beginning, whose vital energies had always been moving towards flower, and which burst forth at last in the gorgeous blaze of colour which we see. The wealth of ethical and religious teaching found in the prophets of this age has led to a reaction against the former idea that prophecy was specifically prediction, and the view has become prevalent that the true function of the prophet was to be a teacher of ethical and religious truths. This view is also one-sided. The prophets never cease to be 'seers'; their face is always turned to the future. They stand in the council of J" (Am 3', Jer 23²), and it is what He is about to do that they declare to men. Their moral and religious teaching is, so to speak, secondary, and due to the occasion. Their conviction is that the destruction of the nation is inevitable, and they dwell on the nature of J" and on the moral declension of the people to impress their conviction on the nation—'prepare to meet thy God, O Israel' (Am 4¹²). Or, as their conviction of the inevitableness of the nation's doom does not seem absolute, but is crossed, at least at times, by the possibility or even the hope that it might be averted (Am 5¹⁴⁻¹⁵, Is 1¹⁸, Jer 36¹⁻³), they impress on the people the mind and life which is acceptable to J"—that which is good, and what the Lord requires of them (Mic 6⁸)—that they may repent, and that His judgments may be arrested. Or, when the foreboding of near destruction again oppresses them, they look beyond the dark and tempestuous night that is gathering to the day that will dawn behind it (Is 8²²),—for though J" will destroy the sinful kingdom He will not destroy the house of Jacob (Am 9⁸),—and they dilate on the righteousness and the peace and the joy of that new age (Is 9¹⁻⁴, Hos 2¹²). The prophets now employ writing, and the short, drastic oracles of former times (1 S 15²², 1 K 11³¹ 21¹⁹) give place to discourses of considerable length. By writing they could influence many whom their voice could not reach, and the written word became a permanent possession of the godly kernel of the people, upholding them in the midst of the darkness when God's face was hidden, and being when the calamities were overpast a witness that God had still been with them (Is 8¹², Ezk 2⁸). The instances of Deuteronomy and the roll of Jeremiah show that a writing produced a far more powerful impression than the spoken word of the prophet.

A strange and interesting phenomenon in the history of prophecy is what is called '**False Prophecy**'. The true prophets, whose word history and God's providence verified, and to which the religious mind of mankind has set its seal, laid emphasis on the 'religious' element in the complex 'national-religious' idea. The unity J" and the nation had to their minds become disrupted, and J" now stood opposed to the nation. The 'false' prophets continued to lay the chief emphasis on the 'national' side; hence they might be called nationalistic prophets rather than false, though, of course, their anticipations were often disproved by events. The question whether these prophets were retrograde or only unprogressive, will be answered differently according to the view taken of the development of religion in Israel. There is no reason to suppose that they had personally sunk below the level of their own time. They stand on the same level with the body of

the people. The charge of the canonical prophets is that the nation as a whole had declined from the purer moral and religious ideal of early times (Hos 2', Is 1¹⁸). And this charge is certainly true. For, admitting that the people by entrance upon the Canaanite civilization had attained to a broader and fuller human life, and admitting even that the conception of J", by taking up into it some of the thoughts connected with the native gods, became enlarged and enriched, mixture with the Canaanites produced a deterioration both in the life and religion of Israel. It is this deterioration that seems to the true prophets so fateful in regard to the destinies of the nation. And it is on this question of the national future that conflicts arise between the true prophets and the false. It is in this region, too, that another new phenomenon in the history of prophecy appears in this age—the persecution of the prophets. Former prophets, like Samuel, Elijah, and Elisha, were embodiments of the 'national-religious' spirit, and carried the people with them. The new outlook of the prophets regarding the national destinies enraged the populace. The prophets seemed to them madmen; their predictions that J" would destroy His people were incredible; they were traitors, and sought not the welfare of the people, but their hurt (Jer 38⁴). The prophets probably might have preached as they liked about the nature of J" and the kind of service pleasing to Him, if they had not gone further and drawn inferences as to the destinies of the nation. Jehoiakim showed his indifference to Jeremiah's preaching, or his contempt for it, by throwing his book piecemeal into the fire; it was only when at the end of the roll he found the assertion that Nebuch. would come and destroy the land (Jer 36²² 25⁹⁻¹⁰), that he ordered the prophet's arrest. On another occasion Jer. was seized and beaten on the suspicion that he was falling away to the Chaldeans, and flung into a dungeon because his gloomy anticipations disheartened the men of war in the city (38⁵). And it was because of his prophecy of national disaster (1 K 22) that Ahab ordered Micaiah to be confined on bread and water till he came back (he did not come back!). It was not their religious opinions but their political threats that drew persecution on the prophets (Am 7¹⁰). The persecution was the convulsive effort of the 'national-religious' spirit to maintain itself. No doubt many of the people were impatient of the prophets' general teaching, or contemptuous of it: they burlesqued their manner (Is 28⁹⁻¹⁰), and ironically invited the interposition of the Lord with which the prophets threatened them (Is 5¹⁸⁻¹⁹); they imposed silence on them (Am 2¹², Mic 2⁸), and told them to have done with the Lord of hosts in their hearing (Is 30⁹⁻¹¹); but it was mostly when the prophets entered the political region, or when to the general mind they seemed guilty of sacrilege (Am 7¹²⁻¹³, Jer 7¹⁴ 26⁷⁻⁸), that harsher measures were adopted. No doubt the persecution of the prophets by Ahab at the instigation of Jezebel was on account of their opposition to the introduction of the Baal worship. But even this persecution seems to have been transient, for shortly before his death we observe Ahab on the best of terms with the prophets (1 K 22). If the 400 mentioned here are 'false,' or merely nationalistic, prophets, probably many of them had opposed the Baal cultus if for no higher reason than that J" was the national God. The persecution by Manasseh, of whom we know so little, would be for similar reasons, because the prophets opposed the Assyrian cults which the king so ardently patronized.

4. *The Expiry of Prophecy.*—Many things contributed to the decline and final failure of prophecy.

(a) The prophets bore some resemblance to a progressive political party in a State. So long as abuses exist, and privilege leads to injustice and oppression of the weaker classes, such a party is strong. Its power lies in attack. But when abuses have been removed, and the reforms demanded have been conceded and placed upon the statute book, the function of the party of progress has ceased. Now, the evils against which the prophets contended had, externally at least, been removed by the reform of Josiah. Deuteronomy received the sanction of the king and government, and became the law of the State. This was a triumph of prophetic teaching on morals and religion; but if it was thus a witness to the power of prophecy in the past, it was virtually a death-blow to it for the future. For by embodying the practical issues of the prophetic principles in law, having State authority, it superseded the living prophetic word. No doubt even after Deut. became State law Jer. continued to be a prophet. He perceived that the reform was merely external, and he continued to demand something more inward—not reform but regeneration.

(b) Again, the great prophets from Amos to Jeremiah had traversed the whole region of theology and morals. Little could be added to what they had taught concerning Jⁿ and His purposes, concerning man and his destiny. Those who came after them could do little more than combine their principles into new applications and uses. And in point of fact such prophets as Ezekiel and Deutero-Isaiah are almost more theologians than prophets.*

(c) Another thing which contributed to the expiry of prophecy was the fall of the State. With the destruction of Jerusalem, the nation, the subject of prophecy, ceased to exist. Its destruction was the seal set to the truth of prophecy, to its teaching on God and the people, and its task was done. If in a sense prophecy had destroyed the nation it had saved religion. For by teaching that it was Jⁿ who brought ruin on the State it showed that the downfall of the nation was not the defeat but the triumph of Jⁿ. The gods of the nations, Chemosh, Asshur, and Merodach, perished with the nations of whose spirit they were the embodiments, but Jehovah rose the higher over the ruins of Jerusalem. He was seen to be the God of Righteousness, the moral Ruler of the world—

Jehovah of Hosts was exalted in judgment,
And the Holy God sanctified in righteousness
(Is 51⁶).

When Israel perished as a nation, and was scattered over every land, the *idea* of Israel just by being detached from the nation became clearer; the conception of Israel, of its place in the moral history of mankind, took the place of Israel, and the second Isaiah, operating with this conception,—the servant of the Lord,—is still a prophet. No doubt with all his brilliancy much of his book is theological deduction from his lofty conception of Jⁿ, but in one respect he is what all the great prophets were, an 'interpreter' of history, and by far the profoundest. He stands at the end of Israel's history, and looking back he reads its meaning, which is that its sufferings as servant of the Lord have atoned for its sins as a mere part of mankind.

(d) Although at the Restoration the gorgeous anticipations of the second Isaiah had been disappointed, the idea of what Israel was, its consciousness of itself and its meaning in the religious life of mankind still maintained themselves. The eschatological hope remained indestructible. This hope had sometimes a national element in it, the

idea of a political supremacy of Israel over the other nations, but it was mainly the hope of religious supremacy as the people of God (Is 61⁶). Israel had become a purely religious idea, its mission was to be the light of the nations—salvation was of the Jews. And this great eminence and triumph God would confer upon it by a sudden interposition, when He would plead its cause and 'justify' it by showing it to be in the right in its time-long plea against the nations—a plea which in other words was the religious history of mankind (Is 50^{4a}). And what remained for Israel was to prepare for God's interposition, and be worthy of it by doing His will. Thus, when Israel was merely a religious community with no national life, prophecy became altogether detached from history and took the form of reflective and theological combinations of former prophecies. Its theme was the eschatological hope, and it occupied itself with searching what, and what manner of time this hope would be realized (Dn 9², 1 P 1¹¹). Prophecy becomes Apocalyptic. Apocalyptic continues to share all the great ideas of prophecy: it regards history as the expression of God's moral rule of the world; it regards God as purposing and foreseeing all its great movements; and it supposes Him to reveal His purposes to His servants from the beginning. Hence, instead of looking back over history, Apocalyptic plants itself in front of history, turning history into prophecy, and locating all its great movements in the mind of some ancient seer, Enoch, Moses, Baruch, Daniel, or Ezra. Apocalyptic is thus always pseudepigraphic; but the date of an Apocalypse can generally be guessed from the fact that up to his own time the author is pretty accurate, having history to rely on, while from his own time on to the end he can only forecast or calculate.

In the times when prophecy had virtually ceased there are occasional references to it. The references are of two kinds. Generally they are expressions of sorrow that the people has no more the guidance of the prophet in its perplexities and darkness, and of the hope that a prophet will again arise; but once at least prophecy is spoken of with dislike. In the one case the true prophet is thought of, in the other the misleading false prophecy. See on the one hand Ps 74⁹, 1 Mac 4⁴⁶ 9³⁷ 14⁴¹; cf. La 2³, Pr 29¹⁸; on the other hand Zec 13¹⁻⁶; cf. La 2¹⁴ 4¹².

The prophets of the OT may be grouped thus—

I. PROPHETS OF THE ASSYRIAN AGE.

Jonah (referred to 2 K 14²³).
Amos, c. 760-760.
Hosea, c. 750-737.
Isaiah, 740-700.
Micah, c. 724 and later.
Zephaniah, c. 627.
Nahum, c. 610-608.

II. PROPHETS OF THE CHALDEAN PERIOD.

Jeremiah, c. 626-586.
Habakkuk, c. 605-600.
Ezekiel, c. 593-578.

III. PROPHETS OF THE PERSIAN PERIOD.

Is 13-14 21-30 34-35?
Deutero-Isaiah, c. 540.
Haggai and Zechariah, 1-8, c. 520.
Malachi, c. 400-450.

Probably later, at all events after the Restoration, Joel, Jonah, Obadiah (in present form), Is 24-27, Zec 9-14.

B. THE PROPHETIC MIND.—Many questions arise regarding the mind of the prophet which can hardly be answered, but allusion may be made to some of them.

1. THE IDEA OF THE PROPHET.—A number of things are said of the prophet which might serve as partial definitions. Such definitions are different at different times, the prophet being regarded from various sides. In inquiring into the prophetic mind, it is the prophet's own idea of himself that is of interest; but his idea of himself did not differ from

* Wellhausen remarks (*Rechte* 2, 137) that with the revelation of the Koran the function of the *kāhin* or seer came to an end, and he disappears.

the people's idea of him, though in his own case the idea was based on his consciousness, in the case of the people on their observation. Both believed that the prophet was one who spoke the word of J". When threatened with death Jer. said to the people, 'For of a truth J" has sent me unto you to speak all these words in your ears' (Jer 26¹⁵); and the people's idea of their prophets, if not of Jer., was the same: 'the word shall not perish from the prophet' (Jer 18¹⁸).

Certain names applied to the prophet are suggestive of ideas entertained of him. (1) One of the oldest and most common of these designations was **man of God**. The name is used of Samuel (1 S 9⁶), of Elijah and Elisha, and of others (1 K 12²² 13, Jer 35⁴), and often of Moses. The name implies close relation to God; the prophet is near to God (Am 3⁷, Jer 23²²⁻²³). The Shunammite made a little chamber for Elisha, because he was 'a holy man of God' (2 K 4). Holiness is nearness to God; whether in this age it already connoted moral purity (Is 6³) may be uncertain; the 'man of God' at any rate suggested this, for the widow of Sarepta said to Elijah, 'What have I to do with thee, thou man of God? art thou come to call my sin to remembrance?' (1 K 17¹⁸). The name 'man of God' suggests both the ethical basis of prophecy and the religiousness of the prophet. All the prophets pass moral judgments on their contemporaries, e.g. Nathan on David (2 S 12) and Elijah on Ahab, and the pages of the literary prophets contain little else than such judgments. And Jeremiah at last goes so far as to say that the mark of a true prophet is just that he passes such a moral condemnation on his time; this of itself authenticates him (Jer 28⁹). How deeply the moral entered into the prophet's own idea of prophecy is seen in Is 6², cf. Mic 3⁸. But the notion of religiousness or godliness suggested by the name 'man of God' is even more important. The prophet's 'call' was less appointment to an office as we call it, than to a religious life-task. His prophesying was lifted up into his own personal religious life. The fountain of prophecy was communion with God. This is seen in Jer., in whom prophecy and piety melt into one another. (2) Another common designation of the prophet is **servant of God** or of J". The name is given to prophets in general (2 K 9⁷), to Elijah (1 K 18³⁰), Isaiah (20³), and others (1 K 14¹⁸, 2 K 14²⁰), particularly to Moses. The service is usually public, in the interests of God's kingdom. The name 'servant of J'" is given also to Israel. Israel is the great servant of J"—his ministry is to mankind, that of the individual prophets is to the narrower world of Israel itself. And in like manner both Israel and the prophet are called *messenger of J"*—the one to the nations (Is 42¹⁸⁻¹⁹), and the other to Israel (44²⁶). The term 'messenger' is used mostly in late writings (Hag 1¹³, Mal 3¹), but the consciousness of being 'sent' is common to all the prophets—'Go and tell this people' (Is 6⁹, Jer 26¹⁵). The prophet feels he has a commission to the people as much as Moses felt he had a commission to Pharaoh. (3) Another name given to the prophet is **interpreter**. The name, though rare (Is 43²), is descriptive of the position of the prophet in regard to history and God's providence. God speaks in events, and the prophet interprets Him to men. Prophecy arises out of history, keeps pace with it, and interprets it. God is the author of Israel's history, and His meaning in it, His disposition towards the people as expressed in it, reflects itself in the prophet's mind. And as it reflects itself it awakens in him the sense of the people's evil; and being one with them he becomes the conscience, particularly the evil conscience, of the people. Events are never mere occurrences; God animates them; each great

event of history is a theophany, a manifestation of God in His moral operation. The eyes of ordinary men do not perceive this meaning, and when suddenly confronted with some unexpected issue they exclaim, 'Verily thou art a God that hidest thyself, God of Israel, the Saviour' (Is 45¹⁵). Further, no event is isolated; each has resulted from something preceding it, and will issue in consequences following it. History is a moral current, and at whatever point in it the prophet stands he feels whence it has come and whither it is flowing. Of course, the prophet is not a mere interpreter of history or institutions.* To suppose so would be to give him the second instead of the first place; the mind of man is greater than institutions or history, and it is in it above all that God will reveal Himself. And even the institutions and history are not mere miraculous Divine creations; men concurred in founding the institutions, and they have their part in making the history. Events furnish the occasion of the prophet's intuitions, but they do not set bounds to them. Indeed we often see the prophet's mind outrunning history, filling the events around him with a profounder meaning than they actually contain. His own mind is full of great issues, great ideals of the future; and eager to see their realization he animates the events occurring in his day with a larger significance than they have, thinking they will issue in the final perfection for which he yearns. If he proves at fault in regard to the time, he rightly divines the moral connexion of the events of his day with the perfection of the end. Other names, such as 'seer,' 'watchman' (Jer 6²⁷, Ezk 3¹⁷), need not be dwelt upon.

There are several passages, belonging to different dates, which might be taken as definitions of 'prophet.' In Am 3⁷ it is said, 'The Lord God doeth nothing without revealing his counsel to his servants the prophets.' Jer. (23²²) varies this by saying that the prophet stands 'in the council' of J", and knows His purpose (Job 15³). The passage states two things, viz. that J" reveals His mind and purpose to the prophets, and that He does so particularly in reference to the future. When great events are about to happen, involving the destinies of the people, the sensibility of the prophet is quickened and feels their approach, and he stands forth to announce them. Thus Amos and Hosea appear as heralds of the downfall of the kingdom of the North; Micah and Isaiah, when the storm-cloud of Assyrian invasion was rising on the northern horizon, and Jeremiah when the empire of the East was passing to the Chaldeans, and the downfall of Judah was nigh at hand. Among other passages referring to prophecy on its predictive side, Is 41⁴⁻²¹ (cf. 45¹⁸⁻¹⁹) deserves mention. Here predictive prophecy is claimed for J" and Israel and denied to the idols and their peoples, and the power to predict as well as the fact of having truly predicted is proof that J" is God. J" is the first and the last; He initiates the movements of history, and He brings them to an end. From the beginning He foresees the end. But it is His relation to Israel that causes Him to announce it beforehand. For Israel is His servant, and His purpose can be fulfilled only through the co-operation of men, to whom it must be revealed. The conception of a living God in moral fellowship with men involves in it prophecy having reference to the future. Here again prophecy is lifted up into the sphere of personal religious life.

The passage Dt 18²², though not excluding prediction, places prophecy on a broader basis. Prophecy is due to two things: (1) to that yearning of the human spirit to know the will of

* This seems the idea of v. Hofmann, *Weissagung u. Erfüllung*.

the deity, and to have communion with him, common to men everywhere. This yearning created many kinds of diviners, who by external means inferred what was the mind of deity. But it is not in this way, but in one higher and worthier, that the true God satisfies the yearning of His people's heart (Nu 23²²). However profusely signs of Him and of His mind be scattered over nature, there is a more immediate intercourse between Him and men. He speaks to the mind of man directly; there is a communion of spirit with spirit. Jⁿ puts His words in the prophet's mouth, who speaks them in His name (Dt 18^{18, 19}). (2) And the reason for employing a prophet as mediator between Jⁿ and the people is that the people shrink from hearing the voice of Jⁿ speaking to them directly. He spoke the ten words in the people's ears at Horeb, but Israel said, 'Let me not hear again the voice of the Lord my God, that I die not' (18¹⁶). An extraordinarily lofty place is assigned here to the prophet: his words are as much the words of Jⁿ as if Jⁿ spoke them immediately with His own voice (cf. Nu 12⁷). But these words of Moses, 'A prophet shall the Lord your God raise up unto you like unto me,' contain other points illustrating the idea of 'prophet.' The term 'raise up' (cf. Am 2¹¹) is used of the judges, and in many ways the prophets were the successors of the judges. The prophet is immediately raised up. The Divine act is reflected in his own consciousness in the crisis named his 'call.' His position is a personal one. He is not a member of a caste inheriting an office. He may be taken from any class: from the priesthood, like Samuel, Jer., and Ezek., and probably others; from the aristocracy of the capital, like Isaiah; from the population of the country townships, like Micah and Urijah of Kiriath-jearim (Jer 26); or from those that followed after the flock, like Anos. Women, too, might be prophetesses, as Miriam, Deborah, and Huldah (2 K 22). The singular 'a prophet' may be used collectively of a line of prophets (Hos 12¹³), or more probably as there was usually only one great prophet at one time the reference may be to the individual prophet in each age. In the words 'like unto me' the prophet is put on the same plane with Moses; and so far as the scope of his functions extended this is the best definition. It may be said that we really do not know what Moses was like; and to say that the prophet was 'like Moses,' is to explain the unknown by the more unknown. We know at least what Moses was thought to be like in the age of the Deuteronomist and earlier—he was one faithful in all God's house (Nu 12⁷); and the prophet's oversight was equally broad. Prophecy was not an institution among other institutions, like priesthood and monarchy; it founded the monarchy, and it claimed in the name of Jⁿ to correct and instruct priests as well as kings. Tholuck* has defined the prophet as 'the bearer of the idea of the theocracy.' The definition is true in the sense that the prophets do not claim to be originators, they have inherited the principles which they teach; but it touches the prophet only on his intellectual side. The prophet was more than a teacher, and the theocracy was life as well as truth. The prophet was not only the bearer, he was the embodiment of the idea of the theocracy. This idea, which is that of the communion of the living God with mankind, was realized in him and through him in Israel. Though he could be distinguished from Israel he was, in truth, Israel at its highest. The prophets were not persons who stood as mere objective Divine instruments to the people whom they addressed; they were of the people; the life of

* Die Propheten u. ihre Weissagungen, p. 12.

the people flowing through the general mass only reached its flood-tide in them. Every feeling of the people, every movement of life in it, sent its impulse up to them; every hope and fear was reflected in their hearts. And it was with hearts so filled and minds so quickened and broad that they entered into the communion of God.

One other passage may be referred to which expresses very clearly the main element in the idea of prophet. In Ex 7¹ Jⁿ speaks to Moses, 'See, I have made thee God to Pharaoh, and Aaron thy brother shall be thy prophet' (P). In Ex 4¹⁸ (J) a similar statement occurs, 'He (Aaron) shall be thy spokesman to the people; he shall be to thee for a mouth, and thou shalt be to him God.' Moses 'inspired' Aaron, and Aaron spoke his words to Pharaoh and the people. So all the prophets, e.g. Is 30² 31¹, regard themselves as the 'mouth' of Jⁿ.

ii. INSPIRATION.—When Samuel dismissed Saul he said to him, 'Thou shalt meet a band of prophets; and the spirit of the Lord will come mightily upon thee, and thou shalt prophesy with them, and shalt be turned into another man' (1 S 10^{4, 6}). The term 'prophesy' describes the excited demeanour and utterance of the prophets, and the 'spirit' is regarded as the cause of this. Of course, the prophets did not utter mere sounds, but words with meaning; but it is the personal exaltation of the prophet himself, who has become another man, and not specially the contents of his utterance, that is ascribed to the 'spirit.' The man on whom the spirit comes, oftener performs deeds than speaks words. The 'spirit of the Lord' came on Samson, and he rent the lion as he would have rent a kid (Jg 14⁶); it came on Saul, and he slew his oxen and sent the fragments throughout Israel, calling to war with Ammon (1 S 11⁶); similarly it came on Gideon (Jg 6³⁴), Jephthah (12²), and others, and they went out to war and judged Israel. The spirit of the Lord suddenly carries Elijah away, one knows not whither (1 K 18¹²), and men fear that it may cast him upon some mountain or into some valley (2 K 2¹⁶); and with 'the hand of the Lord' upon him he kept pace with Ahab's chariots (1 K 18⁴⁶). Probably the conception of God and that of the spirit of God always corresponded to one another. In early times God was conceived more as a natural than a spiritual force; His operation, even when He might operate on the ethical side of man's nature, was physical. Hence 'spirit' connotes suddenness and violence in the Divine operation. When one is seen performing what is beyond man to do, or what is beyond himself in his natural condition, both to himself and to the onlooker he appears not himself, he is another man; he is seized and borne onward by a power external to him—the spirit of the Lord is upon him. One under the spirit is always carried away by an impulse, sudden, and often uncontrollable. Hence the terms descriptive of the spirit's operation suggest suddenness and violence; it 'comes upon' (על 1 S 19^{20, 23}), 'comes mightily upon' (גלה 1 S 10^{6, 10}), 'falls upon' (Ezk 11⁵), 'descends and rests on' (מנוח 1 S 11^{23, 25}), 'puts on' a man as a garment (לבוש Jg 6³⁴, 2 Ch 24²³), 'fills' him (Mic 3⁸), and the like. Similarly it is said that the 'hand of the Lord' comes upon him (Ezk 1³, 2 K 3¹⁵), and overpowers him (Is 8¹¹). All these expressions describe the phenomena visible to the onlooker, or experienced by the prophet. But it is the complex manifestation that they describe; they do not analyze it, nor answer the question, Where amidst these phenomena is the point at which the spirit operates?

It is remarkable that in the literary prophets little reference is made to the spirit, and the references made are rather allusive than formal

and direct. Hosea (9⁷) calls the prophet 'the man of the spirit'; Isaiah (30¹⁻², cf. Job 26⁴) uses 'spirit of J'" as parallel to 'mouth of J"'; and Micah (3⁹) declares himself full of power 'by the spirit of J'" to declare unto Jacob his transgression.* But other prophets, including Amos and Jer., do not express the idea. The explanation of this fact is probably this: in this age the violent excitation usual in early prophecy had almost disappeared; it was the violent impulse to speak or act that 'spirit' particularly connoted, and hence references to spirit are rare. Isaiah on one occasion (8¹¹) speaks of the 'hand' of J'" being upon him, which may refer to some unusual elevation (though cf. Jer 15¹⁷), but the 'power' which Micah was conscious of was probably moral, though whether intermittent or not may be uncertain. Some have supposed that in this age the spirit was regarded as a permanent possession of the prophet, and for that reason not specially alluded to.† In Nu 11²⁵ the spirit that was upon Moses is spoken of, part of which rested on the elders, and they prophesied. Their prophesying was momentary and under great excitation; but whether the 'spirit' was considered a permanent possession of Moses or not is not clear (cf. v. 25 with v. 29). And the same uncertainty remains with regard to the 'spirit' that was on Elijah (2 K 2^{9f}). In Is 11^{2f} the spirit of J'" is said to descend and rest upon the Messiah, giving him discernment, counsel, and might in rule, as well as the fear of the Lord; and this spirit would seem a permanent possession, though revealing itself as occasions required. But the failure of the canonical prophets to refer to the spirit is scarcely due to their thinking of it as a permanent power indwelling in them; it is rather due to their not thinking of the spirit specially at all. The cessation of the ecstasy left the prophet his proper self; he was conscious of being an independent individual person, and as such he entered into fellowship with God. He was no more driven or overpowered by an impulse from without, which superseded his proper self; his communion with God was a communion of two moral persons. God, it is true, did not speak to him face to face and externally as He did to Moses, but He spoke no less really to his mind. The nature of the communion is clear from the dialogues in Is 6 and Jer 1. In its full perfection it is seen in Jeremiah, who should be taken as the true type of the prophet.

At a later time references to the spirit again recur, particularly in Ezekiel. How far the trances of Ezekiel were real, being partly due to a natural constitutional temperament, and how far they are mere literary embodiment of an idea, may be disputed. In the latter case the idea they express would be the one running through all his prophecies, the transcendent majesty and power of God, and the nothingness of the 'child of man,' who is a mere instrument in the hand of God. In this late age various ideas of the spirit prevail. A prophet like Joel goes back to the early forms of prophecy, and reproduces the ancient idea of the spirit (2^{28f}. [Heb. 3^{1f}.]). In other passages the spirit appears a permanent possession, being like the gift bestowed on one when consecrated to an office (Is 61¹); while in others still the spirit seems generalized into the Divine enlightenment and guidance given to Israel through its leaders and prophets all down its history (Is 59²¹ 63¹⁰, Hag 2⁵). But amidst some variety of conception certain ideas of the spirit always remain: the spirit is

something external to man, something Divine, something bestowed by God on man.

Taking into account what has been said above of the 'spirit,' it appears that what has been called the *prophetic state* varied at different times. Two periods can be distinguished, though not separated from one another by any sharp line of demarcation: the early prophetic period, and the period of the literary prophets. (1) In the early period mental excitation was common, though the excitation might be of various degrees; self-consciousness was not lost, and memory of what was experienced remained; the NT rule that 'the spirits of the prophets are subject to the prophets' was in most cases verified. The revelation in this period often took the form of dream and vision. The OT couples these two together (Nu 12⁶, Jl 2²⁸ [Heb. 3¹]). Dream and vision are not identical, but they differ chiefly in degree—the degree to which the senses are dormant, and the consciousness of what is external is lost, and reflective control over the operations of the mind is suspended. The prophets regard their dreams and visions as something objective in the sense that they are caused by God (Am 7^{15f}). But in attempting to analyze the prophetic mind we must remember that dreaming and seeing a vision are forms of *thinking*; the contents of the dream and vision are not objective, as things seen with the bodily eye are objective, they are creations of the mind itself. Perhaps the best idea of the prophetic mind in this period or in this condition might be got by reflecting on the phenomena of the dream. Now, it is in this period that the phraseology current all down the prophetic age originated, and it is the phenomena of this period that it describes—such phraseology as 'see,' 'vision,' 'hear,' 'the word of the Lord,' and such like. In this early time prophets did 'see' and had 'visions'; they did 'hear' the 'word of the Lord,' just as one sees persons and things, and hears words audibly in a dream. The terms truly describe the mental experiences of the prophet, and are not mere figures of speech. But in the time of the canonical prophets visions and dreams virtually ceased, though the prophetic language still remained in use. It is quite possible that in some cases the literary prophets still had visions and 'heard' words, but certainly they use the ancient phraseology in a multitude of instances when they had no such experience. Jer. alludes with aversion to the 'dreams' of the false prophets. It is possible that these dreams were in some cases real, being due to the agitations produced by the political crises of the time. If so, it is another evidence that these prophets still occupied a position which the true prophecy had long abandoned. (2) Perhaps the best idea of the mental state of the prophet in the purest stage of prophecy would be got by considering the condition of the religious mind in earnest devotion or rapt spiritual communion with God. Even the earliest prophets intercede with God (Am 7, cf. Ex 32¹³); and Oehler has drawn attention to the fact that the communication of a revelation to them is often called 'answering' them—the same expression as is used in regard to prayer (Mic 3⁷, Hab 2^{19f}, Jer 23³⁵). The prophets asseverate very strongly that it is the word of God which they speak. But it is doubtful if any psychological conclusions can be drawn from their language. For it is to the *contents* of their prophecies that they refer; and though it might seem strange that they do not allude to any mental operations of their own, the analogy of the devout worshipper suggests an explanation. A person in earnest prayer to God and communion with Him, though his mind will certainly be profoundly exercised, when light

* Some scholars regard the phrase *by the spirit of J'"* as an explanatory gloss (Well., Nowack, etc.). The sense of *nk* is uncertain; it may mean *with, by the aid of*, Gn 41, Job 26⁴, or it may be accus. sign: 'full of power, even the spirit of J'"', RVm.

† Giesebrecht, *Die Berufsbegabung der alttest. Proph.*

dawns on him, or certitude is reached, or conduct becomes plain, will also feel and say with certainty that it was God who gave him the result he reached. It might be rash to say that the experience of such a devout mind is perfectly analogous to that of the prophetic mind, but the analogy is probably the nearest that can be found.

It may be said, therefore: (1) that the prophet's mind in revelation was not passive, but in a state of activity. Even the 'call' to prophesy was not addressed to a mind empty or unoccupied with the interests of the nation. The 'call' came to the three great prophets through a vision (Is 6, Jer 1, Ezk 1), but it is recognized that the 'vision' contains strictly nothing new; it is a combination of ideas and thought-images already lying in the mind. Isaiah, for example, had often thought of the Holy One of Israel, the King, previous to his vision; he had often considered the sinfulness of the people, which he himself shared; and no doubt he had forecast the inevitable fate of the people when J^r arose to shake terribly the earth. These thoughts probably occupied his mind at the moment of his call, for it came to him as he worshipped J^r in the temple, and beheld His glory (cf. also Jer 1⁴⁻¹⁰). Neither can the *compulsion* of which the prophets speak be regarded as anything physical. Even when Amos says, 'The Lord God speaks, who can but prophesy?' the constraint is only moral. And similarly when Jer. says, 'Thou didst induce (or entice) me, and I was induced' (20⁷), he refers to the conflict in his own mind described in 1⁴⁻¹⁰; and even when he speaks of the word of J^r being as a fire in his bones, compelling him to speak, when, to avoid persecution, he had resolved to be silent, there is nothing more than such moral constraint as was felt by the apostles in the early days of the Church, or by one now with earnest convictions. Again, the allegation, often made, that the prophets did not understand their own oracles, can hardly be substantiated. The passage 1 P 1^{10a} says that the prophets 'searched what time or what manner of time the spirit of Christ which was in them did point unto'; but first, it speaks of the prophets as a body, and of the spirit common to them all. It does not say that any prophet searched his own prophecies. The apostle probably generalizes the instance referred to in Dn 9², where Daniel searches the prophecies of Jeremiah. Further, the point to which the search was directed was the *time or manner of time*, nothing else. And this point, if indicated at all, was indicated so obscurely that it had to be inferred from the other contents of the prophecy (cf. Mt 24³⁴). (2) The kind of operation of the prophetic mind when reaching or perceiving truth was intuition. In the early times of prophecy the excitation or comparative ecstasy was common. This elevated condition of the intuitive mind was natural to an Oriental people, and in an early age. It was a thing particularly natural when truth was new; when convictions regarding God, and man's duty in moments of great personal responsibility or national trial, were for the first time breaking on the human mind. But, on the other hand, it is equally natural that as prophecy became more regular and acquired the character of a stable institution, such accompaniments of revelation in the mind would gradually disappear. And the same effect would follow from the gradual accumulation of religious truths. These were no longer altogether new. As fundamental verities they had entered into the consciousness of the nation. What was new was only the application of them to the particular crisis in the individual's life or the nation's history, or that further expansion of them needful in order to make them applicable. But this was always new.

No truth uttered by a prophet has attained the rank of a maxim of reflection or a deduction from prior truths. The prophet never comes before men inferring. His mind operates in another way. The truth reached is always a novelty to him, so that he feels it to be an immediate communication from God. But it is vain to speculate how the Divine mind coalesces with the human, or to ask at what point the Divine begins to operate. Some have argued that the operation was dynamical, that is, an intensification of the faculties of the mind, enabling it thus to reach higher truth. Others regard the Divine operation as of the nature of suggestion of truth to the mind. What is to be held, at all events, is that revelation was not the communication of abstract or general religious ideas to the intellect of the prophet. His whole religious mind was engaged. He entered into the fellowship of God, his mind occupied with all his own religious interests and all those of the people of God; and his mind thus operating, he reached the practical truth relevant to the occasion.

iii. THE FALSE PROPHETS. — Reference has already been made in the historical sketch to the so-called false prophets, but the phenomenon of false prophecy has points of connexion also with the prophetic mind. A hard-and-fast line of demarcation between true and false prophecy can hardly be drawn. The fact that prophecy was the embodiment of a religious-national spirit accounts for what is called false prophecy. When the spirit that animated the prophet pursued predominantly national ends, he was a false prophet; when the ends pursued were religious and ethical the prophet was true, because in the religion of J^r the national was transient, and the ethical abiding.

In early times men everywhere felt the nearness of the supernatural; the Divine, with its manifestations, was all about them. Those who seemed or who professed themselves to be inspired were accepted as being so (cf. the reception given to Ehud by the king of Moab, Jg 3^{20a}). The spirit of the time was not critical; it was reverent, or, as we might now say, credulous. In the first conflict which we read of between true and false prophecy (1 K 22) the 400 prophets of Ahab were false and Micaiah true, but Micaiah did not consider the pretensions to inspiration of his opponent Zedekiah to be false. He was inspired, but it was by a lying spirit from the Lord (1 K 22^{22, 23}). This lying spirit was put by J^r in the mouth of the prophets of Ahab that they might entice him to his destruction. The explanation given by Ezekiel (Ezk 13, 14) is similar: J^r deceives the prophet that He may destroy him and his dupes alike (14⁹). But J^r's deception of the prophets in order to destroy them and those who consult them is in punishment of previous evil (1 K 22⁸, Ezk 14¹⁻¹¹, 2 S 24¹). A profounder conception of the ethical nature of J^r, and a dislike to regard Him as the author of evil (cf. 2 S 24¹ with 1 Ch 21¹), combined perhaps with a more critical judgment of their contemporaries, led others to a different explanation. To Jeremiah the false prophet is not inspired by a lying spirit from J^r, he is not inspired at all. He speaks out of his own heart, and has not been sent (Jer 23^{16, 21, 25, 26}). Micah goes further and analyzes the prophet's motives: he speaks what men wish to hear (2¹, cf. Is 30^{10a}), and for interested ends—'When they have something to chew with their teeth they cry, Peace; but whoso putteth not into their mouth, they preach war against him' (3⁶). And the priest Amaziah (Am 7¹²) seems to have formed his idea of the prophets as a whole from this class.

There are several kinds of false prophecy of little interest except as casting light on the re-

ligious condition of the people, *e.g.* prophecy by other gods than J", a thing perhaps not very prevalent in the prophetic age; and prophecy as a professional means of gaining a living. There were persons who assumed the hairy mantle and affected prophetic phraseology, *ne'um J"*, 'saith J"' (cf. Jer 23²¹ *yin'dmū ne'um*, Ezk 13⁶⁻⁷), apparently for the sake of bread (Mic 3³). It was customary to bring presents to the seers and prophets in ancient times when people consulted them (1 S 9⁸, 1 K 14³, 2 K 8⁸; cf. Nu 22⁷), and the practice not unnaturally led to deterioration in the prophetic class. But in relation to the question of the 'prophetic mind,' the only 'false' prophecy of interest is that which we see among prophets all professedly and alike prophets of J". Men who alike regarded prophetic truth as something revealed by J" in the heart, are found not infrequently to give forth as the word of J" conflicting judgments. They advised contrary steps in a political emergency, or they predicted diverse issues in regard to some enterprise on which they were consulted. Ahab's 400 said, 'Go up to Ramoth-gilead, for J" shall deliver it into the hand of the king'; but Micaiah said, 'I saw all Israel scattered upon the mountains' (1 K 22¹²⁻¹⁷). Jer. predicted that the Chaldean supremacy would last 70 years, while Hananiah prophesied that in two years' time the exiles would return, with Jehoiachin at their head (Jer 28). To us now, with our ideas of the prophet, and looking back to him as a great isolated and almost miraculous personage, divinely accredited, two things seem surprising, *first*, that any one should suppose himself a true prophet of J" who was not; and, *second*, that the people failed to discriminate between the true and the false. As to the first point, it is very difficult to discover on what plane of religious attainment those called false prophets stood, and what kind of consciousness they had. Evidently, they had lofty conceptions of J" in some of His attributes. These were perhaps more His natural attributes, such as His power, than those of His moral being. It is here perhaps that the point of difference lies—J" was not to them absolutely or greatly a moral being. He was a natural force, and His operation in a way magical: they thought His mere presence in the temple guaranteed its inviolability. They were Jehovists, but J" was to them greatly a symbol of nationality, and they were fervid nationalists. Such feelings coloured their outlook into the future, making them the optimists that they were, always crying, Peace and Safety! Further, in whatever way the true prophet was assured that he spoke the word of J", the evidence was internal. He had the witness in himself. It was a consciousness, something positive, but not negative. The person who wanted it had no consciousness of the want. The case is similar to, if not identical with, what is still familiar in religious experience.

As to the second point, the people's failure to discriminate between the true and false prophets, it is evident that they had no criterion by which to decide. There was usually nothing in the mere prophecy or prediction on one side or the other to carry conviction. They had to bring the criterion with them in their own minds, *i.e.* to go back to the principles on which the prophecy was based—He that is of the truth heareth my words. The condition of the people's mind can be observed in Jer 18¹⁸. Here we see that the people believed in prophecy as the word of J", and in their prophets; but Jeremiah, who contradicted these prophets, they considered a deceiver and no lover of his country. Their state of mind appears even more clearly from Jer 28. Hananiah predicted that the Exile would be over in two years, while Jeremiah said it would last two generations. Naturally, the

people gave their voice for Hananiah, and for the moment Jeremiah was put to silence. There were several things which it has been supposed might have served as external criteria of true prophecy: (1) the prophetic ecstasy; (2) miracle; and (3) fulfilment of the prediction. But all these things when used as tests to discriminate between one prophet and another were liable to fail.

(1) The ecstasy in greater or less degree was a thing natural to an Oriental people; in the early prophetic period it was common; it was, however, no essential element in prophecy. It was no evidence that a prophet was true, neither was it any evidence that he was false, though if evidence at all it was rather evidence that he was false, at least in later times, for in the ethical prophecy of the 8th century it rarely appears. Ewald, indeed, has observed that the ecstasy was liable to be a source of false prophecy, for one subject to such a condition might think himself inspired by J" when he was not.

(2) Miracle might certainly be an evidence and test of true prophecy, *e.g.* in the conditions proposed by Elijah at Carmel; but such conditions were rarely possible. In the OT miracle means wonder; it is something extraordinary, nothing more. The force of a miracle to us, arising from our notion of Law, would not be felt by a Hebrew, because he had no notion of natural law. Further, the ancient mind was reverent, or superstitious, and felt itself surrounded by superhuman powers. It was not J" alone or His servants that could work wonders; the magicians in Egypt also did so (Ex 7¹¹⁻²² 8⁷). Again, even when J" empowered one to give a sign or wonder, the meaning of the wonder might be ambiguous. In Dt 13¹⁶ a prophet is supposed permitted to work a miracle at the same time that he advocates worship of other gods than J"; but the miracle so far from authenticating him as true has quite another purpose: it is to prove the people whether they love J" with all their heart. To one who knows and loves J" no miracle will authenticate another god. And to all this has to be added the fact that from Amos downwards miracle plays hardly any part in the history of prophecy (though cf. Is 7¹¹ 38⁷⁻⁸), while it was just in the last days of the kingdom of Judah that false prophecy was most prevalent.

(3) The test of fulfilment of the prophetic word is proposed in Dt 18²¹. But this criterion was one which was serviceable less to individuals than to the people, whose life was continuous and extended. As a guide to the conduct of individuals at the moment when the prediction was uttered it could be of little service. Occasionally predictions were made which had reference to the near future, as when Micaiah predicted Ahab's defeat at Ramoth-gilead, or when Jeremiah foretold the death of Hananiah within the year. But usually the prophecies bore upon the destinies of the State, and had reference to a somewhat indefinite future. This peculiarity perplexed men's minds, and led to the despair or the disparagement of prophecy. They said, 'The days are prolonged, and every vision faileth'; or if they did not go so far they said of the prophet, 'The vision that he seeth is for many days to come, and he prophesieth of the times that are far off' (Ezk 12²²⁻²⁸). While, therefore, in the prolonged life of the people the event might ultimately be seen to justify the prophet (Ezk 2⁵), some more immediate test was necessary for the guidance of the individual. Such a test is proposed by Jeremiah. The test lies in the relation of the prophecy to the moral condition of the people. The prophet who predicts disaster and judgment needs no further authentication: the nature of his prophecy proves him true; the prophet who prophesies Peace, let the event justify him! (Jer 28³⁻⁹). The interesting

thing in all this is that so far as religious certitude was concerned the people of Israel were exactly in the same position as ourselves. Neither the supernatural nor anything else will produce conviction apart from moral conditions of the mind. This is perhaps a truism because the conviction required was not mere intellectual belief, but religious faith in a person and in His word.

False prophets are defined to be those by whom Jⁿ did not speak, and true prophets those by whom He spoke. The definition is true on both its sides, and there are instances when nothing more can be said. But usually it is possible to go a step further back. The opposite way of stating the point has also a truth in it: Jⁿ did not speak by certain prophets because they were false. His speaking or not speaking was not a mere occurrence, isolated and in no connexion with the previous mind of the prophets and their religious principles. It is extremely difficult to realize the condition of people's minds at any time in Israel. There were many planes of religious attainment. There were worshippers of other gods than Jⁿ; and there were those who combined Jⁿ and other gods in their worship (Zeph 1). There were worshippers of Jⁿ to whom Jⁿ was little more than a symbol of their nationality. There were worshippers of Jⁿ who, in addition to regarding Him as the impersonation of their nationality, ascribed to Him lofty natural attributes, such as power, but who reflected little if at all on the moral aspects of His being. And there were those to whom the moral overshadowed all else, and who regarded Jⁿ as the very impersonation of the moral idea. Scholars will dispute how far moral conceptions of Jⁿ prevailed among the people from the first, and also how much moral teaching was set before them at the beginning. But the great lesson-book in which thoughtful men read was the national history and fortunes. This was written by the finger of God. In the prosperous days after David little advance might be made; men settled on their lees. But by and by God sent unto them 'them that pour off' (Jer 48¹²). The disasters suffered in the obstinate Syrian wars from Omri onwards awoke the conscience of men, revealing the nature of Jⁿ, and directing the eye to the national sores; for at all times national disaster and internal miseries were felt to be due to the displeasure of God (2 S 21¹⁴, 24¹⁸, 1 K 17¹). Thus, though history casts little light on its growth, there arose a society educated in the things of God, and it was out of this society that the true prophets were called; for the idea that the breadth and wealth of religious and moral conceptions in a prophet like Amos were all supplied to him by revelation after his call, will hardly be maintained. Those who stood on a lower plane were not suited for the purposes of Jⁿ, and He did not speak by them. They came forward in His name, but it was mainly national impulses that inspired them.

There are three lines on which Jeremiah opposes the other prophets: the political, the moral, and the personal. (1) The false or national prophets desired that Israel should take its place among the nations as one of them; be a warlike State, ride on horses, build fenced cities, and when in danger seek alliances abroad. Jeremiah and the true prophets instead of all these things recommend quiet confidence and trust in Jⁿ (Is 7⁹ 17¹). (2) The national prophets had not a stringent morality. Jeremiah charges some of them with being immoral (Jer 23¹⁴). But what characterized them all was a superficial judgment of the moral condition of the nation, which was but the counterpart of their inadequate conception of the moral being of Jⁿ. The condition of society did not strike them as at all desperate. Hence they preached Peace, and

healed the hurt of the people slightly. On the other hand, the words of Micah, 'I am full of power to declare to Jacob his transgressions' (3⁶), might be taken as the motto of every true prophet. It is possible, even true, that the demands of the true prophets were ideal, that they could not be realized in an earthly community, that it was the spirit of the future yet to be that was reflecting itself in their hearts—a future that even to us is still to be; and it is not impossible that the people felt this and passed by their words as impossible of realization (Jer 2²⁵)—a very lovely song of one that hath a pleasant voice (Ezk 33³²). (3) With his tendency to introspection Jeremiah analyzes his own mind; and that naïve feeling of former prophets, that they spoke the word of Jⁿ, is to him a distinct element of consciousness. He knows that he stands in the council of Jⁿ, and he is certain that the false prophets have not his experience (23²⁸, 29). He does not hesitate to go further and assert that those prophets whom he opposes are conscious that they have no true fountain of inspiration within them. Their prophetic manner, 'saith Jⁿ,' is affectation (23³¹), and there is nothing personal in the contents of their oracles, which they steal every one from his neighbour (23³⁰). The prophets of this time speak of their 'dreams,' and it is possible that the crisis in the nation's history agitated them and produced mental excitation; but it is evident that they represented a phase of prophecy which had long been overcome. It is strange that, from the days of Micah ben Imlah under Ahab down to the fall of the Judæan State, no change seems to have taken place in the position and principles either of the true prophets or of the false.

C. *THE TEACHING OF THE PROPHETS.*—The idea of the 'prophet,' one who speaks from God (B. i.), leaves a very extended sphere of action to the prophet. The prophet is always a man of his own time, and it is always to the people of his own time that he speaks, not to a generation long after, nor to us. And the things of which he speaks will always be things of importance to the people of his own day, whether they be things belonging to their internal life and conduct, or things affecting their external fortunes as a people among other peoples. And as he speaks to the mind and consciousness of the people before him, he speaks always with a view to influence it. On many, perhaps on all occasions, the most powerful means of exerting an influence on the mind of his time may be what he is able to reveal to it of the future, whether the future be full of mercy or of judgment; but whether he speaks of the present or the future the direct and conscious object of the prophet is to influence the people of his own generation. For this purpose the prophet reviews, not only the forces and tendencies operating in his own nation, but all the forces, moral and national, operating in the great world outside (Jer 1¹⁰).

Influenced partly by the great apologetic use made of the prophecies in the NT, interpreters were for long accustomed to lay almost exclusive stress upon the predictive element in prophecy, so that prophecy and prediction were considered things identical. The function of the prophet was supposed to be to predict the Messiah and the things of His kingdom; and the use of the prophecies was to prove that Jesus was the Messiah, or more generally to show the supernaturalness of revelation. However legitimate such a use of the prophecies may be, modern interpreters have rightly felt that it failed to take into account a very large part of their contents. The religious and moral teaching of the prophets was overlooked. Hence in modern times a different view has arisen, to the effect that the function of the prophet was

to teach moral and religious truth. But this view is equally one-sided with the other. To us now to whom the apologetic use of prophecy has become less necessary, the moral teaching of the prophets may seem the most important thing in their prophecies. But if any prophetic book be examined, such as Amos or Hos 4-14, or any of the complete prophetic discourses contained in a prophet's book, such as Is 1. 5. 6. 2-4, it will appear that the ethical and religious teaching is always secondary, and that the essential thing in the book or discourse is the prophet's outlook into the future. The burden of the teaching of all the great canonical prophets is: (1) that the downfall of the State is imminent; (2) that it is J' who is destroying it; and (3) that the nation which shall overthrow it, be it Assyria or Babylon, is the instrument of J', the rod of His anger, raised up by Him to execute His purpose. And the prophet's religious teaching regarding the nature of J', and the duty and sin of the people, is subordinate, and meant to sustain his outlook into the future and awaken the mind of the people to the truth of it (cf. above A. iii. 3). This may be said also of such a NT prophet as John the Baptist, and in a sense even of our Lord. The Baptist's theme was, The kingdom of heaven is at hand; and his ethical teaching, Repent! Bring forth fruits meet for repentance! was designed to prepare men for entering into the kingdom. And our Lord's theme was the same, the coming of the kingdom of God; and His moral teaching, such as the Sermon on the Mount, was intended to show the nature of the kingdom and the condition of mind necessary to inherit it. Of course, the outlook of the prophets was not bounded by the downfall of the State. Their outlook embraces also that which lies beyond, for the great events transacting around them, being all moral interpositions of J', seem to them always to issue in the coming in of the perfect kingdom of God; and this final condition of the people is virtually their chief theme.

i. GENERAL TEACHING.—In general, the prophets may be characterized as religious idealists, who appealed directly to the spirit in man; who set the truth before men and exhorted them to follow it, not out of constraint, but in freedom of spirit, because it was good, and the will of their God. They never dreamed of legislative compulsion. The law recognized by Amos is the law of righteousness and humanity written on all men's hearts, whether Jew or heathen; the law of Hosea is the law of love to Him who had loved the people and called His son out of Egypt. The prophets really occupied the Christian position; they demanded with St. Paul that men's conduct and life should be the free expression of the spirit within them, a spirit to be formed and guided by the fellowship of God and the thankful remembrance of His redemption wrought for them. Later prophets perceive that man's spirit must be determined by an operation of God, who will write His law on it (Jer 31³³), or who will put His own spirit within him as the impulsive principle of his life (Is 32¹⁵, Ezk 36²⁶⁻²⁷). Hence ritual has no place in the prophetic teaching, that which is moral alone has any meaning. No doubt the prophets assail abuses in ritual worship as well as in social life, and men more practical than they embody their principles in legislative form, for the prophets, instead of being mere expounders of the Law, are indirectly the authors of the Law; but when this legislation, even though an embodiment of prophetic teaching, is elevated by authority into State or ecclesiastical law, however necessary the step might be, it is a descent from the NT position occupied by the prophets.

The special teaching of the individual prophets

is treated under their respective names. Here only two or three general points can be alluded to.

(1) The prophets all teach that J' alone is God of Israel, and that He is a moral Being, whose acceptable service is a religious and righteous life (Mic 6⁸), and not mere ritual (Hos 6⁶, Is 1¹⁰⁻¹⁷, Jer 7²¹⁻²², 1 S 15²²). Questions have been raised whether in these points the prophets follow a law, such as the Decalogue, or whether the moral Decalogue be not, in fact, a concentration of their teaching. All classes of the people agreed with the prophets that J' was the particular God of Israel, but a theoretical monotheistic faith cannot have prevailed among the mass of the people. Such a faith, though only informally and indirectly enunciated by them, evidently prevailed among the prophets from Elijah downwards; but how much older the belief may be and how widely it was entertained among the people, the very scanty history scarcely enables us to determine. Perhaps too much stress may be laid on the value, particularly in early times of simple thought, of an abstract monotheism. What was important was the nature of J', the closeness of relation to Him which conditioned human life, and the worshipper's feeling that He was *his* God; whether other beings to be called gods existed, and were served by the nations, was practically of little moment. Even the polytheism of the heathen sometimes came practically near to monotheism. Worshipers usually devoted themselves to one out of the many gods known in their country; they usually, therefore, thought of him as god alone, and gradually assigned all the distinctive attributes of other deities, i.e. virtually of deity, to him. And one can conceive how particularism or monolatry, the idea that J' was the particular God of Israel and of Israelites, may have had in a rude age an educative and religious influence which an abstract monotheism might not have exerted. To it may be greatly due that extraordinary sense of the presence of J' in the people's history and the individual's life, that personal intimacy with God, characteristic of OT religion.

So far as the *worship* of J' is concerned, it is remarkable that Elijah, though contending against Baal worship, is not said to have assailed the calves. The history of Elijah is a fragment, and it may be precarious to draw conclusions from the historian's silence. Even Amos does not refer formally to the calves; he condemns the ritual worship as a whole, and threatens with destruction the seats of calf-worship; and his condemnation of the whole probably applies to the details; at least it is wholly inept to infer that he saw no evil in the calves. Hosea is the first to condemn them expressly, and in Judah Isaiah in like manner often assails images (Is 26¹⁷). When the early prophets assail the worship at the *high places*, it is the nature of the worship that they attack, not the multiplicity of altars. But Jer. and Ezek., along with Deut., go further, and condemn the high places themselves; they are Canaanite and heathen (Dt 12², Jer 27, Ezk 20²⁷⁻²⁸). * The prophets' attacks on sacrifice are in opposition to the exaggerated worth assigned to ritual by the people. Their position is not, as is often said, that sacrifice without a righteous life is an abomination to J', but rather this: that sacrifice as a *substitute* for a righteous life is an abomination. It is a question of service of J': and J' desires a righteous life so much more than sacrifice, that He may be said not to desire sacrifice at all (Hos 6⁶).

(2) Though the prophets use the word 'covenant' little down to the time of Deut. and Jer., the idea they express of the relation of J' and Israel is the same. J' says in Am 3² 'You only have I known of all the

* In Mic 1⁵ LXX reads 'sin of Judah' for 'high places of Judah.'

families of the earth.' J''s choice of Israel was a conscious, historical act. With this all the prophets agree. No motive is assigned for the choice, and no purpose to be served by Israel thus chosen is referred to. In Amos for all that appears, the choice of Israel is virtually an act of what is called sovereignty. In Hosea the act is regarded as due to J''s love (11¹). This makes the act moral, and explains it, though the love itself is necessarily inexplicable. In Deut. the love is denied to be due to anything in Israel, and seems just explained by itself (10⁷). In Isaiah the idea of a purpose had in view in the choice begins to appear. J'' is the universal sovereign, and His making of Israel His people was in order that He might be recognized as God and alone exalted (21¹). In Isaiah sin is insensibility to J'' the King, levity and self-exaltation; and religion is recognition of J'' and His benefits, a constant consciousness of Him and trust in Him. While Jer. shares Isaiah's idea of what true religion is (9²⁴), he speaks of Israel being chosen 'that they might be unto me for a people, and for a name, and for a glory.' In other words, Israel was chosen that by its character it might reflect moral fame upon its God, that is, make known J'' to the world of men, if not by active operations, by showing in its own character the nature of its God. The prophet of Is 40 ff. often expresses the same idea (43¹ 44²³), but he adds to it the conception of an active operation of Israel in making J'' known to the nations (Is 42¹⁻⁴ 49¹⁻⁶ 60¹⁻⁶). This is the highest generalization regarding Israel's place in the religious history of mankind, and the purpose of J'' in its election.

(3) The prophets address themselves to the nation; but in appealing to the whole they appeal to each individual, though no doubt specially to those whose conduct is influential in shaping the destiny of the whole. J'' chose a nation because His idea of mankind, of which He will be God, is that of a social organism. It is this organism of which He is God. But though the relation might seem to be with the ideal unity, it operated in disposing all the parts making up the unity rightly to one another. And in this way each individual felt J'' to be his God. It is absurd to argue that the nationalism of OT religion excluded individual religion. But the later prophets feel that a true social organism can be created only out of true individual members, and they begin to construct a whole out of single persons. Many things united to work in this direction. The nation no longer existed, but the individuals remained, and J'' and religion remained. Moreover, personal piety, such as was seen most conspicuously in Jer., but was not confined to him, was a great creative force; the sense of relation to God made powerful men, and the sense of the relation in common united them. Reflexion also did something. Ezekiel saw the practical need of reconstructing a people, and recognized this to be his task. He felt himself in a certain way a Pastor with a care of individual souls. And he saw the need of creating independent individual personalities by disentangling them from the national whole and its doom—'All souls are mine, saith J''; as the soul of the father so also the soul of the son.' But, however individualistic the operations of the prophets of this age were, they never abandon the idea of founding a new social organism. Individualism is but the necessary stage towards this. J'' is God of mankind, not of an inorganic mass of individual men.

ii. PREDICTIVE PROPHECY.—As the prophets are absorbed in the destinies of the kingdom of God, it will be chiefly *momenta* in its history and development and its final condition that will form the subject of their predictions. They will have little occasion to refer to the future of individuals,

or to predict events in their history. There are instances: e.g. Samuel predicted some things that would happen to Saul, which the history declares did happen (1 S 9. 10). Jer. predicted the death of Hananiah within the year, which took place (Jer 28). But most of the predictions relate to the history of the State and its destinies. Micah predicted the defeat and death of Ahab at Ramoth-gilead (1 K 22). Isaiah predicted the failure of the Northern coalition to subdue Jerusalem (Is 7); he also predicted the overthrow in two or three years of Damascus and Northern Israel before the Assyrians (Is 8. 17). In like manner he predicted the failure of Sennacherib to capture Jerusalem; while, on the other hand, Jer. predicted the failure of the Egyptians to relieve Jerusalem when besieged by Nebuchadnezzar. And in general, apart from details, the main predictions of the prophets regarding Israel and the nations were verified in history (e.g. Am 1. 2). The chief predictions of the prophets relate (1) to the imminent downfall of the kingdoms of Israel and Judah; (2) to what lies beyond this, viz. the restoration of the kingdom of God; and (3) to the state of the people in their condition of final felicity. To the last belong the Messianic predictions. It is Israel, the kingdom and people of God, that is properly the subject of prophecy, but other nations are involved in its history; e.g. Assyria is the instrument in the hand of J'' in humiliating Israel, and Babylon is the obstacle which has to be removed before its Restoration, and thus these kingdoms and others become also the subject of prophecy.

1. *Prediction in general.*—There are two questions in connexion with prophetic prediction which have given rise to discussion: first, how are the prophetic anticipations as to the future to be explained? and second, what is the explanation of the prophet's feeling that the events which he predicts, e.g. the downfall of the State, the coming of the day of the Lord, and the inbringing of the perfect kingdom of God, are imminent? As to the first point, it must be obvious that the prophetic anticipations or certainties cannot be explained as the conclusions of a shrewd political insight into the condition of the people or the nations at the time. Neither can the anticipations of the nation's dissolution be the mere pessimistic forebodings of a declining and exhausted age, for the material and political condition of the North in the time of Amos, and of the South in the early days of Isaiah, was not such as to suggest such gloomy outlook. And least of all can it be pretended that the predictions are only apparent, being, in fact, written *post eventum*. It has been suggested that the human mind, or at any rate some rarely endowed minds, possess a faculty of presentiment or divination, and that it is to this faculty that the prophet's anticipations or certainties in regard to the occurrence of future events are due. Certainly, belief in the possession of such a faculty by peculiarly gifted persons has been prevalent in different ages and among different peoples, but anything like scientific proof of the existence of the faculty has probably never been offered. It would be remarkable if such a large number of persons as the prophets of Israel should all be endowed with this extraordinary faculty. And it would be even more strange if a faculty of this kind, the operation of which appears to be blind and unrational, should be found to manifest itself so generally just in the purest period of prophecy, at the time when prophecy had thrown off all naturalistic and physical characteristics and become purely ethical. Probably, if any one of the data of this supposed faculty of presentiment were analyzed, it would be found to be the result of a

complex process. There would be, first, a peculiar temperament, suggesting events sad or joyous; then certain facts presented to the mind, and then the unconscious operation of the mind on these facts, the whole resulting in the presentiment or vaticination. There may be obscure capacities in the mind not yet explored; and there may be sympathetic *rapproches* of human nature with the greater nature around, and of man's mind with the moral mind of the universe, which give results by unconscious processes; and if there be such faculties and relations, then we may assume that they would also enter into prophecy, for there is nothing common or unclear in the nature of man. In point of fact such presentiments as we can observe to be authentic are chiefly products of the conscience or moral reason; and Jer., as has been said, insists that true prophecy in general is based on moral grounds and consists of moral judgments. And certainly all the prophets, in analyzing their intuitions of the future and laying them before the people, usually present them in the form of a moral syllogism. Thus Mic 3⁹, after enumerating the misdeeds and oppressions of the heads of the house of Israel says, 'Therefore on your account shall Zion be plowed like a field.' And Is 5¹¹, having described the luxuriousness and ungodly levity of his day, says, 'Therefore hath hell enlarged her maw.' Everywhere the menacing future is connected with the evil past by *therefore*.* Cf. Am 1. 2.

The other question, How is it that the prophets bring in the consummation and final perfection of the kingdom of God immediately on the back of the great events in the history of the people and the nations taking place in their own day? may not be susceptible of a single answer. (1) An explanation has been sought in what is called the *perspective* of prophecy. Just as one looking on a mountainous region sees a hill which appears to rise up close behind another, but when he approaches nearer he finds the second to have receded a great way from it; so the prophet sees great events close behind one another, though in history and time they are far apart. This is an illustration, but no explanation. The explanation is usually found in the theory of prophetic vision. But in the literary prophets, vision in any strict sense has little place. The prophetic perception, however, was of the nature of intuition, and something of the peculiarity referred to may be due to this. (2) In the period of the canonical prophets it is less events that suggest religious ideas and hopes than ideas already won that explain events. The prophets are not now learning principles, but applying them. Their minds are full of religious beliefs and certainties, such as the certainty of a reign of righteousness upon the earth; and Riehm has suggested that it is their eager expectations and earnest longings that make them feel the consummation to be at hand. (3) Another point may be suggested. It is only in general amidst convulsions that rend society that the prophets come forward. These convulsions and revolutions were the operation of Jⁿ, and His operations had all one end in view, the bringing in of His kingdom, and thus to the prophets these great movements seemed the heralds of the full manifestation

of Jⁿ. For the movements had all moral significance: they were a judgment on His people, which would so change them as to lead into the final salvation (Is 29¹⁷, 30¹⁸, 31¹⁹), or they were the judgment of the world, removing the obstacle to the coming of His kingdom (Is 40¹); and thus the present and the final were organically connected, the chain was formed of moral links. Further, the prophets appear to entertain and operate with general conceptions. Israel is not merely a people, it is the people of God. Babylon is not only a hostile nation, it is the idolatrous world. The conflict between them in the age of Cyrus is a conflict of principles, of Jehovahism and idolatry, of truth and falsehood, of good and evil. It is not a conflict having great moral significance, it has absolute significance, and is final: 'Ashamed, confounded, are all of them that are makers of graven images; Israel is saved with an everlasting salvation' (Is 45¹⁶).

2. Messianic Prophecy.—The term Messianic is used in a wider and a narrower sense. In the wider sense the term is virtually equivalent to Eschatological, and comprehends all that relates to the consummation and perfection of the kingdom and people of God. In the narrower sense it refers to a personage, the Messiah, who is, not always, but often, a commanding figure in this perfect condition of the kingdom. The conception of a final condition of mankind could hardly have arisen before a general idea of the nature of the human economy had been reached. Insight into the meaning of human history, however, was not attained in Israel by reflection on the life of mankind, but by revelation of the nature of God. God was the real maker of human history. Hence, when so broad a view as that of human life or history as a whole is taken, it is, so to speak, secondary: it is a reflection of the view taken of God, of His Being, and therefore of what the issue will be when He realizes Himself in the history and life of mankind. So soon as the conception of the perfect ethical Being of Jⁿ was reached, there could not but immediately follow the idea also that human history, which was not so much under His providence as His direct operation, would eventuate in a kingdom of righteousness which would embrace all mankind. The way, no doubt, in which this is conceived is that this kingdom of righteousness is first realized in Israel, and that through Israel it extends to all mankind—for the nations come to Israel's light (Is 60). But it is the unity of God that suggests to men's minds the unity of mankind; and the moral being of God that suggests the moral perfection of mankind. And such ideas hardly prevailed before the prophetic age.

The Messianic in the narrower sense is part of the general doctrine of the Eschatology of the kingdom (see ESCHATOLOGY). The 'Messianic' in this sense is hardly a distinct thing or hope. The Messiah is not an independent figure, unlike all other figures or personages, and higher than they; on the contrary, He is always some actual historical figure idealized. The term means 'anointed,' and only two personages received anointing—the king, and possibly the priest; though no doubt the term 'anointed' was used more generally in later times (Ps 105¹⁵). The OT is occupied with two subjects—Jehovah and the people, and the relation between them. The Eschatological perfection is the issue of a redemptive movement. Now, the only redeemer of His people is Jⁿ—salvation belongeth unto the Lord. The Eschatological perfection is always due to His operation—the perfection consists in His perfect presence among His people, for the idea of salvation is the fellowship of God and men. But, on the other hand,

* The arguments by which Giesebrecht, *Berufsbegabung*, 13 ff., supports the theory of a 'faculty of presentiment' have little cogency. This faculty is supposed to reveal itself particularly on the approach of death (Gn 27. 49). The contemporaries of most great religious personages have attributed to them a prophetic gift. The answer of John Knox to those who credited him with such a gift is worth reading: 'My assurances are not marvels of Merlin, nor yet the dark sentences of profane prophecy. But, first, the plain truth of God's word, second, the invincible justice of the everlasting God, and third, the ordinary course of His punishments and plagues from the beginning, are my assurances and grounds.' *History*, p. 277 (Guthrie's ed.).

the people are not passive. The goal is set before them, and they strive towards it. Jⁿ awakens ideals in their mind, and aspirations after them; and in contrast to such ideals the imperfections of the present are felt, and an effort made to overcome them. But it is characteristic of the redemptive operations of Jⁿ that He influences the people and leads them forward, through great personages whom He raises up among them. Such persons are different in different ages—judges, prophets, kings, and the like. These He enlightens so that they give the people knowledge, or He endows them by His spirit with kingly attributes, so that they govern the people aright (Is 11^{1a}, 28⁶ 32^{1a}), and lead them on to the final perfection. But Jⁿ always remains the Saviour; and if there be any mediatorial personage it is Jⁿ in him, the *Divine* in him, that saves. Naturally, the most exalted and influential personage is the king: he has the people wholly in his hand; the ideal is that he reigns in righteousness and secures peace (Is 32^{1a}). The Messiah is mainly the ideal King. Thus the Eschatological perfection may be supposed reached in two ways: *first*, Jⁿ the only Saviour may come in person to abide among His people for ever. In the earlier prophets His coming is called the day of the Lord—a day of judgment, and eternal salvation behind the judgment. What precise conception the prophets formed of the coming of Jⁿ may not be easy to determine. But it was not merely a coming in wonderful works, or in the word of His prophets, or in a spiritual influence upon the people's minds, it was something objective and personal. In later prophets, such as Ezek. and the post-exile prophets, it was a coming to His temple; and when He comes Jerusalem is called *Jehovah Shammah*, 'the Lord is there' (Ezk 48³⁵, Hag 2^{7a}, Mal 3¹). Examples of such representations are Is 40¹⁻¹¹ 'The Lord cometh with might, his arm ruling for him; the glory of the Lord shall be revealed, and all flesh shall see it together,' and Ps 102^{15, 16, 22}. But, *secondly*, sometimes the manifestation of Jⁿ is not considered immediate and in person: He is manifested in the Davidic king. The Davidic king may then be called *Immanuel*, 'God with us,' and *El Gibbor*, 'God mighty' (Is 7. 9. 11). In NT both these classes of passages are interpreted in a Messianic sense. To NT writers Christ had approved Himself as God manifest in the flesh, and even such passages as were spoken by the OT writer of Jⁿ are regarded as fulfilled in Him and spoken of Him, for no distinction was drawn between these two things (e.g. Is 40¹⁻¹¹ in Mk 1³, Ps 102 in He 1^{10a}).

(a) *The Monarchy*.—Jⁿ is represented at all times as Saviour; and this idea is of special importance, because it lays the foundation for both the work and person of the Messiah, as the word is ordinarily used. During the monarchy the prominent figure in the salvation of the people or in ruling it when saved by Jⁿ is the Davidic king. The true king of Israel is Jⁿ: Israel is the kingdom of God; and this is a general eschatological idea, suggesting what the kingdom will be when it is fully realized and Jⁿ truly reigns (Ps 96-99). But it is the Davidic monarchy that is Messianic in the narrower sense. This unites two lines—the Divine and the human. The Davidic king is the representative of Jⁿ; truly to represent Him, Jⁿ Himself, the true king, must be in him and manifest Himself through him (Is 9¹⁻⁶ 11^{1a}). But, on the other hand, both David and his rule were suggestive. (1) He was himself a devout worshipper of Jⁿ, endowed with the spirit of the knowledge and the fear of the Lord (Is 11²). (2) He subdued the peoples and extended the limits of his kingdom till for that age it might be called an empire, suggesting the universality of the kingdom of God

(Ps 2⁶ 72^{2a}, Zec 9¹⁰). (3) His rule was just and the end of his reign peaceful, suggesting the idea of a ruler perfectly righteous, and a reign of peace (2 S 23^{3a}, Is 9⁷⁻⁸ 24, Mic 5⁵, Ps 72⁷, Zec 9¹⁰). (4) Finally, he founded a dynasty, which suggested the idea of the perpetuity of the rule of his house over the kingdom of Jⁿ (Is 9⁷, Ps 72⁵). Such points may not have struck men's minds in David's own age, but in later and less happy times, when his reign was idealized, they were noticed, and entered into the conception of the future king and kingdom of Jⁿ. The promise given by Nathan to David takes up the first and fourth of these points—the close relation between Jⁿ and those of David's house who shall sit upon the throne, and the perpetuity of the rule of his family (2 S 7^{11a}). This promise is the basis of all subsequent prophecy regarding the Davidic king. Such passages as Ps 2 take up the promise, 'I will be to him a father, and he shall be to me a son,' while the prophecies Is 7-11 are founded on the promise, 'Thy throne shall be established for ever.' It was during the Syro-Ephraimitic war (B.C. 735 f.) that the idea of a special future king of David's house was expressed by Isaiah. The Northern coalition meditated the deposition of the Davidic dynasty, but the prophet's faith in the promises given to David enabled him to foresee that though his house should share the humiliations of the people and be cut down to the ground, yet out of the root of Jesse a new shoot would arise on whom the spirit of the Lord would rest (Is 11). From this time forward there is a special Messianic hope, that is, the hope of an extraordinary king out of the house of David. This hope, though in some periods not referred to, continues to prevail to the end of the people's history. Subsequent prophets repeat, but add little to, Isaiah's ideas, e.g. Mic 4. 5 (though the age of the passages is disputed), Jer 23^{5, 6} 30⁹, Ezk 17²²⁻²⁴ 34^{23a}, 37²²⁻²⁸. Prophets prior to Isaiah, as Am 9¹¹, Hos 3⁵, do not seem yet to have reached the idea of a special king of David's house; and other prophets before the Exile, Nahum, Zephaniah, and Habakkuk, though some of them refer to the final condition of the people and the world, do not allude to an expected future king.

(b) *The Exile*.—After the destruction of the monarchy and the abasement of the Davidic house the hope of a great ruler out of that house for a time disappears (e.g. in Is 40 ff.). The general eschatological hope of the perfection and felicity of the people is even more brilliant than before, but no great personage is referred to as ruler of the saved people. Jⁿ Himself is the Saviour and the everlasting King, who feeds His flock like a shepherd (Is 40¹¹). And the sure mercies of David—the privileges and the mission of the Davidic house—are now transferred to the people (Is 55^{3a}). Circumstances turned the thoughts of the prophets in other directions. God's providential treatment of Israel suggested to them new conceptions. They reflected on the meaning of the history of Israel and its sufferings, and on its place in the moral history of mankind. And there arose the great conception of '**the Servant of the Lord**.' The phrase expresses the highest generalization on the meaning of Israel in the religious life of mankind—Israel is the Servant of Jⁿ to the nations, to bring to them the knowledge of God. Scholars do not universally accept this interpretation, but they agree that the ideas expressed by the prophet in regard to the Servant have been more than verified in Christ. Of these ideas the two chief are: *first*, that the Servant is the missionary of Jⁿ to the nations—he bringeth forth right to the nations, that the salvation of Jⁿ may be to the ends of the earth (Is 42¹⁻⁴ 49¹⁻⁶ etc.);

* The Targum interprets Hos 3⁵ of the Messiah.

and *second*, by his sufferings he atones for the sins of the members of the people (Is 53, cf. 40²). The Servant is the 'word' and spirit of J" incarnated in the seed of Abraham. This incarnated word will yet redeem all Israel and be the light of the nations. Here again it is the *Divine* that saves; the word of J", the true knowledge of the true God, implanted once for all in the heart of mankind in Israel, which will accomplish that whereto it is sent (Is 55¹⁰). As Delitzsch remarks, the Servant of the Lord, though strictly not a Messianic figure at all in the narrower sense, contributes more elements, and those of the profoundest kind, to the Christological conception realized in our Lord than all other figures together. The ideal of the Davidic king is that of a ruler just and compassionate, whose rule secures righteousness and peace and the wellbeing of the poor and meek (Is 11¹⁻²): whether in Is 9¹⁻⁷ he be the saviour or only ruler of a people saved by J" may be disputed. But in connexion with the Servant of the Lord deeper conceptions appear, such as that of atonement for sin through the suffering of the guiltless, and the idea that the highest glory is the reward of him who loses his life for others (Is 53¹²). In former prophets, who foresee both the rejection and the restoration of the people, the restoration is unmediated by any atonement beyond the people's repentance: God forgives their sins of His mercy and restores them. In Deutero-Isaiah the Servant atones for the sins of the people, and their restoration follows. Former prophets, owing to the people's misconceptions of the meaning of ritual, assail the sacrifices; Deut.-Is. combines the sacrificial idea with the sufferings of the Servant, lifting the idea out of the region of animal life into that of human life. These two figures, the Davidic king and the suffering Servant, supply the chief contents of the idea of the Christian Messiah. It is strange how little impression the conceptions of the prophet of the Exile seem to have made upon those who followed him. While his universalism—the idea that Israel is the missionary of J" to mankind that His salvation may be to the end of the earth—entered into the thought of the people and profoundly influenced it, his conception of atonement through the innocent bearing the sins of the guilty hardly if at all reappears. There may be a far-off echo of it perhaps in the Rabbinic idea that the merit of great saints may avail for others. In the OT period the suffering Servant was never identified with the Davidic king. The idea that the royal Messiah suffers for the sins of his people does not appear. No doubt Immanuel, who appears amidst the Assyrian desolations, shares the hardships of his generation, living on thick milk and honey like all those left in the land (Is 7); and in Zec 9⁹ Zion's king shares the character of the saved people, being meek and lowly and a prince of peace, but nothing is said of suffering in behalf of others.

(c) *Post-exile Period.*—At the Restoration the general eschatological hope, as it appears in Haggai and Zechariah, was that so soon as the temple was finished J" would return to it in glory; at His manifestation He would shake all nations, who would turn to Him, and His universal kingdom would come (Hag 2⁶, Zec 1^{10a}, 2^{10a}). Side by side with this hope, however, the more special Messianic hope of a ruler from David's house also appears (cf. Ezk 34¹¹⁻²³). This ruler appears to be Zerubbabel (Hag 2^{22a}). But with the Restoration the priest becomes more prominent. The calamitous history of the nation sank deep into the popular mind, and seemed to be the seal set to the prophetic teaching regarding the people's sin. And from henceforth the sense of sin in the people's mind was deeper; and that view of sacri-

fice according to which it was a propitiation for sin assumed a larger prominence, and the other idea of it as a gift for God's acceptance sank proportionally. It was really the nation's history that impressed men with the sense of their sinfulness rather than the ceremonial enactments of the ritual law. The developed ritual expressed the new conscience of sin, it did not create it. The royal and the priestly now appear united in the final ruler. In Ps 110 he is a crowned priest. In the passage Zec 6⁹⁻¹³ it is uncertain whether the Branch (the Davidic ruler) is to be 'a priest upon his throne' or to have a priest associated with him (RVm). But the Davidic king continues to be the Messianic figure of the post-exile period, e.g. in Ps 2. 72—both late passages—Zec 9, and particularly in the *Psalms of Solomon* (Ps 17. 18, c. 100–50 B.C.). A great part of the Psalter is eschatological in the general sense. The Psalmists' minds are filled with the eschatological ideas of the prophets, now become the faith of the people—the idea of the manifestation of J", the judgment of the world, the redemption of the people of J" and their eternal blessedness, with the participation of the nations in their salvation; but it is only in a few psalms that the personal Messiah is referred to, e.g. Ps 2. 72. 110; cf. 89. 132. It is uncertain when the title *Messiah* began to be given to the expected future king. The term can scarcely have been a proper name or special title for the future king in the time of the Exile, for Deutero-Is. uses it of the Persian king, 'Thus saith the Lord to his anointed (מָשִׁיחַ messiah), to Cyrus' (Is 45¹). But the name was used quite currently of the expected king or saviour in the age of Christ, for even the woman of Samaria employs it, 'I know that Messiah cometh' (Jn 4²⁵). The title has been supposed by some to be given to the expected king in Dn 9²⁶, but more probably it is applied there to some high priest. It was perhaps Ps 2 that suggested the special application of the title to the expected king, 'The kings of the earth set themselves against the Lord and his Messiah.' The title 'Son of God' seems taken from the same psalm, both being employed in St. Peter's confession, 'Thou art the Messiah, the Son of the living God.' The psalm is based on Nathan's prophecy, and appears to be a directly Messianic passage, and probably belongs to a late date. The only creative book in post-exile times is Daniel. Chap. 2 is eschatological in the general sense, the stone cut out from the mountains that brake in pieces the image being a symbol of the kingdom of God which shall destroy the world-kingdom in its successive historical forms. It is less certain whether this general point of view be maintained in ch. 7, or whether the personal Messiah be referred to in the phrase 'a son of man.' The former interpretation is the more probable, the expression 'a son (or, child) of man,' i.e. a man, being used as a symbol of 'the people of the saints of the Most High' to whom the kingdom is given. The spirit of man shall animate this kingdom, whereas the kingdoms of the world are animated by the spirit of the wild beast. Very soon, however, the phrase 'son of man' was interpreted to mean the Messiah, as appears from the Bk. of Enoch.*

The Messianic is usually held to circle round the three great figures—the prophet, priest, and king. But the basis is broader than this: the Messianic age being the time of the perfection of the people of God, any factor that enters into the life of men as an essential element of it may be idealized and

* There has been considerable controversy lately over the meaning of the phrase 'the son of man' in the Gospels; cf. Wellhausen, *Skizzen*, vi. 188; Schmiedel in *Protest. Monatshefte*, 1898; Lietzmann, *Menschensohn*, 1890; Dalman, *Worte Jesu*, p. 191. See L. A. Muirhead in *Expos. Times*, Nov., Dec. 1890; and art. SON OF MAN.

made prominent. The prophet or prophecy is typical of the general eschatological state of the people of God, for then Jⁿ will pour out His spirit on all flesh (Jl 2²⁸, Jer 31³⁴, Is 54¹³), and the prayer of Moses, 'Would that all the Lord's people were prophets!' shall be answered. But otherwise the prophet is not directly a Messianic figure (on Dt 18¹⁴ see above in B. i.); he is the herald of the advent of Jⁿ to Zion (Is 40⁹) or to His temple (Mal 3¹). The Servant of the Lord is in a lofty sense a prophetic figure; but he is not a prophet like other prophets with a message for any particular time or circumstances, nor does he give particular teaching or predict particular events. He is the bearer of the whole revelation of the true God, the 'word' of God incarnate (Is 49¹²), and therefore prophet of Jⁿ to the world.* The priest or priesthood is also predictive of the general eschatological condition of the people, for 'they shall be a kingdom of priests and an holy nation' (Ex 19⁶), the two ideas suggested by priesthood being holiness and privilege to draw near to God (Nu 16⁹). But even in Zec 3^{8,9} the atoning function of the priest appears still only typical of Jⁿ's own act of forgiveness, who will remove the iniquity of the people in one day. The Servant of the Lord makes himself an offering for sin (Is 53¹⁰), but he does not appear to be regarded as a priest. Besides these three great figures, however, there is another who contributes to the perfect ideal realized in Christ, viz. the saint or holy one, that is, the individual righteous man. It is particularly the personal character and experience of this figure, his faith in God, his struggles with adversity and death, his hopes of immortality, that come prominently to the light. It is he who says in Ps 16, 'I have set the Lord ever before me: because he is at my right hand, I shall not be moved. For thou wilt not give over my soul to Sheol; nor suffer thine Holy One to see the pit.' It is he also who speaks in Ps 40, 'Sacrifice and offering thou wouldst not. Then said I, Lo, I am come to do thy will, O my God; yea, thy law is within my heart. I have preached righteousness in the great congregation.' In Ps 22²⁴ a speaker says, 'I will declare thy name unto my brethren: in the midst of the congregation will I praise thee. For he hath not despised nor abhorred the affliction of the afflicted, nor hid his face from him.' The ideas in this passage differ from those in Is 53. The afflictions of the sufferer are not borne for others. But he suffers innocently and wrongly; and the interposition of Jⁿ to deliver him is so signal, and gives such a revelation of what Jⁿ is, that they that behold it turn unto Him—all the ends of the earth shall remember, and turn unto the Lord (v. 27). Such lofty expectations were scarcely likely to be connected with any individual personage, however outstanding; more probably the sufferer in the psalm is the true people of Jⁿ personified, as in Deutero-Isaiah.

In a sense, great part of the OT is Messianic. For it is just the peculiarity of OT that it struck out lofty moral and redemptive ideals, on occasions the most diverse, and in connexion with personages and in circumstances very various. These ideals were ultimately combined together to express the being of Him who was the ideal on all sides. But this Messianic of OT was, so to speak, unconscious. The writers had not the future king in their mind. They were speaking of other persons, or they were uttering presentiments, or what seemed to them religious necessities, or projecting forward brilliant spiritual hopes and anticipations. There was a spirit in them broader than the hope of a future person—a spirit as broad as the kingdom of God in

all its needs, in all its endowments, and in all the possible height of its attainment. The history of the people's mind from the Restoration onward is mainly the history of a reflection on these ideals. They tried these ideals by the conditions of the present, and found that they and the present world were incompatible, and they projected them into the future, and thus the ideals became prophetic. Further, they had received the hope of a great deliverer, and he became a centre around whom the ideals, whether of glory or holiness or even of suffering, could be gathered, and they attached them to him. The woman of Samaria, for example, regards the Messiah as one that 'will declare unto us all things.'

KINDS OF MESSIANIC PASSAGES.—The question put in regard to any passage by historical exegesis is, What did the Heb. writer mean? What personage had he in his mind in the passage? There may thus be several classes of Messianic prophecies. (1) Directly Messianic prophecies. In these the prophet or writer had the expected future Messiah actually present to his own mind. Examples are Is 7, 9, 11, Mic 4, 5, Jer 23^{5,6} 30⁹, Ezk 17²²⁻²⁴ 34²³, 37²²⁻²³, Zec 3⁸ 6¹² 9⁹⁻¹⁰, Ps 2, 72, 110, and other passages. Is 7 is denied by many to be Messianic (see IMMANUEL), while Is 9, 11, though generally admitted to be Messianic, are held by some to be later than Isaiah (see ISAIAH). In Is 9, 11 it is not taught that the Messiah is God, but that Jⁿ is fully present in him. The general eschatological idea was that the presence of Jⁿ in person among men would be their salvation; the prophet gives a particular turn to this general idea, representing that Jⁿ shall be present in the Davidic king. The two are not identified, but Jⁿ is fully manifested in the Messiah. The passage goes very far; and though the Christian doctrine of incarnation contains a positive conception in it which OT saints did not reach, theology is obliged to limit that positive by negations which seem rather to neutralize it; and though the phrase 'became' man is used, it is affirmed at the same time that the two natures remained distinct, and that the Divine suffered no change and no confusion or composition with the human. (2) Indirectly Messianic passages. These are passages in which the writer had some OT officer or personage in his mind, but spoke of him according to the idea of his office or function or character; and this ideal is transferred to Christ in the NT, as being actually realized only in Him, or at least in Him first. Examples are what is said of 'man' in Ps 8, of Israel as Servant of the Lord in Is 40¹¹, Ps 22, of the 'prophet' in Dt 18, of the saint or holy one in Ps 16, 40, and much else. Such passages are sometimes called typically Messianic, the idea being that OT personages, such as king, prophet, and the like, were types, that is, designed prophetic suggestions, of the Messiah in some of his essential redemptive functions or experiences. The exegesis of Calvin gave vogue to this method of interpretation, and applied it to passages to which it is scarcely applicable, e.g. Ps 2, 72. According to this interpretation Ps 2 is supposed spoken of some actual king of Israel; but as its language transcends what was verified in any ordinary king, it had a more proper fulfilment in Christ. Ps 2, however, could hardly have been spoken of an actual king; the universalism of its ideas, e.g. 'the kings of the earth' who oppose Jⁿ and His Anointed, the extent of the King's inheritance as the Son of Jⁿ, viz. 'the nations' and 'the ends of the earth,' and the final kindling of Jⁿ's anger, all mark it out as an eschatological and directly Messianic passage. The same is true of Ps 72. Very confused language is used by interpreters in regard to these so-called typical prophecies (see *Expositor*, Nov. 1878). NT does not recognize any class of indirect Messianic prophecies, for God being the speaker in the OT the person in whom the language was fulfilled must be the person of whom it was spoken. So far as the Heb. writer is concerned, he had in his mind either the expected future Messiah, or he had some OT person. In the latter case, if his language transcends what could be realized in the OT personage, he spoke ideally, that is, according to the religious idea of the personage or his function or his experience.

D. INTERPRETATION AND FULFILMENT.—There are certain peculiarities in the language and thought of the prophets which have to be taken into account in interpreting their writings, and in considering how their predictions or constructions of the future have been or will be fulfilled. These peculiarities so struck early writers on prophecy that they devoted great attention to them, fancying that the prophetic writings were constructed on a particular plan, which had special purposes in view. Hence they speak greatly of what they call the 'structure' of prophecy, and lay down elaborate rules for the way in which prophecies relating to a distant future must have been expressed, in order that when fulfilled they might be recognized to have been genuine supernatural predictions.* The

* By the time of Deutero-Isaiah the idea of the 'word' of God had become generalized; it is the true knowledge of the true God, and this is the *torah* of the Servant to the nations.

* e.g. John Davison, *Discourses on Prophecy*.

language also, as well as the form, was thought to differ from that of ordinary literature, symbols being greatly used instead of plain expressions. This artificial way of regarding the prophecies was greatly due to the apologetic or evidential use made of them. But there is nothing in the form of the prophecies so special that it deserves the name of 'structure'; neither is symbol to any great extent employed instead of ordinary language. The prophets were practical teachers, such as we might expect men of their nation and time to be, and their prophetic addresses are cast in the form that would be most easily understood by their hearers. They were usually men of powerful imagination, and hence their language is poetical and to some extent figurative; and they were men living under a particular kind of constitution or dispensation, and in certain conditions of the world, and their ideas naturally are clothed in the forms suggested by their OT constitution, and those conditions of the ancient world in which they lived. This OT constitution and these conditions of the ancient world have passed away, but the religious ideas and truths expressed by the prophets still remain and live. Obviously, to *interpret* the prophets we must read them literally, endeavouring to throw ourselves back into their circumstances and the conditions of the world around them, and into their mind in such conditions: if we fail to do this, and fasten our attention only on their ideas and truths as valid for other times than theirs, we do not interpret but only *apply* their prophecies. Some points bearing on fulfilment may be briefly alluded to.

i. The prophecies are poetical. They are not poetical in so strict a sense as books like Job and the Psalms are: the parallelism is not so exact, and the lines are not so uniform in length. Many parts of the early prophets are no doubt poetical even in form, and some modern commentators make great efforts to bring the present text of the prophecies into strictly poetical measure, assuming that it had this form originally; but their operations appear in many cases to be arbitrary. The approximation to poetical form appears less in later prophets, though the style still remains elevated. Though poetical the prophecies are not allegorical. When Is 2, for example, says that the day of the Lord shall be on all lofty mountains, and on all cedars of Lebanon and oaks of Bashan, these things are to be understood literally, and not allegorized into things human, such as great States, the higher ranks of society, or persons of eminence. Neither are the prophecies written in symbolical language. It has been said, for example, that 'mountain' in prophecy is a symbol for kingdom, and the like.* There is no evidence for this. 'Mountain' is a figure for any great obstacle in the way (Is 40⁴ 41¹⁶, Zec 4⁷) of whatever sort it be, but is no stereotyped symbol for kingdom. A beginning of fixed symbolism is made in Daniel, where 'horn' is a symbol for king or kingdom, and the usage is continued in the Apocalypse; but in Zec 1¹⁸ 'horn' is still merely a figure for any instrument of pushing and overthrow. The prophecies are poetical in the sense that they are imaginative and often ideal. Thus, in predicting the destruction of some great city at present full of life, the prophet will draw a picture of desolation with all its mournful characteristics—'their houses shall be full of doleful creatures; wolves shall cry in their castles, and jackals in the pleasant palaces' (Is 13²¹); 'the pelican and the porcupine shall lodge in the chapiters thereof' (Zeph 2¹⁴, Is 34¹³⁻¹⁵). Such passages merely express the idea of complete desolation; the details are not predictions, but part of the expression of the

* Fairbairn, *On Prophecy*, p. 496.

idea. Similarly, in predicting the capture of Babylon by the Medes the prophet gives an ideal picture of the sack of a city—'their infants shall be dashed in pieces, and their wives ravished' (Is 13¹⁶). We know that these things did not actually happen, for Cyrus entered Babylon 'in peace.' In some cases it may be difficult to say whether a passage be of this ideal kind, or be merely of the nature of a threat, e.g. Am 7¹⁷ spoken of Jeroboam, and Jer 22¹⁸ of Jehoiakim. A margin of uncertainty will remain in connexion with these ideal prophecies. The details given in the prophecy form a true and natural picture of such a thing as that predicted, and some of them may be realized, and the question may be put, Are these details thus realized to be regarded as a fulfilment of the prediction, or are they merely due to the nature of the case? Under the belief that in such prophecies the details are merely an expression of the idea, and that the idea exhausts the prediction, Dr. Arnold propounded a theory of fulfilment *ex abundanti*. For example, the prophecy Zec 9⁹—'Behold, thy King cometh unto thee; lowly, and riding upon an ass,' merely by its details expresses the idea that the Messiah will not be a man of war, but humble and a prince of peace, and would have been fulfilled in Christ's mind and bearing, though none of the external details had been verified; the fact that Christ entered Jerusalem riding on an ass was a fulfilment *ex abundanti*, and due to a special providence of God.* Of course, the special fulfilment in this case may have been intentional on the part of Christ. In that case we must suppose that Christ's consciousness of being the Messiah spoken of was so powerful that it prompted Him to act in the character described. His action was merely His consciousness expressing itself by an irresistible impulse; it was not a matter of calculation intended to impress the multitude.

ii. Another thing which might modify fulfilment was this: the prophecies were designed to influence the conduct of the people; they were moral teaching, of the nature of threats or promises, which might be revoked or fulfilled according to the demeanour of those to whom they were addressed. Thus Jer 26¹³ says, 'The Lord sent me to prophesy against this city all the words which ye have heard. Now therefore amend your ways, and obey the voice of the Lord your God; and the Lord will repent him of the evil which he hath pronounced against you.' Prophecy was to such an extent moral, and meant to influence men's conduct, that threatenings of evil were rarely absolute. Jonah predicted in what seemed an absolute manner the destruction of Nineveh in forty days; but on the repentance of the people the threatened evil was averted. Jer 18 expressly formulates the moral and contingent character of prophecy, saying, in the words of J', 'At what time I shall speak concerning a nation, to pluck up and destroy it; if that nation, against whom I have pronounced, turn from their evil, I will repent of the evil which I sought to do unto them. And at what instant I speak concerning a nation to build and plant it; if it do evil in my sight, I will repent of the good wherewith I said I would benefit them. Now therefore go, speak to the men of Judah, Behold, I frame evil against you: return ye now every one from his evil way.' This moral character of prophecy was well understood in Israel, as appears from the intervention of the elders in behalf of Jeremiah: 'Then rose up certain of the elders, and said, Micah the Morastite prophesied in the days of Hezekiah, saying, Zion shall be plowed like a field! Did Hezekiah and all Judah put him to death? Did they not

* 'Two Sermons on the Interpretation of Prophecy' in *Sermons*, vol. 1. p. 373, London, 1845.

fear the Lord, and entreat his favour, and the Lord repented him of the evil which he had pronounced against them?' (Jer 26¹⁷). The principle was also well understood in the early Church, for Jerome remarks that many of the prophecies were given, 'not that they should, but that they should not, be fulfilled.' They were threatenings of evil designed to influence conduct and avert the very evils threatened. There were, no doubt, prophecies which were absolute. The promises of God were so; those that contained statements of His grace, as that the house of David should for ever bear rule in His kingdom, and many others which depended on His will alone. Even some of these contained an element of contingency in them, to this extent, that the conduct of men might retard although not invalidate their fulfilment; while on the other hand threatenings, though long delayed, might eventually be fulfilled because men persevered in their evil ways or returned to them.

Moreover, another thing is evident: moral threats or promises could be made only to a subject also considered moral. The predictions of the prophets against foreign nations, though often having the form of threats against their capital city or their land, are really not directed against these material things, but against what might be called the national personality, the moral subject which the nation was, with its spirit and influence in the world of the prophet's day. The prophets deal only with moral forces; to them there are no other forces. The world is a moral constitution, and States are moral personalities. Ezekiel conceives them as existing after their disappearance from the world, just as individual persons do after death. It is this national personality that prophecy threatens with destruction; and when Babylon, for example, came under the power of the Persians, the prophecies against it were fulfilled, although not a brick was thrown down from its walls nor a bar broken in one of its brazen gates. These material things, no doubt, embodied and expressed the spirit of Babylon; but they were nothing in themselves, and might equally embody and express the wholly different moral personality of the Persians.* In point of fact, the material details of the prophecies against the nations were in many instances not verified. Is 17¹ says, 'Behold, Damascus is taken away from being a city, and it shall be a ruinous heap'; but Damascus has probably never ceased to be a city. Here again, no doubt, interesting questions have been raised. Micah's prophecy about Jerusalem was eventually fulfilled; Babylon is at this day a desolation. And Bacon suggested the idea of what he called a 'germinant' fulfilment, i.e. one going on through time. At any rate, in the first place the prophetic threat must be held to have been directed against the national personality, and to have been fulfilled in the main in its destruction; and secondly, in endeavouring to reach a conclusion in regard to the material details, the instances in which they have not been verified must be considered, as well as those in which they seem to have received verification. Apart from the uncertainty incident to such historical investigations, it is to misapprehend the nature of prophecy to treat these material details as having great evidential value. Prophecy concerns itself with the world as moral. The evidence of prophecy rather lies in the broad general movement of religious thought which it presents, showing that a divine power had laid hold of the whole mind of man, creating in it lofty religious ideals, quickening its aspirations, giving it an onward and forward look towards a religious perfection, stirring up the heart of the creature to

cry after Him who created it, and long for His perfect revelation upon the earth (Jn 14²⁶).

iii. The above remarks refer mainly to prophecies that have already been fulfilled; but the same principles apply to prophecies still awaiting fulfilment, i.e. prophecies regarding the final condition of the people of God. The moral and religious element was the essential part of the prophecy, the form in which the principle was to verify itself was secondary. The form was of the nature of an embodiment, a projection or construction, and the materials of which the fabric is reared are those lying to the hand of the prophet in each successive age. The imagination of the prophet operates largely in these constructions. Still it is chiefly the moral imagination. When, for example, all the evils existing in the prophet's day are banished and every desirable good introduced (Am 9²⁴, Jl 3¹⁸, Ps 72¹⁶), this is not due to the desire for sensuous pleasures, it is rather the expression of the writer's general view of the universe. The world was to his view a moral constitution, the physical being nothing but a mode of expressing or a medium for transmitting the moral and spiritual; the miseries of men and all the outward evils of life were the result of moral disorder; and simultaneously with the disappearance of moral evil physical evil would also cease; and with the perfection of the people of God the external world would be transfigured, and be the perfect minister to the needs of mankind. Thus, while the moral and the spiritual in the prophetic constructions of the future are absolute and permanent, the constructions which embody them are perishable and change. Just as some temple of God embodies and expresses spiritual conceptions, but is constructed out of materials at the architect's disposal in his own day, which materials decay, and in a later age have to be replaced by materials of that age, leaving, however, the spiritual ideas still visibly embodied; so the projections of one prophet, constructed out of the state of the world, and of the nations in his day, decay with the changes of the world, and have to be replaced by a later prophet with materials from the world of his day. In Is 7 ff. the prince of peace is born and grows up amidst the desolations of the Assyrian invasion, and sitting on the throne of David establishes a reign of righteousness and peace without end (Is 9⁷); while in Is 40 ff. the everlasting kingdom of God is introduced by the destruction of Babylon, the idolatrous world, and the restoration of Israel, the Servant of the Lord, who shall be the light of the nations (Is 60). The construction of the former is that of a moral politician; the construction of the latter, that of a religious thinker, almost a theologian. Thus prophecy, while maintaining its spiritual principles unchanged from age to age, by substituting one embodiment of these principles for another age after age, seems itself to instruct us how to regard these embodiments or constructions. They are provisional and transient. They sustain the faith and satisfy the religious outlook of their day, but they have no finality. Even the prophets of the NT are probably no more final in their constructions than those of the OT, e.g. in the Apocalypse and Ro 11. They rear their fabrics out of the materials of their own day, as the OT prophets did (cf. vol. i. p. 737).

Thus we have to distinguish between Prophecy and Fulfilment. Prophecy is what the prophet in his age and circumstances and dispensation meant; fulfilment is the form in which his great religious conceptions will gain validity in other ages, in different circumstances, and under another dispensation. Certain elements, therefore, of the relative, the circumstantial, and the dispensational must be stripped away, and not expected to go

* See remarks on Ezekiel's prophecy against Tyre, Ezekiel, p. 190 (Camb. Bible).

into fulfilment. Every prophet speaks of the perfection of the kingdom of God, looks for it, and constructs an ideal of it. We are still looking for it. The fundamental conceptions in these constructions are always the same,—the presence of God with men, righteousness, peace, and the like,—but the fabrics reared by different prophets differ. They differ because each prophet, seeing the perfect future issue out of the movements and conditions of his own time, constructs his ideal of the new world out of the materials lying around him: the state of his people; the conditions of the heathen world in his day (Mic 5⁴⁻⁵, Is 60^{6ff}); such facts as that Israel was the people of God, that the kingdom of God had the form of a State, and that the seat of Jehovah's rule was Zion. These relative elements are not to be called figurative, they are essential parts of the prophet's conceptions, and are all to be understood literally. Israel was not a symbol to him meaning the people of God or Church, neither was it to him a type of this. Israel *was* the people of God. Neither were Moab, Edom, Babylon, or Egypt symbols of the foe of the people of God nor types of the hostile world. Each of them to the prophet *was* such a foe. But in all cases the names are used literally, though along with their religious connotation. And what the prophet was able to say of the partial and relative of his day may, of course, be applied to the universal and absolute now—to the Church of God on the one hand, and the hostile world on the other. With the coming of Christ the national, relative and imperfect stage of religion, as it was in OT, passed away; religion became universal, absolute, and perfect. The Apostolic principles of interpretation seem something like these: (1) They assume that in Christ and Christianity religion has become final and perfect; the development has reached the end in view. And their arguments from OT are very much the analysis of this general assumption. (2) God is the author of Scripture; the OT is the word of God. (3) The Divine consciousness is one, embracing the end and the beginning alike: in speaking any word God had always the Christian consummation in view. Truth is also one; when a truth is seen in any aspect it is that truth that is seen. (4) Scripture being the word of God, its whole meaning is religious and spiritual. The circumstances amidst which it was spoken, and the person of whom or to whom, are of no importance. It is the spiritual meaning alone of the words that is the word of God. Historical exegesis accepts these principles, and merely adds another. It assumes that the OT writer had in every passage which he wrote a meaning in his own mind, and that he desired to convey this meaning to his contemporaries; and it asks, what did the Hebrew writer mean? What would the people of his day understand from his words?

LITERATURE.—The OT Theologies, particularly Oehler, Schultz, and Dillmann; John Smith, *Select Discourses*, 1821; John Davison, *Discourses on Prophecy*, 1856; Knobel, *Der Prophetismus der Hebräer*, 1837; Ewald, *Die Propheten des alten Bundes*, vol. i. 1840 (2nd ed. 1868, trans. 1875); Hofmann, *Weissagung und Erfüllung*, 1841; Hengstenberg, *Christologie des alten Test.* (trans. 1854); Patrick Fairbairn, *Prophecy*, 1856; Baur, *Geschichte der alttest. Weissagung*, 1860; Bertheau, 'Die alttest. A. B. DAVIDSON.

PROPHETESS (נָבִיאָה, *prophētiss*).—The conditions that were necessary to qualify for the prophetic office in the OT sense were not such as to exclude women from the latter (see the preceding article, p. 114, and cf. Ac 21⁷). The following prophetesses are mentioned in Scripture: Miriam, Ex 15²⁰, cf. Nu 12¹ (both JE); Deborah, Jg 4⁴; Huldah, 2 K 22¹⁴ (= 2 Ch 34²²); Noadiah, Neh 6¹⁴ (but cf. LXX, which has the masc. τῇ Νωδία τῇ προφήτῃ); Anna, Lk 2³⁶. 'The prophetess' of Is 8³ is probably simply 'the prophet's wife.' Prophecy in the NT sense was, of course, also a gift exercised by women (cf. Ac 21⁹, 1 Co 11⁵). 'The woman Jezebel which calleth herself a prophetess' (Rev 2²⁰; see vol. ii. p. 656^b) may have claimed the gift of prophecy in either the OT or the NT sense. See also art. WOMAN.

J. A. SELBIE.

PROPHET IN NT (προφήτης, -εύειν, -ελα: never *μάντις* or cognate words except Ac 16¹⁶ *μαντευομένη* of the possessed girl at Philippi).—The *προφήτης* in classical Greek is one who speaks for another—the interpreter either of the ecstatic *μάντις* or of the god himself, so that he is near akin to the *ἐξηγητής*, though with more definite reference to a person than to things. Of *loci classici* may be mentioned *Æsch. Eum.* 19: *Διὸς προφήτης ἐστὶ Λοξίας πατὴρ* (so Plato, *Rep.* 427 C: *πάτριος πρ.*), and Plato, *Tim.* 71 E f., where he contrasts the *προφήτης* with the *μάντις*. The same sense of 'interpreter' is found in Philo (e.g. *Quis rer. div.* 52, *De spec. legibus*, 8), though he ascribes to him the ecstasy assigned by Plato to the *μάντις*. This blending of the two, which practically merges the *προφήτης* in the *μάντις*, was a current belief even among Christians (Justin, *Athenagoras*) in spite of 1 Co 14, esp. v. 32, till it was partly discredited by Montanist fanaticism; and in our own time it may be traced in every theory of inspiration which fails to realize the full co-operation of the prophet's understanding.

In NT, too, the word *προφήτης* keeps its general sense of an interpreter of God's message. But the prediction which most impressed the vulgar (so roundly even Clem. Alex. *Strom.* vi. 12: *ἡ προφητεία πρόβλεψις ἐστίν*—in truth it is nearer *ἐπιγνώσις*) was a very small part of the message. Agabus predicted the famine and St. Paul's imprisonment (Ac 11²⁸ 21¹⁰), the Apoc. is called a *προφητεία*, and the OT prophets are naturally cited more or less from the side of prediction. But the prophet's proper work is rather (1 Co 4³ 24. 25) edification and consolation, revealing the secrets of the inner life and incidentally converting unbelievers, though, strictly speaking, prophecy is the sign (1 Co 14²²) for believers. And because the prophet edifies the Church, not only himself, prophecy is a better gift (1 Co 14⁵ 30) than that of tongues, and more earnestly to be coveted, though still but a transitory gift (1 Co 13⁹), not abiding like faith, hope, and love. On the *method* (scarcely the only method) of edification we get a hint in Ac 13¹, where prophets are ministering (λειτροῦνόντες τῷ Κ.—compare Timothy's appointment, 1 Ti 1¹⁸ 4¹⁴) when

they receive the command to separate Barnabas and Saul. This seems to imply some such position as we find in the *Didaché* (10), where the prophet (if there be one) is the proper person to conduct the public worship, and the only person free to give thanks in what words he thinks fit.

The prophets ranked next to the apostles (1 Co 12²⁸, Eph 4¹¹), and are even coupled with them (Eph 2²⁰ 3⁵ ἀπ. κ. προφ. in this order will be NT prophets) as receivers of revelation and layers of foundations. Prophecy was not an office, but a special gift, coming not from men, but straight from Christ (καὶ αὐτὸς ἔδωκεν, Eph 4¹¹), and it might come to women too (Ac 21⁹, 1 Co 11⁵). The prophet spoke ἐν πνεύματι (Eph 3⁵, Apoc. e.g. 1¹⁰: contrast ἐν ἑκστάσει of the trances, Ac 10¹⁰ 22¹⁷), because the divine Spirit worked in him, 1 P 1¹⁴, 1 Co 12¹¹; and he was also πνευματικός (1 Co 14²⁷, where πνευματικός at least includes προφήτης), because his human spirit was in full activity, and so steadily (ὑποτάσσεται, 1 Co 14²²) controlled the gifts of the Spirit that he was quite able to speak (Ro 12²⁹) only in proportion to the faith that was in him.

Neglect of this self-restraint is visible at Corinth (1 Co 14²⁹⁻³¹, prophets need not all speak together), and may help to account for the early warning in 1 Th 5²¹. Later on 1 Jn 4¹ speaks of ψευδοπροφήται, and the woman Jezebel (Rev 2²⁰) implies false prophets in Asia. So also the *Didaché* (11) is very stringent in its cautions about prophets.

Of prophets expressly so called in NT, there are Agabus, the groups at Antioch, Judas and Silas, and the four daughters of Philip. We need not go further; but the last prophets we read of (Anon. ap. Eus. HE v. 17) are Quadratus and Ammia in Philadelphia, perhaps in Hadrian's time. See, further, Selwyn, *The Christian Prophets*, 1900.

H. M. GWATKIN.

PROPITIATION.—This word occurs in AV only three times: Ro 3²⁵ as the tr. of ἱλαστήριον (ὁ προσέθετο ὁ θεὸς ἱλαστήριον, —most probably [see Sanday-Headlam] an adj. masc., 'whom God set forth to be propitiatory' [RVm]), and 1 Jn 2² 4¹⁰ as the tr. of ἱλασμός (αὐτὸς ἱλασμός ἐστι περὶ τῶν ἁμαρτιῶν ἡμῶν; ἀπέστειλε τὸν υἱὸν αὐτοῦ ἱλασμὸν περὶ τῶν ἁμαρτιῶν ἡμῶν); to which RV adds a fourth, He 2¹⁷ (a merciful and faithful high priest . . . εἰς τὸ ἱλασκεσθαι τὰς ἁμαρτίας τοῦ λαοῦ, 'to make propitiation [AV 'reconciliation'] for the sins of the people'). It will be the object of the present article, firstly, to explain the meaning of the Greek words used, in the light of their usage in the LXX; and, secondly, to examine the ideas associated with the Heb. words which they represent commonly in the LXX.

1. ἱλαστήριον is in OT the regular rendering of נָחָם (in EV 'mercy-seat'), Ex 25¹⁶ (17) (here ἱλαστήριον ἐπιθεμα), vv. 17-21 (18-22) 31⁷ etc.: ἱλασμός stands for (a) נָחָם (EV 'atonement'), Lv 25⁹ ἡ ἡμέρα τοῦ ἱ. (τοῦ ἑξίλ. Lv 23²⁷ 28), Nu 5⁸ ὁ κριὸς τοῦ ἱ.; (b) נִסְחָה 'sin-offering,' Ezk 44²⁷ (so 45¹⁹ ἑξίλασμος); (c) נִסְחָה 'forgiveness,' Ps 130⁴, Dn 9⁹ (Theod.); so ἑξίλ. Sir 5⁶ (Heb. נִסְחָה); (d) נִסְחָה 'guilt,' Am 8¹⁴ (falsely): ἱλάσκομαι stands seven times for נָחָם 'to forgive,' as 2 K 5¹⁸, Ps 25¹¹ (for which ἵλεως εἶναι is more common), and three times for נִסְחָה, Ps 65³ 78³⁸ 79⁹, which, however, is far more frequently represented by the (intensive) compound ἐξίλάσκομαι (variously construed: see §§ 5, 7-10; and Westcott, *Epp. of St. John*, pp. 83-85). The use of the term in He 2¹⁷ in connexion with the high-priest shows that ἱλ. must there be regarded as the equivalent of נָחָם, not of נִסְחָה (which is never said of the high-priest, or indeed of any human subject). * ἱλάσκομαι is common in classical

Greek, where, however, it is construed regularly with an accus. of the deity (or person) propitiated (as Il. i. 100, 444, 472, μόλην θεὸν ἱλάσκοντο; Hdt. v. 47, θυσίῃσι αὐτὸν ἱλάσκονται, viii. 112, Θεμιστοκλέα χρήμασι λαοσάμενοι: in the LXX, on the contrary, this usage is not found except Gn 32²⁰, Zec 7² (ἑξίλ. τὸ πρόσωπον), and Pr 16¹⁴ (ἑξίλ. αὐτόν, fig. of wrath), the word (ἑξίλ.), when used of a human subject (§§ 10, 11), being commonly construed absolutely, with περὶ of the person on whose behalf the propitiatory act is performed. The difference marks a difference between the heathen and the Biblical point of view: though the idea of propitiating God may be indirectly involved in the phrases used in the OT, it is very much less prominent than in the heathen writers; the propitiatory sacrifice, or rite, has indeed generally for its aim the restoration of God's favour, and the 'forgiveness' of the worshipper (Lv 4²⁰ etc., § 12b), but there is not the same thought of directly appeasing one who is angry, with a personal feeling, against the offender, which is implied when the deity is the direct object of the verb (cf. Cremer, *Wörterb.*; Westcott, p. 85; Kalisch, *Lev.* i. 316-318). In other words, the difference corresponds with the fact that the higher Biblical conception of God is more spiritual and less anthropomorphic than that of heathen writers.

2. The facts that have been quoted make it evident that the Greek terms rendered 'propitiation' correspond to the Heb. נָחָם and derivatives. These words hold an important place in the theological terminology of the OT; and though they are generally rendered in EV by '(make) atonement' (or 'reconcile,' 'make reconciliation,' in Lv 6³⁰ 8¹⁵ 16²⁰, Ezk 45¹⁵ 17. 20 AV; Dn 9²⁴ AV and RV), the idea expressed by the Heb. is certainly rather that of 'propitiation' than of 'atonement' (i.e. 'at-one-ment,' setting at one, reconciliation [see Shaks. *Rich. III.* i. iii. 36]); and hence they will be properly considered under the present heading.

It is much to be regretted that the link connecting OT and NT, supplied by (ἐξ)ίλασμαι, should have been neglected in EV; and that words which clearly correspond should have been rendered 'propitiation' in the NT, but 'atonement' in the OT. 'Atonement' is now an unsuitable rendering of *kippur*, for two reasons. (1) Since AV of 1611 was made, the word has changed its meaning; and whereas it formerly (see Murray) expressed the idea of reconciliation, it now suggests chiefly the idea of making amends or reparation. Hence in the one passage in AV of NT in which 'atonement' occurs (Ro 5¹¹, for καταλλαγῆς), the Revisers have done rightly in substituting for it 'reconciliation' (which, with 'reconcile,' is used elsewhere, in AV itself, for compounds of ἀλλάσσω, Mt 5²⁴, Ro 5¹⁰ 10. 11 11¹⁵, 1 Co 7¹¹, 2 Co 5¹⁸ 18. 19, Col 1²⁰ 21, Eph 2¹⁶). But (2) even in its older sense of 'reconciliation,' it does not properly represent *kippur*; for *kippur* does not mean to 'reconcile,' nor is it ever represented in LXX by compounds of ἀλλάσσω.

3. The root-meaning of נָחָם is probably to cover over; for the Arab. *kafara*, though not very common, has this meaning in various applications (Lane, *Arab. Lex.* p. 2620).

In Syr. *kaphar*, and esp. the Pael *kappār*, means to wipe or wipe away, as Pr 30²⁰ to wipe the mouth, to wipe away tears, the stain of sin, etc., hence fig. to disperse, destroy (delere), as darkness Ephr. i. 9, a race or nation, etc. (P. Smith, *Theor. Syr.* col. 1797-9); and W. R. Smith (*OTJC* 438 t., more briefly, 23-0, 381) adopts this as the primary meaning of the Heb. *kippur*,—explaining Gn 32²¹ (see § 5) as meaning properly to 'wipe clean the face,' blackened by displeasure, as the Arabs say 'whiten the face.' The Heb. *kippur*, however, as a theological term, in any case implies a metaphor,—and it does not greatly signify, in explaining it, whether we start from the idea of covering over or from that of wiping out: in either case, the idea which the metaphor is intended to convey is that of rendering null and inoperative. There are analogies in the OT for each explanation; sin is spoken of, viz. as covered (נָחָם,—an ordinary, untechnical word for 'cover'), Ps 32¹ ('covered in respect of sin'), 85², Neh 3³⁷ (Heb. 4⁵) (borrowed from Jer 18²³, with *kippur* (§ 9) changed to *kippūh*); and as wiped (or blotted) out (נָחָם), Is 43²⁸ 44²⁴, Jer 18²³ (= Neh 3³⁷ (4⁵)), Ps 51⁹ 109¹⁴. (It is difficult not to think that the Arab. and Syr. senses of the root spring ultimately from a common origin,—e.g. from the idea of wiping over: in both languages, it is remarkable that the word acquires the further derived idea of *disown*, *deny*, *be a disbeliever*; hence 'Kafir,' properly an infidel).—The Arab. ii. conj. (*kafara*) occurs often in the Koran of God's *effacing*, or

* The construction, however, with an acc. of the sin, is, as Ritschl rightly remarks (p. 212), not that of the legal (§ 10), but of the non-legal (§ 9); Ps 65³ LXX usage.

forgiving, sin; and *kāṣārat* (Kor. 5⁴⁸ 91. 95) means the expiation of a crime, broken vow, etc. (Lane, 2620, 2622; Lagarde, *Bildung der Nom.* 231 ff.); but these words may be borrowed from Judaism (Hirschfeld, *Beiträge z. Erklär. d. Kor.* p. 90). The Assyrian *kuppuru*, also a ritual term ('sühnen'), seems to mean properly to wipe off: see Haupt, *JBL*, 1900, pp. 61, 80, and esp. Zimmern, *Beiträge zur Kenntnis der Bab. Relig.* pp. 92, 123, etc.

4. The Heb. *kipper* is, however, never used in a purely literal sense (like כָּפַר), but always* in a figurative or moral application, viz. with the collateral idea—which in course of time became the preponderant if not the exclusive idea—of either conciliating an offended person, or screening an offence or an offender.

Of Oehler, *OT Theol.* § 127: 'Kipper, and the cognate substantives, represent the propitiation (Sühne) as a covering; the guilt is covered, or, as it were, withdrawn from the sight of the person propitiated, so that the guilty person can now approach him without danger.' Riehm, in his exposition of the term, uses commonly the expression 'protecting covering' (schützende Bedeckung)—an expression which no doubt reads more into the word than it actually denotes—for, as Schmoller (p. 282 f.) observes, *kipper* is *contingere* and *obtegere*, but not *protegere*, being never used, for instance, in the ordinary sense of 'protecting,'—but which is still a useful and suggestive paraphrase (cf. 46, 235 n., 279, where it is allowed that 'protection,' though not denoted directly by *kipper*, is nevertheless an indirect consequence of it). Schmoller, in his exposition, starts with the idea of covering over (obruere), in the sense of causing to disappear, making unobserved, inoperative, etc. These explanations, though they start with the idea of 'covering,' differ little in the end from that which would be reached by starting with the idea of 'wiping out'; but it is a question whether some modern writers do not press the idea of 'cover' unduly, and understand it in a too literal sense (cf. §§ 15, 17).

5. *Kipper* is used in three applications, which it is necessary to distinguish. (1a) A human subject is the agent, and the object was originally, it seems, the face of the offended person, though, in actual usage, it is mostly the offended person (or personified agency) himself; the means is a gift, an entreaty, conciliatory behaviour, etc. The most primary example of this application appears to occur in Gn 32²⁰ (J), where Jacob says of Esau, 'I will cover his face with a present,' i.e. conciliate him (ἐξιλίσσωμαι), the figure being that of a person whose eyes are blinded by a gift so as not to notice something (cf. for the figure, Gn 20¹⁶ כָּסַת עֵינָיו; Ex 22²⁸ כָּסַת עֵינָיו; Job 9³⁴ כָּסַת עֵינָיו). Hence, 'face' being omitted, *kipper* acquires the general sense of to conciliate, propitiate, appease: Ex 32³⁰ 'peradventure I shall make propitiation (כָּפַרְתִּי) for your sin' (viz. by intercession, v. 31; ἐξιλίσσωμαι *perp*), fig. Pr 16¹⁴ (of a king's wrath, threatening death) 'but a wise man will propitiate it' (viz. by conciliatory behaviour; ἐξιλίσσεται), Is 47¹¹ (of calamity) 'thou shalt not be able to propitiate it' (|| כָּפַרְתִּי 'to charm it away'; but Grätz, Buhl, Cheyne, כָּפַרְתִּי 'to bribe it away,' cf. Pr 6³⁵ Heb.), viz. either by a bribe (Is 13¹⁷) or by religious ceremonies.

6. Here may be best explained the subst. *kōpher*, prop. a covering (viz. of an offence), hence a propitiatory gift, but restricted by usage to a gift offered to propitiate or satisfy the avenger of blood, and so the satisfaction offered for a life, i.e. a ransom,—the *wehrgeld*, 'protection-money,' rigorously prohibited by Hebrew law in the case of murder, but admitted in certain other cases, and evidently a well-known institution: Ex 21³⁰ (JE); 1 S 12⁸ (a bribe to screen a murderer; so Am 5¹²); Ex 30¹² P (a half-shekel to be paid by every one, at the time of a census, as the שָׁבַת; or 'ransom of his soul (life),' to avert a plague,—such as might be apprehended [cf. 2 S 24] under the circumstances: cf. § 11h); Nu 35³¹⁻³² P (not to

be accepted from a murderer); Pr 6³⁵ (offered in vain for the life of an adulterer; || 'bribe'); 13⁸ ('the ransom of a man's soul (life) is his riches'); 21¹⁸ ('the wicked is a ransom for the righteous' [see 11⁶]); Is 43³ (Egypt said poetically to be the 'ransom,' which J^g gives to Cyrus in lieu of Israel: || 'Seba instead of thee'); Ps 49⁷ ('no man can redeem [כָּפַר] a brother from death, or give God a *kōpher* for him'); fig. of the discipline of suffering (conceived as delivering from death), Job 33²⁴ (|| 'redeem him [read כָּפַר] from going down into the pit'), 36¹⁸ [all].

7. This use of *kōpher* illustrates 2 S 21⁸. Here David says to the representatives of the murdered Gibeonites, 'Wherewith shall I make propitiation (כָּפַר; ἐξιλίσσωμαι)?' a money *kōpher* is refused (v. 4), and the *kōpher*, which (though the word is not actually used) is demanded, and given to J^g (v. 6; cf. v. 1 24), consists of the lives of Saul's seven sons: comp. also Nu 35³² (P), where it is said that blood unjustly shed 'profanes' and 'defiles' a land, and that a 'covering,' or propitiation, cannot then be made for the land (כָּפַר לֹא יִכָּפֵר; ἐν οὐκ ἐξιλίσθησεται ἡ γῆ ἀπὸ τοῦ αἵματος), except by the blood of the murderer.

8. There is an analogous group of cases, (1b) in which the verb is in the passive voice, the subject being the iniquity, and the means a purifying rite, a sacrifice, or repentance, the effect of which is that the offence is conceived as hidden, cancelled, or made inoperative: Dt 21²⁶ ('and the blood shall be "covered" (i.e. annulled)* for them,' viz. by the symbolical execution of the murderer, vv. 6, 7; ἐξιλίσθησεται αὐτοῖς), 1 S 31⁴ ('the iniquity of Eli's house shall not be "covered" + (ἐξιλίσθησεται) by sacrifice or *minhah* for ever'), Is 6⁷ ('thy sin shall be "covered" +, viz. by the coal from the altar touching the prophet's lips; ἐπεκαθαρεύ: || 'thine iniquity shall depart'), 22¹⁴ ('Surely this iniquity shall not be "covered" + for you, until ye die': ἐκαθερεύσεται), 27⁹ + (through the abandonment of idolatry; ἐκαθερεύσεται), Pr 16⁶ + (through amendment of life; ἐκαθερεύσεται; cf. 28¹³, Ezk 18²¹⁻²²). †

9. (2) In the second class of cases in which *kipper* is used, the subject is God, the object is either the offender or the offence, the question of means does not here arise, but the motive, in so far as it is indicated, is the free grace of God,—represented, however, sometimes as called into activity by a purifying or expiatory rite: the idea of the verb then is that God 'covers,' i.e. treats as covered, overlooks, pardons, condones, the offender or the offence. So (a) the object being the offender, Dt 21²⁶ (J^g, after the symbolical expiatory rite, vv. 6, 7, is entreated to 'cover' [AV 'be merciful to,' RV 'forgive'; ἐλεως γενού] the people, guilty [implicitly] of an untraced murder), 32⁴³ (rather differently: 'will "cover" his land,' i.e. cancel or remove the stain of bloodshed attaching to it, by the slaughter of those who have shed it; ἐκαθαρεύ; AV 'be merciful unto,' RV 'make expiation for': || 'avenge the blood of his servants, and requite vengeance to his adversaries'), Ezk 16⁶³ ('when I "cover" thee (i.e. act propitiiously towards thee; ἐν τῷ ἐξιλίσσασθαι με σοι), with regard to all that thou hast done'), 2 Ch 30¹⁸ (EV 'pardon'; ἐξιλίσθω ὑπέρ); and (b) the object being the offence, Jer 18²³ (EV 'forgive'; ἀθωώω), Ps 65³ § (ἐλίσθη τὰς ἀσεβείας), 78³⁸ ('annulleth iniquity and destroyeth not'; ἐλίσσει τὰς ἀμ., 79⁹ §

* Except indeed Is 28¹⁸, where—unless, with some moderns, וְכִפַּרְתִּי [from כָּפַר; cf. 24¹⁸] is to be read—it is used of annulling a treaty (ἐκάλει; EV 'be disannulled')—a sense which may be derived either from the idea of covering over, obliterating (Ges.), or from that of wiping or blotting out (cf. Pesch. וְכִפַּרְתִּי 'be wiped out').

† EV 'forgiven,' which no doubt expresses fairly the general sense, but obliterates the distinctive character of the Heb. word used (cf. § 15, towards the end).

‡ EV 'purged,' substituting an idea not at all contained in the Heb. RVm 'Or, expiated.'

§ Comp. for the thought Sir 33³⁰ (Heb. וְכִפַּרְתִּי חַטֹּאתֵינוּ צָדָקָה תִּכְפֹּר חַטֹּאתֵינוּ) 36² (Swete 32 (35) 5).

|| EV 'purge away': see the last note but one.

(ὁ ἰλασθῆναι ταῖς ἀμ.), Dn 9²⁴ (RVm 'purge away'; Theod. ἀπαλεῖναι τὰς ἀδικίας [= LXX] καὶ τοῦ ἐξιλάσασθαι ἀδικίας),—the object in all these cases being either 'iniquity' or 'transgression,' and there being no reference to any propitiatory rite. Cf. (though with a reference to sacrifice) Sir 34¹⁹ (Swete 31 (34)²²).

10. (3) The third class of cases in which *kippēr* is used belongs to the distinctively legal terminology (almost entirely Ezk and P: ὁ nearly always ἐξιλάσκειται περὶ: EV mostly 'to make atonement'; see § 2). Here the subject is the priest,* the means usually a sacrifice, though occasionally it is (see § 11 h-m) some other act or offering, regarded as vindicating the holiness of the community in which Jehovah dwells, and hence as reinstating it in His favour: the object is *never* the sin, but (as commonly understood) the person (or thing) on whose behalf the propitiation is made, the verb—which is construed mostly with לָךְ or לָהֶם, and only rarely, in some of the cases in which the object is something material (the altar or the sanctuary), with a direct accusative (Lv 16^{30, 32a}, Ezk 43^{20, 26} 45²⁰ [ὁ ἐξίλ. with accus.])—being interpreted as signifying properly to *cover up* (cf. קָרַף לָךְ, and קָרַף לָהֶם), or *screen*, *by* a קָרַף, or *covering* (propitiatory) *gift* (so Riehm, 30–32; Dillm.; Schmoller, though undecidedly, p. 234).

Wellh. (Compos. 2 336), observing the analogy, as regards the subject and the means, with the cases grouped under (1), supposes that the object was originally 'Jehovah's face' (cf. Gn 32²⁰, cited § 5; and the phrase 'יְהוָה פָּנָיו', lit. 'make sweet the face of J'; EV 'beseech,' or 'entreat the favour of,' Ex 32¹¹, 1 S 13¹³, 1 K 13³⁰ etc.), but that in process of time the object came to be omitted, and the verb was construed absolutely, to *perform a propitiatory rite* (*kippurim*): construed with an accus., it would then mean (analogously with קָרַף, etc., Ges.-Kautsch, § 524) to *affect with a propitiatory rite*. So far as the ideas associated with the word are concerned, it is indifferent which of these explanations of the construction is adopted.

11. We must next consider of what different sacrifices, or other rites, *kappēr*, in this third class of cases, is predicated. It is predicated, viz.,

- (a) of the *burnt-offering*, Lv 1⁴ 14²⁰ 16²⁴; cf. Ezk 45^{15, 17}.
- (b) of the *guilt-offering* (עֹלָת), Lv 5^{16, 18} 6⁷ 7¹ 14¹⁸ (see vv. 12, 14), vv. 21, 22 (see vv. 21, 22) 19²², Nu 5⁶.
- (c) of the *sin-offering*, Ex 29^{26, 37} 30¹⁰, Lv 4^{20, 26, 31, 35} 5^{6, 13} 6³⁰ 8^{15, 24} 10¹⁷ 14¹⁹ 16 (14–15 times [on v. 10 see Kalisch, Dillm., and above, i. 199 n.]) 23²⁸, Nu 15²⁸ 28^{22, 30} 29⁶, Ezk 43^{20, 26} 45²⁰, 2 Ch 29²⁴, Neh 10²³.
- (d) of the *sin-offering* and the *burnt-offering* together, Lv 5¹⁰ 9¹² 12^{6, 8} 14³¹ 15^{15, 30}, Nu 6¹¹ 8¹² (cf. v. 21b) 15³⁴.
- (e) of blood in general (as containing the 'soul,' or life), Lv 17¹¹ H ('I have given it to you upon the altar to *make propitiation* for your souls; for the blood, it *maketh propitiation* by means of the soul [life]'): cf. 6³⁰ 8¹⁵ 16²⁷; also 14²³, where the blood of the slain bird (with other ceremonies) 'makes propitiation' for the leprous house.
- (f) of the 'ram of installation (עֹלָת)', and the bread, offered at the consecration of the high-priest, Ex 29³² (see vv. 19–23, 32).
- (g) of the *meal- and peace-offering*, only in Ezk 45^{15, 17} (possibly, also, though not probably, of the meal-offering in Lv 14^{20, 31}: see § 13).

Kappēr is attributed, further, to

- (h) the half-shekel, to be paid by every one at a census, as the *kappēr* of his 'soul' (life), Ex 30^{16, 18} (probably [cf. Riehm, 24 f.; Dillm.] as an acknowledgment of membership in the theocracy, upon an occasion when the sins and imperfections of indi-

viduals would come prominently under Jehovah's notice); cf. § 6.

- (i) the appointment of the Levites as authorized representatives of the Israelites to perform menial duties about the sanctuary, Nu 8¹⁹ (lay Israelites, approaching the holy vessels, etc., would do so at risk of their lives [cf. 18²¹ 19^{1, 33}]: the Levites, doing it on their behalf, prevent Jehovah's wrath from manifesting itself in a plague [cf. the same expression in Ex 30¹²], and are therefore said to 'make propitiation' on their behalf).
- (j) the incense by which Aaron appeased Jehovah's anger, and arrested the plague, Nu 16⁴⁶ (Heb. 17¹¹).
- (k) the punishment of a conspicuous offender, Nu 25¹³ (the occasion on which Phinehas, interposing with the sword, 'turned away' Jehovah's 'wrath' from the Israelites, and arrested the plague: see v. 11).
- (l) the offering of the spoil taken from the Midianites, Nu 31⁵⁰ ('to make propitiation for our souls before J''; probably, as in Ex 30^{15, 16}, in view of the numbering of the men of war, v. 49 [where the phrase is the same as in Ex 30¹²; cf. also v. 44b with Ex 30¹²]).
- (m) the blood of a murderer, making expiation for blood unjustly shed, Nu 35²⁵.

All these passages belong to P.

12. The following additional facts with regard to the usage of *kippēr* deserve also to be noted.

(a) It is construed with קָ from 'of the offence (or uncleanness),—RV 'as concerning,' 'because of,' 'for,' but more probably (so Riehm, 50 f.; Schmoller, 254 f., 284; cf. Dillm. on Lv 4²⁰) to be understood in the sense of 'clearing' from 'shall make propitiation for him from his sin'), Lv 4²⁰ 5^{6, 10} 14¹⁹ ('from his uncleanness'), 15^{15, 30} 16^{16, 24, 28}, Nu 6¹¹; and with לָ by 'on account of,' Lv 4³⁵ 5^{15, 18} 6⁷ 19²² (RV 'as touching,' 'concerning,' 'for').

(b) It is followed by 'and it shall be forgiven him (them),' in the case of the sin-offering, Lv 4^{20, 26, 31, 35} 5^{10, 13}, Nu 15^{28, 30} (cf. v. 26); and in the case of the guilt-offering, Lv 5^{16, 18} 6⁷ 19²². (These are the only passages in the Law, except Nu 30^{8, 12}, in which קָרַף 'to forgive,' occurs).

(c) It is closely associated (but only where predicated of the *sin-offering*) with 'to be clean' (קָדַשׁ), or 'to cleanse' (טָהַר), Lv 12^{7, 8} 14^{20, 32, 53} 16^{19, 31}, Nu 8²¹, Ezk 43²⁶, cf. 2 Ch 30¹⁸;

with 'to sanctify,' Ex 29^{32, 36, 37}, Lv 8¹⁵ 16¹⁹, Nu 6¹¹;

and with 'to free from sin' (נָקַה), Ex 29³⁶ (EV, very inadequately, 'cleanse'), Lv 8¹⁵ (EV 'purified'), 14^{32, 52} [see v. 53] of the leprous house (EV 'cleanse'), Nu 8²¹ (RV 'purified from sin'), Ezk 43^{20, 22} ('cleanse,'—of the altar, as Ex 29³⁶) 45²⁰ (see v. 15),—in all the cases with נָקַה, of a material object, which the Hebrews regarded as capable of being infected with sin (Schmoller, 222, 261).

(d) Cf. *kippurim*, 'propitiation' (EV 'atonement'), used (a) of a sin-offering, Ex 29³⁶ 30¹⁰, Nu 29¹¹; (b) of a guilt-offering, Nu 5⁶; (c) in the expression 'day of propitiation (atonement),' Lv 23^{27, 28} 25⁶; (d) 'propitiation-money,' of the half-shekel paid at a census, Ex 30¹⁶. It is probable also (whatever the ultimate origin of the term may have been) that the idea of propitiation was felt to attach to *kappōrēth* (EV 'mercy-seat'); cf. what is said on this subject in *Leviticus* (in Haupt's *SBOT*), p. 80 f.

(e) The object of *kippēr* is usually an individual or the community; but sometimes it is a *material* object,—in particular the altar of burnt-offering, (at the time of its consecration) Ex 29^{36, 37}, Lv 8¹⁵, Ezk 43^{20, 26}, (on the annual Day of Atonement) Lv 16^{18, 20, 33}; the sanctuary (on the same occasion), Ex 30^{10b} [in v. 10a the prep. has probably a *local* force], Lv 16^{18, 20, 33}, Ezk 45²⁰; a house infected with leprosy, Lv 14³³; cf. of the goat sent to Azazel, Lv 16¹⁰ (see Dillm.).

* Or sometimes (Lv 14^{17, 18}, Ex 30^{15, 16}, Nu 31⁵⁰ 35²⁵) the offering; but the difference is immaterial.

13. It does not fall within the scope of the present article to investigate the character or *rationale* of SACRIFICE, except in so far as this is expressed by the term *kappār*. Confining ourselves therefore to this, we may draw from the data collected in §§ 10-12 the following conclusions with regard to the significance of this term in its legal or ceremonial applications (which are to be carefully distinguished from the *extra-legal* usages, analyzed in §§ 5, 7-9). In the legal terminology it is especially associated with the *sin-offering*, of which it designates the most distinctive and characteristic operation; it is also frequently, though not so characteristically, predicated of the *guilt-offering* (the *āshām*), that differentiated type of sin-offering prescribed for cases in which injury has been done to the rights of another person. To the *burnt-offering*, offered alone, it is attributed only in Lv 14^{14, 20} 16²⁴ (cf. Ezk 45^{15, 17}; also Job 17 42²), on the ground, it seems, that, though not a proper propitiatory sacrifice, it was a mark of the worshipper's devotion, and, being offered 'for his favour (acceptance) before J^y' (Lv 1³ 7¹⁷), and accepted (לָקַח) accordingly, moved Him to regard him graciously, and to overlook his moral insufficiency; elsewhere it is not attributed to it expressly,* but only (§ 11 d) when it is closely associated with the sin-offering, for the purpose (as seems to be frequently the case) of enhancing the significance of the latter; and, indeed, Lv 14²⁰ 16²⁴ (cf. vv. 3-5) might almost be regarded as falling under this category. Ezekiel (45^{15, 17}) attributes it to the *peace- and meal-offering*; in H, also, it is attributed to the *peace- (and burnt-)* offerings, in virtue of what is said about the 'blood' in Lv 17¹¹ (cf. v. 6); in the system of P it is not attributed directly to either of these, for the meal-offering in Lv 14^{20, 31} holds such a secondary place that it cannot be treated with any confidence as participating in the *kappārā*. The *kappārā* is specially the function of the *blood* (see Lv 17¹¹ [H]; and cf., in the ritual of the sin-offering, Ex 30¹⁰, Lv 4. 8³⁰ (23) 8¹⁵ 16¹⁸ 16¹⁹ 17¹¹, Ezk 43²⁰ 45¹⁶), on account, as is expressly said in Lv 17¹¹, of its being the seat of the 'soul' or life, the most precious, and also the purest and most immaterial gift that can be offered to God; the only exception (among sacrifices) being one that proves the rule, viz. (Lv 5¹³) the vegetable offering allowed as a substitute for the usual sin-offering, when the latter was beyond the means of the offerer. Hence the later Rabb. dictum (*Yōmā* 5a) כִּסּוּת בְּדָם אֵין כִּפּוּר 'there is no *kappārā* except with blood' (cf. He 9²²),—which, however, is not true universally (see the cases, § 11 h-m, esp. Ex 30¹²), but only in so far as sacrifice is concerned.

14. The effect of the *kappārā* is a purification, sometimes from sin, sometimes (Lv 12. 14. 15, Nu 6) from merely ceremonial defilement, sin being regarded as a stain, and the defilement, whether ritual or moral—for in P the two are not clearly distinguished (see LAW, vol. iii. p. 72*; and cf. Schmoller, 280)—being conceived as either made invisible and inoperative, or else as actually obliterated; it is regarded as withdrawn from Jehovah's eyes (cf. Ps 51¹⁰; and contrast 90²); it no longer comes between Him and man: He neither sees nor imputes it. The aim of the priestly legislation is to maintain the ideal holiness of the theocratic community (LAW, *ib.* p. 70 f.); and the *kappārā* is the primary means by which this is effected. Sometimes cleansing (moral or ceremonial) is expressly mentioned as the effect of the rite (see § 12 c; and note esp. Lv 16²⁰ 'on this day shall propitiation be made for you to cleanse you; from all your sins ye shall be clean before J^y'). As prescribed for the priests (Ex 29²², Lv 9⁷) and Levites (Nu 8²¹), before admis-

sion to their sacred duties, it is a readily intelligible rite of preliminary lustration (Riehm, 76 f.; Schmoller, 234 f., 245). Enjoined for a *material* object, the altar or the sanctuary, its aim is to secure or maintain its holiness: the altar, prior to its consecration, is regarded as affected by the natural impurity of human workmanship, which has to be removed; the sanctuary, frequented as it was by a sinful and unclean people, is contaminated by their sins, and accordingly requires a periodical purification (Riehm, 54-57; Schmoller, 221 f., 242, 262); the leprous house (Lv 14²³) is conceived as tainted by sin (§ 12 c); the 'scape-goat,' offered by the sinful people, requires to be purified before it can discharge the solemn functions assigned to it (Riehm, 55; Dillm.; etc.). On the part of God the effect of the *kappārā* is more particularly specified,—at least in the sin- and guilt-offering,—as *forgiveness*,—conditional, as we may suppose would be understood by the more spiritual Israelites, on the penitence of the offerer, though this is not stated in the laws as distinctly and regularly as might be expected (cf. Lv 5¹⁶ 21, Nu 5⁷; Schultz, *OT Theol.* ii. 99 f.): it should, however, in this connexion be remembered that *kappār* was in general possible only for *unintentional* (or *venial*) sins* (above, vol. i. 201^b note; Schultz, i. 382 f., 388 f., 394 f., ii. 87-89: cf. Ezk 45²⁰, where 'ereth' = sins inadvertently). Sins committed willfully, 'with a high hand' (Nu 15³⁰), i.e. in a spirit of presumptuous defiance, challenging God's anger, lie outside the sphere within which the *kappārā* ordinarily operates; hence, as predicated of the regular Levitical sacrifices, it is never described as *appeasing* God (cf. § 2 end), nor is it ever implied that the offerer of such a sacrifice is outside God's dispensation of grace, or the object of His wrath; the cases § 11 / k are exceptional; at most (§ 11 h i l) it may be said to be a means of *averting* it (Riehm, 30, 37, 85; *AT Theol.* 132; cf. Schultz, i. 394).

15. From what has been said, it will be seen that *kipper* is a difficult word to represent satisfactorily in English. 'Cover'—or 'wipe out,' if that view of the original sense of the word be adopted—is too colourless: 'make atonement' (at-one-ment, reconciliation) may express a *consequence* of *kipper*, but it is not what the word itself denotes. It has always—or almost always—a religious, and mostly a ritual colouring: it is to *cover* (metaphorically) by a gift, offering, or rite, or (if God be the subject) to *treat as covered*: the ideas associated with the word are thus to *make* (or *treat*) as *harmless*, *non-existent*, or *inoperative*, to *annul* (so far as God's notice or regard is concerned), to *withdraw from God's sight*, with the attached ideas of *reinstating in His favour*, *freeing from sin*, and *restoring to holiness*,—especially (but not exclusively), when the subject is a human agent, by the species of sacrifice called the 'sin-offering.' It is a stronger, more significant synonym of כָּסַח to 'un-sin,' and כָּפַר to 'purify' or 'cleanse.' There appears to be no one English word which combines, or suggests, ideas such as these. Even to 'make propitiation' accentuates somewhat unduly a particular side, or aspect, of what is involved in *kipper* (cf. § 1 end); though the fact that the ideas just indicated were associated with the word in conjunction with a rite, would point rather naturally in the direction of such a meaning, which the nearly habitual rendering of the LXX, (ἐξ)λάσκωμαι, shows was felt to attach to the word in the 3rd cent. B.C. Nevertheless, esp. in view of the LXX, and NT λαμβάνω, this is on the whole the best rendering of *kipper* in its ritual sense, the cases grouped under §§ 8, 9 being represented, for consistency, by *deal propitiously*

* The extra-legal passage, 1 S 24⁴ (§ 8), is not evidence of the ideas associated with *kipper* in the ceremonial system of P.

* See, however, Lv 6²⁻⁷ 19²⁰⁻²², Nu 5⁶⁻⁸.

with, or be propitious to. Whether, in actual usage, there was any consciousness of the primary sense, to 'cover,' is extremely doubtful: in all probability, *kipper* was felt to express only the derived ideas which have been indicated (cf. Schmoller, 283 f.).

16. To return briefly, before concluding, to the use of the term in the NT. The death of Christ is represented in the NT under three main aspects: as a *λύτρον*, ransoming from the power of sin and spiritual death (see REDEEMER); as a *καταλλαγή*, setting 'at one,' or reconciling, God and man, and bringing to an end the alienation between them; and as a propitiation, breaking down the barrier which sin interposes between God and man, and enabling God to enter again into fellowship with him. 'Propitiation' is in the OT attached especially to the sin-offering, and to the sacrifice of the blood (or life); and Christ, by the giving up of His sinless life, annuls the power of sin to separate between God and the believer, by a sacrifice analogous to those offered by the Jewish priests, but infinitely more efficacious (see, further, ATONEMENT, MEDIATION, RECONCILIATION).

17. It remains only to notice briefly the different view of *kappēr* which is developed by Ritschl, *Rechtfertigung u. Versöhnung*, ii. 70-80 (on *kōpher*), 184-210. *Kappēr*, Ritschl argues (p. 198 f.), is attributed to all offerings, but forgiveness (implying the presence of sin) only to the sin- and guilt-offering: it is thus a false generalization to suppose that its purpose is the removal of sin; and this conclusion is confirmed by the fact that there are many cases of purely physical uncleanness for which, nevertheless, a sin-offering involving it is prescribed. In fact, *kappēr* has essentially (p. 203) *no relation to sin*; the 'covering' of persons, spoken of in the priestly law, does not mean the covering of their guilt, but their protection, in order, viz., that—in accordance with the principle that 'no man can see me and live' (Ex 33²⁰; cf. Gn 32³⁰, Ex 19²¹ 20¹⁹, Dt 5²⁴, Jg 6²² 13²², Is 6⁵)—they may be able to appear before God without risk of their lives; the necessity of such 'protection' depends, however, not upon man's sinfulness, but upon his 'creatureliness': he needs it, not as sinful, but only as created, and finite. Sin is not the ground of the *kappārā*, but merely (in the sin- and guilt-offering) its occasion. It follows that, upon Ritschl's view, *kipper* ought not to be translated 'make propitiation' (or 'atonement') at all: accordingly, he condemns (p. 199 f.) the rendering 'sühnen' as introducing 'only confusion,' and considers (p. 186) that the LXX, in rendering (ἐξ)λάσκειν, substituted for the Heb. a Greek word which was not really its equivalent.

This theory is controverted at length by both Riehm (esp. pp. 37 f., 46-8, 51 f., 57-9, 72-81, 83-6, but also elsewhere) and Schmoller (pp. 266-9, 274-81); cf. also Schmidt, *PRE*² xvi. 365 f.; and in spite of the ability with which Ritschl writes, it is impossible not to think that it is a one-sided one, depending in some parts upon a combination of elements which are not combined together in the OT, and in others emphasizing features and principles which do not really, in the legislation as a whole, possess the prominence and significance which are attached to them. The crucial question undoubtedly is, What does the *kappārā* 'cover'? Ritschl's view that, as it is predicated of the burnt- and peace-offering, in which there is no question of sin, it must cover man's creatureliness, which cannot subsist in God's presence without such 'protection,' introduces an idea which is nowhere brought into connexion with sacrifice. To approach God (with sacrifice) is by no means identical with 'seeing' Him (in the sense im-

plied in the passages quoted), nor is it ever represented as endangering life: the principle of Ex 33²⁰ etc. is never referred to in the legislation of P; and the cases in which life is represented as endangered are connected not with the omission of a sacrifice, but with some irreverence or irregularity in the discharge of sacred offices, or with some other specific act of disrespect towards God (Ex 28³⁵ 30²⁰ 21, Lv 8³⁵ 10¹¹ 6. 7. 9 15²¹ 16² 13 22⁹, Nu 4¹⁵ 19. 20 17¹⁰ 18³ 22. 32; cf. 1³⁸ 8¹⁹ 18⁹). In preference therefore to having recourse to an explanation both artificial in itself and also with so little support in the usage of the ritual legislation, it seems better to suppose that though the burnt-, peace-, and meal-offerings were not offered expressly, like the sin- and guilt-offerings, for the forgiveness of sin, they nevertheless (in so far as *kipper* is predicated of them) were regarded as 'covering,' or neutralizing, the offerer's unworthiness to appear before God, and so, though in a much less degree than the sin- or the guilt-offering, as effecting *kappārā* in the sense ordinarily attached to the word, viz. 'propitiation.'* The great rarity with which *kappēr* is attributed to any but the sin- and guilt-offerings, and the fact that, where its effects are specified, they are always either the forgiveness of sin or the removal of uncleanness, are additional arguments in support of the ordinary view. It is also to be observed that Ritschl's theory implies that *kappēr* expresses the idea of 'protection' far more directly and distinctly than can be deemed probable: 'protection,' as said above (§ 4), may be a secondary and indirect consequence of *kappēr*, but it is not at all the primary and immediate sense of it (not even in Dt 32⁴³; Ritschl, p. 72 f.). The fact that *kipper* is used with reference to the removal of physical uncleanness proves, not that it stands in no relation to sin (for כָּפַר, to 'free from sin,' is used in exactly the same connexions, § 12 c), but that the Hebrews understood the term 'sin' in a wider sense than we do, and included in it material, as well as moral, defilements.

LITERATURE.—The two very full discussions that have been referred to, Riehm, *Der Begriff der Sühne im AT*, 1877 (reprinted from SK, 1877, pp. 7-92; see also his *AT Theol.* 130-147), and Schmoller, SK, 1891, Heft 2, pp. 205-258; Schultz, *OT Theol.* I. 397-400, and *Amer. Journ. of Theol.* iv. (1900), 285-91, 301-4, 300-13; Dillm. on Lv 4³⁰; Wellh. *Compos.*² 335 f.; Smend, *AT Rel.-gesch.* 321; Nowack, *Arch.* ii. 220; A. B. Davidson, 'Atonement' in *Extra-ritual Literature*, *Expos.*, Aug. 1899, p. 92 ff. Schultz's view of the ritual sense of *kipper* approximates to that of Ritschl, though he rejects the idea that an ethical motive is never involved in it: he would render the term by 'consecrate' (*weißen*); man is by nature weak, and consequently (physically and morally) unworthy to draw nigh unto God: the priest, by the 'covering' rite, draws a veil over the creaturely unworthiness of the offerer,—and also, if the case requires it, over his sin; the 'consecration' (*Weihung*), thus provided for him, is, as it were, a 'wedding-garment,' enabling him to draw near to the high and holy God without danger.

S. R. DRIVER.

PROSELYTE (προσῆλυτος, from προσέρχεσθαι: lit. 'advena,' i.e. visitor, new comer),†

i. The term 'proselyte.'—προσῆλυτος is the usual LXX rendering of נָזִיר [see GER],‡ i.e., originally,

* The use of the term נָזִיר 'savour of tranquillizing or contentment,' of the burnt-, as of the meal- and peace-offerings (Lv 19. 17 23. 16 35 *et al.*), also implies something of the nature of a propitiation (cf. Gn 8²⁰).

† The etymology is suggested in such expressions as יָזַב דִּי תִּשְׁתַּחֲוֶה לְפָנֵי מַלְאָכָא (Lv 19³³, Nu 9¹⁴); ἡ προσῆλυτος ἐστὶν ὁ ἐκ τῆς ἑθνικῆς ἐκκλησίας ἐκ τῆς ἑθνικῆς ἐκκλησίας (Ex 12⁴⁹); though more often in such phrases as ὁ προσῆλυτος (גֵּר) אֲנִי (Nu 15¹⁰ 16. 21 29 1910, Jos 24⁹), προσῆλυτος (Lv 16²⁹ 17. 10. 12. 13, Nu 15¹⁵ 16. 21 29 1910, Jos 24⁹), προσῆλυτος (Lv 18²⁶, cf. Nu 15¹⁴), προσῆλυτος (Lv 20²), προσῆλυτος (Lv 19³⁴); once only προσῆλυτος (Ex 14⁷ [Aq. Ps 65¹²⁰]), while Ex 47²³ gives τὸν προσῆλυτον τὸν παρεκκλῆστον ἐκ τῆς ἑθνικῆς. This last is like the rendering of 'the ger who is in the gates' in Ex 20¹⁰, Dt 5¹⁴ ὁ προσῆλυτος ὁ παρεκκλῆστον ἐστὶν.

‡ נָזִיר is eleven times translated πάρεκκτος (Gn 15¹³ 23⁴, Ex 22¹⁸ 16², Dt 14²¹ 23⁷ 9), 2 K 11³, 1 Ch 29¹⁵, Ps 38 (39)¹³, 118 (119)¹⁹, Jer 14⁸; cf. Ps 104 (105)¹² נָזִיר; twice γέρας (Ex 12¹⁵, Is 14¹); once γέρας (Job 31²⁷). Job 19¹⁵ has γέρας for נָזִיר. προσῆλυτος

one who takes up his residence in a foreign land, and so puts himself under the protection of a foreign people, as a client; particularly a foreigner thus residing in Palestine.* The classical equivalent is *ἐπηλύς* or *ἐπηλύτης* (*advena*); but the technical name of such a foreign resident was *μέτοικος* (*incola*), to which LXX *πάροικος* [*μέτοικος* occurs Jer 20³ only] corresponds. In NT (Mt 23¹⁵, Ac 2¹⁰ 6⁵ 13⁴) *προσέλυτος* is commonly understood to mean a foreign convert to the Jewish religion, a *proselyte* in our sense of the word.† It seems to have lost all connexion with residence in Palestine, for the proselytes referred to in Ac 2¹⁰ 13⁴ live in foreign lands.

When did the word lose the local (political) and gain this final technical (religious) sense? Its meaning in the LXX is somewhat disputed. Geiger (*Urschrift*, p. 353 ff.) maintains that it is there strictly equivalent to *gēr* in its original sense, while W. C. Allen (*Expositor*, 1894, x. 267-275) argues that the LXX uses the word consistently in the final sense of *proselyte*. This wide divergence of view is possible because the Hebrew word *gēr* itself becomes almost equivalent to *proselyte* in P.‡ The ideal of Judaism is that there shall be no uncircumcised alien in the Holy Land. But it cannot be proved that *προσέλυτος* connects itself consistently with these OT approaches of *gēr* to its final (Mishnic) sense. It is true that *πάροικος* stands for *gēr* in several passages where the sense 'proselyte' would be especially inappropriate, as where Israel, or an Israelite, is called a *gēr* in a foreign land (Gn 15¹⁰, Dt 23⁷, Gn 23⁴, Ex 22¹⁸), or in God's land (Ps 39¹² 119¹⁹, 1 Ch 29¹⁶), where God is Himself a *gēr* (Jer 14⁹), or where the law for the *gēr* differs from that for the home-born (Dt 14²¹ contra Lv 17¹⁴). But on the other hand no very obvious reason for the rendering exists in 2 S 11³; and—what is more important—Israelites are elsewhere called *προσέλυτοι* in Egypt (Ex 22²¹ 23¹, Lv 19³⁴, Dt 10¹⁹), or in God's land (Lv 25²³); the word is closely parallel to *πάροικος* (Lv 25²³, 33); circumcision is specially required of a *προσέλυτος* before he can eat the Passover (Ex 12⁴⁸); and in two passages where a proselyte proper is meant, the Aramaic word *γειώρας* is used (Ex 12¹⁹, Is 14¹).§

It is certain that the LXX *προσέλυτος*, even if he is often a circumcised convert, remains always a foreign resident in Palestine. Of an application of the word to a convert to Judaism who still resides in a foreign land there is no trace.¶ This distinguishes the LXX use from that of the NT. In an interesting mistranslation of Is 54¹⁸ LXX reads, 'Behold, proselytes will come to thee through me, and will sojourn with thee, and will flee to thee for refuge.'¶ The religious sense blends with the local, but does not displace it. It is therefore impossible to make the word simply equivalent to 'convert.' The tendency of the LXX to translate *gēr* by *προσέλυτος* is stronger than its sense of this never translates any other root, but is found without Hebrew equivalent in Lv 17¹⁵, Dt 10¹⁸ 12¹⁸; Is 54¹⁸ gives an interesting mistranslation. 'Ἐτίλυνται occurs only in Job 20²⁶.

* *ἡ παροικία* is distinguished from the one side from the native Israelite (*ἡ ἀντιχώρα*, *ἡ ἐγχώριος*, *οἱ υἱοὶ Ἰσραὴλ*), and on the other from the foreigner (*ἡ ἀλλοτρία*, *ἡ ἀλλογενής*). The distinction from *ἡ παροικία* is less clear, and does not perfectly correspond to that between *gēr* and *tōshab*.

† So Theodoret: *προσέλυτοι δὲ ἰσχυροὶ τὰς ἐν τῶν ἰδίων παροικίας καὶ τῶν νεμερῶν αὐτῶν ἀποκαταμένους*; and Suidas: *οἱ ἐξ ἰδίων παροικησάντες καὶ κατὰ νόμον καθέσαντες πολιτεύονται*.

‡ See, e.g., Lv 17-19 (H), Nu 15 (P). The principle is, one law for home-born and *gēr*, Ex 12⁴⁸, Nu 9¹⁴ 15¹⁵, 16 20 30.

§ So Schürer, *GV* 3 iii. 125 f.; Bertholet, *Die Stellung der Israeliten u. d. Juden zu den Fremden*, 1896, p. 259 ff. The word *γείρας* is used by Justin (*Dial. c. Tryph.* c. 122 [*γείρας*]) and Julius Atrii (*ad Aristidem*) of proselytes; but Philo read it in Ex 22²¹ (LXX *αἰσώμενος*) of Moses in Midian (*de Confus. Ling.* 17), hence it also cannot have been a recognized technical title. Does Josephus mistake it for the name of a town? (*ἡ τοῦ Γείρας Σίμων*, BJ ii. xix. 2, etc.).

¶ In *ἡ γῆ ἡν ἔμελλεν* Lv 19³⁴, Nu 9¹⁴ 15¹⁴, *ἡ γῆ* Ex 12⁴⁸ etc.

¶ *Ἴδοι προσέλυτοι προσέλυνται σοι*, etc.

later technical meaning. No difference of usage appears between early and late parts of the LXX. The word occurs in the Apocryphal books only in To 1⁸ 8 (from Dt 14²³ 26¹²). The absence of a common technical use of the word seems to be indicated by the fact that it is not used of unmistakable proselytes, from Ruth to Achior (Jth 14¹⁰), or in the frequent expressions of hope for the conversion of the heathen.

Philo* understands the LXX *προσέλυτος* in the sense of 'convert.' Those who have changed to the better order Moses calls *προσέλυτοι*, because they have come to a new and God-pleasing constitution (*ἀπὸ τοῦ προσεληλυθέναι καινῇ καὶ φιλοθέῳ πολιτείᾳ*, *de Monarch.* i. 7). But he prefers the word *ἐπηλύς* (*ἐπηλύτης*, *ἐπηλύτος*), often, as in this passage, substituting it for the other in the course of his discussion (so also in *de Vict. Off.* 10, *Quaes. in Ex* 22²⁰, *de Cher.* 31. 33. 34), more often still using it throughout (*de Septenario* 14, *de Creat. Prin.* 6, *de Caritate* 12, *de Pœnit.* 2, *de Execrat.* 6). Bertholet (p. 288) is surely mistaken in saying that *ἐπηλύς* has a wider meaning than *προσέλυτος*, for the distinction in *Quest. in Ex* 22²⁰ between *ἐπηλύδες* of place (*χωρὰς*), and those of laws and customs (*νομῶν καὶ ἐθῶν*), is made solely in order to explain the two uses of the word *προσέλυτος* in Ex 22²⁰ (21), and the argument would be wholly without force if the two words were not synonymous. Philo allows the possibility of the local meaning of *προσέλυτος* (*ἐπηλύς*) in order to explain its application, figuratively, to Israel in Egypt. The literal word in this connexion was *μέτοικος* or *ξένος* (*de Vita Mos.* i. 7, *de Carit.* 13. 14). Compare his interpretation of Lv 25²³ (*de Cher.* 31-34): the wise man is but an *ἐπηλύς* and *πάροικος* in the world; God is the only citizen, and on the contrary the foolish man is altogether a fugitive.

Philo's preference for the word *ἐπηλύς* prevents us from supposing that the word *προσέλυτος* was current in his circle, though it hardly warrants the opinion that *ἐπηλύς* was the current technical name of the Greek converts to Judaism of whom he speaks. It was probably simply the more natural word by which to convey the sense of the LXX to his readers. In Philo, then, the religious interprets and practically displaces the local use of the word, but a common technical use of it, such as the NT seems to presuppose, he does not reveal.

Josephus often refers to actual proselytes,† but without using the name; and he not infrequently alludes to OT passages in which the *gēr* is commended to charity;‡ but cites them only as providing for the poor, or for the foreigner (*ξένος*, *ἀλλόφυλος*, *ἀλλοτριόχωρος*). Are we to infer that Philo knew, as Josephus did not, a class of Greek converts to Judaism to whom the humane injunctions of the law applied, who had lost their natural friends and helpers for the sake of religion, and were especially needy and deserving of friendly consideration on the part of Jews?

ii. *Words and phrases descriptive of proselytes.*— Instead of a fixed technical word for foreign converts to the Jewish religion, the Old Testament and Jewish literature give various descriptive phrases, some of which may well be gathered together here, since they contain in themselves an interpretation of Jewish proselytism. The proselyte is a *gēr* who is circumcised (Ex 12⁴⁸), or who joins himself to the house of Jacob (Is 14¹); he is one who enters into the assembly of Jahweh (Dt 23⁸ 'in the third generation,' cf. v. 3); he is

* See Bertholet, *l.c.* pp. 235-289.

† e.g. Helena, Izates, and Monobazus (*Ant.* xx. ii.-iv.); Fulvia (*Ant.* xviii. iii. 5); cf. *c. Ap.* ii. 11, 29, 37, *Ant.* xiii. ix. 1, xi. 3; BJ ii. xx. 2, vii. iii. 3, etc.

‡ e.g. *Ant.* iii. xii. 3 (Lv 25⁶), iv. viii. 21 (Dt 24²¹, Lv 19¹⁰, 10¹⁰, viii. 22 (Dt 14²³, 26¹²), viii. 33 (Dt 24¹⁴, 15).

a foreigner [גר, ὁ ἀλλογενής] who has 'joined himself to Jⁿ* to minister to him, and to love the name of Jⁿ, to be his servant—every one who so keeps the Sabbath as not to profane it, and who lays hold on my covenant' (Is 56²⁻⁶); he is a *nokhri* (ξένος) who 'comes to take refuge under the wings of Jⁿ' (Ru 2^{11, 12}, cf. 10; see also Apoc. Bar 41⁴). Only in Est 8¹⁷ are converts spoken of as those who 'become Jews' [ἵνα γένωσιν, LXX περιτέμνοντες καὶ λουδίζον]. Achior (Jth 14¹⁰) believed in God, was circumcised, and added to the house of Israel (προσέτεθῃ πρὸς αὐτὸν, as Is 14¹). See also the forms of expression in such passages as Is 2²⁻⁴, Jer 3¹⁷ 4³ 12¹⁶ (cf. Is 45²² 65¹⁶), Zeph 3⁹, Is 44⁵, 1 K 8⁴¹⁻⁴², Ru 1¹⁶, Zec 8²⁰⁻²³ 9⁷ 14¹⁶⁻¹⁹, Is 19¹⁸⁻²⁰, To 14^{6, 7}. A convert could be described as one who turned to Jⁿ, swore by the name of Jⁿ, prayed to Him, sought and kept His law, especially the Sabbath and the prohibition of eating blood. Circumcision could not be omitted by one who would join himself to Israel. Almost without exception (but see Zeph 2¹¹, Is 19¹⁸⁻²⁰) the supposition is that converts will live in Israel's land.† They are circumcised *gerim*.

Philo regards proselytes as those who leave polytheism and adopt the worship of one God. He describes them as changing to the better order, as migrating to piety, journeying to a good colony, deserting to God or to the truth, wandering to truth and to the honouring of the One who is worthy of honour, as fugitives to God, and suppliants, as those who change to the constitution (πολιτεία) of the Jews. The mind of a proselyte (Ex 23⁹) is alienation (ἀλλοτριώσις) from polytheism and familiarity (οἰκωσις) with the worship of the One and Father of all.‡ Having come to the worship of the true God they come to possess all virtues, wisdom, temperance, modesty, etc. (*de Pœnit.* 2), they will have a secure place in heaven, and meanwhile are to be especially cared for, since they have cut themselves off from their natural relationships, and since the God-pleasing conduct (θεοφιλέτης ἥθος) should be a greater ground of friendship than anything else (*de Carit.* 12; *de Pœnit.* 1).

Josephus describes the proselyte as one who changes his life to the customs (ἔθνη) of the Jews (*Ant.* XX. ii. 1); who is carried over to their laws (νόμους), or is taught to worship God as the Jews do (τὸν θεὸν σέβειν ὡς Ἰουδαῖοι πατέριον ἦν, XX. ii. 3); who has come to the Jewish laws (νομίμοις προσελθὺς τοῖς Ἰουδαίοις, XVIII. iii. 5), or simply becomes a Jew (εἶναι Ἰουδαῖος, XX. ii. 4); one whom the Jews have brought over to their religious observances, and made in a sense part of themselves (*BJ* VII. iii. 3). All but a few of the women of Damascus had been brought under the Jewish religious worship (θησαυρεῖα)—*BJ* II. xx. 2. The Idumæans and Ituræans were circumcised, and lived according to the laws of the Jews (XIII. ix. 1, xi. 2; cf. XIII. xv. 4, xv. vii. 9; *c. Ap.* ii. 11, 29). Religion is with Josephus, not indeed simply a matter of race, but essentially one of ancestral custom and fixed habit of life, and a change of religion is a change of custom.

Apoc. Bar speaks of those 'who have forsaken vanity and fled for refuge beneath thy wings,' in contrast to those who have 'withdrawn from thy covenant and cast from them the yoke of thy law' (41³⁻⁴); ‖ and refers to them again as 'those who before knew not, but afterwards knew life

and mingled with the seed of the people which had separated itself' (42⁶).

Much uncertainty must be acknowledged regarding the use of the phrase the 'devout,' or 'God-fearers' ('*ἱεῖς*, ὁ φοβούμενος τὸν θεόν [κύριον], ὁ σεβόμενος τ. θ.) as the technical name either for proselytes in general or for a certain class of proselytes. In Judaism (after Dt 6^{2, 13, 24} 10^{12, 20}, Lv 19^{14, 23} 25¹⁷ etc.) it became so far a standing phrase for Israelites, or the *true* Israelites, themselves that it would seem inappropriate as a distinctive designation of converts, or half converts, from heathenism (see Ps 15⁴ 22^{22, 23} 25^{12, 14} 31¹⁹ 60⁴ etc., Mal 3¹⁶ 4³, Sir 27⁻¹⁷ 61^{6, 17} 34¹²⁻¹⁶ etc., Ps-Sol 27³ 31⁶ 42² etc.).* It is indeed commonly held that in Ps 115^{11, 13} 118⁴ 135²⁰ proselytes are distinguished by this title from the Israelitish laity and priesthood.† But this is not certain. The phrase may be a comprehensive and summary one, as it probably is in Ps 22²⁷ (so in Three ²⁷, cf. 61⁶⁻⁸, 10 [LXX Dn 3^{20, 22-25, 27}], Rev 19⁵ (11¹⁵), where it is equivalent to 'servants of the Lord'). 2 K 17^{24, 25} does indeed suggest that heathen might fear Jⁿ and at the same time serve their own gods; but this is perhaps an ironical description of the Samaritan religion.

It is Acts which seems most clearly to imply a technical use of the phrase. Σεβόμενοι or φοβούμενοι, with or without τὸν θεόν, is commonly regarded as designating such non-Jews as held to the Jewish synagogue worship and observed the most elementary Jewish laws of food and purity and Sabbath observance, without entering by circumcision into the Jewish community. Such a class, distinct from Jews on the one side and from casual travellers to Jerusalem on the other, Josephus once mentions as contributing to the wealth of the temple (*Ant.* XIV. vii. 2, σεβόμενοι τὸν θεόν).‡ Yet the references to them here and in Acts are indefinite enough, so that Bertholet (pp. 328-334) can argue that they are nothing but circumcised proselytes, while on the other hand O. Holtzmann (*NT Zeitgesch.* p. 185) declares that προσήλυτος is the technical name of (uncircumcised) φοβούμενοι. They are distinguished from Israelites (Ac 13¹⁶), children of Abraham's race (13²⁶), the Jews (13²⁵ 17¹⁷), and these two classes together composed the synagogue audiences at Antioch of Pisidia and at Athens. The 'God-fearers' seem to be identified with proselytes in 13⁴, for ὁ σεβόμενος προσήλυτος can hardly be different from ὁ φοβούμενος τὸν θεόν of vv. 16, 28. Schürer himself recognized the identification in Riehm's *Handwörterbuch*⁴ (1894), art. 'Proselyten,' but denies it again in the 3rd ed. of his *GJV* (1898) iii. p. 124 ff., where he argues against Bertholet that proselytes proper are included in the first category, that of Jews or Israelites. This might indeed be used in common speech to include all the circumcised, whether of Jewish birth or not, but the phrase 'children of the race of Abraham' (v. 28) seems more explicit. But, on the contrary, 'the devout Greeks' of Thessalonica (17⁴) were hardly a different class from the 'Greeks' whom St. Paul found in the synagogues at Iconium (14¹) and Corinth (18⁴). St. Paul carries out his threat to leave the Jews and go to the Gentiles by going to the house of Titius Justus, one of the σεβόμενοι (18⁷), who could therefore hardly have been circumcised. As to Lydia (16¹⁴) and 'the devout women' of Antioch (13²⁰), we cannot determine the degree of their connexion with Judaism; but Cornelius is unmistakably an uncircumcised foreigner (ἀλλόφυλος, 10²⁸), with whom a Jew could have no free intercourse (11³). Bertholet is obliged to say that

* See Zec 2¹¹, Est 9²⁷.

† Cf. Dt 6¹³ 10²⁰.

‡ Naaman is hardly an exception, since he can worship Jⁿ in a foreign land only by taking some of Jⁿ's land with him (2 K 5^{17, 18}).

§ See references above.

¶ So Philo contrasts proselytes with apostates (οἱ τῶν ἱερῶν νόμων ἀποστάντες, *de Pœnit.* 2).

* See references in Cremer's *Wörterbuch*, s. *φθισ*.

† Bertholet (p. 181 f.), Baethgen (*Die Psalmen*) on Ps 115¹¹; Wellhausen (*Ph.*). This interpretation goes back to Theodoret, Ibn Ezra, Raah.

‡ These are 'the Greeks who honour our customs' (*Ant.* III. viii. 9); those who have a 'zeal for our religion' (*c. Ap.* II. 29).

the phrase *φοβούμενος τὸν θεόν* (10^a, 22) is not used of him in its technical sense. It is true that its use here, in connexion with other descriptive words, and especially in v. 22 ('he that fears him and works righteousness'), does not suggest the technical name of a definite class of men. But surely Cornelius would have been found in the synagogue on the Sabbath (see 10^a, 22), and he is not to be distinguished from the class of foreigners informally connected with Judaism, with whom the other passages acquaint us. Another such is the centurion who loved the Jewish nation and built them a synagogue (Lk 7²⁻⁹); and another, the eunuch who came to Jerusalem to worship (Ac 8²⁷⁻²⁸), but who could not, if he would, enter into the assembly of the Lord (Dt 23¹); others are mentioned in Jn 12²⁰.

Bertholet is probably right in insisting that there was only one sort of convert, the circumcised foreigner, who undertook to fulfil the whole law (Gal 5³). He recognizes, too (pp. 298-300, 334), the undoubted fact that Cornelius was a representative of a large class of Greeks who were attracted by certain beliefs of Judaism, and adopted certain of its customs, were recognized by Jews as religious and virtuous men, but did not cross the strict line which still separated Jew from Gentile. But it seems probable that he is mistaken in combating the common view that such Greeks were called 'God-fearers.' It is true that, in the absence of evidence of the common use of the word 'proselyte' itself, we might be tempted to find in *ὁ φοβούμενος* an earlier technical name for the proselyte proper, as Cremer seems to do* on the basis of 2 Ch 5⁶ LXX. But for this the evidence is too slight.

The number of foreigners who had come in some measure under the Jewish religion was, according to Josephus (*Ant.* XIV. vii. 2; *c. Ap.* ii. 29) and Philo (*Vita Mos.* ii. 4), very large.† Schürer's careful collection and investigation of the evidence of inscriptions‡ proves that there were Greek religious societies in the first centuries after Christ, of so-called 'worshippers of the Most High God,' who got their name and their monotheistic faith from the Jews, and yet held to many elements of Greek religion. They were a result, in Schürer's opinion, of Jewish propaganda, but remained part Jewish, part Greek, in very varying proportions. One who belonged to such a society could well have *σεβόμενος*, or *metuens*, inscribed on his tomb.§

The 'God-fearers,' then, are not proselytes in any proper sense, in spite of Ac 13⁴⁵, which, if not due to an early textual error, is an indication of a somewhat free, untechnical use of *προσήλυτοι* itself, such as the LXX would suggest. If the latter be allowed here, the question might arise whether all the 'proselytes' in 2¹⁰ were certainly circumcised. The question is made the harder by the uncertainty whether the phrase applies only to the Romans (Zahn) or to all those named in vv. 2, 10 (Holtzmann, etc.), and whether they were then permanent residents in Jerusalem (v. 9), or pilgrims to the feast.

The phrase *Proselytes of the Gate* has nothing whatever to do with the *σεβόμενοι τὸν θεόν*. It is simply a late Rabbinical title (after Ex 20¹⁰, Dt 5¹⁴ etc.) for sojourners in Israel's land (the original *gerim*). Earlier, in the Mishna, such a person is *ger tōshab* (cf. Lv 25^{47b}). In distinction from

these, the proselyte was called by late Rabbis the '*Proselyte of Righteousness*,' while in the Mishna he is simply the '*ger*.'

Although there were among the heathen many who were attracted by the monotheism and morality of Judaism, and attended the synagogue services, yet these were not in our sense proselytes. A heathen could become a Jew only by circumcision, hence there was but one order of proselytes proper. Lardner had already made the correct observation: 'There was but one sort of proselytes among the Jews (the circumcised), and Cornelius was not a proselyte but a Gentile.'† But that the word *προσήλυτος* was applied exclusively to these in NT times is not certain.

iii. *The Duties and Rights of Proselytes*, i.e. of circumcised foreigners, were ideally the same as those of circumcised Jews (Ex 12⁴⁸). Philo gives abundant evidence that a Greek became a proselyte only by a violent and absolute break with his past life and associations.‡ So Tacitus (*Hist.* v. 5) says that proselytes learn to despise the gods, cast off the fatherland, and hold parents, children, brothers, in contempt. The story of Izates is not in conflict with this.§ His first Jewish adviser dissuaded him from circumcision, telling him that he could worship the deity (*τὸ θεῖον σέβειν*) without it. But this only meant that it was better for him to remain a heathen and not to become a Jew. The second adviser encouraged him to become a proselyte.

If circumcision was the decisive step in the case of all male converts, there seems no longer room for serious question that a bath of purification must have followed, even though early mention of such *proselyte baptism* is not found.¶ The law (Lv 11-15, Nu 19) prescribed such baths in all cases of impurity, and one who came with the deep impurity of a heathen life behind him could not have entered the Jewish community without such cleansing. As long as the temple stood, an offering made a third (in case of women a second) rite in connexion with the proselyte's reception.

According to Dt 23¹⁰⁻¹², full entrance into the assembly of the Lord was denied entirely to eunuchs (but see Is 56³⁻⁵), bastards,‡ Ammonites, and Moabites; while admittance was granted to children of the third generation in the case of the Edomite and the Egyptian. It is not clear how far this principle may have been applied in later times, or just what restrictions it implied.** Certainly, the Passover could be observed after circumcision (Ex 12⁴⁸).

Various practical limitations of the rights of proselytes (in respect to marriage, etc.) which later Rabbis discuss, probably belong to the intensified racial feeling which followed the rise of Christianity and the fall of Jerusalem. The proselyte seems to have been feared rather than sought or welcomed by the Judaism of the Talmud.††

The proselyte would, of course, have needed instruction, both before and after his admission to

* To Schürer belongs the credit of having corrected current misconceptions on this matter.

† *Works*, vol. vi. pp. 522-533, cf. xi. pp. 306-324. Lardner also saw that the distinction of 'proselytes of the gate' and 'of righteousness,' and the construction of the Noachic commands for the former, were recent.

§ Against Bertholet, p. 332.

¶ The *ger* and *tōshab* are distinguished in Ex 12⁴⁸, Lv 25^{47a}, Nu 35¹⁵ etc., but are closely associated (cf. Gn 23⁴, Lv 25³², 2, 1 Ch 23¹⁵, Ps 39¹³, and Lv 25⁴⁴).

the Jewish community. One might be tempted to find evidence of early catechetical instruction in such passages as Ps 15, 24²⁷, 34¹³⁻¹⁵, * Is 33¹⁴⁻¹⁶ etc. In Harnack's opinion we have in Δδ. 11³, 2²-5³ and fragments in chs. 8 and 13, a book of instruction for Jewish proselytes called 'The Two Ways.'

With the disappearance of a definite second order of 'Proselytes of the Gate,' the question of special rules for them falls away for the biblical period. The so-called 'seven commands of the children of Noah,' which the Talmud holds to be valid for the *ger tôshab*,† are a product of legal theorizing, and could never have been enforced by the Jewish authorities of NT times on the Greeks and Romans who lived in Palestine.

As the *σεβουεροι* *τὸν θεόν* were Gentiles, the Jewish authorities would hardly attempt to give detailed rules for their life. They would rather accept whatever measure of homage Greeks paid to their religion as contributing to its glory, and would, according to their generosity of disposition, recognize and admire moral rectitude and even religious reverence among the heathen. For such recognition of ethnic religion and morality the OT prepared the way.‡

The apostolic decree of Ac 15^{28, 29}, cf. vv. 19, 30 21²⁸, no doubt prohibits some of the heathen practices which were most offensive to Jews, § but cannot be identified with any known or probable Jewish rules for the *σεβουεροι*. It was only Christians who had to face the problem of providing a *modus vivendi* between Jews and Gentiles. That Jews did not eat with even the best of the *σεβουεροι* the story of Cornelius is striking proof. The Jewish customs which the *σεβουεροι* seem chiefly to have observed were the Sabbath, the kindling of lights (before Sabbath, so as not to violate Ex 35²), the fasts, certain food laws, contributions to the temple,|| charity to the poor, and other moral virtues.¶

iv. *The History of Jewish Proselytism* cannot even be sketched within the limits of this article.** Although the prophets furnished the universal faith which must underlie missionary effort; and though Judaism cherished the hope that J^u would be recognized by all nations, yet it is only among the Jews of the Greek Dispersion that anything like a propaganda can be found. According to the ruling view, which Pharisaism represented, the conversion of the heathen was to be accomplished by God rather than by man. It belonged to eschatology. The Book of Jonah uncovers and rebukes the deep-seated reluctance of Judaism to go to the heathen with a message for their salvation. In the Dispersion outward and inward conditions favoured a more open and generous attitude. Jews could not but be influenced by the breadth of Greek thought, and Greeks were drawn by the mere spectacle of a people who held a monotheistic faith and led a moral life. The Hellenistic-Jewish literature was no doubt in part aimed at heathen readers, and meant to persuade them of the falsity of polytheism and idolatry, and the truth of the sacred books, the laws, and the doctrines of Judaism.†† The synagogues were

open to foreigners, and were the most effective agency in the propagation of Judaism (cf. Ac 15²¹ fulfilling v. 17). Whether the temple at Leontopolis had a similar effect it is hard to say (cf. Is 19^{18a} ?).

It is extremely difficult to measure the results of such efforts. The number of those who were more or less influenced by Judaism was no doubt very great. The number of circumcised proselytes may have been relatively small, but, on the other hand, it may have helped to fill out the great multitude of Jews who were to be found in Egypt, Syria, Asia Minor, Greece, and Italy.

In Palestinian Judaism it is hard to find evidence in the time of Christ of that zeal of which Mt 23¹⁵ speaks. There is evidence of large accessions to the Jewish community during the latter part of the Persian and the beginning of the Greek periods,* a result perhaps of the impulses of which Is 40 ff., Ruth, Jonah, and such Psalms as 22, 47, 65-67, 83 are expressions, which the work of Ezra and Nehemiah only temporarily repressed. The use of Aramaic, the language of neighbouring peoples, is a fact worthy of consideration in this connexion. A reaction and a closing of doors came with the reign of Antiochus IV. and the rise of the Pharisaic party.

The Maccabean princes revived the old method of proselytizing by force. So John Hyrcanus, having conquered Idumaea, permitted the inhabitants to remain in the land if they would be circumcised and adopt the laws and customs of the Jews.† The similar forcible conversion of the Ituraeans by Aristobulus‡ is regarded by Schürer§ as referring to Galilee. At the beginning of the Maccabean wars this had still been a heathen country, with a few scattered communities of Jews in it, who could be transferred bodily to Judaea (1 Mac 5²⁻²⁴). The earliest references to these Jewish converts in Galilee are found in 2 Ch 30^{10, 11} (cf. 13², 2 Ch 15⁹).|| 'It is hardly to be doubted that the proper Judaizing of Galilee is essentially the work of Aristobulus I.' (B.C. 105-104). The strong Jewish community in Rome is plausibly traced to Numenius and his embassy (1 Mac 14²⁴ 15^{16a}).¶

But of a proselytizing work by Pharisees their literature gives us little information. The story of Helena and Izates remains isolated. Saul may be cited as a Pharisee who was zealous for the extension of his religion, but his effort was not to make converts from heathenism, but to prevent Christians from converting Jews. St. Paul's Jewish-Christian adversaries were proselytizers (Gal 1⁶⁻¹⁰ 3¹ 5²⁻¹² etc.), and perhaps reveal the quality in Pharisaism which Mt 23¹⁵ condemns.

The Pharisaic ideal remained one of separation. Such propaganda as they attempted seems to have aimed at the realization of the hope that no uncircumcised alien should render Israel and its land and temple unclean.** It does not reflect the surprising generosity of Dt 23^{7, 8}, Is 19¹⁸⁻²⁵, Zec 9⁷ toward Israel's traditional foes.†† The expectation of a future missionary era (Enoch 91¹⁴?) is rare. Proselytism was a sort of conquest or subjugation, for the benefit of the conquerors, not of the conquered,‡‡

†† It is very difficult to determine the historical conditions that produced these exceptional utterances.

‡‡ The Jews were always ready to say to those whose help they needed, 'Come with us, and we will do you good.' See Nu 10²⁸⁻³² (JE).

and it is fair to say that the Jewish proselyte did not form a link between the Jews and the Gentiles, but emphasized and widened the difference. Nor did the proselyte prepare the way for Christianity. He may well have been the worst of St. Paul's enemies, while the *σεβουeros*, who did not count as a Jew at all, was the first of his converts. Josephus gives an interesting illustration of the truth that it was the narrow Jews who insisted on proselytism, while his own more liberal temper was satisfied that every one should worship God according to his preference.* Only a few could recognize that the worship of one God and the practice of righteousness (Ac 10²⁵) were more important than the observance of legal rites, beginning with circumcision, which were essentially tribal in character. In the common Jewish judgment these Greeks were dogs who ate the crumbs that fell from their masters' table, and only a prophet could see in them a greater faith than Israel's. But in reality the best influence of Judaism is to be found in that large class of heathen to whom it taught the worship of one God and the pursuit of virtue, and not in the class of actual converts.

'Proselyten'); Hamburger, *Real-Ency.* (art. 'Proselyt'). F. C. PORTER.

PROVE.—There are several Heb. and Gr. verbs translated 'prove' in AV, but they fall into two classes, according as the Eng. word means (1) to test, put to the proof; or (2) to bring forward proof, demonstrate. The first is the more primitive meaning, as well in the Lat. *probare* and the Fr. *prover* as in the Eng. 'prove.' It has now gone out of use, but in AV it is rather more frequent than the second meaning. A familiar example is Mal 3¹⁰ 'Prove me now herewith, saith the Lord of Hosts, if I will not open you the windows of heaven, and pour you out a blessing.' Cf. Udall, *Erasmus' Paraphrase*, i. 67, 'Jesus thought good to prove how much his scholars had profited by hearing so much communication, and by seeing so many miracles . . . therefore he demaneth of them, saying, Whom doe men talke that the sone of man is?' and p. 103, 'Pilate perceyving that though he proved all wayes and meanes yet he prevayled nothyng . . . he assoyled Jesus before that he condemned hym.' This, as Skeat remarks, is the meaning of 'prove' in the proverb, 'The exception proves the rule' = Lat. *exceptio probat regulam*; the idea that an exception demonstrates a rule is, as he says, plainly absurd. See also Driver, *Parallel Psalter*, 452 f.

J. HASTINGS.

PROVERB.—i. *The connotation of the term 'Proverb.'* The proverb is a familiar phenomenon, but when the question is put, What is its place in the system of devices that enter into the employment of language, a correct reply will hardly be found in the literature dealing with the use of proverbs. An attempt will be made in the present article to furnish a satisfactory answer. We assign the proverb to the category of *synecdochical* expressions, regarding it as a species of the *totum pro parte*. The proverb is a general proposition, which throws its light upon a number of single instances. This is confirmed by the biblical usage in two ways—(a) It happens more than once in

the OT that one and the same sentence is in one passage put into the mouth of the general subject 'they' (Germ. *man*, Fr. *on*), and in another is called a 'proverb.' In 1 S 19^{24b} we read, 'Wherefore they say, Is Saul also among the prophets?' whereas in the parallel passage (10^{12b}) we find, 'Therefore it became a *māshāl*, Is Saul also among the prophets?' Again, in Jer 31²⁰ we read, 'In those days they shall say no more, The fathers have eaten sour grapes, and the children's teeth are set on edge,' but in Ezk 18² we find in place of this, 'What mean ye, that ye use this *māshāl* in the land of Israel, The fathers have eaten sour grapes, and the children's teeth are set on edge?' (b) But even the meaning of *māshāl* appears to the present writer to show that the sayings to which this designation is applied were general propositions. For in art. PARABLE (IN OT) we consider we have proved that the original sense of *māshāl* was 'likeness' or 'identity,' and as the usual form of an identification is the combination of subject and predicate, *māshāl* became an expression for a judgment in general. What, then, is the Hebrew *māshāl* but a general proposition? In this way we may explain the use of *māshāl* also for an authoritative utterance in Nu 23^{7, 15, 24, 25, 26, 27, 28, 29}. From this point *māshāl* could readily attain to the meaning 'proverb,' which it possesses also, e.g., in the recently-discovered Heb. text of Sir 47^{17a}, where

we read *לעו*, Syr. *ܡܫܠܐ*, Gr. *παροιμία*, Vetus (= Vulgate) Latina *proverbia*.

ii. *The general proposition and the proverb in the narrower sense in their mutual relations.*—These two belong to the same category, and the border-line between them cannot always be sharply drawn; but the essential difference between a general proposition and a proverb is this, that the proverb has entered more upon the stage of unconscious existence. Prominent representatives of the two groups are the following: (a) *General sentences* such as 'Thou shalt not muzzle the ox when he treadeth out the corn' (Dt 25⁴). This sentence is, so to speak, on the way to go over to the camp of the proverbs (cf. 1 Co 9⁹, 1 Ti 5¹⁸), but it has not yet reached this goal. Other general sentences of the same kind occur in 1 S 15² ('To obey is better than sacrifice'), 1 K 20¹¹, Jer 13²³, Ps 62^{10a}, 2 Ch 25^{28b}, cf. Lk 17⁷.—(b) But such sayings as the following have more certainly attained to the stage of current use, and are therefore *proverbs* in the more special sense: 'as Nimrod a mighty hunter [i.e. warrior or conqueror] before the LORD,' Gn 10^{9b}, cf. 22^{14b}, Jg 8^{21a}, 1 S 10¹² (|| 19²⁴) 24¹⁴, 2 S 5²⁰ 20¹⁸, Is 32^{6a}, Jer 31²⁰, Ezk 12²² 16^{44b} 18², Job 2^{4b}, Lk 4², Jn 4²⁷ (ὁ λόγος, κ.τ.λ.), 2 P 2²² (*παροιμία*).—The genetic relation of the two groups is this, that the general sentences form a *wider circle*, from which the proverbs stand out as an *elite*, and the two concentric circles form a constant parallel.—There is even a passage in the OT where the characteristic of currency which belongs to the proverb proper has clear expression given to it. We refer to 1 S 24¹³, where the sentence 'Out of the wicked cometh forth wickedness' is called *קִרְיָהּ*, *קִרְיָהּ*, i.e. 'the proverb of the ancients' (cf., on the collective sense of the singular, König, *Syntax*, § 256e). What can this mean but that this judgment has been long passed, and preserved during the centuries? It is the same when in 2 S 20¹⁸ we read, 'They were wont in *old* time to speak, saying, They shall surely ask counsel at Abel.' On the other hand, the OT contains a remark from which we see that general sentences might be regarded as the product of reflexion. In the passage (Ec 12⁹⁻¹²) where the Preacher says that he sought out many parables (*מִשְׁלֵי*, lit. 'sentences'), he adds, 'Much study is a weariness of the flesh.' So in the Heb.

* Vita, 23, 31, and cf. Ant. iv. viii. 10, x. xl. 7, xvi. vi. 8, c. Ap. ii. 33, 40; Philo, *de Monarch.* i. 7 (cf. Jer 211 1812-15, Mic 4²).

text of Sir 13^{20b} we read 'Study and meditation is wearisome thought,' where in the Greek version this 'study' is specialized as *εὐρεσις παραβολῶν*, 'invention of parables.'

iii. *The form of the proverb.*—The following varieties of form are to be noted—(a) Some of these sentences are *affirmative*, and serve to commend the individual to whom the general judgment is applied. This is illustrated by the very first proverb we encounter in the Bible, namely, 'as Nimrod a mighty conqueror in the estimation of Jahweh' (Gn 10^{9b}). Another *māshāl* may have a *negative* character, and pass a taunting criticism on the persons to whom such a negative *māshāl* refers. This is the case with the sentence, 'Wherefore they that speak in proverbs say, Come unto Heshbon,' etc. (Nu 21²⁷), or with the question, 'Is Saul also among the prophets?' (1 S 10¹² || 19²⁴). A taunting oracle of this kind is also to be spoken over the king of Babylon, when that city at last reaps the reward of her tyranny (Is 14⁴ 'Thou shalt take up this parable against the king of Babylon, and say, How hath the oppressor ceased, the golden city ceased!'). The same phenomenon occurs in Hab 2⁶, and a similar negative *māshāl* is spoken about disobedient Israel in Mic 2⁴. Hence a formidable threat, occurring not rarely in the OT, is that some one shall be made the subject of a *māshāl*. Thus Israel, if it persists in its impiety, is to be a 'proverb' (Dt 28²⁷). The other examples are: 1 K 9⁷, Jer 24⁸, Ezk 14⁸ (עֲרֵבָה), Ps 44¹⁵ 69¹², Job 17⁶ (עֲרֵבָה), 2 Ch 7²⁰.

(b) Another *formal* difference amongst proverbs shows itself in their varying *lengths*. A judgment is naturally expressed, of course, in a single simple sentence, and so we find it not only in that 'proverb of the ancients' in 1 S 24¹⁴, but in the great majority of the proverbs contained in the historical and prophetic books of the Bible. Jer 31²⁹ and Ezk 12²⁴ 18² are exceptions, for in these the sentences are made up of two simple statements: for instance in the *māshāl* 'The days are prolonged, and every vision faileth' (Ezk 12²⁹). From this formal point of view we naturally obtain a rule of considerable importance for determining the *date* of the proverbs contained in the 'book of *māshālīm*' (Pr 1¹⁻⁸ 20⁷⁻⁹). That the Book of Proverbs does not form a unity is evident even from the titles which we meet with in 10¹ 22¹⁷ 24²³ 25¹ 30¹ 31¹. For whoever prefixed to the 10th chapter the title 'the Proverbs of Solomon,' did not suppose that proverbs of Solomon were contained also in chs. 1-9. Now, the section 10-22¹⁶ possesses this formal characteristic, that the sentences contained in it are, with the exception of 19⁷ (cf. 21^{24c}), expressed in *isolated distichs*, and although in these sentences causal (16¹² 20 19¹⁹ 21²⁵ 22⁹) or final (15²⁴ 16³⁰) clauses make their appearance, yet they form a part of the particular distich. But in the section 22¹⁷-24³⁴ groups of four, five, six, or more *stichoi* are more frequent. On the other hand, in chs. 25-29 the sentence is again frequently expressed by isolated distichs (25¹¹ 12 14⁸ 22², esp. chs. 28 and 29), or by tristichs (25⁸ 13), although tetrastichs also occur (perhaps in 25²² 24, certainly in 24²¹). The last two chapters of the book contain as a rule larger groups of lines, and exhibit also such devices as the alphabetical poem (31¹⁰⁻³¹). But the isolation of the sentences is almost entirely wanting in chs. 1-9. There the teacher of wisdom develops his ideas almost always in connected expositions (cf. 1st 10-19 21-9. 10¹ etc.). From these considerations alone the conclusion may be drawn with much probability that in the section 10-22¹⁶ we have the oldest collection of sayings (so recently also Wildeboer in his essay, *De Tijdsbepaling van het boek der Spreuken*, 1899, p. 7). See, further, the follow-

ing article. This rule that the extent of the clauses in which a sentiment is expressed, increased in general as time went on, is favoured also when we compare the groups of sayings of Ben Sirā (11-20. 21-25. 27-30 21-18 etc.). The Book of Qoheleth, which, in the opinion of the present writer (cf. *Einleitung*, pp. 433-435), was written still later, is likewise composed for the most part of continuous expositions. Post-biblical Jewish works also exhibit proverbs only of that kind which are inwoven in a continuous text, as pearls are wont to be set in gold. Such is the case in the tractate *Pirḳê Abot* (lit. 'chapters of the fathers'), which is perhaps the oldest portion of the Mishna.

iv. *The material of the Biblical proverbs.*—This may be best illustrated by indicating the *spheres* from which the particular sayings are drawn. These are mainly five—

(a) From the *Mineral Kingdom* we have the following: 'The waters wear the stones' (Job 14¹⁹), the Hebrew pendant to 'gutta cavat saxum'; 'A word fitly spoken (is like) apples of gold in pictures of silver' (Pr 25¹¹); 'Iron sharpeneth iron' (27¹⁷); 'In the fire is the gold tried' (Sir 2²⁵); 'Gold has ruined many' (8²⁰); 'Whoso toucheth pitch it shall cleave to his hand' (13¹⁴, Heb. text translated by C. Taylor); 'What fellowship shall earthen pot have with kettle, when, if this smite that, it is dashed in pieces?' (13²⁰); 'What is heavier than lead,' etc. ? (22¹⁴); 'Sand and salt and a mass of iron is easier to bear than a man without understanding' (v. 15).

(b) From the *Vegetable Kingdom* we note first of all the proud question by which Jeremiah distinguishes himself from his rivals: 'What is the chaff to the wheat?' (23^{20b}). To the same category partially belongs also the saying about the eating of sour grapes (Jer 31²⁹, Ezk 18²), as well as the following sentences: 'Better is a dinner of herbs where love is, than a stalled ox and hatred therewith' (Pr 15¹⁷ || 17¹); 'Wine is a mocker' (Pr 20¹); 'Drowsiness shall clothe (a man) with rags' (23^{21b}); cf. 'Seek not to be a mighty man at wine' (Sir 34²⁰); 'Like a new wine, so is a new friend' (9^{10b}); and 'Wine and women will make men of understanding to fall away' (19²³).

(c) From the *Animal Kingdom* are derived the following general sayings and proverbs: first comes the caution, 'Thou shalt not muzzle the ox when he treadeth out the corn' (Dt 25⁴); next, the earnest question, 'Can the leopard change his spots?' (Jer 13²³); to which may be added the general sayings, 'Go to the ant, thou sluggard; consider her ways, and be wise' (Pr 6⁸); 'Where no oxen are, the crib is clean' (14⁴, cf. Sir 28⁷); 'A whip for the horse, a bridle for the ass, and a rod for the fool's back' (26³); 'Skin for skin' (Job 2⁴); 'Doth the wild ass bray when he hath grass?' (6⁸); 'Small among flying creatures is the bee, and her fruit is the chief of sweetmeats' (Sir 11³); 'Who will pity (?) a charmer that is stung?' (12^{12a} translated from the Heb. by C. Taylor); 'All flesh loveth its kind' (13^{12a} יִתְּבֵן כִּי, cf. the Arabic, 'One camel kneels again in the place of another,' ap. Schultens, *Gram. Arab.* p. 297; ἡλικὴ ἡλικὰ τέρπει; 'Pares cum paribus facillime congregantur'; 'Qui se ressemblent s'assemblent'; 'Birds of a feather flock together'); 'What fellowship shall wolf have with lamb?' (Sir 13^{17a} כֹּחַ יִתְּבֵן כֹּחַ); 'Flee from sin as from a serpent,' etc. (21^{23a}); 'The true proverb, The dog is turned to his own vomit again, and, The sow that was washed to her wallowing in the mire' (2 P 2²³).

(d) Other sayings in the Bible which border on the realm of proverbs, or belong to it, are borrowed from the *human sphere*; and if it is desired to divide this large group into its particular species, these may be given as follows:—(a) Many proverbs

are derived from the life of the *individual*. To this category belong the frequently cited 'As Nimrod,' etc. (Gn 10^{9b}); 'Is Saul also among the prophets?' (1 S 10¹³ || 19²⁴); 'As is the mother, so is her daughter' (Ezk 16^{44b}); 'Treasures of wickedness profit nothing' (Pr 10^{2a}; cf. the Arab. *matal*^{2a}, 'Poverty is better than unlawful riches and unrighteous gain,' *ap. Schultens, Gram. Arab.* p. 284; 'Ill-gotten goods do not prosper'; 'Bien mal acquis ne profite pas'); 'The memory of the just is blessed,' etc. (Pr 10⁷ 13¹¹ 20^{2a}); 'Righteousness exalteth a nation' (14³⁴); 'A soft answer turneth away wrath' (15¹); 'In all labour there is profit' (14^{23a}), cf. the following negative parallels: 'The sluggard will not plough by reason of the cold,' etc. (20^{1a} 22¹³ 24³³ 26¹²⁻¹⁰); 'A sluggard may be compared to a dirty stone' (Sir 22¹; cf. the Arabic saying, 'Sloth and much sleep lead away from God, and bring poverty,' *ap. Schultens, Gram. Arab.* p. 281 f.); 'It is better to dwell in a corner of the house-top than with a brawling woman in a wide house' (Pr 21⁹; similar sayings about women are found in v. 19 25²⁴ 27¹³, cf. the extravagant hyperbole in 'I would rather dwell with a lion and a dragon than in a house with an angry woman' (Sir 25¹⁰); 'A friend will not be known (יָדוּעַ) in prosperity,' etc. (Sir 12², translated by C. Taylor); 'Whoso diggeth a pit shall fall therein' (Pr 26²⁷, and similarly Ec 10⁹, Sir 27²⁰; cf. 'He who digs a pit for another, may soon fall himself therein,' or 'celui qui creuse la fosse y tombera'); 'Give to a brother, and let thy soul fare delicately' (Sir 14^{1a}, Heb. text נָתַן לְאָח); 'A slip on a pavement is better than a slip with the tongue' (Sir 20^{18a}); 'A lie is a foul blot in a man' (v. 22^a; cf. the Arabic, 'The tongue of the dumb is better than the tongue which speaks lies,' *ap. Schultens, Gram. Arab.* p. 284); 'He who multiplies words occasions sin' (*Pirkê Aboth*, i. 17); 'A rough (or boorish) man fears not sin' (אִישׁ רָעָא יִרְאֵה עֲוֹן, *ib.* ii. 5); 'Whoso makes much flesh makes many worms' (*ib.* ii. 7; cf. Is. 14^{11b} 63^{24b}, Job 7^{2a} 17^{14b} 21^{26b} 24^{20a} 25^{4a}).—(β) Other proverbs draw a lesson from the life of *nations* or other wider circles of the human race: 'They shall surely ask counsel at *Abel*' (2 S 20¹⁹); 'Can the *Ethiopian* change his skin?' (Jer 13²³); 'As the man is, so is his strength' (Jg 8^{21a}); 1 S 24¹⁴; 'The vile person will speak villainy' (Is 32^{4a}); Jer 31²⁰ = Ezk 18².—(γ) In that observation of human life which led to the constructing of proverbs, regard has also been had to the life of the *warrior*, as in 'As Nimrod,' etc. (Gn 10^{9b}), and in 'Let not him that girdeth on (his harness) boast himself as he that putteth it off' (1 K 20^{11b}); the conduct of the *trader* is noted in 'skin for skin' (Job 2⁴, cf. the case of Shylock); the sphere of the *physician* is in view in 'Physician, heal thyself' (Lk 4³³); and the hard lot of the *husbandman* suggests the lesson, 'One soweth and another reapeth' (Jn 4³⁷).

(c) From the religious or *supra-human* sphere the following sayings are derived: 'In the mount of the LORD it is seen' [i.e. Divine Providence is exercised; see, further, art. JEHOVAH-JIRKĤ] (Gn 22^{14b}); 'The blind and the lame must not come into the house' (i.e. the temple, 2 S 5^{8b}); 'The days are prolonged, and every vision faileth' (Ezk 12^{2a}); 'God hath power to help' (2 Ch 25³; cf. 'With God nothing is impossible,' Lk 1³⁷). This noting of the *spheres* from which the biblical proverbs are derived, prepares us for recognizing the *origin* of these—

v. *The source of the proverbs of the Bible.*—This was twofold—one source formal, and one material. Their formal source lay in the ability of the human mind to *compare* the objects of its observation, and, from comparison of the various phenomena, to draw *conclusions*. The material source was the

sum of experiences gathered by men in the different spheres of their environment. Both sources were in the last resort opened up by God himself. For the human capacity for separating off points of difference and combining similarities, was a feature in the Divine image which was bestowed on man at his creation (Gn 1^{26f}, 27), and which survived the Fall (Gn 5¹⁻³ 9^a, 1 Co 11⁷, Ja 3⁹); cf. 'The spirit of man is the candle of the LORD' (Pr 20^{27a}), and '(God) gave man understanding' (Sir 38⁸ יָתַן לְאָדָם בִּינָה). And is not the same God the final author of the experiences which form the material substratum of the biblical proverbs? Hence the aged appear as Jahweh's representatives in the congregation (Lv 19³², 'Thou shalt rise up before the hoary head, etc., and fear thy God'). They are celebrated also elsewhere as possessors of wisdom, cf. Pr 1⁸ 6²⁰, Job 12² ('with the ancient is wisdom') 15^{9a}, although in the opinion of Elihu this rule is not without exceptions (32^{7f}). So also Ben Sira: 'Miss not the discourse of the aged, for they also learned of their fathers' (Sir 8^{2a}); and the Preacher drew his sayings (חָכְמָה Ec 12⁹) from the experiences of his long life (1¹³ 7²⁰); cf. the exhortation, 'Let our lord consult only his *old men*' (Tel el-Amarna Letters, ed. Winckler, No. xli. 11), and the Arabic, 'Length of experience is increase of knowledge' (*ap. Schultens, Gram. Arab.* p. 281). Hence we need not wonder that in the Bible itself proverbs are viewed as legitimate elements in its contents. Like the information of the husbandman spoken of in Is 28²⁰, they have their original source in the Divine arrangement of the world and disposition of history.

vi. *Proverbs outside Scripture.*—From the same standpoint as above it is explicable how the proverbs of the Bible agree essentially with those which we find in the *post-biblical* Jewish writings and in the literary treasures of *other nations*. Further materials for comparison beyond what have been already cited from both these classes of writings will be found in the Literature.

LITERATURE.—J. Buxtorf, *Florilegium Hebraicum*, 1648; R. J. Fürstenthal, *Rabbinische Anthologie*, 1835; J. Fürst, *Persisch-nach aramäischer Gnomon und Lieder*, 1836; L. Dukes, *Rabbinische Blumenlese*, 1844, and *Zur rabbinischen Spruchkunde*, 1851; C. Taylor, *Sayings of the Jewish Fathers*, Cambridge, 1897, Appendix, Camb. 1900; S. Schechter, *Aboth de Rabbi Nathan*, Vindobonae, 1887; Gabirol's אֲבוֹתֵי רַבּוּת, *A Choice of Pearls*, originally, compiled from the Arabic, translated into Hebrew, with a faithful Eng. tr. by B. H. Asher, London, 1859; Freytag, *Arabum proverbs*, 1838-43; the *Ethiopic Book of the Philosophers*, portions of which are given in Dillmann's *Chrestomathia Ethiopica*, p. 40 ff.; G. Gerber, *Die Sprüche als Kunst*, Bd. ii. (1886) p. 405 ff.; W. Budge, *Oriental Wt.*, etc., London, 1899, p. 31 ff. ED. KÖNIG.

PROVERBS, BOOK OF.—

Introduction.

- i. Analysis of the book.
- ii. Unity and Authorship.
- iii. Dates of the various components of the book.
- iv. Relation of the Massoretic text to the Versions.

Literature.

The Book of Proverbs (חֻכְמָה קְצָלִי; LXX title Παροιμίαι, subscr. Β Παροιμίαι, A Π. Σολομώντος, B Π. Σαλ.) belongs, with Job and Qoheleth, to the Wisdom literature. In harmony with the character of the Hebrew *Hokhmah* (wisdom), which is inspired by religious motives, this book as a whole has a decidedly religious character, although we find also that many maxims have found their way into it which bear upon ordinary prudence of conduct, and are the result of purely human experience. See, further, art. WISDOM.

i. ANALYSIS OF THE BOOK.—The Book of Proverbs falls into a number of parts which are clearly distinct, and which are partially marked off by special titles—

- (1) Chs. 1-9, which form the introduction to the

book which now follows. In 1st Solomon is named as the author of the proverbs, but v.⁹ appears also to announce the intention of publishing 'words and riddles of the wise.' The author of these chapters exhorts the reader, whom he addresses as 'my son,' to give himself with all earnestness to the pursuit of wisdom, and to flee folly, which is thought of predominately as consisting in sensual indulgences. In ch. 8 Wisdom is introduced speaking in person, while in ch. 9 'Madam Folly' is opposed to 'Madam Wisdom,' and the two are represented as issuing rival invitations to men. It is not possible to regard these chapters as a collection of various exhortations intended as words of introduction to books of proverbs (Bertheau), nor have we any right to assume that they contain serious interpolations (Hitzig). On the contrary, the unity of diction and of the whole mode of presentation, as well as the equally evident unity in the train of ideas throughout these chapters, point to a single author.

(2) Ch. 10¹-22¹⁶, the 'proverbs of Solomon' (שְׁלֹמֹה 10¹; LXX om.), forming the real kernel of the book. Each verse, consisting usually of seven, sometimes eight, rarely nine to eleven, words, forms a saying complete in itself and independent. In chs. 10-15 the *antithetic* parallelism predominates, in chs. 16-22¹⁶ the *synthetic*, along with which we find also the *synonymous*, in which the second member limits or expands or continues the first.

(3) Ch. 22¹⁷-24²². These 'words of the wise' (22¹⁷⁻²¹) contain maxims and warnings which only exceptionally are comprised in a single verse; usually they extend to two, sometimes three, once even seven, verses. They are again addressed, like 1st, to 'my son,' a form of address which is found in (2) only in the corrupt passage 19²⁷. The rigid poetical rhythm of (2) is not prominent in this section, here and there it is wanting entirely.

(4) Ch. 24²³⁻³⁴. This appears to be an appendix to (3). It is headed, 'These are also words of the wise,' and may perhaps be reduced to seven sayings and exhortations, comprised for the most part in one verse, although the second consists of two, and the seventh of five, verses.

(5) Chs. 25-29, with the heading, 'These also are proverbs of Solomon, which the men of Hezekiah, king of Judah, collected,' 25¹. Here again, as a rule, each verse makes up a proverb (so always in chs. 28, 29), although at times two, in 27²²⁻²⁷ even five, verses have to go together. Some of the sayings are duplicates of proverbs contained in 10¹-22¹⁶. The parallelism is not regular as in (2), but these sayings are distinguished by the pithiness of their contents and the rich imagery of their language. The religious character recedes far into the background; notably in chs. 25-27, they are for the most part sayings bearing purely upon a prudent direction of the conduct of life.

(6) Ch. 30, entitled 'Words of Agur,' made up, as to form and contents, of enigmatical sayings, and a few numerical proverbs such as meet us elsewhere only in 6⁶⁻¹⁰. The title in 30¹ is manifestly corrupt (cf. Frankenberg or Wildeboer *ad loc.*, and art. AGUR).

(7) Ch. 31¹⁻⁹, exhortations to 'Lemuel, king of Massa' (see LEMUEL and MASSA), spoken by his mother. These may really be reduced to a single saying consisting of eight verses, in which the mother cautions her son against wine and women, and exhorts him to rule righteously (cf. Mühlau, *De Proverb. quæ dicuntur Aguri et Lemuelis origine atque indole*, Lipsiæ, 1869, and Kuenen, *Orderboek*², § 95, note 10). The book closes with—

(8) Ch. 31¹⁰⁻³¹, an alphabetical poem, standing by itself, without any connexion with what precedes, devoted to a panegyric on the virtuous housewife.

ii. UNITY AND AUTHORSHIP.—It is beyond question that in the present book we have to do not with a collection of proverbs which took their rise in the mouth of the people, but with artificially constructed poetry. Delitzsch has pointed to the saying contained in 1 S 24¹⁴ [Eng. 13], 'Out of the wicked cometh forth wickedness,' as a specimen of the folk-proverb. The latter wants the rhythmical form, and is generally marked by pregnant brevity; cf. also 1 S 10¹², 1 K 20¹¹, Jer 31²⁸, Ezk 18³, Lk 4²², Jn 4³⁷ (see the preceding article). But for such sayings we seek in vain in the Book of Proverbs. This is generally recognized to be the case, as is shown by the inquiry as to the authorship of our book and its sayings. From the titles in 10¹ 25¹ 22¹⁷ 24²³ 30¹ 31¹ (cf. 1⁹) it results with certainty that the traditional view, which credits Solomon with the authorship of our book and its individual parts, must be rejected. It must, further, be admitted that no principle can be distinguished upon which the proverbs are arranged. Sometimes, indeed, sayings of similar purport are brought together, which collectively make up a series of admonitions; or sayings in which the same word recurs are found in juxtaposition; but these are only isolated occurrences. Finally, it is a significant circumstance that the same proverbs are repeated in identical or almost identical terms in different parts of the book: compare 21⁹ with 25²⁴, 18³ with 26², 20¹⁶ with 27¹³, 22³ with 27¹², 19²⁴ with 26¹³, 17³=27²¹, 19¹=28⁶, 15¹²=29²², 22²²=23¹⁰, 24³³=61¹¹, 22²³=23¹¹, 24⁶ compared with 20¹⁸ and 11¹⁴; nay, even within the same division such repetitions make their appearance, e.g. 14¹²=16¹⁵, 10²⁰=11⁴, 10¹²=18¹¹, 11²¹=16¹⁰, 15³³=18¹², and oft.; cf. Delitzsch, *Comm.* p. 21 ff.; Nowack (in the *Kgf. Hdbch.*), p. xxiv; Cornill, *Einleitung*², p. 225; Driver, *LOT*⁶, p. 397. The phenomena just noticed necessitate the assumption that the different parts of our book belong to different authors, and consequently exclude the authorship of Solomon.

But although the book in its present form does not proceed from Solomon, may not particular portions of it be assigned directly or indirectly to him? One title (10¹) plainly credits him with the authorship of 10¹-22¹⁶, while another (25¹ 'proverbs of Solomon, which the men of Hezekiah, king of Judah, collected') ascribes chs. 25-29 at least indirectly to him. But these titles simply give expression to the tradition that prevailed at a particular period, while the fact that the men of Hezekiah are spoken of in the third person would appear to indicate that this note does not proceed from themselves, nay, the way in which Hezekiah is spoken of not as 'king,' but as 'king of Judah,' suggests that the note was written down at a time when there was no longer a king of Judah (cf. Baulissin, *Die älteste Spruchdichtung*, p. 11). We need not then regard it as impossible that we have to do with a literary fiction which attributed proverbs to Solomon, perhaps in order to enhance their value, just as the books of Qoheleth and Wisdom are also ascribed to him. Such a tradition is all the more intelligible, because not only was Solomon regarded as the beau idéal of wisdom, but in 1 K 4³² it is expressly stated that he spoke three thousand proverbs. This passage, in fact, has been sought to be used in support of the Solomonic authorship of our book, but (a) the Book of Proverbs contains only nine hundred and thirty-five verses, (b) 1 K 4³² says only that Solomon spoke three thousand proverbs, (c) this passage does not lead us to suppose that the contents of these proverbs belonged to the religious and moral sphere, rather would they appear from v.³² to have dealt with subjects of quite a different kind. Consequently the author

of 1 K 4²² cannot have meant his remarks to apply to our book, although it is quite conceivable that the tradition that Solomon was the author of the Book of Proverbs, or of particular portions of it, goes back for its basis to this passage.

Against the Solomonic authorship of the portions designated above (2) and (5), the contents of the proverbs contained in them are rightly urged: in 14²², 16¹⁰, 14¹, 20², 22², 23², 21², 22¹¹, 25², 29¹, 14 it is not a king that speaks of himself, but another that speaks of the king, and the experiences underlying these proverbs are scarcely conceivable in the days of Solomon, rather do they point to later times; in 14¹, 18²², 19¹², 21⁹, 19—proverbs dealing with married and domestic life—monogamy is uniformly presupposed, and unquestionably the thought of a harem is far from the mind of the author; proverbs like those contained in 11²², 15¹⁴, 22², 16⁸ are unlikely in the mouth of the splendour-loving Solomon, etc.

Under these circumstances we must disregard the titles, and seek from internal evidence alone to date the composition of our book and of its parts.

iii. DATES OF THE VARIOUS COMPONENTS OF THE BOOK.—Which of the above divisions of the Book of Proverbs are we to make our starting-point? Hitzig and Hooykaas have taken 1⁷⁻⁹ to be the oldest portion, holding that when 10¹⁻²² were collected, 1⁷⁻⁹ already existed. But simple comparison of the parallel passages in the two divisions does not justify such a conclusion; see Comm. on 18²² and 8³⁰; 14¹ and 9¹; 19²² and 3¹³; 9 and 10¹; 12² and 32¹, 5⁸, 8¹³; 12⁸, 16²², 19¹¹ and 3⁴, 13¹⁵; and cf. Kuenen, *l.c.* § 96, note 10. On the other hand, a comparison of the form of the proverbs and the conception of wisdom in these two divisions leads to the conclusion that the first division must be the more recent. The strict form of the *māshāl*, with its didactic tendency, as this appears throughout the second division, is suppressed in the first, and in its place a fuller presentation of the *parenthesis* prevails. To regard a periodic structure such as we find here as older than the simple form of the distich in the second division is all the less possible, seeing that this first division also lets it be clearly seen that meanwhile wisdom has become a subject in the schools, where 'the wise' gathered their pupils around them as their 'sons,' a feature which is wanting in the second division. If one takes into account, finally, that in chs. 1-9 wisdom is thought of as an independent personality, who was with God even prior to the creation of the world, as the first of His works, who stood by His side as superintendent at the creation, and who now plays her rôle on earth among the children of men, whereas in the second division wisdom is partly prudent conduct and partly the fear of God by which one ensures for himself the blessing of God, namely long life, prosperity, etc., there can be no doubt that the second division (10¹⁻²²) and the fifth (chs. 25-29), which are both attributed to Solomon, are older than the first (chs. 1-9).

The relation of the second and the fifth part to one another is not easy to determine. In chs. 25 ff. we find not only distichs, but also brief oracular discourses in which several verses are combined to express an idea (cf. 25²²⁻²⁶ and 27¹³⁻²⁷), while, further, in these chapters the rhythm is several times wanting or at least imperfect (cf. 25⁸, 26¹⁸, etc.). On these grounds it has generally been held that the fifth part is more recent than the second, in which we encounter nothing but distichs of uniformly pure rhythm. Hooykaas believes it possible to reach the same result by a comparison between the verses common to the two divisions, but an unprejudiced examination by no means

establishes this conclusion, nay, Reuss (*La Bible*, vi. 149) actually calls 'the collection of the men of Hezekiah the best part of the book.' Viewed more exactly, the case stands thus: sometimes it is the second, sometimes the fifth, division that has preserved the original form of a proverb (cf. Kuenen, *l.c.* § 96, note 5). Very significant is the circumstance that in chs. 25-27 wisdom appears throughout as practical prudence of conduct, without any special religious tinge. This suggests that the fifth division, although as a collection more recent than the second, yet contains in part older proverbs than the latter (cf. Frankenberg, *Sprüche*, p. 8).

The third and fourth divisions are by general consent regarded as more recent than the second and fifth: instances of oracular discourses extending to five (24³⁰⁻³⁴), nay, even to seven (23²²⁻²⁶), verses, are found here again, while the rhythm is unmistakably less pure and complete than in these other divisions. As in the first division, so also here we find the form of address 'my son' (cf. 23¹⁵, 19, 26 and oft.); here as well as there the parenthetic tone prevails, and, whereas in the second and fifth divisions wisdom is a human quality, it appears here as the sum of God's requirements from man, it is even personified as in the first division, and hence can say, 'My son, give me thine heart, and let thine eyes delight in my ways' (23²⁶). Finally, in verses like 23¹⁸, 24¹⁴, 20 the thought of a retribution in the world beyond appears to emerge: 'The wicked hath no future, and the candle of the transgressor is put out,' a conception which is still strange to 10¹² and 25¹².

The appendixes chs. 30, 31 consist of three independent pieces, which undoubtedly belong to a somewhat late period, and are in fact probably the latest in the whole book. We are led to this conclusion by the very form of the proverbs they contain: in 30-31⁹ there is a manifest effort to express ideas in single short sententious poems marked by the extreme of art, and often enigmatically expressed. The contents, too, point to a late date: in 30¹² we find a deeper consciousness of the inadequacy of man's knowledge of God and of divine things than meets us anywhere else except in Qoheleth and partially in Job; moreover, the notion that appears in 30¹² of a fixed written revelation, from which nothing is to be taken and to which nothing is to be added, equally points us to a late period, subsequent at all events to Deuteronomy.

The alphabetical poem (31¹⁰⁻³¹) shows by this very device, which is peculiar to it, that we have to do with a relatively late literary product. To determine more specifically its date from its contents is unfortunately not possible.

The determination of the period to which 10¹⁻²² and chs. 25-29 belong, is peculiarly difficult owing to the circumstance that historical allusions are practically wanting in them. Ewald (*Gesch. d. Volk. Isr.* iii. 598 ff.) has, indeed, discovered in 28², 29², 4, 11, 12, 16 allusions pointing us to the last years of the Northern kingdom, but there is no necessity to suppose these proverbs to have originated then; at the most it may be conceded simply that they would be intelligible if emanating from this period (cf. the Books of Amos and Hosea). The date of the rise of these collections is not, however, to be determined on the ground of particular sayings which, like the above, held good at various periods of time, but from the whole character of the collections. This has escaped the notice of those who, like Baudissin, have adduced in particular the sayings about the king in order to prove that these chapters originated during the times of Israel's independence. It has to be admitted that analogous sayings are found also in Sirach; but these are distinguished, we are told,

from those we are dealing with, in so far as they contain warnings of the danger of intercourse with the great rather than point to the benefit arising from such (cf. Pr 16^{12, 15}). In confirmation of this date for the main stock of our book, we are pointed, further, to the mention in pre-exilic time (cf. Is 3³, Jer 18¹⁸, Dt 16¹⁹) of 'the wise' along with priests and prophets (so Ewald, Oehler, Hooykaas, Delitzsch, and others). These 'wise,' it is held, were evidently divided into two classes—the one with a more secular tone, indifferent or even hostile to religion; the other with a religious character, concerned more with individual than with national principles and aims. From the sphere of the latter, chs. 10¹² and 25¹² are supposed to have emanated, whereas it is to the first class that the unfavourable judgment passed by the prophets upon 'the wise' applies (cf. Is 5²¹ 29¹⁴, Jer 4²² 8⁹ 9²² and oft.). But neither have we any evidence that these 'wise' exercised a literary activity, nor is it probable that the above distinction existed. Kuenen (*l.c.* § 97, note 14) has pointed out that the prophets, by way of opposition to the anti-theocratic 'wise,' never mention this other class of religiously disposed 'wise' who are supposed to have been so nearly akin to themselves in their aims, nor characterize them as allies in their conflict with godlessness and immorality. But even if this presupposition, which is intended to show the *possibility* of a pre-exilic composition, were correct, as we have shown it is not, yet this *possibility* would not be converted into a *reality* simply by pointing to these sayings about the king or to any particular sayings, because it is by no means inconceivable that sayings belonging to the pre-exilic period should have been taken over into collections originating at a much later date. Consequently the question about the date of 10¹² and 25¹² can be determined only by taking into account the whole character of these collections. It is a characteristic circumstance that these proverbs agree in their religious and ethical requirements with those of the prophets, and yet on the other hand differ from the latter in some not unessential points: we find the same estimate of sacrifice in Pr 15³ 21^{2, 27} as in Am 5¹², Hos 6⁶, Ezk 1¹²; the same praise of humility and warning against pride in Pr 11² 14²⁰ 15^{1, 4, 18, 25, 33} 16⁵ 17¹⁰ 18¹³ 19¹¹ 21⁴ 22⁴ as compared with Is 2¹, Am 6⁸, Hos 7¹¹, Mic 6⁸ and oft.; the same denunciation of those who oppress the poor, and the same commending of care for the latter in Pr 14³¹ 17⁵ 18²³ 19^{1, 22, 28} 20^{2, 27} 29¹³ as compared with Am 4¹², Hos 5¹², Mic 2⁶ etc. Like the prophets, these proverbs see in the fear of God the foundation of all piety and morality, and in numerous passages they exhort men to this fear. But whereas the prophets deal essentially with the national life and apply to it their demands for righteousness, etc., the proverbs treat of matters belonging to the sphere of individual and domestic life. A serious displacement has even taken place in so far as the unique relation between Jahweh and Israel, which the prophets never lost sight of, has here disappeared, and the individual conception of religion has taken the place of the national: not Israel and the peoples, but the upright and the ungodly, the proud and the humble, the understanding and the foolish, are the contrasted categories with which the proverbs have to do. Whereas the prophets are Jahweh's advocates in His conflict with the gods of the heathen, and have to plead His cause to Israel when it turns from Him to the service of these, in the proverbs monotheism holds undisputed sway, and the consequences that result from it are not defended, but assumed as self-evident, and only the practical points of view insisted upon: He is the Creator of poor and rich (14³¹ 22² 29¹³); the Omniscient (15^{3, 11}

16³ 17³ 21³ 24¹²); He directs all things, the actions of men (16^{1, 9, 23} 19²¹ 20²⁴ 21^{1, 30, 29}) as well as their fortunes, etc. In view of this displacement of the subject of religion, it is quite comprehensible why in these proverbs there is likewise no mention of the Messianic deliverance which the prophets expected for the nation; rather is the central position occupied by the belief in individual retribution, as this had been growing up since the days of Jeremiah and Ezekiel (cf. Pr 10^{2, 24, 27} 11^{2-5, 21} 12^{2, 13, 21} 13⁶ 15² etc.). As in some of the Psalms, the godly are cautioned against the envy awakened by the prosperity of the wicked, and have their attention directed to the righteousness of Jahweh which will manifest itself in the future.

Views such as we have briefly sketched are not conceivable as contemporaneous with the preaching of the prophets—it is not without justification that Kuenen (*l.c.* § 97, note 15) calls the ethico-religious train of ideas represented by the composers of these proverbs an anachronism if referred to the period of the prophets—but only in the post-exilic period, a period in which Law and Prophecy are raised above all doubt, and hence not the slightest attempt is made to prove their truth, while at the same time there is an evident attempt to apply the results of the prophetic teaching to real life. In this the composers of the proverbs are quite in agreement with the tendency that prevailed in the post-exilic time.

As an objection to fixing the date then, the character of this period as one of narrow legal piety has, indeed, often been urged; but this view scarcely needs nowadays to be seriously refuted: books like Ruth and Jonah, whose post-exilic composition hardly any one now doubts, and a large portion of our Psalms show that it is quite incorrect to characterize the post-exilic period in such a way. What is true of the time of the Maccabean wars we have no right to transfer to the whole preceding period back to the Exile; in this earlier period very different currents flowed side by side. But we lack the necessary data for fixing more definitely the period when 10¹² and 25¹² were composed, whether towards the end of the Persian or at the beginning of the Greek period.

Later in any case than these portions, as we have said already, is first of all the introduction (chs. 1-9), in which Wisdom and Religion are actually identified, and the former is personified. In the latter circumstance it has been sought to discover the influence of the Greek doctrine of ideas, but this notion is rightly rejected by Kuenen, Baudissin, and others; the contrast of the personified Folly shows that we have to do manifestly with a purely poetical personification. But Baudissin (*l.c.* p. 20) rightly adds: 'The mythologizing freedom with which Wisdom is portrayed as playing a rôle in the presence of God or upon earth, is not according to the ancient Hebrew manner, but recalls the Haggadic creations of the Rabbinic literature.' That we have actually before us a period more advanced than in 10¹² and 25¹² follows from the conception that here meets us of the guests of 'Madam Folly' as in the depths of Sheol (9¹⁸). The latter, which was originally simply the abode of departed souls, has become synonymous with hell. In view of the close affinity in spirit and tendency between these chapters and Sirach, no very long period can have intervened between the composition of the two. We shall not be far wrong if we fix upon c. 250 B.C. as the date of the origin of these chapters, and therewith of our book as a whole. To bring the date further down (cf. Geiger, *Urschrift und Uebersetzungen*, p. 61 ff.) is impossible, inasmuch as no reason is then evident why Sirach itself was not admitted into

the Canon. It cannot, indeed, be made out with certainty how far the book edited by the author of the introduction extended. While Delitzsch regards 24²²⁻²⁹ as the first considerable addition, to which afterwards chs. 30. 31 were appended (cf. Driver, *LOT*, ch. viii.), others, like Cornill, ascribe the publication of the whole book, or, like Wildeboer, almost the whole with the exception of ch. 31 or 31^{10a}, to the author of chs. 1-9 (cf. the Comm. on 1^o).

iv. RELATION OF THE MASSORETIC TEXT TO THE VERSIONS.—The MT shows marked deviations from the LXX, the Syr. Version, the Targum, and the Vulgate, although the deviations of the last three almost all go back to the LXX.

The Targum is entirely dependent upon the Peshitta, nay, it has practically arisen from it, hence the strong Syriac colouring of its language. Its author has at the same time plainly striven to approximate his rendering to the MT (cf. S. Maybaum in *Merx' Archiv*, ii. 66 ff., and Nöldeke, *ib.* 246 ff.).

The Peshitta exhibits such close agreement with the LXX, that one can hardly avoid supposing that the author in making his translation had the help of the LXX (cf. H. Pinkuss in *ZATW*, 1894, pp. 65 ff., 161 ff.).

The case of the Vulgate is similar to that of the Peshitta: Jerome evidently called in the LXX to aid the accomplishment of his task of translation.

As to the LXX itself, apart from particular readings, this Version is distinguished from the MT by (1) a number of additions and omissions, and (2) a difference in the order of the proverbs from 24²² onwards. Whether the *plus* of the LXX always goes back to a Heb. original, or whether we have to do with later additions, is often hard to decide. In cases where such LXX additions are wanting in the Vulgate, it is natural to suppose that they are late—a conclusion which need not surprise us in view of the long-continued bloom of the proverb literature. Regarding the reason for the different order followed in the LXX, it is impossible to get beyond conjectures (cf. P. de Lagarde, *Anmerkungen zur griechischen Uebersetzung der Proverbien*, Leipzig, 1863).

PROVIDENCE is twice used of the foresight and care of God, Wis 14³ 17³, and once of the forethought of man, Ac 24¹⁵. The Gr. is *πρόνοια* and the Vulg. *providentia*. Providence is used as a title of God in late classical writers, but never in Scripture. On the other hand, it is probably the modern use of the word as a Divine title that has caused its disuse in reference to man's forethought. Cf. the note to Lk 12²⁹ in Rhem. NT, 'He forbiddeth not competent providence but to much carefulness.' The Rhem. translators chide Beza for calling 'God's prescience or foreknowledge (in the Greek *πρόνοια*) God's providence' (note on Ac 3²²). See following art., and art. GOD.

J. HASTINGS.

PROVIDENCE.—According to the OT the *creation* is continued in the *preservation* of the world by God, who gives or withdraws life according to His will (Gn 2¹⁷ 6³). He gives offspring (Ps 127³) even against hope (Gn 15⁸ 18¹⁰ 25¹, 1 S 1⁷). He forms man's spirit within him (Zec 12¹). Man's life is at every moment dependent on God (Is 31³, Job 34¹⁴, Ps 139¹⁵, 104²⁹), and man in his weakness apart from God is likened to the grass (Ps 90⁵, Is 40⁶). God saves life (Ps 18¹⁷, Gn 8¹⁻²¹), or He destroys it (Gn 7²² 19²⁹, Ex 12²⁹). He gives food to man and beast, and rules all the forces of nature (Jer 3³, Ps 145¹⁶, Job 38³⁴⁻⁴¹, Jl 1²⁰, Ps 136⁷⁻²⁹). This preservation of nature and man is the background of God's Providence in the kingdom of God, for nature serves His purposes, reveals His power and wisdom (Ps 8. 19), and shows His glory and goodness (Ps 104. 147¹⁷⁻¹⁹). The thunder is His voice (Am 1²), locusts are His army (Jl 2²⁵), He makes Canaan a fertile land (Ps 65¹⁰). Although the regularity of natural phenomena is recognized (Ps 104², Jer 33²⁰⁻²⁵), yet there is no order of nature apart from God's will. Therefore miracles are taken for granted, for God does whatever He wills (Is 55¹¹), and nothing is too wonderful for God (Gn 18¹⁴, Dt 8³). The relation of God's Providence to man's free will is a subject of greater difficulty. While man's freedom and responsibility are emphasized (Gn 17³, Ps 1, Is 1¹⁶, Jer 21⁸); his prayers are recognized as having power with God (Gn 18²² 24¹² 25²¹, Ex 8⁹ 9³³ 10¹⁷); and a blessing is regarded as having force in spite even of change of mind (Gn 27²⁷⁻³², Ex 12²²); yet all power is with God, for God is the potter and man is the clay (Jer 18⁶); and God sends man evil and good alike (Am 3⁶, La 3³⁶, Is 45⁷). The lot of the nation, and of individuals in it, is determined according to a law of recompense, and all human action is directed by God to further His own ends, especially for the benefit of His people (Gn 50²⁰, Ex 3²¹). Although a man's heart may devise his way, yet it is God that directs his steps (Pr 16⁹); and so God can scorn the plans of the mighty (Ps 2⁴). God's action in and by man is through His Spirit, which blinds as well as enlightens, hardens in sin as well as renews in righteousness. This belief in Providence was one of the leading marks of Heb. piety: rebuking pride (Hag 2⁶, Ps 44⁴⁻⁷ 127¹); forbidding fear and despondency (Ps 33^{10. 11. 18} 60¹² 77¹¹ 94¹² 118⁶ 144³), and bringing courage and hope to suffering saints (Ps 121⁴ 127¹ 91⁷ 66⁹). While the fulfilment of His purpose of salvation for His people is God's immediate work, yet the action of God in the history of other nations is also acknowledged (Am 9⁷, Dt 2²², Is 46¹¹ 48¹⁵). There are problems of God's Providence that excite doubt and compel inquiry. The fact of heredity is affirmed (Dt 5³, Ex 20⁵⁻⁶, Jer 32¹⁸), and its difficulties are discussed (Jer 31²⁹, Ezk 18¹). God is regarded as Himself hardening men in sin, and the question is raised, How can He righteously condemn them (Is 6³, Pr 16⁴); the answer is given that the hardening is a penalty of sin (Ezk 12², Ps 18²⁶, La 3³⁰). The suffering of the righteous contradicts the assumption of a moral order on earth, which invariably rewards the righteous and punishes the wicked (Jer 12¹, Job 21⁷, Ps 22. 73, Hab 1). This problem is fully discussed in the Book of Job. Suffering may be regarded as a discipline (Dt 8², Hos 2⁴, Jer 35¹³, Is 27⁸). In later books the difficulty is somewhat relieved by the hope of individual resurrection, but the best answer to the question is given in the idea of vicarious suffering (Is 53). Doubt regarding God's ways in Providence is regarded as brutalizing (Ps 73²²); and in Ecclesiastes we have the nearest approach to scepticism in OT.

The NT takes for granted the teaching of the OT on Providence. Jesus teaches a beneficent

Providence to all men, good and bad (Mt 5⁴⁵); and encourages His disciples to trust in and pray to God as Father (Mt 6⁹). As God cares for the flowers of the field and the birds of the air, so will He care for them (Mt 6²⁵⁻³³). Nothing can befall them without God's knowledge (Mt 10^{29, 30}). The prayer of faith will be answered (Mt 7⁷⁻¹¹ = Lk 11⁹⁻¹³, Mk 11^{23, 24} = Lk 17⁶). Even for daily bread prayer is to be made (Mt 6¹¹). This is not a new doctrine of God's Providence, only a more immediate application of it to individual believers than is found in OT, which is mainly concerned with the chosen nation. Jesus' miracles are also to be regarded as *signs* of God's Providence. St. Paul in Romans sketches the course of God's dealings with the individual believer from the beginning in foreknowledge to the end in glorification (Ro 8^{28, 30}, cf. Eph 1⁴⁻¹⁴); and affirms as the law of Providence that 'all things work together for good to them that love God' (Ro 8²⁸). On the wider stage of human history he traces the fulfilment of a Divine purpose in the inclusion of Jew and Gentile alike in sin, that righteousness might be of faith only (Ro 1-3); and in the temporary rejection of the Jew resulting in the call of the Gentile first of all, and followed finally by the restoration of the Jew also (9-11). In the Ep. to the Hebrews an independent interpretation of God's Providence is given, in which the sufficiency and supremacy of Christ in relation to OT ritual especially is proved. Finally, in the Apoc. the course of contemporary history, presented in symbolic forms, is for the comfort and hope of persecuted believers interpreted as God's immediate action for the establishment of the kingdom of Christ. See, further, artt. ESSENES, PHARISEES, STOICS.

A. E. GARVIE.

PROVINCE (Lat. *provincia*, Gr. *ἐπαρχία*).—The technical term used to describe the administrative divisions of the Roman empire; so Ac 23³⁴ 'And when the governor had read the letter, he asked of what province he was'; Ac 25¹ 'Now when Festus was come into the province.' The original meaning of the word was the sphere within which a magistrate (whether consul or prætor) exercised his *imperium* or sovereign power; so it could be used of the division between the two prætors of the different classes of legal business; so again we get such phrases as the following: *Consulibus Italia provincia decernitur*, where Italy is described as the sphere within which the consuls are to exercise their jurisdiction. It was only in B.C. 227, with the acquisition of Sardinia and Sicily, that the word *provincia* acquired its later sense, and the definition of a province came to be a division of the Roman empire with definite boundaries, under a standing chief magistrate, paying tribute in taxes to the supreme power. Under the Republic these provinces had been governed by proconsuls or prætors under the supervision of the senate; on the establishment of the empire the proconsular *imperium* over all provinces was vested in the emperor, and by an agreement which he made with the senate the provinces were divided into two classes. The older, more peaceable provinces, where there was no need of any large military force, called the *provincie inermes*, were left in the hands of the senate; the frontier provinces, where military operations were necessary, were governed directly by the emperor through his lieutenants.

The governors of the senatorial provinces were appointed by lot from those who had held the office of prætor or consul, or as they were technically called the *consulares* and *prætorii*, or in some cases from

those who had not yet attained that rank. Two provinces, Asia and Africa, were 'consular,' i.e. held by ex-consuls, the remainder were 'prætorian,' but all senatorial governors alike bore the name of PROCONSUL. The governors appointed by the senate were in theory the most distinguished and honourable; they were allowed 10 or 12 fasces; they had higher rank and larger salary; but their appointment was only for a year, they had no military command, and practically possessed only the appearance of power.

The governor of an imperial province is called by historians incorrectly *prætor*; his proper title was *legatus Augusti*, lieutenant of the emperor, or more fully *legatus Augusti pro prætore*, *πρεσβυτης και ἀντισπάρταγος τοῦ Σεβαστοῦ*. They were of two classes—those of consular rank or *consulares* (*ὀναρτικοί*), and *prætorii*, those who possessed only prætorian rank. The latter were appointed to provinces where there was only one legion, the former to the larger and more important commands.

The arrangements concerning the provinces were liable to be changed according to the needs of the empire. If rebellion or invasion threatened any senatorial province, or if its finances fell into disorder, it would be transferred to the emperor, at any rate temporarily, and the emperor would very likely compensate the senate by giving them some other province in return. Instances of change will be given below.

The following are Roman provinces mentioned in the NT:—

Senatorial—

| | |
|---|---|
| Macedonia, enrolled B.C. 146 | (Imperial from Tiberius to Claudius). |
| Achaia, B.C. 146 | (Imperial B.C. 15–A.D. 14). |
| Asia, B.C. 133. | |
| Bithynia (with part of Pontus), B.C. 74 | } Senatorial to A.D. 111. |
| Cyprus, B.C. 27 | |
| | (Imperial B.C. 27–22, then Senatorial). |
| Crete and Cyrennaica, B.C. 74. | |

Imperial—

| | |
|------------------------------|------------------------|
| Syria, B.C. 64 | } Of the First Class. |
| Galatia, B.C. 25 | |
| Pamphylia and Lycia, B.C. 25 | } Of the Second Class. |
| Egypt, B.C. 30. | |
| Judea | } Under Procurators. |
| Cappadocia, A.D. 17 | |

The position of Egypt demands a slight reference. Its great wealth, and the importance of its corn trade, made Augustus give it special treatment. The country was the emperor's private property (*patrimonium Cæsaris*), and was governed by a *præfectus* of equestrian rank. No senator was allowed to enter the province.

Certain small provinces (Judea and Cappadocia, for example) were governed by imperial PROCURATORS. They were generally districts which had been only recently added to the empire, and were not thoroughly romanized. Judea was so treated during the intervals when it was not governed by native kings; ultimately it was definitely incorporated in the province of Syria.

One further form of *provincia* may be mentioned. In cases of great and serious emergency a special command might be given to some distinguished officer, embracing more than one province, or perhaps superior to the governors of several provinces: such was the position of Corbulo in the East, of Germanicus and possibly Quirinius in Syria.

If we pass to the internal government of the provinces, we notice first the concentration of power in the hands of the governor. He was the principal military, judicial, and administrative authority. Except in the case of Africa, he commanded all the troops, whether legions or auxiliary: he went from place to place to hold courts, the province being divided into *conventus* for that purpose (cf. Ac 19³⁶). The finances, however, were not directly in his hands. The proconsuls in senatorial provinces

were assisted by a *questor*, while a *procurator* appointed by the emperor collected all taxes belonging to the *fiscus* or emperor's purse; in imperial provinces all the finance was in the hands of the *procurator*. The provinces were variously divided: in Macedonia, for example, there were four divisions apparently called locally *epides* (Ac 16¹²), but the unit of administration within the province was, at any rate in all the settled Greek districts such as Asia and Achaia, the city. A city implied not only the actual town, but also all the land which belonged to it and was its territory. The cities were of two main classes—Roman cities or 'colonies,' the inhabitants of which had either full civic or Latin rights. These in the East were garrisons of the Romans, often inhabited by veteran soldiers. Such were Corinth, Philippi (Ac 16¹²), Lystra, Antioch in Pisidia. The second class of cities were non-Roman; they were either *civitates foederatae et immunes* or *civitates stipendiariae*. The former were cities like Athens, which were supposed to be independent allies. No proconsul might enter Athens with his *fascis*, or any symbol of his power. The Greek cities seem generally to have preserved their old constitution. Outside the limits of the cities were the imperial estates, administered by imperial freedmen and slaves; and in less advanced districts, peoples whose organization was tribal, administered from some common religious centre or market, round which they were grouped. For religious and social purposes, for the worship of the emperor and the celebration of games, there existed representative bodies, the council of the province (*τὸ Κοινὸν τῆς Ἀσίας*, etc.), with their principal officer the high priest, the Asiarch, Galatarch, etc. (Ac 19³¹). These bodies had considerable social but little or no political influence.

The general condition of the provinces, at any rate during the 1st cent. of the empire, was good. Order was preserved. The taxation was definite and fixed. The governors were paid, and redress was comparatively easy if they were guilty of exactions. The country was prosperous, even if the taxation was heavy; and it was not until a later period that attacks from without and decrease of prosperity within broke down the economic prosperity of the empire.

LITERATURE.—W. T. Arnold, *The Roman System of Provincial Administration*; Mommsen and Marquardt, *Römische Staatsverwaltung und Staatsverfassung*; Fourniaux, *Annals of Tacitus*; Schürer, *GJV* 2 i. 378, 379 (*HJP* i. i. 327 ff., ii. 451).

A. C. HEADLAM.

PROVOKE, PROVOCATION.—To provoke (*provocare*), lit. to 'call forth,' is in AV to excite any emotion or activity, good or bad. Hence we find 2 Co 9² 'Your zeal hath provoked very many,' and Col 3²¹ 'Fathers, provoke not your children' (both *ἐρεθίζω*). For the orig. meaning of 'stir up,' cf. Jer 43³ Cov. 'Baruch the sounne of Nerias provoketh the agaynst us.' Cf. also Erasmus, *Crede*, p. 15, 'It is a great spoore to prycke and provoke a man to profyght and go forward in any seynce or crafte: the love of the teacher'; and p. 99—'Saynte Paule provokynge the Galathians from vengeance to humanite and gentylnesse.' *Provocation* is always used in AV in a bad sense. In Ps 95⁸ the Heb. is *MERIBAH*, which see.

J. HASTINGS.

PSALMS, BOOK OF.—The most important book, and in modern Heb. Bibles the first in order, of the third section of the OT Canon—that known as *Kethubhim* or *Hagiographa*. It has been thought that in the time of our Lord the Bk. of Psalms furnished a name for the *Kethubhim* as a whole (see Lk 24⁴⁴ and cf. Jos. c. Ap. i. 8, who speaks of 'the remaining four books' as containing 'hymns to God and precepts for human life'). It is not probable, however, that at this stage in the history

of the Canon the title 'psalms' would be so used. The order of the books in the Hagiographa, moreover, has varied greatly. The earliest Rabbinic list (*Baba Bathra* 14b) gives the order as Ruth, Psalms, Job, Proverbs, etc., Ruth apparently being placed before Psalms because it contained an account of David's ancestry. Jerome (*Prol. Gal.*) gives the order as Job, Psalms, Proverbs, Ecclesiastes, Canticles, etc.; but this is not in accordance with prevailing Heb. tradition. In many MSS, especially the Spanish, the Books of Chronicles come first, then Psalms, Job, Proverbs, etc. The usual order is that of the German MSS followed in the printed edd. of the Heb. Bible—Psalms, Proverbs, Job (the poetical books, sometimes known by the technical name *new*, 'Truth,' formed by the initial letters of the three books Job, Proverbs, Psalms), followed by the five *Megilloth* or rolls, the narrative books coming last (see Kyle, *Canon of OT*, p. 229 ff.). The present article will deal with the Name and Number of the psalms, the Formation of the Collection, the Date and Authorship, the Titles and the Poetical Construction of the psalms, the Moral and Religious Ideas prevailing in the Psalter, the Text and Versions, and finally with the Literature of the subject.

i. NAME AND NUMBER.—No name for the psalms collectively is found in the book itself or in the text of the OT. The nearest approach to such a designation is found in the name given to a portion of the Psalter in the subscription to Ps 72 (v. 20)—'The prayers (*תפלות*) of David, son of Jesse, are ended.' The word 'prayer' must here be understood in its broadest sense as any turning of the heart towards God in supplication or in praise. See also 1 S 2¹ and Hab 3¹. Ps 17. 86. 90. 102 and 142 are also called 'prayers' in their several inscriptions. The title for the book used by the Jews is *ספר שירים* (shortened *ס'ש*, apocop. *ש'ש*, Aram. *ש'ש*), i.e. Book of Praises, a name which was current in the time of Origen and Hippolytus, though the genuineness of the passage in which the latter discusses the general introduction to Psalms has been questioned. In that passage the name stands transliterated into Greek as *Σέφρα Θέλειμ*, and in Eus. *HE* vi. 25 Origen's title of the book is preserved as *βιβλος ψαλμῶν Σεφραθελείμ*. Jerome confirms this by describing (in the preface to his *Psalt. juxta Heb.*) the Heb. title as *Sephar Tallim*. Eusebius elsewhere transliterates *Σέφρα Θέλλημ*. The word which thus appropriately gave a name to the whole book is found once only in the Heb. text as a title, Ps 145 being called *תהלה* a Song of Praise. The regular plural of this word is *tēhillōth*, Ps 22³, this feminine form being distinguished from the masc. *tēhillim*, in that the former points more distinctly to the subject-matter, the latter to the form of the composition. Cf. Baethgen, who distinguishes (Pref. to Comm. p. iii) between *ein Buch der Gesänge* and *ein Gesangbuch*.

The usual name for a separate psalm is *תהלה* *mizmôr*, found in the titles of 57 psalms, from the third—probably the first in the earliest collection—onwards. The word by its derivation indicates that which is to be sung to a musical accompaniment, and in practice it is used only of a religious song. The more general word *שיר* *shîr*, used for secular songs in Is 23¹⁶ and Am 8¹⁰, is found in combination with *mizmôr* 13 times in the titles; 5 times the order is *shîr mizmôr*, and 8 times this order is reversed. Once (Ps 46) the word *shîr* is used alone, and once it occurs in the form *shirrah* (Ps 18). The word corresponding to *mizmôr* in Greek is *ψαλμός*, properly a song to the accompaniment of stringed instruments; and the usual title of the book in the LXX is *βιβλος ψαλμῶν*. But in Cod. Alex. we find *ψαλτήριον*, which is properly the name of a stringed instrument,

adopted as a title of the book; hence Eng. 'Psalter.' The usual Greek title is quoted in St. Luke's writings, Lk 20⁴², Ac 1²⁶. The Syriac name *Kéthābē de-mazmūrē* preserves a name which is not found in the OT as a plural, and which did not prevail as a collective title in subsequent Jewish usage.

The number of the psalms is 150, both according to the MT and the LXX. But the same total is preserved with a different arrangement in detail. Only the first eight psalms and the last three are marked by the same number in the two versions, the Greek combining Ps 9 and 10 in one, also Ps 114 and 115, whilst it divides Ps 116 and Ps 147 each into two parts severally numbered. This may be more clearly shown by the following table:—

| | Hss. | LXX |
|--------|----------|----------|
| Psalms | 1-8 | 1-8 |
| | 9, 10 | 9 |
| | 11-113 | 10-112 |
| | 114, 115 | 113 |
| | 116 | 114, 115 |
| | 117-146 | 116-145 |
| | 147 | 146, 147 |
| | 148-150 | 148-150 |

The arrangement of the Greek is followed in the Vulg. and in some of the older Eng. VSS. In the LXX is found an additional psalm (151) with the following title: 'This psalm was written by David with his own hand, though it is outside the number, composed when he fought in single combat with Goliath.' It runs as follows:—

'I was small among my brethren,
And youngest in my father's house,
I used to feed my father's sheep.
My hands made a harp,
My fingers fashioned a psalter.
And who will declare unto my Lord?
He is Lord, He it is who heareth.
He it was who sent his angel
And took me from my father's sheep,
And anointed me with the oil of his anointing
My brethren were goodly and tall,
But the Lord took no pleasure in them.
I went forth to meet the Phillistine,
And he cursed me by his idols
But I drew the sword from beside him;
I beheld him and removed reproach from
the children of Israel.'

The psalm has no pretensions to genuineness, some of its phrases being obviously adaptations of the language of 1 S, but something is to be learned by comparing and contrasting it with the canonical psalms. Certain apocryphal psalms, drawn from Syrian sources, are given by Wright (*PSBA*, June 1887), including the above with four other psalms. One of these, in which a poet speaking in the first person is supposed to represent the feelings of the nation when Cyrus gave permission to the exiles to return from Babylon, is quoted at length by Baethgen (*Introd.* p. xl).

The different methods of numbering, indicated above, point to a various arrangement of material which there is good reason for thinking has been much more extensive. Ps 1 and 2 are found together in some copies. In Ac 13²⁵ the Western reading preserved in D, 8, and some Lat. MSS known to Origen, describes what we call the second as the first psalm, whilst Justin (*Apol.* i. 40) quotes the whole of both psalms together as one prophetic utterance. As will be seen below, the distinction between Ps 9 and 10 and between 42 and 43 should never have been made; the latter two psalms are found together in several Heb. MSS. These facts, together with others to be mentioned, prepare us for the phenomenon of composite psalms.

ii. FORMATION OF THE COLLECTION. — The Psalter, as we now have it, is divided into five books, including respectively Ps 1-41, 42-72, 73-89,

90-106, 107-150. These divisions are marked in RV, and have been recognized by the Jews from at least the 2nd cent. of our era; it is not to be understood, however, that they represent the original lines of demarcation in the formation of the Psalter. The close of each 'book' is marked by a doxology, appended 'after the pious fashion, not uncommon in Eastern literature, of closing the composition or transcription of a volume with a brief prayer or word' (W. R. Smith, who adduces parallels from the Diwan of the Hodalite poets, to show how the limits of an older collection of poems may be marked by the retention of a doxological phrase). This explanation unquestionably applies to the three doxologies, 41¹³, 72^{1a, 19} and 89¹³; these are clearly separable from the psalms at the end of which they are respectively found. It is not clear that 106⁴⁸, at the end of Book iv., has precisely the same history; whilst the fifth book has no closing doxology, Ps 150, which is itself a full ascription of praise, being understood to obviate the necessity for such an addition. The fivefold division is recognized in the *Midrash Tehillim* on Ps 1¹, which undoubtedly embodies a tradition much earlier than the commentary itself. Jerome, also, in his *Prolog. Galeat.* distinguishes between the *quinque incisiones* and the *unum volumen* of the psalms. The passage from Hippolytus which refers to this subject cannot be urged as certainly genuine. The presence in the LXX version of the doxology at the end of the fourth book, with its liturgical addition, 'And let all the people say Amen,' unquestionably points to a fivefold division as more or less clearly marked in at least the 2nd cent. B.C., but it is not probable that this division was made by the final redactor of the Psalter himself setting in their respective places four doxologies to mark the limits of the various collections. On the contrary, evidence is forthcoming to show that the Psalter gradually grew into its present shape, and several of the stages by which the final result was reached can be distinctly traced. The chief evidence for this gradual compilation of the Psalter is as follows:—

a. The existence of duplicate editions of the same psalm. Compare Ps 14 with 53, 40¹²⁻¹⁷ with 70, 108 with 57⁷⁻¹¹ and 60⁸⁻¹². The collections in which these duplicates severally occur must at one time have existed separately.

b. The use of the names of God in the various books is such that it cannot be considered accidental or without significance. The facts in brief are these. In Book i. the name Jⁿ occurs 272 times, Elohim, used absolutely, only 15; in Book ii. the case is reversed, Elohim being found 164 times, Jⁿ only 30 times. The figures in Book iii. are more complex, and it is found necessary to divide it into two parts, so that in Ps 73-83 Jⁿ occurs 13 times, Elohim 36, while in 84-89 Jⁿ is found 31 times, Elohim only 7 times. In Books iv. and v. Jⁿ is used almost alone (339 times); the only exceptions being in Ps 108 (found also in earlier collections) and Ps 144, which there are other reasons for holding to be composite. That this prevailing use of one or other name is due (at least in part) not to the author but to editorial modification, is made probable by the fact that we have a Jahwistic and an Elohist recension of the same psalm (cf. 14 and 53, also 40¹³ and 70); whilst the repetition of the phrase 'God, thy God' in 43⁴ 45⁷ and 50⁷ appears to have arisen from the much more appropriate 'Jⁿ, thy God.' The phraseology of some psalms appears to have been drawn directly from certain passages in the Law, with an alteration only in the Divine name used. Cf. Ps 50⁷ with Ex 20², Ps 71¹⁹ with Ex 15¹¹ etc.

c. Another argument is drawn from the titles and the way in which the psalms are assigned in

groups to various authors, those in Books i.-iii. having for the most part some kind of designation, whilst those in Books iv. and v. are generally anonymous.

d. The editorial note in Ps 72²⁰ 'The prayers of David, the son of Jesse, are ended,' seems to prove conclusively that the compiler of the collection in question knew of no other Davidic psalms, whereas several that are found in later books are ascribed to David.

e. The rarity in Books iv. and v. of the musical notes and directions so common in the earlier books points to a difference in the history of their compilation.

f. Another argument has been drawn from the general character of the subject-matter in the various collections. It is thus expressed by Kirkpatrick: 'Speaking broadly and generally, the psalms of the First Division (Bk. i.) are *personal*, those of the Second (Bks. ii. and iii.) *national*, those of the Third (Bks. iv. and v.) *liturgical*. There are numerous exceptions; but it is in the First Division that personal prayers and thanksgivings are chiefly to be found; in the Second, prayers in special times of national calamity (44. 60. 74. 79. 80. 83. 89), and thanksgiving in times of national deliverance (46-48. 75. 76. 65-68); in the Third, psalms of praise and thanksgiving for general use in temple services' (95-100. 105-107. 111-118. 120-136. 146-150), *Introd.* pp. xlii, xliii.

Is it possible, then, more minutely to trace the stages by which the various sections of the Psalter assumed their present shape? It is noteworthy that in Bk. i. all the psalms are assigned to David, with the following exceptions: Ps 1 is introductory, and was probably prefixed to the collection as a suitable preface. The absence of a title to Ps 2 seems to point to a separate history, and perhaps accounts for its having been joined in many copies to Ps 1. Ps 10, which is anonymous, belongs to Ps 9, as is seen by the acrostic arrangement. Ps 33 is assigned to David in the LXX, but it was originally anonymous, and appears to be of distinctly later date than the rest.

In Bks. ii. and iii. all the psalms bear titles except Ps 43 (which, as the refrain shows, is part of 42) and 71. They fall, not quite symmetrically, into groups. Eight psalms together (42-49) are assigned to 'the sons of Korah,' and a supplement of a few Korahitic psalms is found in 84. 85. 87. One psalm 'of Asaph' (50) stands alone, followed later by a group of eleven Asaphic psalms 73-83. Ten psalms of David are found together (51-70, all Davidic except 66 and 67); Ps 86, which is also ascribed to David, may be shown to be a mosaic of sentences adopted from other psalms. One psalm (72) is assigned to Solomon, one to Heman, and one to Ethan.

In Bks. iv. and v., on the other hand, the rule is that the psalms are anonymous, the only exceptions being that the 90th psalm is ascribed to Moses, the 127th to Solomon, whilst a few additional ones, 17 in all, bear the name of David.

The history to which these facts appear to point may be sketched somewhat as follows. The earliest collection consisted of Ps 3-41 or the bulk of the Psalms now so numbered, bearing generally the name of David. The significance of that designation will be considered later; enough now to say that it does not necessarily imply that David himself was the author of every psalm—and to these were added Ps 1 and 2 and probably some others. The next in order were Levitical collections 'Korahite' or 'Asaphite,' and these were combined in due course by an 'Elohistic' editor, who added a few 'Davidic' and other psalms. A conjecture of Ewald is supported by many moderns, that Ps 51-72 originally stood after Ps 41, forming one

collection of 'Davidic' psalms, with the editorial note 72²⁰ found naturally at its close. The Levitical psalms would then follow in their order—Korahite 42-49, Asaphite 50. 73-83, Korahitic supplement 84-89. W. R. Smith marks the following stages in the process of forming the Psalter as it now exists:—

a. The formation of the first Davidic collection, with its closing doxology, Ps 1-41.

b. The second collection with doxology and subscription, Ps 51-72.

c. The twofold Levitical collection (Ps 42-49. 50 and 73-83).

d. Elohistic redaction and combination of b and c.

e. Addition to d of non-Elohistic supplement and doxology, Ps 84-89. (See *OTJC* 201).

Without adopting this precise arrangement, which has, however, much to recommend it, it may be assumed that by some such process—probably one not so accurate and precise as modern critics theoretically construct—the psalms in the first three books were gathered and arranged. Ps 90-150 are viewed by most modern scholars as one division or collection, but certain lines of stratification may easily be perceived in it. One exquisite little group of psalms is found in 120-134, the 'Songs of Ascents,' which in all probability at one time existed as a separate 'hymn-book.' Another break is found in the doxology appended to Ps 106, whatever may have been its precise history. Then Ps 92-100 possess a character of their own, and groups of *Hodu* and *Hallelujah* psalms may be discerned, though it is not likely that these ever existed as separate collections.

No precise rules can be given for the order in which the psalms are found. A certain broad outline of chronological order is perhaps discernible; sometimes psalms are grouped together which refer to the same subject-matter, e.g. the psalms of the Theophany of which Ps 98 forms a centre. The same musical designation appears to have caused the grouping of the *Maschil* psalms 42-45. 52-55, whilst those inscribed *Michtam* are found together in 56-60. Sometimes the occurrence of a word or phrase seems to link one psalm with another, and some writers, of whom Wordsworth, Forbes, and occasionally Delitzsch, may be named as examples, attach much significance to this. But it is undesirable to build any elaborate theories upon the arrangement of lyrics the present collocation of which must have had a long history. Experience shows how gradual and irregular has been the arrangement of many modern hymn-books, in days when much greater symmetry and more formal arrangement might be looked for than in the Psalter.

The dates of these several collections can be determined only in the most general way, and even so with a considerable measure of uncertainty. It is perhaps possible to fix a *terminus a quo* and *ad quem*, a superior and inferior limit, to mark the period within which the whole work must have been carried out. And first, for the superior limit.

The earliest collection is that of 'Davidic' psalms, numbered 1-41. If Ps 1 and 2 were included in the collection when it was first made, also 25 and 33, it is tolerably certain that this was not done till after—probably not long after—the return from Captivity. Ps 1 is almost certainly post-exilic. The language of 147 'Oh that the salvation of Israel were come out of Zion,' does not necessarily imply the Bab. Captivity, and the verse may be a liturgical addition. Ps 25²², which forms an addition to an acrostic arrangement, breathes a similar prayer, and shows that the psalm in its present condition cannot be very early. The subject of Ps 16 does not necessitate a post-exilic date, but if a doctrine of immortality be implied in it, such a date is most probable. Some other psalms in this collection—notably 31 and 39—point

at least to the period of the later monarchy. The history of Temple-music, moreover, so far as that is ascertainable from the documents before us, hardly seems to admit of the production of such a finished collection of Temple-songs before the Exile. The Chronicler must be understood as describing in 1 Ch 15 and 16 the institutions of his own time, of which David only laid the early foundations. That a guild of Temple-singers existed before the captivity of Judah is probable enough, but the collection as a whole—compare the titles to Ps 24 and 28 in the LXX—implies a stage of advancement in Temple psalmody which can hardly have been reached till after the Return. This does not imply, of course, that no previous collection of sacred songs had ever been made. It is possible, though hardly probable, that in the time of Solomon some steps had been taken in this direction. But we are dealing with the Psalter as it has come down to us, and we should name the period shortly after the Exile as the earliest possible and the most probable date for the formation of the first collection of psalms. The next may very well have taken place in the time of Nehemiah, and the work appears to have been very gradually accomplished during the succeeding centuries by stages which we cannot exactly trace, but some idea of which has been furnished above.

What, then, is the *inferior limit of date* in the carrying out of this work? Here a number of arguments have to be examined, the investigation of which is in itself instructive, and the material thus furnished is sufficient to warrant tolerably definite conclusions.

α. The bearing of 1 Ch 16 upon the date of the Psalter. The date of the Chronicler may be roughly taken as about B.C. 300. In ch. 16, in the course of an account of the bringing up of the ark to the city of David, the writer puts a psalm into the mouth of David as appropriate to such an occasion. The psalm is not directly attributed to David as the tr. of v. 7 in AV would imply. The phraseology only emphasizes the fact that David took especial care concerning the giving of thanks: 'On that day did David make it his chief work to give thanks unto the Lord by the hands of Asaph and his brethren.' A psalm follows, however, which consists of 105¹⁻¹⁵ 96 and certain verses (1⁴⁷⁻⁴⁸) from Ps 106. Apparently, therefore, the Chronicler had these psalms—possibly a collection containing these psalms—before him when he wrote. V. 36 seems distinctly to imply that the writer adapted the doxology to his purpose, changing the imperfects into perfects, 'And all the people said Amen, and praised the Lord.' If this were the case, the conclusion is clear, that Ps 106 was written, perhaps Bk. iv. formed, somewhere in the 4th cent. B.C. Closer examination shows, however, that this is not quite so certain. Cheyne contends (*Origin of Ps.* p. 457) that vv. 24-36a were only liturgical formulæ, not composed solely for use in Ps 106, but freely attached to many psalms. It may be replied that the connexion between 1 Ch 16³⁶ and Ps 106⁴⁸ as a whole appears too close to be accidental, and we can hardly conceive that the psalmist adapted the phraseology of the Chronicler, though Ryle seems to favour this view (*Canon of OT*, p. 129). It is possible, as Cheyne suggests, that additions were made to the various books after the collections had been provisionally closed, and this possibility must not be summarily excluded. It is possible, again, and for some reasons probable, that vv. 24-36 did not form part of the original text of 1 Ch 16. V. 7 joins very naturally to v. 37, whilst the words of the psalm do not fit in very appropriately with the phraseology of the seventh verse, when its meaning is rightly understood. This suggestion, originally made by Reuss,

is favoured by Baethgen, and the possibility of its acceptance prevents the argument from being conclusive. Given both texts as they stand, it seems difficult to resist the conclusion that Ps 106, with its doxology complete, was before the Chronicler as he wrote.

β. The evidence afforded by the LXX is much more trustworthy, and rests upon a broader basis. It is true that we cannot be quite certain when the tr. of the Hagiographa was completed. That the whole work was begun and the tr. of the Pent. executed about B.C. 250 seems tolerably clear; but Cheyne and some others are disposed to bring down the inferior limit for the completion of the tr. of the Hagiographa very late. All Cheyne will admit is that it was finished 'at any rate before the Christian era.' The evidence of the prologue of Sirach, however, will hardly admit of a later date for the tr. of the Psalter than B.C. 150. The author of this preface, writing about B.C. 130, thrice mentions 'the law, the prophets, and the other books' (or an equivalent expression), and he speaks of his grandfather, Jesus son of Sirach, as having been familiar with these as sacred writings. This indicates a third class of sacred Scriptures, the canon of which was not necessarily complete in the time of Sirachides, say B.C. 180. But that the Psalter was included among these can hardly be questioned, even though it were not in its present form. References in 1 and 2 Mac, as we shall see, confirm this supposition. But granted that the evidence is not conclusive, and bringing down the date for the tr. of the Psalter even so low as B.C. 100, it is clear that a considerable interval must be allowed for the accomplishment of the various processes passed through between the completion of the latest collection in Heb. and its rendering into Greek. Sanday (Bampt. Lect. on *Inspiration*, Lect. V. Note A, p. 271) marks as many as nine such processes. The number is probably excessive; but if the history of the formation of the Psalter has been at all correctly indicated, several stages must separate the composition of, say, one of the psalms in the Elohist collection and its inclusion in the LXX. The smaller group of Korahite or Asaphic psalms would be collected, then would come the larger Elohist collection, the addition of title, the embodiment of the smaller collection in the full Psalter of 150 psalms, the numeration, the formation of titles as found in the Greek,—these are some of the steps which must have been successively taken. Probably not much time needs to be allowed for some of them, some may even have been contemporaneous, but reflection shows that an interval of, at least, one or two decades must be allowed between the completion of the Heb. Psalter and its tr. into Greek.

γ. A further argument may be drawn from 1 Mac 7¹⁶, which quotes Ps 79—usually accounted one of the latest in date—with the formula usual in citing Scripture—*κατὰ τοὺς λόγους οὗς ἔγραψεν*. For a psalm thus to be recognized and quoted as Scripture, implies the lapse of a considerable interval since its composition. Not much reliance for our purpose can be placed on the statement of 2 Mac 2¹³, which records how Nehemiah, 'founding a library, gathered together the books about the kings and prophets, and the books of David (τὰ τοῦ Δαυὶδ) and letters of kings about sacred gifts.'

δ. Indirectly, the so-called 'Psalms of Solomon' (which see) furnish evidence from another point of view. These psalms possess a distinct character of their own. If they may be placed, as most modern scholars are inclined to place them, about the middle of the 1st cent. B.C., a considerable interval must be allowed as elapsing between their composition and that of the latest canonical books. Even a

superficial reader must be struck by the contrast between these 'psalms of the Pharisees' and those of the canonical psalter. Kirkpatrick speaks of them as 'separated by an impassable gulf.' This is strong language; but on the two great subjects of the future life and the Messianic hope the contrast is so striking, that if argument from growth and development of thought is worth anything at all, this is a case in which great reliance must be placed upon it.

Passing by other arguments of more questionable value, such as that from the musical titles, which were certainly unintelligible to the Gr. translators, and that from the language of the Chronicler concerning the Levitical guilds of singers, we may perhaps come to the following conclusion:—The Psalter is a collection of religious poetry chiefly, though not entirely, intended for use in public worship, and very gradually compiled. The earliest stage of the final process dates from shortly after the Exile, one step succeeding another through the compass of some three centuries, till the collection was virtually closed in the first half of the 2nd cent. B.C. Ryle represents the prevailing view of modern scholars when he says, 'The time of its final promulgation in its present form and of its first recognition as part of the people's Scriptures, may well have been that of the great religious revival that accompanied the success of the Maccabean revolt, and the downfall of the Hellenizing party among the priests and nobles' (*Canon of OT*, p. 127). The exact form of the conclusion reached is somewhat dependent on the decision of questions concerning the date and authorship of individual psalms, a subject intimately bound up with that just discussed, to which accordingly we now pass.

iii. DATE AND AUTHORSHIP.—Care must be taken not to confuse date of compilation and date of composition, and sometimes a distinction must be made between the date of composition of the original psalm and the date to be assigned to it in its present form. Many of these lyrics were handed down orally, and, in particular, some of those that were connected with public worship may have been long current in a narrower circle before they found a place in a smaller or larger collection of psalms. Further, the phenomena of the Psalter, as we have it, prove conclusively that modifications were freely made in existing compositions, whether to make them suitable for public worship or to adapt them to the new circumstances of a new time.

It is not the object of this article to describe the history of lyric poetry amongst the Hebrews. But no intelligent judgment can be formed as to the probable date of these particular sacred songs, without a brief survey of what is known from other sources concerning the history of this form of literary composition in Israel.

The history of the people begins with an outburst of song. The deliverance from Egypt at the Red Sea was an event which made a deep impression on the ritual, the literature, and the national life of Israel. It was signalized, according to Ex 15, by a song 'which Moses and the children of Israel sang'—a psalm not unworthy of the great occasion. It is found as part of the 'second Elohists' narrative, doubtless handed down from earlier days, and is fitted into its place by v.¹⁹. That the whole song in its present form is antique seems hardly likely. Ewald, Dillmann, Delitzsch, and Driver agree that vv.¹⁻³ give the ruling strain of the ancient hymn, while the language of vv.¹³ and ^{17b} seems to point to later days, when the early deliverance was triumphantly recalled. The 'Song of Moses' in Dt 32 may with some confidence be assigned to the 8th cent. B.C. It is not Mosaic in its point of

view; v.^{7a} are enough to show that the settlement in Canaan is an event of the far past. Driver would fix the date about the time of Jeremiah, and some features point in this direction. But it is near enough for the present purpose, if it be assigned generally to the period of the monarchy. The remarkable poem given at length in Jg 5, known as the Song of Deborah, is generally recognized as one of the oldest fragments of Heb. literature. Kuenen describes it as contemporaneous with the events it celebrates, and most critics acknowledge the absence of anachronisms and the strong impression of reality which this ode leaves upon them. The date of Hannah's song in 1 S 2 cannot easily be determined. Judged by modern ideas, it seems little suited for the occasion on which it is said to have been uttered, except so far as it sets forth the Divine exaltation of the lowly, or may be considered to possess a prophetic character. That it was composed after the establishment of the monarchy seems clear from v.¹⁰. The lament over Saul and Jonathan ascribed to David in 2 S 1 may be taken as genuinely Davidic. It contains nothing inconsistent with the occasion, none of those indications of a later point of view sometimes found lurking in a single clause or allusion, whilst the date of the compilation of the book, so far as can be gathered, would point to an early origin for the elegy. Other indirect evidence as to the handing down of such songs from early times may be drawn from the mention of the 'book of Jashar' and the 'teaching of the song to the children of Judah' in v.¹⁸. The 'last words' of David, found in 2 S 23, do not stand on quite the same footing, since these later chapters form an appendix to the book which may be much later in date.

Other lyrics which have come down to us embedded in prophetic literature—with which psalmody is closely connected—are the thanksgiving of Is 12, the dirge of Hezekiah in Is 38, the prayer of Habakkuk in Hab 3, and that of Jonah in Jon 2. It is impossible to enter into detailed questions of criticism, yet the objective evidence afforded by the dates of these poems, if they could be fixed, would be important, for these would serve as landmarks to judge of compositions when removed from their setting. Is 12 probably belongs to the period of Hezekiah. The dirge in ch. 38 may well be of the same date. It was apparently added by the compiler of Is 36-39 to the historical narratives drawn from 2 Kings. Cheyne compares the language of the dirge with that of Job, and holds it to be exilic, inserted on the principle that psalms in any sense illustrative of historical incidents might be quoted as if actually connected with them. The prayer of Habakkuk is considered by many critics to be a late addition, but there is no valid reason why it should not belong to the 6th cent. B.C. The general character of Jon 2 seems to mark it out as a cento of phrases drawn from earlier psalms. It has none of the freshness and force to be expected in a composition of the time of Jonah the prophet.

Gathering this hasty survey to a close, it may be said in a word that the highly elaborated poetical composition entitled 'The Lamentations,' though not by Jeremiah, and perhaps not of single authorship, may—allowing for the slightly varying dates of its different parts—be with some confidence placed soon after the Exile, in the course of the 6th cent. B.C. The finished acrostic arrangement, no less than the language and style, points to an advanced stage of poetical composition. See, further, art. POETRY (HEBREW).

If these results are only approximately correct, they furnish valuable data for further investigation. We cannot obtain as much information

concerning the history of music and song in connexion with temple-worship. The notes of the Chronicler, written long after the event, though in many cases drawn from original sources, hardly enable us to determine how far the services which were inaugurated by David had developed in the earlier period of the monarchy. Some of the descriptions seem to give a picture of the full organization known to the Chronicler, of which David established merely the rudiments. Delitzsch laid it down that there were three chief epochs of psalmody in Israel—the time of David, of Jehoshaphat, and of Hezekiah; but in our records it is difficult to distinguish the stages of growth in the music and worship of the sanctuary. It seems clear, however, that the position discernible after the Exile (Ezr 2⁴¹ and Neh 7⁴⁴) implies considerable previous development, at least under the later monarchy, though its exact degree is doubtful. On the other hand, the outburst of song in the time of the Maccabees, of which many recent critics have much to say, while probable enough, is hypothetical only. The theory is likely enough *a priori*, and possesses some slight indirect confirmation from history (cf. 2 Mac 2¹⁴), but its historical basis is not strong enough to bear any solid superstructure. The evidence of Jer 33¹¹ is by no means unimportant where external evidence is so scanty; pointing, as it does, to a measure of liturgical development and the use of formulæ in worship during the Chaldean period, which may form a fixed point in dealing with the psalms.

Let us next examine the titles so far as these bear on authorship. The facts are these. One psalm is attributed to Moses, 73 to David (in the five books respectively, 37. 18. 1. 2. 15), 2 to Solomon, 12 to Asaph, 11 to the sons of Korah, 1 to Heman, and 1 to Ethan. In fourteen cases the historical circumstances of composition are alluded to (cf. Ps 3. 7, etc.). These cease in the later books. Those that have come down to us are sometimes taken from the historical books, and sometimes present difficulties, as in the mention of 'Cush,' Ps 7. The LXX contains some additional titles. The following psalms, anonymous in the Heb., are in it ascribed to David, 33. 43. 67. 91. 93-99. 104; Ps 138 and 139 are inscribed in cod. A *τῷ Δαυίδ Ζαχαρίῳ*, while 146. 147, and 148 have the title *Ἀγγαίου καὶ Ζαχαρίου*. The historical references peculiar to this version are often curious or obscure, e.g. Ps 27 *πρὸς τοῦ χρυσῶναι*, Ps 29 *ἐξ ὁδοῦ σκηνῆς*, Ps 66 *ἀναστρέφεις*, whilst Ps 76 and 80 are entitled *πρὸς τὸν Ἀσάριον* and *ὑπὲρ τοῦ Ἀσσυρίου*, and Ps 144 *πρὸς τὸν Γολιάθ*. This version contains also, it may be said in passing, notices of the days on which certain psalms were recited in public, as Ps 92 in the Heb. is spoken of as a Sabbath-psalm. Ps 24 was sung on the first day of the week, 48 on the second, 94 on the fourth, and 93 on the day before the Sabbath.

The anonymous psalms, called 'orphans' in later days, were by the later Jews provided with parents by being attributed to the author named in the nearest previous psalm (see Jerome, *Epist.* 139 *ad Cyprianum*). In all probability it is on this principle that so many psalms in the first book came to be attributed to David, and in later times Moses was credited with all the psalms 91-100, extending, that is, from the 'Mosaic' 90th psalm to the 101st, which bears David's name. The usage by which the whole Psalter came to be attributed to David, so that the popular name 'David' was applied to the whole collection in He 47 is easily intelligible, and has been frequently paralleled since in the names of 'Wesley's' and other popular hymn-books.

The time when these titles were added cannot be exactly determined. Some would be prefixed at

the time of the earlier compilations, others when the collections of collections were made. Several of the titles in the LXX show, what one or two psalms in the Heb. exhibit, a combination of inconsistent traditions, both as regards author and occasion. As a whole, the titles represent an early, but far from contemporary tradition, and are for the most part uncritical in character, as may be shown by the following considerations.

1. Some of the psalms assigned to David cannot by any possibility be his. Compare, e.g., the Aramaisms of 103. 122. 139 and 144; but especially those of 139, a psalm which must be amongst the latest in the Psalter. Other explanations have been given of these Aramaisms which cannot be considered satisfactory; but if they are supposed to originate in the Northern Kingdom, Davidic authorship is equally set aside.

2. Some psalms ascribed to David are evidently late because of their obvious borrowings from earlier psalms. These are tame in style, lacking the fresh vigour associated with the Davidic period, though often with a plaintive beauty of their own (cf. Ps 86).

3. The acrostic psalms 25. 34 and 37 cannot be David's. It is conceivable that this artificial style of composition came into use early, but it is not probable. Known examples of it are late, and some other features in the acrostic psalms of the first book—e.g. the condition of the State, the exhortations to patience under oppression, as in Ps 37—make so early a date impossible.

4. The mention of the temple in 57²⁷ etc. must be considered as an evidence of date. It has been contended (e.g. by Delitzsch, *Psalms*, vol. i. pp. 160, 161) that *בְּיָמֵינוּ* might be applied to the Davidic tabernacle; but it is only by a certain straining of language that a word for 'palace' could be applied to a tent, even though that tent were the dwelling-place of God. The phrase God's 'holy hill,' moreover, seems to imply that the sanctuary had been established upon Zion for some considerable time (see Driver, *LOT* p. 375). The early use of these expressions might, however, perhaps be allowed, if all other features of the psalms in question favoured a Davidic authorship. But this is not the case. The language which describes a period of oppression and fear (Ps 91³ etc.) requires a good deal of adaptation before it will fit David's position, and the same may be said of the descriptions of the kind of foes against which the psalmist had to contend. Traditional interpretation may have accustomed readers to think of David under persecution by Saul, or at the time of Absalom's rebellion, but close examination shows that much of the language is inappropriate in David's mouth. Often there is a superficial resemblance to the circumstances of David's life, combined with real incompatibility. See, e.g., Ps 20 and 21, which refer to the king, but could not have been written by king David in relation to himself; Ps 55¹²⁻¹³, which might seem to point to Ahithophel, but that so many phrases of the psalm (vv. 3-5, 10, and the phraseology, carefully considered, of 12-14) are incompatible with David's position. Many of the psalms ascribed to David are not the language of a monarch at all, but the plaintive complaints of one who is crushed under a government which he has no power to modify, and from which he cannot escape. Isolated expressions such as are found in 51^{18, 19} may be explained as liturgical additions to an originally Davidic psalm, while 69³³ might conceivably be understood of David's time; but some violence is required in each case. And putting together (1) the separate phrases which betray a later date, (2) the kind of trials to which the psalmist is exposed, (3) the condition of society exhibited, (4) the maturity of theological thought often manifested,

it will be seen that a strong case is made out against at least a large number of the psalms attributed in the titles 'to David.'

Is it to be said, then, that *David wrote none of the psalms that have come down to us*? Wellhausen's dictum has often been quoted, that 'the question is not whether the Psalter contains post-exilic, but whether it contains any pre-exilic psalms,' and that question is by many answered in the negative. It will be safer to conduct the inquiry upon critical principles cautiously applied.

First, little or no reliance is to be placed on the titles as indicative of authorship. For it is not certain that the *לְדָוִד* is to be understood of personal authorship (compare the title 'of the sons of Korah,' where the preposition is admittedly not the *Lamed auctoris*). It is probable that a title originally given to one or two psalms in a book was afterwards affixed separately to all in a collection. And the arguments above alleged show that many of the titles must have been affixed in a crude and superficial way. But the same cannot be said of the general reputation of David as a psalmist. This must have rested upon a tolerably substantial basis. It has been said that David was noted only as a musician, not as a poet. The passages 1 S 16¹⁸, 2 S 1¹⁷ 3³³ 6¹⁴, and Am 6⁹ are said not to imply more than this. But the Chronicler makes David to have been the founder of psalmody, see 1 Ch 15²², 23, 2 Ch 7²⁹, and compare Eze 3¹⁰, Neh 12³⁶.

Further, it has already been seen that David was confessedly the author of the elegy of 2 S 1, and the 18th psalm is attributed to him in 2 S 22. It is said that the first of these poems is not of a religious character, but that does not constitute a proof that the writer could not compose a religious poem, and for literary purposes its evidence is valid. David was the writer of verses which, as literature, are parallel with the psalms, whilst early tradition ascribes to him the composition of psalms also. Taking, then, the 18th psalm as a kind of test case, how stands the evidence? (a) *External Evidence*. If the 22nd ch. forms an integral part of 2 S, the testimony to Davidic authorship is early and strong. If—as there is reason to suppose—chs. 22 and 23 constitute a later addition to the book, their evidence is greatly weakened. It is not easy to determine whether the text as given in the psalm is earlier or later than that found in the history. Baethgen inclines to hold that the psalm gives the earlier form of text, but that the two have been handed down independently. On the other hand, it is much more probable that the brief historical introduction with which Ps 22 opens was taken from the history than *vice versa*. (b) *Internal Evidence*. The contents of the psalm suit well the early monarchy, and can, in fact, with difficulty be applied to any other period. The vigour and freshness which characterize the style have convinced Ewald and many other critics of the Davidic authorship. The only arguments on the other side have been drawn from v. 27, which might very well have come from David's pen, and vv. 40, 46, which do unquestionably point the other way, though there is nothing in them absolutely incompatible with Davidic authorship. The theory adopted by Cheyne and others who support a much later date is that the writer, with marvellous ability and success, throws himself back into the life of the conquering hero of many centuries before, and the poem was 'conjecturally ascribed to the idealized David not long before the Exile.' This conclusion appears to spring from the assumed premise that 'from the point of view of the history of art, not less than from that of the history of religion, the supposition that we have Davidic psalms presents insuperable difficulties.' The conjunction of internal and

external evidence furnishes a fair, though not conclusive, case in favour of the Davidic authorship of Ps 18, such as would reasonably be accepted in the case of any similar document in classical literature, and it can be overruled only by considerations drawn from a general view of OT religion, such as cannot be discussed here.

It is obvious that a decision on the question of the 18th psalm will carry many others with it. If this psalm be not David's, probably none from his pen has come down to us; if it be, the way is open to examine other psalms for which a similar claim is made, rejecting such as are condemned by internal evidence. The only other psalm of which mention can be made here is the 110th. Older expositors, such as Delitzsch and Ewald, held it to be Davidic, or of the Davidic age, but the tendency of modern criticism is to assign to it a much later date. The terseness, vigour, and occasional obscurity of its phraseology favour an early origin, and its occurrence in the fifth book of the Psalter, which tells in favour of a late date, is not absolutely inconsistent with an earlier. Decision upon the point is bound up with the exposition of v. 1. If the opening words may be understood in the sense that the Messiah is objectively regarded as the psalmist's Lord, David may be regarded as the speaker. If, as many hold, this is impossible, the theocratic priest-king must be addressed by the psalmist as his lord, and the Messianic reference can only be indirect and typical, and Davidic authorship is excluded. It has been attempted to support the first of these theories by the language of 2 S 23²⁻⁵ and the prophecy recorded in 2 S 7, but these do not present a close parallel to the kind of Messianic reference proposed. An argument, conclusive to the minds of many, is drawn from our Lord's quotation of this psalm as recorded in the Synoptic Gospels. This quotation shows at least that the current Jewish opinion regarded the psalm as Messianic, but it does not exclude—(1) the supposition that an *argumentum ad hominem* was intended sufficient for the purpose which Christ had in view, or (2) the fact that the argument to be drawn from the psalm holds good, if for 'David' the general word 'psalmist' were substituted. A study of the whole use of OT made by Christ in His teaching shows that the questions of date and authorship with which criticism is chiefly concerned were not before the mind of our Lord as He spoke, nor was it His object to pronounce upon them.

In general, the conclusion reached upon the subject of Davidic psalms seems to be as follows. It cannot certainly be proved that David wrote any psalms; the probability is that he wrote many; it is not likely that all these were lost; some of those extant which are ascribed to him are appropriate in his lips; external evidence ascribes the 18th psalm to David, and if it be his, it is probable that others also should be attributed to him; and in determining the number of these, internal evidence drawn from contents, style, allusions, etc., is the sole criterion. The judgment of critics proceeding upon these lines naturally varies considerably. Baethgen, with some hesitation, admits 3 psalms as Davidic, Schultz 10, Ewald 17, Delitzsch 44, while Driver (*LOT* 6380) sums up by saying—'*A non liquet* must be our verdict; it is possible that Ewald's list of Davidic psalms is too large, but it is not clear that none of the psalms contained in it are of David's composition.' The arguments above adduced would lead to the conclusion that from ten to twenty psalms—including 3. 4. 7. 8. 15. 18. 23. 24. 32, and perhaps 101 and 110—may have come down to us from David's pen, but that the number can hardly be greater and may be still less. The 90th psalm cannot have been written by Moses, nor the 72nd

and 127th by Solomon. The titles in these cases must be understood as indicative of the subject-matter. The reference of certain psalms to Asaph, Heman, Ethan, and the sons of Korah, is to be understood from the point of view of compilation rather than of authorship. If these psalms were taken from collections associated with the Levitical guilds known by these historical names in the time of the second temple, the titles become easily intelligible. It creates difficulties to press the meaning of the preposition as *Lamed auctoris*, and to suppose (*e.g.*) that the family or guild of 'Korah' were either separately or conjointly authors of psalms. It is quite possible that the free multiplication of the title לָמֶנְכֶם is due to the same habit on the part of those who formed the several collections. Compilers would think more of the source from which the psalms were actually derived than of the presumably remote original author, especially in days when personal authorship was not dwelt upon as in a later time.

On the general subject of the age of the Psalms, Cheyne hardly allows one to be pre-exilic; the scattered references to monarchy he applies for the most part to the time of the Maccabean revival. In this he stands almost alone amongst English critics, though the general tendency of criticism is to assign a continually increasing majority of the psalms to the post-exilic period. Cornill probably represents the prevailing opinion of contemporary scholars when he describes (*Einleitung*, p. 221) the Psalter as representing a reaction of the old Israelitish pious feeling against the stiffening formalism of the time of Ezra and his successors, a proof that the religious genius of Israel in the 3rd and 4th centuries B.C. had not been quenched by the growing influence of what was later known as Pharisaism. The historical allusions which are found in some psalms are not for the most part decisive, and these cease to have any weight if the possibility of later impersonation and idealization is freely conceded. Taking the language of the psalms as it stands, however, the nearest approach to definiteness on the ground of historical allusions would be found in Ps 46 as applied to the overthrow of Sennacherib, Ps 74 and 79 to the period of the Maccabees. Ps 68, which by earlier critics was assigned to the reign of Jehoshaphat, almost certainly belongs to the period of the Second Temple, and Ps 118, which has generally been considered as especially suitable to the return from Captivity, is confidently assigned by Cheyne to the Maccabean period. Ps 45, which most critics place during the monarchy, is understood by the same writer of Ptolemy Philadelphus. If historical allusions are not decisive, neither will the evidence of parallel passages avail much. If the dates of Job, of Deut., and of certain chapters of Isaiah could be fixed, the dates of a few psalms might be approximately determined; *e.g.* Ps 8 was written before the Book of Job, and Ps 90 after Deuteronomy. The date of Jer. is well known, but a comparison between the language of the psalms and the prophet (cf. Ps 1 with Jer 17⁷⁻⁸) makes it difficult to say which can claim the priority. A certain group of psalms, *e.g.* 69, may with some confidence be assigned to the period of Jeremiah.

In only a very few cases can linguistic evidence be considered as decisively characteristic of late date; Ps 139 is probably the best example of this. The criterion of style is too subjective and too differently estimated by different critics to be relied upon as evidence of date. Arguments drawn from the stage of theological thought visible in the psalms depend upon the view taken of the history of OT theology, and opinion can hardly be considered ripe enough on this subject for it to be

employed with certainty. The psalms themselves form no inconsiderable portion of the evidence by means of which that history is to be traced out, and it is clear that the vicious circle must be avoided which would conclude that a given psalm 'cannot be of early origin because the ideas it contains cannot have been promulgated so early.' The state of religious thought and life manifested in the writings of the prophets Amos and Hosea presupposes a long religious history, the nature of which has not yet been made sufficiently clear to allow of sweeping dogmatic assumptions. And, apart from a belief in the supernatural, the history of religion shows how frequently the *vates*, whether bard or prophet, has been before his time in his religious intuitions and aspirations. Certain general conclusions may, however, be given, which will guide us approximately to the time when the psalms as a whole were composed. A few being probably Davidic, a considerable number, especially in the earlier books, are pre-exilic, but the greater proportion of these date after the 8th cent. B.C. The large majority of the psalms may be with confidence assigned to the period during and shortly after the Exile, some few to the 3rd and even the 2nd cent. B.C.

Are any Maccabean psalms included in the Psalter? This much debated question has received very various answers. There is an *a priori* probability in favour of the existence of such psalms and of their inclusion in the Psalter, if the Canon of OT were not closed too early to admit them. The strong probability is that the Canon was not virtually closed till about B.C. 100, and the Psalter may have been kept open even after the various collections were formed, in the sense that a few later psalms might find their way in after a collection possessed a separate existence. The evidence of Josephus and of 2 Mac may be taken as indirectly confirming the *a priori* probability that the Maccabean times would furnish a vigorous psalmody. The evidence of the 'Psalms of Solomon' shows that the true spirit of psalm-composition existed even later, though the hopes and ideals of the psalmist had altered. When we examine the extant psalms, however, difficulties arise. Those which appear most likely to have sprung from Maccabean times, such as 44, 74, 79, 83, are found, not in the later, but in the earlier or middle collections. It is possible, but not easy, to understand how a psalm composed B.C. 150 made its way into Book II. and was labelled, not in the Heb. only, but in the Greek, as a psalm of Asaph. It is urged by some that the language of these psalms may be appropriately understood of earlier desolations than those of the time of Antiochus. But in Ps 74⁸, for example, the phrase סִימָנִי אֵל (though understood by the LXX of feasts) seems distinctly to point to the synagogues of a later period, while 74⁹ connects itself naturally with 1 Mac 4⁴⁶ 9²⁷ 14⁴. The argument drawn from the repeated use of חֲסִידִים, on the other hand, has been too much pressed, as if it must necessarily refer to the time when the *Hasidim* became a recognized party, when 'the company of the Hasideans, mighty men of Israel,' offered themselves 'willingly for the law' (1 Mac 2²³). It by no means follows that all mention of 'the pious ones' is to be taken as distinctly Maccabean.

The history of opinion displays considerable diversity of opinion on this question. Theodore of Mopsuestia, holding the Davidic origin of the psalms generally, taught that David projected himself in the spirit of prophecy into the times of the Maccabees, so that some of the psalms faithfully picture that period. Calvin attributed Ps 44, 74 and 79 to the period in question; Hitzig and Olshausen enlarged this short list to embrace the

greater portion of the Psalter, including all psalms from 73 to 150. Reuss assigned several psalms to a still later period—that of John Hyrcanus, B.C. 135–107. Cheyne indicates some twenty-five psalms as Maccabæan, including 20. 21. 33. 44. 60. 61. 63. 74. 79. 83. 101. 108. 115–118. 135–138. 145–150. His criteria of ‘a uniquely strong church feeling,’ an ‘intensity of monotheistic faith,’ and an ‘ardour of gratitude for some unexampled stepping forth of the Lord J’ into history,’ are not susceptible of specific and decisive application to Maccabæan times. The first criterion mentioned by Cheyne—the existence of ‘some fairly distinct allusions to Maccabæan circumstances’—would be decisive if its occurrence could be clearly proved. But the allusions are held by such critics as Gesenius, Ewald, Dillmann, and Hupfeld to be anything but distinct. In our judgment the number of Maccabæan psalms cannot be large, but the bare possibility that a few such psalms were included in the Psalter before the Canon was closed should be left open. If any psalms of the 2nd cent. B.C. are found in our present collection, the internal evidence which would assign 44. 74. 79. 83 to this period may be held to outweigh the unquestionable difficulties arising from their place in the second and third books.

iv. TITLES.—It has been found convenient to discuss such of the titles as bear on the question of authorship already; the present section will therefore be devoted to an examination of those words or phrases, mostly musical notes, which require explanation. For the sake of convenience, they are given in alphabetical order, following the EV.

‘Aljeleth hash-Shahar, Ps 22 מִן הַיּוֹם לַבֹּקֶר, LXX ὑπὲρ τῆς ἀνιδήσεως τῆς ἑωθινής, i.e. ‘concerning the morning aid’ (הַיּוֹם); so Targum, which refers to the *Tamid*, the perpetual morning sacrifice; Jerome, *pro cervo matutino* (so Aq.). ‘Upon’ here signifies ‘set to the tune of’ (RV), the name of the song being prob. ‘Hind of the Dawn.’ W. R. Smith compares Arabic usage in thus describing melodies; also Ephraem in the Syriac. Baethgen understands the morning to be viewed as ‘the hind in its swiftness.’

‘Alâmôth, Ps 46; cf. 1 Ch 15²⁰ ‘psalteries set to Alamoth’ (RV), מִן הַיּוֹם לַבֹּקֶר, LXX ἐπὶ τῶν κρυφίων, ‘about the hidden things’ (מִן הַיּוֹם), so Targum; Jerome, after Aq., *pro juvenilibus*. In 1 Ch, LXX transliterates δαμαῶθ. Ges. and most moderns derive from *‘almah*, ‘damsel,’ and render ‘with accompaniment of damsel voices,’ or ‘in soprano.’ Baethgen holds that this interpretation is not suitable to Ps 46. Rashi understands it of a musical instrument, as modern viola or tenor-violin. Cf. ‘Double-bass,’ corresponding to *Sheminit*, which see. It is a question whether the closing words of Ps 48 *‘al-muth*, which will hardly bear the translation ‘unto death,’ should not be read as *‘alâmôth* and taken as part of the title of the following psalm.

‘Al-taschith (AV), *‘Al-tashheth* (RV), Ps 57. 58. 59. 75, מִן הַיּוֹם לַבֹּקֶר, LXX μὴ διαφθείρῃς; Jerome *ut non disperdas*. As in RV, this must be understood to mean ‘set to the tune of, Destroy not.’ Possibly these words may form the beginning of an old vintage-song, such as we find described in Is 65⁸, when the new wine is found in the cluster, ‘and one saith, Destroy it not, for a blessing is in it’; but this is mere conjecture (see OTJC² p. 209).

Ascents.—See *Degrees*.

Chief Musician, for the.—Found in 55 psalms, beginning with Ps 4. See also Hab 3¹⁹. Heb. מְנַחֵם, LXX εἰς τὸ τέλος (connect with מְנַחֵם ‘for ever’?). Other Gr. VSS, εἰς τὸ τέλος, Jerome *Victori*; following apparently the meaning of a kindred Aram. root. The verb מָנַח is found in 1 Ch 15²¹ in reference to music, and is rendered ‘to excel’ in AV, ‘to lead’ the singing in RV. In 1 Ch 23⁴ it means

‘to preside over’ the work in question. The meaning of the title, therefore, apparently is that the psalm was to be given to the precentor or leader of the choir, and was intended to be sung in the temple-service.

Dedication, A Song at the d. of the house, Ps 30, Heb. מִן הַיּוֹם לַבֹּקֶר, LXX ἐκτάδευς.—The order of words in this title suggests that in its present form it combines two several traditions; it is at the same time a psalm *le-David* and a song for the dedication of ‘the house.’ It is possible that the two may be combined; not, however, when the site was chosen for the temple (Hengstenberg), for this was not the dedication of a house; nor (probably) at some re-consecration of the palace after Absalom’s rebellion and David’s absence. The most probable supposition, if the psalm is to be referred to David’s lifetime, is that of Delitzsch, who refers it to the house mentioned in 2 S 5¹¹, and supposes that about this time the king was recovering from severe sickness. It is known, however (*Sopherim* xviii. 2), that this psalm was used by the Jews from an early date at the feast of *Hanukkah*, the ‘dedication’ mentioned in 1 Mac 4⁴⁴ and Jn 10²², and Baethgen and many moderns consider that this clause of the title was added later as an after-thought. It has been questioned whether this is consistent with the ignorance of its meaning shown by the LXX. The probability is that the clause refers to a liturgical use of the psalm, not to its original composition.

Degrees, Songs of, Ps 120. 122–134 מִן הַיּוֹם לַבֹּקֶר; in 121 מִן הַיּוֹם לַבֹּקֶר, LXX ὁδὴ τῶν ἀναβαθμῶν, Jerome *canticum graduum*, whence AV ‘degrees,’ RV ‘ascents.’—Grammatically, the form of the title in Ps 121 is the more correct, if מִן הַיּוֹם is to be understood of an individual psalm. W. R. Smith and Cheyne understand it collectively=מִן הַיּוֹם, properly the title of the whole group, the plural ‘ascents,’ indicating that the title of the group has come to be affixed to each psalm separately. The following meanings have been attached to this ambiguous phrase:—

1. The return from Babylon (Ewald). See Ezr 7⁹, in which we read of ‘the going up from Babylon,’ and cf. Ezr 2¹. The use of the plur. ‘goings up’ is explained to refer to more than one journey, under Cyrus and Artaxerxes (Ezr 2 and 8); or to the number of caravans, cf. *oi ἀναβαίνοντες* of Jn 12³⁰. It is hardly likely, however, that the plural would be used of the one event which so signalized itself in the memory of the people, and the subject-matter of at least Ps 122 and 134 is unsuitable to this connexion.

2. The going up to the annual festivals in Jerusalem. The word *ma’alah* is not elsewhere used of these journeys, but the cognate vb. מָלַח is (Ps 122⁴ *al.*). The psalms are for the most part suitable in subject for such a purpose, either directly (see 122. 132. 133) or indirectly. Herder, Reuss, W. R. Smith (‘Pilgrimage songs’), and Baethgen may be mentioned as amongst those who favour this explanation.

3. Fifteen steps led from the women’s court to the men’s court in the temple, and the Talmud (*Midd. ii. 5, Sukkah 15b*) says that these corresponded to the songs of degrees; not, however, that the psalms were named after the steps, or that the Levites sang these particular psalms upon the steps. This explanation of the name has, however, been held by some (e.g. Armfield, who has written a monograph upon the subject).

4. Delitzsch favours the interpretation which finds an allusion to the peculiar style or structure of the psalms, the repetition of a word or phrase, with a gradual ladder-like ascent as to a climax—‘a step-like progressive rhythm of thoughts.’ Compare the structure of the ‘triolet’ in more

recent literature. Against this, however, it may be urged that not all these psalms exhibit this structure (see 132); that it is found in some other psalms (e.g. 29); and that nowhere else is this technical use of the word found.

5. *In höhern Chor* (Luther) to be sung 'in louder tones'; so R. Sa'adya Gaon, and cf. 2 Ch 20¹⁹ *lê-mā'lah* (diff. word from מְלַח), 'with a loud voice on high' (AV), 'an exceeding loud voice' (RV).

6. An explanation, first given by Rashi, has lately been revived by Schiller-Szinessy, which refers the word to the 'liftings-up' or 'goings-up' of the heart in adoration and trust. See 121¹ 123¹ 130¹.

It will be gathered from the above sketch that no certain meaning can be given to the title of this group of lovely psalms. The second explanation is, on the whole, the most probable.

Gittith, Set to the, Ps 8. 81. 84, Heb. גִּתִּית, LXX ὑπὲρ τῶν ληνῶν, Jerome *pro (in) torcularibus* (nāv).—The Targ. explains of a musical instrument which David brought from Gath, or of the form of a wine-press. Generally understood to indicate the name of a tune, possibly set to a vintage-song, a meaning which the LXX and Jerome may possibly have had in view in their renderings. Ewald understands it to mean 'the March of the Gittite guard.'

Higgaion (הִגְּגָיוֹן).—This word does not occur in any of the titles, but is found in Ps 9¹⁶ and is conveniently considered here. It occurs in connexion with *Selah* (which see), and the double phrase is rendered by LXX ὡδὴ διαψάλλματος. It is found in the text of Ps 92², where Cheyne renders 'with sounding music upon the harp.' The root הִגְּגָיוֹן from which the word is probably derived means to emit a deep, murmuring sound, and is used of a lion in Is 31⁴, of a dove in Is 38¹⁴, and of a mourner in Is 16⁷. Also in a secondary sense of meditation or device in Ps 19¹⁴, La 3³². Kimchi explains *Higgaion* from this secondary meaning of the root; but it is in all probability a musical term derived from the primary meaning, possibly indicating a 'forte burst of joyous music.'

Jonath-'elem-rêhokim, Ps 56 עֲיֹתָה עֲלֵי נְהִיָּה, LXX ὑπὲρ τοῦ λαοῦ τοῦ ἀπὸ τῶν ἀγίων μακροκρυσμένου, a tr. which supposes that Israel is intended by the word נְהִיָּה, 'dove,' and עֲלֵי is quite misunderstood. Like so many others of these enigmatical phrases, this is in all probability the name of a melody to which the psalm is to be sung. With the reading עֲלֵי the phrase may be interpreted 'the dove of the distant terebinths; with present pointing, as in RVm, 'the silent dove of them that are afar off.'

Mahälath, Ps 53; *Mahälath lê-annôth*, Ps 88, Heb. מַהֲלָת, or with addition of נֶחֱמָה, LXX ὑπὲρ Μαελὲθ (τοῦ ἀποκριθῆναι) as pr. name, see Gn 28⁹, 2 Ch 11¹⁸, Jerome *pro choro, per chorum* (after Aq. Theod. Symm.). Considerable uncertainty attaches to the rendering of this phrase. If it does not indicate the name of a tune (Ibn Ezra), or the sadness of the melody to which the psalm was sung (Delitzsch), the choice lies between understanding *mahälath* as (1) akin to *mahalah*, 'sickness' or 'calamity' (Ex 15²⁵), so Targ.; or (2) as a musical instrument (Rashi, Ges., Lowe). Neither etymology nor the probabilities of the case can be said to point decidedly in either direction.

Maschil.—Found prefixed to 13 psalms, viz. 32. 42. 44. 45. 52-55. 74. 78. 88. 89. 142. Heb. מִשְׁכִּיל, LXX συνέσεως, eis σύνεσιν. Cf. 47⁷ מִשְׁכִּיל וְיִסֹּר, 'make melody in a skilful strain' (cf. RVm); Targ. 'with good understanding.' Gesenius renders, 'a didactic poem,' which does not fit many of the psalms mentioned above. Delitzsch understands it as indicating a 'contemplative' psalm (מִשְׁכִּיל prop. 'consider,' 'attend to,' cf. Ps 101² [RVm] 106⁷); Rashi interprets by reference to 2 Ch 30²², the

Levites that 'had good understanding (or were well skilled) [apparently in music] for J'. So far as etymology serves us, the title probably indicates a contemplative composition, but in process of time the original meaning probably passed away and it came to mean little more than a poem (cf. ποίημα).

Michtam, Ps 16 and 56-60 מִכְתָּם, LXX στήλο-γραφία. — So Gesenius, who says מִכְתָּם = scribere, מִכְתָּם = inscribere; the meaning in Eng. would imply a carefully-fashioned, 'emblazoned,' psalm; but this meaning of the root מִכְתָּם is wholly uncertain. Another suggested derivation connects with מִכְתָּם and would give the rendering 'a golden psalm'; so Luther. The word is also used in Is 38⁹ of Hezekiah's dirge, but it is not easy to detect any features which the various compositions to which the word is applied possess in common.

Muth-labben, Ps 9 מִוְת־לָבֵן, LXX ὑπὲρ τῶν κρυφίων τοῦ υἱοῦ, Vulg. *pro occultis* (Jer. *pro morte*) filii, Targ. 'concerning the death of man (who came forth) between (the armies).' All these trs show that the phrase was not understood, and the ignorance of the ancients is shared by the moderns. Grammar will not allow of the rendering 'death of the son,' i.e. Absalom, even if such a meaning were appropriate. In all probability this is the name of a tune; but whether it should be rendered 'Die for the son' or (with other pointing) 'Death makes white,' it is impossible to say, and cannot really signify.

Neginoth.—Found in six psalms—4. 6. 54. 55. 67. 76 מִנְיָנוֹת, and once in 61 מִנְיָנוֹת, cf. Hab 3¹⁹, LXX ἐν ψαλμοῖς, Jerome *in psalmis*. The word means unquestionably 'on stringed instruments'; it is always found after the phrase 'For the chief musician,' and indicates that the psalm is to be sung to an accompaniment of stringed music, cf. 1 Ch 15²¹. *Neginath* is generally understood as the same word with an old feminine ending (Ges.); or, according to Massoretic punctuation, closely joined with *lê-David*, it would mean 'in the Davidic style of stringed music.'

Nehiloth, Ps 5 מִנְיָנוֹת, LXX ὑπὲρ τῆς κληρονομουσης, as if מִנְיָנוֹת, Jerome *pro hereditibus*. Generally understood as מִנְיָנוֹת, meaning 'to the accompaniment of flutes' or wind-instruments. That flutes were used in worship, is shown by Is 30²⁹. Baethgen objects that the usual word for flute might be expected here, and understands *Nehiloth* as the name of a tune.

Remembrance, To bring to, Ps 38 and 70 זְכוֹרָה, LXX eis ἀνάμνησιν (adding in 70, eis τὸ σῶσαι με κύριον), Jerome *in commemorationum, ad recordandum*. Is it to be understood, however, that God is to remember the psalmist, or the psalmist to remember God? Both views have been taken. The Targ., followed by Delitzsch, finds a reference to the *Azkarah* (ἀνάμνησις) part of the sacrifice of the Minbah, when a portion was thrown upon the fire and the smoke was supposed to bring the worshipper into the Divine remembrance. See Lv 24⁷⁻⁸, and connect with title in LXX περί σαββάτου. But the word is found in 1 Ch 16⁴, when certain Levites were appointed to minister before the ark, and 'to record' (AV), 'celebrate' (RV), as well as to thank and praise J'; and perhaps this more general meaning of worshipping, in the sense of not forgetting the Divine benefits, is the more probable meaning here.

Shēminith, Ps 6 and 12 מִנְיָנוֹת, LXX ὑπὲρ τῆς ὀγδόης, 'upon the octave or the eighth,' cf. 1 Ch 15²¹. The phrase either refers to a special kind of stringed instrument with eight strings, or means perhaps 'in the bass,' cf. *al-Alāmōth*=soprano. 'In a lower octave,' the reverse of the modern octave (Lowe).

Shiggalon, Ps 7 מִנְיָנוֹת, LXX ψαλμός—μετὰ ὧδης, Jerome *pro ignorantia* (after Theod. Symm., and see Ps 19¹² 'errors').—The word is found in the

plural in Hab 3¹. As derived from נָזַח 'to wander,' Ewald, Delitzsch, and others give the meaning of a 'dithyrambic song,' one characterized by various feelings or rhythms. Gesenius, with hesitation, renders *cantus suavis*. There appears to be nothing either in etymology, tradition, or the character of the two psalms in question to guide modern readers definitely to the meaning of this word.

Shoshannim, Shushan-Eduth, Ps 45 and 69 לַשְׁשָׁנִים, Ps 60 מִשְׁכָּן לֵבָנִי, Ps 80 שִׁשְׁבַּל, LXX ὑπὲρ τῶν ἀλλαιωθησομένων (שִׁשְׁבַּל from root שָׁנָה 'to change'), Jerome *pro liliis testimonii*.—Rashi understands as an instrument of six strings. Probably the name of a tune (Ibn Ezra and moderns) 'set to the melody of Lilies, or Lilies of the Testimony.' 'Pure as a lily is the Testimony,' i.e. the Law (Ewald).

Song of Love, Ps 45 מִשְׁכָּן לֵבָנִי, LXX ὁδὸς ὑπὲρ τοῦ ἀγαπῆται.—The allegorical interpretation which is suggested by the Gr. is of very early origin, and is based upon the use of language found in Hosea and elsewhere in OT, and recognized by St. Paul in Eph 5³². The Targ. renders 'Thy beauty, O King Messiah.' The feminine plural termination must not be understood literally as of king's daughters (Hengstenberg), nor of a marriage-feast, nor in an erotic sense, for the word is a noble one; but according to the Heb. idiom it corresponds to a neuter abstract, and the phrase would mean 'A song of that which is lovely.' It is to be understood, like Canticles, of a pure and holy earthly love which may be understood to symbolize and prepare the way for a higher affection still.

To Teach, Ps 60 מִשְׁכָּן לֵבָנִי, cf. Dt 31¹⁹, where Moses is commanded to teach a song to the Israelites, and 2 S 1¹⁷⁻¹⁸, where it is said that David 'bade them teach the children of Judah the song of the bow' (the word 'bow' is omitted in B of LXX)—a martial song, to be sung at the practice of arms? These parallels would seem to show that the title *le-lammed* means that this psalm, like many others, was to be taught to Israel.

v. POETICAL CONSTRUCTION.—Heb. poetry, it is well known, is not constituted by rhyme. Neither, like Anglo-Saxon and other verse, is it marked by regularly recurring assonance, though occasionally this feature is present. Neither, again, is metre an essential feature of Heb. psalmody. It has been questioned among scholars—though only a small minority are prepared to answer in the affirmative—whether metre, implying lines consisting of a fixed number of syllables, is recognizable at all in OT poetry, as, confessedly, both rhyme and metre are characteristic of Jewish poems of the Middle Ages. But though metre is not discernible in Psalms, it does not follow that rhythm is excluded. The rhythm of thought in the well-known *parallelismus membrorum* is, of course, an essential feature, and rhythm of language matching the thought is readily perceptible, though no rules can be laid down for its determination. There is a rhythm in all the finest prose, not the less impressive for being irregular. In Psalms the rhythm of language more nearly approaches regularity than the rhythm of carefully constructed prose, but it defies analysis and systematization. The prevailing form is the couplet of two corresponding lines, though the triplet and quatrain are used from time to time. On this subject Driver says: 'The poetical instincts of the Hebrews appear to have been satisfied by the adoption of lines of approximately the same length, which were combined, as a rule, into groups of two, three, or four lines, constituting *verses*, the verses marking usually more distinct pauses in the progress of thought than the separate lines' (LOT⁶ p. 362). (For the details of this subject see Driver's chapter just quoted and art. POETRY.) It may, however, be briefly said here that the chief attempts to trace

out a more regular metrical system in Psalms than the above remarks allow, are those of J. Ley (*Metr. Formen der Heb. Poesie*, 1886, and *Grundzüge des Rhythmus in der Heb. Poesie*, 1875), Gustav Bickell (*Carmina VT metrica*, 1882, and articles in ZDMG, 1891-1894), and, more recently, H. Grimme ('Abriss der biblisch-hebräischen Metrik' in ZDMG, 1896, pp. 529-584, and 1897, pp. 683-712). Ley seeks to establish a metre which depends upon accents, and relies upon alliteration, assonance, and rhyme as subordinate features. Bickell seeks to prove that the measure of the verse is marked by regular alternation of accented and unaccented syllables; but he accomplishes this only by an excessive modification, not to say mutilation, of the text, and by a violent use of unnatural elisions. Grimme's system is described in art. POETRY, p. 6^b. C. A. Briggs holds Ley's views in a modified form. He says, 'The accent may be used as a principle of measurement to a very large extent in Heb. poetry, but it is not an absolute law; for whilst many poems and strophes are uniform in this respect, the poet breaks away from it and increases or diminishes the number of accents, as well as words, to correspond with the movements of his thought and motion' (*Bibl. Study*, p. 263).^{*} This does not greatly differ from the mode of statement adopted by Delitzsch, which is accepted in this article. 'Heb. poetry is not metrical, i.e. it is not regulated by the laws of quantity and by the number of syllables; strong accents, which give prominence to the logically most important syllables, produce a very great variety of rhythms in the series of syllables that form the *stichoi*; the ictus of the verse is regulated by the logical movement; and the rhythm is the purely accentuating rhythm of the oldest kinds of national poetry' (*Psalms*, vol. i. p. 31, note, Eng. tr.).

There is one stage of poetical construction intermediate between the unit—couplet, triplet, or quatrain—and the completed lyric. It is the strophe or stanza, whichever name be considered most appropriate for a section of the poem, marking a clearly defined movement in the thought, and consisting of a measured number of lines. Moulton, in his *Literary Study of the Bible*, uses the term 'sonnet' to describe this feature of Heb. poetry, but the accepted connotation of the word makes it generally unsuitable, and it would be quite out of place in the psalms. Sometimes the close of the strophe is marked by a refrain, or a nearly exact repetition of verse or phrase at more or less regular intervals. Some of the most clearly marked examples of this are, 'Why art thou cast down, O my soul?' in 42^{6, 11, 43}; 'The Lord of hosts is with us' in 46^{7, 11}; 'Turn us again, O Lord of hosts' in 80^{4, 7, 19}; 'O that men would praise the Lord for his goodness' in 107^{8, 15, 21, 31}. In the 136th psalm the refrain, 'his mercy endureth for ever' occurs as the latter half of every verse. Less readily recognized examples may be found in 39^{4, 11} 'Surely every man is vanity'; 56^{4, 10} 'In God will I praise his word'; 57^{4, 11} 'Be thou exalted, O God, above the heavens'; 62^{1, 9} 'My soul, wait thou only upon God'; 99^{4, 9} 'Exalt the Lord our God, for he is holy.' In some of these cases, however, the repetition of a phrase is rather the indication of a style which meets us markedly in the Songs of Ascents, than the occurrence of a refrain such as marks the close of a strophe. Frequently it is clear that a psalm naturally divides itself into sections, where no refrain or poetical device marks the several pauses. The first three psalms would sufficiently illustrate this, particularly the second, in which the arrangement of vv. 1-3, 4-6, 7-9, 10-12 commends itself at once. Driver holds that in many cases these sections

^{*} Slightly modified in *Study of Holy Script*. (1899) p. 360f.

are 'to be regarded as logical rather than poetical units, and as not properly deserving—even in its modified sense—the name of strophes.' The construction of Heb. poetry, however, is such that it is always more or less difficult to make the distinction between thought and form; and as the length of line depends largely upon the movement of thought, so also with the length of what in prose would be called a section, but in the irregularly but rhythmically constructed poetry of Israel, may be called a strophe or a stanza. See, further, art. POETRY, p. 7 ff.

Several psalms are *acrostic*, or alphabetical, in their arrangement. Sometimes successive verses begin with the letters of the Heb. alphabet in order; sometimes half-verses, or pairs of verses, are thus marked, and in the 119th psalm eight verses are found to each letter. In Ps 9-10 we find two verses to a letter, but the scheme is not complete. In 9th p takes the place of c, Ps 10 begins with b, and the last four pairs of verses close with p, r, s, n, the intervening verses not being arranged alphabetically, though their number exactly corresponds with the number of letters passed over. In Ps 25 one verse is found to each letter, though i is missing, and an extra verse is added at the end. In Ps 37 two verses occur to each letter (with slight irregularity), in 111 and 112 half a verse. In 34 and 145 the single-verse arrangement is found, with slight irregularities, which may be accounted for by a corruption of text. It might be supposed that so artificial an arrangement of matter would form a sure sign of late date, of a 'silver age' and fading poetic power, but this hardly appears to be the case. One of the most elaborate and complete instances is found in the 'Lamentations,' which is considerably earlier than many of the psalms. In Latin poetry the acrostic arrangement is found in early times (see Cicero's reference to Ennius, quoted by Delitzsch, i. 204); and Hitzig, who allows only fourteen Davidic psalms, includes 9 and 10 amongst them. The alphabetical psalms do not, as a rule, exhibit much poetic fire or vigour in comparison with psalms which are strictly lyrical in character. But this may be due to the subject and the mode of treatment adopted, for single phrases in the 119th psalm might easily be quoted which are full of imaginative fervour and power. If we cannot say with Delitzsch that the acrostic arrangement is 'full of meaning in itself,' it may be admitted with Driver that it was 'sometimes adopted by poets as an artificial principle of arrangement, when the subject was one of a general character, that did not lend itself readily to logical development.'

It is needless to say, however, that it is not in their form and construction that we find the true poetry of the psalms, though this is of such a character as to aid in securing for them the universality which is one of their chief features. The form of Heb. poetry bears rendering into other languages better than the poetical literature of any other nation. But the poetry of the psalms does not lie in their artistic form. The word 'artistic,' indeed, is out of place here. Artifice hides itself abashed in the presence of deep religious feeling. It is not merely that the predominating tone and spirit of the book is religious; religion has laid its strong uplifting hand upon every string of the psalmist's harp, every touch of the psalmist's fingers. The literary characteristics which charm us in the great poets of the world are indeed present. Lofty imagination marks some of the descriptions—'Who coverest thyself with light as with a garment, who stretchest out the heavens like a curtain.' 'He rode upon a cherub and did fly; yea, he did fly upon the wings

of the wind.' Fancy appears in slighter touches, often unnoticed—'In Salem is his leafy covert, and his (rocky) lair in Zion.' The varied metaphors of the psalms have furnished religious life with brightness and picturesque variety for more than two thousand years. The terebinth planted by the streams, the hind panting for the water-brooks, the sun going out like a bridegroom from his chamber, the Divine Shepherd tending His flock alike in the pleasant pasture and the lonely and gloomy ravine,—these familiar images are not more striking than the thousand less noticed pictures, sketched in outline only: the crowned and anointed guest at the banquet of life spread in the very wilderness amongst foes; the harassed and overthrown forces of the enemy scattered over hillside and plain, like the ten thousand flakes 'when it snoweth in Zalmon'; or Death the shepherd herding among his flock in Sheol those who had arrogantly defied his power—yet the psalmist knows of a mightier Shepherd still, who shall 'redeem my soul from the power of Sheol, for he will receive me.' Some of the poetical effect is doubtless peculiar to the Hebrew, the picturesqueness of some of the words, and occasionally the variety of its synonyms, or the play of tenses, alternating one with another, like lights and shadows upon the hillside, or the changing colours upon the burnished neck of the dove. But the simplicity of diction which imparts such sublimity to a phrase—'with thee is the well-spring of life: in thy light we shall see light'; the depth of human feeling which can be felt like a beating pulse on every page—'Fervently do I love thee, J', my strength!—'Deep calleth unto deep at the noise of thy cataracts; all thy waves and billows are gone over me'; the concrete directness with which the most abstract truths of religion are set forth—'In the hand of J' there is a cup, and the wine foameth; surely the dregs thereof, all the wicked of the earth shall drain them out and drink them';—'He shall cover thee with his pinions, and under his wings shalt thou take refuge'; these words appeal to the heart of the world, and their power is as great for the Englishman as for the Israelite. But the reason for this is not chiefly, though it is partly to be found in these poetical characteristics. The Psalter lives in virtue of its unique religious power and beauty, and on its theology something must now be said.

vi. RELIGIOUS AND ETHICAL IDEAS.—In the following paragraphs the Psalter will be treated as one whole. Owing to the uncertainty which attaches to the dates of the several psalms, it is impossible to trace out, according to the methods of biblical theology, the growth and development of religious ideas in the psalmists' minds, if, indeed, any marked growth took place. If the book is entirely post-exilic, the 'hymn-book of the second temple,' no decided theological development—except, perhaps, on the subject of the future life—would be expected. If, as we have seen reason to believe, the Psalter contains an anthology of sacred lyrics, extending over many centuries, a progress of thought might be looked for. But the method of the psalmist is not dialectic. He moves, not in the atmosphere of theology, but of religion. And whilst creeds change, litanies remain the same. It would be going too far to say that no variety, no advancement, in moral and religious ideas is discernible, but for the purposes of this brief examination it may be neglected. The Psalter is concerned with the deep, elemental ideas of religion—God, man, and the communion of man with God; joy and trouble, hope and fear, good and evil, their present conflict and future destiny; the human soul in all its moods and the Divine power and grace in all its aspects,—and it is proposed to de-

scribe a few characteristics only of the way in which these great themes are treated.

1. The leading feature in the doctrine of God—to speak theologically—which distinguishes the psalms is the clearness with which the Divine Personality is conceived, and the vividness with which it is depicted. 'J' liveth, and blessed be my Rock' is written on the book, within and without. The chief service which the psalms have rendered to the religion of the world is the preservation of the idea of the living God, without any impairing of His absolute and inconceivable glory. The thinker elaborates his abstract conceptions of the Divine till they dissolve into thin air; the boor imagines 'such a one as himself,' and lowers the Godhead into a 'magnified and non-natural' manhood. Isaac Taylor says that 'metaphysic theologians, except so far as they take up the very terms and figures of the Heb. Scriptures, have hitherto shown a properly religious aspect in proportion as they have been unintelligible; when intelligible they become—if not atheistic, yet tending in that direction.' No sacred book of any nation has solved this fundamental problem of all religion, how to preserve at the same time the Infinity and the Personality of God, as has the Psalter.

The psalmist is not afraid of 'anthropomorphisms.' He not only employs forms of speech which seem almost necessary, such as 'his eyes behold, his eyelids try, the children of men,' but he represents God as thinking upon man, so that the Divine thoughts are greater in number than the sand; as seated in the heavens with earth for His footstool, as bowing the heavens to come down, whether for judgment or deliverance; as spreading His broad wings of defence over His own people, scattering dismay and destruction among their enemies, and returning again on high in triumph, when He has 'led into captivity his captives,' bringing with Him the spoils of victory. But no reader of the psalms finds his ideas of Divine majesty lowered, or the Divine glory dimmed and shadowed, by these modes of speech. The Rabbi disdains them, the Alexandrian philosopher explains them away, the hypercritic finds only 'mythology' in them; the wise and devout man knows that nowhere else—except in the words of Jesus of Nazareth—is he brought so directly into the presence of the living God, as inexpressibly lofty and pure as He is near and gracious and tender.

The 'attributes' of God are not described in the psalms, but God in His varied attributes is made known as in the mirror of the worshipper's soul. Righteousness is pre-eminent, but it is blended with mercy, as if the pious heart had never conceived of the two asunder. 'J', thy loving-kindness reacheth unto the heavens, thy faithfulness unto the clouds. Thy righteousness standeth like the mountains of God; thy judgments are a great deep. How precious is thy loving-kindness! (Ps 36). Loving-kindness is shown, according to the psalmist's view, by God's rendering to every man according to his work (62¹²); yet it is an equally true explanation of the same $\pi\pi$ to define it as 'salvation,' or expand it into the clause 'J' hath dealt bountifully with me' (134⁶). One of the most striking illustrations of the features upon which we have been dwelling is the attributing to the Most High God of $\pi\pi\pi$ 'humility.' The English word is a bold one to employ in this connexion, but it better expresses the psalmist's thought than 'condescension.' It is found but once, in 18³³ 'thy lowliness hath made me great,' but the same quality is dwelt upon in God's humbling Himself to regard the heavens and the earth, and it is not far removed from that yearning 'pity' with which the Father God pities His children. The

word 'sympathy' is not found in the Psalter, but that for which the word stands sheds rays across the gloom of dirge-like psalms (39 and 88), and shines like a radiant sun in the glow of such psalms as 27. 40. 103, and 146. And the marvel is that He who bends so low to lift the downcast, the degraded, and the sinner, is He whose 'kingdom ruleth over all,' and for whom the whole Psalter, as well as the 99th psalm, provides the refrain, *Holy is He*.

2. The manifestation of God in nature—to use a modern phrase—is not, properly speaking, a theme of the psalms. The nature-psalms are well known: the 8th and 19th, the 29th and 93rd, the 65th and 104th have taught mankind many lessons. But the pictures of nature come in by the way. For the psalmist, nature is not so much a revelation, as the frame of a picture which contains one. Occasionally the eye wanders to the frame and dwells upon it, but it is only in passing. The picture itself is concerned with the human soul and its relation to the living God. And if the psalms are a wonder of literature because of the unique picture of God which they present, in contrast with the highest conceptions of which man thus far had shown himself capable, no less remarkable is their portraiture of man. The Heb. psalmist might seem to be a child by the side of the Hindu sage and the Greek philosopher, but neither of these could sound the human heart as he has done. The complexities, the inconsistencies, the paradoxical contradictions which characterize human life are all here. 'What is man that thou art mindful of him, or the son of man that thou visitest him?' The littleness and the greatness of man are there, in a line; discerned, almost unconsciously to himself, by the poet, because his eye was fixed, not on man but on God. The first and last verses of the 8th psalm give the keynote to its music, and that of the whole Psalter, and man falls into his place, so small in himself, so great in his relation to God. 'Nothing is more easy than to take a high view of human nature, *alone*, or a low view, *alone*; there are facts and appearances in abundance to account for and justify either. But the view of the Psalms combines them; man's littleness and insignificance, in relation to the immense universe about him, and to its infinite and everlasting God; man's littleness in his relation to time, to his own short passage between its vast before and after, his feebleness, his misery, his sin: on the other side, man's greatness, as the consummate work of God's hands, thought worthy of His care, His choice, His provident and watchful regard; man's greatness and responsibility, as capable of knowing God and loving Him, of winning His blessing and perishing under His judgment; man's greatness even as a sinner able to sink so low, and yet to rise by repentance out of the deepest degradation and most hopeless ruin' (R. W. Church).

3. There may at first sight appear to be an inconsistency between the language of various psalms on the subject of sin. The deepest contrition is portrayed in the 32nd and 51st; the utmost confidence, sounding perilously like self-righteousness, in the 7th, 18th, and 101st. It may be thought that here is a mark of varying date, Israel's sense of sin deepening as history advanced; or that the contrast is between the language of men of different temperaments, or the same man in different moods. But the inconsistency is only apparent. The assertion of integrity is relative, not absolute. It is that of the *hasid*, the 'godly' man, who is determined to keep well within the bounds of the covenant which is the charter of national religion, or is conscious of having done so. The same man may bow low in humility before God and confess

his sins; just as the nation—for in the opinion of many the 'church-nation' is the speaker in the 'I' of the psalms—may at one moment plead the sacredness of the bond which binds it to J, and at another deplore its own unfaithfulness to covenant-vows.

That the ethical view of the psalmist was limited is unquestionable; he was the child of his own age. Ethics was as yet too little personal, and the individual sense of wrong-doing was, for the most part, neither deep nor poignant. The life of the community—for better, for worse—was more important; and it is no easy matter sometimes to distinguish between the passages in which the psalmist speaks in his own name and those in which his personality is merged in the national life. The tendency of modern criticism is to minimize the personal element in the Psalms (see Smend, 'Ueber das Ich der Psalmen' in *ZATW*, 1888, pp. 49-147; and Cheyne, who says in *Origin of Ps.* p. 265: 'In the psalmists, as such, the individual consciousness was all but lost in the corporate—the Psalter is a monument of church-consciousness'; and notes, pp. 276, 277). It is not necessary to recoil to the other extreme in reaction against the excessive individualism of some schools of interpreters. There are psalms in which the personal note is unquestionable (3. 4. 6. 18. 27, etc.). Others, again, are as clearly national (44. 46. 76); whilst in others the references to trouble or to joy may be such that they might apply equally well to personal or to national experience (31. 86. 118); or the psalm written by an individual for himself might be used in worship by the community. Eminent modern critics (W. R. Smith, Driver, Cheyne) are content to understand the 51st psalm 'as a prayer for the restoration and sanctification of Israel in the mouth of a prophet of the Exile.' But such a view not merely runs counter to traditional exegesis, but appears to many, including the present writer, to fail to do justice to the language of such a psalm. Deep sense of sin and contrition on account of it, though not very frequently expressed in the psalms, forms an essential part of the religious life therein depicted. Some of the 'penitential' psalms, so-called, may refer to trouble rather than transgression, but the psalmist's religion cannot be understood if it be resolved into a sense of national humiliation and distress.

4. This is confirmed by the closeness of personal communion with God, which is the characteristic privilege of the devout soul in these poems, and the means by which that fellowship is to be restored, when it has been lost or impaired. The joy is spiritual when the avenue of communion is open; the sorrow is spiritual when that avenue is closed and darkened; the means by which the soul may meet again with its God are spiritual also. The Israelite is a member of a community in which sacrifice is a recognized institution; he does not disparage it, but if he has learned the lessons it has to teach, he knows that alone it is not sufficient. The well-known expressions of the 40th, the 50th, the 51st psalms—'Thou desirest not sacrifice, else would I give it'; 'Would I eat the flesh of bulls or drink the blood of goats?'—do not stand alone. There is no inconsistency between these psalms and 'I will go into thy house with burnt-offerings, I will offer bullocks with goats,' in the 66th. The 51st psalm, as it now stands, contains a recognition of ceremonial sacrifices in vv. 18, 20, and even if these are not by the same author as v. 17, 'the sacrifices of God are a broken spirit,' the same temple-congregation could chant both alike without thought of contradiction. But the spiritual note is the deeper and the more characteristic. The psalmist has learned in the school

of the prophet rather than of the priest, his plea is God's mercy, his hope for that sense of personal intercourse which can be enjoyed only when Divine forgiveness has removed the sense of personal sin. The heaviness and pain before confession (32^d. 40th) is as deep as his assurance of the readiness of God to forgive is complete and his joy when forgiven rapturous (40th. 103^d-13). The 130th is not the only 'Pauline' psalm, and if its language and that of other psalms expresses the contrition of a community, it can only be said that the mourners for sin of all ages, in the most spiritual religion the world has ever known, have found no language more appropriate to express their penitential sorrow and the rapturous joy of forgiveness than is to be found in the psalms.

5. Another characteristic of the 'lower level of morality' which is said to mark the psalms is found in the particularism which belongs to many of them. The national confidence in J has a reverse side which is not always admirable. The tone which the psalmists, like the prophets, adopt towards other nations than Israel, varies. Sometimes they are simply marked out for judgment and punishment (Ps 2. 9. 68). Sometimes, though more rarely, they are represented as in some sense gathered in within the pale now occupied by Israel alone (Ps 22. 67. 87). Sometimes bitter resentment is expressed which sounds personal rather than national—the expression of fierce joy over the destruction of hated enemies, rather than the grave anticipation of righteous judgment upon evil. The *Imprecatory* psalms are better understood than they once were. Those who read into them a coarse vindictiveness are now seen to be no less wide of the mark than those who in a mistaken zeal contended that all the utterances of godly men in an inspired Bible must be justifiable by the highest standard. But the solution of a moral difficulty is not found in a timid compromise between extremes. The strong language of Ps 7. 35. 69. 109 and some others is not to be blamed as an exhibition of a personally revengeful spirit. The law condemns this as well as the gospel; and in the psalm which contains the strongest language, the writer disclaims such culpable resentment (109th). The psalmist, as a member of a covenant-keeping community, was at liberty to identify himself with the friends of God and to count those who opposed him as God's enemies also (139th. 23). Not always does he specify the ground of his anger and prayers for their destruction, as in Ps 83, 'Against thee do they make a covenant . . . O my God, make them like whirling dust, as stubble before the wind'; but it is legitimate, in at least the majority of passages, to read in that thought when unexpressed. The psalmist would be simply unable to take the purely individualistic standpoint of modern times, which makes language such as we find in the 35th psalm for us unnatural and wrong.

It does not therefore follow that the spirit of the imprecatory psalms is justifiable by the standard of the NT. It may indeed be well to consider whether the OT saints, in the vigour and simplicity of their piety, did not cherish a righteous resentment against evil which the more facile and languid moral sense of later generations would have done well to preserve. 'O ye that love J, hate evil,' is an exhortation that belongs, not to one age, but to all time. But the point in question is the relation, not to evil deeds, but to evil men. And here it must be clearly recognized that the moral level of the old dispensation is necessarily lower than that of the new. The Christian does not stand in relation to the world as the Jew did to the nations around him. The blessings of the New Covenant are not material as were many of the blessings promised under the Old; and the curses which are

pronounced on those who refuse to inherit a blessing differ correspondingly. The prospect of a future life—to take one point only—alters the whole question of retribution and destiny. Without any spirit of Pharisaism or consciousness of superior virtue—which would be grossly out of place—the Christian cannot use the language of the imprecatory psalms as it stands, but interprets it in its spirit by reserving his wrath for the evil in himself and others, and striving to blend with it something of his Saviour's yearning compassion for the evil-doer.

6. The problems of life opened up by the question of evil do not figure largely in the psalms. The suffering of the righteous, the apparent impunity of the wicked, do not often disturb the psalmist's mind. The moods expressed are those of thankfulness for mercies bestowed, sorrow in trouble, present or impending, prayer for deliverance, help, and guidance, not the anxiety of doubt or the half-bitter, half-eager cry of the seeker after truth who would believe, but cannot. The spiritual wrestlings of Job and the incredulous scepticism of Koheleth in his darker hours hardly find any echo in the Psalter. The psalmist's mental exercises are described as mere transient moods, trying enough while they lasted, but not seriously affecting the foundations of his faith. The 73rd and the 77th psalms are the chief examples of this. The 38th, 88th, and other sorrowful psalms describe trouble of outward life and of inward spirit, but not such as arises from intellectual doubt or the undermining of faith in God. It is interesting to notice the way in which relief comes, when the question has once been raised as to whether the ways of Providence are equal and success precisely proportioned to character. In the 77th psalm the righteous man, who appeared to be forgotten and forsaken by God, falls back upon history, and recalls the deliverances wrought out for God's chosen people in the past. He rebukes, therefore, himself for his 'infirmity,' and renews his confidence in the 'right hand of the Most High.' Here there is no examination of the 'problem' at all as such; the theory that God rewards the righteous and punishes the wicked, which is so fiercely assailed in Job, is never questioned here. The writer of the 73rd psalm goes deeper. His perplexity arises rather from the prosperity of the wicked than the suffering of the righteous, but the problem in both cases is the same. His conclusion is emphatically announced at the beginning. 'Surely (אֵל), God is good to Israel and to men of clean heart.' The mode of deliverance is described in vv. 15-17. In the sanctuary light came. But it came chiefly in the form of an emphatic re-statement of the prevailing theory of Providence. The wicked will be punished, all the more overwhelmingly because of delay in judgment. This psalmist holds with the writer of Ps 92 that only the dull and foolish fail to understand that if the workers of iniquity flourish, it is that they shall be destroyed for ever.

Another kind of solution may seem to be suggested by vv. 23-25. The psalmist finds his own portion in the presence and favour of God, and this is so strongly expressed that it might seem as if he had attained, by a sublime reach of faith, the doctrine of immortality. A similar conclusion is suggested by Ps 16, in which the same line of thought and religious experience is followed. Ps 17¹⁵ and 49¹⁵ are also held to express in briefer phrase the expectation that the righteous will enjoy life in the presence of God beyond the grave. It is certain that this was not the prevailing view of the writers of the psalms. The whole cast of these devout utterances would have been altered if any such expectation had formed a part of their

working creed. The strain of the 6th, 30th, 39th, and 88th psalms is not the language of a passing mood. 'In death there is no remembrance of thee; in Sheol who shall give thee thanks?' The 'dust' cannot praise God; in the 'grave,' in 'darkness,' in 'Abaddon,' in the 'land of forgetfulness,' God cannot be praised, because He cannot be known by 'shades,' men who have passed away from the happy light of life. The evidence of silence is equally strong, though not so readily noticed. A blank is found in the creed of the psalmists, as of the OT writers generally, when life beyond the grave is in question. The exceptions in the psalms above referred to do not invalidate the rule. Translated with severe accuracy and closely restricted to their exact declarations, the passages 73²³ 17¹⁵ and 49¹⁵ do not prove any clear anticipation of a future life. It may be otherwise with 16¹¹, but the more satisfactory way of treating all these passages is to consider them together. Thus handled, they show us the path by which the faithful servant of God was travelling upwards from amidst the twilight of a dispensation in which was no clear revelation of a future life. He could not believe that the pit of corruption or the shadowy half-existence of Sheol was to be the end of all for the friend of God. One who had set J^h always before him, and desired none in heaven or earth in comparison with his God, could not be left in darkness and forgetfulness, it must be that he should behold God's face in righteousness and be satisfied with His likeness. One who had God for his portion must have Him for ever. God was *his* God, and the psalmist anticipated the reasoning of the Saviour, 'He is not the God of the dead, but of the living.' Nevertheless, this was but a reach of faith. No revelation had been given, no doctrine could be taught, no complete assurance could be enjoyed. The hope was a bright, reassuring and not deceptive gleam of sunshine. But it was a gleam only. It was enjoyed for a moment and the clouds gathered in again. Not the clouds of denial or despair, but the impenetrable veil of vapour which hid from the saints of the Old Covenant God's will concerning the future. It does not follow that the psalmist's religion is of a low and feeble type because this element in it is for the most part missing. Its vigour is shown in the tenacity of his faith without the 'comfortable assurance' of later days. The Christian, for whom 'the resurrection of the dead and the life of the world to come' is an essential article of creed, may find a fuller meaning in the words of the psalmist than he himself dared to find in them, and wonder the more that he who knew so little believed so much and conquered in so hard a battle upon comparatively slender fare.

7. The hopes of the psalmists, like those of the prophets, were directed, not to a future life of the individual in heaven, but to the future of the community on earth. The subject of Messianic psalms can be adequately treated only in connexion with Messianic prophecy, of which they form a part. See under the articles MESSIAH and PROPHECY. The principles which should determine views of prophecy in general are here concerned, and they are better studied on the more extended field and in the more explicit utterances of the prophetic books. The psalms which have usually been termed (in a somewhat conventional sense) 'Messianic' are 2, 8, 16, 45, 72, 89, and 110. The list may vary slightly, but when it is examined it is inevitable that the questions should arise, Why include precisely these and no others? And what is meant by the term Messianic? For if mention of a personal king ruling on earth is essential, all these psalms cannot claim the title:

and if a larger sense of the term be intended, others have as good a right to be found in the list.

The older exegesis, which made the language of the Psalter generally, and of some psalms in particular, to be the language of Christ Himself, has for some time been discredited. Delitzsch, who may be taken to represent modern 'orthodox' scholarship, finds only one psalm, the 110th, directly Messianic in the sense that it contains prophecy immediately pointing to the person of a coming Anointed One, who was fully to set up God's kingdom on earth. All other references, as in the 2nd, 45th, and 72nd psalms, he understands primarily of Isr. monarchs, so that the words contain prophecy only in an indirect or typical sense. The tendency of criticism is to deny even this smaller measure of Messianic reference. 'All these psalms,' says Cheyne, referring chiefly to 2. 72, and 110, and in a lesser degree to some others, 'are only Messianic in a sense which is psychologically justifiable. They are, as I have shown, neither typically nor in the ordinary sense prophetically Messianic.' The 2nd and 110th psalms may claim the designation in the sense that 'the idealization of historical persons which they present presupposes the belief in an ideal Messianic monarchy, now or at some later time to be granted to Israel' (*Origin of Ps.* pp. 339, 340). That is, type and prophecy are alike excluded from the Psalter. The psalmists disregarded history, preferring to 'idealize'; their David is not the true David, their Moses is not the true Moses; and they had no right to find in the monarchs of their own time a type and pledge of future glory, and no power directly to prophesy concerning it. If this be so, the term 'Messianic' is hardly worth retaining, and its employment is likely to mislead.

Perhaps we may see in these views another instance of extreme reaction against a mistaken exegesis. The time when Ps 45th could be quoted as proof direct of the divinity of Christ has gone by. The hopes and prayers of Ps 72 are understood as hopes and prayers in which no direct vision of a King or Messiah was before the mind of the singer. It is even doubted by some of the most truly Christian interpreters whether 'the oracle of J^h unto my lord' in Ps 110th can mean that the speaker was the theocratic king, and his 'lord' a greater King yet to come. The 'Son' in Ps 2nd, if indeed that word occur at all in the obscure phrase נִסְכֵּיךְ (see art. KISS), is no longer understood as the Son of God incarnate, and the 'Son' who is unquestionably mentioned in v. 7 is not supposed to be Jesus of Nazareth. But it by no means follows that no psalms are either prophetically or typically Messianic. The exegesis which finds in Ps 45 an epithalamium for some monarch unknown, is bound to confess that here is no ordinary wedding-song, and that the writer of it had thoughts which soared not only far above the occasion, but far above those of most of his contemporaries. The beneficent prince of Ps 72 is not a Jehoshaphat or a Jeroboam with a halo round his head, unwarrantably placed there by a court-poet in a dream. In whatever way the details of Ps 110 be understood, the priest-king of no Aaronic type, who was to gather around him an army of youths, clad not in mail but in holy festal apparel, multitudinous and brilliant as the dewdrops born from the womb of the morning, is not a phantom of imagination, suggested by the idealization of Simon the Maccabee. But is it possible at the same time to preserve the limits of sober exegesis and to believe in the prophetic message of the Psalms? The evangelists and apostles held a view of the Psalter, which they so often quoted, that cannot be defended if neither by way of prophecy

nor of type is Christ contemplated in the Psalms at all.

A method of solving the difficulty is sometimes described as the theory of 'the double sense,' a phrase which seems to imply that the obvious meaning of the words as read refers to contemporary persons and events, whilst some deep-lying, mystical significance lies behind this, in which reference is made to Christ and the New Covenant. Now words can have but one meaning, though they may have not only a twofold but a manifold application. And it is not by a mystical sleight-of-hand, unintelligible to the plain reader, that a Messianic significance is to be found in the psalms. The first duty of the interpreter is to find the simple meaning of the words as they stand, as they were intended by the psalmist, and would be understood by his contemporaries. But the reason why this is not the end, as it is the beginning of exegesis of the psalms, is that the dispensation under which they were written did not stand alone, it was part of an organism, and the writers knew it. The Old Covenant proclaimed its own insufficiency, and pointed continually onwards. Consequently, when inspired writers handled certain themes, they did so in a way that would have been unintelligible but for this underlying consciousness. And often, when they were not themselves consciously glancing forwards, subsequent events shed a richer light upon their words, and enabled those who came after to make a much more complete and significant application of the words which they had spoken. When the glance of the psalmist fell directly upon the future culmination of the kingdom of God upon earth, his words are prophetically Messianic; when he was chiefly concerned with the present, but as part of an organism not yet completed, his words may be styled indirectly or typically Messianic. If the statement of Schultz be admitted, 'There is positively not one NT idea that cannot be shown to be a healthy and natural product of some OT germ, nor any truly OT idea which did not instinctively press towards its NT fulfilment' (*Old Test. Theol.* vol. i. p. 52, Eng. tr.)—a position which not many will care to dispute—the principles just laid down do but declare that in a growing plant the relation of the parts to the whole is best discerned in the maturity, not in the infancy of the growth. The seed is the prophecy of the plant, stem and buds and flowers, to those who know its nature. And the *ἡ ἀληθεύς* of NT means that the earlier stage existed in order that the later might reach its ripe and full-orbed development.

The question whether certain psalms are rather to be considered directly or indirectly Messianic is one for the exegete. It may, however, be admitted that the number of direct prophecies is, at most, very small, and it may well be that the Psalter contains hardly a single instance. For, though psalmists and prophets had much in common, there were important differences between them. The very attitude of the psalmist makes it unlikely that he will look directly into the future. The 2nd and 110th psalms are those which partake most of this character, and the 2nd psalm in almost any case, the 110th if the theocratic king is not the speaker but the person addressed, can be most easily understood as only typically Messianic. But the monarch of Israel was a real type, and could seldom or never be considered as the psalmist considered him, without reference to the substance of which he was but the shadow. Take the idea of 'sonship,' for example. The promise was made in 2 S 7 that the king should be a 'son' of God: which of them came near to realizing this? And the inspired bard of the Old Covenant uses words concerning the filial character and

promised triumphs of the chosen nation with their king at their head, which were never actually accomplished till He who was Son indeed was declared to be such by the resurrection from the dead, when it was said to Him, 'This day have I begotten thee.' This is no mere historical parallel, for the parallel is not obvious, but it is the full development of the plant which the psalmist spoke of in its germ and early growth. And such a psalm is truly Messianic.

But the name must not be confined to psalms in which there is specific mention of a coming personal king. This particular feature of the 'age to come' is not prominent in the Psalter, as it is in the Psalms of Solomon. The Messianic ideas of the OT are many. The kingdom is often spoken of, when there is no mention of the king. The Theophany or manifestation of the glory of J^h upon the earth is another form which the hope of Israel wore; and the good time coming is sometimes described as a new and better Covenant which was to take the place of the old. Sometimes this golden age of the future is described in its effect upon nature, the fields and streams and fruits of the earth; sometimes upon the nations, which either willingly or unwillingly, in submissive alliance or as conquered enemies, are to help to swell the triumph of Israel. Though in all this there may be no mention of a personal Redeemer or Ruler, such language is in a real, perhaps the best sense of the word, 'Messianic.' The psalms which tell of the coming of J^h to earth in beneficent judgment (96-98) are most truly a part of the Messianic prophecy. Christ Himself showed how unexpected lessons might be learned regarding His Person and work from the passage Ps 118²², and it is needless to adduce the frequent quotations of the 2nd, 16th, and 110th psalms which are found in the sermons and letters of the apostles. Doubtless the psalmists, like the prophets, were able but feebly to understand how their high vaticinations were to be accomplished. Often they had little idea that 'not unto themselves but unto us they did minister,' in their rapt flights of joyful hope. But not the less did they aid in throwing subtle but significant chains of spiritual connexion across from the earlier days to the later, from the Old Covenant to the New; they aided in the growth of that marvellous spiritual organism, the development of that kingdom of God, the full glory of which has not dawned upon the earth even yet: and it is not difficult for the devout Christian, with such thoughts in his mind, to be convinced that he cannot fully understand the Psalter, unless he hears the voice of one who explains 'how that all things must needs be fulfilled which are written in the law of Moses, and the prophets, and the psalms, concerning ME.'

The Psalms have sometimes been classified according to their subject-matter, but any such arrangement is open to obvious objections. The subdivisions necessarily overlap, and many psalms refuse to be classified. Hupfeld in his *Introduction* deals with this subject, and Bleek (6th ed. by Wellhausen, p. 467), also Driver, *LOT* p. 368 f. The analysis might run somewhat as follows: i. Songs of Praise to Jehovah; (a) as God of nature, Ps 8, 191-4, 29, 66, 104; (b) in relation to man, as God of Providence, 103, 107, 113, 145. ii. Didactic Psalms, on the moral government of the world, etc., Ps 1, 34, 37, 49, 73, 77; and of a more directly ethical character, 15, 241-6, 32, 40, 50. iii. National Psalms, including (a) prayers in disaster, e.g. 44, 60, 74, 79, 80, etc.; and (b) thanksgivings for deliverance, e.g. 46, 47, 48, 66, 68, 76, etc. iv. Purely historical Psalms, 73, 81, 105, 106, 114. v. Royal Psalms, 2, 18, 20, 21, 45, 72, 101, etc. vi. The more directly personal Psalms are of very various character: sometimes (a) they contain prayers for forgiveness or recovery from sickness, 3, 4, 6, 7, 22; sometimes (b) thanksgiving predominates, as in 30, 40, 116; or (c) the prevailing strain is one of faith or resignation, e.g. 16, 23, 27, 42, 121, 139; or the law is praised, as in 1, 197-14, 119, or the house of God, as in 84, 122, 132. Such a classification, however, can hardly be considered to be of use, except in a very general and superficial way.

vii. TEXT AND VERSIONS.—The Massoretic text
VOL. IV.—11

of the OT, it is now generally admitted, stands in need of frequent emendation. From the 7th cent. A.D. onwards, the Heb. text has been preserved with scrupulous fidelity, passing at times into extreme punctiliousness. But the early origin of this text is unknown, we possess no MSS earlier than the 10th cent. of our era, and the Massorettes represent for us only one line of textual transmission. The materials, however, for textual criticism are scanty. In the case of the NT, these are so abundant that conjectural emendation has little or no place in sound criticism. In the OT beyond the Massoretic notes, the only help is to be derived from the ancient versions. Hence scholars have been driven to adopt conjectures, more or less probable, in specially difficult passages; and as the science of textual criticism is still young, no sufficiently complete consensus of opinion has been arrived at with respect to the text in these cases.

As regards the Psalms, the chief ancient version to be consulted is, as elsewhere, the LXX. The Psalter is contained in cod. α , B (except Ps 105²⁷-137⁶), and A (except 49¹⁹-79¹⁰). The Greek tr. of the Psalms, though not equal to that of the Pent., is at least up to the general average of the LXX. In places it is quite at fault, but not so frequently as in the Prophets, and in some passages its help is valuable. The frequent difficulty of ascertaining the original reading of the Greek itself is one of the chief drawbacks to its critical use. The Targum of the Psalms is of uncertain date, since it embodies some early tradition, but in its present form cannot date earlier than the 7th or 8th cent. A.D. The Pesh. Syriac version (2nd cent.?), though in the main agreeing with the Heb., is often of service by the support which it gives to the LXX. The later Gr. VSS, so far as extant, are not of much critical value. Jerome's version of the Psalms is rendered from the Heb., while that retained in the Vulg., a representative of the Old Lat., was translated from the Greek. Jerome's renderings are sometimes of considerable value, and shed light on the history of the text, when they do not enable us to reconstruct it. The Eng. versions may be briefly mentioned, though their history is generally familiar. The Pr. Bk. version of the Psalms is taken from the Great Bible (first ed. 1539), which was a revision of Matthew's Bible, the Psalms in which was the work of Coverdale. Coverdale's tr. was made from the Zürich Bible and the Vulg., and accordingly in it the traces are to be found of LXX readings which have made their way through the Lat. into the Pr. Bk. version. The AV of 1611, which is far more accurate, did not displace the earlier version to which congregations had become accustomed, and which is undoubtedly better fitted for melodious chanting in public worship. The RV of 1885 represents a much nearer approach to accuracy of rendering, and is invaluable as an adjunct to AV, though it has not yet displaced it. Many of the renderings approved by modern scholarship are to be found not in the text, but in the margin, since a two-thirds majority of the Revisers was necessary to effect an alteration. A very useful work has been recently (1898) published by Driver, entitled the *Parallel Psalter*, in which the Pr. Bk. version is given on one page, with a new version by Dr. Driver himself opposite. The book contains a valuable Introduction and Glossaries. The Camb. Univ. Press published in 1899 *The Book of Psalms, containing the Pr. Bk. version, the AV, and the RV, in parallel columns*. The metrical versions of the Psalms in English alone are exceedingly numerous, but neither Milton, nor Keble, nor less known poets who have attempted metrical renderings, can be said to have attained any great success.

It is beyond the scope of this article to illustrate the need of textual criticism in detail, or its prob-

able effects. But the following are a few examples of familiar passages in which corruption is probable or has been suspected. Ps 2¹², where the word נָר with the meaning 'son' is not Hebrew. None of the ancient VSS adopt this rendering, and Jerome translates 'Adorate pure.' In Ps 8² the word נָר can hardly be the correct reading. In 22¹⁶ the Heb. reads כָּאֵר, which means 'like a lion'; the rendering 'pierced' is a tr. of נָר; so the LXX, Vulg. and Syriac. Symm., as now appears, followed the MT. Sometimes a gloss may have crept into the text, as in 49¹⁴, where the clause 'the upright shall have dominion over them in the morning' reads like a later insertion. In Ps 48¹⁴ עֵלֵינוּ is untranslatable as it stands. In 55¹⁰ and 77¹⁰ there is an abruptness in the existing text which points to a probable error. Ps 68 abounds in difficult passages, some of which may be due to textual corruption. The opening of Ps 87 is so abrupt that it is thought mutilation must have taken place, or that our psalm is only a fragment. The irregularities in some of the acrostics (e.g. Ps 37) are probably due not to the author, but to confusion in transcription or transmission. The present form of some of the musical notes in the titles is not improbably due to the ignorance of scribes, who blundered in the transmission of archaic and unfamiliar words.

It is not intended to assume that in all of these cases corruption has certainly occurred, or to adduce them as more than a few salient illustrations of a large and difficult subject. So long as external evidence remains as scanty as at present, the uncertainty which proverbially attends all attempts of 'subjective' criticism, proposing conjectural emendations, must be expected to continue.

viii. The LITERATURE of the subject is portentously large. Even excluding the mass of devotional commentaries and annotations, and limiting attention to exegetical and critical literature only, a detailed history of exposition would run to very great length. The following selection from the works on the Psalms, which the piety and learning of centuries have accumulated, may be of some service. A section of Delitzsch's Introduction is devoted to the subject (vol. i. p. 64, Eng. tr. by Eaton). Amongst the Fathers, the most important commentaries are those of Athanasius, Gregory of Nyssa, Ambrose, Jerome, and esp. Chrysostom and Augustine. Ignorance of Hebrew on the part of nearly all the early Fathers of the Church, and their un-critical and un-historical methods of exegesis, mar the effect of their devout and often spiritually instructive comments. In the Middle Ages, the Jewish exegetes are more important than the Christian. Amongst these may be named Rashi (11th cent.), Ibn Ezra (12th cent.), and David Kimchi (13th cent.); other later Jewish writers were used by the scholars who helped to prepare the way for the Reformation of the 16th cent. At the time of the Reformation, says Delitzsch, the rose-garden of the Psalter also began to diffuse its odour as in the renewed freshness of a May morning.' The Psalms formed the hymn-book of the Reformed Churches, and it is matter of history how largely the cause of the Reformers was advanced by the hymns of Luther and the tr. of Marot (1543) and Beza (1562). Luther's notes on some of the psalms (*Operationes*) exhibit his evangelical insight and spiritual power, but Calvin's *Commentary* (1557) is more complete as well as more sound and masterly, and may still be consulted with great advantage. In more modern times, Rosenmüller's *Scholia* (1798-1804), though only a compilation, rendered excellent service at the time of their publication, and amongst the works of the last half-century the following may be mentioned:—de Wette (1811-50); Hitzig (1863-65); Olshausen in *Kurzgef. Ezeg. Handbuch* (1853); Hengstenberg (1847, 1852); Hupfeld (1855-62, 2nd ed. by Riehm, 1867-71, 3rd by Nowack, 1888); Ewald, *Dichter d. AB* (1839, 1866); Delitzsch (5th ed. 1894); Moll in Lange's *Bibelwerk* (1869-71); Reuss (2nd ed. 1890); Grätz, *Krit. Komm.* (1882); Schultz in *Strack's Komm.* (1888, 2nd ed. by Kessler, 1899); Baethgen in Nowack's *Hand-Komm.* (1892); Duhm in Marti's *Kurzer Hand-Commentar* (1899). Ewald, Delitzsch, and Moll have been translated into English. Amongst recent Eng. commentators may be mentioned Perowne (6th ed. 1866); Jennings and Lowe, *The Psalms with Critical Notes* (1884); Cheyne, *The Book of Psalms* (1888), and *The Origin of the Psalter*, Bampton Lectures (1891); De Witt (1891); Maclaren in *Expositor's Bible* (1890-92), and Kirkpatrick in *Cambr. Bible* (1893-95). The sections on the Psalms in the several Introductions to OT should not be neglected. The following may be named as representative: Wellhausen-Bleek (6th ed. 1893); Riehm (ed. Brandt, 1889), Driver (6th ed. 1897), Cornill (3rd and 4th ed. 1890); Strack (5th ed. 1893), König (1893), Wildeboer (*Litt. d. AT*, 1897). Neale and Littledale have collected in 4 vols. (1890-74) Notes from

the primitive and mediæval writers; and Spurgeon in his *Treasury of David* has made a similar compilation, chiefly from the Puritans (1870-83). Other books of interest are: Fausset, *Horæ Psalmicae* (1885); Forbes, *Structural Connexion of Psalms* (1888); Binnie, *The Psalms, their Origin, Teaching, and Use* (1886); Alexander, *Witness of Psalms to Christ*, Bampton Lect. (3rd ed. 1890); E. G. King, *The Psalms in Three Collections*, pt. i. 1898; Cheyne, *The Christian Use of the Psalms*, 1890. Amongst separate articles besides Smend's in *ZATW*, 1888 (see above, p. 160*), or monographs are Baethgen's in *SK*, 1880; Giesebrecht in *ZATW*, 1881; G. Beer has written on *Individual- u. Gemeindep salmen* (1894); A. Rahlfs, *ני וני in den Psalmen*, 1892; Stade, 'Die messian. Hoffnung im Psalter' in *Ztschr. f. Theol. u. Kirche*, 1892, p. 369 ff.; Coblenz, *Ueber das betende Ich in den Psalmen*, 1897; B. Jacob, 'Beiträge zu einer Einl. in die Psalmen' in *ZATW*, 1896-97; Wellhausen, 'Bemerkungen zu den Psalmen' in *Skizzen u. Vorarbeiten*, vi. (1899) 163-187; W. T. Davison, *The Praises of Israel* (1893), enlarged ed. 1896.

Of critical editions of the Heb. text of the Psalms may be mentioned that in the Baer-Delitzsch series (Leipzig, 1880), and that of Wellhausen in Haupt's *SBOT* (1895; Eng. tr. of this text by Furness in *PB*). The Camb. Univ. Press has published separately, *The Psalms in Greek* from vol. iii. of Swete's *OT in Greek*.

W. T. DAVISON.

PSALMS OF SOLOMON.—This name was given at an uncertain date (certainly before the 5th, perhaps before the 2nd cent.) to a collection of 18 psalms dating from 1st cent. B.C., and extant in a Greek version of a Hebrew original.

i. NAME.—The name of Solomon is not, seemingly, attached to these psalms for any very definite reason. They themselves make no pretence to Solomonic authorship. Unless the real author's name was Solomon, which is possible, the most likely explanation is that it seemed a natural and obvious name to attach to a collection of psalms which was circulating anonymously. That the book owes its preservation to the selection of this name may be regarded as certain.

ii. MANUSCRIPTS.—It is preserved in eight MSS, uniformly in company with the other sapiential books (Pr, Ec, Ca, Wis, Sir). These eight MSS are—(1) R (Vatican, Gr. 336); (2) H (Copenhagen, Gr. 6); (3) M (Moscow Synod, Gr. N. 147); (4) P (Paris, Gr. 2991 A); (5) V (Vienna, Gr. Theol. 7); (6, 7) at Mt. Athos; (8) in the *Bibliotheca Casanatensis* at Rome. None of them is older than the 10th cent. It was formerly contained in the Codex Alexandrinus (A. of 5th cent.). There are no ancient versions in other languages.

iii. HISTORY.—There is no single clear Patristic quotation from the book as we have it. The Book of Baruch has a section (4³⁶⁻⁵) which is derived in large part from one of these psalms (No. 11), but naturally without acknowledgment. The Gnostic book *Pistis Sophia* and the 4th cent. Latin writer Lactantius both quote certain odes of Solomon, which were very probably an appendix to our book, of Christian origin; but the 18 Greek psalms are nowhere cited. Mention of the book occurs only in lists of apocryphal writings, and in two Byzantine writers of the 12th cent., John Zonaras and Theodore Balsamon. David Hoerschel, librarian at Augsburg, was the first modern who called attention to the book, and it was first printed after his death, in 1626, by the Jesuit de la Cerda in his *Adversaria Sacra*. There have been many editions since. The best text, for the formation of which all the known eight MSS have been used, is that of O. von Gebhardt in *Texte u. Unters.* (1895): text only. The Cambridge University Press has issued a text (1899) based upon Cod. R, with the variants of all the MSS used by Gebhardt. The fullest English edition is that of Ryle and James (1891), containing text, translation, introduction, and notes.

iv. DATE, CHARACTER, etc.—It is agreed by the large majority of modern scholars that these psalms belong to the period of Pompey's invasion of Palestine and siege of Jerusalem (B.C. 63). The second psalm describes his death in unmistakable terms.

It is also commonly agreed that the psalms were written (1) in Palestine, (2) in the Hebrew language, (3) by a Pharisee. The first of these three points is assumed on grounds of general probability, supported by the subjects of the psalms, and the fact that they seem intended for synagogal use. The second depends on a large number of linguistic peculiarities, and is demonstrated by the existence of a number of passages which can be best explained as mistranslations of a Hebrew text. In favour of the third the following reasons may be urged:—There is a strong polemic element in the psalms; many invectives are directed against a party who are called *sinners* (*ἁμαρτωλοί*) or *transgressors* (*παράνομοι*), while the party to which the psalmist belongs are the *righteous* (*δίκαιοι*) or *holy* (*ἅγιοι*). The party of the sinners is in power, and has usurped David's throne and the priesthood. The holy things are polluted, and secret enormities are prevalent. The party of the sinners is also rich and prosperous, while the *saints* are for the most part poor.

All these points are strikingly appropriate to the Hasmonæan rule in its latter days, and to the Sadducean party. On the other hand, the distinctive Pharisaic doctrines and aspirations are maintained and cherished by the psalmist. The ideal of a theocracy, the hope of a Messiah, the expectation of a retribution, and the views expressed about free will, are all of them just such as the Pharisees are known to have held.

v. CONTENTS OF THE PSALMS.—

- Ps 1. Deals shortly with sin and punishment of Jerusalem.
2. The siege of Jerusalem; the sins which led to it; the death of the besieger; the justice of God.
3. A contrast between the righteous and the sinner.
4. A description and denunciation of the 'men-pleasers' (*ἀνθρωπάρεσκοι*).
5. God's mercy to the righteous.
6. The fearlessness of the righteous.
7. A prayer for God's chastening.
8. The sins of Israel, and their punishment: a prayer for restoration.
9. God's justice and man's free will.
10. The blessedness of affliction.
11. The restoration of Israel. This psalm coincides largely with Baruch 5, which seems to be derived from it.
12. The deceitful tongue: its deeds and its punishment.
13. The preservation of the righteous and the destruction of the sinner.
14. God's faithfulness to the righteous; the sinner's insecurity.
15. The deliverance of the righteous; the sinner's fall.
16. Confession of sin; praise for deliverance; and prayer for future guidance.
17. The kingship of God; the overthrow of David's throne; the kingdom of the Messiah.
18. God's love to Israel; anticipations of Messiah's rule; praise of God as the Lord of the heavens. This last portion ends abruptly, and seems not connected with the rest of the psalm. It may possibly be a fragment of a 19th psalm.

The most important of these psalms are 2. 4. 8. 11. 17. 18.

vi. MESSIANIC TEACHING.—The Messiah of these psalms is figured as a king of the seed of David, who is to appear in God's good time to drive out the Romans (*Gentiles*) and Sadducees (*sinners*), to restore the dispersed tribes and renew the glories of Jerusalem and its temple, and subdue and convert

the Gentiles. He will reign in holiness and justice, not by force of arms. He is anointed (*χριστός*) king and priest, but he is not divine.

The new features in this description are mainly two. (1) Messiah is a person. Excluding Dn 7 as of disputed interpretation, we have this point plainly stated for the first time in the literature of Palestine. The oldest portion of *Sib. Orac.*, which comes from Egypt, has a somewhat similar description of a coming king (iii. 652 ff.). (2) The epithet *χριστός* is here first applied to him.

We may see in this presentation of Messiah a result of the brilliant victories of the Maccabees, which had reawakened in the popular mind the hope of a Jewish monarchy. But this is only part of the truth.

A designation of Messiah which appears in these psalms, and elsewhere only in La 4th and Lk 2nd, is *χριστός κύριος*. A probable view of it is that, as in Lamentations, it is a faulty rendering, and should be *χ. κυρίου*.

The interest and importance of these psalms is very considerable. They throw much light on the aims and thoughts of the Pharisees of our Lord's time; they mark an important stage in the development of the Messianic idea; and they illustrate in very many points the diction of the NT and of the LXX.

In literary merit they do not stand very high. The longer psalms are the best; the shorter ones are like centos from the Davidic psalter. Still we gain a favourable impression of the author: while he is a strong and unsparing partisan, he is clearly also a pious and humble-minded man.

LITERATURE.—A list of editions and notices will be found in Ryle and James's edition; since the date of that, Gebhardt's as well as the Camb. text have appeared (see above), and also a pamphlet by Frankenberg (*Die Datierung der Ps. Sol.*, Giessen, 1896), and a German version by Prof. Kittel in Kautzsch's *Apok. u. Pseudepigr. d. AT.*

M. R. JAMES.

PSALTERY.—A stringed instrument of music, described in art. MUSIC in vol. iii. p. 459^b. The Gr. *ψάλλειν*, to harp, gave *ψαλτήρ* a harper, and *ψαλτήριον* a harp (used in the widest sense). The LXX uses *ψαλτήριον* as the tr. of five Heb. words—(1) *נָחַל* Gn 4th (EV 'harp'), Ps 49th (EV 'harp') 81st 149th (EV 'harp'), Ezk 26th (EV 'harp'); (2) *נָחַל* or *נָחַל* Neh 12th, Ps 33rd 57th 92nd 108th 144th 150th, Is 5th (AV 'viol,' RV 'lute'); (3) *נָחַל* Is 38th (EV 'stringed instruments'); (4) *נָחַל* or *נָחַל* Dn 3rd 7. 10. 15; (5) *נָחַל* Job 21st (EV 'timbrel'). From *ψαλτήριον* was formed Lat. *psalterium*, from which (through Old Fr. *psalterie*) came Eng. 'psaltery.' The spelling in Chaucer (following the middle-Eng. pronun.) is *sautrye*, as *Miller's Tale*, 27—

'And al above ther lay a gay sautrye,
On which he made a nightes melodye
So swetely, that al the chambre rong.'

Wyclif has a variety of spelling: *sautree*, *sautrie*, *sawtree*, *sawtrye*, and *psautrie* are all found in the Wyclifite versions. The eccles. Lat. *psalterium* was both a psaltery and a song sung to the psaltery, and then also the book of songs or the Psalter.

J. HASTINGS.

PSALTIEL.—2 Es 5th (RVm). See PHALTIEL.

PSYCHOLOGY.—An initial prejudice on this topic, arising out of an extravagant claim made by some writers on its behalf, has first of all to be removed. To frame a complete and independent philosophy of man from the Bible is impossible. The attempt cannot commend itself to any judicious interpreter. The psychology of the Bible is largely of a popular character, and not a scientific system. Moreover, the Bible implicitly takes for granted much that men have thought out for themselves on this theme. But the relation

of the psychology to the content of revelation is very close. It is essential to the other doctrines of Scripture—its directly religious doctrines—that these be expressed in terms of such underlying thoughts on man's nature and constitution as are implied in the Bible itself. For in terms of some conception of man—some psychology more or less systematic—must all religious and theological statements be couched. But the religious teachings of the Bible have always suffered injustice when they have been forced (as is so commonly the case) to take shapes derived from systems of thought and theories of man other than those of Scripture. How constantly all through the Christian centuries Christian doctrines have been run into the mould of the prevailing philosophies, is proverbial. In the earliest age of Christian speculation Plato and Plotinus shaped almost all Bible interpretation. In the Middle Ages, Aristotle ruled the Scholastic Theology, and his sway extended down to and beyond the Reformation. Leibnitz and Descartes had their age of influence in the 17th and 18th centuries. Kant and Hegel control the forms of thinking of many cultured theologians in our own day. But when we seek to work out a Biblical Theology, when we aim at presenting the result of Scripture exegesis in our statement of revealed doctrine, we are bound to defer to the Scripture way of thinking. We can rid ourselves of the mistake which so long vitiated Theology, only by observing those ideas of Life and of the Soul which the Scripture-writers themselves assume in all their statements. To ascertain the science of human life, if it may be so called, to put together such simple psychology as underlies the writings of Scripture, cannot be an unnecessary task. Theology is not truly biblical, so long as it is controlled by non-biblical philosophy, and such control is inexcusable when it is seen that a view of human nature, available for the purpose, is native to the source from which Theology itself is derived. Two things are assumed here, without further explanation. The one is, that such materials, of this kind, as the Scriptures give, cannot form a complete or independent structure. They cannot be rightly treated except in close connexion with the proper and principal theme of the Bible. They cannot be treated abstractly or separately. They occur in the record of a revelation of Divine dealings with man for his redemption. They must be treated, therefore, in line with the history and development of these dealings. The other is, that they are on the whole uniform, that one fairly consecutive and connected system of ideas on the topic holds through the whole Bible. The proof of this will come out in the exposition. It is an OT system of thought. Even among the older apostles in the NT the same order of thought rules. Only in the case of the Pauline writings is there any marked change or advance, consistent enough, however, in its development of the original ideas.

Rothe has said* that we may appropriately speak of a 'language of the Holy Ghost.' Cremer, who quotes the remark, expounds it thus: 'The spirit of the language assumes a form adequate to the new views which the Spirit of Christ creates and works.'† Without attention to this element of progress it is impossible to read biblical psychology aright. This alone explains the transition from terms in the earlier Scriptures that are rather physical than psychical, to those in the later Scriptures that are more deeply charged with spiritual meaning. A progressive religious revelation is intimately connected with the growth

of humanity, casts growing light upon the nature and prospects of man, will therefore be increasingly rich in statements and expressions bearing upon the knowledge of man himself, and especially of his inner being. It is in the latest records of such a revelation that the terms expressive of the facts and phenomena of man's nature should be correspondingly enriched, diversified, and distinguishable in their meaning. It is on this principle that in the sketch which follows so much attention is given to the Pauline anthropology.

i. The Bible account of *man's origin* first claims our attention. What strikes one is the unity and simplicity of the conception. We are warned off, by the primal passage (Gn 27), from any sharp analysis. 'The LORD God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.' There are two elements or factors specified from which God formed man—'dust from the ground'; 'breath of the Almighty,'—and the result is a unity. The OT has no definite, single word (unless we except נֶפֶשׁ, which occurs 13 times, namely Gn 47¹⁵, Jg 14^{8, 9}, 1 S 31^{10, 12 bis}, Neh 9⁷, Ps 110⁶, Ezk 11^{5, 23}, Nah 3^{3 bis}, Dn 10⁶; see art. BODY) for the 'body' apart from the soul. Indeed the term 'soul' is sometimes used for the corpse (Lv 21¹¹, Nu 6⁹ 7. 10 19¹³). In this primal passage, therefore, the expression 'man became a living soul' has a characteristic simplicity. We must not identify 'soul' here with what it means in modern speech, or even in later biblical language. In primitive Scripture usage it means not the 'immaterial rational principle' of the philosophers, but simply 'life embodied.' So that here the unity of the created product is emphatically expressed. The sufficient interpretation of the passage is that the Divine inspiration awakes the already kneaded clay into a living human being. Cf. Ezekiel's vision (ch. 37), where there is, first, the reconstruction of the animal frame—bone, sinews, flesh, skin; and only after this the 'breath' comes upon them, and they live.

Now, this account of the origin of man is fitted to exclude certain dualistic views of his nature with which the religion of revelation had to contend. 'It directly contradicts the doctrine of the pre-existence of the soul' (Schultz, *OT Theology*, ii. 252, Clark, Edin. 1892). Whether, indeed, the formation of man's frame and the inbreathing of his life be taken as successive or simultaneous moments in the process of his creation, the description is exactly fitted to exclude that priority of the soul which was necessary to the transmigration taught by Oriental religions, or, to the pre-existence theory of the Greek schools. There is here no postponement or degradation of the earthly frame in favour of the soul, as if the soul were the man, and the body were only the prison-house into which he was sent, or the husk in which for a time he was concealed. According to this account, the synthesis of two factors, alike honourable, constitutes the man.

That neither the familiar antithesis, soul and body, nor any other pair of expressions by which we commonly render the dual elements in human nature, should occur in this *locus classicus*, is a fact which helps to fix attention on the real character of the earlier OT descriptions of man. The fact is not explained merely by the absence of analysis. Rather is it characteristic of these Scriptures to assert the solidarity of man's constitution—that he is of one piece, and not composed of separate or independent parts. This assertion is essential to the theology of the Bible—to its discovery of human sin, and of Divine salvation. In a way not perceived by many believers in its doctrines, this idea of the unity of man's nature binds into consistency

* *Zur Dogmatik*, p. 238 (Gotha, 1833).

† *Cremer's Wörterbuch der NT Grammatik*, Vorrede, p. 5 (Gotha, 1896).

the Scripture account of his Creation, the story of his Fall, the character of Redemption, and all the leading features in the working out of his actual recovery, from his Regeneration to his Resurrection.

Later Scriptures suggest a more definite and separate idea of the body. In Job 4¹⁹ we have *בְּתֵי עֹפָר* 'houses of clay,' imitated perhaps in 2 Co 5¹ *ἡ ἐπιγείος . . . οἰκία τοῦ σκήνους*; also in Dn 7¹⁵ 'grieved in my spirit in the midst of my body' (*בְּתֵי שֶׁמַיָּא* sheath), 2 P 1⁴ *τοῦ σκηνώματός μου*. In the OT Apocrypha the pre-existence idea is, once at least, suggested, Wis 7^{19, 20} 'a good soul fell to my lot, and being good . . . came into a body undefiled.'* The NT uses freely the Greek duality, which has become the modern one, 'soul and body'; and though the OT 'flesh and soul' does not occur in the NT, 'body and spirit' can take its place. Then, in the progress of redemption, it at last appears that the discrepancy between the two is resolved, when the redeemed *πνεῦμα* shall put on *σῶμα πνευματικόν* (1 Co 15⁴⁴), 'a spiritual body,' which is by no means the same as a 'bodiless spirit' (see BODY).

ii. Let us now pass on to the biblical treatment of *sin and salvation*, and show how these affect the various elements of human nature as more specifically distinguished through them, especially the terms 'flesh,' 'soul,' and 'spirit.'

Flesh.—Besides the more obvious literal meanings of this term already discussed in a separate article, it acquires a psychological importance when we ask whether its general OT sense is morally unfavourable, and what is the origin and force of the peculiar meaning it has in St. Paul, as the principle, or a seat of the principle, of sin in man. From the first application of 'flesh' to fallen man (Gn 6²) there is nothing in the OT which identifies it with the principle of evil. 'Not a single passage can be adduced wherein *bāsar* is used to denote man's sensuous nature as the seat of an opposition against his spirit and of a bias towards sin' (Müller, *Christian Doct. of Sin*, i. 323). It is true that 'flesh' is used for human kind in contrast to higher beings and to God (e.g. Gn 6², Ps 78³⁹), and, so used, brings out his frailty and finitude. It is true also that 'flesh' as a constituent of human nature means the perishable, animal, sensuous, and even sensual element of it (e.g. Ec 5⁶, Is 40⁶); but which of these ideas is prominent in any passage must be learned from its connexion and context. It is further true that in its meaning of 'natural kinship' there is often an implied contrast with something better—'Israel after the flesh' (1 Co 10¹⁸). But the conclusive proof that nothing of moral depreciation is necessarily implied in this use of 'flesh,' is its application to Christ as designating His human in contrast with His Divine nature. 'The word was made flesh' (*ὁ λόγος σὰρξ ἐγένετο*, Jn 1¹⁴). 'Who was manifest in the flesh, justified in the spirit' (1 Ti 3¹⁶); 'made of the seed of David according to the flesh, declared to be the Son of God with power, according to the spirit' (Ro 1²). But in the Pauline Epistles a specific meaning of the term emerges. In certain well-known passages it denotes the principle which resists the Divine law, as contrasted with the 'mind' consenting to the law that it is good, and which, even in the regenerate, makes war against 'the spirit.' Here we have a very marked ethical significance given to the term 'flesh.' Nor is it the only term of its kind used to denominate the evil principle in man's nature as now under sin. 'The old man,' 'the body of sin,' 'the body of the flesh,' 'the law in the members,' 'our members which are upon earth,' are kindred expressions, more or less closely denoting the same thing, although 'the flesh,' in its counterpoise to 'the mind' and to 'the spirit' respectively, is the leading expression (Ro 7²³ 8⁶, Gal 5¹⁷).

* Compare ib. 9¹⁵ *θεῖον γὰρ σῶμα βεβήκει ψυχῇ*.

How is it, then, that this term 'flesh,' properly denoting the lower, corporeal or physical element in human nature, should come to denote the being of sin in that nature? Is it because this physical element is the main seat, or the original source of evil in man? But, according to St. Paul, it is not in the physical alone that sin has its seat. There are sinful desires of the mind as well as of the flesh (Eph 2³). There is defilement of 'the spirit' (2 Co 7¹). There are works called 'of the flesh' which have nothing to do with sensuality, e.g. hatreds, variance, emulation, wraths, factions, divisions, heresies (Gal 5²⁰, 1 Co 3¹⁻³). The apostle calls by the name of 'fleshly wisdom' what was evidently speculative tendency derived from the Greek schools (2 Co 1¹²). There were heretics at Colossæ whose ruling impulse he calls their 'fleshly mind,' though they were extreme ascetics, attached to some form of Gnosticism (Col 2^{18, 21, 22, 23}).

It might indeed be maintained that if we assume the physical nature in man to be the source of evil in him, it would be easy to explain how the whole man under that influence should be called 'the flesh' or 'the body of sin.' But this assumption will not tally with the treatment of man's bodily nature in these writings. Any view implying the inherent evil of matter is radically opposed to the whole Bible philosophy. It is as opposed to the Scripture account of its beginning in the race, as it is to our experience of its first outbreak in the individual. In Genesis the first sin is represented as the consequence of a primary rebellion against God. The earliest manifestations of evil in children are selfishness, anger, and self-will. Again, that the corporeal nature is necessarily at strife with the spiritual, is a view which cannot be reconciled with the claims made upon 'the body' in the Christian system. Throughout St. Paul's Epistles, Christians are enjoined 'to yield their members instruments of righteousness unto God' (Ro 6¹²), to 'present their bodies a living sacrifice' (Ro 12¹), to regard their bodies as 'members of Christ,' and as 'the temple of the Holy Ghost' (1 Co 6^{15, 19}); that the body is for the Lord, and the Lord for the body (1 Co 6¹⁹). Still more impossible is it to reconcile with such a view the Christian revelation concerning the future of the redeemed, and the consummation of redemption. If sin were the inevitable outcome of man's possession of a body, redemption ought to culminate in his deliverance from the body, instead of in its change and restoration to a higher form (Ph 3²¹). To say that the matter of the body is, or contains, the principle of sin, and then to say, as St. Paul does (Ro 8¹¹), that the last result of the Redeemer's Spirit indwelling in us shall be to quicken these mortal bodies, would be flat self-contradiction. But the view which connects sin with the material body is neither Hebrew nor Christian. It is essentially alien to the whole spirit of revelation. No doubt, at a very early period in Christian history, chiefly through the influence of the Greek and some of the Latin Fathers, it obtained such hold of Christian thought that it continues to colour popular modes of conception and speech to the present day. One of the most obvious examples is that men imagine they are uttering a scriptural sentiment when they speak of welcoming death as the liberation of the soul from the body. Yet the idea of St. Paul is exactly the reverse, when he declares that even the redeemed, who have the first-fruits of the Spirit, groan within themselves waiting for the adoption, i.e. for the redemption of their body (Ro 8²³). Two additional reasons why the apostle cannot be held as tracing man's evil to the corporeal element, may be summed up in the words of Julius Müller: 'He denies the presence of evil in Christ who was partaker of our fleshly nature, and he recognizes its

presence in spirits, who are not partakers thereof. Is it not, therefore, in the highest degree probable that, according to him, evil does not necessarily pertain to man's sensuous nature, that *sarx* denotes something different from this?' (l.c. i. 321).

Taking, then, the two meanings of the term 'flesh,' we note how impossible it is, in a way of mere ratiocination, to develop the one out of the other. The attempt to get the ethical significance which St. Paul gives to it out of the elementary Hebrew conception of the perishable or earthly part of man, signally fails. It leaves out the clearly biblical account of the change in human nature caused by the Fall. It is quite inadequate to explain how selfishness, wrath, pride, and other non-fleshly sins, bear prominently the name 'works of the flesh.' To assert, for instance, that *sarx* from its primary meaning, 'living material of the body,' came by a natural process of thought and language to mean 'the principle of sin,' is to assume human nature to be subject to sin by its physical constitution—a view wholly untenable, because at variance with the most radical conception of the Bible from its earliest to its latest writings.

Yet there must be some connexion between the two ideas. Otherwise we fall into mere tautology, and obtain the profound conclusion that 'the flesh' is sinful human nature. If 'the flesh' be nothing else than just this condition of human nature which is to be explained, then the whole of St. Paul's subtle and acute deduction would be 'nothing but the most wretched argument in a circle' (Pfleiderer). Now, it is quite certain the apostle means to posit a principle of sin in man, 'the sin that dwelleth in me,' 'the law in my members.' It is further clear that the law or principle of sin is one thing, and that the flesh, or native constitution of man in which it inheres, is another. It is certain that the sacred writer as little develops the principle of sin out of the mere physical flesh, as he identifies the one with the other. It is impossible to deny a very pointed reference to the lower element of human nature in this important key-word of the Pauline theology. But what misleads is the supposition that the lower and higher elements in man were conceived of by St. Paul as they were by the Greeks or are by ourselves; that the antithesis, material and immaterial, is at the basis of the distinction. So long as this idea prevails, it will be impossible to get rid of the suspicion that in 'the flesh' of the Pauline Epistles we have something which connects sin essentially with the material element in man's constitution. Let us get rid of this idea. Substitute for it the proper biblical antithesis,—earthly and heavenly, natural and supernatural, that 'flesh' is what nature evolves (this term being understood, of course, in a theistic sense), 'spirit' what God in His grace bestows,—then we can see how the idea of 'flesh,' even when ethically intensified to the utmost, is appreciably distinct from the notion of evil necessarily resident in matter. The great saying of our Lord in Jn 3⁶ is probably the source of apostolic doctrine on the point: 'That which is born of the flesh is flesh.' 'Flesh' has become the proper designation of the race as self-evolved and self-continued. Human nature as now constituted can produce nothing but its like, and that like is now sinful. 'Flesh,' therefore, may be appropriately used for the principle of corrupt nature in the individual, for the obvious reason that it is in the course of the flesh, or, of the ordinary production of human nature, that the evil principle invariably originates. Thus the phrase is some explanation of the condition of man's nature, which it describes. It is no objection to this view, but rather a confirmation of its correctness, that it grounds the Pauline use of *sarx*

on the underlying doctrine of hereditary corruption. 'Flesh' is that through which man in his natural state is descended from a sinful race and inherits a sinful nature, and the term is used to denote that nature. On the other hand, 'spirit' is that through which and in which God implants the new Divine life of holiness, and the term therefore is used to denote that life. See FLESH.

Soul and Spirit.—Let us now direct our attention to what is usually considered the *crux* of our topic, and which, from the exaggerated use made of it by some writers, has led others to explode or reject biblical psychology altogether. The question raised is whether the Scripture makes a tenable and consistent distinction between *soul* and *spirit*. This is the real question which underlies that of the so-called trichotomy of the Bible. Does the Bible conceive of human nature as three-fold, as made up of body, soul, and spirit? The only relevant question is the one above stated. In what sense and to what extent does the Bible recognize a distinction between *soul* and *spirit*? A large number, probably a majority, of exegetes have been in the habit of concluding that there is no real distinction, that the terms are synonymous, or at least interchangeable, and that nothing can be asserted beyond a shadowy, poetic distinction which enables the sacred writers to employ them in parallelism. But when we face the facts we are forced to a different conclusion. In the Pauline Epistles it is undoubted that a real distinction is asserted. The natural or unconverted man is said to be *soulish*, the renewed man *spiritual* (ψυχικός, πνευματικός, 1 Co 2^{14, 15}; cf. Jude¹⁹ ψυχικοί, πνεῦμα μὴ ἔχοντες). Again, St. Paul asserts that the body which all men carry to the grave is *soulish*, but the body of the resurrection is *spiritual* (ψυχικόν, πνευματικόν, 1 Co 15⁴⁴); that the first man was made a living *soul*, the last Adam a quickening *spirit* (v.⁴⁵). The distinction of the adjectives is repeated in v.⁴⁶.

Now, a fact of this sort emerging in such decisive and culminating passages of St. Paul's writings compels us to reconsider the usage. If we adhere rigidly to the conventional idea that there is no real distinction in the terms 'soul' and 'spirit' beyond that of parallelism, we must go on to hold St. Paul to have introduced, in important passages of his writings, an arbitrary and baseless antithesis. For this we are certainly not prepared, and are thrown back upon the conclusion, which has great and growing probability in its favour, that from OT usage there was real distinction latent in the employment by biblical writers of the terms *soul* and *spirit*, which distinction was recognized and emphasized in these leading passages of St. Paul. What the distinction is, it may not be easy to determine with precision. Precision is perhaps not present in the case at all. But there can remain little doubt in the mind of a careful reader of Scripture that a distinction makes itself felt from the first and throughout. Even in the relation of both terms to physical life the distinction is felt. To this both *pneuma* and *psyche*, like *ruah* and *nephesh*, of which they are the Greek equivalents, originally belong. *Nephesh* is the subject or bearer of life, *ruah* is the principle of life; so that in all OT references to the origin of living beings we can distinguish *nephesh* as life constituted in the creature, from *ruah* as life bestowed by the Creator.

No doubt, the 'life' indicated by these terms is that of man and the lower animals alike. A 'living soul' is a living creature in general, or an animated being. It is used in Gn 1^{20, 26} in a wide sense of creatures that have life, and the same expression is used in Gn 2⁷ to denote the result, even in man, of the Divine creative breath. So,

also, *ruah* and its kindred term *neshamah* are used for the principle of life, in man and brute alike. It is the '*neshamah* of life' that makes man a living soul (*i.e.*). It is the '*ruah* of life' that animates all creatures threatened by the Flood (6¹⁷), and all those which entered into the ark (7¹³). It is the *nishmath-ruah* of life those had which perished in the waters (7²²). These passages prove that no distinction is made between the life-principle in animals generally and in man.

But, what is of more importance, they call attention to a usage which is practically uniform of putting 'spirit' (*ruah* or *neshamah*) for the animating principle, and 'soul' or 'living soul' (*nephesh hayyah*) for the animated result. This primary distinction of the two terms, when applied to physical life, has passed over from the Hebrew of the OT to their Greek equivalents in the NT, and suggests a reason for their respective employment, even when the meaning goes beyond the merely physical. If *psyche* thus means the entire being as a constituted life, we can see why it is used in such a connexion as that of Jn 10¹¹ 'He giveth his life for the sheep' (*psyche*, not *zoe*, nor *pneuma*). If *pneuma* is the life-principle, we see the propriety of its use in Jn 19³⁰ 'He gave up the ghost' (*pneuma*). When we pass from this primary application of the two terms to a higher, in which they refer not to physical life alone, but also to the life of the mind, both terms denote almost indifferently the inner nature. For this purpose they are used throughout the OT and generally even in the NT with no sharp distinction, but freely interchanged and combined. As, for instance, when each is used alone, 'Why is thy spirit so sad?' 'Why art thou cast down, my soul?' (1 K 21⁵, Ps 42¹¹); 'Jesus was troubled in spirit'; 'My soul is exceeding sorrowful' (Jn 13²¹, Mt 26²⁸); 'To destroy both soul (*psyche*) and body'; 'The body without the spirit (*pneuma*) is dead' (Mt 10²⁸, Ja 2²⁶). Or, again, when the two terms occur together, in the manner of other terms of Hebrew poetry, 'With my soul (*nephesh*) have I desired thee in the night; yea, with my spirit (*ruah*) within me will I seek thee early' (Is 26⁹); 'My soul (*psyche*) doth magnify the Lord, and my spirit (*pneuma*) hath rejoiced in God my Saviour' (Lk 1⁴⁶⁻⁴⁷); 'Stand fast in one spirit (*pneuma*), with one soul (*psyche*) striving for the faith of the gospel' (Ph 1²⁷ RV). These last quoted passages prove it quite impossible to hold that 'spirit' can mean exclusively or mainly the Godward side of man's inner nature, and 'soul' the rational or earthward. The terms are parallel, or practically equivalent expressions for the inner life as contrasted with the outer or bodily life. The whole usage makes for the ordinary bipartite view of human nature, and not at all for any tripartite theory. No doubt, however, the underlying distinction found in the primary or physical application of the terms gives propriety to their usage all through; and, when firmly grasped, prepares us to understand the expanded meaning which they receive in the later Scriptures.

All through Scripture 'spirit' denotes life as coming from God, 'soul' denotes life as constituted in the man. Consequently, when the individual life is to be made emphatic, 'soul' is used. 'Souls' in Scripture freely denotes persons. My 'soul' is the Ego, the self, and when used like 'heart' for the inner man, and even for the feelings, has reference always to special individuality. On the other hand, 'spirit'—seldom or never used to denote the individual human being in this life—is primarily that imparted power by which the individual lives. It fitly denotes, therefore, when used as a psychological term, the innermost of the inner life, the higher aspect of the self

or personality. Thus the two terms are used, over the breadth of Scripture, as parallel expressions for the inner life. The inner nature is 'soul' according to its special individual life; it is 'spirit' according to the life-power whence it derives its special character. The double phrase 'soul and spirit' presents the man in two aspects as his life is viewed from two different points.

So much for the use of the two words in the Scripture at large. But when we come to certain NT writings—mainly though not exclusively Pauline—a still more definite meaning has set in. The adjective 'psychic' or 'soulish' has taken a force not perceptible in its root-word. It has become almost equivalent to 'carnal.' In Ja 3¹⁵ a wisdom is spoken of which is 'earthly, soulish (RV sensual), devilish.' Of certain predicted opponents of the gospel, it is said (Jude¹⁹) that 'they are soulish (AV and RV sensual; RVm natural or animal), not having the Spirit.' St. Paul terms the unregenerate who cannot discern the things of the spirit of God a 'soulish' man (1 Co 2¹⁴). The body which we wear at present—the body of our humiliation' (Ph 3²¹)—is a 'soulish' body, and shall be sown in the grave as such (1 Co 15⁴⁴⁻⁴⁶). The corresponding adjective 'pneumatic' or 'spiritual' has now taken on, in the parallel passages, a religious sense, and denotes what belongs to the *pneuma* in that sense, viz. that which is derived from the spirit of God—the spirit of the regenerate life. It is plain that if we would not accuse these NT writers—especially St. Paul—of introducing groundless distinctions, we are drawn to admit a real difference of the terms from the first, in the general or wider sense already described.*

Spirit.—On a closely similar line of exegetical investigation we explain the Scripture use of this term. It is an entirely original biblical term for the highest aspect of man's life. It is almost inseparable from the idea of man's relation to God, whether in creation or in redemption. All through the OT it is the supreme term for human life. God is spirit, and man has spirit. 'The spirit returns to God who gave it' (Ec 12⁷). In this way the psychology of the Bible is distinguished from all ethnic systems. In this it stands entirely alone, and is thoroughly consistent with itself from first to last. 'Spirit' is not so used by Plato, by Philo, by the earlier Stoics, by Plotinus and the Neo-Platonists, nor indeed anywhere out of the circle of Bible thought. It denotes the direct dependence of man upon God. The peculiarly biblical idea is the attribution to man, as the highest in him, of that which is common to man with God. 'Spirit' is the God-given principle of man's life, physical, mental, and spiritual. Where modern analysis imports a false element into it, is when an attempt is made to represent *πνεῦμα* as a separable constituent of man's being, as something which can be wanting, dead, or dormant on the one hand, restored or confirmed on the other. Indeed the whole character of the Bible psychology is mistaken in such attempts to distinguish spirit, soul, heart, and the like as separate faculties. They are diverse aspects of one indivisible inner life.

When we come to the Pauline writings, and those associated with them in the NT, we find that a certain improvement or addition to the force of this term has come in; yet one completely in harmony with its original meaning. That in man which is 'spiritual' is, frankly and fully, that which is influenced by the spirit of God—by the new spirit of regeneration. 'Spirit' is more entirely used of the renewed man, though there is still a clear and appreciable distinction maintained

* See this discussed in ch. v. of the present writer's *Bible Doctrine of Man*, Edin. 1895.

between the two. 'The Spirit itself beareth witness with our spirit that we are the children of God' (Ro 8¹⁶). Yet so almost complete is the identification, that our translators find it difficult—throughout the Epistles—to determine where the term spirit should be distinguished by a capital letter. The advance consists in the fact that, whereas from the first, man's life is dignified as the direct inbreathing of the Almighty,—*nēshāmāh* or *rūah* from God,—his new life is now signalized by a term identical with that bestowed on the Third Person of the Holy Trinity. It is one of the central doctrines of Christianity concerning the theanthropic person of the Son, that, as head of the new humanity, He becomes a life-giving *πνεῦμα*—a quickening spirit. At every point in the unfolding of the Bible anthropology this doctrine of the *pneuma* in man will be found distinctive. It forms a central element in the Divine Image in which he was created, and at the climax of redemption it is the appropriate designation of the man as renewed in Christ. See SPIRIT.

Heart is a term used with much clearness and consistency throughout Scripture, for the inner, the real, the hidden and ruling element in man's nature. Translated into modern language it denotes, in one of its most frequent applications, 'principles of action.' It is always sufficiently distinguished from Being or Personality. From the first it is said that 'every imagination of the thoughts of man's heart is evil' (Gn 6⁵), i.e. his 'principles of action' are gone wrong, but it is never said that the personality is corrupt or destroyed. Again, it is the great promise of restoration, 'a new heart also will I give you, and a new spirit will I put within you' (Ezk 36²⁶), i.e. new principles will be implanted; yet it is not another or a different personality that is given. There is not such a sharp distinction in Bible speech as that which we have introduced into modern language between the *head* and the *heart*. There is no marked separation of the rational and intellectual elements in man's nature from the emotional or volitional. Although there is, to some extent, a distinction of this kind between *לֵב* and *דָּלֵת*, all inward elements of whatever sort may be included under heart: even such as good judgment and clear perception are, at least in the OT, considered as qualities of heart. In the writings of the older apostles the OT idea of 'heart' is still the ruling one. Indeed, in these NT writings the Greek terms for the intellectual life of man are used for the more general OT terms 'Heart,' 'Soul,' and the like, without any precision whatever. Thus the LXX, on occasion (e.g. Dt 6⁵, B), uses *διάνοια* for *לֵבְהָאֵלֶּה*. St. Mark (12²⁵) uses *σύνεσις* for *nephesh*. St. Luke introduces *διάνοια* along with *καρδιά*, *ψυχή*, and *λογίς* (10²⁷). See HEART.

It is plain, however, that in the writings of St. Paul and those allied to him, these Greek expressions for the intellectual elements in man have acquired more place, although no very marked precision. In especial, St. Paul has a firm conception of MIND (*νοῦς*) as the highest expression for man's mental or intellectual faculty, as that which in man, under grace, is appealed to by the Divine law (Ro 7^{23, 25}), and as that, on the other hand, which is to be distinguished from the *afflatus* or influence upon him of the supernatural (1 Co 14^{14, 15}). Then there is introduced in these writings a free use of the similar and related terms in which the Greek language was so rich, *σύνεσις* understanding, *λόγος* reason, *διαλογισμός* reasoning, *νοήματα* thoughts, *φρόνημα* minding or disposition, but scarcely any one of these used with strictness or accuracy. See MIND.

The one instance in which a Greek term of this character is introduced and adhered to in the

NT, is *συνείδησις* or **conscience**. It is once used by the LXX in the OT (Ec 10²⁰), where it is also introduced by our translators on the margin, but obviously rather with the meaning 'consciousness' than 'conscience.' The force of it in Wis 17¹¹ ('a witness within,' RV) is more nearly our own. To trace the advance of the term from its literal meaning of 'self-consciousness' to its full ethical import, would take us outside of biblical matter altogether. Its clear and full recognition in pagan literature is significant. Lightfoot speaks in somewhat strong terms of this word as the 'crowning triumph of ethical nomenclature,' which 'if not struck in the mint of the Stoics, at all events became current coin through their influence.' He cites it as a special instance of 'the extent to which Stoic philosophy had leavened the moral vocabulary of the civilized world at the time of the Christian era.' Now its use in the NT precisely corresponds to this estimate. It does not occur in the Gospels except in Jn 8⁹, a passage which the best scholarship does not hold to be genuine. It occurs twice in the addresses of St. Paul recorded in Acts; plentifully in the Epistles of Paul and of Peter and in the Epistle to the Hebrews, and in all these places its force is equivalent to that which it still bears in modern speech. Were we to bring it into line with the older biblical usage, it might be reckoned a function of *πνεῦμα* so far as it signifies 'self-consciousness'; and of *καρδιά* when regarded as moral approval or disapproval. In confirmation of this it is to be noted that St. John uses *καρδιά* (1 Jn 3¹⁹⁻²¹) in a connexion where St. Paul would have used *νοῦς* or *συνείδησις*. The use of conscience, however, is so definite and consistent as to force us to the conclusion that it was introduced into the NT as a full-fledged idea. See CONSCIENCE.

The system of thought thus sketched belongs essentially to the OT. It is what Continental writers call a 'psychology of the Hebrews.' In our outline, this fact is rather concealed by the almost disproportionate attention given to the important modifications made on it by the Apostle Paul. But the system itself is the ruling one, not only throughout the OT but in the writings of the older apostles in the NT. The Greek terms supplied by the Septuagint are taken up in their OT meanings, and from these the writers seldom or never depart. The leading psychological notions are those attached to the simple terms spirit, soul, flesh, heart. These four are the *voces signatæ* of the entire Scripture view of man's nature and constitution. They are all grouped round the idea of life, or of a living being. The first two—soul and spirit—represent in different ways, or from different points of view, the life itself. The last two—flesh and heart—denote respectively the life-environment and the life-organ,—the former, that in which life inheres; the latter, that through which it acts. So much for their simple and primary meaning. In their secondary meaning they are grouped as follows: spirit, soul, flesh are expressions for man's whole nature viewed from different points. They are not three natures. Man's one nature is really expressed by each of them, so that each alone may designate the human being. Thus man is *flesh* as an embodied perishable creature. 'All flesh is grass, and all the goodness thereof as the flower of the field' (Is 40⁶). Man again is *soul*, as a living being, an individual responsible creature, 'All souls are mine' (Ezk 18⁴). Once more, man is *spirit*. More commonly, however, he is said to have or possess 'spirit' as his life-principle. 'Heart' stands outside this triad, because man is never called a 'heart,' or men collectively spoken of as 'hearts.' 'Heart' never denotes the personal subject, but always the organ of the personality.

Again, the four terms may be thus grouped: 'spirit,' 'soul,' 'heart' may be used to denote, each of them, one side of man's double-sided nature, viz. his inner or higher life. Over against any one of these may stand 'flesh'; as representing his nature on its outer or lower side, so that the combination will express in familiar duality the whole of man as 'flesh and spirit,' 'flesh and soul,' or 'flesh and heart.' The two latter combinations are the ruling ones in the OT. Thus 'soul' and 'flesh' occur. 'My soul thirsteth for thee, and my flesh longeth for thee' (Ps 63¹). 'My flesh in my teeth, and my life (soul) in my hand' (Job 13¹⁴). 'His flesh hath pain, and his soul mourneth' (Job 14²²). A land entirely stripped of its trees and of its crops is said to be 'consumed soul and body' (Is 10¹⁸ Heb. 'from the soul and even to the flesh'). Equally characteristic is the conjunction of 'flesh' with 'heart' for the whole human being. Aliens wholly unfit for God's service are described as 'uncircumcised in heart and flesh' (Ezk 44⁷⁻⁹). The man whose whole being is given to pleasure 'searches in his heart how to cheer his flesh' (Ec 2² RV). 'Remove sorrow from thy heart and put away evil from thy flesh' (Ec 11¹⁰). The *summum bonum* of human life is when a 'sound heart is the life of the flesh' (Pr 14³⁰), an expression which reminds one of the classic *mens sana in corpore sano*. This dualism of the OT is clinched in the memorable description of its final form, when 'the dust returns to the earth as it was, and the spirit to God who gave it' (Ec 12⁷).

The distribution of parts, however, is not invariably or rigidly dualistic. For along with such as those now quoted we have also various trinal phrases, e.g. 'My soul longeth . . . for the courts of the Lord; my heart and my flesh crieth out unto the living God' (Ps 84²). 'My heart is glad and my glory rejoiceth, my flesh also dwelleth in safety' (Ps 16⁹). 'Mine eye is consumed with grief, yea, my soul and my belly' (RV 'body,' Ps 31⁹). Yet, dual or trinal though the terms may be, the intention is essentially bipartite, viz. to express in man the inner and the outer, the higher and the lower, the animating and the animated all resting upon the primal contrast of what is earth-derived with what is God-inbreathed.

Such is a condensed account of the Bible treatment of psychological terms and ideas, which also goes a long way to fix the biblical teaching about Man. At most of the important points, the Bible view of man's nature coincides with that of human psychology at large. Scripture frankly and fully confirms the view which places man among the animals, but at their head. It makes man differ in no respect as to the origination of his physical frame, but in two most important particulars it distinguishes man altogether from the animals—in the direct and immediate connexion of his origin with God, and in his survival of death (see artt. ESCHATOLOGY and RESURRECTION).

PTOLEMAIS (Πτολεμαῖς) is the NT name of the old Canaanitish stronghold Acco (which see). It received this name from Ptolemy II. Philadelphus when, after the conquest of Syria and the death of Alexander the Great, it came into his possession. For several hundred years, throughout its independence during the wars of the Maccabees, and under the dominion of Rome, when it received the privileges of a Roman city, this title supplanted the original name. At Ptolemais, Jonathan Maccabæus was treacherously captured (1 Mac 12²⁸); and the Greeks had built there a splendid temple to Jupiter. It is only once noticed in the NT, in connexion with the missionary journey of St. Paul from Tyre to Cæsarea (Ac 21⁷). There was a small band of Christian converts in the place, and it is recorded that the Apostle abode with them one day. Ptolemais was favourably situated as regards both sea and land approaches. On the occasion of the Apostle's visit, we are told that he came by sea, having sailed from the harbour of Tyre, and that he proceeded on foot to Cæsarea and from thence to Jerusalem. But there is every likelihood, judging from Ac 11³⁰ 12²⁵ 15²² 18²², that he must have passed several times through the city, by the ancient land-route along the coast that connected Cæsarea by means of the rocky pass of the Ladder of Tyre with Antioch.

Josephus (*Ant.* xiv. xv. 1) tells us that Herod landed at Ptolemais on his voyage from Italy to Syria. It may be mentioned that there is another Ptolemais, the capital of Pentapolis in Cyrenaica, of which the celebrated Synesius, the pupil of Hypatia of Alexandria, was bishop early in the 5th century. In the extremely interesting series of his letters which are still extant, there is one addressed to all Christian bishops throughout the world, in which he announces that he had excommunicated, at a Diocesan Synod, Andronicus, the governor of the place, on account of his crimes against the Church.

As it was a seaport town, the Jews, who were not a maritime people, took very little interest in the Syrian Ptolemais, and therefore it hardly figures on the pages of Scripture. But in mediæval times it rose into great fame under the name of Acre, which is closely connected with its original name of Acco, and has obscured all the other names imposed or altered at different times by foreigners. Elsewhere in the Holy Land sacred memories almost obliterate secular ones; but here it is the reverse. The civil history of Acre is decidedly Western, as is the prominent headland on which it is situated, which pushes itself farther out from the monotonous coast than any other place in Palestine, except Carmel. On this projecting shoulder of the Holy Land the town occupies so commanding a position that Napoleon called it the Key of Syria. At a distance it presents the appearance of a strongly fortified European town, but its architectural features inside are thoroughly Oriental in character. At the time of the Crusaders it was the *Castella Peregrinorum*, the principal landing-place of pilgrims to Jerusalem; and it was the last foothold of the Crusaders on the sacred soil. Here was the principal seat of the great knightly orders of St. John of the Temple and the Hospital, who gave it the French name of St. Jean d'Acre. It had a large share in the feudal and ecclesiastical wars of Europe, and in the unhappy political intrigues of the Republics of Venice, Genoa, and Pisa. It has been subjected to numerous sieges, from the days of Baldwin, the founder of the shortlived dynasty of the Latin sovereigns of the Eastern empire, to those of Napoleon, whose destiny was here first marred by defeat. Saladin, Cœur de Lion, and Sir Sydney Smith performed feats of valour in connexion

with this fortress. The last siege took place in 1840, when Sir Charles Napier, fighting for the Turks, took the town from the Egyptians under Ibrahim Pasha.

Acre never recovered the bombardment of the English fleet; and it is now a dull, ruinous town of about 10,000 inhabitants. It is the market-place of the Syrian wheat trade; and the bread manufactured from the rich crops grown on the surrounding plain of Acre is proverbially said to be 'the best in the Holy Land'; thus maintaining still the reputation it had acquired in the days of Israel, when the Patriarch cast the blessing of his son into its local mould, 'out of Asher his bread shall be fat.' The shallow *Nahr N'amân*, the ancient Belus, which falls into its broad bay, recalls the Greek story of the chance invention of glass on its banks; and the patriarchal promise to the lot of Issachar of 'the treasures hid in the sands,' which may have had something to do with the ancient classical tradition. The view from the shattered ramparts is very extensive and beautiful, comprising on the one side the opposite headland of Carmel, reflected in the blue waters of the curved bay, and on the other the dark green plain along the coast up to the white promontory of the Ladder of Tyre; the distant snow-clad Lebanon range fading northwards in the clouds; while the eastern horizon is closed up by the shadowy hills of Galilee.

LITERATURE.—Conder, *Tent-Work in Palestine*, pp. 188-192; Stanley, *SP* pp. 264-286; Bovet, *Egypt, Palestine, and Phœnicia*, pp. 383-385.

HUGH MACMILLAN.

PTOLEMY (Πτολεμαῖος, a metric alternative for the Ion. πολεμῖος, 'warlike') I., surnamed Σωτήρ, 'Preserver' (on account of his defence of the Rhodians in B.C. 306; Paus. i. 8. 6; or by the Confed. of the Cyclades, who claim the credit, according to Inscript. 373 in Michel's *Recueil*—see Mahaffy, *Emp. Ptol.* 110 f.), was the son of Lagus and Arsinoë, a reputed concubine of Philip of Macedon. He was born about B.C. 367, and upon the death of Alexander (1 Mac 16-9) he assumed the satrapy of Egypt. For the intricate details of the wars that preceded his assumption of royalty in B.C. 305, see Mahaffy, *op. cit.* 27-58; Droysen, *Hellenismus*; Niese, *Gesch. der Griech. Staaten*, pt. i.—by each of whom the original authorities are given. He abdicated in B.C. 285 in favour of his second son, and died two years later, with his dynasty firmly established by his wise and vigorous administration upon the throne of Egypt. In the course of his campaigns he several times traversed or occupied Palestine. In B.C. 320 (Cless in Pauly, art. 'Ptolemy'), or more probably eight years later, he took advantage of the Sabbath law to seize Jerusalem on that day (Jos. *Ant.* XII. i.), but so ingratiated himself with the people that many of them accompanied him to Egypt and settled there (Jos. *c. Ap.* i. 22; Müller, *Fragm. Hist. Græc.* ii. 393). They were employed partly as mercenaries; and in Alexandria a kind of citizenship and a special quarter of the city appear to have been assigned them (Jos. *Wars*, II. xviii. 7). Such migrations to Egypt occurred three or four times during this reign; and the favour with which the Egypt. rule was regarded in Palestine was largely due to the kindness with which the settlers were treated, and to the comparative avoidance of interference with their religious practices. It has been assumed (e.g. by Cheyne) that Is 19¹⁸⁻²⁵ (this passage may allude to the Jewish temple at Heliopolis founded in the time of Ptol. VII.) was written in the time of this king, and he is generally held to be 'the king of the south' referred to in Dn 11², where the RVm is to be preferred.

R. W. MOSS.

PTOLEMY II. (afterwards known as Φιλάδελφος, 'brother-loving,' from the title adopted by his sister and wife, Arsinoë), the youngest son of Soter, succeeded his father in B.C. 285. He continued his father's policy, and, instead of Hellenizing Egypt, treated the country rather as a private estate to be administered wisely in the interest of its proprietor. On the series of coins which he struck at Tyre the earliest date that occurs is B.C. 286 (Poole, *Coins of Ptol.* xxix.); and consequently his first Syrian war took place at least two or three years earlier. From that time Palestine formed a permanent part of his kingdom, his right to hold it as an inheritance from his father having been unrecognized before. Among the cities which he founded were Philoteria to the south of the Lake of Galilee (Polyb. v. 70), Philadelphia on the site of Rabbah (Jerome, in *Ezek.* 25), and Ptolemais on the site of Acco (pseudo-Aristeas in Merx, *Archiv.* i. 274; Droysen, *Hellenismus*, iii. 2. 305). In these foundations his principal object seems to have been to conciliate the people, and to furnish himself with centres of influence. A second Syrian war soon after B.C. 250 was provoked by an attempt on the part of Antiochus II. to annex the country; but of its details nothing is known with certainty, except that Philadelphus lost no part either of his dominions or apparently of his supremacy by sea in the Eastern Mediterranean. He died in B.C. 247. The reign of Philadelphus was a brilliant literary epoch in Alexandria. At his court, as officials of the Museum and Library which his father founded and he fostered, gathered many of the most eminent writers, artists, dilettanti, of the period; and thus was provided a place for the fusion of Jewish and Greek ideas, and a means of introducing the latter into Palestine itself. It is not impossible that the story of the origin of the LXX is so far correct, that the Pent. and perhaps also Joshua were translated during his reign and under royal patronage: see SEPTUAGINT. Dn 11² is to be interpreted of Philadelphus; but the latter part of the verse is so vague and even so difficult of translation that there is ground for suspicion that the text is corrupt. It has been conjectured that Ps 72 was written soon after the accession of Philadelphus as an expression of the anticipations which his reputation warranted, and Ps 45 in honour of his marriage with the daughter of Lysimachus, king of Thrace; but neither conjecture has much support.

R. W. MOSS.

PTOLEMY III. (first styled Εὐεργέτης, 'benefactor,' in a decree of the synod of Canopus in B.C. 238) succeeded his father Philadelphus in B.C. 247. Soon after his accession, to avenge the murder of his sister at Antioch, he engaged in the third Syrian war, during which his conquests led him far into the East, and on his return from which he is alleged to have offered sacrifices in Jerus. (Jos. *c. Ap.* ii. 5). In B.C. 229 the control of the Jewish taxes was entrusted to Josephus, nephew of Onias II., according to an account (Jos. *Ant.* XII. iv. 1-5), for which there is probably some historical basis, and which is an evidence of the mildness and consequent popularity of the Egypt. rule. Of the later history of Euergetes only the scantiest information has been preserved. He appears to have devoted himself principally to the internal development of his kingdom, which was at the height of prosperity in B.C. 222, when he was murdered by his son (Justin, xxix. 1), or more probably died a natural death (Polyb. ii. 71). Dn 11²⁻⁹ is to be interpreted of Euergetes, the middle verse relating to the act by which he won his title—the restoration of the Egypt. idols carried off by Cambyases nearly three centuries before.

This king must not be confounded with the Euergetes of the Prologue to Sirach. The data of time show that the latter must have been Euergetes II., known also as Physcon, who was admitted by his brother to conjoint sovereignty in B.C. 170, and died in B.C. 117. R. W. Moss.

PTOLEMY IV. (Φιλοπάτωρ, strictly 'fond of his father,' though the title appears to have been given in the belief that he was designated for the throne by his father) succeeded his father Euergetes in B.C. 222. In the fifth year of his reign he was forced into an expedition to recover Palestine from Antiochus the Great, who was completely defeated in a battle near Raphia. Dn 11¹¹⁻¹² is a summary of the campaign. A treaty of peace was made with Antiochus (Polyb. v. 87), and Ptolemy returned homewards. At Jerus., according to a story in 3 Mac., he attempted to enter the Holy of Holies against the indignant protests of the people, but fell in a fit on its threshold. Renouncing his purpose, he returned to Alexandria, where his rage against the Jews showed itself in an edict commanding them to practise idolatry on pain of degradation from citizenship. So many refused, that in an access of wrath he gave orders for all the Jews in Egypt to be collected at Alexandria to be put to death. The royal design was again thwarted by supernatural occurrences: and a national feast was appointed to commemorate the deliverance. The last statement may be regarded as authentic, and it is not unlikely that the Jews under this king lost some of their privileges, and joined the Egypt. natives in uneasiness and insurrection (Polyb. v. 107, xiv. 12); but very little reliance can be safely placed on 3 Mac. Of the rest of his reign, which terminated in B.C. 205, little is recorded beyond his extreme licentiousness and his Napoleonic love of building.

R. W. Moss.

PTOLEMY V. (Ἐπιφανής, 'illustrious') had no sooner succeeded his father, Philopator, in B.C. 205, than Antiochus the Great took advantage of the Egypt. king's minority to seize Palestine. Ptolemy's general, Scopas, was sent to recover the country, but was defeated near the sources of the Jordan, and compelled to surrender at Sidon (Jerome, in *Dan.* 11¹⁵). Many of the Jews were led by the concessions of Antiochus (Jos. *Ant.* xii. iii. 3) to transfer to him their allegiance, and the country passed finally from under the control of Egypt. When the Romans forbade Antiochus to attack Ptolemy, he conciliated both, but retained his conquests by betrothing his daughter Cleopatra to the Egypt. king (B.C. 198). The marriage was celebrated in B.C. 193, the Syrian princess receiving as her dowry the royal share of the taxes of the conquered provinces, but no right of interference in their government. On the death of Antiochus, Ptolemy decided to invade Syria, but before his preparations were complete was poisoned in B.C. 182, or the early part of the following year. Dn 11¹⁴⁻¹⁷ is to be interpreted of these relations between Ptolemy and Antiochus; but 11^{14b} must refer to a futile attempt to restore the independence of Israel (Bevan, in *loc.*) rather than to a preference for Antiochus by a party amongst the Jews, for in that case the phrases, so far as they are intelligible, are contrary to fact.

R. W. Moss.

PTOLEMY VI. (should be reckoned as VII., as there is evidence of the brief reign of an older brother: for the authorities and the present state of the question, see Mahaffy, *Emp. Ptol.* 329 f.—surnamed Φιλομήτωρ, 'lover of his mother') spent the first seven years of his reign under the regency of his mother, Cyprus being meanwhile

under the governorship of Ptolemy Macron (2 Mac 10¹³), who afterwards transferred his allegiance to Syria. Soon after her death he took the government into his own hands; and amongst the envoys who came for the occasion was Apollonius, who was instructed to discover the feelings of the Egypt. court towards Syria (2 Mac 4²¹). In B.C. 173 the king married his sister Cleopatra. Two years later he was defeated on the borders of Egypt by Antiochus IV., who overran the country (1 Mac 1^{18c}) and got possession of the king. The latter's brother, Euergetes II., was at once raised to the throne by the people of Alexandria, and, when Antiochus retired, reigned conjointly with his brother (B.C. 170). In B.C. 163 Philometor was driven out of Egypt by his brother, but restored soon after by order of the Roman senate, the kingdom being divided and Cyrene assigned to Euergetes. From B.C. 154 there was peace between the brothers. About the same time must be dated the foundation of the temple of Onias, near Heliopolis (Jos. *Ant.* XIII. iii. 1-3), the circumstances of which are an evidence of the king's popularity amongst and favour to the Jews. To the same conclusion point his employment of Jewish generals (Jos. *c. Ap.* ii. 5), his relation to the Jew Aristobulus (2 Mac 1⁹), who is identified with the Alexandrian philosopher of the same name by Clemens Alex. (*Strom.* v. 14. 97) and Eusebius (*Præp. Evang.* viii. 9), and possibly also the dedication of Ad. Est 11¹. When Alexander Balas was trying to establish his authority over Palestine, he sought alliance with Philometor (1 Mac 10³¹⁻³⁸), whose daughter Cleopatra was given him in marriage about B.C. 150. With a view to take advantage of the rivalry between Balas and Demetrius (1 Mac 11¹), or more probably in anger at the suspected treason of the former (Jos. *Ant.* XIII. iv. 6), Ptolemy again invaded Syria, and attached to himself Demetrius by promises of support and of marriage with Cleopatra; but, after making himself master of Antioch, he retained the crown of Syria for himself. Balas was defeated in battle, and killed in the course of his flight; but Ptolemy was wounded mortally, and only lived to have his enemy's head presented to him, in B.C. 146 (1 Mac 11¹⁸⁻¹⁶; Jos. *Ant.* XIII. iv. 8). Dn 11²⁰⁻²⁰ is to be understood of the wars between Philometor and Antiochus IV.

R. W. Moss.

PTOLEMY VII. (more correctly IX., the young son of Cleopatra II. having reigned for a few months, assumed the title of Euergetes II., possibly at his coronation at Memphis, but was better known amongst his Greek subjects by the nickname of Physcon, 'fat-paunch') succeeded to sole rule in B.C. 146 or the following year, and died about thirty years afterwards. Justin and Strabo describe him as tyrannous to his subjects, and as shrinking from no crime; but the papyri (cf. especially Mahaffy in vol. iv. 192 ff. of Petrie's *Hist. of Egypt*) represent him as extending the commercial bounds of Egypt, and as upholding law and order within it. There are indications in two texts from Athribis (cf. also Grenfell's *Papyri*, i. 74 f.) that he protected and was popular amongst his Jewish subjects. If so, the evidence against the theory that 3 Mac. records persecutions during his reign is increased. In the Prologue to Sir. the editor of the Gr. version states that he came to Egypt in the 30th year of Euergetes (B.C. 133, the reckoning being from the commencement of the joint reign of the brothers), and implies that by that time the entire OT had already been translated for the benefit of the Jews in Egypt, probably with special reference to the needs of those resident in the great centre of Leontopolis. The task appears to have been begun in the reign of

Philopator, possibly earlier, and may have been completed shortly before the visit of the writer of the Prologue.

LITERATURE.—Of Ptolemaic literature a good summary to 1895 is given in Wachsmuth's *Einleitung in das Studium der alten Geschichte*, 579 ff., whilst the articles, especially by Cless and by Wilcken, in the new edition of Pauly's *Realencyclopädie*, ed. Wissowa, are invaluable. The principal sources are Justin's *Epitome*; Pausanias, bk. I.; Jerome, *Com. on Dan. xi.*; Plutarch's *Life of Cleomenes*; Josephus, Diodorus, Polybius, and Livy, of which any edition with a good index will furnish a list of the scattered passages referring to the Ptolemies. Careful and ingenious use is made of inscriptions by Mahaffy in his *Empire of the Ptolemies*, and in his sketch of the Ptolemaic Dynasty in the fourth volume of Petrie's *Hist. of Egypt*. Amongst the best connected histories are Droysen's *Geschichte des Hellenismus*, and Strack's *Dynastie der Ptolemäer*. For the inscriptions, in addition to the memoirs of the Egypt Exploration Fund, Wilcken's *Archiv für Papyrusforschung*, Mahaffy's *Petrie Papyri* in 3 vols. of 'Cunningham Memoirs' of the Royal Irish Academy, Revillout's *Revue Egyptologique* and *Mélanges*, should be consulted. A great wealth of papyri has accumulated in the British Museum and the Louvre, at Leyden, Turin, Rome, and elsewhere, and these are gradually being edited in separate memoirs or in one of the Egyptological periodicals by Grenfell, Hunt, and others; but only a comparatively small proportion relate to the period of the Ptolemies. For further or more general literature reference should be made to the bibliographical note at the close of the article on Egypt, vol. i. p. 667.

R. W. MOSS.

PUAH.—1. (פּוּאָ; פּוּאָד) Ex 1¹⁸, one of the Hebrew midwives in Egypt. Philo (*Quis rerum divin. p.* 389 f., ed. 1613) identifies this name with 2, perhaps rightly, and explains, פּוּאָד עֲרֻבָאֵן עֲרֻמְיָנִימַר. 2. (פּוּאָ; פּוּאָד) Jg 10¹, of the tribe of Issachar, father of the minor judge Tola. Puah is called 'son of Dodo,' for which LXX and Syr. give the improbable rendering, 'son of his [Abimelech's] uncle.' A recension of LXX, represented by 8 minuscules, renders . . . υἱὸν Πουὰ υἱὸν Καμὲ [Καρμὲ πατραδέλφου αὐτοῦ, κ.τ.λ.; hence Hollenberg (*ZATW* i. 104 f.) concludes that Puah was the son of 777 (cf. 2 K 25²³, Jer 40⁶), and that the name has fallen out of MT. Moore (*Judges*, p. 273) suggests that Καμὲ is only a corruption of *Issachar*; the MT is probably right. 3. In the lists of Issachar, Gn 46¹³, Nu 26²³ (פּוּאָ פּוּאָה), 1 Ch 7¹ (פּוּאָ), Puah appears as the brother, not the father of Tola. Both are probably names of clans rather than of individuals.

The meaning of Puah is uncertain. The name has been connected with the Arab. فُوّه *fūh*, a plant yielding a red dye, 'madder,' the *Rubia tinctorum* of Linn. In Talm. פּוּאָ is used in this sense, e.g. *Shabb.* 89b, *Erub.* 26r. See Löw (*Aramäische Pflanzennamen*, 251). If this be so, the connexion with Tola, 'the crimson worm,' is interesting. Lagarde (*Mittheil.* iii. 1889, 281) takes *puah* to be a sea-weed = φέκος, and explains that Issachar's son was so called because he used sea-weed in dyeing; Issachar dwelt by the sea (Dt 33¹⁹). But the *rubia tinctorum* is not a sea-weed.

G. A. COOKE.

PUBLICAN (τελώνης, from τέλος, 'tax'; Lat. *publicanus*).—In the widest sense the word *publicanus* stands for any one who has business connexions with the State. It is usually employed in a narrower and more specific sense for a farmer-general of the revenue—by preference a man of equestrian rank (who was also sometimes designated 'manceps,' e.g. Cicero, *Div. in Cæcilium*, 33, and 'redemptor,' *Div.* ii. 47). The name was also given to the agents of the farmer of the revenue, whom he employed in collecting the taxes. In Palestine the taxes went to the imperial treasury (*fiscus*), not to that of the senate (*ararium*). Under the procurator the Judæan taxes were paid through that official, whose primary function was the superintendence of the revenue. In the territories assigned to the petty kings and tetrarchs, such as that of Herod

Antipas, the payment was made to those authorities. Even separate cities were allowed to collect their own taxes. An inscription in Greek and Aramaic at Palmyra, giving the custom tariff of a number of articles in the time of Hadrian, shows that the town had a certain authority in determining the details of its own taxation (Schürer, *HJP* i. ii. 67 ff.).

The publican leased the customs of a particular district for a fixed annual sum, gaining what the revenue yielded in excess of that amount, and being required to make good any deficiency. In earlier times even direct taxes had been farmed (Jos. *Ant.* xii. iv. 1, 3, 4, 5). But this was no longer the case in NT days. The publicans of whom we read in the Gospels were engaged in collecting the custom dues on exports (Marquardt, *Römische Staatsverwaltung*, ii. p. 261 ff.). Pliny mentions that merchants from Arabia paid custom dues at Gaza (*HN* xii. 63–65). In Jericho there was an ἀρχιτελώνης, possibly himself the farmer of the customs of that important trade centre. Most of the NT publicans could only have been tax-collectors, subordinate to the official who more strictly bore the name 'publicanus.' Publicans formed themselves into companies (*societates publicanorum*), each member taking a quarter, or a lesser share, of the collecting and its profits or losses, according to the amount of capital invested. In the time of the Cæsars the contract was for five years.

It is evident that such a system as this would be liable to abuse, especially in a neglected and ill-governed province. It is expressly stated in the Palmyra inscription that the authorities should prevent the lessee of the customs from exacting anything beyond what was required by the law. Differences having arisen, a fixed tariff for a number of articles appears on the inscription to prevent misunderstandings and undue exactions. The unpopularity of the publican was partly due to his being a servant of the hated Roman government. This would be the case especially in Judæa under the procurators. The case of Galilee under Herod Antipas was somewhat different; and yet the Herods were dependent on and subservient to Rome. For a Jew to engage in collecting the revenues that went to support the foreign domination, was regarded as peculiarly mean and unpatriotic. If he grew rich it was on the spoils wrung from his brethren by the oppressor. Consequently men who had a due regard for their own good name would shrink from accepting the office. This would lead to its falling into the hands of persons of doubtful reputation. Then the farming of the customs was a direct incentive to dishonesty. In Rabbinical literature the tax-gatherer is commonly treated as a robber. In NT publicans and sinners are commonly coupled as forming but one class. It would not be fair to accept the popular judgment on this matter as an unprejudiced assertion of the truth. Still, our Lord's gracious treatment of the publicans is no indication that He wished to clear their character from calumny, for He was equally gracious to persons of notoriously bad character when He saw signs of amendment. Levi had been a publican, but he left his previous occupation on becoming a disciple of Jesus (Lk 5^{27–28}). Zacchæus declared that he had mended his ways, and was in the practice of making ample recompense for his previous extortions at the time when he met with Jesus (Lk 19⁸). Our Lord's ministry was peculiarly acceptable to publicans (Lk 15¹). We have no reference to any men of this class in the apostolic period. Acts and the Epistles never name the publicans.

LITERATURE.—Schürer, *HJP* i. ii. 17; Marquardt, *Römische Staatsverwaltung*, ii. 261–270, 289–293; Pauly, *Real-Encyc.*, art.

'Publican': Leyrer in Herzog's *Real-Encyc.*, art. 'Toll'; Herzfeld, *Handelsgeschichte der Juden*, etc. 159 ff.; Naquet, 'Des impôts indirects chez les Romains', etc. (Burrian's *Jahresberichte*, xix. 466 ff.); Cagnat, 'Étude historique sur les impôts indirects Romains', etc. (ib. xxvi. 215 ff.); Vigilié, *Études sur les impôts indirects Romains*; Edersheim, *Jesus the Messiah*, i. 515 ff.

W. F. ADENEY.

PUBLIUS, or more correctly Poplius (Πόπλιος), the leading man in Malta when St. Paul was cast on the island by shipwreck. He was both rich and hospitable, and his father was among those who were healed by the apostle (Ac 28⁷⁻⁸). He is described as ὁ πρῶτος (rendered 'the chief man' in AV and RV), a title which seems to have been peculiar to Malta, but which has been proved from inscriptions to have had a technical significance there. These inscriptions, however, leave it doubtful whether the title indicates the chief magistrate of the island or one with an honorary rank. He may have been the delegate of the prætor of Sicily, to whose jurisdiction Malta belonged. The name Poplius is the Gr. form of the prænomen Publius, but in this instance it may be the Gr. rendering of the nomen Popilius. Tradition says that he was the first bishop of Malta, and that afterwards he became bishop of Athens.

W. MUIR.

PUDENS (Πούδης, but a few cursives give Σπούδης; *Pudens*).—A Christian at Rome in the time of St. Paul's last imprisonment there, who sends greeting from him to Timothy (2 Ti 4²¹). This is all that is certainly known of him, but conjecture has been rife in attempting to identify him with others of the same name. The name is Roman, often borne by Romans of good family, and common in the early Christian centuries. Thus we find—(1) Aulus Pudens, a soldier, the friend of Martial, and husband of a British lady, Claudia (Mart. *Epigr.* iv. 13; xi. 53). (2) Titus Claudius Pudens, husband of Claudia Quintilla, whose inscription to a lost child has been found between Rome and Ostia (*CIL* vi. 15,066). (3) Pudens, a son of Pudentinus, a Roman who gave the site for a temple which the British king Cogidubnus erected to Neptune (*CIL* vii. 17). (4) Mævius Pudens, employed by Otho to corrupt Galba's friends (Tac. *Hist.* i. 24). (5) Pudens, a Roman knight, killed at the siege of Jerusalem (Jos. *BJ* vi. ii. 10). (6) Pudens, a Roman senator, said by Roman tradition to have been the host of St. Peter at Rome (Baronius, *Ann. Eccl.* ad A.D. 44, *Martyr. Rom.* ad May 19; Lipsius, *Apocryph. Apostel-leg.* ii. 1. 207, 418). (7) Pudens, father of Pudentiana and Praxedes, c. A.D. 160.

The Greek *Menæa*, appealing to the authority of Dorotheus, regards Pudens as having been one of the seventy disciples, who afterwards accompanied St. Paul on his missionary journeys, and was beheaded under Nero. His memory is honoured with that of Aristarchus and Trophimus in the Greek Church on April 14. The Roman Church tended to identify him with the host of St. Peter (6), who was apparently confused with (7) (see *Acta Sanctorum* for May 19, where the editor distinguishes between the two). English writers have attempted to identify him with (1) and (3). This is possible, but cannot be regarded as proved (cf. art. CLAUDIA). So many of the name were soldiers, that the conjecture may be hazarded that Pudens was one of the soldiers who had been in charge of St. Paul, perhaps one to whom he had been chained while a prisoner.

W. LOCK.

PUL (פּוּל, פּוּלָא, פּוּלָא, פּוּלָא, פּוּלָא).—The Assyrian Pulū. See TIGLATH-PILESER.

PUL.—Is 66¹⁹. See PUT, p. 177^a.

PULPIT.—This term occurs only in Neh 8⁴ || 1 Es

9² in connexion with the reading of the Law, when Ezra is said to have stood 'upon a pulpit of wood' (פּוּלְפִּיטָא, LXX βήμα ξύλινον). The Heb. word פּוּלְפִּיטָא, which is frequent in the sense of 'tower' (cf. AVm and RVm at Neh 8⁴), means any elevated structure. Ezra's 'pulpit,' like its Latin original, *pulpitum*, probably corresponded rather to what we should call a 'platform' or 'stage.'

J. A. SELBIE.

PULSE (פּוּלְסָא, פּוּלְסָא, פּוּלְסָא, Dn 1^{12.16}).

—The words in the original do not refer to any special plant, or even order of plants, but only to *things sown*. The purpose of Daniel and his companions was to be tried on a purely vegetable diet. An Arab. word of similar meaning, but more restricted, is *ḥutniyyeh* (pl. *ḥatāni*), which is defined as 'grains, with the exception of wheat, barley, raisins, and dates,' or as 'those grains which are cooked, as lentils, маш (Vigna Nilotica), horse beans, beans, and chick peas.' The latter definition would correspond well with the Eng. 'pulse,' which refers to the edible seeds of the order *Leguminosæ*. It is said that they are called by this name in Arab. from the root *ḥatan*, 'to dwell,' because they last well, or because they are necessary to those who dwell in houses. Other authorities define *ḥatāni* to be *khilf*, i.e. all summer vegetables, which would make the exact equivalent of *zērō'im* and *zēr'ōnim*.

'Pulse' in 2 S 17²³ is not in the Heb. original. The word 'parched' (פָּרַח = *roasted* or *toasted*) occurs twice in this verse, once after *kenah* = 'meal,' following wheat and barley, and tr^d 'parched corn' (see WHEAT); and again, after beans and lentils, and tr^d 'parched pulse.' It is customary to roast immature chick peas (Arab. *hummus*) in the oven, and eat them. The natives are exceedingly fond of them when prepared in this way. The allusion in the above passage is doubtless to grains roasted in the oven or toasted over the fire. See PARCHED.

G. E. POST.

PUNISHMENTS.—See CRIMES AND PUNISHMENTS.

PUNITES (פּוּנִיטִים, B δ Φουαί, A Φουαί).—The gentilic name from PUAH, Nu 26²². See PUAH, No. 3. Siegfried-Stade suggest that the Heb. name should perhaps be pointed פּוּנִי.

PUNON (פּוּנֹן, B פּוּנֹן, A פּוּנֹן, F פּוּנֹן).—A station in the journeyings of the children of Israel, mentioned only in Nu 33^{42.43}. The LXX renders it in the same way as PINON, the name of one of the 'dukes' of Edom (Gn 36⁴¹). Eusebius (s.v. פּוּנֹן) and Jerome (s.v. 'Faenon') speak of it as formerly a city of the dukes of Edom, and identify it with a place between Petra and Zoar, called פּוּנֹן, where mines were worked (*Onomast.* ed. Lag. pp. 155 and 288).

A. T. CHAPMAN.

PURAH (פּוּרָא ? 'branch' = פּוּרָא Is 10³; ? 'wine-press' = פּוּרָא Is 63³; LXX Φαρά).—Gideon's 'servant,' lit. 'young man' (פּוּרָא, LXX παῖδάριον, Vulg. *puer*), i.e. armour-bearer, Jg 7^{10c}; cf. 9²⁴, 1 S 14^{1.6}, 2 S 20¹¹.

G. A. COOKE.

PURCHASE.—To purchase (from Old Fr. *pour-chasser*, i.e. *pour* 'for' and *chasser* 'to chase') is to pursue after a thing, hence to acquire. The sense is now narrowed to acquiring by payment. For the wider meaning cf. Melvill, *Diary*, p. 42, 'Mr Andro Melvill . . . with great difficulty purchasit leave of the kirk and magistrates of Geneva . . . and takin jorney cam hamwart'; Knox, *First Blast* (Arber's reprint, p. 7), 'The veritie of God is of that nature, that at one time or at other, it will pourchace to it selfe audience'; *Article* xxv.

'They that receive them unworthily purchase to them selves damnation.' This wider meaning is also seen in Ac 20²⁸ 'the church of God which he hath purchased with his own blood' (ἡ κεκοιμημένη); and in 1 Ti 3¹³ 'They that have used the office of a deacon well purchase to themselves a good degree' (κεκοιμούνται, RV 'gain'). Cf. Ps 84³ in metre—

'The swallow also for herself
Hath purchased a nest.'

J. HASTINGS.

PURGE.—Like Lat. *purgare* and Fr. *purger*, the verb to 'purge' was formerly used in the widest sense of to cleanse or purify. Hence Ps 51⁷ 'Purge me with hyssop, and I shall be clean,' referring to the ceremony of dipping a bunch of hyssop (see HYSSOP) in blood and sprinkling the leper or defiled person (Lv 14⁴, Nu 19¹⁸); Mt 3¹² 'He will thoroughly purge (RV 'cleanseth') his floor'; Mk 7¹⁹ 'purging all meats' (RV 'making all meats clean,' i.e. ceremonially, see Swete's note); Jn 15² 'Every branch that beareth fruit, he purgeth it' (RV 'cleanseth it'); He 1³ 'when he had by himself purged our sins' (RV 'made purification of sins'). Cf. the tr. of 1 Jn 3³ in Udall, *Erasmus' NT*, 'And every man that hath thys hope in him, purgeth himself, even as he also is pure'; Wyclif's tr. of Ja 4⁸ 'ye synners clyense the hondia, and ye double in soule purge ye the hertis'; and the Act of Henry VIII. (1543) prohibiting Tindale's Translation, 'The person or persons being detecte or complained on, shal be admitted to purge and trie his or theyr innocency by other witnessse.'

J. HASTINGS.

PURIFICATION.—See UNCLEAN.

PURIM (פּוּרִים or פּוּרִים).—A Jewish festival of whose origin and institution we have an account in the Book of Esther. There we are informed that the festival had its rise in the resting and rejoicing of the Jews in Persia after their slaughter of their enemies on 13th Adar, in the 12th year of king Ahasuerus (i.e. Xerxes, B.C. 473). That was the day which Haman, the grand vizier, had chosen by lot (=pur, Est 3⁷) for the extermination of the Jews throughout the Pers. empire. Owing to the fact that in Susa the conflict was renewed on 14th Adar, the 'day of feasting and gladness' in that city fell on the 15th. It was therefore enacted, as we learn from what appears to be an interpolation (920-32), by an ordinance of Mordecai, the successor of Haman, confirmed by Esther the queen (who were chiefly instrumental in procuring the deliverance), that there should be an annual celebration of the feast in all time coming, among the Jews and their seed, both on 14th and 15th Adar; 'that they should make them days of feasting and gladness, and of sending portions one to another and gifts to the poor.' No religious services were enjoined, and the observance seems to have been at first merely of a convivial and charitable nature; but ultimately it was accompanied with the reading of the Bk. of Esther in the synagogue, the whole congregation joining enthusiastically in the closing passages relating to Mordecai's triumph, and, at the mention of Haman, hissing, stamping, gesticulating and crying out, 'Let his name be blotted out; let the name of the wicked perish,' while the reader pronounced the names of Haman's ten sons all in one breath to indicate that they expired at the same moment. This reading of 'the Megilla,' preceded and followed by a special benediction, commencing in each case with the words, 'Blessed art thou, O Lord our God, king of the universe,' takes place both on the evening of the 13th of Adar, which is observed as a fast-day (called 'the Fast of Esther,' traceable from the 9th cent.; cf. 1³¹ 4²),

and on the morning of the 14th, which along with the 15th is devoted to celebrations of a festive and social character, as enjoined in Scripture, but without any prohibition of labour. To the influence of the Bk. of Esther the festival seems to have largely owed its popularity (Buxtorf, *Syn. Jud.* 24, and Ginsburg in Kitto's *Cycl.*). Apart from that book, the following are the only allusions to the subject that have been discovered in ancient literature. Referring to the commemoration of the victory over the Syrian general Nicanor on 13th Adar (B.C. 161), 2 Mac (15²⁰), which was probably written a little before the beginning of the Christian era, mentions that the anniversary fell on the day before 'Mordecai's day.' 1 Mac (about a century earlier) is silent on the point, although it mentions (7⁴⁹) the institution of 'Nicanor's day.' Josephus, writing about the close of the 1st cent. A.D., gives an account of the feast (*Ant.* xi. vi. 13), and mentions that in his day it was observed by the Jews throughout the world on the 14th and 15th Adar, which days they called *ἑορταίους*. In the *Meg. Taanith* (xii. 31), which existed in the 2nd cent. A.D., these two days are also mentioned as 'the days of Purim,' when 'mourning is forbidden.' By some 'the Feast of the Jews' (Jn 5¹, cf. 4³⁸ 6¹) is identified with Purim; but the inference is questionable, as the latter never had any special connexion with Jerus., and was not likely, as actually celebrated, to be very attractive to the Saviour (but see Milligan-Moulton on Jn 5¹).

With regard to the historical origin of Purim, there has been during the last half-century a growing tendency to reject the narrative in the Bk. of Esther, largely owing to the difficulty of finding any Persian word with which the name Pur can be identified. Various theories have been advanced to show that the festival had quite a different origin.

1. According to Reuss (*Gesch. AT*, § 473), following J.D. Michaelis (*Gesch. AT*), it may have grown out of the Nicanor-festival on 13th Adar, the latter losing its historical significance in the course of an eventful century or two, and thus becoming a preparatory fast to 'Mordecai's day,' whose strong hold upon the popular mind (notwithstanding the misgivings of the Great Synagogue, *Meg. Lxx.* 4) was due to the popularity of the Bk. of Esther, with which it was so closely connected. This theory, however, leaves the Purim mystery unsolved, and it is negatived by the fact that even so late as in the *Meg. Taanith* (xii. 30) the 13th Adar is spoken of as 'Nicanor's day.'

2. J. Fürst (*Kanon AT*) and E. Meier (*Heb. Wrth.*) trace Purim directly to a Pers. spring-festival (adopted by the Jews in Susa), and suppose the name to be connected with Pers. *bahar* = spring. Zunz (*ZDMG* xxvii.) takes a similar view, regarding the Bk. of Esther as designed to invest the festival with a Jewish character when it could no longer be got rid of; while Meyboom gives the idea a practical form by supposing Haman to be an emblem of winter overcome by the sun (Esther) and the moon (Mordecai).

3. Hitzig (*Gesch. Isr.*) observes that *Phur* in mod. Arabic = New Year (cf. *pāra* = the first), and argues for a New Year's festival of Parthian origin which the Bk. of Esther (after s.c. 238) was designed to commend to the Jewish nation generally, its historical elements, such as they are, being derived from the early Arsacid, not the Achaemenid period.

4. A more remarkable theory is that which was originated by von Hammer in 1827 (*Wien. Jahrbuch Lit.*), and elaborated and developed by Lagarde in his 'Purim,' *Ein Beitrag zur Gesch. der Religion* (1887), according to which the feast is a Judaic transformation of the old Zoroastrian Farwardigan (Festival of the Dead), observed on the last ten days of the year, including five intercalary days. Lagarde (while also ascribing an influence to the *mythologia* of Herod. iii. 73, and to a *Fest des Unbärtigen*) endeavours to make out a linguistic connexion between the Pers. name just mentioned and the various phases of the Greek name by which Purim is represented in the Septuagint (viz. *σπουαί*, *σπουαία*, *σπουαία*, *σπουαία*), finding in these the elements of New-Pers. *Pōrdigān*, which he identifies with the *σπουαία*, mentioned by the Byz. Menander as a Pers. feast in the 6th cent., and inferring the original Gr. form to have been *σπουαία* = Heb. *Purdaia* (פּוּרְדַּיָּה), while he explains away the Heb. פּוּרִים by supposing that the original reading (37) may have been, not פּוּרִים, but פּוּרְדַּיָּה (pharmanah) = Pers. *Arman* (edict). Renan takes a similar view (*Livre iv. Hist. du P. d'Isr.*), tracing the name to Pers. *Fourdi* (Aram. *Pourdai*, Heb. *Phourd* = *Phourim*), and supposes the festival to have acquired its halo of Jewish romance in the time of the Maccabees. The etymological argument, however, is very precarious, popular usage in such a case being little influenced by corruptions of text,

and the various Gr. readings being too easily accounted for by the errors of Alexandrian copyists to justify us in using them to correct such a good Heb. text, even if the derivation from *Parvardigîn* were better supported than it is (for objections see Halévy in the *Rev. des Études Juives*, 1887, who derives the LXX forms from the Gr. *εσπερ* = *guarû*).

5. Another theory which has been recently advanced with no less confidence is that of Grata (*Monatschrift Ges. u. Wiss. d. Jud.* xxxv. 10-12). He traces Purim to Heb. *פרא* (*pûrah*) = wine-press, supposing the feast to have been due to the adoption by the Jews in Palestine (in the reign of Ptolemy IV. Philopator, a.c. 222-205, through the Hellenizing influence of Joseph the tribute-collector, — *Jos. Ant.* xii. iv.) of the Gr. festival *Πύρνια* = jar-opening, corresponding to the *Vinalia* of the Romans, alleging in support of his theory the riotous mirth and the making of presents of wine which characterized that Bacchanalian season. The linguistic argument, however, is seen to be more apparent than real when it is noticed that *wine-press* suggests, not *spring* (when the *Antheistria* were held, of which the *Pithoigia* formed part), but *autumn*, and that the *Antheistria* lasted for three days. Moreover, it is scarcely conceivable that such a Gr. institution could have gained in the course of a generation or two such a strong hold on the affections of the Jews as to resist the anti-Hellenic reaction which set in under the Maccabees within half a century afterwards.

6. Still more recently Zimmern (*ZATW*, 1891) has derived the Feast of Purim from the Bab. *Zagmuku* (otherwise *Aktû*), an ancient New Year's festival, celebrated with great pomp and mirth in the opening days of Nisan (cf. *Est* 37). This was remarkable chiefly for an assembly (Assyr. *puhru*, easily passing into the meaning of feast, cf. *שנה* and *cena, convivium*) of the gods, which was held under the presidency of the Bab. tutelary deity *Marduk*, *Morodach* (cf. *Mordecai*), in a chamber forming part of a larger room (*Uburgina* = room of the *puhru*) in his temple *E-Sagila*, for the purpose of settling the fates of the king and the whole nation for the coming year (cf. the *lot* of *Est* 37 924). This celebration represented a similar mythical assembly of the gods, supposed to be held in a mysterious spot in the far East, which, again, had its prototype in a convivial assembly of the gods on the eve of the creation (see art. *BABYLONIA*, vol. i. 217*), at which Marduk was appointed to overcome the rival power *Tidmat*, and carry out the work of creation. In this connexion Marduk is significantly called 'the arranger of the *puhru* of the gods.' In *Tidmat* Zimmern thinks we may find the original of *Haman* (as in *Marduk of Mordecai*); and in the story of the Bk. of Esther he sees a Jewish transformation of the Bab. legend (Bel and the Dragon), the change of date from Nisan to Adar being due to the desire to keep it a month earlier than the solemn Passover.

Confirmation of this theory in a modified form is offered by Jensen (*WZKM* vi. 47 ff. 209 ff.; see also his communication to Wildeboer, quoted by the latter in his Comm. on 'Esther' in Marti's *Kurzer Hecomm.* p. 173), who suggests the identification of *Haman* with an Elamite god *Humba-be* = *Humman* (corresponding to the Bab. *Marduk*), of *Haman's* wife *Zeresh* with *Humman's* consort *Kirja*, and of *Vashti* with an Elamite divinity *Wasti*, while at the same time pointing out that *Esther* = Bab. *Istar*, and that *Hadassa* in Bab. = *bride*. He also makes out *Istar* to be a cousin of *Marduk*, as *Esther* of *Mordecai*. With this mythology he connects the Bab. New Year's epic which celebrates, in twelve parts, the changing fortunes of *Eabani* (*Marduk*), and he finds in the Bk. of Esther a combination of these and other elements of a more popular character relating to the Babylonian conquest of the Elamites, the whole being wrought up by Jewish fancy amid Pers. surroundings.

Wildeboer, while accepting this theory, combines with it the idea of a festival of the dead (All-Souls'-Day), as suggested by Lagarde above, and applied by Schwally (*Leben nach dem Tode*, 42 ff.). Hence the feasting and fastings and sending of gifts—repasts and offerings for the dead being a usual accompaniment of such commemorations in Persia and elsewhere; hence, too, the absence of the name of God from a story intended for such semi-heathenish rites, as its introduction in such a connexion would have given offence to the religious authorities and prevented its admission to the synagogue.

A different version of the same theory is given by Br. Meissner (*ZDMG*, 1896). He traces back the Jewish festival through its Persian medium to the festivities referred to by Berosus under the name of *Σαραν*, which he identifies (on doubtful etymological grounds) with the Bab. *Zagmuk*, as popularly understood and observed. In the celebration of this festival, which was of so merry a character that *Istar*, the goddess of love, naturally acquired a more prominent place in it than *Marduk*, it was usual for a slave, arrayed in royal apparel, to rule over the nobles for five days, and something like a reversal of the ordinary social relations took place. Meissner supposes the Jews to have become acquainted with it in Susa, and to have appreciated it so much in their state of subjection as to perpetuate it in a form that was specially fitted to glorify their own nation.

In the *Expositor*, Aug. 1896, Mr. C. H. W. Johns calls attention to the fact, as brought out by Peiser in the *Keilinschriftliche Bibliot.* vol. iv. p. 107, that the Assyr. word *puru* means 'term of office,' 'turn,' and holds Purim to be derived from *Puru*, which is free from the inexpressible guttural in *puhru*, as the common designation of the New Year's feast on its secular side (in connexion with the accession of officials), as distinguished from its sacred names and associations, with which the Jews could have no sympathy.

According to a conjecture of M. J. de Goeje's, favoured by

Kuenen, the story of Esther is derived from the same Persian tradition as the tale of *The Thousand and One Nights*, which has a similar heroine in *Scheherazade*.

The word *Pur* has sometimes been supposed to belong to the same root as Pers. *pâre* and Lat. *pars*, but Halévy traces it to a lost Aram. word *פרא*, from root *פר* = to break in pieces, after the analogy of other Semitic tongues, in which the idea of 'lot' is closely related to that of fraction, or partition, with which he connects the distribution of gifts at the feast. Another suggestion is that it may have denoted some object (cf. *urn, dice, cards*) used in casting lots,—such as Dieulafoy (*Rev. des Ét. Juives*, 1888) claims to have discovered in the excavations of the Memnonium at Susa, in the shape of a quadrangular prism, bearing different numbers on its four faces, which he thinks may have been used for casting lots, the name *pur* (like Sanskrit *pur* 'fulness,' Pers. *pur* 'full,' Lat. *plenus*, Fr. *plein*) having reference to its solid form. But Jensen (quoted by Wildeboer as above) derives the word from Assyr. *pûru* or *bûru* = stone, used in a metaphorical sense analogous to that of *לִּיט* and *ψῆφος*.

In subsequent times the Feast of Purim has often been the means of sustaining the faith of Jewish communities when in imminent danger of destruction at the hands of their enemies, of which we are reminded by the Cairene Purim (*Purin al-Miz-rayim*) and the Purim-Vincent, designed to commemorate the deliverance of the Jews in Cairo and Frankfort in 1524 and 1616.

It may be added that the distinction between 'Great Purim' and 'Little Purim,' referring to the two celebrations that used to take place in leap-year, in Adar and Ve-Adar respectively, cannot be traced to an earlier period than the 2nd cent. A.D.

LITERATURE.—Besides the authorities cited above, see the literature referred to in art. *ESTHER*, and, further, Derenbourg, *Hist. de la Pal.* 442 ff.; W. R. Smith, *OTJC*, 184 n.

J. A. M'Clymont.

PURITY.—This word, in subst. form, is not found in AV or RV of OT, and occurs only twice in NT, 1 Ti 4¹³ 5³ (*ἀγνεία*), the RV adding, however, a third instance when it accepts (with B) *καὶ τῆς ἀγνότητος* at 2 Co 11². The form 'pureness' occurs once in NT, 2 Co 6⁸ (*ἀγνότης*), and three times in OT, Job 22²⁰, Is 1²⁶, Pr 22¹¹ (Heb. being *bôr* in the two former passages, and *tâhôr* in the last, and the LXX reproduction being nearest to exactness in the *δολὰς χείρας* of Proverbs). In all these instances the use of 'purity' is ethical. This ethical use is one of the functions of all the Heb. and Gr. words constituting the family of *purity*, though it would be an error to say that any one of these words is never used ceremonially; even *bârar* (primarily = 'separate') is ceremonial in at least one passage, Is 52¹¹. And, of course, there is the literal use also, as, for instance, to describe gold when free from alloy (Ex 25¹¹ *et al.*, *tâhôr*, *καθαρός*; cf. Rev 21²¹). But the Eng. translators have preferred 'purity' and its family for the ethical region (though they have never so used 'purification,' and have not restricted 'purify'), and have preferred 'clean' (though 'cleanness' is almost always ethical) for the double office of ethical and ceremonial. In the Gr. usage there are similar preferences. *ἀγρός*, *ἀγνεία*, *ἀγνότης*, *ἀγνός* (Ph 1¹⁷ only, RV 'sincerely') are in NT exclusively ethical, though not so exclusively *ἀγνός*, and not at all *ἀγνότης* (Ac 21²⁶ only); in LXX *ἀγρός* is almost always ethical, though never *ἀγνός*, *ἀγνεία*, or *ἀγνότης* (Jer 6⁸ is doubtful; Heb. = 'rest for your souls,' LXX rendering *ἀγνότης*, which may be intended to mean national purification from idolatry); *ἀγνότης* and *ἀγνός* do not occur; while *καθαρός*, *tâhôr*, is in LXX mainly ceremonial, and in NT, as is natural, nearly always ethical; indeed, in Tit 1¹⁵ (*πάντα καθαρά τοῖς*

καθαρός) the idea of ceremonial or Levitical impurity, already ignored in the spiritual Psalms (e.g. Ps 119), is overtly surrendered (cf. Mt 15¹¹⁻²⁰, Mk 7¹⁹). *ἅγιος* and its immediate correlates are doubtless connected with the more comprehensive family of *ἅγιος*, but form at the same time a distinct branch confined to one aspect of holiness, *holiness* and *purity* remaining so far distinct throughout OT. *ἅγιος*, *kādōsh*, 'holy,' as separate, as related to God, who is absolutely separate from all evil, is in OT used fundamentally, not of ethical qualities, but of position—the position of God as *unapproachable* in majesty, power, and goodness; the position of men as *consecrated* to and by God, and therein and thereby summoned to be *separate*, in God-likeness, from all the defilements of heathenism (Lv 19² 11⁴); and, finally, the position of material things as related to the service of God or the consecrated position of men. One of the most prominent of the defilements of heathenism was sensuality, and to this the family of *ἅγιος* stands especially opposed, both in classical Greek (cf. *ἁγνή* with Artemis in Homer, and the use of *ἅγιος* in Soph. *Antig.* 880, and Dem., *adv. Neer.* 59, 78) and in sacred Greek (cf. 4 Mac 18⁷⁻⁸, and 2 Co 11², Tit 2⁹); yet it often takes a wider sweep and covers purity of motive (Ja 4⁸, 1 P 1²²), and of character generally (1 Co 11², Ja 3¹⁷, 1 Jn 3³, and in LXX Ps 11 (12)⁶ 18 (19)⁹, Pr 20⁹).

In NT *ἅγιος* and *καθαρός* may perhaps be distinguished (see Westcott on 1 Jo 3³) as predominantly connoting *feeling* and *state* respectively, *ἅγιος* (cf. *ἄζομαι*) implying a shrinking from pollution, while *καθαρός* expresses simply the fact of cleanness. Hence the *ἀγρίσει ἐαυτὸν* in 1 Jn 3³ and the *ἀγρίσατε καρδίας* in Ja 4⁸ penetrate more deeply towards the root of the matter than the *καθαρίσατε χεῖρας* of the latter passage, or even than the *καθαρίσει ἡμᾶς* of 1 Jn 1⁷, the *καθαρίσθη ἡμᾶς* of 1 Jn 1⁹, and the *καθαρίσθη λαὸν* of Tit 2¹⁴, in proportion as the purification by the man of his external acts, or the purification by the external influence (if we may so speak) of God or Christ, has less to do with internal and personal feeling than the effort of the man upon his inner life. Westcott also distinguishes *ἅγιος* and *καθαρός* from *ἅγιος*, in that the latter is 'holy absolutely in itself or in idea,' while *ἅγιος* and *καθαρός* 'admit the thought or the fact of temptation or pollution.' So 'a man is *ἅγιος* in virtue of his divine destination (He 10¹⁰) to which he is gradually conformed (He 10¹⁴),' while he is *καθαρός* or *ἅγιος* according (we may add) as we regard his state or the internal discipline by which, on the human side, the state is attained. If these distinctions hold, we shall, with Westcott, interpret the phrase 'even as he is pure' (*ἅγιος*), 1 Jn 3³, not of God (of whom *ἅγιος* could not be predicated), but of Christ in the light of the discipline of His human life.

Another word, which AV translated 'pure' in 2 P 3¹ ('your pure minds'), and which is very closely allied to *ἅγιος*, is *ἐλευθερία* (-εια or -ia), a word of uncertain etymology (see Lightfoot on Ph 1¹⁰), but of no uncertain significance. It is now, in RV, in all five passages where it occurs, rendered by 'sincere' (or its subst.), that is, *unmixed*, a sense which it bears in the only place where it is found in LXX, Wis 7²⁶. Wisdom being there spoken of as an 'unmingled effluence of the glory of the Almighty.' Trench (*NT Synon.* p. 309) is probably correct in distinguishing *ἐλευθερία* from *καθαρός*, as denoting (the former) freedom from the falsehoods of life and (the latter) freedom from its pollutions. *ὁσιος*, which is associated with words for 'purity' at He 7²⁶, has special reference to piety, i.e. reverence for the acknowledged sanctities of law and religion. See CLEAN, HOLINESS, and UNCLEAN.

J. MASSIE.

PURPLE (אֲרָמָן 'argāmān; Aram. אֲרָמָן 'argēwān (Dn 5⁷⁻¹⁶); Arab. *arjwān*; *πορφύρα*, *purpura*).—This dye was extracted from the shell-fish *Murex trunculus*, L., and *M. brandaris*, L., and sometimes from *Purpura haemastoma*. Large heaps of the shells of these molluscs are found near Tyre, and outside the south gate of Sidon. The dye was known as Tyrian purple. It was extracted from the throat of the animal, each one yielding a single drop. The exact colour is uncertain, as the art of extracting the dye is lost. The fluid is at first white, then, by exposure, becomes green, and finally reddish purple. The purple (*πορφύρεον*) robe (*ἱμάτιον*) of Jn 19² (cf. *πορφύραν*, Mk 15¹⁷) is called scarlet (*χλαμύδα κοκκίνη*) in Mt 27²⁸. See, further, art. COLOURS in vol. i. p. 457^b.

G. E. POST.

PURSE.—See BAG.

PURTENANCE (an abbrev. of 'appurtenance,' from Lat. *apertinere*, through Old Fr. *apartenir*, *apurtenaunce*) means properly whatever pertains to, and in its single occurrence in AV (Ex 12⁹) is used for the intestines of the Passover lamb (RV 'inwards'). The tr. is from Tindale. Wyclif has 'entrayls.' Cf. *Babees Book*, p. 275, 'Kydde roste with ye heed and the portenance on lamb and pygges feet, with vinegre and percelly theron.'

J. HASTINGS.

PURVEYOR, i.e. 'provider' (Fr. *pourvoyeur*, from Old Fr. *provoir* or *porveoir* = Lat. *providere*), occurs only in To 1¹³ of Tobit, who obtained grace and favour in the eyes of Enemessar and became his *purveyor* (*ἀγοραστής*). The *ἀγοραστής* (lit. 'buyer') was the slave who had to buy provisions for the house (Xen. *Mem.* i. v. 2); cf. the Lat. *obsonator* (Plaut. *Mū.* iii. i. 73; Sen. *Ep.* 47).

J. A. SELBIE.

PUT (AV Phut, except in 1 Ch 1⁸, Nah 3⁹).—Name of an African nation; פֹּת, LXX Φούθ in Gn, Ch (A in Ch Φούθ, Genes. Cotton. Φούθ), in the Prophets Αἰθῆς (except Nah 3⁹, where the rendering *φουγή* appears,* with a false division of the verse); the marginal additions of Q (Marchalianus) twice explain the name fancifully as *σθῆμα*; Vulg. *Phuth*, *Phut* (Ch), in the Prophets *Libyes*, *Libya* (Ezk 30⁵—so AV in Jer and Ezk).

In Gn 10⁶, 1 Ch 1⁸, Put is the third son of Ham. In the Prophets, warriors from Put are principally associated with the armies of Egypt as auxiliaries. Jer 46⁹ 'Cush and Put, that handle the shield, and the Ludim, that handle and bend the bow,' are among 'the mighty men' of Egypt. In Ezk 30⁹ we have a similar enumeration of auxiliaries beginning with Cush and Put. In Nah 3⁹ Thebes (No-amon) has Ethiopia and Egypt as 'her strength,' Put and Lubim as her 'helpers.' A distinction seems to be made here between the subjects of the Ethiopian-Egyptian empire and the independent tribes, living farther off, who appear to have served the Pharaohs only as mercenaries. In Ezk 27¹⁰ Tyrus is said to have had Persia and Lud and Put in her army. An employment of E. African mercenaries in Tyrus is strange, although it does not present greater difficulties than the connexion with various other remote nations, like Persia (but see below). In Ezk 38², however, the circumstance that in the army of the Northern prince Gog from Magog 'Persia, Cush, and Put' appear among the various barbarians from Asia Minor, is very surprising. If we do not wish to accuse the prophet of senselessly accumulating here all obscure names of remote nations known

* This blunder seems to be one of the rare instances where the Egyptian tongue influenced the Alexandrian translators. פֹּת does not exist in Hebrew, nor does it mean 'to flee' in the Semitic languages, but Coptic has פֹּת 'to run, to flee.' Some MSS read פֹּת also in Ezk 27¹⁰; see Field, *Hexapla*.

to him, it is most natural to assume a corruption of the text, due to a reader's having enlarged it from other passages (from 27¹⁰). A blunder of the scholarly Ezekiel, who displays such a wide knowledge of geography, especially in ch. 27, is not very probable. Otherwise, Put would be another country than the one usually designated (see below). The passage must certainly be used with caution. On the other hand, Is 66¹⁹ seems to come in here: 'Put and Lud, that draw the bow,' as the most remote nations. The reading $\Phi\omega\delta$ for Put in the LXX (\aleph $\Phi\omega\delta$) confirms the evident emendation to Put.

These biblical passages are insufficient to determine the situation of the country. However, apart from the difficult and doubtful name Lud, we see the Libyans repeatedly distinguished from Put, e.g. in Gn 10¹³ (see LEHABIM) and Nah 3⁹ (see LUBIM), also in Ezk 30⁶, where we must read *Lub* instead of *Cub*, after the LXX. Therefore the guess of the LXX at the Libyans has little probability. We have rather to look to the east of Africa.

The best interpretation of the name, which is now being more and more generally accepted, is the identification with the country *Punt* (or rather *Puent*?) of the Egyptian inscriptions.* The Persian list of tributary countries in Naksh-i-Rustam (Spiegel, *Pers. Keilinschr.* 119) enumerates Kushiya, Putiya, and Masiya (Babylonian translation *Puta, Kusu, Masu*), confirming the view that Put (with assimilation of the *n*) was the form of the name used by all Semites, and that it signified a part of N. Eastern Africa. The Egyptians pronounced *t* after *n* regularly with a sound which the Greeks translated by δ (cf. $\Phi\omega\delta$ with the correct rendering, not of the Hebrew, but of the Egyptian pronunciation), the Semites by *p*. So Put stands for *Pu(n)t*, quite regularly.

The Egyptian inscriptions mention this country of Punt (later form *Pune*) very frequently after c. 3000 B.C. According to the latest investigations, it comprised the whole African coast of the Red Sea from the desert E. of Upper Egypt to the modern Somali country.† Parts of it, evidently only those in the north (between Souakin and Massoua?), were tributary to the great conquering Pharaohs of the 18th dynasty. Whether the masters of Egypt in prophetic time extended their power so far south is uncertain. But at all times there was intercourse and commerce between Egypt and the southern rich parts of Punt both by land, through the Nubian desert, and by water. We have various inscriptions referring to commercial naval expeditions sent by the Pharaohs, especially in the 12th, 18th, and 20th dynasties, of which that in the time of queen *Ha't-shep(s)ut* has become most famous by the fine pictures illustrating it upon the walls of the temple of Deir el-Bahri in Western Thebes. Already in the 5th dynasty king Assa received a member of the African dwarf-tribes from Punt. The treasures of Punt were: slaves, cattle, gold (from a region called 'Aman), ivory, ebony, ostrich-feathers and -eggs, rare live animals (especially monkeys), greyhounds for hunting, gum, and a number of fragrant substances from various trees or shrubs. The

* Due to G. Ebers in his *Ägypten und die Bücher Moses*, p. 64, accepted, e.g., by Stade (*de Isa. vat. Eth.*). On the weak attempt at contradiction by Dillmann, see the present writer's *Asien*, p. 115.

† A great mass of earlier literature on the much discussed situation of this country is antiquated. Formerly scholars tried to identify Punt with Southern Arabia, then (after Maspero) they located it on both sides of the Red Sea. The latest literature will be found in Krall, *Das Land Punt* ('Sitzungsberichte Akad. Vienna', cxxi. 1890); Naville, *Deir el-Bahri*, iii.; W. M. Müller in *Mittheil. vorderas. Gesells.* iii. 1398, 148 (cf. *Asien und Europa*, ch. 7). Glaser (*Mittheil. vorderas. Gesells.* iv. etc.) unfortunately uses some very antiquated sources.

incense needed by the Egyptians for the divine worship and for cosmetics formed the most important product of the country. The parts of Punt producing it were called 'the incense-terraces' (or 'stairs'), apparently situated on the Abyssinian coast (incense in sufficient quantity grows only E. of Bab el-Mandeb), but it would be wrong to limit Punt to these regions. The inhabitants were rude nomadic shepherds, some of them negroes or mixed with negroes, but mostly of the pure Hamitic race, i.e. near relatives of the Egyptians and the other white Africans. Consequently their descendants are the desert tribes called *Troglodytae* (better *Trogodytae*) or *Ichthyophagi* by the Greeks, *Bedja* by the Arabs in the north, Saho and Afar (Danakil) on the Abyssinian coast.* They can hardly have formed a large contingent of the Egyptian armies, because the desert regions north of Abyssinia were too thinly populated. Only the archers of the region *Maza* (*Masiya* of the Persians, see above), more inland, i.e. nearly in the modern province of Taqa, were as popular as policemen and guards as the Nubas are in modern Egypt; this country of the Mazoyu is frequently separated from Punt. But the prophets speaking of Put-Punt evidently did not consider the scanty population of this country. To them it represented all Africa east of Egypt and Ethiopia (i.e. the Nubian Nile valley, not modern Ethiopia or Habesh), an endless and mysterious part of the world. The Phœnicians (cf. Ezk 27¹⁰) may have extended their commercial connexions to what the Greeks called the 'coasts of the aromata,' after the completion of Necho's canal between the Nile and the Red Sea; † before that time the difficulties must have been too great to allow a direct contact.

Commentators who wished to follow the translation of the LXX, compared the Coptic name $\Phi\alpha\iota\alpha\tau$ 'Libya (especially the western part of the Delta), Libyan' (thus Knobel and, following him, Dillmann). The hieroglyphic equivalent of *Phaiat* has not yet been found, but the word looks like a (plural?) denominative from a feminine noun ending in *-et*. This would not at all agree with the ξ (ν) of the Semites, unless an *n* had been assimilated (see above). The Greek translators of the prophets may have thought of this name, nevertheless. See, however, above, the objections from the biblical passages and the confirmation of the reading *Put* from the Persian inscription. Some Egyptologists compare the Egyptian expression for 'foreign warriors,' which they erroneously read *pet*, *pil*, etc. But the Amarna tablets have shown that this expression 'bowmen' was *pedate* (singular 'a troop of bowmen' *pedite(t)*), derived from *pide(t)* 'bow'. Consequently neither the Coptic $\Phi\alpha\iota\alpha\tau$ nor the Semitic *Put* agrees with these formations. How the comparison of 'a river Phut in Mauretania' (i.e. Morocco, which was never even known to the Egyptians!) in Josephus (*Ant.* i. vi. 2) ‡ was seriously considered by modern commentators, remains a mystery.§

W. MAX MÜLLER.

* If we have a right to compare the tribes more to the south-east, we might speak also of the Gallas. The frequent comparison of the Somalis with the 'Punti' is erroneous. The Somalis lived originally only on the eastern coast of modern Somaliland, i.e. at too great a distance. Some writers have tried to find in Punt the original African seat of the 'Phœnicians.' But this idea rests only on the accidental similarity of a Latin pronunciation (Punicus for Phœnicus). No ethnologic connexion between those African savages and the highly cultured Asiatic nation can be found. The position of the Phœnicians in Gn 10 among the Hamites seems to be due to other reasons than those of ethnology.

† See *Mittheil. vorderas. Gesells.* iii. 152, on the completion of the canal.

‡ Called *Phthuth* Ptol. iv. 1, 3; *Fut* Plin. v. 1, and known thus also to Jerome.

§ Winckler (*Forschungen*, i. 513) has raised the question

PUTEOLI (Ποῦτολα, modern Pozzuoli).—The great commercial port of Italy, in what is called now the Bay of Naples, but was at one time called the *Sinus Puteolanus*. It was at this port that St. Paul landed on his journey to Rome (Ac 28¹³). There were already brethren there, and he and St. Luke were entreated to tarry with them seven days. Its name is of doubtful origin, but is attributed either to the putrid smell of the sulphurous springs close by, or to the wells (*putei*) of the place. Cicero, like St. Paul, landed there when he came from Sicily (*pro Planc.* 26). It was the resort of trade from all parts, notably from the East, and the corn supplies for the capital were landed here. Josephus speaks of himself as having landed there after being shipwrecked (*Vit.* 3), and gives its other name of Dicæarchia. There must have been a Jewish population in the place (cf. *Jos. Ant.* XVIII. vi. 4), and this may perhaps account for the presence of Christians there. Some of the ruins of the ancient mole, at which the apostle must have landed, are still in existence.

H. A. REDPATH.

PUTHITES (Πῦθιται, B Μεψιδεῖται, A Ἡφιδεῖται).—One of the families of Kiriath-jearim, 1 Ch 26³. See GENEALOGY, iv. 38.

PUTIEL (Πῦθι, Φουτιήλ).—The father-in-law of Aaron's son Eleazar, Ex 6²⁵ (P). About Putiel we hear nothing more in the OT, and the meaning of the name is uncertain. Gray (*HPN* 210) classes it amongst the late and artificial names characteristic of the lists of P and the Chronicler. It may be half-Egyptian half-Semitic (= 'he whom El gave,' see Dillm.-Ryssel, *Exodus*, *ad loc.*), but even if so, it will not bear all the weight of the argument that Hommel (*AHT* 293, 295) builds upon it in regard to the early history of Israel and the character of the Priests' Code. J. A. SELBIE.

PUYAH.—See PUAH.

PYGARG (פִּיגָרְגַּם *dishōn*).—*Dishōn* occurs only once (Dt 14⁵). It is the fifth name in the Heb. list. In B of the LXX it comes third in order (πίργαργος), *yahmūr* and *'akḥō* being left out, although AF reproduce these by βούβαλος and τραγέλαφος. Both Eng. VSS have adopted 'pygarg' for *dishōn*, but AVm has 'dishon or bison.' We have no certain knowledge of the animal intended by *dishōn*, except that it is to be inferred, from its position in the list, that it was an antelope. If, of the four antelopes found in the deserts contiguous to Pal., *Gazella Dorcas*, L., corresponds to *zēbi*, *Antelope leucoryx*, Pall., to *tēō*, we may adopt A. *Addax*, Licht., for *dishōn*. This species is over 3½ feet high at the shoulders, and shaped like the reindeer. Its horns are spiral, 2½ feet long. Its colour is white, with the exception of a black mane, and a tawny colour on the shoulders and back. It is uncertain whether the fourth antelope, *Alcephalus bubalis*, Pall., is mentioned in Scripture (see UNICORN).

G. E. POST.

whether the *Putu-yaman* mentioned in the fragmentary annals of Nebuchadnezzar does not come in here. This 'Greek-Putu' is mentioned among remote countries in the midst of the sea, which aided Egypt under Amasis against the Babylonians, and this reminds Winckler of Nah 3⁹. But the necessary addition *yaman* (Greek) shows that this country (Winckler supposes Lesbos, suitably to his restoration of the name of the prince, viz. *Pitta* [κῆς], or Caria) is to be distinguished from the ordinary Put of the Bible, the Persians and Babylonians. Perhaps the Put of Ezk 27¹⁰ [ch. 38⁵] might be explained after Winckler, so that we should have two countries called Put—one in Africa, another in the north.

PYRAMID.—Simon the Maccabee is said to have erected a magnificent monument to his parents and his (four) brothers at Modein. This consisted partly of seven pyramids (πυραμίδας), six set up one opposite another, with the seventh (intended apparently for Simon's own monument) probably standing by itself at one of the ends, 1 Mac 13²⁸ (cf. *Jos. Ant.* XIII. vi. 6). Pyramid-graves are, of course, most familiar to us in Egypt, but they were not uncommon elsewhere. There is probably a reference to such graves in Is 14¹⁸ 'all the kings of the earth, all of them, lie in honour, each one in his own house.' The Bible contains no certain special allusion to the pyramids of Egypt, the reference in Job 31⁴, which has been conjectured, being very doubtful (see Dillm. *ad loc.*).

PYRRHUS (Πύρρος: lit. 'fiery-red').—Amongst the companions of St. Paul who accompanied him on his last journey to Jerusalem from Philippi was Sopater of Berea, who in the RV is described as 'son of Pyrrhus' (Ac 20⁴). The word Πύρρου is omitted in TR in accordance with the later authorities, but it is read by all the different classes of older documents (SABDE vulg. boh. sah. Or.), and must clearly have formed part of the original text. Blass (*ad loc.*) points out that this is the only case in the NT in which a patronymic is added after the Greek fashion, and that perhaps it implies that Sopater was of noble birth.

A. C. HEADLAM.

PYTHON.—The reading πύθωνα in Ac 16¹⁶ is attested by the overwhelming evidence of SABCD*. The inferior reading πύθωνος, found in C⁹D² EHLP, is easily explained. The accusative form was not understood. Hence the more intelligible construction with the genitive (cf. Lk 4³³). The reading πύθωνα is obviously the right one (so Lachm. Tisch. WH, Blass).

The name Πύθων as a Greek term must be connected with that of the district Πύθω in Phocis, which lay at the foot of Parnassus where the town Delphi was situated. Its geographical association with the Delphic oracle over which Apollo presided gave rise to the adjective Πύθιος as an epithet of Apollo. His priestess was called ἡ Πύθια. Also the name Πύθων, derived from this local connexion, was bestowed on the serpent whom the god was believed to have slain when he took possession of the Delphic oracle. According to Apollodorus (I. iv. 1) this oracle was formerly in possession of the goddess Themis, and the mysterious chasm, from which the intoxicating and inspiring exhalations issued, was guarded by this serpent, whom Apollo destroyed. The connexion of the serpent with wisdom and soothsaying is based on demonology (see MAGIC in vol. iii. pp. 209 (footnote), 210). Cf. Gn 3¹, Mt 10¹⁶.

In the present passage it is clear that what is implied is that the girl was considered to be possessed of a soothsaying demon. In the language of the OT she would probably be called a בְּלֵטָה אִיבָה (1 S 28⁷). The word אִיבָה, however, is employed by itself to convey this meaning, and is reproduced in the LXX by ἐγγαστριμύθος (Lv 19²¹ 20²⁷). The Syriac version on Ac 16¹⁶ renders

by ذُومَلْ بَصُفْكَ 'soothsaying spirit' (lit. 'spirit of soothsaying'). See art. SOOTHSAYING; cf. also *Necromancy* under SORCERY.

OWEN C. WHITEHOUSE.

Q

QOHELETH.—See ECCLESIASTES.

QUAIL (קָרַי [Kerē rāy] *sēlāw*, in Nu 11³¹ plur. קָרַיִם, which implies a sing. קָרַי *saluach*; *ōpruyō-mirpa*, *coturnix*; Arab. *selwa*).—A well-known migratory bird, *Coturnix vulgaris*, L. A few individuals remain in Egypt and the Holy Land throughout the year. The migrators arrive in abundance, on their way north towards the beginning of March, and again on their way south in November. Some pass through without stopping, while others remain to breed. Their arrival is heralded by their peculiar call, especially early in the morning and at sunset. They migrate in vast flocks, crossing the Arab. desert, flying for the most part at night. They also cross the Mediterranean, selecting as their places of passage the narrowest portions, as that between Africa and Malta, Sicily, and the Greek islands, etc. They always fly with the wind. Their bodies are so heavy in comparison with the power of their wings that they cannot cross very long reaches of the sea. Many perish, even in the short passage, and those which arrive safe are excessively fatigued. Quails are twice mentioned in connexion with the Wilderness Journeys (Ex 16¹³ [P], Nu 11^{31, 32} [JE], cf. Ps 105⁴⁰). Those which supplied the Israelites came in spring, while on their way northwards. Tristram has shown that they would naturally follow up the Red Sea to its bifurcation, and cross at the narrowest part into the Sinaitic peninsula. A sea wind would bring them in immense numbers into the camp which the Israelites occupied at that time. The miracle consisted in their being directed to the right time and place. Quails, when migrating, begin to arrive at night (Ex 16¹³), and are found in large numbers in the morning (Nu 11^{31, 32}). Their great exhaustion on their arrival makes it easy to believe all that is said in the narrative as to the numbers which the Israelites captured, and the ease with which they were taken.

The quail belongs to the order *Gallinae*, family *Phasianidae*. Its predominant colour is brown, shaded and mottled with rufous and grey, with edgings of black. A buff line extends down over each eye, and another down the centre of the head. Its length is $\frac{1}{2}$ inches. Its flesh is succulent. It is popularly known in Syria as the *fūrri*, an onomatopoeic word, referring to the whirring of its wings as it takes to flight. See, further, Dillm.-Ryssel on Ex 16¹³. G. E. POST.

QUAKE.—To quake (from the same root as 'quick' [=alive], 'quicken,' cf. *Piers Plowman*, 'Quook as hit quyke were') is to shake, usually with fear (so always in AV, where the transit. sense does not occur). Thus He 12¹ 'Moses said, I exceedingly fear and quake' (ἐκφοβῶς ἐμὴ καὶ ἐτρόμος). George Fox in his *Journal* says, 'Justice Bennet of Derby was the first that called us Quakers, because I bid them tremble at the word of the Lord. This was in the year 1650.' Fox had used the verb 'quake,' which probably struck the Justice's ear as odd because already antiquated in this sense. Yet RV retains it everywhere, and adds Mt 28⁴ 'For fear of him the watchers did quake' (for AV 'shake,' Gr. *selew*, which is *trē* 'quake' in AV and RV at 27⁵¹). Amer. RV introduces 'quake' also at Ps 18⁷. J. HASTINGS.

QUALITY is used in Ad. Est 11 heading in the sense

of rank: 'The stock and quality of Mardocheus.' Cf. Shaks. *Henry V.* iv. viii. 95—

'The rest are princes, barons, lords, knights, squires,
And gentlemen of blood and quality.'

QUARREL.—Like Lat. *querela*, from which it comes, through Old Fr. *querelle*, * 'quarrel' originally meant a complaint or cause of complaint. Thus Hall, *Works*, ii. 155, 'It was thy just quarrell, O Saviour, that whiles one Samaritane returned, nine Israelites were healed, and returned not.' Then it was used for any cause or case that had to be pursued or defended, as in Golding's *Calvin's Job*, 559, 'Although Job had a just and reasonable quarrell, yet did he farre overshote himself'; and p. 573, 'Sometymes we will be ashamed to mainteyne a good quarrell, bycause wee see that men do but make a mocke at it.' This is the sense in which the word is used in AV: Lv 25²⁵ 'I will bring a sword upon you that shall avenge the quarrel of my covenant' (RV 'execute the vengeance'); 2 K 5⁷ 'See how he seeketh a quarrel against me' (RVm 'an occasion'); Mk 6¹⁹ 'Herodias had a quarrel against him' (AVm 'an inward grudge,' RV 'set herself against him,' Gr. ἐνείχετο αὐτῷ); except in Col 3¹⁵ 'If any man have a quarrel against any,' where the meaning is rather 'complaint,' as AVm and RV; Gr. *μουφή*.

The verb 'to quarrel' occurs in AV Preface in the transit. sense of oppose, object to. Cf. Melvill, *Diary*, 370, 'At the quihlik word the King interrupts me, and clobberlie quarrels our meeting, alleaging it was without warrant and seditious.' The modern intrans. meaning of the verb is found in Sir 31²⁰, and RV introduces it at Pr 20³.

J. HASTINGS.

QUARRY.—In 1 K 6⁷ it is said that the temple was built of stone made ready 'at the quarry' (RV; AV has 'before it was brought thither,' RVm 'when it was brought away'). The MT, whose correctness is not above suspicion, is קָרַי לִבְנוֹתֵי הַמִּקְדָּשׁ; LXX λίθοις ἀπορτίμοις ἀργείοις; Vulg. *de lapidibus dolatis atque perfectis*. The rendering 'quarry' or 'quarrying' for קָרַי is probably correct (cf. the use of the root קָרַי in Hiphil in 1 K 5³¹ [Eng. 17] and Ec 10⁹), and the meaning is that the huge stones spoken of in 5³¹ (17) were dressed before leaving the quarry (for this practice cf. Benzinger, *Heb. Arch.* 237). For the process of quarrying as carried on by the Egyptians in early times, see Maspero, *Dawn of Civilization*, p. 383 f., and *passim*. It is evident that 1 K 6⁷ breaks the connexion, and this verse is probably a later addition (so Benzinger, Kittel, *et al.*). The statement contained in it gave rise to a variety of fanciful legends tending to the glorification of the temple and its builder (see Benzinger, *Comm. ad loc.*).

The only other occurrence of 'quarry' in the EV is in Jg 3^{19, 20}. According to v. 19, Ehud turned back from 'the quarries that were by Gilgal,' and after the assassination of Eglon he 'escaped while they tarried, and passed beyond the quarries,' v. 20. AVm and RVm offer as an alternative rendering 'graven images'; LXX has τὰ γλυπτά; Vulg. in v. 19 'reversus de Galgalis, ubi erant idola,' in v. 20 'Locum idolorum.' The Hebrew is קָרַיִם, which is used as plural to קָרַי, and is employed of images of gods in wood, stone, or metal, Dt 7^{5, 20} 12³, Is 21⁹ 30²², 2 Ch 34⁴. Moore, who considers that 'quarries' is an unwarranted translation, proposes

* The spelling has been assimilated to the distinct word 'quarrel,' a square-headed crossbow bolt (Low Lat. *quadrellum*)

rendering 'sculptured stones (probably rude stone images). They may be the same as the stones which, according to popular tradition, Joshua erected to commemorate the passage of the Jordan (Jos 4²⁰), or, possibly boundary stones, marking the last Moabite outpost (cf. Jg 3²⁶). See, further, Budde ('Richter' in *Kurzer Hdcom. ad loc.*), who thinks the *Pēšilim* probably marked the Jordan ford at Gilgal, and that the ford was known by this name. For Jos 7³ (RVm) see SHEBARIM.

In Is 51¹ כָּקֵה בֹר (lit. 'excavation of a pit') is used for quarry in a fig. sense: 'Look unto the rock whence ye were hewn, and to the hole of the pit (ἐἰς τὸν βόθρον τοῦ λάκκου) whence ye were digged.' On a Rabbinical conceit regarding this passage see PETER (FIRST EPISTLE OF) in vol. iii. p. 795^b. See, further, art. STONE. J. A. SELBIE.

QUARTUS (Κούαρτος).—Mentioned with Erastus, the treasurer of Corinth, as joining in St. Paul's greeting to the Church of Rome, Ro 16²³. He is commemorated Nov. 3. Later traditions will be found in *Acta Sanctorum*, Nov., i. p. 585.

A. C. HEADLAM.

QUATERNION (τετράδιον) means a group consisting of four persons or things. The Greek word is ἀπαξ λεγ. in NT, being found only in Ac 12⁴ παραδόντες τέσσαρας τετράδιους στρατιωτῶν φυλάσσειν αὐτόν, Vulg. *quatuor quaternionibus*. A Roman watch consisted, Polybius tells us, of four men (vi. 33: τὸ φυλάκειον ἔστιν ἐκ τεττάρων ἀνδρῶν), and Vegetius (*de Re Militari*, iii. 8) writes: 'De singulis centuriis quaterni equites et quaterni pedites excubitus noctibus faciunt.' The same author goes on to explain that the night was divided into four watches of three hours each; cf. Jerome, *Epist.* 140. 8 (ed. Vallarsi). It seems that one member of the quaternion watched (while the other three slept) through each watch. It appears from Jn 19²³ (cf. *Ev. Petr.* 9) that a τετράδιον was on guard during the Crucifixion, and from Mt 27³⁶ (ἔχετε κουστωδίας) perhaps that the same quaternion was on duty at the time of the Resurrection; but see GUARD, 4.

Τετράδιον occurs in Philo (*adv. Flaccum*, ii. 533. 25, ed. Mangey) with the same colouring as in NT, στρατιωτῶν τετράδιον τῶν ἐν τοῖς τετράδιοις φυλάκων, and fairly frequently in late authors in the sense of a quire of a book containing four double leaves, i.e. sixteen pages. The Latin form *quaternio* is rare, and occurs only once in the Vulgate, if we may trust Duttripon. The Peshitta of Ac 12⁴ ('sixteen soldiers') misses the clear reference to Roman military custom. On this subject cf. Marquardt and Mommsen, *Handb. der röm. Alterthümer*, v. 407 (ed. 1876). W. EMERY BARNES.

QUEEN.—1. The usual Heb. term for 'queen' in the OT is מַלְכָּה (in Dn 5¹⁰ Aram. stat. emph. מַלְכָּה); LXX βασιλισσα; with the verb מָלַךְ 'to be queen', Hiph. 'to make queen,' Est 2¹⁷. For מַלְכָּה see art. QUEEN OF HEAVEN. The other words so translated in AV are—2. מְדִינָה (lit. 'mistress,' cf. Is 24²) 1 K 11¹⁹ (LXX μετ(ε)ῖται) 15¹³ (ἡγουμένη), 2 K 10¹³ (δυναστεύουσα), 2 Ch 15¹⁶ (LXX om.), Jer 13¹⁸ (οἱ δυναστεύοντες) 29 [Gr. 36]² (βασιλισσα) [RV in the last two passages 'queen-mother']. 3. לָקַח (לָקַח = 'ravish'; cf. Dt 28³⁰, Is 13¹⁶, Zec 14³) only in Ps 45⁹ (βασιλισσα), Neh 2⁶ (παλλακή).* The Aram. form of the word is found in Dn 5²⁴.²⁵ (Theod. in all παλλακή, LXX om.). 4. מְדִינָה (lit. 'princess,' cf. AVm) Is 49²³ (ἀρχουσα). In NT βασιλισσα is alone found—Mt 12⁴², Lk 11³¹, Ac 8²⁷, Rev 18⁷.

In ordinary cases of synonyms it is well to trace the usage of each word in the original; but as in this case the same Hebrew word is used to convey

* Possibly in Jg 5³⁰ (end) מְדִינָה should be read for לָקַח (so Ewald, followed by Bertheau, Oettli, Renan, Kautzsch. For other proposed emendations of the text see Moore, *ad loc.*).

more than one meaning of our English 'queen,' it will conduce to clearness and also be found more suggestive if the usage of the English word in our Bibles be taken as our guide. This has three meanings: the queen reigning in her own right, the queen as the wife of the reigning king, and the queen as the mother of the reigning king.

i. *The queen reigning in her own right*.—The general tendency of the Semitic as of the other groups of nations in strictly historical times has been for women to take other than the first place in governing, and this tendency is very conspicuous in the history of Israel. Possibly the general close connexion in Semitic States of the king with the god (see KING, i. 2) made it appear unseemly that a woman should rule; and though among the Northern Arabians queens seem to have been frequent, as well as in the Southern Arabian kingdom of Sheba (see McCurdy, *HPM* § 334), there is no trace in Israel of any official recognition of women as being capable of the chief government. It is just possible, indeed, that the word Hammolecheth* (1 Ch 7¹⁸), usually understood as the proper name of a Manassite woman, should be translated 'the queen' (so Targ. and many Rabbis, e.g. Kimchi and R. Solomon b. Melek, Vulg.), but corroborative evidence is wholly lacking. The position of Deborah as 'judge' (for parallels in Arabian history see W. R. Smith, *Kinship*, pp. 104, 171) was quite abnormal, and presumably due solely to her personal vigour and character. So too Athaliah, who reigned (מָלָכָה) over Judah six years (2 K 11³, 2 Ch 22¹²), was a mere usurper, and traded on her earlier influence and position. Hence 'queen' in this first sense is used only of the non-Israelitish queen of SHEBA (מַלְכָּה מְלִיכָה 1 K 10¹⁻¹³, 2 Ch 9¹⁻¹³, Mt 12²⁴, Lk 11³¹), CANDACE, queen of Ethiopia (Ac 8²⁷), and Babylon personified (Rev 18⁷).

ii. *The queen as the wife of the reigning king*.—Queen in this sense also is hardly found in Israelitish history. In Egypt (1 K 11¹⁹) Pharaoh gives Hadad to wife the sister of Tahpenes the queen (הַיִּיִּתִּי, but the text is very doubtful). In Persia Vashti (Est 1) and Esther (Est 2) and *passim* are successively called the queen (מַלְכָּה) of Ahasuerus. And again 'queen' is used in Neh 2⁶ in reference to the royal consort (לֵקַיִשׁ) of Artaxerxes Longimanus. In Dn 5²⁴.²⁵, however, לֵקַיִשׁ is used of royal wives of lower rank. In Israel, on the contrary, 'queen' in this sense is used only indirectly and in poetry. So מְלִיכָה (βασιλισσα) in Ca 6⁸ of wives who enjoyed some higher (perhaps more legal) status than mere concubines (שִׁפּוֹת, παλλακαί). In Ps 45⁹ לֵקַיִשׁ is used of the one legitimate wife.

iii. *The queen as the mother of the reigning king* (מַלְכָּה אִם 1 K 2¹⁹, 2 K 24¹⁸).—Strange as it is to modern ideas that the queen-mother should be the queen *par excellence*, it is very common in the East (e.g. China in our own time), and perhaps almost the necessary result of polygamy (see FAMILY in vol. i. p. 847).† 'Queen' occurs in this sense in the Bible of a non-Israelite only in Dn 5¹⁰ ¹⁸, where the mother (apparently) of Belshazzar is so called (מַלְכָּה);‡ but it is used more often of Israelites. In fact the queen-mother appears to have had a regular official status both in the Northern and in the Southern kingdom, which in part accounts for the frequency with which the name of the mother of the king is recorded (see below), and the im-

* The reading, however, is not certain. The Peshitta (which some think to be in Chronicles a Jewish Targum of 3rd cent. A.D.) reads *Maachah*.

† So among the negroes of West Africa the mother has incomparably more influence than the wife. See Miss M. H. Kingsley, *West African Studies*, 1899.

‡ Commentators have compared Amastris, the wife of Xerxes and mother of Artaxerxes I. (Herod. vii. 61), and Parysatis, the wife of Darius and mother of Artaxerxes Mnemon and Cyrus (Xen. *Anab.* i. i. 1).

portance attached to some of her actions. The actual term 'queen' (מַלְכָּה) is used only of Jezebel (2 K 10¹³ prob.), Maacah (1 K 15¹² = 2 Ch 15¹⁶), and Nehushta (Jer 13¹⁸ 29²). The semi-royal state, however, of Bathsheba, Solomon's mother, is shown in 1 K 2¹⁹, where Solomon sits on his throne and sets a throne for 'the king's mother,' and she sits on his right hand. The importance, too, of Maacah, Asa's 'mother' (i.e. probably grandmother), who had retained her influence from the reign of Abijah, is shown by the mention of her idolatry, and of Asa's destruction of the monstrous figure that she had made (1 K 15¹³ = 2 Ch 15¹⁶).

Atthaliah has been already mentioned. Nehushta, from Jeremiah's bitter words in Jer 22²⁶, appears to have used her official position to take an active part against Jeremiah and his policy of submitting to the Chaldeans.

From Jer 13¹⁸ the queen-mother appears to have worn a crown (כִּתְרָה, στέφανος) more or less like the king's, but the 'head tire' (RV) is a translation of a doubtful reading. In Jg 5³⁰, Ewald, by a slight textual change, renders 'for the neck of the queen' (see Moore, *in loc.*).

For the names of the mothers of the kings of Judah see GENEALOGY in vol. ii. p. 126^b. In the case of the kings of Israel the only names found are Zeruah the mother of Jeroboam I. (1 K 11²⁶) and Jezebel the mother of Ahaziah (presumably, cf. 1 K 22²²) and Joram (prob. 2 K 3¹³ 10¹³).

A. LUKYN WILLIAMS.

QUEEN OF HEAVEN, THE.—מַלְכָּה שָׁמַיִם *m'le-kheth hash-shamayim*, or in a few MSS מַלְכָּה שָׁמַיִם *m'le'kheth*, etc.; τῆ στρατιᾶ τοῦ οὐρανοῦ, 'the host of heaven,' in Jer 7¹⁸, but τῆ βασιλείας τοῦ οὐρανοῦ, 'the queen of heaven,' in Jer 44 [Gr. 51] 17. 18. 19. 26, except N* in v. 26 τῆ Βαλ; in v. 15 two late cursives give as the rendering of the Heb. represented by '(Then all the men which knew that their wives burned incense) unto other gods,' θεοῖς ἑτέροις τῆ στρατιᾶ τοῦ οὐρ; with a few exceptions the other LXX MSS have no equivalent for 'unto other gods'; Aq., Symm., and Theod. in 7¹⁸, and Symm. in 44 [51] 18 τῆ βασ. τ. οὐρ; *reginae caeli*, but also in Jerome (Kuenen, *Abhandl.* p. 187, Germ. tr.), *militiae caeli*; Syr. (Lee), 'for the worship (ܩܝܣܬܐ) of heaven' in 7¹⁸ 44¹⁷ 18. 26, 'for the queen (ܩܝܣܬܐ) of heaven' in 44¹⁹; Targ. כוכב שמים 'star(s) of heaven'; according to Jastrow, *the planet Venus*.

The reading מַלְכָּה *m'le'kheth* is set aside by common consent as a late emendation due to the tradition that מַלְכָּה here was to be interpreted as מַלְכָּה. The pointing מַלְכָּה *m'le'kheth*, is sometimes explained as an intentional variation of *malkath*, 'queen-of,' meant to suggest that a false goddess was not a legitimate queen, just as *ham-Melekh*, 'the king,' when used of a false god, receives the vowels of *bosheth*, 'shame,' and becomes *ham-Molekh*. But more probably the pointing indicates that מַלְכָּה was identified with מַלְכָּה 'work,' the silent Aleph having dropped (as sometimes happens, Ges.-Kautzsch ²⁶, § 23. 3).

M'lekheth, thus identified, was taken by the Syriac, also by Kimchi, in the sense of 'service' or 'worship,' in which it is found in 1 Ch 9¹³ etc.; but it is clearly not the worship, but the object of worship. It was no doubt intended by the punctuators to be taken in the sense of 'the host of heaven.' Probably *m'lekheth* itself was not understood to mean 'host' directly; but the punctuators equated the unusual phrase *m'lekheth hash-sh.* to the more common phrase *zēbā hash-sh.* (Jer. etc.), being partly influenced by the references in Gn 2³ to Creation as God's *m'lekheth*. This view was taken by the LXX in Jer 7¹⁸ (unless the unlikely

view be adopted that the LXX here and in 44 [51] 18 read *zēbā hash-sh.*), and perhaps by the Targ., and was recognized as an alternative by Jerome; cf. above. It has been recently revived by Stade, mainly on the ground that elsewhere Jeremiah speaks of the Jews as worshipping 'other gods' or 'the host (zēbā) of heaven,' and that therefore this phrase should denote a group of objects of worship; cf. also the statement that Manasseh 'built altars for all the host of heaven in the two courts of the house of Jehovah,' 2 K 21⁵. But most critics, e.g. Budde (*Rel. of Isr.* p. 162), Cornill (*SBOT*), Giesebrecht (*Jer.*), Kautzsch (*AT*), Kuenen, hold that the original meaning was 'queen of heaven,' and the proper pointing is *malkath*. The pointing *malkath*, 'kingdom,' has met with little acceptance. It is pointed out that the phrases 'worship of other gods . . . of the host of heaven' may equal 'idolatry, star worship,' and are in no way evidence against the existence of a popular and widespread cult of a particular goddess.

According to 7¹⁸ 44 [51] 15-30 this goddess was offered incense and cakes which 'poured' her, and had been worshipped by the ancestors of the Jews of Jeremiah's time, and by their kings and princes in the cities of Judah, and in the streets of Jerusalem. The Jewish women were specially devoted to this worship.

This 'queen of heaven' can scarcely be a collective term for the stars, and is usually identified with the moon, or some planet or fixed star; most commonly with the Assyrian *Ishtar*, the planet Venus (also, however, connected with the moon). 'Queen, or princess, of heaven' apparently occurs as a title of *Ishtar*, and she is styled 'Lady of Heaven,' *bilit sam-i-i*, in the Amarna Tablets (Winckler, p. 48 f.); and our goddess may be the Atar-samain (Athar-Astarte), worshipped in North Arabia. Cf. the divine title *Ba'al Shamayin* in Aramaic inscriptions. See ASHTORETH in vol. i. pp. 168^b, 169^b. At Athens cakes in the shape of a full-moon (σεληναι) were offered to the moon-goddess Artemis; and in Arabia similar offerings were made to the goddess Al-Uzza, whose star was Venus, and to the sun (Kuenen, 208). St. Isaac of Antioch (d. c. 460) tells us that the Syrian women worshipped the planet Venus from the roofs of their houses, as a means of preserving and increasing their beauty. *Ishtar* seems to have been identical with *Ashtoreth*; but probably this worship of the 'queen of heaven' was not the ancient Canaanite cult of *Ashtoreth*, but a new worship of the goddess with her Assyrian name and rites, due to the political supremacy of Assyria in the reign of Manasseh.

The title *Regina Caeli* has been given to the Virgin Mary; and at Mukden, the Sacred City of China, there is a temple to the 'Queen of Heaven.' Cf. ASHTORETH.

LITERATURE.—See ASHTORETH in vol. i. p. 108^b note*, p. 160^b note*; and add Giesebrecht, *Jeremiah*, on 7¹⁸; W. H. Bennett, *Jeremiah* xxi.-lii., ch. xv. This article is largely indebted to Kuenen's Essay. W. H. BENNETT.

QUESTION.—The modern sense of 'interrogation' is found in the Synoptic Gospels in the phrase 'ask a question,' Mt 22³, Mk 12³⁴, Lk 24²⁰, the Gr. being always the verb *ἐπερωτᾶω* standing alone. In Lk 24²⁶ Tindale has 'bothe hearynge them and posinge them,' but the meaning is not different, since 'pose' is used in its old sense of interrogate, as in Bacon, *Hist. Henry VII.* 119, 'She posed him and sifted him, to try whether he were the very Duke of York or no.' Tindale was followed by all the Eng. VSS till the Rhem. and Auth., when 'pose' had become antiquated in this sense. The sense of interrogation is found also in

2 Es 8⁶⁶ 'And therefore ask thou no more questions concerning the multitude of them that perish' (Noli ergo adicere inquirendo). A slightly different meaning is found in 1 Es 6³⁰ 'Without further question' (ἀναμφισβήτητος); with which may be compared 1 Co 10^{25, 27} 'Asking no question for conscience' sake' (μηδὲν ἀνακρίνοντες διὰ τῆς συνείδησιν).

The phrase 'to call in question' is in AV more than to dispute; it means to accuse, to bring into judgment. Thus Ac 19⁴⁰ 'We are in danger to be called in question for this day's uproar' (κινδυνεύομεν ἐγκαλεῖσθαι, RV 'we are in danger to be accused'); 23⁶ 'Of the hope and resurrection of the dead I am called in question' (ἐγὼ κρίνομαι; so 24²¹). See CALL in vol. i. p. 344, and cf. Winthrop, *Hist. of New Eng.* i. 172, 'The governour wrote to some of the assistants about it, and, upon advice with the ministers, it was agreed to call them [the offenders] in question.'

Elsewhere the subst. 'question' is used either in the sense of discussion, dispute, or else the subject of discussion, matter of dispute. Thus (1) *Discussion, dispute* (Gr. always *ζητήσις*), Jn 3³ 'Then there arose a question between some of John's disciples and the Jews about purifying'; 2 Ti 2²³ 'Foolish and unlearned questions avoid.' Cf. Ac 28²⁰ Wyc., 'Jewis wenten out fro him, havynge miche question, or seking (Parvey, *ethir* musyng) among hem silf.' Also Shaks. *Henry V.* i. i. 5—

'The scrambling and unquiet time
Did push it out of farther question.'

(2) *Subject of debate*, 1 K 10¹ || 2 Ch 9¹ 'She came to prove him with hard questions' (מְחִיבָה, lit. 'with riddles,' see RIDDLE); 1 K 10³ || 2 Ch 9³ 'And Solomon told her all her questions' (מְחִיבָה, lit. 'her matters'); cf. Mk 11²⁹ 'I will also ask of you one question' (ἓνα λόγον, AVm 'one thing,' RVm 'Gr. word'). Elsewhere only *ζητήματα* and only in Acts, as Ac 23³⁰ 'Whom I perceived to be accused of questions of their law.' Cf. Shaks. *Hamlet*, III. i. 56—

'To be, or not to be: that is the question.'

The verb 'to question' occurs only in the phrase 'question with one' (once 'question among themselves,' Mk 1³⁷), which often meant to dispute, argue with, as Shaks. *Merch. of Venice*, IV. i. 70, 'I pray you, think you question with the Jew'; but in AV it seems never to mean more than 'inquire of.' Thus Lk 23⁹ 'Then he questioned with him in many words (ἐπηρώτα δὲ αὐτὸν ἐν λόγοις *ikarōis*), but he answered him nothing.'

J. HASTINGS.

QUICK, QUICKEN.—Although the adverb 'quickly' in the sense of *speedily* is of frequent occurrence in AV, neither 'quick' nor 'quicken' is ever found with that meaning.

In Is 11³ and some passages in the Apocr. the meaning of 'quick' is *acute* or *active*. Thus Is 11³ 'And shall make him of quick understanding in the fear of the LORD' (מְהִימָה, RV 'His delight shall be in the fear of the Lord,' RVm as AV, see esp. Delitzsch, in *loc.*); Wis 7²² 'Wisdom . . . taught me . . . for in her is an understanding spirit . . . quick' (δξύ, Vulg. *acutus*, RV 'keen'); 8¹¹ 'I shall be found of a quick conceit in judgment' (δξύ ἐν κρίσει, Vulg. *acutus in judicio*). With these passages cf. Knox, *Hist.* 377, 'Many wondred at the silence of John Knox, for in all these quick reasonings hee opened not his mouth'; Melvill, *Diary*, 77, 'Efter earnest prayer, maters war gravlie and cleirly proponit, overtures made be the wysest, douttes reasonit and discussit be the learnedest and maist quick.' We still retain this sense slightly modified in 'quick-witted,' of which an example may be quoted from Tindale,

Pent. Prologue to Lv (p. 297), 'Allegoryes make a man quick witted and prynte wysdome in him and maketh it to abyde, where bare wordes go but in at the one eare and out at the other.' In Sir 31²² the meaning is rather *active* than *acute*, 'In all thy works be quick' (γίνου ἐν ἔργῳ *ἐνρηξής*).

Elsewhere the meaning is *living*, mostly in direct opposition to *dead*, as Nu 16³⁰ 'If . . . they go down quick into the pit,' compared with v. 33 'They . . . went down alive into the pit' (Heb. in both *חַיִּים*, AV follows Tindale, RV 'alive' in both); Ps 55¹⁵ 'Let them go down quick into hell' (RV 'alive into the pit'); clearly in the phrase 'the quick and the dead,' Ac 10⁴², 2 Ti 4¹, 1 P 4⁵. Cf. Jn 7³⁸ Wyc., 'Flodis of quyke watir schulen flowe of his wombe'; Knox, *Works*, iii. 232, 'Thair upon followit sa cruell persecutioun, under the name of justice, that na small number wer burnit quick'; Barlowe, *Dialogue*, 58, 'It is enacted throughout the Svytzerland among the Oecolampadyanes, and in dyvers other places, that whosoever is founde of the Anabaptystes faction, he shall be thrown quycke into the water, and there drowned'; Tindale, *Expositions*, 189, 'As there is no sin in Christ the stock, so can there be none in the quick members, that live and grow in him by faith'; Fuller, *Holy State*, 9, 'He that impoverisheth his children to enrich his widow, destroyes a quick hedge to make a dead one.'

In He 4¹², though the same Gr. word (ζῶν) is used as in the passages quoted above, the meaning is more than merely living, rather *alive*, almost *lively*, 'For the word of God is quick and powerful' (Rhem. 'lively and forcible'). And this is nearest of all to the derivation of the word, its base being the Teut. *kwika*, 'lively,' cognate with Lat. *vivus*. Cf. Milton, *Areopag.* (Hales' ed. p. 7), 'Against defaming it was decreed that none should be traduced by name . . . and this course was quick enough, as Cicero writes, to quell both the desperate wits of other Atheists, and the open way of defaming, as the event shew'd.'

To *quicken* is to *give life to*, whether physically or spiritually. In OT it is always the tr. of *חַיָּה* (Piel of *חָיָה* to live), which also means to preserve life, but when tr^d 'quicken' in AV always means to bless with spiritual life. In NT the Gr. is either *ζωοποιέω* or its compound *συνζωοποιέω* (Eph 2⁵, Col 2¹³, tr^d 'quickened together with'). In Jn 5²¹ the physical and spiritual meanings are placed side by side, 'For as the Father raiseth up the dead and quickeneth them; even so the Son quickeneth whom he will.' J. HASTINGS.

QUICKSANDS (Ac 27¹⁷, RV Syrtis).—The Syrtis, Major and Minor, are situated on the N. coast of Africa, in the wide bay between the headlands of Tunis and Barca. They consist of sandbanks occupying the shores of the Gulfs of Sidra on the coast of Tripoli, and that of Gabes on the coast of Tunis or Carthage. They have been considered a source of danger to mariners from very early times, not only from the shifting of the sands themselves, but owing to the cross currents of the adjoining waters. Thus in the *Aeneid* of Virgil (iv. 40 f.) we find them referred to—

'Hinc Ostiæ urbes, genus insuperabile bello:
Et Numidæ infremi cingunt, et inhospita Syrtis.'

In the last voyage of St. Paul on his way to Italy the ship in which he and his companions were sailing was at the mercy of the tempest, and was drifting before the N.E. wind EURAQUILLO, after leaving the shelter of the island of Cauda. There was every reason, therefore, to fear that they might be driven on the Syrtis, which was situated to the leeward of their course; but owing (it may

be supposed) to the rotatory movement of the wind they were driven into the sea of Adria (Ac 27²⁷).
E. HULL.

QUINTUS MEMMIUS.—See MEMMIUS (QUINTUS).

QUIRINIUS, CENSUS OF.—The statement of St. Luke (21-3) as to how the birth of Christ came to take place at Bethlehem rather than at Nazareth, has produced an amount of discussion of which the world is rather weary. We should have had less of this, if apologists had not been ready to admit, and opponents eager to maintain, that to prove that the evangelist has here made a misstatement, is to imperil, if not demolish, the authority of his Gospel as an inspired writing. Nothing of the kind is at stake. We have no right to assume that inspiration secures infallible chronology; and St. Luke bases his claim to be heard, not on inspiration, but on the excellence of his information and his own careful inquiry (Lk 11-4). Yet even well-informed and careful writers sometimes make mistakes, and he may have done so here.

There is no serious difficulty about the statement that Augustus ordered that there should be a general census throughout the Roman Empire (21). It is true that there is no direct evidence, independent of Luke, of any such decree; and we know that in some provinces no census was held during the reign of Augustus. Nevertheless there is evidence that periodic enrolments were made in Egypt (*Clas. Rev.* Mar. 1893); and a Roman census in Judæa at the time indicated, in consequence of general orders issued by Augustus, is not improbable (Suet. *Aug.* 28, 101, *Cal.* 16; Tac. *Ann.* i. 11. 5, 6; Plin. *Nat. Hist.* iii. 2. 17). The real difficulty is about the parenthetical remark in v. 2.

There has been much discussion about the text of v. 2, but the right reading is certainly ἀρχὴ ἀπογραφῆς πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου: 'This took place as a first enrolment, when Quirinius was governor of Syria.'† And this remark is made in order to distinguish this census from the one in A.D. 6, 7, when Q. certainly was governor and conducted the census (Ac 5³⁷, Jos. *Ant.* XVIII. i. 1, ii. 1). But it is hard to see how Q. could be governor when Herod died in B.C. 4. From B.C. 9 to 6 Sentius Saturninus was governor;‡ from B.C. 6 to 4 Quinctilius Varus. After that nothing is clear till A.D. 6, when P. Sulpicius Quirinius succeeds and holds the census of Ac 5³⁷. Bergmann, Mommsen, Zumpt, and others have shown that this governorship of Q. was probably not his first, but that he was in office during part of the interval between B.C. 4 and A.D. 6, viz. B.C. 3, 2. But it still remains as incredible as ever it was that Q. was governor before the death of Herod; and until that is established we must admit that Luke is at least a year wrong in his chronology. Even Zahn, who denies the later governorship of Q., and asserts that only one census was taken, viz. in B.C. 4 to 2 (to which he refers both Lk 2³ and Ac 5³⁷), is obliged to place the census after Herod's death. No help on this point is obtained from the oft-quoted testimony of Justin Martyr, who in three passages places the birth of Christ ἐν τῇ Κυρηνίῳ, and in one of them says that the birth at Bethlehem may be learned ἐκ τῶν ἀπογραφῶν τῶν γενομένων ἐν τῇ Κυρηνίῳ τοῦ ὑμετέρου ἐν Ἰουδαίᾳ πρῶτον γενομένου ἐκτίρπου (Apol. i. 34, 46; * If the wind in this case had been anti-cyclonic (which is probable) the direction would have changed from N.E. to E. and from E. to S.E. and from this to S. and S.W., which would have driven the ship into the sea of Adria.

† The name is Quirinius, not Quirinus; see Furneaux on Tac. *Ann.* ii. 30. 4; and ἡγεμονεύοντος may = 'was commanding' an army (but cf. the use of the word in Lk 31).

‡ Tertullian (*adv. Marcion*, iv. 19) says that the census was taken by Saturninus; yet he himself places the birth of Christ a.c. 3 (*adv. Jud.* 8).

Dial. 78). But it should be noted that Justin calls Q. ἐκτίρπος, procurator, not legatus, as he was in A.D. 6. The word which Luke uses is indefinite (ἡγεμονεύω), and might be employed of any kind of ruler; but in the only other place in which he uses it (31) it is of the procurator Pontius Pilate. Until Judæa became a Roman province in A.D. 6 there would be no procurator in the strict sense; but Q. may have had some military position in Syria even before the death of Herod, and also have been concerned with the census. And this is perhaps Luke's meaning; he may not be giving a mere date. In any case Christians who were inventing an explanation of the birth at Bethlehem would not be likely to attribute it to Roman and heathen causes. The error, if there be one, has probably foundation in fact; and, moreover, is not the result of confusion with the later census A.D. 6, 7, which Luke himself notices Ac 5³⁷.

The general result is that if a mistake has not been proved, neither has it been disproved. If the accuracy of Luke in many other details were not so conspicuous, one would say that there probably is some mistake. But the error would not be great, if Q. held some office in Syria B.C. 3, 2, and helped to complete a census which was begun before the death of Herod. And there is no error, if Christ's birth is to be placed B.C. 6 (vol. i. p. 405), and Q. was in command in Syria then, which would be the right time for the first of a series of enrolments, of which that in Ac 5³⁷ was the second.*

LITERATURE.—See the commentaries of Farrar and Godet: the *Lives of Christ* by Andrews, Didon, Edersheim, Keim, and B. Weiss; the articles 'Cyrenius' in Smith, *DB*, and 'Schätzung' in Herzog; the monographs of Zumpt on 'Das Geburtsjahr Christi', 1869 (*Bibl. Sacra*, 1870), and of Zahn, 'Die Syr. Statthaltschaft und d. Schätzung des Quirinius,' in *Neue Kirchl. Zeits.* 1893; and above all, Schürer, *HJP* i. ii. 105 ff., and Ramsay, *Was Christ born at Bethlehem?* 1898. See also Haverfield in *Class. Rev.*, July 1900, p. 309.

A. PLUMMER.

QUIT is both an adj. and a verb. 1. The adj., as Skeat shows, is oldest. It comes from Old Fr. *quite* (mod. *quitté*), which is the Lat. *quietus* in its late sense of *free from obligation*. This is the meaning of the word in AV, where it occurs: Ex 21¹⁹ 'If he rise again, and walk abroad upon his staff, then shall he that smote him be quit' (קָרַן); 21²⁰, Jos 2²⁰ (both קָרַן). Cf. Udall's *Erasmus' Paraph.* ii. 279, 'But he that sticketh his brother with the darte of a venomous tongue, although he be quitte by mannes lawes from the crime of manslaughter, yet by the law of the gospel he is giltye of manslaughter'; Jer 25²⁹ Cov. 'ye shall not go quyte.'

2. The verb came from Old Fr. *quiter* (mod. *quitter*), a derivative of Lat. *quietare*. In AV it is used only reflexively, 'quit yourselves like men' (1 S 4^{9b}, Heb. קָרַן לְךָ וְיָ), 'quit you like men' (1 Co 16¹³, Gr. ἀνδρίζεσθε). To 'quit oneself' is to discharge one's obligations; on every man lie the obligations of a man. Cf. Milton, *Samson Agon.* i. 1709—

'Samson hath quit himself
Like Samson.'

J. HASTINGS.

QUIVER represents more than one Heb. word. 1. Gn 27³ for קָרַן *tēlith* (?), a *ἀπαξ* λεγ. meaning literally, if a genuine Heb. word, 'that which is hung,' either a *quiver* (LXX [φάετρα], pseudo-Jon.) or a *sword or knife* (Onk., Pesh., Abulwalid). 2. Usually for קָרַן *ashpāh*, perhaps a loan-word from Assyr. *īspātu*, literal meaning unknown.

The quiver was a very conspicuous part of the equipment of the Eastern warrior; on the Assy.

* Perhaps the possibility of a slip of the pen, Κυρηνίω for Κυρηνίῳ, like 'Barachiah' for 'Jehoiada' (Mt 23³⁵), is just worth mentioning.

reliefs in the British Museum the Assy. soldier is always an archer, and *Elam* his foe regularly *bears the quiver* (Is 22⁶). The famous mounted archers of the East are perhaps alluded to in Job 39²³ 'the quiver rattleth upon him' (RVm), i.e. upon the horse, and the terror caused by them is vividly portrayed in Jer 51⁶ 'Their quiver is as an open sepulchre'; cf. Jer 6²³ 'They ride upon horses.' The LORD Himself has a quiver in which He hides His chosen instruments (Is 49²). When the moment comes for the execution of His judgments, His arrows fly suddenly to the mark (Ps 64⁷). There is a parallel for these metaphors in the speech of al-Hajjāj, the Khalifa Abd al-Melik's governor, to the disaffected inhabitants of Cufa (A.H. 75); 'The Prince of the Believers has spread before him the arrows of his quiver, and has tried every one of them by biting its wood. It is my wood that he has found the hardest and the bitterest, and I am the arrow which he shoots against you' (Stanislas Guyard, 'Mohammedanism', in *Encycl. Brit.* xvi. 571). Another metaphor in the OT is that a man's home circle(?) is his quiver, and his sons, born while he himself is still young, are his arrows (Ps 127⁵); cf. La 3¹², where, conversely, arrows are called 'sons of the quiver' (RVm).

3. In the Pr. Bk. version Ps 11³ reads '[They] make ready their arrows *within the quiver*' (רָכָה בְּתֵּימָה *yetzer*). This translation, though supported by LXX (*ἐν φατέρᾳ*) and Vulg., is wrong. AV and RV (so Pesh.) have rightly 'upon the string.'

4. Ancient authority is strong for translating שָׂרָף *shelātm*, 'shields' (EV) as 'quivers' (2 S 8⁷ = 1 Ch 18⁷, 2 K 11¹⁰ = 2 Ch 23⁸, Ca 4¹, Jer 51¹¹, Ezk 27¹¹). The latter rendering suits Jer 51¹¹ 'fill the quivers,' but it is more probable that in all these passages שָׂרָף has the more general meaning, 'arms, equipment' (cf. *Expository Times*, x. (1898) 43 ff.).

W. EMERY BARNES.

QUOTATIONS.—In OT there are few definite quotations, but the Bible writers freely introduced matter which they found ready to hand. Several books, such as those of the Hexateuch, Jg, 1 and 2 S, etc., are made up, in fact, of previously existing documents (see *HEXATEUCH*, etc.). Shorter extracts are also frequent, esp. poems, such as the Song of Lamech (Gn 4²³⁻²⁴), the Blessing of Jacob (Gn 49²⁻²⁷), the Song and the Blessing of Moses (Ex 15¹⁻¹⁸, Dt 32¹⁻⁴³), etc.; or portions of songs, as Jos 10¹²⁻¹³. In a few instances only is the source mentioned, as 'the Bk. of Jashar' (Jos 10^{13b}, 2 S 1¹⁸, 1 K 8⁵³ LXX), 'the Bk. of the Wars of J' (Nu 21¹⁴). Sometimes they were probably popular songs handed down by oral tradition (Nu 21¹⁷). Often a writer incorporates the language of an earlier writer, as frequently throughout the Psalms, so much so that certain phrases came to be traditional, such as 'praise ye J', 'for His mercy endureth for ever.' It is not always certain whether passages common to two writers are copied from one by the other, or are both taken from one common source, as Is 2²⁻⁴ = Mic 4¹⁻³, which is evidently foreign to the context of Is (note the minatory tone of 2²⁻²³), and, if taken by Isaiah from Micah, proves Is 2 to have been written not earlier than Hezekiah's reign (cf. Jer 28¹⁸ with Mic 3¹² contextually connected with Mic 4¹), and is therefore believed by many to belong to some earlier unknown document. It is also probable that Is 15-16¹² is derived from an earlier source (see 16¹³), and such passages suggest the inquiry whether the insertion of earlier material by biblical writers may not have been much more frequent than is commonly supposed.

i. QUOTATIONS FROM OT IN NT.—These are very frequent and very various in character.

Turpie puts them at 275; but this does not include the very great number of passages incorporated into the language of NT writers, esp. in the Apocalypse.

A. Quotations are usually from LXX—(a) even though differing more or less considerably from MT (1) in pointing, as Ac 15¹⁷ [Am 9¹²] (אִם 'man' for אִם 'Edom'), He 11³¹ [Gn 47³¹] (רֹמֶשׁ 'staff' for רֹמֶשׁ 'bed'); (2) in reading, as Ac 15¹⁷ (אִם 'seek' for אִם 'possess') (Ac 2²⁷ [Ps 16¹⁰] agrees with LXX in following Kerē אִם 'Thy holy one' for Kethibh אִם 'Thy holy ones'); (3) by a probably inaccurate tr. of words, as Ac 2²⁷ [Ps 16¹⁰] (διαφθορά 'destruction' for אִם 'pit'), Ro 10²⁰ [Is 65¹] (ἐμψυχήν 'I was made manifest' for אִם 'I was sought'); and of phrases, as He 2⁶⁻⁸ [Ps 84⁶⁻⁸] (ἀλλότρωσας αὐτὸν βραχὺ τι παρ' ἀγγέλους 'Thou madest him a little lower than the angels' for אִם 'Thou hast made him but little lower than God'); (4) by other differences which cannot easily be accounted for, but are probably due to various readings, as Ro 9²⁷.²⁸ [Is 10²²⁻²³], where, besides other variations, LXX seems to have read אִם for אִם, and אִם for אִם and אִם, and in He 10²⁷.²⁸ [Hab 2⁴], where LXX probably read אִם (with 531 K) for אִם, and אִם for אִם. In He 10²⁷ [Ps 40⁷] it was suggested by Kennicott that אִם (Heb. text) is a corruption of אִם (LXX). If so, it would seem probable that אִם itself was inserted by error from the following line, and that LXX read אִם only; but the Heb. reading with all its difficulty better suits the context, the contrast being between obedience and sacrifice (cf. 1 S 15²²). (b) Sometimes when the argument depends on LXX as distinct from Heb., as in He 1⁷ [Ps 104⁴], where Heb. = 'Who maketh for his messengers winds, for his ministers a flaming fire.' Cf. also Ac 2²⁷, He 2⁷ 10². (c) Generally even by writers conversant with the Heb. as St. Paul and St. John (see I, f, h). (d) To a large extent even when the quotation points to a knowledge of Heb., showing that the writer, even though he had the Heb. before him, or in his mind, still reproduced in part the familiar language of LXX, as Mt 2¹⁸ [Jer 31 (38) 18] (κλαυθμός καὶ ὀδυρμός, LXX κλαυθμοὶ καὶ ὀδυρμοὶ), 12¹⁸⁻²¹ [Is 42¹⁻⁴], where after a quotation, in an independent tr. of Heb. differing in almost every word from LXX, the last verse agrees exactly with LXX, though the latter follows a different text in all three words (κ. ἐν [LXX ἐν] τ. ὄνυματι αὐτοῦ ἐθνη ἐλπιοῦσι 'and in his name shall the Gentiles hope' for אִם 'and the isles shall wait for his law'). It is also possible that this may be the insertion of an early editor of Mt, or a various reading of Heb. followed also by LXX (see J, a; cf. Ro 9⁹).

B. Quotations are occasionally independent translations from the Heb.—(a) because they were so found in the documents which the writer incorporates, as Lk 1¹⁷ [Mal 3¹ and 4⁵⁻⁶] (ἐτοιμάσαι—ἡμεῖς for LXX ἐπιβλέψεται—ἐπιστρέψαι—ἡμεῖς for ἀποκαταστήσει; πατέρων—ἡμεῖς for πατρὶς), 2²⁸ (see J, a); (b) for the sake of the argument, as Jn 19²⁷ [Zec 12¹⁰] (ἐς ὃν ἐξέκέντησαν—ἡμεῖς for ἀνθ' ὧν καταρχήσαντο from variant ἡμεῖς), Ro 9¹⁷ [Ex 9¹⁶], where St. Paul prefers the rendering of אִם 'thou wast preserved,' Ro 12¹⁹ [Dt 32²⁶] (ἐμοὶ ἐκδίκησις—ἡμεῖς for ἐν ἡμέρᾳ ἐκδίκησεως); (c) probably because the writer was better acquainted with the Heb. of the book quoted *memoriter*, as Ro 11⁴ etc. (see I, h).

C. The only quotations in Aramaic or Hebrew-Aramaic are the words on the Cross, Mt 27⁴⁶, Mk 15³⁴ (see I, a (1), (2)), unless we include the words μαρὰν ἀθά 'our Lord cometh' (1 Co 16²²), probably a well-known Christian salutation. See MARANATHA.

D. Some few quotations are based upon an *Aramaic interpretation of the Hebrew*, and suggest the inquiry whether they and others also may not possibly be derived from some intermediate source of the nature of a Targum; or whether, on the other hand, the interpretation was merely influenced by current Aram. usage. Had an Englishman of to-day to translate Milton's 'silly sheep' into French, he would very probably give the first word its modern meaning. In 1 Co 15²⁴ [Is 25⁸] *αἰς* 'for ever' is translated according to the Aram. meaning of the root *els nicos* 'in victory.' In 1 Co 2⁹ [Is 64^{3, 4}] *ἡμεῖς* 'that waiteth for' is apparently read as Aram. *נחמ* 'that loveth' [but see J, a]. It is possible that Mt 24²³ should be traced to some sort of Targumic influence, or at any rate some current traditional interpretation, with which the evangelist's readers were familiar. In the first the words *οὐδαμῶς ἐλαχίστη* seem an intentional emphatic denial of the original words [Mic 5²]. Bethlehem had by the very fact of Messiah's birth become *by no means* the least. *Ἠγεμόν* is either from a variant (see J, a), or at any rate a less literal translation. But the substitution of *γῆ Ἰούδα* for 'land of Ephratah' looks like a slip of memory, and suggests that the whole is a bold paraphrase of the evangelist himself (for parallels see G). Mt 2²³ is evidently from Is 11¹ (*γῆ* 'branch' being from the same root as *Ναζωρεὺς* 'Nazarene'), and suggests a traditional interpretation of the passage in this sense.

E. Apart from B, C, and D, variations from LXX are due to (a) *slips of memory*, (b) *errors of transcription*, (c) *literary corrections*, (d) *exegetical alterations*. But it is not always easy to determine which, or in case of (c) and (d) to say how far they were intentional. In quotations from memory, and even in those copied, there is a natural tendency to correct, unconsciously, according to familiar language and familiar ideas. We should probably be right, when quotations are short, in assigning to (a) verbal changes, considerable perhaps in number, but unimportant in their bearing, as Jn 1²³ [Is 40³] (*ἐνομήσατε τ. ὁδὸν Κυρίου, εὐθείας ποιεῖτε τ. ὁδοὺς τ. θεοῦ ἡμῶν*) becomes the single phrase *εὐθύνετε τ. ὁδὸν Κυρίου*, which gives the full sense more briefly. Probably *Βαβυλώνος* for *Δαυδάσκου* in Ac 7⁴³ [Am 5²⁷] is a slip of memory of either St. Stephen or his reporter, the two captivities being confused (cf. the error about the burial-places of the patriarchs in 7¹⁰). We have a striking example of (b) in He 3⁹ [Ps 95³], where *ἐν δοκιμασίᾳ* is read for *ἐν δοκιμασίᾳ* (LXX), the error being facilitated by *ἐν τ. παραπικρασμῷ* above (unless it is an error of a very early copyist). Under (c) we should class corrections of Hebraisms and other clumsy constructions, as Lk 3⁸ [Is 40⁴], where *εὐθείαν* (*ὁδόν*) is altered so as to agree with *ὁδούς* added by St. Luke in the next phrase, and *ἡ τραχεία* into *αἱ τραχείαι*. In He 8¹⁰ 10¹⁶ [Jer 31³³] *δῶσω* is omitted so as to give *διδούς* its proper participial construction (cf. Lk 8¹⁰). To this head we might also refer rhetorical expansions, such as the insertion of *λέγει ὁ θεός* or the like in Ac 2¹⁷ 7⁴², Ro 12¹⁹ (in He 10³⁰ spurious) 14¹¹, 1 Co 14³¹, 2 Co 6¹⁷. To (d) would belong the very frequent changes of person, tense, etc., so as to make the quotation more directly applicable. Thus in 2 Co 6¹⁸ [2 S 7¹⁴] *αὐτῷ* and *αὐτός* become *ὑμῖν* and *ὑμεῖς*, and *υἱός* is boldly changed into *υἱὸς κ. θυγατέρας*, so that Nathan's words respecting David's son become a promise of God to Christians (cf. Ac 1²⁰). In Lk 23⁴⁶ [Ps 31⁵] the future *παράθωμαι* naturally becomes the present *παρίσθαι* in the mouth of our Lord, and in Mk 14²⁷ (Mt 26³¹) [Zec 13⁷] the imper. *παράξτε* becomes the ind. 1st pers. fut. because the action is referred by Christ to God Himself. Sometimes words are added to give a special turn to the quotation, as

τὸν ἀγρον in Mt 27¹⁰ [Zec 11¹³] to refer to the field bought with Judas' money (unless this is a variant of Heb.; see J, a). In He 10²⁷ [Hab 2³] the insertion of *ὁ* converts a Hebraism into a Messianic prophecy. Sometimes words are omitted, and so the quotation gets a more general and dogmatic character, as with *μοῦ* in Ro 1¹⁷, Gal 3¹¹ [Hab 2⁴] (in He 10²⁸ it is transposed). Apparently it had already become a common doctrinal formula. In Gal 3¹³ [Dt 21²³] the omission of *ὑπὸ θεοῦ* makes the statement a general principle, or it may be due to reverence (see Lightfoot, *in loc.*). Still more frequently words were altered. In Gal 4³⁰ [Gn 21¹⁰] the substitution of *τ. ἐλευθέρας* for *μου Ἰσαὰκ* brings out more forcibly the contrast between bondage and freedom. In 1 Co 3²⁰ [Ps 94¹¹] the quotation would be far less applicable without the correction of *ἀνθρώπων* into *σοφῶν*. St. Paul, no doubt, felt the verse to imply that, however wise men might be, God saw their folly. In Eph 4⁸ [Ps 68¹⁸] *ἐλαβες* . . . *ἐν ἀνθρώπῳ* is boldly altered into *ἐδωκε* . . . *τ. ἀνθρώποις*, the latter being probably regarded as an inference from the former, and the statement of v.¹¹ clearly depends upon St. Paul's rendering. With this we might compare Lk 21³⁰ (contrast Mk 13¹⁴), where the manner of fulfilment of Christ's prophecy has been read, but probably unconsciously, into the prophecy itself. Sometimes by abbreviation the words of the original come to be differently applied. Thus in 1 Co 14²¹ [Is 28^{11, 12}] the words represented by *κ. οὐδ' ὁὐτως εἰσακούσονται μου* are made to refer to 'other tongues,' etc., instead of to the refusal to listen to the words of kindness spoken by God through the prophet to which the 'other tongues' stand in direct contrast. In Ac 3²² the phrase *κατὰ πάντα ὅσα* is applied quite differently from its original in Dt 18¹⁸. In 1 P 3^{14, 15} [Is 8^{12, 13}], by changing *αὐτῶν* to *τ. Χριστῶν*, the words are applied to those addressed in the Epistle, but the passage is not cited as a quotation. Even supposing that such changes were to a large extent unconscious, there is enough to show that the writers of NT allowed themselves the greatest freedom in their treatment of the language of OT.

F. *Combined Quotations*.—These are far commoner than is often realized, and are of various kinds. Frequently we find several passages strung together consecutively, as Ro 3¹⁰⁻¹⁸, where there are six separate quotations so combined; cf. He 1⁵⁻¹⁴ etc. In Mk 11¹⁷ (Mt 21¹³, Lk 19⁴⁶) a direct quotation from Is 56⁷ is followed by an allusion to Jer 7¹¹. So far had they been from fulfilling Isaiah's prophecy, that they were acting in the spirit of Jeremiah's contemporaries. Still more frequently different quotations are mixed together. Thus in Ro 9²⁸, St. Paul, probably quoting from his recollection of the Heb., mixed together the sayings about the stone in Is 8¹⁴ and in 28¹⁶, giving the latter, by so doing, a sense *contrary to the original*; or the mixture may have been intentional. However precious Christ was to those who believed, He would prove to many merely a rock of stumbling. For the somewhat similar combination of Is 28¹⁶, Ps 118²², and Is 8¹⁴ in 1 P 2^{6, 7} see H, c. More often the combination suggests that the quotation is made from memory, as Gal 3⁸ from Gn 12³ 18¹⁸, Ac 3²⁵ from Gn 22¹⁸ 12³, Jn 19³⁶ from Ex 12⁴⁶ and Ps 34²⁰. The seven words of Jn 6³¹ seem derived from three distinct sources (Ps 78²⁴, Ex 16¹⁵ 16⁴), and Ac 13²² from at least four (Ps 89²⁰, 1 S 17⁵⁶ 13¹⁴ 23⁵). Very frequently a mere phrase or even a word is inserted from a similar passage. Thus in Mt 21¹⁸ in a quotation from Zec 9⁹ the opening words *ἐκπρε τ. θυγατρὶ Σιών* are from Is 62¹¹. Curiously enough, in the same quotation St. John (12^{14, 15}) begins with *μη φοβοῦ*, apparently from Is 40⁹ (Heb.). In Lk 4^{18, 19} [Is

421. 2] ἀποστείλας τεθραυσμένους ἐν ἀφίσει is adapted from Is 58⁸ (LXX). In Ac 3^{22, 23} [Dt 18^{15, 16, 18, 19}] ψυχὴ . . . ἐξολοθρευθήσεται ἐκ τ. λαοῦ is substituted from Lv 17⁴, this and similar phrases being common and easily remembered. In Ac 7^{6, 7} [Gn 15^{13, 14}] ἀλλοτρία is from Ex 2²². In Ac 7^{30, 34} [Ex 3^{2, 7, 8, 10}] στεναγμοῦ is from Ex 2²⁴. In Ro 11^{26, 27} [Is 59^{20, 21}] θαν ἀφέλωμαι τὰς ἀμαρτίας αὐτῶν is slightly altered from Is 27⁹.

G. *Paraphrastic Quotations* (see also D and E, d).—In some cases the language of a passage of OT is merely paraphrased to express some new thought, as in Ro 10⁸⁻⁹, which is based upon Dt 30¹²⁻¹⁴. Here the original εἰς τ. πέραν τ. θαλάσσης is changed to εἰς τ. ἀβυσσόν, to express the contrast between the descent of Christ in the Incarnation, etc., and His Resurrection, and thus to show that the inward revelation spoken of in Dent. was made possible by Christ and through faith in Him. Certain quotations are believed to be merely references to the general tenor of Scripture, as Jn 7³⁸, which some, on the other hand, regard as a paraphrase of such passages as Is 58¹¹. Similarly, Eph 5¹⁴ may possibly be a paraphrase of Is 60^{1, 19, 20}. Some have supposed Ja 4⁸ to be a paraphrase of some such passage as Wis 6^{11, 22}, but most commentators take the words as a rhetorical question by St. James (as RV). On Mt 2^{6, 23} see D.

H. *Indirect Quotations* (see also D).—It is quite possible that quotations, even though avowedly from Scripture, were taken *directly* from some other source. The possibility of that in 1 Co 2⁹ being from some Aram. document has been already suggested under D. It may here be further noticed that the awkwardness of the construction, unsuited to the context, makes it likely that St. Paul is quoting it as he found it ready to hand, not himself adapting it from the original. It has been thought by some that Eph 5¹⁴ may be a quotation from some early Christian document, but the words διὰ λέγει make this improbable (see G). It is also remarkable that some quotations are made with the same variants by different writers, or by the same writer twice. (a) In some cases the variant may be looked upon as traditional, as the omission of μού [Hab 2⁴] in Ro 1¹⁷, Gal 3¹¹, and probably the order of the commandments in Mk 10¹⁹ (?), Ro 13⁹—adultery, murder, theft—for adultery, theft, murder of Ex 20^{13a}. (LXX), or murder, adultery, theft of Dt 5¹⁷⁻¹⁹ (LXX) and of both (Hebrew). (b) In other cases the agreement may be a coincidence. Thus Mt 18¹⁶, 2 Co 13¹ abbreviate Dt 19¹⁵ (LXX) in nearly the same language. This possibly had become almost a proverb. (c) The agreement may point to a variant in Heb., as Ro 9³³ (10¹¹), or in LXX, as Mk 12²⁶, Ac 7³² (see J, α, δ). (d) In other cases, again, one writer has presumably copied another. Thus Mt and Lk retain many of the peculiarities of the quotations of Mk. It seems likely also that 1 P 2^{6, 7} was influenced by Ro 9³³. Both agree (1) in the combination of Is 28¹⁶ and 8¹⁴; (2) in the reading ἰδοὺ τίθημι (against LXX), which can hardly be an independent translation of Heb., because, whereas St. Paul's mixed quotation is from Heb. throughout (see F), St. Peter, except when he agrees with St. Paul, follows LXX. The agreement of Ro 12¹⁹ and He 10³⁰ with MT י for צדק of LXX and Sam. Pent., proves that the writer of Hebrews, who shows otherwise no knowledge of Heb., must have copied the quotations either from Romans or from some intermediate source. There are no variants of LXX. Still more remarkable is the quotation of Pr 10¹² in 1 P 4⁸ as compared with Ja 5²⁰. In 1 P it is evidently a rather curious and independent rendering of Heb. (בָּאֵל being translated by πλῆθος); the LXX is quite different. In James we have obviously a refer-

ence to this very translation. If, as is generally believed, James is earlier than 1 P, both quotations and reference are derived from some other document. (e) When a writer quotes a passage twice with the same variant, as in Ro 9³³ 10¹¹, He 8¹⁰ 10¹⁶ (omission of δῶσω), the most probable explanation is that he consciously or unconsciously copied his own correction.

I. *Manner of quotation in different books (or sources) of NT.*—(a) *Synoptic Tradition.* (1) In Mk out of 20 quotations (excluding reference in 12¹⁹), of which all but one are sayings of our Lord, 16 are either exact, or very slightly altered, quotations of LXX. Of the remaining four 1^{2b} is probably an early interpolation into Synoptic tradition, not being in the corresponding place in either Mt or Lk, and breaking the obvious connexion between 1^{2a} and 1³; Mk 12^{29, 30} [Dt 6^{4, 5}] is the great ὁμοῖον, which from its frequent use in devotion was probably known to Greek Jews in its Heb. form, and was hence independently translated; 14²⁷ contains words of Christ which, if quoted as in LXX, would have lost all point; in 15¹⁴ we have words of Christ in their original Hebrew-Aramaic form. The following translation, though influenced by LXX, aims at greater literalness (εἰς τὴν ἰσὶα τὴν, repetition of μου, non-addition of the curious πρόσθετος μοι). It seems that the writer, while he had received and retained a few sayings of our Lord as actually uttered, generally used LXX as a matter of course. (2) Mt reproduces *all* the Synoptic quotations, except the doubtful Mk 1^{2b}, and very nearly as he finds them, but with a slight tendency (perhaps unconscious) to assimilate to LXX, Heb., or Aram., as perhaps in 19¹⁸ (order of LXX in Dt, of LXX and Heb. in Ex and Dt), 22³² (+ εἰμὶ LXX), 22³⁷ (ἐν=Heb. ב for ἐξ; διαβολά, a LXX transl. of צדק for לִשְׁחָדָה), 27⁴⁶ (καθὼν LXX), 27⁴⁶ (יָמֵי (?) Heb. and Aram. for יָמֵי; יָמֵי (?) Aram. for Heb. יָמֵי). The following translation is a little less bold, as also the reference to Dt 25⁵ in 22³⁴. (3) Lk out of 19 Synoptic quotations (excluding Mk 1^{2b}, which Lk has in quite a different connexion) omits 8 and treats the rest with greater freedom, chiefly for literary reasons, as 3⁴⁻⁵ (where the continuation of the quotation increases the rhetorical effect. See also E, c). For the same purpose he abridges in 8¹⁰ 10²⁷ 20¹⁷ 18²⁰ 19⁴⁶. In the last he, *so far only*, agrees with Mt. In 10²⁷ he apparently combines Mk 12^{29, 30} and Mt 22³⁷, reading ἐξ . . . καρδίας and ἐν . . . ψυχῇ, etc., and both לִשְׁחָדָה and διαβολά. 20¹⁷ is altered so as to agree exactly with LXX. The word καθὼν in 20²³, though also in Mt, probably comes therefore from the same source. (b) *The portions common to Mt and Lk and not to Mk.* Quotations are found only in the account of the Temptation (Mt 4^{4, 6, 7, 10}, Lk 4^{4, 10, 11, 12, 8}), and are based in both on LXX. The 1st quotation is exact in Lk, in Mt longer, and *part only*, that not common with Lk, varies from LXX; the 2nd is abbreviated in both, but esp. Mt, which omits the whole clause τοῦ διαφυλάξει σε—δοῖς σου, Lk retaining the first three words. Both split up the quotation into two parts, Mt adding καὶ before ἐπὶ, Lk καὶ οὖν. The third is exact in both. In the fourth *both* substitute προσκυνήσεις for φοβηθήσῃ. The kind of assimilation thus exhibited, in connexion with the difference in the order of the temptations, suggests that in both the quotations were taken, not from LXX, but from some other common source, probably preserved by oral tradition. (c) *Original quotations of Mt.* These exhibit considerable variety of character, 3 only (27^{30b}) is an interpolation from Jn 19³⁴) being derived from LXX, 21¹⁶ [Ps 8²] exactly, where Heb. יָמֵי was inappropriate, or at least ambiguous; 1²² [Is 7¹⁴] (notice, besides the doubtful παρθένος, ἐν γαστρὶ, Ἐμμανουήλ so spelt) with several alterations, prob-

ably through fault of memory; 18¹⁶ (adds *τὰς* before *ῥήμα*) much abridged. The rest are from the Heb., as 2¹⁵ 8⁷, though often showing the influence of LXX (see A, d), as 2¹⁸ 11¹⁰ 12¹⁸⁻²¹ 13³⁸ 21¹; and often very singularly paraphrased, as 2²⁶ 22⁷ 27^{9, 10} (see D; E, d). (d) *Quotations of a 'Gospel of the Infancy'* (originally Aramaic?). Lk 2²⁴ is, curiously enough, an exact quotation from LXX, though from Lv 5¹¹, not Lv 12³, the passage actually referred to, and is probably an insertion by St. Luke into the earlier translation of an original Aram. document; 1¹⁷ is a paraphrastic reference to Mal 4^{5, 6} 3¹, based on Heb. (see B); 2²³ depends apparently on a variant of Heb. (see J, a). (e) *The Original quotations of Lk*, 4¹⁸ and 23⁴⁶, are both from LXX; the first a combination of Is 61^{1, 2} 58⁶, with a slight change of order and construction, the second with necessary alteration of the text. (f) *St. John's Gospel*. Quotations are marked by brevity and freedom, with a tendency to attach more importance to mystical and hidden meanings than to the literal sense of the words; usually from LXX, as 10^{4, 4} 12³⁸, but occasionally from Heb., as 13¹⁸ 19³⁷ (see B), in both of which differences between LXX and Heb. are very great; but often so unlike either as to make it uncertain which the writer had in his mind, as 12⁴⁰ (*ἰδοὺ μοι* LXX, but see J, a). On 7³⁸ see G. Combined quotations are frequent (see F), as 6³¹ 12^{14, 15} 15³⁶ [Ps 35¹⁰ or 69⁴ and 109³] 19³⁶. There are only 4 quotations common to any of the Synoptists, 1³ 8¹⁷ 12¹⁸ 12³⁰ (Mt 27³⁵ is spurious); of these the second and third to Mt only. In all there is an independent rendering, and in 12¹⁸ a different combination. (g) *The Acts*. Quotations are all from LXX, often quite exact, as in the long quotations, 22²⁸⁻²⁹ 24³³; though differing greatly from Heb., as 7^{42, 43}; sometimes following a different text, as 15^{16, 17} (see A, a (1) (2)); frequently abbreviated, as 1²⁰ 3^{22, 23} 7⁴⁰ 13³⁴ 13⁴¹ 15^{16, 17}; sometimes expanded, as 2¹⁷⁻²¹ (for literary effect), and often combined, as 3²³ 13²² etc. (see F). On 7^{42, 43} see E, a. (h) *St. Paul's Epistles*. Quotations are usually from LXX, as Ro 9²⁸, but knowledge is shown of Heb., as Ro 9¹⁷ (see B, b) 10¹⁸ (*ὑπαίτιοι*) 11⁴ 12¹⁹. In Ro, and to a less extent in 1 Co, the quotations from Pent. and Ps. are very largely exact from LXX; those from the prophetic and historical books vary considerably from LXX, are usually free, but often contain elements from Hebrew. It would seem probable that the former are usually copied from LXX, the rest quoted *memoriter*. In Ro, out of 31 quotations from Pent. and Ps., only 9 are not practically exact, and of those 10¹⁸⁻¹⁹ is a mere paraphrase, and Ro 9¹⁷ 12¹⁹ are intentionally taken from Heb.; out of 22 quotations from hist. and proph. books only 3 are exact. In 1 Co, out of 9 quotations from Pent. and Ps., 4 are exact; out of 9 from hist. and proph. books, only one. The change of *ἀνθρώπων* to *σοφῶν* in 3²⁰ [Ps 94¹¹], though difficult, is probably intentional (see E, d). The distinction here pointed out is remarkably illustrated in Ro 3¹⁰⁻¹⁶, where the single quotation from Is (59^{7, 8}, Pr 1¹⁶ is not in LXX) has 2 important variants from LXX, *ἔστις* (LXX *ταχὺν*) and *ἐργάσαν* (LXX *οἰάσαν*), suggesting a *memoriter* quotation, whereas the 5 quotations from Ps. are practically exact from LXX. In Ro 3¹⁰, Ec 7³⁰ is combined, by probably a slip of memory, with the phrase *οὐδὲ εἰς* from Ps 14³ or 53³ (Heb. LXX has *οὐκ ἔστιν ἕως ἐνός*). Of the other Hagiographa, Pr 25^{21, 22a} is quoted from LXX exactly in Ro 12²⁰, Job 5¹³ from Heb. in 1 Co 3¹⁹. For the remarkable quotation in 1 Co 2⁹ see H. In the other Epistles the quotations are too few to make any satisfactory generalizations possible. On Eph 4⁸ 5¹⁴ see E, d, and G, H. (i) *Epistle to the Hebrews*. With the excep-

tion of 10³⁰ (see H), quotations are all from LXX, very numerous and generally exact, suggesting that variations are either intentional alterations, as 8¹⁰ (10¹⁶) 10³⁸ (see E, c, d), or errors of transcription, as 3⁹ (see E, b). We have, however, most probably *memoriter* quotations in 9²⁰, where *τοῦτο* for *ἰδοὺ* looks like an unconscious imitation of the words of institution (cf. Mk 14²⁴ etc.), and 12²⁰, where *θηρίον* for *κτῆνος* can hardly be regarded as an independent translation of *חַיָּוָה*. (j) *St. James*. Of six possible quotations, three, 2⁸ 22⁴ 4⁸, are certainly from LXX, and nearly exact; 2¹¹ may possibly be an independent translation of Heb.; 5²⁰ is certainly so, but is probably from some intermediate source (see H); 4⁸, if a quotation at all, is from an unknown source (see G). (k) *First Ep. of St. Peter*. Though quotations are taken partly, but seldom very exactly, from LXX, as 2⁹ 3¹⁰⁻¹² 3¹⁴, 15 (see E, d), the influence of the Heb. is frequently apparent, as 1^{24, 25} [Is 40⁶⁻⁸] (*ἀνθρώπων* for *ἀνθρώπων* of LXX), 2²² [Is 53⁹] (*εὐφρόνη δόλος* for *δόλος*), 4⁸ (where LXX is quite different, but see H). 2⁷ is probably connected, directly or indirectly, with Ro 9²³, and proves little (see H). (l) *Second Ep. of St. Peter*. The only quotation, 2⁴, is from Heb., nearly every word differing from LXX. (m) *The Apocalypse* contains no definite quotations, but is full of the thoughts and ideas and even language of OT. This last seems in general to point to Heb. rather than to LXX, as in 1⁶, where *βασιλεῖαν*, *λεπεί* is evidently a translation of *מַלְכוּת* *לֵבָשׁ* Ex 19⁶ (LXX has *βασιλευσιν* *λεπτεύματα*), 1⁷ (*μετά*, with Aram. of Dn 7¹³, for LXX *ἐπὶ*; *οἵτινες* *αὐτὸν* *ἐξεκέντησαν*, from Zec 12¹⁰, for *ἀνθ' ὧν* *κατωρχήσαντο*, cf. Jn 19²⁷), 1¹³ (suggested by Dn 10⁶) which has no special LXX word. So 11⁴ (cf. Zec 4^{2, 3, 14}) 14⁸ [cf. Is 21⁹] 14⁸ [cf. Jl 3¹³]. In 6¹⁵ we find the phrase *πᾶς δοῦλος καὶ ἐλεύθερος* instead of *συνεχόμενος κ. ἐγκαταλείμενος* of 1 K 21²¹ (LXX 20²¹). On the other hand, there are some signs of direct or indirect LXX influence, as in 2⁷ (*παράδεισος*, Gn 2⁸ etc.) 6¹⁴ (*βιβλίον*, cf. Is 34⁴ LXX) 18² (*δαίμονιον*, cf. Is 13² LXX), etc.

J. *The bearing of NT quotations on textual criticism*.—(a) When a quotation agrees with Heb. but has a single word or phrase agreeing with LXX, this may have come, not from LXX itself, but from a *various reading of Heb.*, followed also by LXX. Thus in Jn 12⁴⁰ *ἰδοὺ μοι* may point to a variant *ἰδοὺ μοι* for *ἰδοὺ μοι*. In Mt 12²¹ the words *κ. ἐν τ. ὀνόματι αὐτοῦ ἔθνη ἔλπιον*, agreeing exactly with LXX (though so different from Heb.), whereas all the earlier part of the quotation follows a totally different rendering of Heb., may point to *וְיָמֵינוּ יִשְׁמְחוּ* but see A, d. Even where a quotation differs more or less from both LXX and Heb. the difference may have arisen from a *various reading of the latter*. Thus in Mt 2⁶ *ἡγεμόνων* is often referred to a reading *ἡγεμόνων* for *ἡγεμόνων* (see D). Lk 2²³ points to a reading *ἡγεμόνων* for *ἡγεμόνων*; Ro 9²⁸ [Is 28¹⁰] (10¹¹) to *ἡγεμόνων* for *ἡγεμόνων*. Even if the insertion of *ἡ* is merely a mental error, it shows that St. Paul had the Hebrew in his mind, and therefore got *κατασχυνθήσεται*, not from LXX *κατασχυνθήσεται*, but from *כָּבַד*, which LXX also reads. Mt 27¹⁰ may have been based on a text reading *כָּבַד כָּבַד*, with 590, 168, 251, K 2, R, for *כָּבַד* *כָּבַד* (but see E, d), and possibly " *כָּבַד* " for " *כָּבַד* ". It is important also to notice that Mt does not support the otherwise probable reading of *אֲמָר* 'treasury' for *כָּבַד* 'potter.' 1 Co 2⁹ seems originally due to a difference of text, *אֲמָר* for *כָּבַד* for *כָּבַד*, *כָּבַד* for *כָּבַד*, *כָּבַד* for *כָּבַד*, and *כָּבַד* for *כָּבַד* (see D) (on Mt 2⁹ see D, and on Mt 12²¹ see A, d). (b) When a quotation follows LXX almost exactly, but agrees with Heb. in a word or phrase, it raises the suspicion that it follows a *different reading of LXX*, as in Ac 13⁴⁷ [Is 49⁶] (*ρέεικα* for *δέδωκα* of LXX, and

omission of *ἐκ διαθήκης γένους*, which is apparently an interpolation from Is 49³; in Mk 12⁸, Ac 7²⁰ (omission of *ἐκ*; the ultra-Hellenistic speech of St. Stephen is the last place to suspect the influence of Heb. text). The mere fact of a certain number of MSS of LXX agreeing with a quotation is of practically no importance, because they were so frequently altered into agreement with NT quotations. We have the most striking example in Ps 14² (13³ LXX), where the whole cento of quotations in Ro 3¹³⁻¹⁸ has found its way into B and some other MSS of LXX, and hence through the Vulg. into the English Prayer-Book Psalter. (c) It is just possible that quotations may throw light on questions connected with the text of NT itself, as He 3⁹; see E, b.

ii. QUOTATIONS IN NT FROM THE APOCRYPHA AND PSEUDEPIGRAPHICAL JEWISH LITERATURE.—These are not cited as Scripture, and with the exception of Jude 14 [Bk. of Enoch i. 9, tr. by R. H. Charles, Oxford] are not directly cited at all; but there are several references, such as in Lk 12¹⁶⁻²⁰ (cf. Sir 11¹⁸⁻¹⁹) 14⁷⁻¹⁰ (cf. Sir 13⁸⁻¹⁰), Jn 6³⁸ (cf. Sir 24²¹), Ro 12¹³ (cf. Sir 7²⁴), He 1³ (Wis 7²⁰) 4¹²⁻¹³ (cf. Wis 7²²⁻²³), Ja 1¹⁹ (Sir 5¹¹).

iii. QUOTATIONS FROM PAGAN WRITERS.—These are very few, and not always easily recognized. Thus that of Ac 17^{28b} is found both in Aratus, *Phaenom.* 5, and in the *hymn of Cleanthes to Zeus*, 5. The quotation in 1 Co 15³³ is mentioned by Lucian, *Am.* 43, as a saying of Menander from his *Thais*. The quotation of Tit 1¹² is said by early

Christian writers to come from a lost work of Epimenides, called *περὶ χρησμῶν*, but is now found in the *hymn of Callimachus* (an Alexandrian poet of 3rd cent. B.C.) to *Zeus*, 8. In 1 Co 12¹²⁻²⁷ we have probably a reference to the fable of Menenius Agrippa. But it is very uncertain whether these quotations, etc., point to a wide knowledge of pagan literature on St. Paul's part, or would not rather from their proverbial character have been generally known by men of very moderate culture (see Farrar's *Life of St. Paul*, vol. i. Exc. iii.).

LITERATURE.—Turple, *The OT in the New* is, in spite of the one-sided aims of the writer and many inaccuracies, a very useful book when used with proper reference to good critical editions and commentaries, and has been of great service in writing this article. The quotations of OT are taken from *OT in Greek*, edited by H. B. Swete, Cambridge, those of NT usually from the revised text of Greek Test., Oxford. See also L. Cappellus, *Quæst. de loc. parall. Vet. et Nov. Test.* 1650; Surenhusius, *דברי יסוד ופירוש פסוקים שונים*, 1713; Roepe, *de Vet. Test. Loc. in apost. libr. allegatiōne*, 1827; Tholuck, *Das Alt. Test. i. NT*, 1849; Kautzsch, *de Vet. Test. loc. a Paulo allegatis*, 1869; C. Taylor, *The Gospel in the Law*, 1869; Monnet, *Les citations de l'anc. test. d. les ép. de S. Paul*, 1874; Böhl, *AT Citate in NT*, 1878; Toy, *Quotations in the NT*, 1884; Vollmer, *Die AT Citate bei Paulus*, 1895; Johnson, *The Quotations of the New Test. from the Old*, 1896; Dittmar, *Vetus Test. in Novo*, i. 1899; cf. also Jowett, *St. Paul's Epistles*, 1894, vol. i. 185 ff.; Swete, *Introd. to Old Test. in Greek*, 1900, p. 381 ff.; and Thackeray, *St. Paul and Contemp. Jewish Thought*, 1900, p. 181 ff.; and for special NT books, Allen, 'The OT Quotations in St. Mark' in *Expos. Times*, Jan. 1901 (xii. 187), and 'The OT Quotations in St. Matthew' *Expos. Times*, March 1901 (xii. 281); Lightfoot, *Notes on Epistles of St. Paul*, pp. 176 ff., 210 f.; Westcott, *Hebrews*, p. 67 ff.; Mayor, *James*, p. lxi ff. The subject is dealt with in all the Manuals for Bible study.

F. H. WOODS.

R

RAAMA (רָאָמָה only 1 Ch 1⁹) or **RAAMAH** (רָאָמָה).—Son of Cush and father of Sheba (Saba) and Dedan (Gn 10⁷, 1 Ch 1⁹), also mentioned by Ezekiel (27²²) as a trading community by the side of Sheba. The LXX (in Gn A 'Ραγμα; in 1 Ch BA 'Ρεγμα; in Ezk B 'Ραμα, AQ 'Ραμα) identified the word with *Regma*, mentioned as a city by Ptolemy (vi. 7, 14) on the Persian Gulf, which is probably identical with *Regma*, which Steph. Byz. (ed. Westermann, p. 242) describes as a city or a gulf in the Persian Gulf. This latter form of the word (in most MSS practically indistinguishable from the other) may very well be Greek, meaning 'breach.' The above identification is accepted by most authorities, including Glaser (*Skizze*, ii. 325), who adds, however (p. 252), that the name is spelt in inscriptions with a *jim*. It is at present impossible to say whether there is any connexion between the place mentioned by the Greek geographers and the tribe mentioned in Genesis or not. Dillmann thinks Raama may be the *Ραμμανίται* of Strabo (xvi. iv. 24), in S. Arabia, N.W. of *Chatramotite* (= *Hadramaut*; see HAZARMAVETH).

D. S. MARGOLIOUTH.

RAAMIAH (רָאָמִיָּה; B *Naamud*, A 'Pee'lam).—One of the twelve chiefs who returned with Zerubbabel, Neh 7⁷. In the parallel passage, Ezr 2², the name is *Reelaiah* (רֵעֵלִיָּה; B 'Pee'leud, A 'Pee'las), and in 1 Es 5⁹ *RESAIAH* (which s.e.). It is impossible to decide with certainty what was the original reading, although רֵעֵלִיָּה probably represents it more nearly than רָאָמִיָּה.

RAAMSES, RAMESES (רָאָמְסֵס Ex 1¹¹; רָאָמְסֵס Gn 47¹¹, Ex 12²⁷; LXX *Ραμεσσή* [D om. in Gn 47¹¹]).—The city of Raamses was, like Pithom, built by the Israelites for the Pharaoh of the Oppression

(Ex 1¹¹), who has been shown by Dr. Naville's discovery of the site of Pithom to have been Ramses II. of the 19th dynasty (see PITHOM). It was from Raamses or Rameses that the Israelites started when they fled from Egypt; and as the next stage in their journey was Succoth (Ex 12²⁷), Raamses could not have been far from Pithom. It must also have been in the land of Goshen, as is indeed expressly stated in Gn 47¹¹, where Goshen is called proleptically 'the land of Rameses.' According to LXX of Ex 46²⁸ 'the land of Rameses' [D om.] included also Heroopolis or Pithom.

Qosem or Goshen was the capital of the 20th nome of Lower Egypt, and is now represented by Saft el-Henna, at the western end of the Wady Tumilat, north of Belbès, and a little to the east of Zagazig. The 8th nome, of which Pithom was the capital, adjoined the 20th to the east. We should therefore probably look for the site of Raamses somewhere between Belbès and Tel el-Maskhûta. The latter was identified with Raamses by Lepsius, and the identification was perpetuated for a time in the name of Ramses given to the place by the French engineers during the construction of the Fresh-water Canal. Dr. Naville's excavations proved, however, that Tel el-Maskhûta is Pithom, and consequently the site of Raamses must be sought elsewhere.

The city is mentioned in the Egyptian texts. We learn from them that it was built, like Pithom, by Ramses II., from whom it derived its name; and a letter of the scribe Panbesa, translated by Brugsch (*History of Egypt*, Eng. tr. ii. pp. 96-98) and Goodwin (*RP*, 1st ser. vi. p. 11 ff.), gives a long and glowing description of it. Its canals are said to be 'rich in fish, its lakes swarm with bird, its meadows are green with vegetables.' The canal

on the banks of which it stood communicated with the sea, and was called Pa-shet-Hor, 'the mere of Horus,' Brugsch at one time wished to identify it with Tanis (Zoan), where there seems to have been a Pi-Ramessu or 'temple of Ramses,' erected by Ramses II., but the discovery of the position of Pithom obliged him to change his mind. An unedited papyrus in the possession of M. Golénischeff, moreover, distinguishes it from Tanis, and places it between Tanis and Zaru (on the eastern frontier) in a list of the towns of the Delta. 'The land of Ramses' seems to have taken its name from the city.

LITERATURE.—Jacques de Rougé, *Géographie ancienne de la Basse-Egypte*, 1891; H. Brugsch, *Dictionnaire géographique de l'ancienne Egypte*, 1879; Dillmann-Ryssel on Ex 11¹; Driver in Hogarth's *Authority and Archaeology*, 1899, p. 55; Ball, *Light from the East*, p. 109f. A. H. SAYCE.

RABBAH.—1. (רַבָּה; Jos 13²⁵ B 'Αρὰδ, A 'Ραββὰ; 2 S 11¹ 12^{27, 28} 'Ραββὰδ; 1 Ch 20¹ 'Ραββὰν; Am 1¹⁴ 'Ραββὰ; Jer 49[30]³ 'Ραββὰδ; Ezk 25⁵ רַבָּה וְדָלִיּוֹת 'Αμμόν), or more fully *Rabbath-bene-Ammon* = 'Rabbah of the children of Ammon' (רַבָּה בְּנֵי אַמּוֹן; Dt 3¹¹ ἡ ἄκρα τῶν υἱῶν Ἀμμών; 2 S 12²⁶ 17²⁷, Ezk 21²⁰ 'Ραββὰδ υἱῶν Ἀμμών, Jer 49[30]³ 'Ραββὰδ). The chief and, in fact, the only city of the Ammonites mentioned in the OT. It was situated about 25 miles N.E. of the north end of the Dead Sea, in the fruitful valley which forms the upper course of the Jabbok (*ez-Zerka*), now called the *Wādī 'Ammān* (Buhl, *GAP* 48, 260 f.). Under Ptolemy II. (Philadelphus) the city was rebuilt and called Philadelphia, but the original name seems never to have been completely lost, and is still preserved in the modern *'Ammān*.

Apart from the isolated notice in Dt 3¹¹, where a passing reference is made to it as the site of the bed or sarcophagus of Og king of Bashan, and the statement in Jos 13²⁵ that it lay outside the eastern border of the tribe of Gad on the east of Jordan, no allusion is made in the OT to the capital of the Ammonites until the reign of David. According to the narrative of 2 S 10¹⁻¹¹ 12²⁶⁻³¹ (which appears in a condensed and less accurate form in 8²⁴, see SAMUEL, BOOKS OF) an embassy was sent by David to condole with Hanun king of Ammon on the death of his father Nahash. The envoys, however, were grossly insulted by the Ammonite king and his servants, who, in view of the growing power of the Israelite monarch, were inclined, perhaps not unnaturally, to suspect the motives of his embassy. This treatment of the envoys could have but one result, and the Ammonites therefore at once summoned to their aid those southern tribes of the Aramæans who were their more immediate neighbours on the east of Jordan. Meantime the Israelite army, under the command of Joab, had lost no time in invading the country of the Ammonites. Their intention, doubtless, was to lay siege to Rabbah itself; for though he was aware (2 S 16⁷) of the alliance between the Ammonites and Aramæans, Joab does not appear to have realized either the strength or the position of the Aramæan force that was opposed to him, until he had actually come within striking distance of the Ammonite capital (vv. 8-9). The Aramæans, however, as we learn from the Chronicler (1 Ch 19⁷), had penetrated as far south as Medeba, and now threatened to cut off his retreat across the Jordan. Thus hemmed in 'before and behind,' Joab perceived that his only hope of safety lay in assuming the offensive. He therefore divided his army into two, and, having entrusted Abishai with the task of holding the Ammonites in check, himself led 'all the picked men of Israel' in an attack on the more powerful Aramæans. The combined movement was completely successful: the Aramæans fled discomfited, and their example

was soon followed by the Ammonites, who took refuge in Rabbah. Joab, however, did not follow up his advantage, but retired with the army to Jerusalem. In the following year David took the field in person against the Aramæans, who had reassembled under Shobach, captain of the host of Hadadezer, at Helam (probably not far from Damascus), and defeated them with great slaughter (vv. 15-19). The way was now clear for the renewal of the war with the Ammonites, and Joab, with the whole army and the ark (11¹¹), was despatched across the Jordan to ravage the land of the Ammonites, and to lay siege to Rabbah (11¹). If, as the biblical narrative seems to imply, both the sons of Bathsheba were born during this period, the siege of Rabbah must have lasted nearly two years. The aim of the besiegers was doubtless to starve out the city, rather than to take it by storm (11^{20, 21}): the actual fighting was probably confined to the occasions on which the beleaguered garrison attempted a sortie. It was by exposing Uriah the Hittite to one of these sallies that Joab was able to effect David's plan for getting rid of the former (vv. 15-17).

The fate of the city was finally sealed by the capture of the spring of water from which the inhabitants derived their water supply (12²⁷ reading עַיִן הַמַּיִם 'spring of waters' for עִיר הַמַּיִם 'city of waters,' so Klostermann; but see Cheyne [*Expos. Times*, Sept. 1898, p. 143 f.], who would read here and in the preceding verse עִיר מִלְכָּם 'the city of Milcom'): only in this way can we harmonize Joab's message (v. 27¹) with the phrase 'the royal city' (עִיר הַמְּלָכִיָּה) in v. 26. By the latter phrase is probably meant the royal castle or citadel, situated at the apex of the lofty triangular plateau, which seems to have formed the site of the ancient Rabbah. 'The two sides are bounded by wādies which diverge from the apex, where they are divided by a low neck of land, and thence separating, fall into the valley of the Jabbok, which forms the base of the triangle' (Oliphant, *The Land of Gilead*, p. 259 f.). The precipitous character of the wādies—on the one side there is a drop of 300 ft., on the other of 400 ft.—precluded any access to the streams below, save at the (? artificial) depression which separated the citadel from the rest of the city. Hence the capture of the latter virtually placed the city at the mercy of Joab, and assured him of its speedy downfall.* He thereupon despatched messengers to David, bidding him collect the rest of his forces, and superintend the final assault of the city, 'lest,' he adds, 'I take the city, and my name be called upon it'—in token, namely, of its conquest by him. (See, further, on this passage, vol. i. p. 344^a.) David at once responded to Joab's appeal, and shortly after his arrival the city was taken, together with much spoil, including the crown of Milcom (LXX), the god of the Ammonites. (For a full discussion of the treatment of the inhabitants of Rabbah by David, see Driver, *Notes on Samuel*, pp. 226-229).

From the few scattered notices of Rabbah in the writings of the prophets from the 8th cent. onwards, we gather that the city once more reverted to the possession of the Ammonites. Thus Amos, in his denunciation of Ammon (1^{14c}), prophesies the destruction of the wall and palaces of Rabbah, while similar language is used by Jeremiah (49^{2, 3}) shortly before the siege of Jerusalem, and by Ezekiel (25⁵). It is noticeable that the

* The reading of the Hebrew text 'city of waters' is usually explained as referring to the lower town. But (1) the phrase itself is an unlikely one to be applied to a part of the city, (2) there is no reference elsewhere to a division of the city, and (3) the explanation seems due to the present condition of the ruins of *'Ammān*, which date, at earliest, from Roman times.

latter regards Rabbah as no less important politically than Jerusalem itself (21²⁰ [Heb. 23]).

In the 3rd cent. B.C. Rabbah was still a place of considerable importance. After its capture by Ptolemy Philadelphus (B.C. 285-247) it was called Philadelphia, and the surrounding district Philadelphene or Arabia Philadelphensis (Ritter, *Die Erdkunde*, xv. pt. ii. p. 1154 f.). According to Polybius (v. 71), the city underwent a severe and protracted siege under Antiochus the Great, who succeeded in capturing it only through the agency of a captive. The latter revealed the existence of the subterranean passage by which the garrison of the citadel obtained their water supply: the passage was accordingly blocked up, and the garrison forced to surrender. The same authority makes use of the old name *Rabbatamana* (Ραββατάμανα), while Stephen of Byzantium states that it was formerly called *Amāna*, and afterwards *Astarte*. Josephus describes it as the most easterly border-town of Peræa (*BJ* III. iii. 3), and Strabo especially notes it as one of the localities inhabited by a mixed population. It formed one of the cities of the Decapolis, and in the middle of the 4th cent. Ammianus Marcellinus classes it with Bostra and Gerasa as one of the fortified great cities of Coele-Syria (Ritter, *l.c.*). Philadelphia, later, became the seat of a Christian bishop, forming one of the nineteen sees of 'Palæstina tertia' (Reland, *Pal.* 228). Of the Arabic geographers, Mukaddasi (A.D. 985) describes 'Ammān as the capital of the Belkā district, lying on the border of the desert. He mentions the castle of Goliath as situated on the hill overhanging the city, and containing the tomb of Uriah, over which is built a mosque. Yāqūt (iii. 719), in A.D. 1225, mentions it as the city of the emperor Dakiyānūs (Decius): he further relates the Moslem legend, according to which 'Ammān, the founder of the city, was the son of Lot's brother ('Ammān = 'he who is of the uncle'). Abulfeda (A.D. 1321) also assigns the founding of the city to Lot (Guy le Strange, *Pal. under the Moslems*, p. 391 f.). Coins of the city exist with the head of Marcus Aurelius (A.D. 161-180) and the legend 'Philadelphia of Hercules of Coele-Syria'; but, save for a few rude stone monuments, nothing remains in the way of architecture 'which can be referred with any certitude to a pre-Roman period' (see *Survey of E. Pal.* pp. 19-64, where a full description is given of the present site; see also Baedeker² pp. 170-172; Merrill, *East of Jordan*, p. 398 f.).

2. (Jos 15⁵⁰ קריה; B Σωθησα, A Αρεββα; *Arebba*). A city of Judah, apparently near Kiriath-jearim.

J. F. STENNING.

RABBI, RABBONI.—From רב, primarily 'master' in contrast with slave (*Aboth* i. 3; *Sukka* ii. 9; *et al.*), was formed, by the addition of the pronominal suffix, רבִּי ('Paṣṣi, 'Paṣṣei WH), 'my master,' the use of which as a title of respect by which teachers were addressed occurs first within the last century before the destruction of Jerusalem. The Mishna contains several instances of this mode of address (*Nedarim* ix. 5; *Rosh hashana* ii. 9; *Berachoth* ii. 5, 7; *et al.*). In a similar way was formed *Rabboni* (Paṣṣoni Mk 10²¹, Paṣṣoni Jn 20¹⁶, Paṣṣoni WH) from רבִּי or רבִּי (used of God in *Taanith* iii. 8), an Aramaic form of the title used almost exclusively to designate the president of the Sanhedrin, if a descendant of Hillel, from the time of Gamaliel I. (*Aboth* i. 17). In later times the title of Rabbi appears to have been conferred officially upon such as were authorized in Palestine to decide ritual or legal questions (*Baba mezia* 86a; *Sanhedrin* 13b), the corresponding Babylonian title being Rab or Mar; but there is no evidence of its use in this sense before or in the time of Christ. Its suffix, however,

quickly lost its specific force by a process of which parallels are afforded in several languages; and in the NT the word occurs simply as a courteous title of address. Rabboni is even more respectful; and in the two passages where it is used of Christ (Mk 10²¹ and Jn 20¹⁶) the pronominal force may not have entirely disappeared. Neither word occurs in classical use, in the LXX or other Gr. version of the OT, or in the Apocrypha. In the NT the shorter title is applied to Christ in Mt 26²⁵, Mk 9⁵ 11²¹ 14⁴, Jn 1³⁸, 4³ 3² 4³¹ 6²⁵ 9² 11⁸; to John Baptist in Jn 3²⁵; whilst in Mt 23⁷ Christ forbids His disciples to covet or use it. In Jn 1³⁸ a parenthesis states its equivalence in meaning with διδάκαλε, which is in turn cited in Jn 20¹⁶ as a synonym of Rabboni. RVm implicitly supports this explanation in Mt 23⁸, where, however, the text reads καθηγούμενος, a word whose primary meaning of 'guide' naturally suggests that of 'teacher.' See, for further details and for literature, Schürer, *HJP* II. i. 315 ff., and cf. Dalman, *Worte Jesu*, 267, 272 ff. R. W. MOSS.

RABBITH (רַבִּית with art.; B Δαβειθ, A Παββιθ).—A town of Issachar (Jos 19²⁰), probably the modern *Rāba*, on the south part of the range of Gilboa. See *SWP* vol. ii. sheet ix.; Mühlau in Riehm's *HWB* 1252; Guérin, *Samarie*, i. 336; Buhl, *GAP* 204. C. R. CONDER.

RABBONI.—See RABBI.

RAB-MAG (רַב־מַג; B Παβαμαδ, A* Παμδρ, A* Παμδρ, A Παβαμαδ, Q Παβαμαδ [in Jer 39 (46)¹³ Qm² Ποβαμδρ]; Vulg. *Rebmag*).—The title (as is now generally admitted) of a Babylonian official, apparently Nergal-sharezer, who was present at the taking of Jerusalem by Nebuchadnezzar in the 11th year of Zedekiah king of Judah, together with all the rest of the princes (Jer 39 [Gr. 46]²) and all the chief officers (v. 13) of the king of Babylon. Whether the Nergal-sharezer who is here mentioned, and who apparently bears the title, be the Neriglissar of the Greeks, who came to the throne of Babylon in the year B.C. 560 (16 years later), is uncertain, but not by any means improbable. The explanation of the title Rab-mag is a matter of considerable uncertainty. Gesenius explains מַג as *magian*, 'the name of the priests and wise men among the Medes, Persians, and Babylonians' [the inclusion of the Babylonians was pardonable before the inscriptions were made out]. G. Rawlinson and others have compared the title Rab-mag with the Babylonian *Rubū emga*, or, more correctly, *Rubū emqu*; but this, apart from its improbability in consequence of the difference of form, cannot be the original of the term, as it is not a title in the true sense of the word—it simply means 'the deeply-wise prince.' Another etymology for the second element is that of Fried. Delitzsch (cf. also Siegfried-Stade and *Orf. Heb. Lex.*), who suggests that it is the same as the Assyr. *mahhū*, 'soothsayer'; but the objections to this are the differing double consonant, and the absence of the compound *rab-mahhū*. The most probable of the proposed originals appears to the present writer and others to be the title *rab-mugi* (see Pinches in S. A. Smith's *Keilschrifttexte Assurbanipals*, Heft ii. 1887, p. 67, note to l. 89; Sayce, *HCM* p. 456; Winckler, *Orient. Literaturztg.* 1898, p. 40). This word occurs in the text translated by Pinches (K 824, edge, 9) in the accusative (*muga*), and also in the oracles to Esarhaddon (*WAI* 61. l. 26a) in the phrase *atta ina libbi mugi*, 'thou art) in the midst of the princes (?), the two lines which follow being 'I (the goddess Istar) in the midst of my flock (?) advance (and) rest.' A nasalized form, *rab mungi*, also occurs.

T. G. PINCHES.

RAB-SARIS (רַב־סָרִיס; B 'Pafels, A 'Paßapels, in 2 K 18¹⁷; BA Naßovapels, א' Naßovaeels, א' Q Naßovapels, Qm 'Paßapels, in Jer 39 [46]^{12, 13}; Vulg. *Rabsaris, Rabsares*).—This, like RAB-MAG, is now generally and rightly held to be a title, and not a name (see RV). 1. An Assyrian officer who went with the Tartan and the Rab-shakeh, whilst Sennacherib was at Lachish, to demand on behalf of his royal master the surrender of Jerusalem, which was at the time besieged by the Assyrian forces (2 K 18¹⁷). 2. A Babylonian named Sarsechim [?; see art. NERGAL-SHAREZER], who, with 'all the princes' of Nebuchadnezzar, was present at the taking of Jerusalem by that king in the 11th year of Zedekiah king of Judah (Jer 39³). 3. A Babylonian named Nebushazban, who, after the taking of the city, gave authority, with other of the princes of Babylon who are mentioned, for the release and return of Jeremiah, thus enabling him to be taken home and to dwell with his own people (Jer 39¹⁵).

The usual biblical explanation of the word is 'chief of the eunuchs,' or, perhaps with greater probability, 'chief eunuch,' an explanation that agrees with the information yielded by the other Semitic languages, Arabic and Aramaic having practically the same word with this meaning, and also verbs derived therefrom. The word סָרִיס, with its plural סָרִיסִים, is of frequent occurrence in the Hebrew, and not only means 'a eunuch,' but also 'courtier' in general, 'chamberlain.' In 2 K 25¹⁹ it indicates an officer who commanded a division of the army, and POTIPHAR, who was certainly a married man, is called the סָרִיס of Pharaoh in Gn 39¹. The Assyro-Babylonian inscriptions, however, do not furnish us with any word that contains this idea. A רַב־סָרִיס, Rabsaris, named Nabû-sarra-usur, eponym for the year B.C. 683, is named on the tablet 81-2-4. 147 (Berger, *Comptes rendus de l'Acad. des Inscr. et Belles Lettres*, 1886, p. 201; CIS tom. i. fasc. 1, pp. 43, 44), but this title is not rendered in the Assyrian text which accompanies the Aramaic inscription. Winckler (in *Unters. z. altor. Gesch.* 1889, Exkurs v. p. 138) gave the explanation that this word was simply a transcription of the Assyro-Babylonian *rabû-ša-rêsi*, a suggestion that was afterwards confirmed by the discovery of the title in question on the British Museum tablet 82-7-14. 3570, written *rabû-ša-ri-e-šu* (read *rêsu*); cf. *Academy*, June 25, 1892. This expression means 'chief of the heads' or principal men,* and being apparently not a usual title, we may perhaps conclude that it was not often given, and may have been one of great honour. Of its age nothing can be said,—the earliest date known is B.C. 683,—and how long it had been in use before then cannot even be guessed. As to the etymology, that is very simple. The first component part is the common Assyro-Babylonian word *rabû*, meaning, in compounds, 'chief,' equivalent to the Heb. רַב. The second word is the particle *ša*, meaning 'of,' and the third is *rêsu* 'head' (the Heb. ראש), seemingly one of the numerous short words of masculine form which were the same in the plural as in the singular. Whether the Heb. סָרִיס is derived from *ša-rêsu*, without the *rab*, and obtained the meaning of 'eunuch' from the circumstance that many of those who bore the title Rab-saris had authority over the eunuchs, or whether the Hebrews assimilated this Assyro-Babylonian title to a word already well known in their language, and common Semitic property, is unknown; but the former would seem to be the more probable. In any case the word as used in 2 K 18¹⁷ and Jer 39^{12, 13} must be held to represent the

Assyro-Babylonian *rabû-ša-rêsu*, whatever opinion be held with regard to the other passages where it occurs. It is noteworthy that the sibilants are in both cases *s*, for which the Assyro-Babylonian has *š*, affording another proof that the sound transcribed by the latter was often not *sh*, but simply *s*, in later times, in Assyria and Babylonia.

T. G. PINCHES.

RAB-SHAKHEH (רַב־שָׁכֶה; 'Paßákheh, 'Paßákheh; *Rab-saces*).—The title of the officer sent by Sennacherib with the Tartan and the Rab-saris to demand the surrender of Jerusalem, at that time besieged by the Assyrian forces (2 K 18^{17, 19, 20-22, 37} 19^{1, 2}, Is 36^{2, 4, 11-13, 22} 37^{4, 8}). He came, with a great army, accompanied by the other dignitaries who are mentioned, from Lachish, and 'called to the king.' In response to the summons, the officials of Hezekiah's court replied, and the Rab-shakeh pronounced to them a long and insolent message to their royal master, increasing the violence of his tone when requested to speak in Aramaic, and not in Hebrew 'in the ears of all the people that are on the wall.' From this it will be seen that this official was one of some attainments, as, besides his native Assyrian, he must have known Hebrew very well; and the remonstrance of the Jewish representatives of the king who were parleying with him implies that he knew Aramaic also, probably because it was the language of a large section of the Assyrian people, and therefore, in a sense, a second mother-tongue to him. The first opinion of scholars concerning the title Rab-shakeh was that it meant 'chief of the cupbearers';* but there must have been considerable doubt as to the correctness of this rendering, as such an official would hardly have been sent on an errand of this kind. When, therefore, the cuneiform inscriptions began to be more thoroughly studied, the suggestion was made that the Rab-shakeh of the passages quoted was the same as the *rab-saki* of the texts. This word is a compound, consisting of *rab*, const. case of *rabû*, 'chief,'=the Heb. רַב, and *saki*, plural of *saku*, from the Akkad. *saga*, 'head,' the whole meaning 'chief of the heads,' or 'captains' (cf. RAB-SARIS). The list of names of officials printed in WAI ii. pl. 31, No. 2, mentions the *rab-saki* between the *rab-šumgar* or *rab-segar* ('chief of the supply?') and the *saki* or *rêse*, 'officers' or 'captains.' In the time of Tiglath-pileser the Sut-saki who was sent to Tyre as *rab-saki* received tribute from Metenna of that city, from which it may be concluded that the Rab-shakeh or Rab-saki was a military officer of high rank, regarded as possessing some ability as a diplomat. The *Rab-kisir*, 'chief of a force,' also often bore this title (tablet K 1359, col. i. 36, ii. 7, 10, iii. 1, iv. 11). See Schrader, *KAT* 319, 320 [COT ii. 3, 4]; Sayce, *HCM* 441, 442.

T. G. PINCHES.

RACA occurs Mt 5²² only, and in its Greek form is variously spelt—*ῥακά* (WH, with cod. B), *ῥακά* (Tisch. with codd. א* D). It is the Aramaic, רַקָּא, a form of רִיקָן 'empty' (Heb. רֵק), the first *a* in the Greek being due to a Galilean change. The *χ* in Tischendorf's spelling is, like the first *χ* in Ἀρχιδιμάχ (Ac 1¹⁹, codd. ῥΑ), due to the assimilation in the pronunciation of *Κοφ* to the aspirated *Kaph* (Dalman, *Gramm. des Jüd.-Pal. Aramäisch*, pp. 66, 138, 304). *Raca* appears to be a word of contempt, 'empty,' so 'worthless,' intellectually rather than morally, like the worthless (רַק), empty-headed fellows whom Abimelech at Shechem hired to be his followers, Jg 9⁴; like the *κενός*, Ja 2²⁰, the empty-head, who boasts of a faith which is intellectual only; or like the 'ignorant,' called by the Rabbis רַקָּא, because, for

* Cf. Dn 13, where the 'master of his eunuchs' (רַב־סָרִיסִים, LXX and Theod. ἀρχισυνεργός) seems to have had charge of 'the seed royal and the nobles.'

* See Gesenius (Tregelles' tr.), s.v. Luther's translation is generally, in accordance with this, *Erzsenke*.

example, they could not conceive how God could build the gates of Jerusalem of gems 30 cubits high and 30 cubits broad (Edersheim, *Life and Times of Jesus*, i. 538). Obviously, as rebuked by Christ, it is an advance upon mere angry feeling (*ὀργισμένος*), in proportion as utterance is less self-controlled than silence; and, on the other hand, it does not betray so complete a loss of self-control as the word of climax, the more positive *μωρέ*, 'fool,' i.e. godless, good-despising fool, moral reprobate.*

But the precise force of *Raca*, as compared with that of repressed anger and of 'fool,' cannot be estimated apart from the gradations of court or penalty from which Christ draws His analogical illustrations; and these gradations are too readily taken for granted as historical and intelligible, even by some of the foremost commentators in England and in Germany. It is quite commonly assumed (1) that Christ uses *κρίσις* for the local or provincial court in a Jewish town or village; (2) that such a court could try cases of murder; (3) that it could punish the murderer, but only with the sword; (4) that the Sanhedrin (*συνέδριον*) alone could inflict 'the more painful and degrading punishment of stoning'; (5) that *γέεννα τοῦ πυρός* was the valley of Hinnom, and that in it the corpses of criminals were burned, the most degrading and most abhorred punishment of all. But, as a matter of fact, there is, outside this passage itself, no trustworthy evidence for any of these assumptions (see, for instance, GEHENNA, vol. ii. p. 119^b). It is true that the Talmud may be quoted for the second assumption (cf. *Sanhedrin* i. 4, as referred to in Schürer, *HJP* II. i. 154); but this evidence is shaken, first, by the extreme improbability of the statement in the light of the fact that no execution was permitted, even to the Sanhedrin, except by consent of the Procurator (cf. *Jn* 18³¹); and secondly, by the important qualification that the Talmud is often purely academic, speaking of things that ought to be as though they were. The Talmudic passage just cited was not written down till the 2nd cent. A.D., and represents what, in the opinion of the Rabbis, ought to be the procedure, and what would be in an ideal Judah under Rabbinical rule. The same statement is made by Maimonides 1000 years later, when it could not be historically true.† Accordingly, it appears impossible to estimate, with any confidence, the exact relations of 'the judgment,' 'the council,' 'the gehenna of fire,' in our Lord's picture, and therefore, so far, the exact relations of the three stages of anger. Two salient points, however, emerge like headlands out of the mist. (1) Christ hands over all anger, even silent anger, to be tried as a murderous act, to be tried (it should be added) on its merits (cf. *ἐνοχος τῇ κρίσει*), and not *ipso facto* and at once condemned. (2) Christ is no verbal Pharisee. That it is not the utterance of a word, but the spirit of the utterance, that is reprehended, is plain from the fact that He can use *ἀνόητος*, a word, like St. James's *κενέ*, practically identical with *Raca*, when rebuking the spiritual dullness of two of His immediate followers (*Lk* 24²⁸).

J. MASSIE.

RACAL.—Amongst those to whom David is said (*1 S* 30²⁸) to have sent a share of the spoil after his return to Ziklag, are mentioned 'they that were *קָרָקִי*'; but probably the last word ought to be corrected, after the LXX (*ἐν Καρμήλω*), to *קָרָקִי*, 'in

* It seems better to take this word as the voc. of *μωρίς*, one of the LXX translations of *nābil*, 'fool' (cf. the practical atheist of *Is* 32⁶), than as a transliteration of the ptep. *קָרָקִי* 'murmuring,' 'refractory,' *Nu* 20¹⁰ (LXX *ἀπειθεῖς*), there being no evidence that the latter was a common Heb. word of opprobrium. (See *FOOL*).

† On this particular point the present writer is indebted to a private letter from Dr. Neubauer.

RACE.—See GAMES in vol. ii. p. 108.

RACHEL, once (*Jer* 31¹⁵ AV) *Rahel** (*רָחֵל* 'a ewe,' *Gn* 31³² *et al.*; *Ραχήλ*; *Rachel*).—The younger daughter of Laban, whom Jacob, arriving at Haran (*Gn* 29¹⁻⁵), meets, as she comes to water her father's sheep (v. 2^a), at a well in the open country (v. 3). Impressed by her beauty, and deeply in love with her (29¹⁷⁻²⁰), Jacob agrees to serve Laban for seven years, if he may then have her for his wife; but Laban, at the end of the stipulated time, fraudulently substitutes his elder daughter, Leah, and only consents to give him Rachel as well upon his agreeing to serve him seven years more (29²¹⁻²⁰). Leah, though less loved by her husband than Rachel, is blessed with four children; this arouses in her younger sister feelings of discontent and envy, and petulantly reproaching Jacob she bids him take her handmaid, Bilhah, as a concubine (cf. 16²), that she may be 'built up'—i.e. (16³) obtain a family—from her (30¹⁻⁴). Two sons, Dan and Naphtali, are born accordingly to Bilhah: the explanations given of their names (30⁶⁻⁸) are meant to indicate Rachel's recognition that God had now, at least in a measure, granted her her due, and that she had won, after her long 'wrestlings' with her sister, His favour and blessing. 'The struggle of these two women for their husband gives us a strange picture of manners and morals, but must not be judged by our standard' (Payne Smith): at the same time, so far as the temper and attitude of Rachel are concerned, it is only fair to remember that Leah was not the wife of Jacob's choice, but had been forced by fraud into what was really Rachel's own rightful place in his house. Rachel's anxiety to have a son of her own is, however, evinced before long in her eagerness to obtain some of the youthful Reuben's mandrakes, or love-apples (30¹⁴). At last, the long-delayed hopes are accomplished, and Joseph is born (30²²⁻²⁴).

Six years later (31⁴¹), when Jacob meditates quitting the service of Laban (31¹⁻³), both wives endorse cordially his reasons for doing so (31⁴⁵, 14-16), and accompany him. Rachel, at once unscrupulous and superstitious, steals her father's teraphim (31¹⁹), hoping, no doubt, that they would bring her and her husband prosperity; 31²³⁻²⁵ describes the ready wit by which she conceals the theft from her indignant father. Rachel is next mentioned on the occasion of Jacob's meeting with his brother Esau (33¹⁻¹⁵), when the superior affection which he still felt for her is shown by the position assigned to her and Joseph (33¹⁻², 7). Her death, shortly afterwards, at the time of Benjamin's birth, soon after Jacob left Bethel, is recorded in 35¹⁶⁻²⁰ (cf. 48⁷). She and her sister Leah are alluded to in *Ru* 4¹¹ as foundresses of the house of Israel, and types of wedded happiness and prosperity. Like Rebekah (*Gn* 24), Rachel at first (*Gn* 29) produces a favourable impression upon the reader: she is attractive, not only in person, but also evidently in manner and address; she stirs Jacob's deepest affections; their long and patient waiting, followed by a cruel disappointment, enlists our sympathies; but the sequel shows that, like her aunt, she is not exempt from the family failings of acquisitiveness and duplicity.

The Isr. tribes are grouped around Leah and Rachel; so it is evident that they both possess a tribal as well as a personal significance. For speculations as to what historical facts may, from this point of view, be supposed to be represented by them—e.g. the growth of 'Israel' out of elements more or less

* As regularly in the 'Great Bible' (1539-41) and the Geneva Version (1560); Coverdale (1535) and the 'Bishops' Bible' (1568), however, have regularly 'Rachel.'

originally distinct—see Ewald, *Hist.* i. 371-6; Stade, *GVI* i. 145 ff.; Wellh. *Hist.* 432; Guthe, *GVI* (1899), pp. 5 f., 40-42; and cf. BENJAMIN, vol. i. p. 272b, JACOB, vol. ii. p. 533 f.

Rachel's grave.—In Gn 35¹⁶ it is said that Rachel died when there was yet 'a distance (?) of land' (רַחֵק רַחֵק) to go to Ephrath; and in v.¹⁹ (cf. 48⁷) Jacob is said to have buried her 'in the way to Ephrath (that is Beth-lehem),' and (v.²⁰) to have 'set up a pillar' (*mazzēbāh*)—i.e. here, as often in Phoen. (*CIS* i. i. 44, 46, 57, etc.), a sepulchral monument—'upon her grave: that is the pillar of Rachel's grave unto this day.' The locality must consequently have been well known when the narrative (E) was written; and, in fact, it is mentioned as a well-known spot in 1 S 10², and also alluded to in Jer 31¹⁵ (where the prophet poetically imagines Rachel, the mother of Joseph and Benjamin, as weeping over the captivity of the last remnants of her nation, as on their way to exile they passed near her tomb; cf. 40⁴).^{*} The spot which, from at least the 4th cent.,† has been shown traditionally as the site of Rachel's grave, is about four miles S. of Jerusalem and one mile N. of Beth-lehem; here there is now the *Ḳubbet Rāḥēl* or 'dome of Rachel,' a stone structure, of comparatively modern date, exactly like an ordinary Moslem 'wely,' or tomb of a holy person, about 23 ft. square, surmounted by a dome, and containing an apparently modern sarcophagus; on the E. an oblong chamber and court have been recently added.‡

A serious difficulty, however, arises in this connexion. In 1 S 10² Rachel's tomb is described quite clearly as being on the 'border of Benjamin,' i.e., obviously, the N. border between Benjamin and Ephraim, not far from § *Bethel* (v.³), which was 10 miles N. of Jerusalem; and a site in the same neighbourhood is strongly favoured by Jer 31¹⁵, where Rachel is represented as weeping at (or near) *Ramah*, 5 miles N. of Jerusalem.¶ The distance which נֶחֱמָן נָחַם was understood to express is uncertain; but it can hardly (cf. 2 K 5¹⁹) have been as much as 15 or 16 miles. We seem, therefore, reduced to one of two conclusions: either (Knob. Graf, Stade, *ZAW*, 1883, pp. 5-8; Riehm, *HWB*³, 1281 f.; Holzinger, *al.*) Ephrath, though elsewhere identified with Beth-lehem (Ru 1² 4¹¹, Mic 5⁷), is here the name of a place near Ramah (in which case the words 'that is Beth-lehem' in 35¹⁹ 48⁷ will be an incorrect gloss); or (Nöld., Del., Dillm.) there were two different traditions as to the site of Rachel's grave—one tradition (1 S 10², Jer 31¹⁵) placing it near Ramah, the other (Gn 35¹⁹ 48⁷) placing it near Beth-lehem. As Rachel has otherwise no connexion with Judah, while she is connected closely with Joseph and Benjamin, the former alternative is perhaps the more probable (Buhl, *Geogr.* 159, does not decide between them).

S. R. DRIVER.

RADDAI (רַדַּי; B *Zaddai*, B^b *Zaḥḥai*, A' *Paḥḥai*).—The fifth son of Jesse, 1 Ch 2¹⁴.

RAG, RAGGED.—The words properly translated 'rag' are (1) רָגַע, pieces torn off, from רָקַע to rend, which is tr^d 'rage' in Pr 23², but in 1 K

^{*} Mt. 21⁷ is, of course, an *applotion*, not an interpretation, of the prophecy.

† See the Itinerary of the Bordeaux Pilgrim, A.D. 333 (in the series of the *Pal. Pilgrims' Text Soc.* i. 26 f.), and the Pilgrimage of Paula (ib. p. 6, at the end of the vol.) in Jerome's *Ep. ad Eustochium* (ed. Bened. iv. 2, 674; cf. Vallarsi, i. 602).

‡ See, further, Robinson, *BRP* i. 218, iii. 273; Bäd.³ 129 f.; *PEP Mem.* iii. 129 f. (with a view).

§ The terms of 1 S 10²⁻³ hardly enable us to fix its site more specifically: see an attempt by Schick, *ZDPV* iv. (1881) p. 248 f. (= *PEFS*, 1883, p. 111); abandoned *PEFS*, 1898, p. 19.

¶ It may be worth observing that, though Jos 18¹⁸ (P) makes the N. border of Benjamin pass close to the S. of Bethel, 1 K 15¹⁷ seems to imply that the S. border of the N. kingdom was at Ramah; see also Jg 4⁶.

11²⁰, 21, 2 K 2¹³ simply 'pieces,' being preceded by the verb; (2) רָגַע, worn-out clothes, from רָקַע to wear out, tr^d 'rotten rags' in Jer 38¹¹⁻¹², the only place where it occurs; (3) רָגַע, tr^d 'rag' in Ad. Est 14¹⁶. In Is 64⁶ 'All our righteousnesses are as filthy rags' (רָגַע רָקַע), the word tr^d 'rags' (רָגַע) is simply 'clothing,' 'a garment' ('from the filthy clothing of the leper to the holy robes of the high priest'—*Oxf. Heb. Lex.*); RV 'as a polluted garment.' The specific allusion here is to a *vestis menstruus polluta*; cf. Is 30².

The root meaning of the Eng. word 'rag' is neither 'torn' nor 'worn,' but *rough, shaggy* (Swed. *ragg* or *rugg*, rough hair), whence the adj. *ragged* was used as we now use 'rigged' in the sense of jagged, applied to rocks, etc. So in AV Is 2²¹ 'the tops of the ragged rocks'; and Sir 32 heading 'Of a ragged and a smooth way.' Cf. Shaka. *Rich. II.* v. v. 21—

'How these vain weak nails
May tear a passage through the flinty ribs
Of this hard world, my ragged prison walls.'

And Milton, *L'Allegro*, 9—

'There, under ebon shades and low-browed rocks,
As ragged as thy locks.'

J. HASTINGS.

RAGAU.—See following article.

RAGES (Ράγαι [R in To 9²⁻⁵ Ράγαι] ρῆς Μηδίας).—Now *Rai* near Teheran. The city, whose ruins occupy a space about 4500 yards long by 3500 broad, gave its name to Media Ragiana, and commanded the approach to the Caspian Gates. The size and thickness of its walls, and the number of towers with which they are flanked, must have made it one of the strongest fortresses of the Persian empire. According to the Vendidad it was colonized by the advancing Aryans after they had left Hyrcania and before they reached Khorassan, and it was there that they were mingled with two other races and so first came into contact with heretics. An old tradition asserted that Zoroaster was born there (see de Harlez, *Introduction à l'étude de l'Avesta*, Paris, 1882). In the Behistan Inscription Darius calls it *Ragā* in Media, and states that the Median pretender Frawartish or Phraortes fled to it after his defeat; he was, however, captured, and after being tortured was sent to Ecbatana to be impaled. At a later date Alexander passed through it in pursuit of Darius Codomannus, eleven days after leaving Ecbatana. It was rebuilt or enlarged by Selencus I., who gave it the name of Europus (Strabo, xi. xiii. 6), which was supplanted by that of Arsacia after the Parthian conquest. In the age of Isidorus (§ 7) it was still 'the greatest city in Media.' In Strabo and Arrian the name appears as *Ragæ*; Ptolemy (vi. 5) makes it *Ragæa*.

Rages is often mentioned in the Bk. of Tobit. Tobit left there ten talents of silver (1¹⁴ 4¹), and Tobias, accompanied by the angel Raphael, started for Rages in quest of this deposit, which was finally recovered by the angel (5⁶ 6⁹, 12 9²). According to Jth 1¹⁵⁻¹⁸ *Ragau* (Ράγαι, evidently another form of *Rages*) was the scene of the decisive battle in which Nebuchadnezzar 'king of the Assyrians' defeated and slew Arphaxad the Median prince. It is possible that in the story of Arphaxad we have a distorted reminiscence of the overthrow and capture of Frawartish. A. H. SAYCE.

RAGUEL.—1. The AV form (LXX Ραγουήλ), in Nu 10²⁹, of REUEL. See HOBAB and JETHRO. 2. The father of Sarah, the wife of Tobias, To 3⁷, 17, 18 14¹³. The name, which is the same as the Heb. *Reuel*, occurs as that of an angel in Enoch xx. 4.

RAHAB (רַחַב, 'Paḥḥ).—The heroine of the ad-

venture of the spies sent by Joshua to ascertain the strength of Jericho and the feeling of the people there. The story of her reception of the two young men, and the clever devices by which she hides them, contrives their escape, and baffles the pursuit ordered by the king of Jericho, is told in Jos 2, assigned by critics to JE (vv. 10, 11 D²), and exhibiting all the ease and grace of that narrative, all its power of delineating life and character. A few lively touches bring the whole scene vividly before us, and suggest much that is not told in detail. We see the house on the wall, probably near the gate of the city, and convenient for resort, certainly convenient for escape. On the roof are drying stalks of flax, an indication of the inmate's busy toil, possibly of a particular trade. Here she dwells alone, but she has a father and mother, and brothers and sisters residing in the town. She is a harlot, for the word *וְהָא* applied to her (LXX *πόρνη*; Vulg. *meretrix*) refuses to be softened down to 'innkeeper' (Josephus, Chrys., Chald. VS), but she may have combined with this unhappy calling the more honourable occupation of weaving and dyeing. She had evidently been brought into communication with the outside world, and had heard of events going on beyond the Jordan, which had caused the terror of Israel to fall upon the inhabitants of Canaan. She was convinced that the God of the Hebrews would open a way for His people into Jericho. In this belief she obtained a promise from the spies of protection for herself and family in return for her help. A scarlet line hanging from the window by which they had escaped was to be the sign that the house, with all its inmates for the time, should be spared. The Israelites would be guiltless of the blood of any member of Rahab's family caught outside the house.

Joshua kept the agreement to the letter (Jos 6:17, 21, 22-25), and the narrative states 'and she dwelt in the midst of Israel unto this day.'

'A nation's gratitude long preserves the names of those who by opportune information open for a besieging host the path to victory' (Ewald, who cites a parallel instance soon to follow, Jg 122-26, and illustrates from profane history, *HI* ii. 247, Eng. tr.). In fact the conduct of Rahab was recognized with gratitude and kept long in memory by Jew and Christian alike. According to a rabbinical tradition she married Joshua himself, and became the ancestress of seven prophets (Lightfoot, *Horæ Heb.* ad Mt 19). Christian estimates of her worth are even more remarkable. One NT writer places her in the roll of the heroes of faith (He 11:31), another quotes her as justified by works (Ja 2:25). Clement of Rome declares she was saved through her faith and her hospitality, and claims for her the gift of prophecy, since the scarlet line foretold redemption by the blood of Christ (ad Cor. i. 12). The same allegorical interpretation is assumed by all ancient ecclesiastical writers (see Jacobson, *Pat. Ap.*, who cites Just. Mar. *Tryph.* cxi.; Iren. iv. 20, 12; Origen, Ambrose, Jerome, Augustine, and Theodoret). None of these writers, any more than the NT, think it necessary to change 'harlot' into 'innkeeper' with Josephus and Chrysostom. Irenæus, in his reference to her, recalls how publicans and harlots were admitted into the kingdom of heaven. We know nothing of her after-conduct, but we may well believe that the faith which an apostle could praise was accompanied by a true conversion.

As to Rahab's lie to the king, and her betrayal of her own countrymen, all that need be said is, that while neither can be approved, both may be extenuated by her situation.

The most interesting question in connexion with this woman arises from the mention of a *Rahab* (Ραχάβ) in the genealogy of Mt 1⁵ 'And Salmon begat Boaz of Rahab' (RV), which thus makes her an ancestress of our Lord. The patristic age seems to have taken the identification with Rahab of Jericho for granted. But in the 11th cent. Theophylact could write, 'There are some who think Rachab to be that Rahab the harlot who received the spies of Joshua the son of Nave.' A Dutch professor, G. Outhov, urged difficulties in the way of identification (in the *Biblioth. Brem. hist. philol. Theol.* ch. iii. p. 438), and was answered by Wolf (*Cur. philol. et crit. in Mt* 1⁵). That the Ραχάβ of the

LXX and of Hebrews and James should be Ραχάβ in Matthew appears at first improbable. But the latter has the support of Josephus, who always speaks of Rahab as ἡ Ραχάβη. A second objection would be more serious if it rested on the mention of Rahab alone, but it is a chronological difficulty not affected by the question of her identity, and may therefore be dismissed here. There is no improbability in the marriage of Rahab to Salmon son of Nahshon (Nu 7:12, 1 Ch 2:10) (see Alford on Mt 1⁵). The difficulty arises from the names Boaz, Obed, Jesse being made to bridge the interval between Rahab and David.

LITERATURE.—In addition to authorities already cited, see Bengel, Lightfoot, and Olshausen on Mt 1⁵; Mill, *Descent and Parentage of the Saviour*; Patrick, Grotius, Hitzig, Keil, Dillmann, and Steuernagel on Jos 2 and 6; Schleusner, *Lex. NT*, s.v. *ῥαβ*. A. S. AGLÉN.

RAHAB (רַחַב).—A mythological and symbolical term meaning 'the raging monster,' 'the impetuous one,' which occurs 6 times in OT (RV).

As a verb, רַחַב is found twice in Qal: Pr 6:3 'importune thy friend' (AV 'make sure' [Toy remarks that 'importune' is hardly strong enough; *beset, besiege, assail* better express the impetuosity involved in the Heb. term]); LXX παραίτων τὸν φίλον σου; Is 36: 'the child shall behave himself proudly' (Cheyne, *PB*, 'the boy shall be insolent'; LXX παραίτων τὸν παῖδα); and twice in Hiphil: Ca 6:6 'thine eyes have overcome me' (RVm 'make me afraid' [so Budd, *setzen mich in Schrecken*]); AVm 'have puffed me up'; Duhm, *regen mich auf* [so Siegfried-Stade, *erregen (geschlechtlich)*]; LXX ἀνέστησαν με; but it is very doubtful whether these last three renderings are possible; probably 'confuse' or 'perturb' (Syr. ܠܚܝܒ) is the meaning, see Driver, *LOT* 446 n.); Ps 133: 'Thou didst encourage me' (Driver, *Par. Psalter*, 'Thou makest me proud'; LXX παλαμψήεις με).—The noun רַחַב is used in Ps 90:10 [only] 'their pride' (AV, following Kimchi, interprets the root here falsely in the sense of 'strength' [so in Is 30:7 and Ps 133:2]; LXX τὸ ἄλιν αὐτῶν [by confusion with רַחַב]), and the adjective רַחַב (in plur.) in Ps 40:4 [only] 'the proud' (LXX ματαίωται).

1. The first occurrence of רַחַב we shall examine is Job 9:13 רַחַב עֲזָרָי שָׁחַת אֶפְרַיִם אֶת־עַלְוֵי אֱלֹהִים לֹא־יָשִׁיב; LXX Βαυρὸς γὰρ ἀπεστράπτει δόρυ, ὅτι αὐτοῦ ἐκάμψθησαν κήνη τὰ ὕψ' οὐρανῶν; RV 'God will not withdraw his anger, the helpers of Rahab [m. 'or arrogancy, see Is 30:7'] do [m. 'or did'] stoop under him'; AV '(If) God will not withdraw his anger, the proud helpers [m. 'Heb. helpers of pride or strength'] do stoop under him.' The meaning distinctly appears to be, 'God withdraws not his anger (till it has accomplished its purpose); even the helpers of Rahab bowed [note the perf. שָׁחַת, referring to some definite occasion] under him; how much less can I (Job) stand before him.' What now is the allusion? There can be little doubt that it is to the mythical conflict in which the Creator was said to have vanquished the supposed primeval dragon of the deep. This myth is most familiar to us in the Babylonian Creation-epos, where there is a very detailed account of the victory of Marduk over Tiamat (cf. *têhôm*, Gn 1²) and her eleven 'helpers' (see art. *BABYLONIA* in vol. i. p. 220^b f.; Sayce, *HCM* 63 ff.; Ball, *Light from the East*, 2 ff.).

From the use of *Rahab* for the raging sea monster (who appears, in certain forms of the myth current amongst the Jews, to have been thought of not as finally destroyed, but as imprisoned in the sea, and destined to be slain at last by Jahweh's sword, Is 27; cf. the Egyptian myth of the defeat of the serpent Apopi) the transition is easy to the application of the term to the sea itself. So in 2. Job 26:12, where, however, the same mythological allusion underlies the two parallel clauses, 'He quelled the sea with his power, and by his understanding he smiteth through Rahab' (רַחַב הַיָּם תִּפְתָּח בְּחָכְמָתוֹ וּבְיָמָיו יִשְׁחָט; LXX Β ἰσχύϊ κατέπαυσεν τὴν θάλασσαν, ἐπιστήμῃ δὲ ἔστρωται τὸ κῆρος); RV 'He stirreth up [m. 'or stilleth'] the sea with his power, and by his understanding he smiteth through Rahab'; AV (wrongly)

during the 'Pluvial period,' which extended from the Pliocene down through the Glacial into the commencement of the present or 'Recent' epoch, the rainfall must have been greater and the climate colder and more humid than at the present day. Snow now falls on the summits of Jebel Mûsa and Jebel Katarina in the Sinaitic peninsula, giving rise to the perennial streams which descend from the former of these mountains.* The following is a table of the rainfall at Jerusalem during 20 years:—

TABLE OF THE RAINFALL AT JERUSALEM FROM 1861 TO 1880.

| Year. | Fall in Inches. | Year. | Fall in Inches. |
|-------|-----------------|-------|-----------------|
| 1861 | 27.30 | 1871 | 23.57 |
| 1862 | 21.36 | 1872 | 22.26 |
| 1863 | 26.54 | 1873 | 22.72 |
| 1864 | 15.61 | 1874 | 29.75 |
| 1865 | 18.19 | 1875 | 27.01 |
| 1866 | 18.55 | 1876 | 14.41 |
| 1867 | 29.42 | 1877 | 26.00 |
| 1868 | 29.10 | 1878 | 32.21 |
| 1869 | 18.61 | 1879 | 18.04 |
| 1870 | 13.39 | 1880 | 32.11 |

The above observations, taken by Chaplin, show how extremely variable is the rainfall in this part of Palestine; † the amount varying between 13.39 inches in 1870 and 32.21 inches in 1878; the average for these 20 years is about 20 inches; and the number of days on which rain fell varied from 36 in 1864 to 68 in 1868. The results are not dissimilar to those of the eastern counties of England north of the Thames. These results may be considered as the mean between those of the Lebanon on the north and of the Sinaitic peninsula on the south, the rainfall being greater in the former region than in the latter. Between these two Jerusalem occupies a nearly central position; and the amount of rain is consequently of an intermediate character.

E. HULL.

RAINBOW (נֶחֱמָן, רֹאשׁוֹן, לְרֵס).—No definition is needed of this familiar phenomenon, which Ezekiel describes (1²⁰) as 'the bow that is in the cloud in the day of rain'; and no explanation is called for of the optical laws according to which it is produced. The Scripture references to the rainbow are few, and, with one exception, comparatively unimportant. They allude, as a rule, to its brightness, or to the brilliance of its colours. In Ezekiel's vision (*l.c.*) it is the glory of God that is likened to the appearance of the rainbow. In Sir 43^{11, 12} the beauty of the rainbow is given as a reason for praising God who has made it, and whose hands have stretched it out. In Sir 50⁷ the high priest Simon, the son of Onias, is compared to the rainbow among other glorious objects. In one of the visions of the Apocalypse (Rev 4²) there is 'a rainbow round about the throne, like an emerald to look upon,' and in another (10⁴) there is an angel with 'the rainbow upon his head.'

The most important of the Scripture allusions to the rainbow is that in Gn 9^{12c}, where it is introduced at the close of the story of the Deluge as a token of the covenant in which God promised that He would never again destroy the world by a flood. The passage as it stands is capable of two interpretations. It may convey either (a) the unscientific idea that the rainbow was created after the Flood, or (b) the idea that the rainbow, already created, was then appointed to have a new significance as a symbol of mercy. Those who regard the narrative

as strictly historical, can of course adopt only the latter of these views. But when we take into account such considerations as those given under FLOOD (which see), it seems best to regard the whole story of the Deluge, including that of the rainbow, as a piece of Semitic folk-lore, which, under the guidance of Divine inspiration, 'assumed a Hebrew complexion, being adapted to the spirit of Hebrew monotheism, and made a vehicle for the higher teaching of the Hebrew religion' (Driver in Hogarth's *Authority and Archaeology*, p. 27). In an early Sumerian hymn the rainbow is said by Sayce (*Expos. Times*, vii. 308) to be called 'the arc which draws nigh to man, the bow (*qastu*) of the deluge,' and the Chaldean account of the Flood tells how—

'Already at the moment of her coming the great goddess (*Istar*)
Lifted up the mighty bow * which Anu had made according to
his wish.'

The significance of the rainbow as a token of God's covenant with men may be variously viewed. נֶחֱמָן and רֹאשׁוֹן (Sir 43¹¹ 50⁷) are the regular words for the bow as a weapon of war, and the rainbow may have been regarded as God's bow, formerly used in hostility (as in Ps 7¹², Hab 3¹¹), and now laid aside. Or it may have appeared to be a link between heaven and earth; or, more probably, its suggestiveness as an emblem of hope may have arisen simply from the contrast between its beauty and brightness and the forbidding gloom of the rain-clouds. In any case, the story of the rainbow is worthy of its place in Scripture. Though poetic rather than literal, it was a beautiful and fitting vehicle for conveying to men in the childhood of the world the truth that God's mercy glories against judgment, and is the ground of all human hope.

Though the Babylonian Flood legend affords the closest parallel to the biblical story of the Deluge and the rainbow, some interesting correspondences may be gathered from the mythology of other nations. In the *Iliad* we find (a) the simple view of 'rainbows that the son of Kronos hath set in the clouds' (xi. 27), and (b) the conception of Iris as the personified messenger of the gods (iii. 121). In the Lithuanian account of the Flood the rainbow is sent as a comforter and counsellor to the surviving couple. In the Edda the rainbow (*Asbrá, Bif-röst*) is conceived of as a heavenly bridge which is to break at the end of the world. Akin to this, but with a biblical colouring, was the German belief of the Middle Ages, that for a number of years before the day of judgment the rainbow will no longer be seen.

'So the rainbow appear
The world hath no fear
Until thereafter forty year.'

The popular tendency to connect Christian and mythological conceptions is seen in the fact that in Zante the rainbow is called 'the girdle, or bow, of the virgin.'

The extravagant theory of Goldziher, that the history of Joseph is a solar myth, is fittingly crowned by the supposition that the 'bow' of Joseph (Gn 49³⁴) is the rainbow (*Mythology among the Hebrews*, 169-70).

RAKKON.—See ME-JARKON.

RAM (רָם 'lofty,' 'exalted').—1. An ancestor of David, Ru 4¹⁰ ('*Appar*'), Mt 1^{2,4} ('*Apām*'), hence AV ARAM, as in Lk 3³³, where RV, following WH 'Aprel, has ARNI. In 1 Ch 2⁹ ('*Pām*')¹⁰ (B' '*Appar*'), A' '*Apām*') he is called the brother, but in vv.³⁶ (B' '*Pār*'), A' '*Pām*')³⁷ (B' '*Apām*'), A' '*Pām*') the son of Jerahmeel. See GENEALOGY, IV. 5. 2. The name of the family (רַמְמִית) to which Elihu belonged, Job 32² (B' '*Pām*'), A' '*Pām*'), C' '*Apām*'). It is quite uncertain whether *Ram* should be taken as a purely fictitious name, coined by the author of the Elihu speeches, or whether it is that of an unknown Arab (?) tribe. In Gn 22²¹ Aram is a nephew of BUZ (cf. 'Elihu the Buzite'), and some (e.g. Wetzstein, Knobel, Ewald) have supposed that *Ram* is a contraction for *Aram*, in support of which 2 Ch 22³ is appealed to, where *Ramites* (רַמִּיתִּים) is supposed to be shortened from *Aramites* (אַרְמִיתִּים, the reading of 2 K 8²⁰); but this seems hardly likely. In the passage just referred to, it is more probable that the initial *ḥ* has been changed by a scribal error into *ḥ*, as has happened in several other instances in the OT. Rashi, by a Rabbinical conceit, makes *Ram* = Abraham. J. A. SELBIE.

RAM.—See BATTERING-RAM, and SHEEP.

RAMS' HORNS.—See MUSIC in vol. iii. p. 462^a.

RAMS' SKINS.—See DYEING.

RAMAH (רָמָה, always with definite art. except in Neh 11²⁸ and Jer 31¹⁵).—This word, with its various modifications and compounds *Ram*, *Ramah*, *Ramoth*, *Ramathaim*, *Arimathæa*, is derived from the root *רָם* 'to be lofty.' It appears as a 'high place' four times (Ezk 16^{24, 25, 21, 26}). As a proper name it is used of—

1. (B' *Ḥamath*, A' '*Pāma*') One of the fenced cities of the tribe of Naphtali (Jos 19²⁸). It is not otherwise mentioned in OT. Robinson (iii. 79) has identified it as *Rāmeḥ*, a village on the great route between *Akko* and *Damascus*, and about 8 miles W.S.W. of *Safed*. The village lies upon the southern lower cultivated slope of the mountain whose ridge forms a boundary between Upper and Lower Galilee, but still several hundred feet above the plain. It is a large village, surrounded by extensive olive groves, and has no traces of antiquity within or around. It is mentioned by Eusebius (*Onom.* 288, 9) and Jerome (*ib.* 146, 19), Brocardus (c. 6) and Adrichomius (p. 123).

2. ('*Pāma*') One of the cities on the boundary of the tribe of Asher near Tyre (Jos 19²⁹). 'And the border turned to Ramah, and to the fenced city of Tyre.' Robinson (iii. 64) considers there is no question (and in this he is followed by Guérin, *Galilee*, ii. 125 f., and SWP) that Ramah of Asher is represented by the modern village of *Rāmia*. It is situated about 12 miles due east of the Ladder of Tyre, as the crow flies. It stands upon an isolated hill, in the midst of a basin with green fields, surrounded by higher hills. The south-western portion of the basin has no outlet for its waters; which therefore collect in a shallow, marshy lake, which dries up in summer. It is a small stone village with a few figs and olives: there are cisterns and a large *birket* for water-supply. There are many sarcophagi about the

hillside, some of unusual size. One of the lids measured 7½ feet long and 2 feet broad. Robinson considered the remains generally 'a striking monument of antiquity.' West of *Rāmia* is a lofty hill called *Beldā*, on which are extensive ruins, and remains of a temple of which ten columns are still standing. There is no trace of Ramah of Asher in any historical records except the bare mention of the name by Eusebius and Jerome. Cf. Buhl, p. 231 n.

3. ('*Ḥamath*, '*Pāma*') 2 K 8²⁰ = 2 Ch 22³. In this case *Ramah* is an abbreviation of *RAMOTH-GILEAD* (which see).

4. ('*Pāma*'), in Hos 5⁸ *ṭā ḥamath* A city of Benjamin which is possibly (see below) also identical with No. 6, the birthplace and home of Samuel, but for convenience of consideration it is taken separately. It is given in the list of 14 cities and their villages allotted to Benjamin (Jos 18²⁵), the greater number of which have been identified north of Jerusalem. The first three are Gibeon (*el-Jib*, 5 miles N.N.W. of Jerusalem and 3 miles west of *er-Rām*), *Ramah* (*er-Rām*, 2600 feet, 5 miles due north of Jerusalem and near the main road to north), Beeroth (*el-Bireh*, 10 miles north of Jerusalem near main road to north). Isaiah (10²⁹) enumerates the positions that will be successively taken up by the king of Assyria as he approaches Jerusalem after laying up his carriages (i.e. baggage) at Michmash: 'They are gone over the pass: they have taken up their lodging at Geba; Ramah trembleth; Gibeah of Saul is fled.' The Levite (Jg 19¹³), passing Jerusalem with his concubine when the day was far spent, passed on to Gibeah (*Tell el-Ful*, 2 miles south of *er-Rām*), which was short of Ramah. The Palm-tree of Deborah was between Ramah and Bethel in the hill-country of Ephraim (Jg 4⁶). *Bethin* (Bethel) is 5 miles N. of *er-Rām*.

From these notices it seems to follow that *er-Rām* is the modern equivalent of Ramah. The distance from Jerusalem (5 miles as the crow flies) accords with the account of Eusebius and Jerome (*Onomast.* 287, 1; 146, 9: 6 m. N. of Jerusalem) and of Josephus (*Ant.* VIII. xii. 3).

After the separation of the kingdoms, Baasha king of Israel (1 K 15²⁷) went up against Judah and built (fortified) Ramah, 'that he might not suffer any one to go out or come in to Asa king of Judah,' showing that Ramah commanded the high road leading to Jerusalem; but Asa secured the assistance of Benhadad king of Syria, who smote the northern cities of Israel, so that Baasha desisted from building Ramah, and Asa took away the stones and the timber and built with them Geba of Benjamin and Mizpah (2 Ch 16¹⁻⁶). From this it would appear that Ramah was more suitable for defence towards the south than towards the north. After the destruction of Jerusalem, Ramah is mentioned as the place (Jer 40¹) where the captain of the guard over those who were carried away captive from Jerusalem loosed Jeremiah from his chains. Ramah was very near to Geba and Gibeah: see Is 10²⁹ cited above, and cf. 'Blow ye the cornet in Gibeah and the trumpet in Ramah' (Hos 5⁸); 'The children of Ramah and Geba' (Ezr 2²⁶, Neh 7³⁰ [LXX *Ἀραμα*]).† It was also the traditional site of Rachel's tomb: 'A voice was heard in Ramah . . . Rachel weeping for her children' (Jer 31¹⁵: cf. above, p. 193^a). The Ramah of Neh 11²⁸ is, in all probability, the same place.

Er-Rām is a small village in a conspicuous position on the top of a high white hill, with olives: it has a well to the south; west of the

* But in 1 S 22⁶ 'Saul was sitting in Gibeah . . . in Ramah' render 'in Gibeah . . . on the height' (Keil, Kirkp., etc., RVm), even, indeed, if we should not read, with LXX (i.e. *Ἐμμα*) and H. P. Smith, 'on the high place'.—S. R. D.

† In 1 Es 5²⁰ we find *Ḥirama* (Ḥirama) instead of *Ramah*.

village is a good *birket* with a pointed vault; on the hill are cisterns. At *Khân er-Râm*, by the main road, is a quarry; and drafted stones are used up in the village walls (*SWP* iii. 155). The height of the village is about 2800 feet.

C. WARREN.

5. Ramah of the South (רָמָה הַיְּמָנִית; *Rameth* (A *Iameth*) *κατὰ λιβὰν*).—'Height of the south,' a city of Simeon (Jos 19³), at its extreme southern limit, apparently another name for BAALATH-BEER, with which it is in apposition in this passage. It appears to be the same as **Ramoth of the South** (1 S 30²⁷, LXX here also has the singular, 'Ραμα νότον). The verse is not contained in the parallel list (in the description of Judah), Jos 15²⁰⁻³² (after v.³²); and in the transcript in 1 Ch 4²³⁻³³, though (v.³³) Baal (=Baalath-beer: LXX Βαλαρ) is mentioned, the alternative name 'Ramah of the South' is not given. Nor is it mentioned by Eusebius or Jerome. Its situation is quite uncertain. It has been placed on a low ridge called *Qubbet el-Baul*, about 35 m. S. of Hebron, on the main route from Hebron to Petra; or (Tristram, *Bible Places*, 23) at Kurnub, a little further to the S. (see Rob. ii. 197, 198, 202); but either identification rests upon slight grounds (cf. Dillm. on Jos 15²⁴; Buhl, 184).

6. 1 S 1¹⁹ 2¹¹ 7¹⁷ 8¹ 15³⁴ 16¹³ 19¹⁷¹ 22¹ 20¹ 25¹ 28³; in 1 S 1¹, also, **Ramathaim**,* 'the double eminence,' or 'the two Ramahs' (רָמָתַיִם: LXX in all the passages quoted (+ 19²²), except 19¹⁹ 22¹ 23 20¹, has *Ραμαθαιμ*, which it also inserts in 1 S 1³ after 'his city': comp. 1 Mac 11³⁴ *Ραμαθεμ* [so MSS; *AN* corruptly *Ραθαμεμ*], Pesh. *ܪܡܬܝܡ*). The birth-place, residence, and burial-place of Samuel (1 S 1¹ 7¹⁷ 28³). The question of its site is difficult; and there have been many claimants for it. All that we definitely know about it is that it was on an eminence, as its name 'Ramah' implies, and that it was in the hill-country of Ephraim, not too far either from Shiloh, the sanctuary to which the parents of Samuel went up yearly to sacrifice (1 S 1¹), or from Bethel, Gilgal, and Mizpah (Neby Samwil), the places visited by Samuel in his annual circuits as judge (1 S 7¹⁶ 17). Although this has been doubted, it is also extremely difficult to avoid identifying it with the unnamed city where Saul found Samuel (1 S 9), and which is spoken of as if it were the seer's habitual residence (vv. 6, 18).

As regards antiquity, Eusebius writes (*Onom.* 225, 11 ff.): 'Ραμαθεμ Σειφα [as LXX]. The city of Elkana and Samuel. It lies near Diospolis [Jerome, *ib.* 96, 18, adds, 'in the district of Timnah' (in regione Thamnitica)]; thence came Joseph, said in the Gospels to be from Arimathea.' And in 1 Mac 11³⁴ Ramathem is mentioned, together with Apherema (Ephraim, 5 m. N.E. of Bethel) and Lydda (= Diospolis), as three toparchies which had belonged to Samaria, but were in B.C. 145 transferred to Judea. These notices would agree with a site *Beit-Rima*, a village on a hill 13 m. E.N.E. of Lydda (Diospolis), and 2 m. N. of Timnah (Tibneh), proposed originally by Furrer in Schenkel's *Biblical Geograph.* (cf. Schürer, i. 183), and adopted by G. A. Smith, *HGHL* 254, and Buhl, 170. It is true, Eus. says 'near Diospolis': but

* **Ramathaim-zophim** (רָמָתַיִם צוֹפִים) is grammatically impossible. Of course the expression cannot mean 'the heights of the views' (?), as the reader of *Tent-Work* (p. 257) is gravely informed. LXX for ραμαθαιμ has Σειφα, showing that the final α has arisen by dittography from the following word. Read either 'a man of Ramathaim, a Zuphite' (צִיִּי; see 1 S 9) of the hill-country of Ephraim' (Wellh., Driver, Lohr); or (though this is not the usual way of designating a person's native place in the OT) 'a man of the Ramathites' (רָמָתִי: 1 Ch 27²⁷), a Zuphite, etc. (Klost., Budd., H. P. Smith). The dual 'Ramathaim,' though by no means unparalleled (cf. *Kiriathaim*, *Gederothaim*), is remarkable, in view of the sing. *hā-Rāmāh* in v.¹⁹ and everywhere else.

the word need not be understood too strictly; * and there are other passages in which the 'district of Timnah' is reckoned by him as belonging to the *δριον Διοσπολέως* (219, 84=Jerome 92, 4; 239, 93-4=Jerome 107, 12-14: so Timnah itself, 260, 4=156, 7). Beit-Rima is 12 m. W. of Shiloh, and 12 m. N.W. of Bethel, on the W. edge of the hill-country of Ephraim.†

Another possible site for Ramah would be *Rām-allah*, 3 m. S.W. of Bethel, and 12 m. S.W. of Shiloh, now a large Christian village, standing on a high ridge, with rock-cut tombs, and overlooking the whole country towards the W. as far as the sea (*BRP* i. 453 f.; *PEF Mem.* iii. 13). This was suggested by Ewald (*Hist.* ii. 421), with the remark that its present name, 'the high place of God,' seems still to mark it as a place of ancient sanctity. *Rām-allah* has not the same support of tradition that Beit-Rima enjoys; but (if Ramah be the city of Samuel of 1 S 9) it seems to agree better with the terms of 1 S 9⁴ and 5; for *Rām-allah*, though, if it were Ramathaim, it would be in 'the hill-country of Ephraim' (1 S 1¹), might also, as seems to be implied of the city in 1 S 9 (vv. 4 and 5), be regarded as being in Benjamin (cf. Jg 4⁵). Saul would probably, on his route home to Gibeath, pass naturally near Rachel's sepulchre, on the (N.) 'border' of Benjamin (1 S 10²), somewhere near *er-Rām* (No. 4), and might also 'meet' naturally men 'going up' to Bethel (v.³), whether his starting-point were Beit-Rima or *Rām-allah*.

Of other, less probable identifications, the following may be mentioned:—

(1) *Ramleh*. The traveller of to-day, as he journeys through the Maritime Plain from Joppa to Jerusalem, is assured by his dragoman, when he reaches Ramleh (12 m. S.E. of Joppa, 2 m. S.W. of Lydda), that this is the Arimathea of the Gospels. As Robinson (*BRP* ii. 234-41) shows at length, there is no ground for this identification. Ramleh is no ancient city; it was built by Suleimān, after he had destroyed Lydda, in the 8th cent. A.D.; and it is first mentioned (acc. to Robinson, p. 234) in 870 (under the form *Ramula*) by the monk Bernard. The name Ramleh signifies *sand*; and has no etymological connexion whatever with Ramah, *high*. Ramleh is also in the Maritime Plain, not, like Ramathaim, in the 'hill-country' of Ephraim.

(2) *Neby Samwil*, the commanding and conspicuous eminence (2935 ft.) above Gibeon, 4½ m. N.W. of Jerusalem. Procopius (c. 560) mentions a monastery of 'St. Samuel' in Palestine (though without indicating its site); and in the Crusaders' time a church of 'St. Samuel' was built (A.D. 1157) at Neby Samwil, which, with Moslem additions (including a minaret), remains, though partly in a ruined state, to the present day; close by, and once probably in the nave of the church, is the cenotaph of the prophet, now a Moslem wely (cf. Robinson, *BRP* i. 459 f.; *SP* 214 f.; *Tent-Work*, 258 f.; *PEF Mem.* iii. 12 f., 149-152, with views). The Ramah of Samuel was identified, at least provisionally, with Neby Samwil by Mr. (afterwards Sir G.) Grove (in Smith's *DB*). The tradition connecting the place with Samuel is, however, very late; and Neby Samwil is much more probably Mizpeh (Rob. i. 460; *HGHL* 120; Buhl, 167 f.).

(3) Other identifications that have been proposed are *Sōba*, on an elevated conical hill, 5 m. W. of Jerusalem (Robinson, ii. 7-10); the Frankenberg, or Jebel Fureidis, the ancient Herodium, 4 m. S.E. of Bethlehem (Ges. *Theas.* 1279^a); *er-Rām*, said

* Lydda, as Robinson, *BRP* ii. 240, observes, though 11 miles from Joppa, is said in Ac 9³⁴ to be 'near' to it.

† Elsewhere, however (146, 25 f.; 288, 11 f.), Eus. and Jerome identify Arimathea with a *Ραμα* or Remfthis, also in *ἀριμαθ* Διοσπολέως, supposed to be the village of Rantieh, 6 m. N. of Lydda.

to be a little N. of Beth-lehem, and E. of the so-called 'Rachel's tomb,' but not known to Rob. (ii. 8 n.) or marked on the *PEF* map (Bonar, *Land of Promise*, 114; Ramet el-Khalil, 1 m. N. of Hebron (van de Velde, *Syr. and Pal.* ii. 50); and the two heights ('Ramathaim') of 'Alia (2900 ft.) and Bireh (2980 ft.), 3 m. W.S.W. of Beth-lehem—the latter $\frac{1}{2}$ m. S. of the former, but without a name on the *PEF* map (Schick, *PEFSt*, 1898, p. 16 f., with map). But it is incredible that any of these places can have been regarded as being in *Ephraim* (1 S. 1); and, except the first, they are all connected with the identification of 'Rachel's sepulchre' in 1 S. 10² with the place now shown as 'Rachel's tomb,' 1 m. N. of Beth-lehem, which (see p. 193*) seems impossible.

S. R. DRIVER.

RAMATHAIM, RAMATHAIM - ZOPHIM.—See RAMAH, No. 6.

RAMATHITE (רמתי; B δέκ 'Ραμλ, A δό 'Ραμαθαίος).—Shimei the Ramathite was over the vineyards of king David, 1 Ch 27⁷. Which of the Ramahs enumerated in art. RAMAH is in view here, must remain uncertain.

RAMATH-LEHI.—See LEHI.

RAMATH-MIZPEH (רמזת; B 'Αραβῶθ κατὰ τὴν Μασσηφά, A 'Ραμῶθ . . . Μασφά).—Mentioned in Jos 13²⁶ only as one of the limits of the tribe of Gad to the north, Heshbon being the limit to the south. It may be identical with Mizpah (and Mizpeh) of Gilead (see MIZPAH, No. 1).

C. WARREN.

RAMESES.—See RAAMESIS.

RAMIAH (רמיה 'Jah is high'; 'Ραμιά).—One of the sons of Parosh who had married a foreign wife, Ezr 10²⁵, called in 1 Es 9²⁸ HIERMAS.

RAMOTH.—1. In Ezr 10²⁹ AV and RVm read 'and Ramoth' (i.e. רמזת; B καὶ Μνηών, A καὶ 'Ρημῶθ) for JEREMOTH (i.e. רמיה) of RV. In 1 Es 9²⁸ the name is HIEREMOTH. Jeremoth or Ramoth was one of the sons of Bani who had married a foreign wife.

2. (רמזת, BA om.) A Gershonite Levitical city in Issachar, 1 Ch 6⁵⁸ (79), apparently=REMETH of Jos 19²¹ and JARMUTH of Jos 21²³ (see artt. on these names). 3. For 'Ramoth of the south' (רמזת) see RAMAH, No. 5. 4. For 'Ramoth in Gilead' (Dt 4⁴³, Jos 20⁸ 21³⁸, 1 Ch 6⁵⁵ (80)) see RAMOTH-GILEAD.

J. A. SELBIE.

RAMOTH-GILEAD.—A prominent city east of the Jordan belonging to the tribe of Gad, and first brought to our notice in the assignment of the Cities of Refuge, Dt 4⁴³, Jos 20⁸. It was also a Levitical city, Jos 21³⁸. In four passages, the three just mentioned and 1 Ch 6⁵⁰ [Heb. 65], all referring to this assignment, the form 'Ramoth in Gilead' (רמזת בגלעד [in Dt 4⁴³, Jos 20⁸, 1 Ch 6⁵⁵ רמזת]) is used, but elsewhere it is simply Ramoth-gilead (רמזת גלעד). Another early notice of this place belongs to the time of Solomon, and makes it the headquarters of one of the commissariat officers of that king, 1 K 4¹³. See, also, RAMAH, No. 3.

Although it is mentioned as a well-known city, we have no account, in the Bible or elsewhere, of its origin. The greater its importance the more conspicuous it would naturally be; and this we find was the case, in the wars between the Syrian kings of Damascus and the Hebrews. Of these wars we have the fullest account of those occurring between B.C. 900 and B.C. 800, particularly during the reigns of Ahab, Ahaziah, Jehoram, and Jehu, kings of Israel. Although the southern kingdom sometimes acted as an ally, the brunt of these wars fell upon the Northern kingdom, since from its nearer position it was more especially interested in them than the kingdom of Judah. In one of these wars Ahab, king of Israel, was killed, 1 K 22³¹⁻³⁷, and at a later time his son Jehoram (Joram) was wounded, and was carried to

Jezreel, 2 K 8²⁸⁻²⁹, in the neighbourhood of which he was shortly afterwards murdered by Jehu, who, by the directions of Elisha, had been anointed king of Israel.

In Hos 6⁸* there is mentioned a city named Gilead, about whose identity there has been difficulty; but the probability is that Ramoth-gilead† is meant, the first word having been dropped, a thing well known in the history of OT double names.

The Babylonian Talmud (*Makkoth* 9b) places the Cities of Refuge in pairs, so that those on the east of the Jordan are opposite those on the west of that river. Shechem, being the middle one of the three west of the Jordan, should have Ramoth-gilead nearly opposite it on the east of the Jordan, and this would place its site at Gerasa, the modern *Gerash*. There is no reason for supposing that the Talmud in this case went out of its way to state something that was contrary to fact, especially at a time when the misstatement could so readily have been pointed out.

The main route from Shechem to the country east of the Jordan and on to Damascus is by the Damieh ford and Wady Ajlun. A carriage road with a very easy grade could be made along this valley, and this was the route by which the kings of Israel went back and forth with their chariots to fight the Syrians.

The attempt of Ewald and Conder to locate Ramoth-gilead at *Reimun* in the Gilead hills has little in its favour. This place has neither water nor ancient ruins, it is not a point where a prominent city would be built, it is not on or near the road from Shechem to the east, and the military operations carried on at Ramoth-gilead could never have taken place here. Nearly the same can be said of *es-Salt*, another rival for the site of Ramoth-gilead. It has no ruins, and only a spring for water-supply, while Gerash has a large living stream running directly through the town. It ought to be stated that both these places were suggested for the site in question before the east Jordan country had been thoroughly explored. It seems now, however, that the results of modern research should have weight above the casual observations of a former period.

The testimony of Eusebius and Jerome, which frequently is of great service in determining topographical questions, is in this case conflicting, for one places Ramoth-gilead 15 miles west, and the other the same distance east of Philadelphia. (1) Ramoth-gilead, if placed at Gerash, where the writer is fully convinced it should be placed, would be suitable for a City of Refuge, because it would be on the main road of that part of the country. (2) For the same reason, and, moreover, because it was a central and wealthy city, it would be a suitable station for a commissariat officer. (3) Here chariots could be used freely, which is not true of *es-Salt*. (4) This identification confirms Jewish testimony that Ramoth-gilead was opposite Shechem. (5) It would confirm Jewish tradition that Gerash was identical with Ramoth-gilead. See a full discussion of this question in the writer's *East of the Jordan*, pp. 284-290.

LITERATURE.—Dillmann, *Genesis*, ii. 289; Buhl, *GAP* 262 (both locate Ramoth-gilead in the ruins of *el-Jal'ud*, some 6 miles N. of *es-Salt*); Neubauer, *Géog. du Tabn.* 55, 250 (inclines to identify with *es-Salt*); Baedeker, *Pal.* 287; G. A. Smith, *HGHU* 586 ff. (would locate near the Yarmuk, farther north than the usual sites); Merrill, *East of the Jordan*, 284 ff.; Tristram, *Land of Israel*, 477, 552; Oliphant, *Land of Gilead*, 212; Conder, *Heth and Moab*, 179 ff., *Bible Places*, ed. 1897, 394 f.; G. A. Cooke, *ap. Driver*, *Deut.* 'Adianda', p. xx.

SELAH MERRILL.

RANGE.—To 'range' is to 'set in ranks' (the words are cognate: Fr. *rang*, Old Fr. *reng*, a row,

* Possibly also in Jg 10¹⁷.

† Some MSS of Luc. recension have Γάλγλας (Gilgal). See Nowack, *ad loc.*

of German origin), and a 'range' is a 'rank' or 'row.' When ranges or ranks of men scoured a country they were said to 'range' the country. That is the only use of the verb in AV, viz. in Pr 28¹⁵ 'As a roaring lion and a ranging bear.' Cf. Barnes, *Sonnets*, II.—

'Who, like a ranging Lyon, with his pawes
Thy little flocke with dailie dread adawes';

Golding, *Calvin's Job*, p. 579, 'It is a pity to see what man is; for he is so fraught with evill, that assoone as he hath a litle libertie given him, by and by he raungeth out on the one side or on the other, and will not hold the right way, but gaddeth astray, ye even or ever he thinke it.

The subst. signifies: (1) files or rows of soldiers, 2 K 11^{18, 19}, 2 Ch 23¹⁴ ('Have her forth of the ranges,' Heb. מַרְמָה); (2) the extent of one's ranging or roaming, Job 39⁶ 'The range of the mountains is his pasture' (רָחַק); and (3) a grate or stove with rows of openings on the top for carrying on several processes at once, Lv 11³⁵ 'ranges for pots' (רָחִיקִים, RV 'range,' RVm 'stewpan'). Cf. Spenser, *F.Q.* II. ix. 29—

'It was a vault ybuilt for great dispence,
With many raunges reard along the wall,
And one great chimney, whose long tonnell thence
The smoke forth threw.'

J. HASTINGS.

RANSOM is the tr. in OT of the Heb. words קָנָה, from קָנָה 'to cover,' hence 'to propitiate,' 'to appease' (so AV and RV in Ex 30¹², Job 33²⁴ 36¹⁸, Ps 49⁷, Pr 6³⁵ 13⁶ 21¹⁸, Is 43³; and RV alone in Ex 21³⁰, Nu 35^{21, 22}, 1 S 12⁹, where AV renders respectively 'sum of money,' 'satisfaction,' and 'bribe'); and קָנָה, from קָנָה 'to redeem' (so AV in Ex 21³⁰, RV 'redemption').* The verbal form קָנָה is also occasionally rendered by 'ransom' instead of by the more usual 'redeem' (so AV and RV in Is 35¹⁰, Hos 13¹⁴, and RV in Ps 69¹⁸, Is 51¹¹, Jer 31¹¹), and the same is true in two cases (AV in Is 51¹⁰, Jer 31¹¹) of the parallel term גָּמַל.

In NT the word occurs only in Mt 20²⁸ = Mk 10⁴⁵ (where it renders the Gr. λύτρον), and 1 Ti 2⁶ (where it takes the place of the rare word ἀντίλυτρον). In both cases it is used of Christ's gift of Himself for the redemption of men. 'The Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many.' 'There is . . . one Mediator between God and men, himself man, Christ Jesus, who gave himself a ransom for all.'

For the understanding of these NT passages the OT offers us two possible conceptions, corresponding in general to the different Heb. equivalents of the Gr. λύτρον.† On the one hand, if regarded as taking the place of some word from the stems נָחַם or נָחַל, it may refer to the money payments required under the law to secure the release of persons from slavery (e.g. Ex 21⁸, Lv 25⁴⁷⁻⁴⁹; cf. 1 P 1^{18, 19}, Gal 3¹³, and the passages cited under REDEMPTION). On the other hand, if taken as the equivalent of קָנָה (lit. 'covering,' hence 'propitiatory gift'—restricted, however, by usage to a gift offered as a satisfaction for a life; see art. PROPITIATION, § 6), it may denote the ransom paid by an offender either to man (Ex 21³⁰, Nu 35^{20, 22}, Pr 6³⁰) or to God (Ex 30¹², Ps 49⁷) in order to save the life which he has forfeited by his wrongdoing.‡

* Elsewhere only Ps 49⁶ (AV and RV 'the redemption of their soul [life]'); cf. קָנָה קָנָה Nu 8^{48, 51} (*Kethibh*) [all], RV 'redemption-money.'

† This word stands in the LXX for derivatives of נָחַם in Ex 21³⁰, Lv 19²⁰, Nu 35^{20, 22}, 36¹⁸ (cf. v. 17) 18¹⁵; of נָחַל in Lv 25^{48, 49}, 51, 52, 27³¹; for קָנָה in Ex 21³⁰, 30¹², Nu 35^{21, 22}, Pr 6³⁰ 13⁶; and for קָנָה 'price' in Is 45¹³.

‡ The distinction between the Heb. terms is not always maintained, for קָנָה is virtually = קָנָה; see Ex 21³⁰, Ps 49⁷, also Job 33²⁴ if (as is probable) מְדַעְרָה is an error for מְדַעְרָה.

Those exegetes who regard λύτρον as suggesting נָחַם or נָחַל, interpret Mk 10⁴⁵ after the analogy of 1 P 1^{18, 19}, and understand Jesus as teaching that His life is the ransom price by which He redeems His disciples from bondage (so Wendt [*Teaching of Jesus*, II. p. 226 ff.], who thinks of deliverance from suffering and death; Beyschlag [*NT Theol.* I. p. 153], who thinks of freedom from sin). This view is possible even if we take λύτρον as the tr. of קָנָה (so Briggs [*Mess. Gosp.* p. 111], who cites Is 43³ 'I have given Egypt as thy ransom,' where the context makes it clear that the thought is of deliverance from captivity. The קָנָה paid by J^c to Cyrus releases Israel; cf. the parallel 'שֶׁבַע, instead of thee'). In this case we must regard the ransom as paid to the one who holds the prisoners captive. The older interpreters, taking the figure literally, taught that Christ's death was a ransom paid to Satan. Modern exegetes either think of the recipient as an impersonal power, such as death (Wendt), 'sin and evil' (Briggs), or 'that ultimate necessity which has made the whole course of things what it has been' (Sanday, *Romans*, p. 86), or else, relying on the figurative character of the language, refuse to raise the question at all (cf. Westcott, *Hebrews*, p. 296).

The other interpretation, starting with קָנָה as a propitiatory gift offered in satisfaction for a life, makes God the recipient of the ransom. Thus Ritschl, following Ps 49⁷ and Mk 8³⁷, thinks of the life of Jesus as a precious gift, offered to God in order to ransom from death those who were unable to provide a sufficiently valuable קָנָה for themselves (so Weiss, *Bibl. Theol.* p. 101; Runze, *ZWTh*, 1889, p. 148 ff.; Cremer, *Bibl.-Theol. Wörterb.* p. 594). In this case the thought is clearly of deliverance from penalty, and the nearest parallel is to be found in Mt 26²⁸, where Jesus compares His death to a covenant sacrifice, offered for the remission of sins upon the occasion of the establishment of the new covenant between God and the disciples. (Cf. Tit 2¹⁴, He 9¹², 1 P 1^{18, 19}, where the combination between the ransom and the sacrificial figures is clearly found). The exact meaning will vary according as we associate ἀντί with λύτρον alone (Cremer), or with the whole clause (Ritschl, Weiss). In the first case the comparison will be between the life of Jesus and that of the many whose place it takes; in the latter it will merely express the fact that, in laying down His life, Jesus takes the place of the disciples in doing that which they ought to do for themselves.

Whichever interpretation we take, it is important not to isolate the death of Jesus from the life which precedes it. It is not the death as such which is a ransom, but the death considered as the culmination and completion of a previous career of ministry. This is clearly shown by the preceding context, 'The Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many.' We have here the same combination of suffering and service which meets us in the OT in the Suffering Servant of Is 53. It is clear, therefore, that the gift of which our Lord speaks should not be confined to the death on the cross, but includes also His 'entire Person and service which He gives in ministry' (Briggs, p. 111; so Weiss, Wendt).

It is to be noted that while Mk 10⁴⁵ speaks of the life of Christ as given for many, 1 Ti 2⁶ gives the ransom a universal significance: 'Christ Jesus . . . who gave himself a ransom for all.'

See, further, under REDEMPTION, SALVATION.

LITERATURE.—Ritschl, *Rechtf. und Vers.* II. pp. 68–88; Runze, *ZWTh*, 1889, p. 148 ff.; Weiss, *Bibl. Theol.* p. 74 [Eng. tr. p. 101]; Beyschlag, *Neutest. Theol.* I. p. 149 [Eng. tr. I. p. 152]; Wendt, *Lehre Jesu*, II. p. 509 ff. [Eng. tr. II. p. 226 ff.]; Cremer, *Bibl.*

Theol. Wörterb. s. *Leopold*; Westcott, *Hebrews*, 229 ff.; Briggs, *Mess. Gosp.* p. 110 ff. For similar ideas among the later Jews, cf. Weber, *Jüdische Theologie*, p. 313 ff.

W. ADAMS BROWN.

RAPE.—See art. CRIMES AND PUNISHMENTS in vol. i. p. 522^b.

RAPHA, RAPHAH.—1. In RVm these names are substituted for 'the giant' in 1 Ch 20^{4, 6, 8} (רָפָא) and in 2 S 21^{14, 16, 22} (רָפָא) respectively. It is there said that certain Philistine champions, slain by David's heroes, were born to the *rāphāh* in Gath. The word is certainly a common noun, and not a proper name. If used individually, 'the giant' is probably the Goliath whom David slew. But more probably the noun is a collective, and denotes the stock of the giants, rather than any one person. The plural of this word, or at least a plural of this stem, is *REPHAIM* (which see).

2. For *Raphah* (AV *Rapha*), a descendant of Saul, 1 Ch 8³⁷, see *REPHALAH*, No. 4.

W. J. BEECHER.

RAPHAEL (רָפָאֵל; LXX 'Ραφαήλ, 'El has healed') is not named in the Hebrew Scriptures, and in the LXX only in Tobit. His functions may best be learned from his own words in To 12¹³⁻¹⁵, where, combining the different versions, we read, 'I am Raphael, one of the seven angels who stand and serve before the throne of God's glory, presenting the prayers of saints. I brought the memorial of your prayers and tears before the Holy One. When thou didst bury the slain, I was with thee; and now God hath sent me to heal thee.' On this passage we would observe: (1) The 'seven angels,' of whom Raphael declares himself one, were probably Raphael, Gabriel, Uriel, Michael, Izidkiel, Hanael, and Kepharel. We read in Rev 8³ of 'the seven angels who stand before God'; and in 1⁴ of 'the seven spirits who are before the throne' (but this passage is understood by most expositors to refer to the Holy Spirit, cf. 5⁶); and 'which are sent forth into all the earth,' 5⁶. (2) These seven are the archangels, the princes of the angelic host. They stand near the throne of glory, and were conceived to be the only angels who are permitted to enter within the radiance. Gabriel describes himself (Lk 1¹⁹) as one that 'stands in the presence of God.' (3) The doctrine of Divine aloofness, which was pushed to extreme lengths in late Judaism, has, here in Tobit, reached thus far, that God does not Himself hear prayer. He was thought, as Epicurus also taught, to be engaged in higher pursuits. Prayers which by their importunity or worth reach heaven, are heard by the angels of the Presence, and are carried to the throne by them, and then they are commissioned to execute the answer. There is no clear evidence in Tobit that prayer was presented to the angels; though Cod. B in To 3¹⁶ almost implies this, where we read, 'The prayer of both was heard before the glory of the great Raphael.' All the other versions read 'before the glory of God.' The Book of Tobit does not assign to Raphael any intercessory mediation. He is simply a messenger; reporting to the Ineffable man's prayers and tears, cf. Ac 10⁴, Rev. 8³. (4) Raphael served holy men as a *guardian angel*. When Tobias was in danger of losing his life for burying Jews who had been massacred in Nineveh, Raphael 'was with him,' protecting him. But the unique feature of the Book of Tobit is that Raphael is said to have assumed a human form, claiming to be a kinsman of Tobit, and travelling as guide with him from Nineveh to Ecbatana. While the wedding festivities of Tobit and Sarah were being celebrated, Raphael went forward to Rages in Media, for the money which Tobias had, years before, deposited with his friend Gabael, and eventually Raphael brought the

bridal pair safe home. Before taking his leave Raphael assures Tobias that when he seemed to them to eat and drink, they were under an illusion, To 12¹⁹. (5) The chief characteristic of Raphael was as a *healer of men's maladies*: Tobias, the father of Tobit, was afflicted with *leucoma* in the eyes; and Sarah was possessed by the demon Asmodæus, who had, on the first night of marriage, slain seven husbands who had been married to Sarah. By the fumes of the heart and liver of a fish burnt on embers, Raphael instructed Tobit how to expel the demon, and to use the gall of the same fish to cure Tobias' blindness.

In Enoch 10 Raphael and Michael both receive a commission from God to punish the fallen angels, who had married human wives. The reason why Raphael was bidden to cast the angels into cavities, and cover them for ever with rugged stones, was, that he might *heal* the earth, which had been defiled by the enormities of the 'watchers.' Jewish tradition names Raphael as the third of the angels who appeared to Abraham in Gn 18, his duty being to impart to Sarah 'strength to conceive seed,' cf. He 11¹¹, Ro 4¹⁹. The Midrash speaks of a *Book of Noah* (see vol. iii. p. 557^a), which was one of the earliest treatises on medicine. The origin of this book is said to have been that after the Flood men were afflicted with various diseases, and God sent the angel Raphael to disclose to Noah the use of curative plants and roots (Rönsch, *Buch der Jubiläen*, 385 f.). Thus was Raphael true to his name, 'El has healed.'

J. T. MARSHALL.

RAPHAIM (A 'Ραφαίμ, & 'Ραφαίμ, B om.).—An ancestor of Judith, Jth 8¹.

RAPHON ('Ραφών).—A city in Bashan, 'beyond the wādy' (πέραν τοῦ χειμάρρου), near which Timotheus sustained a defeat at the hands of Judas Maccabæus (1 Mac 5³⁷). It is no doubt the *Raphana* of Pliny (*HN* v. 16), but the site has not yet been identified.

C. R. CONDER.

RAPHU (רָפְחָא 'healed'; 'Ραφού).—The father of Palti, the spy selected from the tribe of Benjamin, Nu 13⁹.

RASSES (BA 'Ρασσείμ, & 'Ρασσείμ, Lat. *Cod. corb.* and Vulg. *Tharsis* [=Tarsus], Old Lat. *Tyras et Rasis*, Syr. *Thiras* (Gn 10⁹) and *Raamses* (Ex 1¹¹)).—Among the peoples which Holofernes subdued are mentioned 'the children of Rasses' (Jth 2²³). Some think the Vulg. *Tarsus* is original, the Greek a corruption, the Old Lat. and Syr. a union of the two. Fritzsche suggested *Rhosos*, a mountain chain and city south of Amanos, on the Gulf of Issus. Ball adds the possibility of *Rosh* (Ezk 38^{2, 39}). Eastern Asia Minor seems to be the general region which the connexion suggests.

F. C. PORTER.

RATHUMUS (Ράθυμος), 'the story-writer' or 'recorder,' 1 Es 2^{16, 17, 20, 22}, is the same as 'Rehum the chancellor' of Ezr 4^{8, 9, 17, 23}. The LXX of Ezra has merely transliterated the Aramaic title; 1 Es has either taken it as a proper name (καὶ Βελάρεθμος, ¹⁶), or tr^d it as a title (ὁ [γράφων] τὰ προσηπτικόντα ¹⁷), or combined both these renderings (²³). See *BEELTETHMUS*, CHANCELLOR.

RAVEN (רָבִיב 'oreb, & רָבִיב, *corvus*, Arab. *ghurāb*).—Both the Heb. and Arab. roots mean 'to be black.' The Arab. root also contains the idea of *leaving home*. From these two meanings the raven has come to be a bird of specially evil omen to the Arabs, who attribute to his presence the worst of presages of death and disaster. They are especially superstitious about the *ghurāb el-bén*, which they say is marked with white on his

black coat, or has a red beak and legs. What bird is meant by these descriptions is not quite clear. It is probably fabulous.

The raven is the first bird mentioned by name in the Bible (Gn 8⁷). The Heb. implies that the raven went out and stayed, probably feeding on carcasses. The LXX and Vulg. seem to imply that it went out and stayed until the waters were dried up, and then returned. But there would have been no reason for its returning then. The raven was unclean (Lv 11¹⁵, Dt 14¹⁴). It is in part a carrion bird, and therefore uneatable. Ravens were commanded to feed Elijah, and did so (1 K 17⁴⁻⁶). See article ELIJAH in vol. i. p. 688^b. God is twice said to provide for young ravens (Job 38⁴, Ps 147⁹). There is nothing especially significant in this. It is implied in the previous and succeeding verses that God provides for other wild animals. The stories that ravens neglect their young are fabulous. The allusion to the carrion-eating propensities of ravens (Pr 30¹⁷) is true to nature. They are always found among the birds and animals which assemble around a carcass in Palestine. They, however, capture and eat lizards, hares, mice, etc. Their black colour is compared with that of the hair of the Shulamite's lover (Ca 5¹¹). They are among the ill-omened creatures which symbolize the desolation of Edom (Is 34¹¹). Ravens are not wholly flesh-eaters. On the contrary, they are very fond of chick peas and other grains, by devouring which they do vast damage to the farmers.

The term 'orebh, as well as κόραξ, is not confined to the raven. It doubtless includes all birds after its kind (Lv 11¹⁵). Of these, besides *Corvus corax*, L., the raven, there are in Palestine *C. affinis*, Rüpp., the Fantail Raven; *C. cornix*, L., the Hooded Crow (Arab. *zāgh*); *C. agricola*, Trist., the Syrian Rook; *C. monedula*, L., the Jackdaw (Arab. *kāk*); *Garrulus atricapillus*, St. H., the Syrian Jay or Garrulous Roller (Arab. *akāk*); and *Pyrrhocorax alpinus*, Koch, the Alpine Chough. Most of these eat vegetable food as well as animal, including grubs, worms, etc. To all would apply the words of Christ (Lk 12²⁴) in regard to God's provision for them, although they neither sow nor gather into storehouses. G. E. POST.

RAVEN, RAVIN.—To 'raven' is to seize with violence, to prey upon with greed or rapacity, and so 'raven' or 'ravin' is plunder or prey. The word comes from Lat. *rapina* plunder, through Old Fr. *ravine*, whence also Eng. 'ravine' a mountain gorge, and 'rapine' plunder. There is no connexion with the bird, the raven, whose name is of native origin, Anglo-Sax. *hrafen*.

The verb occurs in AV in Gn 49²⁷ ('ravin,' intrans.), Ezk 22²⁷ ('ravining,' trans.), the Heb. being רָבַח to *tear as prey*. As a subst. 'ravin' is found in Nah 2¹² 'The lion . . . filled his holes with prey, and his dens with ravin' (רָבִין); and 'ravining' in Lk 11³⁰ 'Your inward part is full of ravining and wickedness' (ἀρπαγή, RV 'extortion'). The adj. is either 'ravining' (Ps 22¹², Mt 7¹⁵) or 'ravenous' (Is 35⁴ 46¹¹, Ezk 39⁴).

An example of 'ravin' in the sense of 'plundering' is Udall, *Erasmus' Paraph.* i. 17—'Mekenesse obteyneth more of them that geve wyllingly and of their owne accorde, then violence and ravine can purchase or obtayne by hooke and croke'; and in the sense of 'plunder,' 'booty,' Spenser, *FQ* i. xi. 12—

'His deepe devouring jawes
Wide gaped, like the grisly mouth of hell,
Through which into his darke abyse all ravin fell.'

J. HASTINGS.

RAZIZ (Ραζιζ).—The hero of a narrative in 2 Mac 14^{27a}. Nicanor, having been informed

against Raziz (who is described as 'an elder of Jerusalem, a lover of his countrymen, and a man of very good report, and one called "father of the Jews" for his goodwill towards them'), sent a band of soldiers to apprehend him. He escaped arrest by committing suicide, the circumstances of which are described in revolting detail in 2 Mac. His conduct is criticised adversely by Augustine (*Ep.* civ. 6) in opposition to the Donatists, who admired it, as the author of 2 Mac. evidently did.

RAZOR (רָצָה 'knife,' Nu 6⁸ 8⁷, Ps 52², Is 7²⁰, Ezk 5¹; רָצָה 'razor,' Jg 13¹⁶ 17, 1 S 1¹¹).—It is not likely that originally there was any distinction between razors and knives, the same word רָצָה being used in many passages for both, but a special word for razor (רָצָה, Arab. *mūs*) is used in the stories of Samson and Samuel. In the above passages the LXX uniformly tr. רָצָה by ξυρῆς, and רָצָה by σιδῆρος except in Jg 16¹⁷ where B has σιδῆρος but A ξυρῆς. In early times razors were probably made of bronze, as other cutting instruments were. In Wilkinson's *Anc. Egypt.* 1878, vol. ii. p. 333 note, it is said of the barber, 'his instruments and razors varied at different times, being sometimes in shape of a small short hatchet with recurved handle; other instruments knife-shaped were also employed.' Forty years ago a peculiarly shaped razor, with a straight fixed handle, was in use in Syria; now European razors are universally used. W. CARSLAW.

REIAIAH (רֵיָאִיָה 'Jah hath seen').—1. The eponym of a Calebite family, 1 Ch 4² (B 'Paḏā, A 'Peid), probably to be preferred (so Bertheau and Kittel; Gray [*HPN* 236] is more doubtful) to HAREEH, 1 Ch 2²³ (רֵיָאִיָה 'the seer,' B Alw, A 'Araḏ). 2. The eponym of a Benjamite family, 1 Ch 5⁵ (AV Reiaia; BA Ρηχά, Luc. 'Paḏ). 3. A Nethinim family name, Ezr 2⁴⁷ (B 'Peṭā, A 'Paḏ)=Neh 7⁵⁰ (B 'Paḏ, A 'Paḏ)=1 Es 5⁵¹ JAIRUS.

REAPING.—See AGRICULTURE.

REBA (רֵבָא).—One of the five kinglets of Midian who were slain by the Israelites, under Moses, Nu 31⁸ (Ρόβος), Jos 13²¹ (B 'Pōbe, A 'Pēbek). Like his companions, he is called in Numbers a מֶלֶךְ ('king'), but in Joshua a מִנְיָ ('prince,' 'chieftain').

REBECCA.—The NT and modern spelling (from the Gr. Ρεβέκκα) of the name which is spelt in OT REBEKAH. The only occurrence of 'Rebecca' is in Ro 9¹⁰ (both AV and RV).

REBEKAH, in Ro 9¹⁰ REBECCA (רֵבְקָה, i.e. *Ribhḳāh*; in Arab. a cord with loops for tying lambs or kids, from *rabaka*, to tie or bind fast; LXX and NT Ρεβέκκα, Vulg. Rebecca).—Daughter of Bethuel, the son of Nabor and Milcah, and consequently great-niece of Abraham (Gn 22²⁰, 22); sister of Laban, and subsequently wife of Isaac. The idyllic story of the circumstances through which Rebekah became Isaac's wife is told by J. in his usual picturesque style, and at the same time with stress on the providence which overruled them (vv. 7^b, 12 [lit. 'cause it to meet—i.e. happen successfully—before me,' so 27²⁰] 14. 27. 48. 50. 51. 56), in Gn 24. In accordance with Eastern custom (MARRIAGE, vol. iii. p. 270), the betrothal is arranged without Isaac's own personal intervention: Abraham sends his principal and confidential servant (v. 2) —called in E (15^{2a}) Eliezer—to find a wife for his son, not from among the Canaanites around him, but from his own relations in 'the land of his nativity': the servant proceeds accordingly to Aram-naharaim, to the 'city of Nabor' (i.e. Haran: cf. LABAN, vol. iii. p. 13^b); as he reaches

the well outside the city (v.¹¹), he prays for a sign by which he may know Isaac's destined bride; and the damsel who fulfils it proves to be Rebekah. Laban and Bethuel, satisfied by the evidence of their uncle's prosperity (vv.^{22, 30, 35}; cf. v.¹⁰ [RV], v.²⁴), and of Isaac's prospective wealth (v.³⁰), and recognizing in what had happened the hand of Providence (vv.^{50, 51} *end*, —'spoken,' viz. by the facts), agree to the servant's proposal; Rebekah herself consents to return with him (v.⁵⁷), and so she becomes Isaac's wife, consoling him after his mother's death (v.⁵⁷). *

Like Sarah, Rachel, and Hannah, Rebekah was at first barren; and her barrenness ceased only after Isaac's entreaty (25²¹),—according to the chronology of P (25^{20, 26}),—20 years after her marriage. On the oracle, received by her (25²³), shortly before the birth of her twin sons, see JACOB, vol. ii. p. 526. The next incident in Rebekah's life that we read of is on the occasion of Isaac's visit to Gerar (26⁶⁻¹¹), when, fearing lest her beauty (cf. 24¹⁶) might attract admirers, and his own life be endangered in consequence, he passed her off as his sister (cf. Gn 20; and ISAAC, vol. ii. p. 484^b). Jacob was Rebekah's favourite son (25²⁸); and Gn 27 (JE) tells of the deed of treachery by which the ambitious and designing mother, 'sacrificing husband, elder son, principle, her own soul, for an idolized person,' secured for him his father's blessing (see more fully, on this narrative, JACOB, vol. ii. p. 527). After this, she prompted Jacob to flee to his uncle Laban, in order to escape Esau's vengeance, vv.⁴³⁻⁴⁸; in the paragraph from P which follows (27⁴⁶⁻²⁸), however, the motive upon which she urges his visit to Haran, is that he may obtain a wife, not, like Esau (cf. 26^{34, 35} P), from among the natives of Canaan, but from among Laban's daughters (see, further, *ibid.*). An isolated, and very possibly misplaced, notice (35⁸) states that Deborah, Rebekah's nurse, who had accompanied her long before from Haran (24⁵⁹), died after Jacob's return to Canaan, and was buried below Bethel. The death of Rebekah herself is not specially mentioned; but in 49³¹ (P) she is said to have been buried in the cave of Machpelah.

S. R. DRIVER.

RECAH.—In a genealogy contained in 1 Ch 4, the sons of Eshton (v.¹²) are described as 'the men of Recah' (רְכָאִי), a place which is not mentioned elsewhere in the OT, and is quite unknown. The LXX has B Πηγάβ, A Πηφά.

RECEIPT OF CUSTOM (τελώνιον, RV 'place of toll'), Mt 9⁹, Mk 2¹⁴, Lk 5²⁷. See PUBLICAN, TAXES, TOLL. For 'receipt' in the sense of 'place for receiving,' see Mandeville, *Travels*, 112, 'Men have made a litylle Resceyt, besyde a Pylere of that Chirche, for to resceyve the Offrynges of Pilgrymes'; and Shaks. *Macbeth*, I. vii. 66—

'Memory, the warder of the brain,
Shall be a fume, and the receipt of reason
A limbeck only.'

RECHAB, RECHABITES (רְכָב, רְכָבִים, RV 'place of toll'), Mt 9⁹, Mk 2¹⁴, Lk 5²⁷. See PUBLICAN, TAXES, TOLL. For 'receipt' in the sense of 'place for receiving,' see Mandeville, *Travels*, 112, 'Men have made a litylle Resceyt, besyde a Pylere of that Chirche, for to resceyve the Offrynges of Pilgrymes'; and Shaks. *Macbeth*, I. vii. 66—

RECHAB, RECHABITES (רְכָב, רְכָבִים, RV 'place of toll'), Mt 9⁹, Mk 2¹⁴, Lk 5²⁷. See PUBLICAN, TAXES, TOLL. For 'receipt' in the sense of 'place for receiving,' see Mandeville, *Travels*, 112, 'Men have made a litylle Resceyt, besyde a Pylere of that Chirche, for to resceyve the Offrynges of Pilgrymes'; and Shaks. *Macbeth*, I. vii. 66—

* Which, however, though only according to P, had taken place three to four years previously (17¹/ 23¹ 23²²).

murdered Ishbosheth, carried the news to David, and were put to death by his orders; 2 S 4^{5a}. J¹ (Budde). Cf. BAANAH, ISHBOSHETH.

2. 3. Rechab in 1 Ch 2⁵⁵ 'Hammath, the father of the house of Rechab,' and Rechab in Neh 3¹⁴, 'Malchijah ben-Rechab,' sometimes reckoned as separate individuals, are to be identified with the following—

4. Rechab, Rechabites.—A clan of the Kenites, in later times, probably after the Return from the Captivity, incorporated in the tribe of Judah, i.e. in the restored Jewish community in Palestine, 1 Ch 2^{55, 56}.

The view that the Rechabites were a religious sect, founded by Jehonadab (2 K 10¹³⁻²⁸, Jer 35), is improbable; although Dillmann, Oehler, Schultz, etc., speak of him as 'the founder of the Rechabites.' It is not likely that the founder of the Rechabites would himself be described as 'ben-Rechab'; moreover, 1 Ch 2⁵⁵ speaks of Hammath (AV Hemath) as the 'father of the house of Rechab.'

This clan is traced back (1 Ch 2⁵⁵) to Hammath (חַמַּת = 'hot spring,' LXX B Μεσημά, A Αμαθ), a descendant of Hur, the son of Caleb, i.e. a clan of the Calebite branch of the Kenites. The view of Bertheau (*in loco*), that Rechab was the actual father and Hammath the grandfather of the Jehonadab of 2 K 10, etc., is contrary to all analogy. Jos 19³⁵ (P) mentions a town Hammath in Naphtali. As a settlement of Kenites under Heber and Jael existed somewhere in that district in the time of Deborah (Jg 4¹⁷ 5²⁴), and the Rechabites belonged to the Northern Kingdom in the time of Jehu, it is possible that the Rechabites had some connexion with this town before they migrated to Judah. It is clear, however, from Jer 35 that they were a nomad tribe up to the fall of the Southern Kingdom. Moreover, according to Kittel (*SBOT*), 1 Ch 2⁵⁵ is part of a late addition to Chronicles.

The Rechabites appear in the OT on three occasions. First, in the person of Jehonadab ben-Rechab (i.e. 'the Rechabite'), in 2 K 10^{13a}. Jehonadab showed his zeal for the exclusive worship of Jehovah by associating himself with Jehu in his fierce persecution of the devotees of Baal. Josephus reproduces the biblical narrative in *Ant.* ix. vi. 6, and mentions Jehonadab, but does not say that he was a Rechabite. The second incident is narrated in Jer 35. Some time after the reign of Jehu, probably about the period of the Fall of Samaria, the Rechabites had migrated to Judah. When Nebuchadrezzar invaded Judah in the reign of Jehoiakim, the Rechabites took refuge in Jerusalem, probably encamping in some open space within the walls. Jeremiah utilized their presence to provide an object-lesson for his fellow-countrymen. Amongst other prohibitions, their clan-laws forbade them to drink wine. The prophet invited the clan under their chief, Jazaniah ben-Jeremiah ben-Habazziniah, to meet him in a chamber attached to the temple, and offered them wine. They refused on the ground that their 'father' Jonadab ben-Rechab had forbidden them to drink wine, build houses, sow seed, or plant vineyards, and had commanded them to live in tents. They stated that they had always obeyed these commands, and had entered Jerusalem only through sheer necessity. Josephus does not reproduce this incident, nor does he anywhere mention the Rechabites.

The Rechabites therefore regarded Jonadab much as the Israelites regarded Moses. They traced to him their clan-law. It is not likely, however, that he originated the customs which he made permanently binding. In his time the Rechabites, of whom he was doubtless chief, were a nomad clan pasturing their flocks in the less occupied districts of the Northern Kingdom; they and their chief were zealous worshippers of Jehovah. In the natural course of events they would have followed the example of the Israelites, once their

fellow-nomads, and settled down as farmers and townsmen. Probably the process was beginning in the time of Jonadab; but that chief nipped it in the bud, and induced his followers to make their ancient nomadic habits matters of religious obligation. He had no leanings to asceticism, and his ordinances were not intended to make his followers ascetics. He forbade wine, but the term 'wine' is to be understood strictly; there is no prohibition of any other intoxicant. His motives would be twofold. First, the nomad regards agriculture and city life as meaner, less manly, less spiritual than his own. Jonadab wished to keep his clan to the higher life. Moreover, when the Israelites surrendered nomad life to settle on the land and in towns, they corrupted their worship of Jehovah by combining it with the superstitious and immoral rites of the Canaanite baals, to whom, as they thought, they owed their corn and wine and oil, Hos 2^d. Recently, under Ahab and Jezebel, the worship of Baal had greatly developed. The cultivation of corn and of the vine seemed to lead directly to baal-worship; and it would seem to Jonadab that by cutting off his people from any connexion with agriculture he would preserve the purity and simplicity of their ancient worship of Jehovah.

Probably the Rechabites were still in Jerusalem when the city was taken by Nebuchadrezzar, and some of them shared the Captivity and the Return of the Israelites. Under stress of circumstances, they would be obliged to finally surrender their ancestral customs, so that in Neh 3^d we find Malchijah the Rechabite engaged under Nehemiah in rebuilding the walls of Jerusalem. Malchijah is styled 'ruler of the district of Beth-haccherem,' i.e. of the 'House of the Vineyard.' The very obscure verse 1 Ch 2^{6d} describes 'The families of scribes that dwelt at Jabez'—a town in Judah—'the Tirathites, the Shimeathites, the Succathites,' as 'Kenites that came of Hamnath, the father of the house of Rechab.' This points to the settlement of some Rechabites in late post-exilic times at Jabez as 'scribes.' The Vulgate regards the words rendered 'Tirathites,' etc., as titles of three classes of scribes, 'canentes atque resonantes, et in tabernaculis commorantes' = 'singers, makers of an echo or of a ringing sound [? chorus], and dwellers in tents,' but the words are proper names (so LXX), and denote three clans of the men of Jabez.

The promise of Jer 35^{18d}, that because the Rechabites had kept the laws of Jonadab, 'Jonadab ben-Rechab shall not want a man to stand before me for ever,' might lead some later Rechabites to revert to their ancient clan customs. It would also lead those who lived like other Jews to keep up the memory of their descent from the ancient Rechabites. Jeremiah does not expressly state that the fulfilment of his promise is dependent on the continued observance of the laws of Jonadab. But, on the other hand, this promise and its implied conditions would naturally lead communities or individuals which observed some or other of these laws to adopt the name 'Rechabite,' and to imagine a genealogy connecting them with Rechab. Thus, in modern time, a Total Abstinence Society, whose members live in houses and do not abjure corn or oil, styles itself the 'Rechabites.' Probably this is the explanation of the statement of Hegesippus (*ap. Eus. HE* ii. 23), that 'one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet,' protested against the murder of James the Just, especially as Epiphanius (*Her. lxxviii. 14*) substitutes Symeon the brother of James for the Rechabite (so E. H. Perowne in Smith's *DB*). The name had become a term for an ascetic. A similar view explains the fact that travellers—Benjamin of Judaea, 12th cent.; Wolff, 1829; Pierotti, c. 1860—have found

tribes in Syria and Arabia claiming the name Rechabite and professing to observe the laws of Jonadab. These tribes are probably connected with the ancient Rechabites in just the same way as the Total Abstinence Society mentioned above. Moreover, as words for 'horseman,' 'camel-rider,' in Heb., Aram., and Arab., are derived from the root *rkḥ*, it is easy to see how tribes might be called 'Rechabites' without any connexion, real or imaginary, with the Old Testament clan.

In Ps 71 (LXX 70) the LXX has the title *Τῷ Δαυείδ, υἱῷ Ἰωνάδᾶβ* (R *Ἀμινάδαμ*, καὶ τῶν πρώτων ἀρχαλωτισθέντων, 'To David, of the Bnē Jonadab (R Aminadam, i.e. Aminadab) and of those first carried away captive.' This title has sometimes been adduced as evidence of the existence and importance of the Rechabites in the 3rd or 2nd cent. But the origin, text, and meaning of the title are too uncertain to warrant any such conclusion. Jonadab may be the cousin of David; or, as the reading of R suggests, a scribe's error for some other name.

The devotion of the Rechabites to Jehovah is illustrated by the zeal of Jonadab and by the fact that all the names of individual Rechabites known to us include the Divine name Jehovah, viz. Habazziniah, Jaazaniah, J(eh)onadab, Jeremiah, and Malchijah. It has generally been supposed that the Kenites were led to adopt the worship of Jehovah through their association with the Israelites; and that the zeal of Jonadab, like that of Jehu, was inspired by the teaching of Elijah and Elisha. But recent scholars, e.g. Budde, have pointed out the close association of Jehovah with Sinai, and of Moses with the Kenites (see JETHRO, HOBAB), and have suggested that the Israelites adopted the worship of Jehovah from the Kenites, and that the Kenites, and therefore the Rechabites, were by ancient practice and tradition the most devoted followers of Jehovah in Israel; hence the zeal of Jonadab. It should be noted, however, that the only direct evidence for the connexion of the Rechabites with the Kenites is the very late and obscure passage in Chronicles.

As the Rechabite laws are simply the ordinary customs of nomads,—for primitive nomads the regular use of wine was impossible,—it is easy to find numerous parallels to them. Probably even the prohibition of wine is not strictly and directly religious, but merely a means for preserving the nomadic life. Hence Mohammed's prohibition of wine and similar laws or taboos (cf. *RS* 484 f.) are not real parallels. Of others commonly cited is the statement of Diodorus Siculus (xix. 94, c. 8 B.C.), that the Nabatean Arabs forbade sowing seed, planting fruit-trees, using or building houses, under pain of death. Cf., further, JEHONADAB, JEREMIAH, KENITES, TIRATHITES, SHIMEATHITES, SUCCATHITES.

5. In Jg 1⁹ the LXX has for 'because they had chariots (*rekhebh*) of iron,' 'because *Rechab* commanded them'; an obvious mistake.

LITERATURE.—W. H. Bennett, *Jeremiah xxi. lii. p. 44 f.*; Budde, *Rel. of Jer. to the Exile*, p. 19 f. (for connexion of J. with the Kenites); Dillmann, *OT Theol.* p. 172; Oehler, *OT Theol.*, Eng. tr. ii. 195; E. H. Perowne, art. 'Rechabites' in Smith's *DB* (views of Patristic and other commentators, travellers' tales of 'Rechabites' in Syria and Arabia); Schultz, *OT Theol.*, Eng. tr. i. 91, 103; Smend, *Alttest. Religionsgesch.* 93 f.; *RS* 484 f. W. H. BENNETT.

RECONCILIATION (*καταλλαγή*).—The general doctrine of the ATONEMENT has been dealt with under that title (vol. i. p. 197), and the biblical phraseology under PROPITIATION (p. 128). The present art. is concerned with the reconciliation made by Christ between God and men; and the question specially to be investigated is, whether it is subjective only, our reconciliation to God, or

objective also, God's reconciliation to us. The Gr. word occurs four times in NT, Ro 5¹¹ 11¹² and 2 Co 5¹⁸,¹⁹ and in all these places it is used objectively to describe the new relation between God and humanity brought about by the work of Christ (see Cremer, *Bibl.-Theol. Lex. s.v.*). This is, perhaps, most clearly seen in Ro 5¹¹ δι' οὗ νῦν καταλλαγὴν ἐλάβομεν, 'through whom we have now received the reconciliation.' The reconciliation must have been already an accomplished fact before it could be received, i.e. before faith or feeling could have anything to do with it. So in Ro 11¹² the καρ. κόσμου is plainly the favourable attitude of God towards the world through His turning away from Israel. In 2 Co 5¹⁸,¹⁹ the διακονία τῆς καταλλαγῆς and the λόγος τῆς καταλλαγῆς are the means appointed by God to bring men to a knowledge of what He has done for them in Christ. And what is that? What is 'the word of reconciliation'? It is 'that God was in Christ, reconciling the world unto himself.' That this refers to an objective matter of fact, not a subjective state of feeling, is plain from the exhortation based on it: 'Be ye reconciled to God.' Besides, how was God in Christ reconciling the world to Himself? By 'not imputing unto men their trespasses.' But this was only the negative side of it. The positive is reserved to clinch the argument at the close: 'For God made him to be sin for us, who knew no sin, that we might be made the righteousness of God in him' (2 Co 5²¹). But if this is the meaning of the reconciliation in the two most important of the passages that bear on it,—the doing on God's part of all that needed to be done to make it right for Him to receive us back into favour,—the reconciliation cannot have respect to us alone, nor can the whole purpose of the work of Christ be exhausted in the moral effect it has upon us as a pathetic display of the love of God. Moreover, according to Ro 3², the primary object of the work of Christ was not to display the love, but the righteousness of God. That righteousness had been obscured by the forbearance of God in the past, and might still further be obscured in the future by His forgiving men on the ground of their faith in Jesus. They had been tempted, and might again be tempted, to doubt the reality of His wrath against sin, unless it were made clear that in forgiving it to men God had dealt seriously with it in the propitiatory work of Christ.

1. *The Need of Reconciliation on the part of God.*—The subject has already so far been discussed, and passages have been cited both from OT and NT ascribing anger, wrath, indignation, jealousy, and even hate to God (see art. ANGER OF GOD in vol. i. p. 97 ff.). But something may be added to what is there said of the reluctance theologians have long shown to take such passages seriously. In their recoil from the extreme anthropomorphism of fiery writers like Tertullian, they have, from Origen downwards, often rushed to the opposite extreme, and conceived of God not only as a Being 'without parts,' but also 'without passions.' But anthropomorphism has at the heart of it a truth of priceless worth, for man was made in the image of God (Gn 1²⁶), and therefore, spiritually considered, their natures are essentially akin. As we appreciate and apply this truth in Christology, we make it easier to see the possibility of an Incarnation. If the Divine and the human natures were disparate, it is hard to see how there could be a union of God and man; but if they are essentially akin, the difficulty is at least sensibly relieved. But, if this help is available for Christology, it is available for Theology also. For then, what Edward White calls 'the Buddhism of the West,' according to which God is conceived as a Being of passionless repose, sublimely raised above all the

fluctuations of feeling to which we are subject, gives place to a truer conception of God, more human and therefore more Divine. (See the Excursus on the 'Sensibility of God' in Ed. White's *Life in Christ*, p. 255, and Bushnell's Sermon on 'the Power of God in Self-Sacrifice' in *The New Life*).

We are here concerned, however, not with the Divine sensibility in general, but with that particular form of it implied in the anger or wrath of God. What is meant by that? Our answer to the question will turn in part on the view we take of the way in which God governs the world, and in part on the view we take of our own nature in comparison with God's. If we think that God administers a law above and apart from Himself, as a judge administers the law of his country, we must interpret all that Scripture says of His anger or wrath in some non-natural sense, for these are emotions which, even if he had them, a judge would not betray. The more perfect he is as a judge, the more carefully will he suppress them. His decisions will tell us nothing of his personal feelings, but only of his determination to uphold the law of the land. Now this is just how the great majority of theologians, from Origen and Augustine down to our own day, have dealt with the language of Scripture about the anger of God. They have taken it in a thoroughly non-natural sense, as if it told us nothing of the personal feeling of God, but only of His judicial determination to punish and put down wickedness (see Simon, *Redemption of Man*, pp. 223-229). But this is not how the Scriptures speak, and therefore we may be sure it is not the view they take of God's relation to the world. They give free vent to God's personal feelings regarding the character and conduct of men, from which we may safely infer that they did not regard Him primarily as our Judge, but as our Father, the Father of our spirits, and our Judge in virtue of His Fatherhood; for as every father is head over his own house, so is God Head over all (1 P 1¹⁷). In other words, His relations to us are personal, and His government direct. There is no law over and above Him, or between Him and us. The law He upholds is that of His own life, and therefore of ours, for our life is but our finite share in His. Hence His Divine displeasure, when we do anything to disturb it. It is Him and not merely ourselves we grieve, when we fall out of right relations to Him; and against Him we chiefly offend, even when we do wrong to others. 'Against thee, thee only, have I sinned, and done that which is evil in thy sight' (Ps 51¹).

The nearest human analogue we have to the moral government of God is that of the family, and the best clue we have to the feeling of God when we deliberately do wrong is the bitter disappointment of a father who has loved and lived for his children, when they have rebelled against him, until the filial bond between them is strained almost to the breaking. And the Divine Father feels it the more, because, though we may cease in spirit to be His children, He cannot cease to be our Father. He cannot consent to stand in any lower relation to us, and can only express His astonishment that we should behave as we have done. 'Hear, O heavens, and give ear, O earth, for the Lord hath spoken: I have nourished and brought up children, and they have rebelled against me' (Is 1³). That is what sin means to God. Is it any wonder that He should hate it, and plead with His rebellious children as He does: 'Oh, do not this abominable thing which I hate' (Jer 44¹).

But even pathos like that will be lost on us, unless we further see what the Fatherhood of God involves, namely, that His nature and ours are essentially akin, so that, allowance being made for our moral imperfection, from our own experience we may

safely infer His. If man was made in the image of God, a good man must be a good guide to right thoughts about God. If a good man may be angry, so may God. A good man's anger will never be mere blind rage, nor mere personal resentment, but as moral indignation it may rise to any height; and the better he is, the higher it will rise, in the presence of deliberate wrong-doing. And that being so, it were surely strange to conclude that if he were altogether perfect, his anger would entirely disappear. There would disappear from it only what defiled it before—the smoke, but not the flame; as we see in the one perfect Man of the whole race—the Man, Christ Jesus. Was He never angry? Did not He look round on His enemies 'with anger, being grieved for the hardness of their hearts'? (Mk 3⁶). And can we conceive Him denouncing the hypocrites of His day in cold, unimpassioned language? Is not His indictment against them instinct with moral indignation, the fire of which we feel as we read it still? We cannot doubt the reality of His anger. Why, then, should we doubt the reality of God's? Was not God in Christ denouncing the Pharisees, as well as reconciling the world to Himself? And does not the one fact go far to determine how the other should be understood?

2. *The Possibility of Reconciliation on the part of God.*—But many demur to a mutual reconciliation, not only because they doubt the reality of God's anger, and see no need of reconciliation on the part of God, but also because they doubt its possibility, for reconciliation implies a change of feeling, and there can be no change in God. This, however, is confusion of thought. It is to misunderstand the nature of God's unchangeableness. God is not a mere mechanical force, but a living, moral mind. It is His character that is unchangeable, not His feelings, nor His actions. These must change with the changing character and conduct of His creatures, just because He changeth not. In any relevant sense of the word, it is not He that changes, but we. If we obey not, He abideth faithful. He cannot deny Himself, and therefore He must deny us, when we defy Him. In fact this apparent change in God proves His real unchangeableness, just as an apparent unchangeableness would prove a real change. (See Dörner on 'the Divine Immutability' in *System of Christian Doctrine*, i. 244 ff., iv. 80).

1. But both the need and the possibility of reconciliation on the Divine side seem to many forbidden from another point of view. There seems no room for it in the Christian conception of God. God is Love, and love is incapable of anger or hostility. But if God is love, love must be more than a mere emotion. It is a character, and a character is made up of likes and dislikes, attractions and repulsions, according to its affinity for, or aversion to, the character and conduct of those with whom it comes in contact. In other words, God is a person, not a force. He can, and does, discriminate between the righteous and the wicked. 'The eyes of the Lord are upon the righteous . . . the face of the Lord is against them that do evil' (Ps 34^{15, 16}). That does not mean that He does not love even them that do evil, but it does mean that His love is capable of hostility. How, indeed, can God love us for our good without showing His hostility to what would do us harm? When a river is dammed back by some obstruction thrown in its way, it chafes against it, and poetically we say it is angry. But it is not mere poetry to say that when the Divine love is held back by our sin, so that it can no longer flow forth to bless us as it would, it chafes against the obstacle, and cannot bear to be balked of its benign purpose concerning us. Love is goodness in earnest to

make others good, and when it cannot have its way it is grieved, when it is deliberately thwarted it is angry, and, as Coleridge says—

'To be wroth with one you love
Doth work like madness in the brain.'

It is here that Simon (*Redemption of Man*, p. 216 ff.), who has done so much to define and defend the reality of God's anger, has lost his way. According to him, 'love and wrath are mutually exclusive'; that is, they cannot both be felt for one and the same person at one and the same time, though they may both be felt by one and the same person towards different persons. 'A father may become angry with one of his children, and, to that extent, cease loving him, without therefore ceasing to love the rest. At the moment of intensest indignation with the one he may turn with tenderness to the rest. Not otherwise with God.' It is true, he adds that a man who is angry because his love has been repelled, 'will also, even whilst angry, carefully search for means of vanquishing the indifference, and converting the contemptuous aversion into loving regard. This is what a loving being, a loving God, can do, but it is misleading to ascribe it to love' (ib. p. 261). But surely, as Scott Lidgett has pointed out (*The Spiritual Principle of the Atonement*, p. 250 f.), it is contrary to the most familiar experience of life to say that love must either be requited or withdrawn. Life is full of unrequited and even outraged love that has never been withdrawn. Witness the way in which a mother will cling to a reprobate son, and for all the wrong he has done her never give him up while she lives. Nor is the love that will not let him go love in general, but distinctively her love for him. How could her love for her other children supply the energy required to seek reconciliation with him from whom, by the supposition, it has been withdrawn? It is a moral impossibility. Simon's mistake is due to his making too much of love as a mere emotion, forgetting that in its deepest and divinest sense it is a character, a more determination of the whole being towards another. As a character, love may survive the mere enjoyment of its own satisfaction. Satisfaction may give place to dissatisfaction and the severest displeasure. These may be the only emotions proper to it for the time being, but it cannot enjoy these, cannot even endure them, and, in its own interest as well as that of its object, it will seek their removal, and, if possible, out of its own resources provide a propitiation. That is precisely what God has done for us. 'Herein is love, not that we love God, but that God loved us, and sent his Son to be the propitiation for our sins' (1 Jn 4¹⁰).

2. But this brings us, in the second place, to what seems to many the greatest difficulty of all. That God should both require and provide propitiation seems to be a contradiction, and from the fact that God did provide it they infer that He did not require it—that is, did not need to be propitiated. It was provided by but not for Him. God did not, and could not, propitiate Himself. So W. R. Dale puts it. 'God Himself provided the ransom; He could not pay it to Himself' (*Atonement*, p. 357). To whom, then, or to what, was it paid? To the eternal law of righteousness, says Dale, as if there could be any such law above or apart from God, or as if propitiation had anything to do with impersonal law, or could be made at all outside personal relations. The difficulty is due to the assumption that God both provided and offered the propitiation—an assumption very commonly made, and made decisive of the whole matter. Thus W. N. Clarke says: 'If we wish to hold a doctrine that is real, we must choose between the two directions for the action in the work of Christ; we cannot combine them. There may be action that takes effect on God to influence Him, but we may be sure that it originates somewhere else than in God Himself; and there may be action that originates in God, but we may be sure that it takes effect upon some other. God does not influence Himself. If we choose or judge between these two directions, there can be no doubt as to the result. In the work of Christ, was God the actor, or was God acted upon? For we are at war with reality if we attempt to affirm both. We cannot hesitate about our answer. God was the Actor' (*Present-Day Papers*, 1900, vol. iii. p. 238). But God was not the Actor in the whole transaction. God provided the propitiation, but He did not offer it to Himself. Christ offered it, acting not as God's representative, but as ours. (See Cremer on *ἱλασμός*). God gave humanity in Him the means of making propitiation, but God

did not propitiate Himself. Nor is there any difficulty here but such as meets us everywhere in the spiritual life. It is only the supreme example of a universal spiritual law. Thus, *e.g.*, God both requires and gives repentance—or rather power to repent, for of course He does not repent for us. And so with every other grace, as the very word implies. The grace is in us, but it is of God. God worketh in us both to will and to do of His good pleasure. He neither wills nor acts for us, but enables us to will and act in the line of His own good pleasure. So in the work of reconciliation. God made it possible to humanity by the gift of Christ, but Christ as the Head and Representative of the race actually accomplished it. The principle underlying it is identical with the principle which underlies our whole religious life, and finds instinctive expression in the language of prayer, wherein we virtually ask God to fulfil His own law in us, to fulfil in us all the good pleasure of His goodness and the work of faith with power. (See, especially, Simon, *Redemption of Man*, ch. ix.). If this is a paradox, it is a paradox inherent in our very existence, as finite creatures, who have yet a certain moral independence over against God; and on its religious side it has never been better expressed than in Augustine's words: '*Da quod jubes, et jube quod vis*' (Conf. x. 29).

Times*, v. 532 ff.

A. ADAMSON.

RECORD.—To record a thing is to call it to mind (Lat. *recordare*, *i.e.* *re* and *cor* the heart, through Old Fr. *recorder*). This primitive meaning, 'call to mind' or 'meditate on' is found, *e.g.*, in Erasmus, *Crede*, 47, 'After that thou shalt have dyligently recorded these thynges, and called them well to remembrance, then have recourse hether agayne unto me'; Tindale, *Expositions*, 110, 'Therefore care day by day and hour by hour earnestly to keep the covenant of the Lord thy God, and to recorde therein day and night.' A similar meaning, 'bear in mind,' is common in Wyclif. Thus Gn 19²⁹ 'Whan forsothe God had subvertid the citees of that regioun, he recordide of Abraham' (1388 'he hadde mynde of Abraham'); Pr 31⁷ 'Of ther sorewe recorde thei no more' (1388 'Thanke thei no more on her sorewe').

We may call a thing to mind either by speaking about it or by writing it down. The former meaning is now obsolete, but AV has preserved one example: 1 Ch 16⁴ 'He appointed certain of the Levites to minister before the ark of the Lord, and to record, and to thank and praise the Lord God of Israel' (Heb. לְזַכֵּר, lit. 'to cause to remember,' RV 'to celebrate'; the AV tr^a is as old as Wyclif; the 1388 version gives 'have mynde of the werkis of the Lord').

The phrase 'call to record' means 'cause to testify,' Dt 30¹⁹ 'I call heaven and earth to record this day against you' (הָעֵדִי, 31²⁸); and 'take to record' has the same meaning: Is 8⁴ '(And) I will take unto me faithful witnesses to record' (לְיָדֵי); Ac 20⁴ 'Wherefore I take you to record this day, that I am pure from the blood of all men' (μαρτύρομαι ὑμῖν, which is incorrectly taken by AV, after Tindale, in the classical sense of 'call one to witness' [which would need ὑμᾶς], but rightly by RV, as by Wyclif, in the sense, known only to very late Greek, of 'testify').

The subst. 'record' is used in AV, usually in the sense of *witness*, whether the person who witnesses

(μαρτυρῶ, 2 Co 1²³, Ph 1⁸) or the testimony itself (μαρτυρία, Jn 1¹⁹ 8¹³, 14 19³⁵, 1 Jn 5¹⁰, 11, 3 Jn 1²). In the same sense is used the phrase 'bear record,' a frequent tr. of μαρτυρέω 'to give testimony.'

J. HASTINGS.

RECORDER. THE (רִשְׁפָּה, lit. 'the remembrancer'; LXX ἐπὶ τῶν ὑπομνημάτων, (ὁ) ἀναμνησκων, ὑπομνησκων, (ὁ) ὑπομνηματογράφος).—An officer of high rank in the Israelite kingdom. His functions are nowhere precisely defined, but the importance of his office is shown by the fact that he is mentioned along with the commander-in-chief, the chief secretary, and other leading officials at the courts of David and Solomon (2 S 20²⁴ 8¹⁶ = 1 Ch 18¹⁵, 1 K 4³). In the reign of Hezekiah he appears as the king's representative together with the prefect of the palace and the chief secretary (2 K 18¹⁸, 37 = Is 36³, 32), while the holder of the same office under Josiah formed one of the commission appointed to superintend the repairing of the temple (2 Ch 34⁸). The 'recorder' is often supposed to have been a historiographer, but Benzinger (*Arch.* 310), Nowack (i. 308), Kittel (on 1 K 4³), *et al.*, argue plausibly that his duty was to remind the king of important business by preparing matters for his consideration and laying them before him. Under David and Solomon the office was filled by Jehoshaphat the son of Ahilud; under Hezekiah, by Joah the son of Asaph; and under Josiah, by Joah the son of Joahaz.

J. F. STENNING.

RECOVER.—The verb 'to recover' (Old Fr. *recouver*, Lat. *recuperare*) is still in use transitively in the sense of regaining something that has been lost, whether persons (Is 11¹, Jer 41¹⁶), territory (as 2 S 8³, 2 K 14²³, 1 Mac 10²²), or other possessions (as Hos 2⁸, 1 Mac 2²⁰); also of regaining health (Jer 8²²), strength (2 Ch 13³⁰, Ps 39¹²), sight (Lk 4¹⁸). But it is no longer used with the person to be restored to health as direct object, as it is in AV, 2 K 5³, 6, 7, 11, Is 38¹⁶ 39¹, Jth 14⁷. Cf. Shaks. *Jul. Cæs.* I. i. 28, 'I am indeed, sir, a surgeon to old shoes; when they are in great danger I recover them'; Defoe, *Crisoe*, 520, 'Our men in the Pinnace followed their orders, and took up three men; one of which was just drowning, and it was a good while before we could recover him.'

The intrans. use is also found in AV, to which RV adds Jn 11¹² 'The disciples therefore said unto him, Lord, if he is fallen asleep, he will recover,' for AV 'he shall do well'; RVm 'he shall be saved' (Gr. σωθήσεται, Vulg. *salvus erit*).

RED.—See COLOURS in vol. i. p. 457⁷.

RED DRAGON.—See REVELATION (BOOK OF).

RED HEIFER.—Of the numerous forms of ceremonial uncleanness which occupy so important a place in the priestly legislation, that arising from contact with, and even proximity to, a dead body was regarded as the most grievous, requiring a specially efficacious medium of lustration for its removal. To provide such a medium is the object of the unique enactment of Nu 19—unique in its title (see below), in its provisions, and, one is tempted to add, in the amount of discussion to which it has given rise.

The precise relation to each other of the two sections of this chapter is not easy to determine. According to Wellh. (*Comp. d. Hex.* 3 176, approved by Kuenen, *Hex.* 90) vv. 14-22 form an appendix to vv. 1-13, giving more precise instruction regarding the application to particular cases of the general Torah embodied in the latter. The more elaborate and peculiar title of the first section, however—viz. הַתֹּרַה הַזֹּאת 'the statute of the law (Tōrah),' Nu 19² 31² only—and other indications rather suggest that this section, vv. 1-13, is the younger of the two,* and be-

* According to the authors of the *Oxford Hexateuch* (1900), vv. 14⁶ are derived from a corpus of priestly tōrōth or decisions

longs to the secondary strata of P (P²). Neither section, it should be noted, presents that historical setting which is characteristic of the legal ordinances of the main stock of P. Such a setting, however, was supplied by later Jewish tradition. The rite of the red heifer, according to Josephus, was instituted by Moses on the death of Miriam (see Nu 20⁹, the chapter immediately following its institution in the Hebrew text), and the ashes of the first victim were used to purify the people at the expiry of the thirty days of mourning (Ant. iv. iv. 6).

- i. The preparation of the ashes of the red heifer.
- ii. The purpose and manner of their application.
- iii. The origin and significance of the rite.
- iv. The red heifer as a type of Christ.

i. *The procedure to be followed in the preparation of the ashes is laid down in outline in vv. 1-10.* Detailed instructions—a few of the more important of which are noted in the sequel—will be found in the special treatise of the Mishna devoted to the subject (see Literature at end of art.). The ashes are to be those of a victim with special qualifications of sex, colour, and condition, the ultimate grounds for which have formed the subject of endless debate among Jewish and Christian scholars. The sacrificial victims were predominantly males, in the case of the sin-offerings for the congregation, a he-goat (Lv 9²) or a young bullock (4²²); here, as in the ancient and allied rite by which the land was purified from the defilement of an untraced murder (Dt 21¹²), a heifer or young cow was prescribed. According to a widely supported view (Bähr, Kurtz, Keil, Edersheim, etc.), the female sex, as the immediate source of new life, was chosen in order to furnish a more suggestive contrast in a rite associated with death. This and similar explanations, however, seem to us to introduce a train of thought much too advanced for ceremonies bearing such evident marks of a great antiquity (see iii. below) as do those of Nu 19 and Dt 21. We ought rather, in these cases, to see in the choice of the female sex the desire to offer the most precious and therefore the most efficacious victim, the females, as the breeders of the herd, being the more valuable in the estimation of a pastoral people—a view reflected in the composition of Jacob's present to Esau (Gn 32¹⁴; cf. Dillm.-Ryssel, *Ex.-Lv.* 429).*

The age, by Rabbinic prescription, might range from two to five years (*Parah* i. 1); the colour must be red (רָקִיָּה, cf. *Zec* 1⁸ of horses), or rather reddish brown.† The heifer, further, had to be without spot or blemish of any kind, 'upon which never came yoke' (v. 3), rightly paraphrased by Josephus as 'a heifer that had never been used to the plough or to husbandry' (Ant. iv. iv. 6; cf. Dt 21³, and the epithets ἀφύγες, *injuges*, applied to sacrificial victims by classical writers). The cost was defrayed from the half-shekel temple tax (*Shekäl.* iv. 2).

Not the high priest, who dared not risk the contagion of uncleanness, but his representative, Eleazar, had to bring the victim forth 'without the camp' (v. 3)—that is, in actual practice, from the temple hill, by the so-called Red Heifer bridge, across the Kidron to the Mount of Olives. A rite so sacrosanct, and therefore entailing ceremonial defilement on the place and persons concerned, had to be performed at a distance from the sanctuary (cf. the barren valley of Dt 21⁴). At a spot secure from possible contamination by graves, the heifer was slain by a second person in the presence of the priest, who, dipping his finger in the warm blood, sprinkled thereof seven times in the direction of

—hence the signature P²—codified independently of the main stock of P (P²). See *op. cit.* ii. 218 f., and cf. i. 162 f., and art. NUMBERS.

* For other explanations of the comparative sacredness of the cow, see W. R. Smith, *RS²* 280, 2 287, and *ref.* there.

† The later Jewish authorities by a false exegesis, which took *temimāh*, 'physically perfect,' as a qualification of the preceding adjective 'perfectly red,' considered the presence of even two hairs of another colour as disqualifying (*Parah* ii. 8; cf. Rashi and other commentators, *in loc.*).

the sanctuary, i.e. the temple. A pyre having been previously constructed of various fragrant woods,* the complete carcass of the heifer—'her skin, and her flesh, and her blood, with her dung' (v. 3)—was burned thereon. At a certain stage (see *Parah* iii. 10) an interesting part of the ceremony took place. This was the casting, by the directing priest, of 'cedar wood (רִקְיָה), and hyssop, and scarlet' into the midst of the burning mass. According to later authorities, these items consisted of a thin piece of so-called 'cedar'—in reality a piece of the fragrant wood of the *Juniperus Phœnicea* (see CEDAR) or *J. Oxycedrus* (Löw, *Aram. Pflanzennamen*, p. 57)—a cubit in length, a bunch of aromatic hyssop or wild marjoram, and a strip of woollen cloth dyed scarlet, which bound the juniper and hyssop together (*Parah* iii. 10. 11, with commentaries; Maimonides, *de Vacca Rufa*).

When the whole pyre was reduced to ashes, these were collected by a third clean person—the two previous participants having been rendered unclean, in modern phrase 'taboo' (see below, iii.), by contact with the sacrosanct victim, and deposited by him 'without the camp in a clean place' (v. 3). The ashes (not of the red heifer alone, be it noted, but these mixed with the ashes of the fragrant woods) were now ready to be used as the law prescribed. All the three participants in the ceremony were unclean (or taboo) till sundown, after which time, having bathed their persons and washed their clothes, they were again ceremonially clean (vv. 7. 8. 10)—that is, they were again admitted to the society of their fellows, and to participation in the cultus.

ii. *The purpose of the ashes prepared as above is expressly declared to be 'for (the preparation of) a water of separation' (מֵי טָהוֹרָה v. 3; RVm 'a water of impurity').* The meaning of these words was early misunderstood. The LXX, followed by all the chief ancient versions, connecting טָהוֹרָה *niddāh* with the Aramaic form of the Heb. טָהַר 'to sprinkle,' rendered the phrase by ὕδωρ παρρησιῶν 'water of sprinkling,' Jerome's *aqua aspersionis*, Luther's *Sprengwasser*. In reality the verb טָהַר (see *Is* 66²) denoted in the technical language of the priests 'to exclude from the cultus,' in post-biblical Hebrew 'to excommunicate'; hence the substantive *niddāh* denotes 'that which excludes from the cultus,' † viz. ceremonial uncleanness or impurity. *Mē niddāh* (lit. 'water of exclusion') accordingly signifies *water for removing the uncleanness* which is the cause of this exclusion; in other words, as suggested by RVm, 'water [for the removal] of impurity.' The mode of preparation was of the simplest: 'for the unclean they shall take of the ashes of the burning of the sin-offering, and running water shall be put thereto in a vessel' (v. 11 RV). This simple procedure was later elaborated with the most ingenious detail, if we are to believe the statements of the Mishna, to which the student is referred (*Parah* iii. 2-5). A clean person—according to *Parah* xii. 10, an adult male, not a female, though the latter might hold the vessel—took a bunch of hyssop, dipped it in the 'water of impurity,' and sprinkled the house in which a death had taken place, and all the persons and utensils therein, except such of the latter as were provided with lids, or were otherwise closed against the contagion of uncleanness (v. 18). The same lustration was required in the case of uncleanness con-

* Four are named in *Parah* iii. 8: אֶרְבֵּי וְרִקְיָה (Amyr. *erinau*, 'cedar'), two species of juniper (probably), צִיטִּים 'cypress,' and fig.

† Ibn Ezra appears to be the first to grasp the true connexion between the verb and the substantive. See his comm. *in loc.* Rashi kept to the traditional view לֵב הַיָּדֵי 'for water of sprinkling.' The commentaries of both exegetes are found in the ordinary Rabbinic Bibles.

tracted by every one who had occasion to touch a dead body, whether the person had died a natural or a violent death, and by every one who had touched even a bone of the human body or a grave (v. 10).

By a separate enactment (Nu 31¹⁹⁻²⁴; note esp. *וְהָיָה כְּמִצְוֵהוּ* v. 21), which likewise bears every indication of belonging to the latest stratum of the priestly legislation, the 'water of impurity' had to be employed on the return from a campaign for the cleansing of the soldiers and their captives (31¹⁹), including their clothes and *impedimenta* (v. 20). The spoil, also, of precious and useful metals taken from the enemy, after a preliminary purification by being passed through the fire, had to be finally purified by the application of the 'water of impurity' (v. 22).

In the case of unclean persons the sprinkling was performed on the third and seventh days following that on which the uncleanness had been contracted. On the seventh day 'at even' or sundown, after having bathed their persons and washed their clothes, they were once more clean. The ban of exclusion from the cultus was finally removed, and the persons affected resumed their place in the holy community of J'.

iii. *Origin and significance of the rite.*—Although the chapter before us may, or rather must, have assumed its present form at a comparatively late period, the essential part of the ceremony of lustration may be confidently affirmed to be of extreme antiquity, for the mystery attaching to the beginning and the end of life, and to the blood as the vehicle of life, has impressed mankind from the earliest days. In all forms of primitive religious thought a dead body is conceived as a source of real, if undefined, danger to all in proximity to it. Itself in the highest degree unclean, in modern phrase taboo, it becomes an active source of uncleanness, and renders taboo everyone and everything about it. These death taboos, as they may be called, were in full force among the ancient Hebrews, as among the other nations of antiquity, and the means used to remove the taboo were to a large extent identical. Primarily, as Robertson Smith has pointed out, 'purification means the application to the person of some medium which removes a taboo, and enables a person to mingle freely in the ordinary life of his fellows' (RS¹ 405). The most widely distributed medium is, of course, water, but for aggravated cases of uncleanness this medium was supposed to acquire increased potency through the addition of ashes (see the ref. to ancient writers quoted by Bähr, *Symbolik*, ii. 495, and Knobel in Dillmann's commentary, *in loc.*). Here, then, we have the origin of the essential part of the Hebrew rite.

Closely connected with this circle of ideas is the universal belief of primitive man that sickness and death are caused by harmful and malevolent spirits whose anger he has incurred (cf. DEMON, vol. i. p. 590*). An interesting survival of this primitive mode of thought may, we venture to think, be found in the ritual of the red heifer. Much laboured ingenuity has been expended in finding suitable symbolical meanings for each of the 'cedar wood, hyssop, and scarlet' which were added to the burning pyre. According to some, cedar, hastily assumed to be the majestic cedar of Lebanon, is the symbol of pride, as hyssop of humility; according to others, cedar, the incorruptible wood, was chosen 'as typical of eternity of life, hyssop of purification from the power of death, and scarlet thread to show the intensity of life in the red heifer.' The true explanation, it seems to us, is to be found in the primitive conception referred to above. We have here a meaning-

less survival, of which innumerable parallels will occur to students of comparative religion, from the time when the fragrant woods, such as juniper and cypress and the aromatic plants of the mint family, were supposed to act as a protection against the harmful unseen powers that were the cause of death* and hovered about the dead. The scarlet cloth is to be explained either by the fact that a special healing virtue was assigned in antiquity to the scarlet dye (Delitzsch,† art. 'Sprengwasser' in Riehm's *HWB d. bibl. Alterthums*²), or by the universally prevalent idea of red, the colour of the sacred blood, as the taboo colour *par excellence* (Jewons, *Introd. to Hist. of Religion*, 67 ff.; Trumbull, *The Blood Covenant*, 236 f.).‡ The line of thought along which we have sought to explain this confessedly difficult part of the ritual, to the exclusion of the advanced symbolical interpretation hitherto current, finds further justification in the use of a sprinkler, consisting of a bunch of hyssop, tied to a handle of juniper wood by a similar strip of scarlet cloth, in sprinkling a house, as well as a person, that was to be declared free from the plague of leprosy (Lv 14^{51ff.}).

While we have thus endeavoured to trace the origin of the ritual of the red heifer to its source in an atmosphere of primitive religious thought common to the Hebrews of the pre-Mosaic age with other races on a similar plane of development, it must not be forgotten that the rite received a higher and fuller interpretation in being admitted into the circle of the priestly legislation of the post-exilic age. Uncleanness and sin, sin and death, are now associated ideas (for the whole subject, see art. UNCLEANNESS). The red heifer has become a sin-offering (vv. 9, 17) of a unique kind; part of the blood is sprinkled towards the dwelling-place of J', from whose worship those 'unclean from the dead' are temporarily excluded, the rest is burned with the victim to heighten the expiatory efficacy of the ashes. The rite in all its details becomes a powerful object-lesson, teaching the eternal truth that a holy God can be served only by a holy people.

It is no longer possible to ascertain the extent to which the 'water of impurity' was actually used as a medium of lustration by the mass of the Jewish people. Even such sober investigators as Delitzsch and Dillmann have pointed out the difficulties in the way of an extended application of the ritual of Nu 19 in a thickly peopled country. Again, what are we to make of the statement (*Para* iii. 5) that only seven or nine red heifers were slain in all—the first by Moses, the second by Ezra, and the rest later? The probability is that, like many other of the more stringent requirements of the Levitical code, the observance was confined to the more ardent legalists in Jerusalem. Jewish tradition represents this and other rites regarding uncleanness as ceasing to be observed about fifty years after the destruction of the temple (Hamburger, *Realencycl. d. Judenthums*, i. 874). The red heifer, it may be remarked finally, has given her name to the second chapter of the Koran, 'the surah of the heifer,' in which, however, Mohammed in his usual fashion has confused the two heifers of Nu 19 and Dt 21 (see *sur.* ii. 63 ff.).

iv. *The red heifer as a type of Christ.*—It was natural that the early Church should see in the expiatory rite of Nu 19 a prefiguring of the atoning work of our Lord. The first to give literary expression to this idea, which has received such detailed elaboration at the hands of successive generations of typologists, is the author of the

* In comparatively recent times in our own country, a juniper tree planted before a house was regarded as a preventive of the plague.

† Delitzsch is apparently the only writer who has sought to assign other than a purely symbolical significance to these three elements. See, besides the above article, his commentary on He 9¹³, and cf. Nowack, *Arch.* ii. 280, note 1.

‡ If we could be sure that the red colour of the heifer was as old as the practice of burning for the sake of the ashes, the choice would probably have to be explained by the same association of ideas. The oxen sacrificed by the ancient Egyptians had also to be red, a single black or white hair disqualifying an animal for the sacrifice (Plutarch, *Isis et Osiris*, 31; Herod. ii. 38, cited by Frazer, *Golden Bough*, i. 300, 2nd ed., 1900, ii. 312).

Epistle to the Hebrews in the familiar passage 9¹². In the Epistle of Barnabas we find a whole chapter (ch. 8) devoted to this subject, in the course of which the writer shows an intimate acquaintance with contemporary Jewish practice as reflected in the Mishna (see esp. *Parah* iii. 2, 3). 'The calf is Jesus,' the juniper wood is His cross, while the scarlet wool, the hyssop, and other details receive a more or less appropriate interpretation.

LITERATURE.—The comm. on Nu 19, esp. Dillmann; the treatise *Parah* (Lat. tr. with commentaries in Surenhusius' Mishna, vol. vi., English in Barclay's *Talmud*, p. 300 ff.), which forms the basis of Maimonides' treatise *הלכות פרה*, edited with Lat. tr. and notes by A. RED HORSE.—See REVELATION (BOOK OF), p. 239.

RED SEA (רָדִיָּה; Ex 10¹⁹ and often; also רָדִיָּה Ex 14² bis, 9, Is 51¹⁰ bis 63¹¹ etc.; רָדִיָּה; Is 11¹⁰; LXX ἡ ἐρυθρὰ θάλασσα, with the equivalent amongst Latin geographers *Mare Rubrum*, also *Mare Erythraeum*).—The origin of the name 'Red Sea' is uncertain, though several reasons for it have been assigned, such as the colour of the corals which cover its floor or line its shores; the tinge of the Edomite and Arabian mountains which border its coasts, and the light of an Eastern sky reflected on its waters. Dean Stanley considers that the name as applied to the Gulfs of Suez and Akabah is comparatively modern, as it was used to designate the waters of the Indian Ocean and the Persian Gulf before it was applied to the arm which extends northwards of the Strait of Bab-el-Mandeb; * and in the former application it is used by Berossus and Herodotus.† The Hebrew name *Yam Sûph* (see art. SUPH) appears to have been used from very early times. The origin of the name is not of much importance, since the name itself is in universal use.

The Red Sea is one of the most remarkable of oceanic gulfs on the globe, owing to the fact that it receives the waters of no river, while the evaporation from its surface is necessarily enormous. It must, therefore, be fed by the influx of water from the Indian Ocean through the Straits of Bab-el-Mandeb; but as such a condition of supply would long ere this have resulted in the conversion of the whole basin into a mass of solid rock-salt, it is inferred that an outward current flows into the Indian Ocean beneath the surface inward current.

The length of the Red Sea from the Straits to the head of the Gulf of Suez is about 1350 miles, and the extreme breadth in lat. 19° N. 205 miles. Towards its northern end it bifurcates into two narrow gulfs—those of Suez and Akabah (Ælanitic Gulf), between which rises the mountainous region of Sinai. The waters are clear and of a deep blue colour; and, as might be expected, are more saline than those of the ocean in the proportion of 4 to 3.5; the relative densities being 1.030 and 1.026 at a temperature of 60° Fahrenheit.

The waters of the Red Sea are crowded with living forms, and their high temperature (where not deep), combined with extreme purity, being

* Stanley, *Sinai and Palestine*, 5 (note).

† Rawlinson, *Ancient Monarchies*, i. 109. Sayce (*HCM* 255 ff.) maintains that *Yam Sûph* as used by Heb. writers means only the Gulf of Akabah, and that its application in Ex 15²² to the 'sea,' which the Israelites crossed on leaving Egypt, rests upon a mistake. This view, which the present writer is persuaded is entirely erroneous, was adopted by Sayce in order to support his theory that Mount Sinai lay amongst the Edomite mountains east of the Gulf of Akabah. See, further, art. SINAI.

favourable to polyp life, coral reefs abound, either lining the shores or rising as islands above the surface. The navigable channel from Suez to the Straits lies nearly in the centre of the basin, and in lat. 21° N., where the greatest depth is found, the bed descends to a depth of 1200 fathoms.

That the bed of the Red Sea is becoming shallower by the gradual rise of the land, admits of the clearest proof. Raised beaches containing shells and corals now living in the water are found at various levels up to many feet above the present surface; as, for example, along the cliffs of Nummulite limestone above Cairo and other parts of Lower Egypt, as well as along the shores of the Gulf of Suez and Akabah. The most remarkable of these beaches is that which is found at a level of 220 ft., and was first recognized by Oscar Fraas. Still more recently, and probably within the human and pre-historic period, the waters of the Red Sea stretched up the Isthmus of Suez into the great Bitter Lake, as the floor of the canal when being cut in 1867 laid open beds of rock-salt and strata, with recent shells and corals.* At the close of the Eocene period the whole surface of Egypt was under the waters of the ocean, and the Red Sea and Mediterranean waters were continuous. The fauna of the Red Sea and of the Mediterranean are now highly dissimilar: that of the former partaking of the character of the Indian Ocean; that of the latter, of the Atlantic. This process of differentiation has been naturally proceeding from the time when the two seas were disconnected by the uprising of the land in Miocene and Pliocene times, and the formation of the Isthmus of Suez.†

The biblical history of the Red Sea is chiefly connected with the Exodus (which see); but we have an interesting reference to it later in the time of Solomon and Hiram, king of Tyre, illustrating the essentially different habits of the Israelites and Phœnicians. These latter, from the time they settled on the coast of Syria, became a maritime nation, extending their trade and founding colonies all round the Mediterranean, while inland their extent of territory was extremely limited. The Israelites, on the other hand, were not a seafaring people; and consequently, when Solomon had extended his rule over Edom, and as far south as the Ælanitic Gulf, and was desirous of having a fleet, to navigate the waters of the Red Sea and to trade with Ophir for gold and other commodities; and when Elath (*Aila* of Strabo) and Ezion-geber were fortified, and the latter made a seaport town, his own subjects being ignorant of nautical affairs, he was obliged to have recourse to the assistance of Hiram, with whom he had preserved friendly relations. This appeal was not made in vain, and Hiram sent his servants, 'shipmen that had knowledge of the sea,' to man the fleet in the trade with Ophir (1 K 9²⁶, 27). After this event the Red Sea drops out of biblical history; Elath was for a time lost to the kingdom of Israel on the revolt of Edom against Joram (2 K 8³⁰), and, though regained by Azariah (14²²), it finally passed into the hands of the Syrians (*Kethibh*) or the Edomites (*Keré*) in the reign of Ahaz (16⁹). Some ruins on an island at the head of the gulf are supposed to mark the site of this once important seaport. E. HULL.

REDEEMER, REDEMPTION.—With two exceptions (AV in Ps 136²⁴ [קָרַן, lit. to break or tear away,

* The writer considers that this was the condition of the Isthmus at the time of the Exodus. Such a view, borne out by observation, renders the account of this event intelligible, but does not necessitate the inference that the waters of the Red Sea and the Mediterranean were at that time connected.

† For an account of the raised beaches of the Red Sea coast and of Lower Egypt, see Hull, 'On the Physical Geology of Arabia Petrea,' *PEF Mem.* 69 ff. (1886).

a common Aram. word for *rescue, deliver*, in Heb. also La 5⁸, RV 'delivered'; and AV and RV in Neh 5⁸ [קָנָה *to buy*, so RVM], 'redeem' is the tr. in OT of the Heb. קָנָה and נָאָל, with their derivatives. קָנָה (better, for distinction from נָאָל, rendered 'to ransom') is used of the money payments required under the Law for the redemption of the firstborn (so Nu 3⁴⁶⁻⁴⁸ 18^{15a}; cf. Ex 13^{13, 15}, Lv 27²⁷), or for the release of persons from slavery (so Ex 21⁸, Lv 25⁴⁷⁻⁴⁹); and נָאָל 'to redeem' (in a legal sense), of the recovery of property which had passed into other hands (so Lv 25²⁶, Itu 4^{4a}), or of commutation of a vow (Lv 27^{13, 16, 19, 20}) or a tithe (Lv 27³¹).

In the Prophets and the Psalms both קָנָה and נָאָל are used figuratively, with the general meaning 'deliver,' of the saving activity of God, as shown in the history of Israel (so Is 29²² [פָּדָה] 48²⁰ 52⁹, Ps 77¹⁵ [נָאָל] and in the experience of individual Israelites (Ps 34²² [פָּדָה]). Cremer (*Wörterb.* p. 596) finds, in the use of these words rather than others which might have been chosen, a suggestion of the property relation conceived to exist between J^h and Israel. Cf. Ps 74³ 'Remember thy congregation, which thou hast purchased of old, which thou hast redeemed (נָאָל) to be the tribe of thine inheritance'; so Dt 9²⁶, 2 S 7²³, 1 Ch 17²¹ (all [פָּדָה], Is 52³ [נָאָל]). [A similar idea appears in the NT *περιποιεῖσθαι* (Ac 20²⁸), *περιποίησις* (Eph 1¹⁴, 1 P 2⁹), and *ἀγοράζω* (1 Co 6²⁰ and often); but these words correspond in the LXX to קָנָה, נָאָל, and נָאָל, never to נָאָל or נָאָל. In the great majority of cases, however, the idea of a money payment falls altogether into the background, and the words are used in the purely general sense of 'save,' 'deliver.' To 'ransom' or 'redeem' means to deliver from any calamity or misfortune, however that deliverance may be brought about.

More specifically, redemption is thought of as deliverance from adversity (2 S 4⁸, 1 K 1²⁸, Ps 25²² [all [פָּדָה]], oppression and violence (Ps 72¹⁴ [נָאָל]), captivity (Zec 10⁸⁻¹⁰ [פָּדָה], Ps 107^{2, 3} [נָאָל]), or death (Ps 49¹⁵ [פָּדָה], 103⁴, Hos 13¹⁴ [both [נָאָל], Job 5²⁰ [פָּדָה]). It is specially associated with the deliverance from Egypt (Dt 7⁸ 13²⁴ 24¹⁸, Mic 6⁴ [all [פָּדָה]), and with the (idealized) deliverance from Babylon (Is 35⁹ 62¹² 63⁴ [all [נָאָל]). In a single instance only is it used of redemption from sin (Ps 130⁸ [פָּדָה]).

The noun 'redeemer' is the tr. in OT of the part. נָאָל (*gō'el*, properly one who asserts a claim or has the right of 'redemption,' esp. one who vindicates the right of a murdered man, i.e. the 'avenger of blood,' hence the next-of-kin, Nu 5⁸, Ru 2²⁰ *al.*, 1 K 16¹¹), and is applied in our VSS, in a figurative sense, to God only. It is a favourite term of Deutero-Isaiah, who often speaks of J^h as the *Gō'el* of Israel (so 41¹⁴ 43¹⁴ 44^{6, 24} 47⁴ 48¹⁷ 49^{7, 26} 54^{5, 8} 59²⁰ 60¹⁶ 63¹⁶), and magnifies the freeness and the greatness of His deliverance. Cf. Is 52³ 'Ye were sold for nought, and ye shall be redeemed without money'; Is 54⁸ 'For a small moment have I forsaken thee; but with great mercies will I gather thee. In overflowing wrath I hid my face from thee for a moment; but with everlasting kindness will I have mercy upon thee, saith J^h thy redeemer.' Outside of Isaiah, the term *gō'el* is not applied to God except in Ps 19¹⁴ 78²⁵, Job 19²⁵, Pr 23¹¹, Jer 50³⁴. In the last three cases it is used in the special sense of advocate or vindicator. J^h is here represented as doing for the oppressed what the human *gō'el* would do, if he were living. So in the familiar passage Job 19²⁵ 'I know that my redeemer liveth, the true rendering should be, 'I know that my vindicator liveth' (so RVM), i.e. the one who will see that I have justice after I am gone. See, further, art. GOEL, and A. B. Davidson's note on Job 19²⁵.

In NT the words for 'redeem' are ἀγοράζω and λυτροῦμαι, with their derivatives. The former

means lit. 'to buy,' 'to purchase,' by which terms it is uniformly rendered in RV (1 Co 6²⁰ 7²³, 2 P 2¹, Rev 5⁹ 14^{3, 4} [all]) and AV in all passages except Rev 5⁹ 14^{3, 4}. This is akin to the figurative use of קָנָה 'buy' or 'purchase,' in the OT, of the deliverance of Israel from bondage, Ex 15¹⁶, Is 11¹¹, Ps 74² (cf. 78²⁴), though קָנָה is not represented in the LXX of these passages by ἀγοράζω. In the compound form ἐξαγοράζω, 'to buy from or out of,' it acquires the technical meaning 'redeem,' and is so used twice by St. Paul (Gal 3¹³ 4⁵) of Christ's deliverance of those who were under the curse of the law. 'Christ redeemed us from the curse of the law, having become a curse for us. For it is written, Cursed is every one that hangeth on a tree.' Here Christ's shameful death on the cross is regarded as the ransom price paid for the deliverance of those who were held prisoners under the law and subject to its curse. Cf. Rev 5⁹, where the redeemed are said to be purchased unto God (not from God) with the blood of the Lamb.

The more common NT word is, however, λυτροῦμαι (from λύτρον, 'a ransom'), with its derivatives, λυτρωτής, λύτρωσις, ἀπολύτρωσις. These follow the usage of the OT נָאָל; and קָנָה, being sometimes used in the technical sense of 'ransom' (e.g. 1 P 1^{18, 19}), but more frequently in the purely general sense of 'deliver.' Thus λύτρωσις is used in Luke of the Messianic deliverance from misfortune and sorrow. So Lk 1⁶⁸ 2²⁸, cf. 24²¹. More particularly of the salvation to be wrought at the Parousia, Lk 21²⁸ (ἀπολύτρωσις, cf. Ro 8²³ the redemption of the body; Eph 1¹⁴ the redemption of God's own possession. In Eph 4³⁰ the phrase 'day of redemption' is used as a synonym for Parousia). In other passages which follow the thought of Ps 130⁸, the reference is clearly to redemption from sin. So in Eph 1⁷, Col 1¹⁴, redemption is associated with forgiveness. In Ro 3²⁴ it is connected with justification. In Tit 2¹⁴ Christ is said to have given Himself for us 'that he might redeem us from all iniquity, and purify unto himself a people for his own possession, zealous of good works.' In this narrower sense redemption is frequently connected with the death of Christ. Thus He 9¹⁵ speaks of 'a death having taken place for the redemption of the transgressions that were under the first covenant.' Cf. Eph 1⁷ 'redemption through his blood'; Ro 3^{24, 25} 'redemption . . . through faith in his blood,' and esp. 1 P 1^{18, 19} 'Knowing that ye were redeemed, not with corruptible things, as with silver or gold, from your vain manner of life handed down from your fathers; but with precious blood, as of a lamb without blemish and without spot, even the blood of Christ.' Here the technical meaning of λυτροῦμαι reappears. The blood of Christ is represented as the ransom price (λύτρον, cf. Mk 10⁴⁵) by which Christians are redeemed from their former sinful life. Observe that in 1 P 1^{18, 19}, as in Tit 2¹⁴ and He 9¹⁵, the thought is not primarily of deliverance from punishment, but of deliverance from sin. See, further, under RANSOM.

The term 'redeemer' (λυτρωτής) is found in NT only in Ac 7³⁵, where it is used of Moses (so RVM; AV and RV tr. 'deliverer'). In the LXX λυτρωτής stands for נָאָל in Ps 18 (19)¹⁴ 77 (78)³⁵ [all].

For a fuller discussion of the biblical idea of redemption, see SALVATION, SAVIOUR.

W. ADAMS BROWN.

REED.—There is as much uncertainty in regard to the signification of the Heb. words used to designate the various sorts of aquatic and marsh plants, grouped under the above general term, as there is about the English term itself. Two of these, *'āhū* and *šūph*, have already been discussed under FLAG. There remain the foll. four:—

1. אָגְמוֹן, *'agmōn*. This word seems to be derived from אָגַם *'agam*, the same as the Arab. *'ajam*, denoting 'a troubled or muddy pool' (Is 14²² אָגְמוֹן), such as reeds and rushes grow in, and thence a reed from such a pool (Jer 51³², RVm 'marshes, Heb. pools'). *'Agmōn* is tr^d in Job 41³ AV 'hook,' RV 'rope'; Job 41²⁰ AV 'caldron,' RV 'burning rushes'; Is 58⁵ 'bulrush,' RV 'rush.' The word is used metaphorically for the lowly, and tr^d 'rush' (Is 9¹⁴ 19¹⁵). The LXX κρικος = 'ring,' ἀσθαξ = 'coal,' μικρός = 'small,' τέλος = 'end,' give us no clue to the signification of *'agmōn*. Unfortunately, there is nothing in the etymology which is any more helpful. The expression 'bow down his head like a bulrush' (Is 58⁵) would exclude the true rushes, which are stiff, erect plants. There are several rush-like plants to which it would well apply, as the Twig Rush, *Cladium mariscus*, L.; *Cyperus longus*, L., and a number of the *Scirpi*, all of the order *Cyperaceæ*; the Common Reed, *Phragmites communis*, L., of the *Gramineæ*; the Flowering Rush, *Butomus umbellatus*, L., of the *Alismaceæ*; and the Bur Reed, *Sparganium ramosum*, Huds., of the *Typhaceæ*. The expression 'canst thou put an *'agmōn* (AV 'hook,' RV 'rope') into his nose?' (Job 41³) may be explained as referring to the ring which is passed through the nostrils of bulls to lead them. This is usually of iron. Sometimes it is of tough, twisted withes. It may be that it was sometimes made of rushes. But this also gives no light as to the particular kind. The tr^d 'rush' is admissible only if we take it in its widest and most general sense.

2. גֹּמֶה *gōmē*. The Heb. root signifies 'to swallow or imbibe.' *Gōmē* occurs in connexion with its marshy place of growth (Job 8¹¹, LXX τάπυρος, AV and RV 'rush,' RVm 'papyrus'). The ark in which Moses was placed was made of *gōmē* (Ex 2²). The LXX says only θίβις = 'wicker basket,' without mentioning the material of which it was made; AV and RV 'bulrushes,' RVm 'papyrus.' What were the 'vessels of *gōmē*'? (Is 18², AV 'bulrushes,' RV 'papyrus'). That boats for sea voyages were made of papyrus is improbable. But the passage does not require that. The allusion in the expression 'sea' is doubtless to the Nile, the greater branches of which, as well as the main stream, are called by the Arabs *bahr* = 'sea.' The Blue Nile is *el-bahr el-azrak*, and the White Nile *el-bahr el-abiad*, while the united stream is called *bahr en-Nil* far more frequently than *nahr* (river) *en-Nil*. This being understood, the vessels must be considered as boats or skiffs or canoes. The LXX seems to have another text, and gives ἐπιστολάς βιβλίας = 'letters on parchment.' We have profane testimony as to the use of papyrus, which is here generic for sedges, etc., for boats (Plin. *Nat. Hist.* xiii. 22; Theophrast. *Hist. Pl.* iv. 8), sails, mats, cloths, coverlets, and ropes. *Gōmē* is mentioned in one other passage along with *kāneh* (Is 35⁷, LXX ἔλος = 'a swamp,' AV and RV 'rushes'). If we adopt 'rush' as the generic expression to represent *'agmōn*, it would be better to take 'sedge' as an equivalent generic expression for *gōmē*. This will include the papyrus, *Cyperus Papyrus*, L., the *babir* or *bardi* of the Arabs; *C. alepcurioides*, Roth., a species growing to the height of a man or taller, in the marshes of Egypt and the Hāleh, and used in making mats, etc.; the Club Rush, or Bulrush, *Scirpus maritimus*, L.,

which grows as large as the last, and is used for similar purposes; *S. mucronatus*, L.; *S. lacustris*, L.; and *S. littoralis*, L.; and the Twig Rush, *Cladium mariscus*, L., which has been mentioned under *'agmōn*. The papyrus is the largest and finest of all. It grows from creeping root stocks, which produce tufts of sterile, linear leaves at the surface of the mud or water. The culms are 10 to 15 ft. high, and 2 to 3 in. thick at the base, which is enclosed in imbricated, brown sheaths. These are leafless, or end in a broad, lanceolate limb. The culm is triquetrous above, and ends in an umbel 8 to 15 in. broad, subtended by an involucre of numerous lanceolate leaves. The spikelets are only a third of an inch long, of a pale fawn colour. This noble sedge is the ornament of the Hāleh swamps, and the finest of the *Cyperaceæ* of Bible lands, perhaps of the whole world. It used to be common in Lower Egypt, but has now disappeared.

3. קָנֶה *kāneh*. This is undoubtedly the equivalent, neither more nor less general, of the Eng. 'reed.' Both are generic for all tall grasses, and more or less for grass-like plants. The word *kāna* in Arabic came to signify a spear, from the long reed which constitutes its handle. Such reeds grow in great profusion in the cane brakes of the Lower Euphrates and Upper Nile. Egypt and the Holy Land are pre-eminently lands of tall grasses and canes. Among the most notable of the *Gramineæ* of the Holy Land are *Arundo Donax*, L., called in Arabic *kaṣāb fārisi* = the Persian Reed. This noble grass often attains a height of 15 to 20 ft. Its silky panicle, swaying gracefully to and fro in the wind, may well have been the 'reed shaken by the wind' (Mt 11⁷). Immense brakes of this cane are found on the borders of the streams about the Dead Sea, in the Jordan Valley, Hāleh, and along the irrigation canals and rivers throughout the land. Another noble grass is *Saccharum Egyptiacum*, Willd., called in Arabic *ghazzār*. It resembles the Pampas Grass of the Argentina in the beauty of its silky panicles, which are often borne on stalks 10 to 15 ft. high. Others are *Panicum turgidum*, Forsk.; *Erianthus Ravenae*, L., the Woolly Beard Grass; *Ammophila aranaria*, L.; *Phragmites communis*, the true Reed, known in Arabic as *ghāb* and *būs*; *Eragrostis cynosuroides*, Rām. et Schultz, the famous *Halfā*, from which Wady Halfa in Nubia derives its name. This latter attains a height of 6 to 10 ft., and has a beautiful panicle. It forms dense brakes in marshy regions, from the latitude of Jaffa and *Ghōr es-Sāfeh* to Egypt and the Upper Nile.

Kāneh is tr^d by various words—(1) 'Reed' (e.g. 1 K 14¹⁵). The allusion to the 'bruised reed' (2 K 18²¹) shows a keen insight into the facts of nature. The grasses have hollow stems. A slight force is sufficient to crush them in, and then their elasticity and strength are gone. Yet even such, by God's help, may be saved from fracture (Is 42³, Mt 12²⁰). The reed is spoken of as growing in marshes (Job 40²¹). The 'wild beast of the reeds' (Ps 68³⁰ AVm and RV) is probably either the crocodile or (cf. Job 40²¹) the hippopotamus; in either case it is a symbolical designation of Egypt (cf. Ezk 29³, Ps 74¹⁴). See Driver, *Parallel Psalter*, p. 190, n. 7. The stronger kinds of reeds, such as *Arundo Donax*, L., were used for walking staffs (Ezk 29^{6, 7}, Is 36⁶). This sort was, and still is, used for measuring purposes (Ezk 40⁵ etc. [cf. Rev 11¹ 21^{15c}]). This one was 6 cubits and 6 palms long. The Gr. ἄλαμος was also a measure of 6½ cubits. (2) 'Stalk (of grain)' (Gn 41^{1, 2}). (3) 'Bone' (Job 31²), from the fact of this being a tube like the hollow stems of grasses. (4) 'Beam of a balance,' thence the balance itself (Is 40⁶), probably because the cross beams of

balances were sometimes made of reeds. (5) The 'branches of a lampstand,' probably because these were tubular (Ex 25³¹⁻³²). Possibly these tubes carried oil, as in the case of the seven pipes (מְנִיפָה) of the lampstand in Zechariah's vision (Zec 4²⁻¹²). (6) 'Cane' (Is 43²⁴), RVm 'calamus.' The fuller form is קֶנֶה קָנִי *kāneh kānī*, 'sweet cane' (Jer 6²⁰ RVm 'calamus'). (7) 'Calamus' (Ca 4¹⁴, Ezk 27¹⁹). The fuller form is קֶנֶה-בֹּסֶם *kāneh-bōsem* = 'sweet calamus' (Ex 30²³). Calamus is not indigenous in Syria and Palestine. This is noted in Jer 6²⁰, where it is said that it comes 'from a far country.' Pliny (*Not. Hist.* xii. 48) says, 'Scented calamus, also, which grows in Arabia, is common both in India and Syria, that which grows in the last country being superior to all the rest. At a distance of 150 stadia from the Mediterranean, between Mount Libanus and another mountain of no note (and not, as some have supposed, Anti-libanus), there is a valley of moderate size, situate in the vicinity of a lake, the marshy swamps of which are dried up every summer. At a distance of 30 stadia from this lake grow the sweet-scented calamus and the rush.' This indication of locality would probably refer to the Lake of Hennis, and the swamps of the Upper Orontes. But no modern botanist has detected *Acorus Calamus* there. Nor have we been able to identify 'scented calamus' with any of the reeds or rushes which grow there. The precision of Jeremiah's language seems to forbid the idea that he spoke of any indigenous plant.

4. אֶרֶב *ārōth* (Is 19⁷) is tr^d in AV 'paper reeds,' RV more properly 'meadows,' see art. MEADOW in vol. ii. p. 307 note †; LXX χλωρός. There is no authority for identifying this with the papyrus.

G. E. POST.

REED GRASS (Gn 41²⁻¹⁸).—RV for מִדְבָּר, AV 'meadow.' The same word is tr^d in Job 8¹¹ 'flag,' RVm 'reed grass.' See FLAG.

REELIAH.—See RAAMIAH.

REELIAS (A *Reelias*, B *Βορλίας* or *-elas*, AV Reelias), 1 Es 5⁸, corresponds in position to Bigvai in Ezr 2⁷, Neh 7⁷; but the form of the name is nearer to Reelaiah (A *Reelias*) in the same verse of Ezra, or Raamiah in that of Nehemiah.

REFINER, REFINING.—1. The verb פָּקַד in Qal is used in Job 28¹ of gold, and in 36²⁷ of rain (see Dillm. *ad loc.*); in Piel it is used in 1 Ch 28¹⁸ of gold, in 29⁴ (cf. Ps 12²) of silver; and in Pual of settled wine, Is 25⁶. 2. The most usual word for 'refine' is רָצַף. The only occurrence in AV of 'refiner' is Mal 3²⁻³ (רָצַף). רָצַף occurs both in a literal, Ps 66¹⁰, Jer 6²⁰, Zec 13⁹, and in a metaphorical sense, Ps 26², Is 1²⁵ 48¹⁰, Dn 11³⁵ (cf. Driver, *Par. Psalt.* 458 f.). 3. *καυρῶσαι* Rev 1¹⁸ 3¹⁸ (RV 'be refined'); cf. 1 P 1⁷, with Hort's note.

The ancient Egyptians, as described by Wilkinson, purified gold by putting it into earthen crucibles with lead, salt, a little tin, and barley bran, sealing the crucibles with clay, and then exposing them to the heat of a furnace for five days and nights. Refining silver by cupellation is a very old process. The silver mixed with lead is put into a crucible made of bone earth, and placed in a reverberatory furnace. As the oxide of lead forms, it is blown off by bellows, and towards the end of the process the thin covering of oxide becomes iridescent and soon disappears, and the pure bright surface of the silver flashes out. This process of refining silver is referred to in Jer 6²⁰. The reference in Mal 3 is to the purifying influence of affliction on the people of God; their sinful impurities gradually disappear, and at last the Divine image is reflected from the soul, as the face of the refiner from the surface of the purified silver.

W. CARSLAW.

REFRAIN.—The verb 'to refrain' is now used only intransitively, to abstain from. This use is found twice in AV, Ec 3⁵ 'A time to embrace, and a time to refrain from embracing'; and Ac 5³⁸ 'Refrain from these men.*' But the primitive meaning of 'refrain' is to curb or restrain (Old Fr. *refrener*, Lat. *refrenare*, from *re* back, and *frenum* a bridle, a curb), and this is the usual meaning of the word in AV. So Udall, *Erasmus Paraph.* i. 97, 'Jesus refreyned them, saying, Why be ye grieved with this woman?'; Ex 32¹⁴ Tind. 'And the Lorde refrayned him selfe from that evell, which he sayde he wolde do unto his people'; Ja 1²⁶ Wyc. 'If any man gessith hym self to be relegious and refreyneth not his tunge' (AV 'bridleth not'); Elyot, *Governour*, ii. 215, 'Injurie apparaunt and with powar inforced eyther may be with lyke powar resisted, or with wise dome eschued, or with entreatie refrained.'

J. HASTINGS.

REFUGE, CITIES OF (אָרֵי הַשָּׁן, or, more fully אָרֵי הַשָּׁן וְהַקָּלָה; LXX (al) πόλεις (τῶν) φυγαδευτηρίων, or the cities are said to be φυγαδευτήρια or εἰς φυγαδευτήριον; a fuller description (Jos 21²¹⁻²⁶) is ἡ πόλις τοῦ φυγαδευτηρίου (ἡ) τοῦ πορεύσαντος; Vulg. *civitates confugii, civitates (urbes) ad confugiendum, urbes fugitivorum (in fugitivorum auxilia or praesidia, ad fugitivorum subsidia).*—Names and location.—The names and location of these cities are given with great definiteness, and their distribution was such as would best accommodate the entire country. There were three on the west of the Jordan—Hebron in the mountains of Judah, Shechem in Mount Ephraim, Kedesh in Mount Naphtali; and three on the east of the river—Bezer in the plain belonging to Reuben, Ramoth in Gilead belonging to Gad, Golan in Bashan belonging to Manasseh (Jos 20⁷⁻⁸). See under each of these names. There is every reason to believe that the early Jewish tradition (Neubauer, *Géog. du Talmud*, p. 55), which placed these cities in pairs nearly opposite each other on the east and on the west of the Jordan, is correct, so that Bezer should be found near Dhiban, Ramoth in Gilead at Gerasan,—the modern Jernash with which it has been identified (*East of the Jordan*, pp. 284-290),—and Golan, not yet located with certainty, about due east from Kedesh. For greater convenience there seems to have been a provision (Dt 19⁸) that the principal roads to these cities should be kept open, and the inference is, although this is not stated, that they were likewise properly marked. The distance to be travelled could hardly have exceeded 30 miles at most, and was easily passed over in a day.

Origin and purpose.—In the state of society then existing, the appointment of such places of refuge was wise and wholly in the line of justice. If a man took the life of another, he himself must be slain by the nearest relative. No other law was known; justice could be satisfied in no other way. It was seen, however, that if this law were carried out hastily in every case, men might suffer death who were really innocent. Hence a trial must be had, and meantime asylums provided where alleged criminals would be safe until their case could be properly adjudged. The plan did not result, as might be supposed, in giving these places a bad character by filling them with murderers. On the contrary, these six cities were of the highest rank in every way: they were all Levitical cities—Shechem and Hebron being royal cities, and Hebron in addition a priestly city. Each city, according to the (ideal?) legislation of

* There is also a doubtful example in Sir 4²⁸ 'Refrain not to speak, when there is occasion to do good' (Gr. μὴ παύεσθαι λέγειν, RV 'Refrain not speech'); cf. Job 29⁹ 'Princes refrained talking.'

P, was to have a suburb of a little more than half a mile in extent in every direction, so that the refugees might not be absolutely confined within the city's walls (Nu 35⁹).

This privilege of asylum was evidently not designed for wilful murderers. A wilful murderer was to be put to death at once, and these cities were for those who had taken life unintentionally (לִּזְמָן Dt 4², Jos 20^{3, 5} [D²], חֲטָאִים Nu 35^{11, 15}, Jos 20^{3, 9} [all P]). That there was to be a strict trial (Nu 35^{12, 24}) is sufficient proof that some persons who had committed wilful murder availed themselves of this possible chance of escaping with their lives (Nu 35¹²). The trial took place where the accused had lived or was well known, and not necessarily in the place where he had sought refuge; and this is shown by the fact that, if proved innocent of wilful murder, the authorities were to see him safely back to the city of refuge after the trial was over. The law of murder and of unintentional killing is fully stated in Nu 35¹⁶⁻²⁸. After being taken back to the city of refuge to which he had fled at first, the offender was bound to remain there until the death of the then reigning 'high priest' (an expression which is taken by many to imply that the passage in its present form reflects the usage or the theory of a late age in Israel's history), after which he was free to return to his own home. During that period, however, if accidentally or otherwise he passed beyond the suburb limits of the city of refuge, the avenger of blood might slay him. No payment of money was ever allowed to interfere with the strict fulfilment of this penalty (Nu 35²²). Besides these regularly appointed cities of refuge, the temple at Jerusalem, or possibly the altar (see ALTAR) alone, enjoyed a similar prerogative, as is shown by the cases of Adonijah and Joab (1 K 1⁵⁰ 11²; cf. Ex 21^{12a}). As a ground of their action, we must presuppose a well-understood custom or sentiment, which gave to the altar the right of asylum in cases of life and death.*

It is a curious fact that in the later history of the Hebrews very little is said to show how generally homicides availed themselves of the refuge thus afforded. It may have been such a matter of course that nothing was ever said about it. The provision so carefully made by the Hebrews to shield those who had committed no intentional wrong had its counterpart among the Greeks and Romans, and may be looked upon as one of the most humane features of ancient civilization, where, in the general administration of affairs, cruelty and injustice, as we regard them, were frequently conspicuous. See, further, art. GOEL.

S. MERRILL.

REFUSE.—The verb 'to refuse' frequently has in AV its earlier meaning of 'reject,' especially as unfit for use, which is still retained in the subst. 'refuse.' Thus Ps 118²² 'The stone which the builders refused (RV 'rejected'†), is become the head stone of the corner'; Is 8⁶ 'Forasmuch as this people refuseth the waters of Shiloah that go softly.' So Knox, *Works*, iii. 210, 'He that refuseth not himself, and takis not up his croce, and followis

me, is not worthie of me'; p. 317, 'Peter was permitted once to sincke, and thryse most shamefully to refuse and denye his Maister'; Tindale, *Pent. Prologue to Exodus*, 'an abjecte and a castawaye, a despised and a refused person'; *Expos.* 101, 'None of them, that refuseth not all that he possesseth, can be my disciple'; Mt 24⁴⁰ Tind. 'Then two shalbe in the felde, the one shalbe received, and the other shalbe refused.'

The origin of the word is difficult to trace. Trench (*English Past and Present*, 306) says unreservedly, 'To refuse is *recusare*, while yet it has derived the *f* of its second syllable from *refutare*; it is a medley of the two'; and perhaps he is right.

J. HASTINGS.

REGEM (רֶגֶם; B 'Pάγεμ, A 'Pέγεμ).—The eponym of a Calebite family, 1 Ch 27⁷.

REGEM-MELECH (רֶגֶם מֶלֶךְ; B 'Αρβεσεέρ [A 'Αρβεσεέρ, ῥε. * 'Αρβεσερ, Q 'Αρβεσερ] ὁ βασιλεύς).—One of a deputation sent to consult the priests about the propriety of continuing to observe the fast of the fifth month in commemoration of the destruction of the temple by the Chaldeans, Zec 7². The text of this passage is dubious, especially as concerns the words *Bethel* (AV 'house of God') and *SHAREZER* (which see).

REGENERATION.—In the NT this subject is uniformly regarded in its concrete or experimental aspect: hence the abstract idea hardly occurs. Where it does, the term *παλιγγενεσία* (so Tisch. WH, *παλιγγ.* TR) alone is employed. This word is not found in LXX, but it has a history in Classical and Hellenistic Greek, being used mainly in the figurative sense of complete *renovation* (*ἀνακαίνωσις*, cf. Ro 12², Tit 3⁵). It is this idea of restoration to pristine state that meets us in the nearest equivalent to the term found in LXX, *ὑπομενῶ εἰς πάλιν γίνεσθαι*, Job 14¹⁴. But in pre-Christian usage it is not the individual so much as the world, or a nation, that is generally the subject of the entire change of condition denoted by *παλιγγενεσία*. Thus Basil (*Hom.* iii. in *Hexæm.*) says that the Stoics ἀπείρους φθορὰς κόσμον κ. *παλιγγενεσίας* εἰσάγειν (cf. Philo, *de Incorr. mundi*, 3. 14. 17; *de Mundo*, 15), what M. Aurel. (xi. 1) calls ἡ περιοδικὴ π. τῶν ὄλων. Similarly, Philo calls Noah and his sons, *παλιγγ.* ἡγεμόνες κ. δευτέρως ἀρχηγέται περιόδου (*Vit. Moys.* ii. 12; cf. 1 *Clem.* ix. 4). National restoration is a sense found in Jos. (*Ant.* xi. iii. 9, ἡ ἀνάκησις κ. *παλιγγ.* τῆς πατρίδος); and this, in the fuller sense of the Messianic renewal of Palestine (and of the whole world, or dependent thereon, ἀποκατάστασις πάντων), seems to reappear in Mt 19²⁸, one of the two NT occurrences of *παλιγγ.* (cf. Dalm. 145). Even in Classical usage, however, the term does sometimes refer to the lot of the individual, denoting restoration to life in a literal or a figurative sense. Plutarch uses it several times in the former sense, i.e. in relation to the transmigration of souls (*de Esu carn.* ii. 4. 4, ὅτι χρώνται κοινοῖς αἱ ψυχὰι σώμασιν ἐν ταῖς *παλιγγενεσίαις*); and Agrippa is quoted by Philo (*Leg. ad Gaium*, 41) as addressing the emperor Gaius as follows: τὸν . . . τεθνεῶτα τῷ δέει ζωπυρῆσας καθάπερ ἐκ *παλιγγενεσίας* ἀνέγειρας. In more figurative wise Cicero (*ad Att.* vi. 6) calls his restoration to his lost life of dignity and honour *hanc παλιγγ. nostram*; and Olympiodorus, speaking of memory, says, *παλιγγ. τῆς γνώσεως ἐστὶν ἡ ἀνάμνησις*. Hence, on the whole, *παλιγγ.* in non-biblical usage seems to denote a restoration of a lost state of well-being, amounting to re-creation or renovation.

If we could be surer of the Rabbinic use (esp. in relation to proselytes) of such an idea in the

* As to the relation of Dt 4¹⁵ to 19¹⁷, and on the whole subject, see Driver, *Deut.* 233.

† The Gr. of the Sept. is ἀποδοκιμασας, the Lat. of the Vulg. *reprobaverunt*; Wyc. translates 'reproved', Cov. and Gen. 'refused', Douay 'rejected', Bish. 'refused.' The passage is quoted in Mt 21⁴², Mk 12¹⁰, Lk 20¹⁷ where the Gr. is always ἀποδοκιμασας, and the Vulg. *reprobaverunt*; Wyc. has 'reproved' in Mt and Lk, but 'displeased' in Mk; Tind. has always 'refused' or 'did refuse,' Rhem. and AV 'rejected.' The passage is also quoted in Ac 4¹¹ and 1 P 2⁴, but with less verbal exactness. Thus Ac 4¹¹ Gr. ἰσακησθησας, Vulg. *qui reprobatus est*, Wyc. 'which was reprov'd,' Tind. 'cast a syde,' Rhem. 'rejected,' Bish. 'set nought,' AV and RV 'set at nought'; 1 P 2⁴ Gr. ἀποδοκιμασμενοι, Vulg. *reprobatum*, Wyc. 'reproved,' Tind. 'disallowed' (so Cov., Cran., Gen., Bish., AV), Rhem. 'reprobated,' RV 'rejected.'

time of Christ, we should probably get further light on the exact connotation of *παλιγγ.* and kindred expressions as they emerge in the NT. Among the latter the following are prominent: *ἀνακαίνωσις* (Ro 12^a, and esp. Tit 3^a), with the verb *ἀνακαίνωσθαι* (Col 3¹⁰, 2 Co 4¹⁰), and its synonym *ἀναγενοῦσθαι* (Eph 4²²); *ἀναγεννᾶν* (1 P 1^{3,23}) [which does not occur elsewhere in extant Greek literature uninfluenced by the NT itself, though the Philonian tract, *de Incorr. mundi*, 3, has *ἀναγέννησις* as a synonym for the Stoic *παλιγγενεσία* of the world, and Porphyry has *ἀναγεννητικός* (*Ep. ad Aneb.* 24)]; *γεννηθῆναι ἀνωθεν* (Jn 3^{3,7}, cf. *γενν. γέρων ὢν* or *δεύτερον*, v.⁴); *καὶνὴ κτίσις* in the concrete sense (2 Co 5¹⁷, Gal 6¹⁵, Eph 2¹⁰ 4²⁴), and its practical equivalents, *καὶνὸς ἄνθρωπος* (Eph 2¹⁰ 4²⁴), *νέος ἄνθρ.* (Col 3¹⁰); *τέκνα θεοῦ γενέσθαι* (Jn 1¹²), *γεννηθῆναι ἐκ τ. θεοῦ* (*Jn passim*), *ἐκ τ. πνεύματος*, or *ἐξ ὕδατος κ. πνεύματος* (Jn 3^{5,6,8}); and, finally, *γεννᾶν* (*τινα*) *διὰ τοῦ εὐαγγ.*, used of the preacher of the Word (1 Co 4¹⁵, cf. Gal 4¹⁹). A single passage from an early Christian Father may be subjoined, as showing the influence of the NT upon his language, and also the relation of the biblical idea of Regeneration to certain other cognate ideas. Clement of Alex., speaking of the restoration of a sinful woman, writes (*Strom.* ii. *ad fin.* p. 424): *ἡ δὲ μετανόησας, ὅσον ἀναγεννηθεῖσα κατὰ τὴν ἐπιστροφὴν τοῦ βίου, παλιγγενεσίαν ἔχει ζωῆς, τεθνηκυῖα μὲν τῆς πόρνης τῆς παλαίας, εἰς βίον δὲ παρελθοῦσας αἰθῆς τῆς κατὰ τὴν μετάνοιαν γεννηθείσης.* It has sometimes been thought that the idea of religious regeneration in this life was one 'in the air' in the 1st cent.; and the phrase in *æternum renatus taurobolio*, in connexion with Mithraic worship, has been cited as evidence. But Hort thinks it, as well as the *παλιγγενεσία* of the Hermetic writings, to be dependent on Christian usage. Nor can the fact that Osiris was addressed as one who 'giveth birth unto men and women a second time,' be cited to the contrary: for this clearly refers to renewed life beyond the grave, not to spiritual regeneration in this life. The origin of this latter notion and phraseology is rather to be sought in the OT and its Rabbinic developments. The phrase 'new creation,' adopted by St. Paul, occurs repeatedly in the Midrashim with various applications (see Dalm. *Worte Jesu*, 146), and a proselyte is compared to a newborn child in the Talmud (Jebamoth 62a; see Wünsche, *Erläut. der Evangg.* 506); cf. Hort, *First Ep. of Peter*, p. 33. The present article will deal with the following points:—

* Regeneration characteristic of the NT.

A. Old Test. Adumbrations.

- i. In (a) national, (b) personal religion.
- ii. In the case of Proselytes.

B. New Test. Presentation.

- i. In the Synoptics.
- ii. In St. James.
- iii. In St. Peter (relation to Baptism).
- iv. In Epistle to Hebrews.
- v. In St. Paul.
- vi. In St. John.

C. Connected Summary.
Literature.

The idea of Regeneration belongs to the NT rather than the OT. Indeed, some would confine it, in any proper personal sense, to the former exclusively. But this would be to confuse the implicit and explicit forms of the doctrine and experience, and to break the genuine continuity of biblical religion. This continuity, along with progressive development of form, it must be our care to trace between OT and NT, as well as between the several types of presentation in the NT itself.

A. OLD TEST. ADUMBRATIONS.—i. OT religion being originally a matter of the nation rather than the individual, all the forms under which

it was conceived were highly objective. Things to be done or avoided are prominent; and all as tending to avoid rupture of the normal relation or covenant between the people and J'. At first little stress is laid on the state of the inner life, on ethical as contrasted with ritual purity. But when, under the influence of the prophets of the 8th cent. and later, the ethical element in religion came fully to light, the old idea of religion, as a dutiful relation between man and God, became charged with new spiritual meaning, and afforded the deepest and most adequate notion of piety imaginable. For it went below the level of mere deeds, to the attitude of soul of which they were as the fruit.

(a) The stages in the process may be traced as follows. As the older notion of salvation or well-being had been largely that of external national prosperity, taken as the expression of the favour of J'; so the chief means of its purification and deepening was national adversity. This turned attention, first to the moral conditions of the favour of the Holy One of Israel, and then to the intrinsic blessedness of righteousness itself, apart even from its normal external concomitants of peace and prosperity. At the same time, the break-up of national welfare caused the individual to attain to a new consciousness of his personal relations to J', and so to a more spiritual piety. These changes, as they affected both Israel and the individual Israelite, reached their crisis in the experiences of the Exile. During and after it the spiritual harvest, the first-fruits of which are to be seen even in the pre-exilic prophets, was gathered in by the sifted Church-nation. Chief among the new ideas acquired were (1) the thought of sin as a besetting power, ever apt to mar the normal relations between J' and His people; (2) the idea that a profound change of temper or attitude in Israel as a whole was needful; (3) the conviction that an evil so inherent as the stiff-neckedness and uncircumcision of heart discovered in Israel could be met only by Divine and supernatural agency, working upon the very springs of conduct (cf. Dt 10¹⁶ 30⁶). In fact, the vision of a renovation of feeling and will as needful to Israel, of national regeneration as the pre-requisite and the essential blessing of the longed-for Messianic age, began to possess the better minds following in the wake of Jeremias and Ezekiel. Yet even in those great prophets the bestowal of the regenerate heart is thought of largely as a special intervention to meet an exceptional need, as it were at a stroke; and its primary reference is collective rather than personal. Ephraim is overheard acknowledging the effect of the Divine discipline as salutary, and adding, 'Turn thou me, and I will turn' (Jer 31¹⁸); and then the prophet looks forward to the bright day of national restoration, when the covenant shall become 'a new covenant,' as being divinely inscribed on the heart or inner life of the people (31³¹). Then 'they shall be my people, and I will be their God: and I will give them one heart and one way, that they may fear me for ever' (32³⁸, 24⁷). Similarly Ezekiel: 'And I will sprinkle clean water upon you, and ye shall be clean: from all your filthiness and from all your idols will I cleanse you. A new heart also will I give you, and a new spirit will I put within you: and I will take away the stony heart out of your flesh, and I will give you an heart of flesh. And I will put my spirit within you, and cause you to walk in my statutes' (36²⁵⁻²⁷ 11¹⁹). Here we get, as never before, the idea of a new responsiveness of heart divinely produced—the essence of regeneration. But the regeneration is still viewed as national rather than individual (cf. the prophecy of the Valley of Dry

Bones, Ezk 37¹⁻¹⁴), though the effects on the individuals composing the nation are often clearly present to mind (Jer 31³⁴, Is 54¹³ 60²¹). And, above all, it is felt to be still future (contrast Ezk 18³¹), a blessing of the Messianic age.

(b) But while this is true of OT religion as a whole, even after the Exile, there are traces of individual piety going far beyond it, and virtually anticipating the NT experience of regeneration. Transferring the idea of religion, as a dutiful relation between Israel and its God, from the nation to the individual conscience, this deeper piety gave the holiness loved of Jⁿ a most vital meaning. It saw in 'walking humbly with one's God,' the inmost secret of 'doing justly and loving mercy.' All sprang from the 'contrite and humble spirit' indwelt of the Holy One of Israel (Is 57¹⁵ 66²). 'The sacrifices of God are a broken spirit,' a spirit broken by the sense that it was 'truth in the inward parts' that could alone satisfy the Holy One (Ps 51¹⁷⁻⁶). And along with this begins to appear the sense of a nature radically prone to sin, and so in need of more radical aid from the Searcher of hearts before covenant obedience could become possible (Ps 51⁸, Job 14⁴ 'Who can bring a clean thing out of an unclean? Not one'). There arises a cry for the 'mercy' and 'loving-kindness' of God, to draw the heart to Himself, and so create the very state of spirit with which He could commune. 'A clean heart,' 'a right' (steadfast) or 'free (willing) spirit'—on which turned 'the joy of thy salvation'—are all traced to the presence of God's 'holy Spirit' at work on the soul (Ps 51¹¹⁻¹⁰⁻¹²). Here we have the high-water mark of piety on OT lines, or rather piety under OT forms, but already outgrowing its limits. For with the emergence of the ideas of religion as primarily a state of the heart, of the radical tendency to sin native to frail human nature, and of the grace of God, in renewing and quickening power, as alone adequate to man's need,—with this the old national religion is transcended, and a new covenant becomes indispensable. Here, then, the experience, not to say the doctrine, of regeneration is already virtually present: it lacks only the objective basis furnished by the revelation in Christ, to give it that steady and assured quality which is the prerogative of NT 'faith.'

ii. As Israel's slowness to realize the idea of regeneration was in part due to its overshadowing sense of a specially favoured relation to Jⁿ attaching to Abraham's seed, as such; so we may suppose that the accession to exilic and post-exilic Israel of a growing number of those who had no such natural advantage, must have stimulated reflexion on the subjective conditions of fitness for communion with Jⁿ. It may be true that the sense in which *proselytes* were first spoken of as 'born' to or in Messianic Zion (Is 49²¹, 44⁵, Ps 87⁵) was mainly that of formal adhesion to the sacred people. Yet the patent greatness of the change of belief and conduct involved in the adhesion, must have tended to develop thought upon the spiritual and ethical senses in which a man might become a 'new' man, as it were by birth out of one world into another. Such reflexion would further be fostered by the rites through which the change of condition was achieved, particularly the ablation or baptism by which proselytes were admitted to Israel. And all this would easily coalesce in devout minds with the promise in Ezk 36²⁵ touching the sprinkling of Israel itself with clean water, and the new heart associated therewith, as marking the piety of the great age that was to come. When, then, John the Baptist appeared, to usher in the fulfilment of Mal 3¹⁷, there must have been a widespread feeling that his baptism meant a radical change of heart even

in Israel (cf. Jn 1²⁵). Still, the Diviner side of Ezekiel's prophecy, the baptism with the Holy Spirit, waited upon the coming of the Mightier One, Messiah Himself (Mt 3¹, Lk 3¹⁶, Jn 1³³ 3²⁵). And it was the deeper experience of the Holy Spirit, in specifically Christian form, that brought regeneration to light as implicit in the contrite heart and spirit, and placed it, the Divine side of the fact of true repentance, in the centre of NT teaching (cf. Jn 3⁵).

B. NEW TEST. PRESENTATION.—i. *The Synopses*.—In Jesus' own public teaching the idea appears only in implicit forms, chiefly that of a radical repentance or change of heart (*μετάνοια*) towards God and towards sin—the great condition, in the prophets also, of restoration to Divine fellowship. But in that teaching there are also hints that the change is more complete than anything hitherto realized, in keeping with the advance in the revelation conditioning it. Man must choose between two lives, a lower and a higher: to find or save the one, he must be ready to lose the other. And it is implied in the parable of the Prodigal Son that the spiritual life of sonship is in fact 'dead' or null (Lk 15²⁴) in every child estranged by sin and selfhood. It is needful that even honest disciples 'turn and become as little children' in order truly to enter the Kingdom, in which it is the crown of blessedness to be genuine children of the heavenly Father (Mt 18⁵ 5⁴⁵). The parable of the Sower implies that the specific life of the Kingdom arises in the human heart by the sinking in of the gospel, and its producing, as it were, a new root of personality; and it is intimated, though only in private to chosen disciples, that true 'faith' is dependent on a Divine factor at work behind the human (Mt 16¹⁷). This latter case suggests that the merely implicit form in which the profound truth of regeneration occurs in Christ's ordinary preaching is due, partly at least, to its popular character, as adjusted to the needs of the poor and simple, in contrast to theologians like Nicodemus.

ii. *St. James*.—The exact sense of the words (1¹⁸), 'of set purpose he brought us forth by the word of truth, that we should be first-fruits, as it were, of his creatures' (*βουλῆθε ἐκτελέσεν ἡμᾶς λόγῳ ἀληθείας, εἰς τὸ εἶναι ἡμᾶς ἀπαρχὴν τινα τῶν αὐτοῦ κτισμάτων*), has been much debated. St. James is addressing the Israel of God, conceived much in the way in which an ancient prophet thought of the true Israel within Israel. He thinks of all 'Israelites indeed,' though he has in mind chiefly those who already believe in Jesus as Messiah (cf. Jn 1⁴⁷ 3²¹); for both alike have in principle one religion, that of 'doers of the word' (the revealed will of God), of such as visit the fatherless and widows, and keep unspotted from the world (1²²⁻²⁷). To his eye, then, this people of loving obedience is what Israel's God had meant Israel to be (Is 43²⁰). 'My people, my chosen, the people which I formed for myself (LXX, *ὃν περιποιήσαμην*), that they might set forth my praise.' So, of those who fear Jⁿ and regard His name it is said (Mal 3¹⁷), 'And they shall be to me . . . in the day which I make, for a special possession' (*ἐσονται μοι . . . εἰς περιποίησιν*). This is very much the idea on which St. Peter dwells so lovingly, of 'a people for God's own possession,' quickened into new life through the word of the living God (1 P 1² 2⁹)—though he has professed Christians alone in view. Like ideas occur also in Eph 1¹⁰⁻¹⁴, but decisively universalized as to the scope of 'God's own possession' (cf. 2 Th 2¹³, esp. if we read *ἀπαρχὴν* instead of *ἀπ' ἀρχῆς*, with BFG⁸⁷ P minn. f. vg. syr. hl., al.); while the notion of God's saints being first-fruits, as it were, of His full and final possession of His creatures in general, appears quite explicitly

in Ro 8¹⁹⁻²². There creation is represented as awaiting 'the revealing of the sons of God' ('the Regeneration,' in the collective sense of Mt 19²⁸), who, as already having 'the first-fruits of the Spirit,' may themselves be styled God's first-fruits (cf. Rev 14¹ 21⁵). Thus spiritual Israel, now in process of rallying to Messiah Jesus, seemed to St. James 'the first-fruits' of God's final reign. As for 'the word of truth' to which this Israel owed its being, it was the revealed will of God active in conscience (= 'the inbred word,' 1²¹, or simply 'the word,' 1²² = God's 'law,' known as spirit and not as letter, 'perfect law, that of liberty,' 'royal law,' 1²⁵ 2⁹⁻¹² 4¹¹ = 'the truth,' in an ethico-religious sense, 3¹⁴ 5¹⁹, cf. Jn 8³¹ 17¹⁷). It was the sort of 'word' that meets us in the Sermon on the Mount, the final practical issue of OT revelation for the conscience (cf. 'the word of truth' in Ps 119⁴³; also v. 100 'the sum of thy word is truth'). Yet it is not to be confined to the specifically Christian gospel: it denotes, rather, the element common to that and the law as it lived in the unsophisticated consciences of Jews like those who meet us in Lk 1-2.

St. James has in mind, then, not individual regeneration, but rather the collective being of a People devoted to the Divine Will, and of which believers on Jesus Messiah were the typical members—a People which thus could be styled 'first-fruits, as it were, of God's creatures.'* His argument is that God cannot stultify Himself by tempting to evil. He is the author of good, and changeth not. And since it was with full intention that He brought forth† or constituted the godly community gathering to the name of Jesus Messiah, He must not be thought of as the author of seductive temptations. The emphasis still falls, as in pre-Christian references to regeneration, on the collective quickening traceable to the Divine initiative, rather than on the individual—though this latter is implied in the exhortation to 'receive the inborn word' (ἐμφυτον λόγον, cf. Wis 12¹⁰ ἐμφυτος ἡ καρδιά αὐτῶν),‡ which is able to save your souls.¶ Accordingly, such rudiments of our doctrine as occur in James, represent a stage midway between typical OT and typical NT statements on the subject.

iii. *St. Peter.*—The Petrine doctrine stands between that of St. James on the one hand, and that of St. Paul on the other. The OT associations of collective blessing (cf. his reference to 'seasons of recovery' or 'restoration,' ἀνάψυξις, ἀποκατάστασις, in Ac 3¹⁹, 21, 26) are still prominent in the language chosen (1 P 2⁹); while yet the idea of 'regeneration,' and that of individuals, by the Divine 'seed' or 'word of God,' is firmly grasped (1³ cf. 3, cf. parable of the Sower). The disciple seems possessed by his Master's teaching as to the child-spirit and the Divine fatherhood (2² 1¹⁷). The Divine parentage involved in the new life is appealed to as a reason for love of the brethren (1²²): being regarded as a congenital law of their new being—an idea which recurs in 2 P 1⁴, where renewed human nature is set forth as 'in a true sense not God-like merely, but derivatively Divine' (Hort, cf. 1 Jn 3⁹).

'The word' by which this comes about is clearly that of the gospel (1 P 1²⁰); and, answering to this,

the definite act of confession in baptism is thought of as objectively sealing the salvation thus wrought (see BAPTISM in vol. i. p. 244*). Water, says he, doth now, in antitype to Noah's preservation, play its part in salvation, as Christian baptism—'not the putting away of the filth of the flesh, but the appeal toward God of a good conscience, through the resurrection of Jesus Christ,' man's surety at God's right hand (1 P 3²¹). The sense of this passage, and particularly the meaning here given to the word *ἐπερώτημα*, seems fixed by Ro 10⁹, He 10²². 'For with the heart man trustfully believeth unto (the attaining of) Righteousness (i.e. Justification = Salvation in God's sight, *implicit*); but with the mouth man maketh confession unto (the attaining of) Salvation' (i.e. formal possession of salvation, *explicit*). 'Salvation,' in this context (Ro 10⁹), refers to objective membership of the Messianic Community or Church, the proper unit or subject of the New Covenant. Into this Body of the Christ, St. Paul says elsewhere (1 Co 12¹³), Christians are through baptism incorporated 'by one Spirit.' 'The Spirit of adoption, whereby we cry, Abba, Father,' seals, often by objective manifestations, the sincerity of the believer's confession. Similarly He 10²², 'Let us draw near (as favoured worshippers) with a true heart, in full assurance of faith, having our hearts sprinkled (by blood, 9^{13c}) from an evil conscience, and the body washed with pure water.' Thus every obscure element in 1 P 3^{18, 21} is elucidated. Christ, though 'put to death in (the sphere of) flesh,' was 'quickened in (the sphere of) spirit'—and so became for others 'a quickening spirit' (πνεῦμα ζωοποιούν, 1 Co 15⁴⁵). Baptism, then, as the consummation of the believer's appropriation of Christ, means no mere bodily cleansing (like Levitical ablutions), but the appeal of a cleansed conscience (see 1² with 3¹⁸; cf. He 9^{13c}), directed in 'full assurance of faith' to God (cf. Eph 3¹² *προσάγωγὴν ἐν πεποιθήσει*). It corresponds to the 'living hope' due to Christ's resurrection, spoken of in 1³ (cf. Col 2¹²). 'The promise of the eternal inheritance' (He 9¹⁵), for which worshipful appeal is made to God's covenant fidelity in the Mediator, was conceived to be received 'in earnest' in the manifestation of Holy Spirit power (Ac 2³⁸)—'anointing' or 'sealing' the believer unto the day of perfected redemption (2 Co 1²¹, Eph 1^{13c} 4³⁰). Thus 'baptism,' as a living experience, could be alluded to in Tit 3⁵ as a formal 'washing of regeneration and renovation (in virtue) of Holy Spirit,' 'poured forth richly' at the solemn crisis of confession, where 'Salvation,' as an objective state, took full effect (ἐσώσεν ἡμᾶς διὰ λουτροῦ παλιγγενεσίας καὶ ἀνακαινώσεως πν. ἁγίου). Baptism was a rite for the Church or sacred community as such, and for the individual in relation to it and its privileges; 'by the washing of water' were its members, as 'cleansed' 'by means of the word' (cf. Jn 15³), formally admitted to the sphere of consecrated life resting on Christ's sacrifice (Eph 5²⁶, Ro 10¹⁰).

St. Peter seems also, by the time he wrote 1 P, to have caught in his own way St. Paul's deep, mystical thought in Ro 6⁴, where identity with Christ's 'resurrection' life, on the part of the regenerate, is made to grow out of spiritual union with Him in His death to sin (consummated in His crucifixion, see 1 P 2²⁴). For 1 P 4^{1, 2, 6} contains the essential idea of spiritual quickening through judgment in the flesh. And this process is extended by him, alone among NT writers, even to certain souls in Hades, namely, those suddenly cut off in the days of Noah—a fate conceived (as it seems) to have given them less than the normal probation of mankind, and that in an age of but dim light (1 P 3^{19c} 4⁶; see, further, art. PETER, FIRST EPISTLE OF, in vol. iii. p. 795).

* Jer 2³ 'Israel (is) holiness unto the Lord, the first-fruits of his increase'—ἀρχὴ γονιμάτων αὐτοῦ, which parallels ἀπαρχὴν τῶν αὐτοῦ πτερυμάτων: and for the personal sense of πτερυμάτα, cf. Sir 36^{19c}, where ἡ λαὸς σου is described in the next line as τὰ πτερυμάτα σου.

† The idea occurs elsewhere, e.g. Sir 36¹⁷ (derived from Dt 32¹⁸, Ex 42²) 'Israel ἐν προτερήνῳ αὐτοῦ ὡς πατήρ.' In Ja 1¹⁸ the verb ἀπεικρίσθαι is used to mark an antithesis to the thought of 1¹⁵, where this metaphor was employed of sin as parent of death.

‡ Cf. Barn. i. 2, αὐτὸς ἐμυζεν τὴν δαριῶν πνευματικὴν χάριν ὡς φάρμακον, and ix. 9, οἶδεν ὅτι ἐμυζεν δαριῶν τὴν διαθήκην αὐτοῦ θύματα ἐν ἡμῖν.

iv. *The Epistle to the Hebrews.*—Though this Epistle contains, as we saw, much bearing on the new consciousness, yet it has no formal doctrine of 'regeneration' as the deepest aspect of the Messianic blessing. True, it uses metaphors of life developing from infancy to maturity (5¹²⁻¹⁴, with its allusions to 'milk' and 'solid food'); but there is no stress on the image involved. The categories of thought are mainly of an OT character—apart from the writer's own 'Alexandrine' strain (see below, *C, ad fin.*; cf. 'those once illumined,' 'having tasted God's word as good,' 6⁴). Hence we get a parallel to Ja 1¹⁸ in the 'congregation of the firstborn (who are) enrolled in heaven.' Hence also the central place of repentance, as marking the beginning of the new relation to God—'repentance,' as the negative side of the change represented on its positive side by 'faith' (6¹⁻⁶). 'Repentance,' however, is taken by this writer in a deep and inward sense, in which it amounts to a 'new heart' wherein the Divine Law is by Divine grace made inherent, according to Jeremiah's great prophecy of the New Covenant (9^{6ff.} 10¹⁶⁻¹⁸).

v. *St. Paul.*—The Pauline doctrine of Regeneration contains the essence of its author's unique experience of Jesus the Christ, as effecting at once revolution and renovation in his inner life. The difficulty here is to prevent this central aspect of Paulinism from involving us in an exposition of that system as a whole. We shall try, however, to indicate its place in the organism of St. Paul's soteriology as allusively as possible.

Beyond all question, 'faith' was to him the very soil or subjective condition of that new good which came through the gospel. Faith was such receptivity as enabled God to give 'his ineffable gift' to the soul. As such, it answers to 'the good ground,' the 'honest and good heart,' as the state of soul adapted to 'the word of God,' in Christ's parable. But St. Paul, viewing things in a more subjective way, proceeds to illumine the inner factors and stages of the great process from the standpoint of personal appropriation, as one who was himself the conscious soil in which it had come about. The good of which such 'faith' or vital trust is receptive in Christ, is variously set forth by St. Paul as the righteousness of a rectified relation to God, including forgiveness of sins (see JUSTIFICATION); cleansing or consecration (sanctification in principle: see SANCTIFICATION); participation in the Divine life, as the life of the Christ, or Spirit-life; and hence realized sonship to God, as embracing all else. So arranged, the series passes from the more objective to the more subjective aspects of the one simple yet complex fact, which, rooted at the heart of St. Paul's experience, had made a new man of him. And the most adequate conception of it is that which represents the new relation to God in its most inward, vital, and causal aspect—the birth of a new manhood or personality within the old individual, Saul. It is this which ever emerges in St. Paul's most spontaneous and personal utterances. Such are the great outbursts in Gal 2²⁰ and 2 Co 5¹⁵⁻¹⁷—passages familiar, yet in virtue of their experimental depth so little 'known' in the biblical sense. 'I have been crucified with Christ; yet I live; (and yet) no longer I, but Christ liveth in me; and that (life) which I now live in the flesh, I live in faith, (the faith) which is in the Son of God.' And again: 'He died for all, that they who live should no longer live unto themselves, but unto him who for their sakes died and rose again. . . . Wherefore if any man is in Christ, (he is) a new creature (καὶνὴ κτίσις): the old things are passed away; behold, they are become new.' In these and like passages St. Paul speaks as a prophet, not as a schoolman. He affirms: he has no thought of what he may

seem implicitly to deny. The life in him was above all new; and it was of Divine initiation or grace. But that did not mean that there was no psychological continuity between the old Saul and his faculties, and the new Paul and his: nor did it exclude the responsible co-operation of his own volition throughout. The affirmations are experimental and unembarrassed by reflective considerations of verbal consistency. We may see, moreover, from other passages that what is here in the background was not overlooked by St. Paul, but entered into the body of his thought, coming out in turn as occasion arose. Thus when he speaks of 'a new creature' (Gal 6¹⁵, 2 Co 5¹⁷), or says, 'the old things are passed away; behold, they are become new,' he simply means that his experience had utterly changed in colour and perspective. No factors had been eliminated: but the resultant was new; and this by the operation of a new factor determining all afresh and in a new synthesis. The new factor was the quickening grace of God in the Christ, the Spirit of Christ, the (Holy) Spirit, or most fully 'the law of the Spirit of life in Christ Jesus.' This, by overcoming 'the law of sin and death,' naturally at work, had produced a new spiritual life in him, and so made him a 'new man' in Christ Jesus. The way by which this had come about is laid bare in Ro 7, a chapter of deep psychological and also autobiographic significance. From it we gather that even in his unregenerate state, while the law of sin operative in 'the flesh'—the sensuous and self-willed side of his nature—actually swayed his will, he was already conscious of another and deeper element in his being, protesting against the flesh and sympathizing with the claims of God's law. This 'inner man' (ὁ εἶναι ἄνθρωπος, 7²² = ὁ νοῦς, 7²³. 23 = τὸ πνεῦμα τοῦ ἀνθρώπου, 1 Co 2¹¹; cf. Ro 8¹⁰), however, has only a latent or potential existence so long as it is overridden by 'the flesh'—'the law of the mind,' by the law or principle active in the fleshly members (7⁵). The spirit is as good as dead in the man Saul as a moral personality, being outside the centre of volition as long as 'the flesh' is there enthroned in power; and so it is generally ignored in St. Paul's references to 'the natural man,' who is called summarily 'dead in trespasses and sins,' because morally 'alienated from the life of God' (Eph 2¹⁻⁵ 4¹⁸). But when the life of God succeeds in quickening this half-inanimate spiritual faculty with a kindred passion for the righteousness of God, then it springs to life (Ro 8¹⁰) and gains control of the will: a new personality arises from the new union of the will and the higher element dependent on and akin to the Divine: the man lives anew with a fresh type of moral life—that being dominant which before was subject, and *vice versa*. With this psychological reversal may be compared the earlier change from the rudimentary 'life' of irresponsible innocence to the 'death' of a divided heart, wherein the lower elements hold sway (Ro 7⁹⁻¹¹). Now, however, the man is conscious of the issues at stake and the forces of both kinds at work in and upon him: and the whole deliverance has a vividness and finality proportionate to his prior sense of the death in bondage to sin (7²⁴).

As this experience of renovation came to St. Paul under the forms of the life, death, and resurrection of Jesus the Christ, so regeneration is set forth in terms of the same. The 'new man' or 'new creature' is so 'in Christ'; and Christ is in him. Hence 'the Spirit of God' or 'Holy Spirit,' the quickener of the new life (1 Co 6¹¹ 12³), can also be called 'the Spirit of Christ' (Ro 8⁹) or 'the Spirit of his Son' (Gal 4⁶). Hence also the specific condition of the 'new man,' in contrast to the 'old' (Col 3⁹, Eph 4²²⁻²⁴), is that of sonship and installa-

tion into sonship (*υιοθεσία*, Ro 8¹⁵⁻²³) after the likeness of Christ's.

Still this regenerate or filial life is not complete at the time when it is given, coincidentally with the self-committal of faith. It has a course of growth to go through, analogous to that of natural life. It begins with spiritual immaturity and proceeds to maturity of will and insight. The 'babe' (*νήπιος*) in Christ is one who perceives only the broadest outlines of the Father's ways and will, and may still be confused by the films of his old fleshly blindness; whereas the full-grown or 'perfect' man (*τέλειος*) is one to whom experience has brought enlightenment and discrimination of conscience (Ph 1⁹, 3¹²⁻¹⁶): he is actually and not only potentially 'spiritual' (*πνευματικός*). And each stage has its own spiritual nutriment, its 'milk' or its 'solid food' (1 Co 3¹⁻²).

(vi.) *St. John*.—The term 'regeneration' does not actually occur in St. John's writings, though it does virtually in one passage of his Gospel (3^{3, 7}), in the phrase *γεννηθῆναι ἄνωθεν*, which is best rendered 'born anew' (cf. v. 4 *δεύτερον εἰσελθεῖν . . . καὶ γεννηθῆναι*). This shade of thought, while proper to the context, and while probably appropriated by St. John as the root of his own thinking on the matter, is not the one most characteristic of his own doctrine. It is not so much the fact of a new beginning in the Christian life, as the inherent nature of that life as due to its Divine origin, that occupies this apostle's mind. His favourite emphasis is seen in the phrase 'to be begotten of God' (*γεννηθῆναι ἐκ τοῦ θεοῦ*). God Himself is the veritable Father of the Christian believer, the kindred fountal source of his new life, with its inherent Divine virtue (*τὸ γεγεννημένον ἐκ τοῦ θεοῦ*). This virtue manifests itself in certain vital functions, wonderful and Divine by reason of their distinctness from the average conduct of human nature, as St. John saw it about him, radically determined by the world of sense, that source of seductive pleasures and ambitions. The world, so regarded, stood at the rival pole of being to the Father; so that 'to be of the world' and 'to be of God' were mutually exclusive states or spirits, by which the soul might be possessed and characterized (1 Jn 2¹⁶).

Such birth from God is conceived by St. John as a single initial fact, carrying in itself abiding issues of a like nature. This is expressed by the use of perfects, like *γενένηται*, *ὁ γεγεννημένος* (1 Jn 2²⁹ 3⁹ 4⁷ 5^{1, 4, 18}, cf. Jn 3^{8, 9}), as distinct from aorists (*ὁ γεννηθεὶς ἐκ τοῦ θεοῦ*) describes Christ in immediate contrast to the believer, *ὁ γεγεννημένος ἐκ τοῦ θεοῦ*, 1 Jn 5¹⁸). The rarer cases in which the aorist occurs, are those which simply contemplate regeneration as the decisive fact constitutive of spiritual sonship in the believer (Jn 1¹², cf. 3^{3, 5, 7}). The main passage in question is Jn 1¹²: 'But as many as received him (the Logos), to them gave he prerogative to become children of God (*ἐδωκεν αὐτοῖς ἐξουσίαν τέκνα θεοῦ γενέσθαι*), even to them that were believers on his name (*τοῖς πιστεύουσιν εἰς κ.τ.λ.*); who were born, not of blood of human parents, nor of fleshly volition, nor of a human father's volition, but of God' (*οἱ οὐκ ἐξ αἱμάτων οὐδὲ ἐκ θελήματος σαρκὸς οὐδὲ ἐκ θελήματος ἀνδρὸς ἀλλ' ἐκ θεοῦ ἐγενήθησαν*). This is, in form and in context, an absolutely general statement; so much so, that it seems impossible to refer it primarily to belief in Jesus the Christ at all, but rather to the universal approach of the Logos to the human soul, prior even to the Incarnation (see 11⁵² for a similar thought). This is a most important aspect of the Johannine doctrine of regeneration: it not only fits in with the universality of his thought, but also confirms with his authority what is urged below, namely, that 'regeneration' may properly

be predicated of the experience of saints under the Old Covenant. Yet the language in which St. John states this very truth of the wider regeneration, effected wherever the Logos is welcomed by the soul, is significantly coloured by his habitual speech in terms of the final manifestation of the Logos in Jesus the Christ ('believers on his name').

As a rule, then, regeneration is, to St. John, actually conditioned by personal trust in Jesus, or, more specifically, in Him as the Christ, the Son of God (1¹², 20³¹, 1 Jn 5¹). Further, it is assumed to take formal or consummated effect (as in the case of Jesus' own Messiahship) in the experience of baptism. Just as he says, 'This is he who came under the condition of water (*ὁ ὕδατος*) . . . even Jesus Christ' (1 Jn 5⁶)—words used in close connexion with the Spirit as Messiah's endowment and witness (vv. 6-8, cf. Jn 3³⁴); so baptism is to him the normal condition under which believers come to rank as 'children of God,' in virtue of a manifest sealing by Holy Spirit power. As the Father had 'sealed' the Son (Jn 6²⁷) with the Spirit's witness, in response to His obedience of self-consecration at the Baptism (1 Jn 5⁹⁻¹⁰), so, apparently, St. John thought of the Messianic gift of the Spirit, usually manifest at baptisms in the Apostolic Age, as definitively 'sealing' (cf. above, (iv.)) the believer's confession of personal trust and consecration by 'an unction from the Holy One' (i.e. Christ, 1 Jn 2^{20, 27}).^{*} Such a reading of his Master's mind, as expressed by the reference to water in the words to Nicodemus, may be implied by St. John's return to the topic of baptism a few verses later on (3^{22, 25}), and certainly corresponded to the experience of the Apostolic Age—though hardly to that of later times. Naturally, the conjunction has no relation to the baptism of infants, where the essential element of belief on Christ's name is lacking. But, in relation to the conditions contemplated by the apostle, the definite line drawn by baptism between the filial status of Christian believers and what went before, is of great moment for his thought as to regeneration. It does not, indeed, annul his recognition of children of God awaiting the gospel to gather them into Christ's one flock (Jn 11⁵² *ἵνα καὶ τὰ τέκνα τοῦ θεοῦ τὰ διεσκοπισμένα συναγάγῃ εἰς ἐν*), and so of a deep dualism of moral state among mankind at large, a predisposition to accept or to reject the Light definitively revealed in Christ, according to the attitude to God implicit in each of two types of conduct (3¹⁸⁻²¹). But all this, taken along with the absolute form in which the tests of kinship to God are set forth in his Epistles ('every one that doeth righteousness,' 'that loveth,' 1 Jn 2²⁹ 4⁷, cf. 3 Jn 11), suggests that St. John distinguished between a virtual, though latent, and an explicit or conscious sonship. The latter was the specific blessing brought by the gospel of Christ, the assurance or knowledge of Divine sonship, after which even the best of men had before sought in vain. In this respect the revelation in Christ was crucial. As Light, in an absolute moral sense, He brought all to a crisis or decision (*κρίσις*), forcing all hearts to reveal their inmost affinities—whether for 'the world' and self, or for God and His righteousness and love. Implicit regeneration, where it already exists, thus passes into explicit regeneration.

The more definite and psychologically mature character of the NT experience of Regeneration, as compared with that of the godly under the OT, is hinted in the words, 'I came that they may have Life, and have it in abundance' (10¹⁰, cf. 4¹⁴).

^{*} As has been well said, 'the disciples are in a true sense Christ's in virtue of the life of "the Christ"' (Westcott, *The Epistles of St. John*, xlv).

It connects itself also with the Johannine emphasis on the specifically new presence of the Spirit with the Christian as such. Here two passages in the Gospel are crucial. Commenting on Christ's words, 'He that believeth on me . . . out of his belly shall flow rivers of living water,' St. John adds: 'But this spake he of the Spirit, which they that believed on him were to receive—for (the) Spirit was not yet (given), because Jesus was not yet glorified' (7^{39c}). Then, in the great Farewell Discourse (Jn 14¹⁶) he records his Master's promise that He would give the disciples 'another Helper' or Paraclete, to supply what would be lacking of conscious support through the removal of His own bodily presence. This implies something fresh to their experience, and yet Jesus adds: 'Ye (already) have (experimental) knowledge of him, for at your side he abideth and in you he is' (ὁμοῖς γινώσκετε αὐτόν, ὅτι παρ' ὑμῶν μένει καὶ ἐν ὑμῖν ἐστίν). Here the contrast is a religious rather than a metaphysical or theological * one: it is a matter of the disciples' consciousness rather than of the Spirit's real presence. They had implicit experience of His action, in their very experience of oneness of heart with their Master: in a little while this was to blossom out into recognition of His presence and support as the very ground of their assurance of abiding spiritual union with their glorified Lord and a share in His sonship. This is the thought which St. Paul grasped so firmly and expresses in the words, 'the Spirit himself beareth witness with our spirit that we are children of God' (Ro 8¹⁶, cf. 3^{3c}). But it is also what St. John has in mind in saying that 'not yet was the Spirit,' i.e. the Spirit-consciousness of full sonship which marked Christians after Pentecost (7³⁹, cf. Ac 19²).

St. John's doctrine of salvation, then, centres in Regeneration. In it man's true or ideal destiny is realized through the initiative of the heavenly Father or the Spirit, responded to by the moral receptivity of obedience in the human heart or will: potential sonship becomes actual in a Life of communion that is at once human and Divine (10³⁸). Every man has the potency of two diametrically opposed personalities in him, by his natural birth. The one has, as it were, the stamp of the other, realizing itself along the line of sensuous, egoistic tendency—the line of least resistance morally. It is thus 'of the earth' (3³¹), 'of the world' (15¹⁸ 17¹⁴ 18, 1 Jn 2¹⁶ 4⁶), 'from below' (8²³), the sphere of 'the ruler of this world' (14³⁰). Those, then, in whom it reigns are morally 'children of the devil' (1 Jn 3⁸ 10, cf. Jn 8⁴⁴). The other personality or character, on the contrary, owes its origin and vitality to God and that spiritual order of His which gradually dawns upon our ken with the emergence of reason and conscience. Thus it is, when produced in a man by Divine grace (6⁴⁴)—though not without the co-operation of human volition (3^{30c} 5⁴⁰ 8⁴⁴)—a life 'from heaven' (3³⁷), 'not of the world' (15¹⁸ 17¹⁴ 18), 'from above' (like the Son himself, 8²³), 'of God' (1 Jn 3⁹ 5⁴ 18) or 'of the Father' (1 Jn 2¹⁶). To save one of these lives is to lose the other (12²⁵): the life of the one means the death of the other (as in the Synoptics).

C. CONNECTED SUMMARY.—Regeneration is the final form in which biblical religion conceives that profound spiritual change whereby sinful man comes into real and abiding communion with God. Accordingly, one must recognize in regeneration the virtual synonym of various other soteriological terms, such as Repentance, Conversion, Justification, or Forgiveness, and even Consecration or

Sanctification in that radical sense which constitutes the believer as such 'a saint.' But as 'regeneration' sets forth the change in question in a specially inward or vital way, it hardly emerges as an explicit doctrine in the OT, and does so but gradually even in the NT. We have seen that in Christ's own ordinary preaching, as given in the Synoptics, regeneration is set forth in purely religious and ethical fashion, in terms of the will rather than in a manner more abstract. This popular aspect of the matter meets us again in early Judæo-Christianity, before highly trained minds like St. Paul and the writer to 'Hebrews' had brought the categories of Rabbinic and Hellenistic psychology to bear on the data of Christian experience. Repentance, not regeneration, stands in the forefront of the early preaching in Acts, as also of that under which 'the Hebrews' had believed (He 6¹ 9); and thereby men were qualified for entrance into the Messianic community in baptism, in which they received the 'seal' of the Spirit's manifested gifts. The more inward and secret operation of the Spirit, implied in penitence and trust, had not as yet received due notice. This side of things, indeed, was largely hidden from those whose outlook and conception of Salvation were still primarily eschatological.

Hence St. Paul's unique experience of the gospel as power of God in the soul, and as an essentially present Salvation, marks an epoch in the NT doctrine of Regeneration. His deeply self-revealing consciousness of sin gave him to see, traced within, the process by which new moral energy was received, and to realize the Divine quickening involved in man's experience of repentance and faith. He saw that human nature embraced two principles, opposed in tendency to each other, and competing for the control of man's settled personal will. In actual human nature the lower or sensuous (ψυχικόν) and self-centred principle, called 'the flesh' (σάρξ), had the upper hand and determined the quality of man's moral life: and the outcome was 'death' towards God and His righteousness. But in Jesus Christ, who was a 'second' or new type of manhood, of heavenly origin (ὁ δεύτερος ἄνθρωπος ἐξ οὐρανοῦ), and 'spiritual' in contrast to the 'sensuous' or 'earthy' type of Adamic manhood (1 Co 15⁴⁵⁻⁴⁷), a new basis was laid for humanity. To believers this Saviour became 'a quickening spirit' (πνεῦμα ζωοποιόν), turning the scale decisively against 'the flesh,' and setting free, as if by a resurrection, the enthralled higher nature (νοῦς or πνεῦμα), before as good as dead, by filling it with Divine energy or life (πνεῦμα ἁγίου) akin to His own, in virtue of which He rose victorious over death. A man so vivified by the Spirit of God, and after the likeness of Christ, was in very deed a new moral being (καὶνὴ κτίσις), a son of God, by Divine re-creative action and adoption. The Spirit replaced the flesh as prime determinant of will and conduct; and therewith 'the old man,' the moral state of the individual by nature, gave way to 'the new man,' the state in which the human will is in harmony with the Divine in principle, and normally so in practice likewise. 'Cleaving to the Lord,' the soul 'is one spirit' with Him (1 Co 6¹⁷), animated by one and the same life that is in Christ, the Head of the new humanity, a life that is essentially of God and Divine.

This deeper idea of Salvation seems certainly to have left its trace on St. Peter's later thought, to judge by 1 P. Possibly also it affected the form in which St. John himself interpreted the new Life which had been manifested, first among the original disciples, and then in them. Yet there were elements in St. John's doctrine proper to his own experience, both of his Master's teaching and

* The usual reading *levas*, instead of *levis* (BD* 1. 22. 69. 251. 254 it per syr. cur. pesh. go Tat arab. Lciff), is probably due to failure to see this, and the consequent attempt to harmonize the statement with the future (*δαίς*) above.

of the Light and Life in himself and others. He shared with St. Paul the idea of moral dualism as rooted in a dualism of elements in human nature. On the one hand man was related to 'the world' of sense and of self (the flesh), on the other he was akin to God, as sensitive to His word and so potentially His 'child' in deed and in truth. St. Paul thought most of the new experience in itself, speaking of the regenerate man as a 'new (moral) creature,' or as a 'son' in respect of definite status and privileges in relation to God through faith in Christ and by virtue of the Spirit (2 Co 5¹⁷, Gal 3²⁶ 4⁷, Ro 8¹⁴⁻¹⁷, 29). Thus it is a question of a new status or condition into which a man is brought by a definite act, Adoption (*υιοθεσία*), by which the transition is made from the opposite states of serfdom, wretchedness, alienation, death (Gal 3^{3, 5, 7}, Ro 7⁵ 8^{6, 14}): so that the full effect of such adoption waits upon man's emancipation from 'the bondage of corruption' in 'the redemption of our body' (Ro 8²⁰⁻²²). St. John, on the other hand, thought rather of the intrinsic nature of the 'eternal life' quickened in believers, of the wonder and glory of its origin in God—the Divine nature germinating as 'seed' in the human soul, and by a new birth begetting a new personality. Thus it is his writings which present the most classic statement of the doctrine of Regeneration, as 'that work of the Holy Spirit in a man by which a new life of holy love, like the life of God, is initiated.'

Aside from this main line of development stand St. James and the writer 'to Hebrews.'

The former thinks of the origin of the higher life in the soul in terms of the Wisdom literature of the OT and of writers like Philo.* 'The word of truth,' 'the inborn word,' or 'the wisdom from above,' is the medium of God's creative action on the soul, by 'the Spirit which he hath caused to dwell in us' (1^{18, 21} 3¹⁷ 4⁵). To the latter, men are essentially 'spirits,' placed by 'the Father of spirits' in the body, to be disciplined and purified with a view to conscious sonship, and so to the 'glory' of the spiritual and real world of which the visible is but the poor shadow (12²⁰⁻²² 2¹⁰ 12²⁵⁻²⁷). Hence the work of grace is set forth as moral enlightenment and purification of the conscience (6⁴ 10²⁵ 9¹⁴ 10²), believers being 'those who have been illumined.' The vital and dynamic aspects are not, indeed, absent (5¹¹⁻¹⁶); but the renewal effected in the fundamental change of heart which the NT everywhere recognizes in Repentance (6⁶), is to him a matter of divinely-given insight into the realities of the moral and spiritual world, and a corresponding obedience. The Christian 'tastes the word of God to be good,' and as he feeds upon the oracles of God he gains an ever more refined perception of shades of moral and spiritual truth (6⁴ 5¹⁴). This, the writer's own emphasis (as distinct from his readers' type of thought), is Hellenistic and 'Alexandrine,' being largely paralleled in the so-called Epistle of Barnabas, as well as in 1 Clement and a good deal of 2nd cent. Christian literature.

But differently as the NT writers do, in some respects, conceive the great experience whereby the moral centre of gravity in a man's life changes from self to God, they are unanimous on one cardinal point. And that is the constant relation of the 'word of God,' made vital to the conscience and heart, as the means, and of faith as the condition of the change.

LITERATURE.—The special literature of this subject is rather scanty. Considerable sections on it exist in the larger works

* Philo represents God and the Logos as sowing in the womb of the soul the seed of virtues, and so making it pregnant and bear: e.g. *Leg. alleg.* iii. 51, διασπεντι γάρ τῷ τῷ ψυχῇ ὁ σπέρματικὸς καὶ γινεστικὸς τῶν καλῶν λόγων ὁρμός.

on biblical theology (e.g. Weiss and Holtzmann in particular), as also in systems of Dogmatic (e.g. Rothe, Thomasius, Martensen, Dörner). But attempts at a strictly historical and genetic account of the biblical doctrine, on the basis of an adequate literary criticism, are singularly few: J. Köstlin's art. 'Wiedergeburt,' in *PRE³* xvii. 75 ff., seems the best available, but is no longer sufficient. The *Angus Lecture* on 'Regeneration' (1897), so far as it deals with the biblical material, is quite uncritical and conventional. Much matter bearing on our doctrine is to be found in studies of the doctrine of the several NT writers, often under other, but kindred, headings, e.g. Adoption, Conversion, Faith, Justification, Repentance, Sonship. As examples may be cited, J. B. Mayor, *Epistle of James*, appended Comment on 'Regeneration,' pp. 186-189; A. B. Bruce, *St. Paul's Conception of Christianity*, chs. x.-xiii., and esp. ch. xvii., 'The Christian Life' (though it unduly minimizes St. Paul's recognition of growth in the new life); Westcott, *Epistles of St. John*, added Note on 'Children of God,' p. 122 ff. J. V. BARTLET.

REGISTER.—See GENEALOGY, vol. ii. p. 121.

REHABIAH (רְחַבְיָה and רְחַבְיָה 'Jah is wide').—The eponym of a Levitical family, said to be descended from Eliezer, one of the sons of Moses, 1 Ch 23¹⁷ 24²¹ (LXX 'Ραββιά) 26²⁰ (B 'Ραββίας, A 'Ραββίας).

REHOB (רְחֹב and רְחֹב).—1. (B 'Ραββ [2 S 'Ρωββ], A 'Ρωββ) A town at the northern end of the valley of the Jordan, most probably the same as BETH-REHOB (which see), of which the exact site is unknown. In P's narrative of the spies Rehob is mentioned (Nu 13²¹) as the most northerly limit of their explorations, and is further defined as 'at the entering in of Hamath,' i.e. at the entrance of the great depression between the mountains of Lebanon and Hermon, which connects Palestine and Cœle-Syria. P's phrase, therefore, 'from the wilderness of Zin unto Rehob,' is merely a variation of the more usual formula 'from Dan to Beersheba.' With this agrees the notice in Jg 18²⁷, where the new settlement of the Danites at Laish (or Leshem, Jos 19⁴⁷) is described as situated 'in the valley that lieth by Beth-rehob.' In the reign of David the valley of Beth-rehob (2 S 10⁶) or Rehob (v.) was the seat of a petty Aramean kingdom (cf. 1 S 14²⁷, LXX Lag.), like the neighbouring Beth-maacah or Abel of Beth-maacah. Robinson (*BRP²* iii. p. 371) identified the town with the ruins of *Humin* in the valley of Huleh; but this site is too far south. More probable is the view of Buhl (*GAP* p. 240), who suggests that it corresponded to the later *Paneas* (Bāniās). It is true that many writers have identified this town with the ancient Dan (Reland, *Palæstina*, p. 918 f.; Thomson, *Land and Book*, ii. 547; and recently G. A. Smith, *HGHL* pp. 473, 480 f.); but, in view of the explicit statement of Eusebius (*OS²* 275. 33, 249. 32, cf. Jerome, *ib.* 136. 11) that Dan was four miles distant from Paneas, we should probably identify Dan with the modern Tel el-Kāḍi (*kāḍi* = 'judge' = *Dan*).

2. (B 'Ραββ, A 'Ρωββ) A town belonging to the tribe of Asher, the exact site of which is unknown. It was presumably near to great Zidon (Jos 19²⁹), and was afterwards assigned, together with its suburbs, to the Gershonite Levites (Jos 21²¹, 1 Ch 6⁷⁵). It is therefore to be distinguished from—

3. (B 'Ρααύ, A 'Ραωβ), which is also mentioned as belonging to Asher, and was apparently near the seacoast (Jos 19²⁹). According to Jg 1³¹ Rehob was one of the cities which were still retained by their Canaanite inhabitants. Very possibly it is the city referred to in the Egyptian lists cited by Müller (*Asien u. Europa*, p. 153).

LITERATURE.—Thomson, *Land and Book*, ii. 547; Robinson, *BRP²* iii. p. 371; *SWP* i. p. 139 ff.; Baedeker², p. 265 f.; G. A. Smith, *HGHL*, i.e. Buhl, *GAP* pp. 65 f., 112 f., 237-240; Stanley, *Sinai and Palestine*, p. 400; Moore, *Judges*, p. 389 f. and p. 51 f.

4. ('Ραββ) The father of Hadadezer, king of Zobah (2 S 8^{3, 12}).

5. (N 'Pocß, A 'Pocß, B om.) One of those who sealed the covenant (Neh 10¹¹).

J. F. STENNING.

REHOBOAM (רְחֹבָם, 'the people is enlarged,' or perhaps 'Am is wide,' cf. *Rehobiah* [see Gray, *HPN* 52, note 1, 59 f.]; *Pocßam, Roboam*).—The narrative of this reign is contained in 1 K 11^{43-12²⁴} 14²¹⁻³¹, 2 Ch 9¹⁻¹². 'Ample in foolishness (רַחֵם אֵילָה) and lacking understanding, Rehoboam by [his coun]sel let loose [the people]' (Sir 47²³, Cowley and Neubauer's translation). Such is the judgment of the son of Sirach, as he pauses in his 'praise of famous men' for the inevitable notice of the collapse of Israel as a world power, and the frustration of the proud hopes of Solomon that had found expression in the name he had bestowed on his heir. The Christian historian, who recognizes that the function of the chosen race was to be the custodian of the oracles of God and source, according to the flesh, of the Saviour of the world, can easily perceive that this *preparatio Evangelii* was, humanly speaking, rendered possible only by that checking of the material development of the nation of Israel which resulted from the disruption of Solomon's empire. But to the Jewish patriot the maiming of his country's life must always have seemed an unmixed evil. The apparent immediate cause—Rehoboam's fatuous insolence—was merely the pretext for the revolution that took place on his accession. As is the case in every other turning-point of history, the true cause of the issue must be sought for beneath the surface, in social and religious forces which had been at work long before.

There was, in the first place, the *political* question. It was the normal condition of things that Ephraim should envy Judah, and Judah vex Ephraim. From the time of the earliest settlement in Canaan the North and the South had stood apart. The Bk. of Judges exhibits the northern tribes welded together by common resistance to the various oppressors. Judah never joins them, even when the attack comes from the south. It may have been that co-operation was difficult owing to the line of Canaanitish fortresses, such as Jebus, Gezer, and Ekron, that extended across the country from east to west. It may have been that the spirit of nationality was weaker in Judah and Simeon as a consequence of their greater laxity with regard to intermarriage with and adoption of native families; if indeed we should not rather regard it as a cause of this laxity. Be that as it may, we find the distinction between Israel and Judah noted in the first army raised by Saul (1 S 11⁹), and immediately after Saul's death an open breach occurred. David laboured hard to break down this antagonism. His transference of the seat of government from the purely Judahite Hebron to Jerusalem was a compromise with the northern tribes. Yet in his reign Israel twice rebelled. David's policy was continued by his successor; Solomon's division of the land for commissariat purposes (1 K 4^{7ff.}) was evidently an attempt to obliterate the old tribal boundaries. That this attempt was in some degree successful may be inferred from the fact that the boundary between the dominions of Rehoboam and Jeroboam so ran as to include in the southern kingdom a portion of Benjamin, and the greater part of the southern settlement of Dan. A succession of monarchs of the commanding personality of David or Solomon might have completed the unification of the tribes, but Solomon presumed too much on his personal prestige. The odious levy of forced labour, and that, too, for the adornment of an upstart capital, and the ceaseless exactions for the supply of the royal table (LXX 1 K 12^{24b}), had long rankled in the hearts of the proud Ephraimites. Add to this that the character of Solomon's suc-

cessor, as one 'not fit to be a ruler nor to be a prince' (LXX 1 K 12^{24a}), must have been well known for many years. Everything, indeed, indicates that all preparations had been made for a revolution the moment Solomon should die. The Ephraimite Jeroboam, supported by a prophet's nomination and the favour of his tribe, was biding his time in Egypt, and treated there not as a runaway official, but as an exiled prince (LXX 2 K 12^{24c}). The temper of the northern tribes was further shown in their determination to appoint Rehoboam independently, if at all, and in their selection of Shechem, the chief sanctuary of Ephraim, as the place of assembly, thus ignoring the recent centralization of civil and religious administration at Jerusalem.

This political movement was supported by a *religious* agitation in which two elements, ecclesiastical and prophetic, may be discerned: on the part of the priests of the high places jealousy of the exclusive claims of the new temple at Jerusalem, and on the part of the prophets a nobler zeal for Jehovah, called forth by the lax eclecticism of Solomon in his later years. As we see from the attitude of Nathan, the prophets had not cordially approved of the building of the temple, and they now probably thought that there was more chance of the national worship being preserved in its purity in the north. Rehoboam's subsequent conduct, indeed, quite justified these alarms. He added to his father's innovations by sanctioning the erection of pillars of Baal and the worst abominations of heathenism (1 K 14²²⁻²⁴), such as did not find a place in the northern kingdom until the reign of Ahab fifty years later. The Chronicler's account of Jeroboam's expulsion of priests and Levites, and of the rallying of the orthodox Israelites round Rehoboam (2 Ch 11¹²⁻¹⁶), is quite unsupported by Kings, which (12¹⁷) merely states that Rehoboam's subjects included some residents of northern extraction. The special animus of the revolting tribes against the temple at Jerusalem possibly underlay their parting taunt, 'Now see to thine own house, David.' Josephus (*Ant.* VIII. viii. 3) understood it thus, 'We only leave to Rehoboam the temple which his father built.' Ahijah and Shemaiah were right. 'It was a thing brought about of the LORD'; the pure monotheism of which Israel was privileged to be the exponent would have been sapped and destroyed by foreign cults, if the later Solomonic policy had received no check. In after times this was forgotten; and the later prophets, thinking solely of the political consequences of the disruption, refer to it as a supreme calamity (Is 7¹⁷, Zec 11¹⁴).

The most important event in this reign is the invasion of Palestine by Shishak. This was one of the direct consequences of the division of the nation. Sesonchis, as Manetho calls him, the first monarch of the 22nd dynasty, reversed the policy of his predecessor Psusennes, and displayed unfriendliness towards Solomon by sheltering his adversaries Hadad and Jeroboam. Notwithstanding the fact that Shemaiah had forbidden the employment of the huge army (reduced in LXX, B, to 120,000 men) which Rehoboam had mustered by the following year (LXX 1 K 12^{24a}) in order to recover the kingdom he had lost, yet 'there was war between Rehoboam and Jeroboam continually' (1 K 14³⁰). In all probability Jeroboam, harassed by these border forays, called in the aid of his former protector. The fifteen towns which Rehoboam is said to have fortified (2 Ch 11⁶⁻¹⁰) are, with two exceptions, south of Jerusalem, as though an attack might be expected from that quarter. The invasion took place in Rehoboam's fifth year, and the prophetic historian justly sees in this humiliating calamity the scourge of God for the continued and aggravated national apostasy. The

statement of the Chronicler (2 Ch 11¹⁷) that Rehoboam's defection did not occur until his fourth year, and the story of his subsequent repentance (12²⁴), are obviously designed to bear out the theory of the original orthodoxy of the kingdom of Judah (see Abijah's speech, 2 Ch 13¹⁰), as well as to heighten the moral and dramatic effect of the story. Jerusalem does not seem to have stood a siege. Resistance was hopeless. Shishak (herein acting treacherously, according to Josephus) utterly denuded the temple and royal palace of their treasures, including the famous golden shields of Solomon's guard, to which the LXX (2 S 8⁷, 1 K 14²³) adds the golden shields taken by David from Hadadezer. Dean Stanley well points out that there is a grave irony in the historian's account (1 K 4²⁸) of how the elaborate ceremony which had been observed with regard to the golden shields was continued in the case of their brazen substitutes. We learn from the Chronicler (2 Ch 12²⁴) both the number of Shishak's host, to which Josephus adds 400,000 infantry, and also the nationalities of which it was composed—Libyans, Sukkium (= troglodytes, LXX and Vulg.), and Ethiopians. Ewald (*HI* iv. 45) conjectures that Edom also joined in the invasion (see J1 3¹⁹). There may still be seen on the south wall of the temple of Amon at Karnak an inscription—now partially defaced—which deals with this expedition. It gives the list of towns subjugated by Shishak. Some difficulty has been caused by the inclusion in this list not only of places in the south, such as Shocoh, Gaza, Keilah, and perhaps Jerusalem, but also of many towns of Israel as far north as Megiddo. This does not contradict the biblical narrative, which confines itself to the invasion of Judah; but it seems scarcely reconcilable with the hypothesis that Shishak invaded Palestine as Jeroboam's ally. However, Maspero (*Journal of the Transactions of the Victoria Institute of Great Britain*, vol. xxvii. p. 63) points out that 'the king of Israel in imploring the aid of Shishak against his rival had thereby made himself vassal to Egypt. This would suffice to make his towns figure at Karnak among the cities subjected in the course of the campaign. This is a more likely solution of the difficulty than Rawlinson's supposition (*Speaker's Com. in loc.*), that these were Canaanite or Levitical towns which had taken Rehoboam's side. The names on this list are engraved on cartouches, over which appear the heads of men of various types, representing the inhabitants of each town. Considerable interest was formerly excited by one of these names, which Maspero transliterates *Jaoud-ha-maluk* or *Jud-ham-melek*. This was rendered by Rosellini 'king of Judah' (!), and the inference was a tempting one, that in the annexed figure we had a veritable portrait of Rehoboam himself. But Brugsch (*Geogr. Ins.* I. ii. p. 62), followed by Maspero, interprets it as the name of a village in Dan, Jehud, now el-Yehūdīyeh, near Jaffa. 'The name bears the sign for "country," not for "person."' See, further, *Struggle of the Nations*, 774.

Some minor matters remain to be discussed. From Kings we learn the name of Rehoboam's chief wife only, MAACAH. But the Chronicler gives details about his domestic affairs, noting the name of a second wife, MAHALATH, and perhaps of a third, ABIAH, who is mother of Mahalath according to the RV, but another wife of Rehoboam according to AV and RVm. Josephus reduces the number of his concubines to thirty.

The rise in Judah of the power of the queen-mother is probably to be attributed to Rehoboam's uxoriousness. His conduct towards his sons, which is praised by the Chronicler, may have rendered the accession of Abijah easier, but was not wise in the best sense of the term.

According to the MT of 1 K 14²¹ and 2 Ch 12¹³ Rehoboam was 41 years of age at his accession, and reigned 17 years. He would then have been born before Solomon came to the throne. Rawlinson would read, with some MSS, 21 in this passage, on the ground, perhaps, that the insolence of Rehoboam to the Israelites is more like the conduct of a petulant youth than of a man of mature age. More weight must be given to the second

Greek account, which in 1 K 12²⁴ says that Rehoboam was 16 years of age at his accession, and that he reigned 12 years. The statement of Abijah (2 Ch 13⁷) that Rehoboam was 'young and tender-hearted' (נָעֵם וְרַחֵם, i.e. 'fainthearted,' see Dt 20⁹) at the time of the rebellion must not be pressed.

There is one other important chronological difference between the second Greek account and our present Hebrew text. In the latter, Jeroboam, even if he took no personal share in the negotiations with Rehoboam (1 K 12²⁰), certainly left Egypt immediately after Solomon's death; whereas in LXX 1 K 12²⁴ the marriage of Jeroboam to Shishak's sister-in-law, and the birth of his son Abijah, occur in Egypt after Rehoboam's accession. But this whole story is in a very confused condition, and is antecedently less probable than that preserved in the common text. See JEROBOAM; and cf. Swete, *Int. to OT in Gr.* 248 f.

N. J. D. WHITE.

REHOBOTH.—1. The name given by Isaac to a well of which he was allowed by Abimelech's herdsmen to take peaceable possession. This was after two previous wells dug by Isaac's servants had led to strife, and the name of the third was called *Rēhōbōth* (רְחֹבֹת 'wide spaces,' LXX *Εὐρυχωρία*) because, said Isaac, 'now the LORD hath made room (*hirhīb*) for us,' Gn 26²² (J). Palmer (*Desert of the Exodus*, 383) describes a very ancient well on the north-east side of the *Wādī es-Sādī* (eight hours south of Beersheba), which he is inclined to identify with the Rehoboth of this passage. The name *Ruhaibeh* still lingers in the neighbourhood, being applied to a wādī close by. The objections of Robinson (*BRP* i. 197) to this identification are strangely pointless. It is not improbable (cf. König and Sayce in *Expos. Times*, xi. [1900] pp. 239, 377) that the Rehoboth of Gn 26²² is also the *Rubāti* or *Rubāte* of the Tel el-Amarna letters (Winckler, Nos. 183 and 239; Petrie, 256 and 260), although Sayce (in *Early Israel*, 289) and Petrie (*Syria and Egypt from the Tell el-Amarna Letters*, 180) prefer to make *Rubāti*=Rabbah of Jos 15⁶, and Hommel (*AHT* 234 f.) identifies it with Kiriath-arba (Hebron), which he supposes to have been called *Robā'ūt*, 'the four quarters.'

2. In the list of kings of Edom contained in Gn 36³⁷, one of the names is Shaul 'from Rehoboth of the River' (רְחֹבֹת הַנָּהָר v. 37; LXX [A; B is defective here] *ἐκ Ρωβῶθ τῆς παρὰ ποταμῶν*, and so A in the parallel passage 1 Ch 1⁴⁸, B om.). The situation of this Rehoboth is quite uncertain. It is not even clear whether it should be sought in Edom or elsewhere. The *Notitia Dignitatum* (c. 29) makes it Edomite, and Eusebius and Jerome (in the *Onomasticon*) locate it in Gebalene, i.e. Idumæa; but the analogy of other OT passages where 'the River' (הַנָּהָר) is spoken of absolutely, would lead us to think of the Euphrates, in which event Rehoboth might be *Rahaba* on the western bank of that stream, somewhat to the south of the Chaboras. Winckler (*Gesch.* i. 192) would (doubtfully) place it between Palestine and Egypt, understanding the נָהָר here to be the *Wādī el-Arish*, the 'River' (הַנָּהָר) of Egypt' of Nu 34⁸ etc.

The name *Rēhōbōth*, owing to its meaning, would be likely to be very widely diffused (see Knobel on Gn 36³⁷, and cf. W. Max Müller, *Asien u. Europ.*, 134).

J. A. SELBIE.

REHOBOTH-IR (רְחֹבֹת עִיר, AV 'the city Rohoboth,' AVm 'the streets of the city'; LXX A *ἡ Ρωβῶθ πόλις*, D^a *Ρωβῶθ π.*, E^a *Ρωβῶθ π.*; Vulg. *plateæ civitatis*).—One of the four cities built by Asshur (RV by Nimrod) in Assyria, the others being Nineveh (regarded as the later capital), Resen (Rēs-ēni, Sayce), and Calah, now Nimroud (Gn 10¹¹). There has been much discussion as to the identity of this site, and Assyrian literature has not furnished us with any geographical city-name with which it could be identified. Indeed it is hardly likely that we should come across it there, except under a different form, for neither of the component parts of the name is really As-

syrian, *Rēhōbōth*, as Delitzsch has shown, being *rēbītu*, 'broad, open spaces,' whilst 'ir' would be represented by the common word *ālu*, 'city.' It has been objected that the Heb. scribe would not have translated *rēbītu*, but would have transcribed it, just as he has transcribed *Resen*, without the guttural; for the Assyrians as a rule pronounced neither the soft guttural *ṣ*, nor the *y*. This, however, cannot be regarded as conclusive, for the Heb. scribe has, to all appearance, translated, and not transcribed, the Assyrian *ālu* in the word 'ir, 'city.' It would therefore seem that we must not transcribe, but translate, the Heb. *Rēhōbōth-ir*, and this, in Assyrian, would be *rēbet āli*, 'the broad spaces (squares) of the city,' and regard the expression, with Delitzsch, as referring to the name of Nineveh, which immediately precedes. Delitzsch compares the Heb. expression with the *rēbit Ninua*, 'broad place of Nineveh,' in Esarhaddon l. 23, and the probability is that he is right in his identification. Through this part of the city, probably a suburb, Esarhaddon caused the heads of the kings of Kundi and Sidon to be carried in procession with singing, etc.; and, as he thus specially mentions it, it must have been a sufficiently important place. It is apparently this same place of which Sargon, Esarhaddon's grandfather, speaks in his Cylinder Inscription, l. 44, in connexion with the peopling of Magganubba: 'The city Magganubba, which lay like a pillar at the foot of the mountain Musri, above the springs and the broad place of Nineveh' (*rēbit Nindā*). This text would therefore seem to make Magganubba the old name of Dūrsargina or Khorsabad, and the *rēbit Nindā* must have lain between that city and Nineveh, but much nearer to the latter. If the places referred to are named in the order in which they actually occurred, their relative positions would be (1) the mountain Musri, (2) the city Magganubba, (3) the springs, (4) the *rēbit Nindā*, (5) Ninā or Nineveh itself.

LITERATURE.—Delitzsch, *Paradies*, p. 261; Schrader, *COTI*, p. 101; Riehm, *Handwörterbuch*; and the *Calver Bibelllexikon*, s.v. T. G. PINCHES.

REHUM (רְהוּם).—1. One of the twelve heads of the Jewish community who are said to have returned with Zerubbabel, Ezr 2^d (B om., A 'Ρεοῦμ). In the parallel passage Neh 7^d the name appears, perhaps by a copyist's error, as NEHUM (LXX Ναοῦμ); in 1 Es 5^d it is ROIMUS (LXX Ρόειμος). 2. 'The chancellor,' who, along with Shimshai the scribe and others, wrote a letter to king Artaxerxes, which had the effect of stopping for the time the rebuilding of Jerusalem, Ezr 4^s, v. 17. 22. In 1 Es 2¹⁶ he is called RATHUMUS. The title for CHANCELLOR (רֹאשׁ לְדָבָר, lit. 'lord of judgment'), being misunderstood by the LXX, appears in the latter passage as a proper name (Ράθυμος καὶ Βελέτθεμος); see BEELTETHMUS. In Ezr 4^s B has 'Ραοὺλ βαδαραμέν, in v.⁹ 'Ραοῦμ βδαλ, and in v.¹⁷ 'Ραοῦμ βαλγάμ, while A has uniformly 'Ρεοῦμ βααλτάμ. 3. A Levite who helped to repair the wall, Neh 3¹⁷ (B Βαοῦθ, NA 'Ραοῦμ). 4. One of those who sealed the covenant, Neh 10²⁵ (26) ('Ραοῦμ). 5. (רְהוּם) The eponym of a priestly family which returned with Zerubbabel, Neh 12^d (BA om., NC^a [108] 'Ρεοῦμ). The name רְהוּם in this last instance is not improbably a textual error for רַחֲמִים, cf. v.¹⁵. J. A. SELBIE.

REI (Heb. רֵי, probably = 'the LORD is a friend'; Pesh. ܪܝܝܐ [sic, ܪ and ܝ being confounded];

LXX B 'Ρηοί, A 'Ρηοί; Vulg. *Rei*, *Rhei*).—According to the MT of 1 K 1^s this is the name of one of the influential supporters of Solomon at the critical moment when Adonijah was preparing to dispute the succession to the throne. It is impossible to be quite certain that the reading is

correct, but the balance of evidence is in its favour. Lucian's *Σαυλαὶ καὶ οἱ ἐταῖροι αὐτοῦ οἱ ὄντες δυνατοὶ* rests on a different division of the Hebrew letters, not a different text—רֵי רֵי instead of רֵי רֵי. Jos. *Ant.* VII. xiv. 4, has ὁ Δαουίδου φίλος, thus making Shimei into the 'friend,' the royal official of 2 S 15^d 16¹⁶, and, with Lucian, getting rid of Rei altogether. But if Josephus is supposed to be following a Heb. original pretty closely, that original would here be רֵי רֵי or רֵי רֵי, and it is not easy to believe that the much longer form of the MT, רֵי רֵי רֵי רֵי, has grown out of this. Klostermann's conjectural emendation, רֵי רֵי (Die Bücher Sam. u. Kön. p. 263), scarcely commends itself (see Benzinger, *ad loc.*), nor is there sufficient support for Winckler's (*Gesch.* ii. 247) identification of Rei with 'Ira, or, as he would spell it, Ya'ir of 2 S 20²⁰.

As to the pair of names, Shimei and Rei, Ewald (*Gesch.* iii. p. 266, note) thought that they might belong to the two brothers of David, Shammiah and Raddai, who are mentioned 1 S 16⁹ 17¹⁵, 1 Ch 2¹⁴. But the double alteration of רֵי into רֵי and רֵי into רֵי is somewhat unlikely. Perhaps one may add that the LXX 'Ρηοί seems to have originated in a mistaken reading of רֵי for רֵי.

Assuming that Rei must stand in the text, it is fairly certain that the man thus designated was an officer of the royal guard. The important part played by these troops in determining the succession to the throne, as well as the mention of the *gibbōrim* immediately after Shimei and Rei, points in this direction. J. TAYLOR.

REINS.—This name for the kidneys is now obsolete, though RV retains it in all its 18^o occurrences in AV. It comes from Lat. *renes* the kidneys, through Old Fr. *reins*, while 'kidneys' is of Scand. origin. The word was always used with some freedom. Thus Cov. translates Ezk 29⁷ 'Yif they leaned upon the, thou brakest, and hurdest the reynes of their backs'; and in AV it is once used for the loins (Is 11⁵). This indefiniteness and not any sense of its becoming antiquated must have led the AV translators to use the word only figuratively, to express those feelings or emotions which were understood by the Hebrews to have their seat in the kidneys. Only in the marg. of Lv 22⁴ is the literal use found. The lit. sense is common enough in writers of the day and later. Thus Bacon, *Essays*, p. 205, 'Bowling is good for the Stone and Reines'; and Milton, *PL* vi. 346—

'For Spirits, that live throughout
Vital in every part—not, as frail Man,
In entrails, heart or head, liver or reins—
Cannot but by annihilating die.'

'When,' says Driver (*Par. Psalter*, 454), 'it is said of God that he trieth (or seeth) the "hearts and reins" (Ps 7^s, Jer 11²⁰ 17¹⁰ 20¹²), it is implied that He is cognizant of man's emotions and affections, not less than of his thoughts.' See KIDNEYS.

J. HASTINGS.

REKEM (רֶקֶם).—1. One of the five kinglets of Midian who were slain by the Israelites, under Moses, Nu 31⁸ (BA 'Ρόκου), Jos 13²¹ (B 'Ρόβοκ, A 'Ρόκου). Like his companions, he is called in Numbers רֶקֶם ('king'), but in Joshua רֶקֶם ('prince,' 'chieftain'). 2. Eponym of a Calebite family, 1 Ch 2⁴³ (B 'Ρέκου, A 'Ρόκου)⁴⁴ (LXX follows a different reading, B having 'Ιεκάν and A 'Ιεκαάν, a repetition of the name in the preceding clause, which appears in Heb. as *Yorke'am*: see JORKEAM). 3. The eponym of a clan of Machir, 1 Ch 7¹⁵ (AV and RV *Rakem*, but this is simply the pausal form, רֶקֶם, of the Heb.

* To the 15 in the Concordances add 2 Es 5²⁴, Wis 16, 1 Mac 2²⁴, which we have found in the Apocrypha. A few Concord. to the Apoc. are much needed. Cruden gives only one of those three. The S.P.C.K. Concord. is a reprint of Cruden.

name; LXX om.). 4. A city of Benjamin, mentioned with Irpeel and Taralah, Jos 18⁷ (B נאדא, or perhaps om., A Πέκεμ). The site has not been identified.

RELIGION.—For the religion of Israel, see GOD, ISRAEL. It is referred to in AV under the name of 'the Jews' religion' (ὁ Ἰουδαϊσμός) in 2 Mac 8¹ 14³⁸ (nearer the beginning of this verse the same word is tr^d 'Judaism'), as well as in Gal 1¹³, 14, but the thought is rather of the outward forms than the inner spirit. We read also in 2 Mac 6²⁴ of going to a 'strange religion' (εἰς ἀλλοφυλισμόν). Elsewhere in AV the word is used generally of the outward manifestation of religious life, the Gr. words being ἀγνεία (1 Mac 14³⁶ marg.), λατρεία (1 Mac 1⁴ 2¹⁹, 21), and θρησκεία (Ja 1²⁶, 27). This sense of the outward expression attached strongly to the word throughout the time of the English translations of the Bible from Wyclif to AV (though Tind. has 'devocion' in Ja 1²⁶, 27). See Trench's remarks in *Study of Words*, p. 9 f., *English Past and Present*, p. 249 f., and *Select Glossary*, p. 183 f.; and cf. Elyot, *Governour*, ii. 191, 'He therefore nat onely increased within the cite Temples, alters, ceremonies, preestes, and sondry religions, but also . . . he brought all the people of Rome to suche a devocion, or (as I mought saye) a supersticion, that . . . they by the space of xlii yeres (so longe reigned Numa), gave them selfe all as it were to an observance of religion'; and Latimer, *Sermons*, 392, 'For religion, pure religion, I say, standeth not in wearing of a monk's cowl, but in righteousness, justice, and well doing.' J. HASTINGS.

REMALIAH (רמליה; Ρομελίας).—The father of king PEKAH, 2 K 15²⁵, 16¹, 2 Ch 28⁶, Is 7¹⁸ 8⁶. He appears to have been of humble origin, hence the disparaging allusion to Pekah as 'the son of Remaliah' in Is 7⁴ (cf. 1 S 10¹¹ 'the son of Kish'; 2 S 2²⁷, 30 22¹³ 2 S 20¹ 'the son of Jesse'; 1 S 22¹² 'thou son of Ahitub').

REMETH (רמת; B Πέμυας, A Παμάθ).—A town of Issachar, near En-gannim, Jos 19⁴¹; called in 1 Ch 6²⁸ (73) RAMOTH, and in Jos 21²⁹ (possibly by a wrong vocalization) JARMUTH. It appears to be the present village Rámeh, on a hill to the south of the plain of Dothan. See SWP vol. ii. sheet viii.

C. R. CONDER.

REMISSION.—See FORGIVENESS.

REMPHAN.—See REPHAN.

RENDING OF GARMENTS.—See MOURNING.

REPENT, REPENTANCE (μετάνοια, μετάνοια, μετανοεῖν, ἐπιστρέφειν, μεταμέλεισθαι; μετάνοια, ἐπιστροφή).—The usual meaning of μετάνοια (? from an onomatopoeic root signifying to *pant* or *groan*) is to change one's mind or purpose out of pity for those whom one's actions have affected, or because the results of an action have not fulfilled expectation. In this sense repentance is attributed not only to man, but to God (Gn 6⁶, Ex 32¹¹). With reference to sin, μετάνοια is found only in Jer 8⁶ and Job 42⁶. The idea of repentance from sin is in other cases expressed by the verb שׁוּב 'to turn.' Though the change in the direction of the will is here in the foreground, a change in inner disposition is always presupposed. The turning from sin is emphatically a matter of conduct, but it is also a matter of the heart (Jl 2¹²), and it has as its elements enlightenment (Jer 31¹⁰), contrition (Ps 51³), longing for God's forgiveness, and trust in God (Hos 14²). In their direct appeals to the people, the prophets naturally think of repentance in a purely ethical

way as a function of the will: Ezekiel even calls upon them to make themselves a new heart and a new spirit (Ezk 18³¹). But reflexion on the facts of experience quickly leads to the discovery that the will is not the only, or even the main, factor in the case. Behind the will lie the spiritual forces that move it to action, and behind these again, God. Moreover, the new life, which is the positive side of repentance, cannot be called into being by the mere fiat of the will. The spiritual facts and forces, in and through which God is working, thus advance into the foreground, and the prophets are led from the causality of the will to the causality of God, from the ethical to the religious standpoint. God Himself creates the new heart (Ps 51¹⁰, Ezk 36²⁶); His law converts the soul (Ps 19⁷); His people turn when He turns them (Jer 31¹³). In despair of a generation bound by the tradition and habit of evil, Jeremiah looks into the future for some new manifestation of Divine power, which shall effect a radical change in the inner disposition of the people (Jer 31³³).

Beyond a genuine repentance the prophets know of no other condition attaching to God's forgiveness and favour (Dt 30¹⁰, Jer 17⁹, Ps 32²). And the idea of repentance is set up in its moral purity, everything merely external and statutory being stripped away. In primitive Hebrew religion the offender brought a gift to God to appease Him; he fasted, rent his garments, and by an attitude of mourning and humiliation sought to make his prayer for pardon impressive and effectual. But of all this the prophets and psalmists will hear nothing. God does not desire such things (Hos 5⁶, Is 11¹⁸, Jer 6²⁰ 7⁴, 14¹², Ps 50¹⁰). The sacrificial forms with which atonement was associated are ignored as worthless or condemned as noxious (Am 5²², Mic 6⁶, Jer 7³¹, Ps 40⁶ 51¹⁶). The sacrifice pleasing to God is that of a broken and contrite heart (Ps 51¹⁷). No attempt is made by the prophets to take the sacrificial system into the service of a purer faith, whether by a process of moral reinterpretation, or by going back on an original but forgotten meaning. In process of time the system was to some extent ethicised; but its atonement (which presupposed repentance in the transgressor) was available only for sins of inadvertence (Nu 15²⁷, 30). The place of repentance as condition of forgiveness is not due to any idea of its meritorious character. The idea of merit—which never attaches itself to a genuine moral act, but always to some external form or accompaniment—is foreign to the spirit of the OT. If God forgives, it is because it is His nature and prerogative to do so (Is 43²⁵); and that He will not reject the prayer of the penitent is accepted as self-evident to the moral sense.

In the later Judaism the idea of repentance is not indeed lost sight of, but, in Pharasaic circles at least, external acts of penitence, such as fasting, have usurped the place of the inner spirit, and to these acts the idea of merit has attached itself. In the preaching of the Baptist it again emerges in its pristine moral purity, as the one condition of escape from approaching judgment (Mt 3⁸).

There are two words in the NT which convey the idea of repentance, μετανοεῖν and ἐπιστρέφειν, though, as we shall see, the idea appears also under other forms of expression. These words derive their moral content not from Greek but from Jewish and Christian thought, nothing analogous to the biblical conception of repentance and conversion being known to the Greeks. If respect be had to their literal meaning, the first presents repentance in its negative aspect, as a change of mind, a turning from sin; the second, in its positive aspect, as a turning to God. Both have, how-

ever, much the same content of meaning. Christ began His ministry with a call to repentance (Mt 4¹⁷). The call has as its motive the nearness of the kingdom, participation in which requires as its condition the new disposition (Mt 18³). It is addressed, not as in the OT to the nation, but to the individual; and not merely to those guilty of flagrant sin, but to all (Lk 13³). The inner and radical character of the change required is illustrated by the figure of the tree and its fruits. The first four Beatitudes may be taken as descriptive of elements in a true repentance. Poverty of spirit, sorrow for sin, meekness, hunger and thirst for righteousness, are all characteristics of the soul that is turning from sin to God. In the parable of the Prodigal Son, Jesus draws a picture of the true penitent. Such is assured of the forgiveness and welcome of the Father, whose love, indeed, has anticipated his return, and gone out to seek and save (Lk 15⁴). That God accepts the penitent follows at once from His own nature, and from the moral appropriateness of a humble and contrite spirit. The Father cannot but rejoice over the recovery of a lost son (Lk 15²⁴); and the spirit of the publican in the temple as plainly carries with it justification as the spirit of the Pharisee condemnation (Lk 18⁴). Of fasting or other external accompaniments Christ knows nothing.

Although Christ began His ministry with the call to repentance, it cannot be said that it appears in His teaching as the fundamental requirement. Exhibiting the righteousness of the kingdom of God, and revealing the love of the heavenly Father, He requires rather *faith* in His message, leaving the particular form of the response to be determined in correspondence with each man's character and history. Repentance accordingly falls into the background before the wider idea of faith (Lk 7⁵⁰). In the apostolic speeches in Acts, and in the Apocalypse, repentance most frequently appears in its ethical sense; but side by side with this use we have that which treats it as a result of Divine activity—an experience rather than an act (Ac 3¹⁹). In the latter case the idea of repentance passes into that of conversion (*ἐπιστρέφειν*, the *conversio intransitiva* of theologians as distinguished from *conversio transitive*), the ethical activity of the individual being subordinated to the Divine causality. The problem of the relation of the two sides, which exercised the Church later, giving rise to such conceptions as *virtus indeclinabiliter et insuperabiliter, gratia cooperans*, etc., is not raised in the New Testament.

In the Pauline Epistles repentance is considered more as an experience than as an act, and this experience is described in a manner peculiar to the apostle as a death and resurrection with Christ, or as a putting off of the old man and a putting on of the new. The believer is buried with Christ in baptism, and raised with Him into a new life in the Spirit (Ro 6²⁻⁴, Col 2¹²). The result of this new creation is a new walk and conversation; sin is in its principle destroyed. In this profound conception, which also gives its content to the apostle's idea of faith, the place of Christ in the experience of conversion, together with a certain mystical element in that experience, comes to expression.

The word 'repent' does not once occur in the Johannine writings, having dropped even from the Baptist's preaching. The idea is not, however, absent, but appears under the form of the new birth, which takes the place of the Synoptic *μετάνοια* as the condition of entrance into the kingdom (Jn 3³). The causality of the will here wholly disappears, together with those psychological elements characteristic of repentance as a process of turning, and the new life stands out as the result

of a transcendent and mysterious act of God's creative power (Jn 3³). The natural and the supernatural, the fleshly and the spiritual, are opposed in a way that excludes all mere renewal, or any transition from the old life to the new. The human and ethical side, however, finds expression in the idea of faith, which here, as in the NT in general, implies an active turning from sin to God (Jn 4⁷, 9²⁸, 1 Jn 1⁸).

W. MORGAN.

REPHAEL (רפאֵל 'El has healed'; LXX 'Ραφαήλ, cf. RAPHAEL of To 3¹⁷ 5⁴⁰).—The eponym of a family of gatekeepers, 1 Ch 26⁷. The name belongs to a class of late formations; see Gray, *HPN* 225, 311.

REPHAH (רפח; 'Ράφη).—The eponym of an Ephraimite family, 1 Ch 7²⁵.

REPHAIHAH (רפחיה 'Jah has healed,' cf. *Raphael*).—1. A Judahite mentioned in the royal genealogy, 1 Ch 3²¹ (B 'Ραφάι, A 'Ραφάιδ). 2. One of the chiefs of the 500 Simeonites who went on the expedition to Mt. Seir, 1 Ch 4⁴³ ('Ραφάιδ). 3. A descendant of Issachar, 1 Ch 7² (B 'Ραφαρά, A 'Ραφάιδ). 4. A descendant of Saul, 1 Ch 9⁴³ ('Ραφάιδ), called in 8³⁷ RAPHAH (B 'Ραφαί, A 'Ραφάιδ). 5. One of those who helped to repair the wall, Neh 3³ ('Ραφάιδ).

REPHAIM (רפאים; ῥήγαντες, Ραφαῖμ, 'Ραφαῖν [Dt 2¹¹, 20, Jos 15⁵, 2 K 23²²]).—The word used in Hebrew to describe the early giant peoples of Palestine. Many regard *rāphā* as a proper name, forming the gentilic adjective *rēphā'i*, of which *rēphā'im* is the plural. It is more in accord with the use of the word, however, to regard *rāphā* as a concrete noun, and *rēphā'im* as the direct plural either of this or of the corresponding abstract noun. It is used as the geographical name of a certain valley (see next art.). In Gn 14⁸ the syntax indicates that it is a proper name, definite without the article. The statement is strictly that 'they smote Rephaim,' that is, they smote a region of that name, the region, of course, being so named from the character of its inhabitants. Everywhere else the word is strictly a common noun, definite or indefinite as the case may be, substantially equivalent to our English word 'giants.' For the derivation of this meaning from the stem idea, and for an account of the *rēphā'im*, see GIANT.

The word *rēphā'im* is also used to denote the inhabitants of the world of the dead (Job 26⁵, Ps 88¹⁰, Pr 2¹⁸ 9¹⁸ 21¹⁶, Is 14⁹ 26¹⁴⁻¹⁹), being here nearly the equivalent of the English word 'ghosts,' in the popular sense of that word. *Rēphā'im* in the sense of ghosts is used only in the plural, and, like *rēphā'im* in the sense of giants, has the ordinary syntax of a common noun, definite or indefinite. The two are from the same stem. Schwally (*Leben nach dem Tode*, 64 f.) supposes a connexion between *רפאים* 'ghosts' and *רפח* 'extinct giants.' W. R. Smith (quoted by Driver, *Deut.* p. 40) suggests that the 'old giants were still thought to haunt the ruins and deserts of East Canaan'; see also Schwally in *ZATW*, 1898, p. 132 ff.

W. J. BEECHER.

REPHAIM, VALE OF (רפאים; Κοιλὰς Ραφαῖμ, κ. τῶν Τιτάνων, κ. τῶν γιγάντων, Ἐμεκ Ραφαῖν, φάραγξ στερὰ).—A locality near Jerusalem. The Hebrew word here used for valley denotes an arable valley. So we may at once dismiss all theories that would make it either a plateau or a steep-sided ravine; though it is quite possible that it may have been a system of arable valleys, rather than a single

valley. Different opinions have been held concerning it, but really the evidence all bears in one direction. The northern extremity of the vale of Rephaim was just over the western ridge of the upper part of the ravine of the son of Hinnom (Jos 15^{8,9} 18¹⁶). Josephus (*Ant.* VII. xii. 4) says that it was 'the valley which extends to the city of Bethlehem, which is twenty furlongs from Jerusalem.' It is puzzling to know how he measures his twenty furlongs; but that Bethlehem had strategic relations with the vale of Rephaim is confirmed by 2 S 23¹³, 1 Ch 11¹⁵. This is not in contradiction with the statement that David, getting to the rear of the Philistines when they were encamped in the vale of Rephaim, 'smote them from Geba until thou come to Gezer' (2 S 5²⁵, 1 Ch 14¹⁶); for the effect of his strategic movement might be to compel them to move from their camp and attack him; or, while encamped to the south-west of Jerusalem, they might have had outposts as far north as Geba or Gibeon.

But the sacred writer evidently thought of the vale of Rephaim as somewhat extensive, for he twice says that the Philistines spread themselves there (2 S 5^{18,22}, 1 Ch 14^{9,13}). Hence the locality referred to is probably the system of small valleys which supply the southern affluent of the Nahr Rûbîn, a stream which flows into the Mediterranean some distance south of Joppa. One branch of this affluent starts near Jerusalem and another near Bethlehem, the two uniting about three miles south-west of Jerusalem. The vale of Rephaim may well be these two, with their tributaries. It was natural that invading Philistine armies should march up the valley of the Nahr Rûbîn to attack Jerusalem.

The name doubtless indicates that this region had been occupied especially by *rephā'im*, at some period before Joshua's conquests. Its celebrity is mainly connected with events that occurred soon after David had been made king of all Israel in Jerusalem. In two successive campaigns the Philistines attacked him here, and were defeated (2 S 5¹⁷⁻²¹, 1 Ch 14⁸⁻¹² and 2 S 5²²⁻²⁵, 1 Ch 14¹³⁻¹⁶). The first of these two campaigns was of the most desperate character (2 S 23¹³⁻¹⁷, 1 Ch 11¹⁵⁻¹⁹). See G. A. Smith, *HGHL* p. 218. W. J. BEECHER.

REPHAN (LXX BA *Ῥαφαν*, Q *Ῥεφαν*, in Am 5²⁶; WH *Ῥουφά*, variants *Ῥεφάμ*, *Ῥεφάρ* [AV *Remphan*], *Ῥαφάρ*, *Ῥεφάρ*, in Ac 7⁴⁵).—This word replaces the *רפא* of the Heb. text, and there is much difference of opinion as to the reason of this change. Influenced by the fact that the LXX tr. was made at Alexandria in Egypt, some have contended that the translators substituted for the word *Chiun* (apparently pronounced by them, more correctly, *Kewan*), the meaning of which was probably obscure to them, an Egyptian equivalent term, viz. *repa*-[*n-neteru*], a title of the god Set, identified with Saturn; but this, besides being a hardly probable hypothesis itself, is also unlikely on account of the etymological difficulties involved. The general opinion at present is, that *Rephan* is simply a mistake for, or an alteration of, the *Kewan* (*Chiun*) of the Heb. text, *K* having been replaced by *R*, and *ph* (*φ*) substituted for *ν*, with the sound of *v*, sharpened to something resembling *f*. There is no doubt that this is the best of all the explanations proposed, for *Kewan* would seem to be nothing else but the Semitic-Babylonian *Kaawanu*, for an older *Kaya-wanu*, 'the planet Saturn.' That a Babylonian etymology is to be sought rather than any other, may be regarded as indicated by the fact that *SICCUTH* in the first part of the verse is apparently from the Akkad. *Sakktu* or *Sak-uš*, the latter being one of the non-Semitic names of Saturn, translated

by *Kaawanu* in Babylonian. In addition to this, Saturn was also called *Salam*, *Salme*, as 'the dark star,' a name which recalls the expression *שָׁלֵמָה*, 'your images,' which, in the Heb., immediately follows *Chiun* (= *Kaawanu* = *Rephan*), and would furnish a parallel to the translation of *שִׁלְכָם* ('your king') after *Siccuth*, by 'Moloch' in the LXX. As has been already shown (see NIMROD, NISROCH, etc.), the Hebrew scribes were accustomed to distort the names of heathen deities, apparently to show their contempt for them, and there is but little doubt that this has been done in the present case. No name resembling *Rephan* or *Remphan* as the pronunciation of the ideographs for Saturn has as yet been found in Akkadian or Semitic-Babylonian.

LITERATURE.—Schrader in *SK*, 1874, pp. 324-335, and in Biehlm's *HWB*; Delitzsch in the *Catena Biblicarum*, under 'Chiun,' and in *Assyr. HWB* 569^b (end of art. 'Salmu'); and the Comm. on Amos and Acts. T. G. PINCHES.

REPHIDIM (רִפְדִּים; LXX *Ῥαφιδίμ*, Eus. *Ῥαφιδίμ*; Vulg. *Raphidim*).—A station between the wilderness of Sin and the wilderness of Sinai (cf. Ex 17¹ with 19²). The same order is given in the itinerary of Nu 33; but two additional stations are there given, Dophkah and Alush (vv. 12-14), between Sin and Rephidim. These are the only passages in which the name occurs, and from them it appears that Rephidim is outside the wilderness of Sinai, and that the people, when encamped there, have not yet reached the mount of God.

The events recorded in connexion with this place are: (1) the people strive (רָצוּ) with Moses and 'tempt' (i.e. prove, נָסוּ) the LORD because there is no water to drink (Ex 17¹⁻⁷); (2) the defeat of Amalek (vv. 8-16); (3) the visit of Jethro when he counsels Moses about appointing judges (Ex 18). The first two are expressly, the third may be by inference (cf. 19²), assigned to Rephidim.

Now, in the account of the first event, the smitten rock is described as being in Horeb ('I will stand before thee upon the rock in Horeb,' Ex 17⁶). Also in 18¹ Jethro comes to Moses 'where he was encamped at the mount of God.' According to internal evidence in both these narratives, the people are already at Horeb the mount of God, and the difficulty of harmonizing these statements with those introduced with reference to the situation of Rephidim is apparent.

The first of these events has been discussed in the art. MERIBAH, where the similarity between it and another event (Nu 20¹⁻¹³) assigned to a period after leaving Sinai is pointed out. In the account of the third event, the description of the persons appointed, on Jethro's advice, to assist Moses in judging the people, resembles that in Dt 1⁹⁻¹⁷ (note especially the verbal coincidences of Ex 18²¹ with Dt 1¹⁵). In Deuteronomy the appointment is said to have been made at the departure from Sinai—at which time the reference to ordinances and laws (Ex 18²⁰) would be appropriate, and it has been suggested that Ex 18 was at one time read in connexion with Nu 10²⁹⁻³³ (see Driver on Dt 1, at p. 15 of *Intern. Crit. Comm.*, and Dillmann on Ex 18). These remarks illustrate what has been said in art. EXODUS AND JOURNEY TO CANAAN, vol. i. p. 804^b and 805^a.

The foe which Israel encounters in Rephidim is Amalek, a tribe which is generally described in Scripture as dwelling on the southern border of Palestine though occasionally found farther north (see AMALEK). Supposing that the Israelites on leaving Egypt went eastwards, they would pass by the territory which is ordinarily assigned to Amalek, whereas if they made the detour to the south, involved in visiting the traditional Sinai, the Amalekites must have wandered much farther

to the south. A question here arises similar to that suggested by the mention of Midian, in connexion with Sinai, and considerably strengthens the argument in the note on the art. MIDIAN. Comparing that note with what is here said, it follows that the acceptance of the traditional site of Sinai involves *two* hypotheses of migration (one for Amalek as well as one for Midian), while the site there suggested for Sinai assigns a uniform geographical position for both. See also art. PARAN.

A. T. CHAPMAN.

REPROBATE.—The word 'reprobate' occurs only once in AV of OT, viz. Jer 6¹⁰ (RV 'refuse'). It there represents the Heb. צָרַף, and is used in connexion with the figure of smelting or refining metal. People who are incurably bad, from whom no discipline, however severe, can smelt out the badness, are compared to base metal which can only be thrown away. The assonance of the Heb. (צָרַף . . . צָרַף) is preserved in LXX (ἀργύριον ἀποδοκιμασμένον . . . διὰ ἀποδοκίμασεν αὐτοὺς κύριος), but lost in Vulg. (*argentum reprobum . . . quia projecit*). It is from the Vulg. that the rendering 'reprobate' comes, the Greek equivalent of which is found in a similar passage in Is 1², describing the degeneracy of Israel: τὸ ἀργύριον ὑμῶν ἀδόκιμον = 'your silver is not proof,' cannot stand the test (AV 'is become dross,' which exactly reproduces Heb.). In this place Vulg. also gives *argentum tuum versum est in scoriā*. In both cases people are regarded as 'reprobate,' or unable to pass muster in God's judgment, not in virtue of an eternal decree of reprobation, but as having reached a last and hopeless degree of moral debasement. It is the same with the use of ἀδόκιμος in NT. This is usually rendered 'reprobate,' and is always passive. The most instructive instance is perhaps Ro 1²⁸ 'As they did not think fit on trial made (οὐκ ἐδοκίμασαν) to keep God in their knowledge, God gave them up to a reprobate mind' (εἰς νοῦν ἀδόκιμον). This means a mind of which God can by no means approve, one which can only be rejected when it comes into judgment. The marg. of AV ('void of judgment') brings out in accordance with the context *why* the νοῦς is ἀδόκιμος: the mind which God rejects is one whose moral instincts are perverted, and which does not serve the purpose of a moral intelligence any longer; but this is not what the term ἀδόκιμος itself expresses. It might be thought that there was here a more active relation of God to the state in question than is found in Isaiah and Jeremiah, but that is doubtful. There is no doom-ing of men *ab initio* to reprobation; under God's government, and in the carrying out of His sentence on sin, evil works itself out to this hopeless end. The simple passive sense of the word is apparent also in the three instances in 2 Co 13⁵⁻⁷. The test of true Christianity is that Christ is in men; those who can stand this are δοκιμοί ('approved'); those who cannot are ἀδόκιμοι ('reprobate'). Here the test is to be applied by Christians to themselves; in 1 Co 9²⁷ (where AV renders ἀδόκιμος 'castaway' and RV 'rejected') the final judgment by God is in view; St. Paul subjects himself to the severest discipline that he may not at the last day be unable to stand trial. It would have been an advantage for some reasons to keep the rendering 'reprobate' here also.

The relations in which one is ἀδόκιμος, or the trials which he cannot stand, may be variously conceived. Thus in 2 Ti 3⁸ we have 'reprobate concerning the faith.' The men who are thus characterized are described also as κατεφθαρμένοι τὸν νοῦν. This expression unites in itself what we distinguish as ethical and intellectual elements. The men in question are men whose moral sense is perverted, and whose minds are clouded with speculations of their own; when they are brought into relation to 'the faith' (which in the Pastoral Epp.

includes something like the Christian creed as well as the Christian religion) they are ἀδόκιμοι—cannot stand the trial. Similarly in Tit 1⁸ when certain persons are described as πρὸς πᾶν ἔργον ἀγαθὸν ἀδόκιμοι the meaning is: put them to the test of any good work (as distinct from fine profession) and they can only be rejected. The same sense results from the only other passage in NT, He 6⁸. The soil which receives every care from God and man, and yet produces only thorns and briars, is ἀδόκιμος. It is rejected as useless for cultivation.

Taken together, these passages support the idea that men may sink into a condition in which even God despairs of them—a condition in which He can do nothing but reprobate or reject them. But they do not support the conception of an eternal decree of reprobation in which the destiny of man is related solely to the will of God. No one who claims to hold this view will ever admit that another can state it without caricature, but it may be given in Calvin's words (*Inst.* III. xxii. 11): 'Si non possumus rationem assignare cur suos misericordia dignetur, nisi quoniam illi illi placet, neque etiam in aliis reprobandis aliud habebimus quam ejus voluntatem.' Apart from the speculative objection that if salvation and reprobation are related in exactly the same way to the will of God there is no difference between them, all the distinctions of the human world being lost in the identity of the Divine, it is obvious that this presents a conception of reprobation remote from that suggested by Scripture. Nor can it be said that the Calvinistic doctrine of reprobation is a necessary inference from the true doctrine of election. The true doctrine of election is experimental. It expresses the truth (which every Christian knows to be true) that it is God who saves, and that when He saves it is not by accident, or to reward human merit, but in virtue of His being what He is—a God who is eternally and unchangeably Redeemer. But while the Christian can say out of his experience that God in His infinite love has come to him, and made sure to him a redeeming mercy that is older than the world, faithful and eternal as God Himself, no one can say out of his experience that God has come to him and made sure to him that in that love he has neither part nor lot. In other words, election has an experimental basis, but reprobation has not. It is true that men are saved because God saves them—true to experience as to Scripture; but it is not true to experience that men are lost because God ignores or rejects them. The form in which the truth is put may be inadequate even in the case of election; but in the case of what is called reprobation there is no verifiable truth at all. For older theological opinion on this subject see Calvin, *Inst.* III. chs. xxi.-xxiii.; Hill, *Lectures in Divinity*, iii. 41 f.; Hodge, *Systematic Theology*, ii. 320 f. See also ELECTION, PREDESTINATION.

J. DENNEY.

REPROOF, REPROVE.—The verb (from Lat. *reprobare* through Old Fr. *reprover*) means—1. *To disapprove of, reject*, as in Ps 118²² Wyc. (1388) 'The stoon which the bilderis repreuden'; Mk 8³¹ Tind. 'And he beganne to teache them, how that the sonne of man must suffre many thinges, and shuld be reproved of the elders, and of the hye prestes and scribes.' There is no example of this meaning in AV. 2. *To disprove, refute*, as Shaks. *Venus*, 787—

'What have you urged that I cannot reprove?

and *II Henry VI.* III. i. 40—

'Reprove my allegation, if you can;
Or else conclude my words effectual.'

Of this meaning there are probably some examples in AV, as Job 6²⁸ 'How forcible are right words!

but what doth your arguing reprove?' Is 37⁴ 'It may be the Lord thy God will hear the words of Rabshakeh . . . and will reprove the words which the Lord thy God hath heard,' though in these and other like places *Oxf. Heb. Lex.* takes the meaning to be simply 'rebuke.' 3. To convict, as Jer. Taylor, *Great Exemplar*, Pref. p. 14, 'God hath never been deficient, but hath to all men that believe him given sufficient to confirm them; to those few that believed not, sufficient to reprove them.' So in AV, Jn 16⁸ 'He will reprove the world of sin' (Wyc. 'repreuve,' Tind. 'rebuke,' Gen. 'reprove,' Gen. marg. 'convince,' AVm 'convince,' RV 'convict'); cf. Jn 8⁴⁶ Wyc. 'Who of you schal repreuve me of synne?' (Tind. 'can rebuke,' AV 'convinceth,' RV 'convicteth'); 2 Ti 4² 'Reprove, rebuke, exhort with all long-suffering and doctrine.' 4. To chide, rebuke, the mod. meaning, as Pr 9⁸ 'Reprove not a scorner, lest he hate thee: rebuke a wise man, and he will love thee.'

Reproof is used mostly in the sense of *rebuke*, but there is a possible example of *conviction* in 2 Ti 3¹⁶ ('profitable for doctrine, for reproof [ὑποκατάστασις], for correction, for instruction in righteousness'); and a probable example of *disproof*, *refutation* in Ps 38¹⁴ ('Thus I was as a man that heareth not, and in whose mouth are no reproofs'; RVm 'arguments'). J. HASTINGS.

REPTILE.—See NATURAL HISTORY in vol. iii. p. 492.

REQUIRE.—Sometimes in AV as in mod. English to 'require' is to *demand*, as 1 S 21⁸ 'The king's business required haste': cf. Mk 5⁷ Tind. 'I requyre the in the name of God that thou torment me not.' This is especially the case in the freq. phrase of requiring one, or one's blood, at another's hand; cf. Bar 6³⁸ Cov. 'Though a man make a vow unto them [the idols] and kepe it not, they will not requyre it.' But the sense of *demand* does not lie, as now, in the verb itself, but in the context. To require (from Lat. *requirere* through Old Fr. *requerir*) is first to seek after, and then to request or entreat. It may be used to translate a verb of demanding, as Driver (*Par. Psalter*, 480) suggests that in Ps 40⁶ 51⁶ it may perhaps correspond to Münster's *postulavi* and *exigis*,* but of all the Heb. and Gr. words it is used to tr. in AV there is none that means more than *seek after* or *ask*. That it means no more than *ask* or *entreat* in some places is evident, as Ezr 8²² 'I was ashamed to require of the king a band of soldiers' (RV 'ask'). Cf. Tindale, *Expos.* 151, 'He giveth abundantly unto them that require it [mercy] with a faithful heart.' Cov. after rendering 'Gedeon sayde unto them, One thinge I desyre of you, every man geve me the earinge that he hath spoyled' (Jg 8²⁴), adds, 'And the golden earynges which he requyred' (8²⁵). Cf. Berners, *Froissart*, ch. ix. 'Then the queen was greatly abashed, and required him all weeping of his good counsel,' and Chapman, *Odysseys*, xx. 215—

'For she required
His wants, and will'd him all things he desired.'

Knox frequently speaks of requiring a thing *humbly*, as *Hist.* 199, 'We required your Highnesse in most humble manner'; so Calderwood, *Hist.* 145, 'I protest and most humbly require,' and *Psalms in Metre*, Ps 143—

'O hear my prayer, Lord,
And unto my desire
To bow thine ear accord,
I humbly thee require';

* Only once is *exigere* used in Vulg. (Gn 31³⁰) to express 'require at the hand of,' elsewhere *querere* or *requirere* nearly always.

and the end of *A Dialog betweene Christ and a Sinner*, by William Hunnis—

'Sinner—Through this sweet grace thy mercie, Lord,
We humble doo require.
Christ—By mercie mine I you forgive,
And grant this your desire.'

J. HASTINGS.

REWARD.—The 'reward,' i.e. rearguard, was the last of the three main divisions of an army, the 'vanguard' (= *avant-garde*) or 'fore-front' being the first. The word comes from Old Fr. *arereuarde*, i.e. *arere* (mod. *arrière*) 'behind' (from Lat. *ad-retro*) and *uarde*, a variety of Old Fr. *garde* (which came from Old High Ger. *warten* to watch over). RV retains the word in all its occurrences (Nu 10²³, Jos 6⁹, 1 S 29², Is 52¹² 58⁹) but spells it 'rearward.' It is always spelt 'rere-ward' (sometimes with a hyphen) in AV, and it is always a substantive. Cf. Hakluyt, *Voyages*, ii. 20, 'Because . . . it was bootlesse for them to assaile the forefront of our battell . . . they determined to set upon our rereward.' Berners (*Froissart*, p. 376, Globe ed.) uses 'rearband' in the same sense: 'The Bishop of Durham with the rearband came to Newcastle and supplied.' J. HASTINGS.

RESAIA (Ῥεσαία, AV Reesnia), 1 Es 5⁸, corresponds to Reelaiah, Ezr 2², or Raamiah, Neh 7⁷. **ΠΕΘΑΙΑ** has apparently been read as **ΠΕΘΑΙΑ**.

RESEN (Ῥεση; AD Ῥάση, E Ῥάση; Vulg. *Resen*).—The last of the four cities built by Asshur (RV by Nimrod), between Nineveh and Calah (the modern Nimroud), and further described in Gn 10¹² as 'the great city' (RV). Various conjectures have been made as to the position of this settlement. The Byzantine authors and Ptolemy identified it with Rhesina or Rhesaina on the Khabour, probably the Arab. *Ras el-Ain*—an impossible identification, this site being 200 miles W. of the two cities between which Resen is said to have lain. A better identification is that of Bochart, which makes Resen to be the Larissa of Xenophon (*Anab.* iii. 4), though whether, as he argues, 'Larissa' be an adaptation of 'Laresen,' i.e. 'Resen's (ruins),' is a matter of doubt. It is worthy of note that Xenophon describes Larissa, like Resen in Gn 10¹², as 'a great city.' The identification of the name, however, and that of the site, are two different things. On the one hand, there is the possibility, maintained by some, that Larissa may be Nimroud (Calah), and, on the other, the probability that the ruins described by Xenophon—and the city Resen—may be represented by the remains known as Selamieh, an ancient site situated about three miles N. of Nimroud, and between that city and the mounds of Nineveh (Kouyunjik). These remains have the advantage of being situated in the tract where, according to Gn 10¹², Resen really lay. As Sayce has pointed out, the name of Resen occurs, under the form *Rês-êni*, in a list of 18 cities or small towns from which Sennacherib dug canals communicating with the river Khosher or Khosr, in order to supply them with drinking-water. Whether this be the Resen of Genesis or not is uncertain,—in all probability it was a comparatively unimportant place, and situated too far north. Moreover, such a name as *Rês-êni*, 'fountain-head,' must have been far from rare in ancient Assyria, as is *Ras el-ain* in countries where Arabic is spoken at the present day. The Greek forms are apparently corrupt, and due to the likeness between ῤ and Ὶ.

LITERATURE.—Bochart, *Geograph. Sacr.* iv. 23; Delitzsch, *Paradies* 261; Schrader, *COT* i. 83; Sayce in the *Academy* for 1st May 1880.

T. G. PINCHES.

RESH (ר).—The twentieth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 20th part, each verse of which begins with this letter. It is transliterated in this Dictionary by *r*.

RESHEPH (רשף; B Σάραφ, A Πάρεφ).—The eponym of an Ephraimite family, 1 Ch 7²².

RESPECT OF PERSONS.—See **ACCEPT**, vol. i. p. 21.

REST.—In the Scriptures rest is ascribed to God, and also to man in a variety of aspects; and the underlying conception in each case is the necessary relation of the rest of man to that of God.

1. At the close of His creative activity God rested, it is said, from all His work which He had made (Gn 2² נָחַשׁ [see **SABBATH**, *ad init.*], usually rendered in LXX by *καταπαύειν*, but sometimes by *ἀναπαύειν*). This implies the twofold thought that creation, with all that the creative process involved, was completed once for all, and that God was satisfied with the work at that stage accomplished. But this assertion of rest on the part of God contains no denial of subsequent action, no theory as to such action, and is consistent with ceaseless activity (Jn 5¹⁷, cf. Th. Aquin. *Summ. Theol.* Qu. 73. 2). The apparent silence or inactivity (נָחַשׁ) on the part of God in presence of the impiety of men is the rest of One who is watchful and will strike at the fitting time (Is 18⁴).

2. The rest (נוח, נִחוּתָא) promised by J^r the covenant-God to the people of Israel is the rest of a settled dwelling-place. But the rest of the people in this case is coincident with the rest of God; for with the permanent settlement of the ark by a man of rest (1 Ch 22²) God is represented as entering into His rest and the people into theirs, which is also His (2 Ch 6⁴, Ps 132^{8, 14}). Into this rest some did not enter because of disobedience (Ps 95¹¹, He 4⁹).

3. In addition to this national rest, a rest of a more spiritual and individual character is spoken of. To Moses the promise of the Divine presence with a settled abode as a goal is the guarantee of rest (Ex 33¹⁴). Jeremiah offers it (נָחַשׁ) to his countrymen on condition of their walking in the eternal paths (Jer 6¹⁶), in harmony with the will of God given of old (cf. Is 28¹², where we find נָחַשׁ || נִחוּתָא). Those who do so are by a kindred word described as the quiet or restful ones (Ps 35²⁰). Because obedience to the will of God is the secret of rest, it cannot be possessed by the unrighteous, whose normal condition is a restlessness like that of the waves of the sea (Is 57²⁰).

4. To men worn out with worrying toils and struggling under burdens too heavy for them (the immediate reference being probably to the Pharisaic burdens), Christ promised rest (Mt 11²⁸⁻³⁰). It is His own rest that He offers to those who with a meek and lowly heart recognize the will of His Father as the law of the inner life, and take His yoke upon themselves. It is not a rest *from* toil but *in* toil (Jn 5¹⁷), not the rest of inactivity but of the harmonious working of all faculties and affections—of will, heart, imagination, conscience—because each has found in God the ideal sphere for its satisfaction and development.

5. The teaching of Scripture as to future rest is most explicitly set forth in He 4¹⁻¹¹ and Rev 14¹³. Taking up the creative rest of God (נָחַשׁ) along with the rest referred to in Ps 95¹¹ (נִחוּתָא) (both words being rendered in LXX *καταπαύειν*), the author of the Ep. to the Hebrews argues thus: God rested at the creation of the world, and subsequently promised to Israel the rest of a settled abode. That something more than an external rest was,

however, implied, is proved by the fact that at a later period He swore that they should not enter into His rest. As that promise still held good and was yet unfulfilled, a Sabbath rest (σαββατισμός) to the people of God remained (He 4⁹), which had been unappropriated or only partially appropriated by the past. Into that rest believers now enter (He 4⁹); but because it is the very rest of God Himself (He 4¹⁰), its full fruition is yet to come. The rest of the blessed dead is not merely the rest of the grave (Job 3^{12, 17}), it is a rest from toils (ἐκ τῶν κόπων, Rev 14¹³), but not from work, a rest only 'from sorrow and trouble and hard service' (Is 14³). In all these forms of rest God and man are indissolubly related. The rest of God the Creator is set forth as the condition and type of the rest of man. The rest of J^r is one with that of His people. The rest offered to men by Christ is His own rest, which is also that of His Father. The blessed rest of man is rest in God, with God, nay, the very rest of God. See, also, **SABBATH**, p 317.

JOHN PATRICK.

RESTITUTION.—See **CRIMES** and next article.

RESTORATION in RV corresponds to 'restitution' in AV, as rendering of the noun *apokatastasis*, which occurs but once in the NT, Ac 3²¹ ἀποκατάστασις τῶν πάντων. The times spoken of by the prophets are here described as times of restoration, when Christ shall reign over a kingdom in which none of the consequences of sin will any longer appear. The same word in its verbal form occurs in Mt 17¹¹ and in the LXX of Mal 4⁶ of the moral restoration or spiritual revolution inaugurated or attempted by John the Baptist. This restoration was a foreshadowing of the true *apokatastasis*, which is to be realized in the case of all who will recognize the authority of the Messiah and become members of His kingdom. The word *palingenesis* (παλιγγενεσία) is used by our Lord, Mt 19²⁸, in precisely the same sense of the restoration of the whole creation. The subject of the new genesis comes under the influence of the transforming power of the Holy Spirit by which he is renewed day by day. See Trench, *Synonyms of the NT* 10, p. 65. The word is also used by Josephus, *Ant.* xi. iii. 9, of the restoration of the country of the Jews under Zerubbabel. It became a favourite term in later Jewish Apocalyptic writings, and was no doubt in common use in the Jewish Apocalypses current in the time of our Lord. That the word should be employed in the Hebrew Gospel of Matthew and not in the writings of the other evangelists is natural enough, so that there is no need of the hypothesis of interpolation, nor yet of the assumption of any particular Jewish-Christian sources. The prophecy of Caiaphas (Jn 11⁵¹) supposes the offer of the Saviour's salvation to all,—it may be in another state of existence to those who have not had it here,—but not necessarily its acceptance by all. Among the words of Jesus which seem to favour the restorationist view may be mentioned Jn 12³², where, however, the lifting up, like that of Jn 3¹⁴, effects a *drawing*, which secures salvation only for those who look or believe. It has been maintained, e.g. by Pfeiderer (*Paulinism*, i. 274-276), that the idea of a restitution in the sense of a literal restoration of all things is taught by St. Paul in Ro 11²² and 1 Co 15²². But in these passages St. Paul simply insists upon this, that only believers shall share in that perfected kingdom of God in which God is all in all. It might, of course, be argued, if the general scope of Divine revelation would allow of it, that the believers who shall share in those

blessings will at last be found to embrace all mankind. But it cannot be said that these passages contribute any evidence for or against that view. See Weiss, *Biblical Theology of NT*, ii. 73. Such biblical passages were understood by Clement of Alexandria, Origen, Gregory Nazianzen, Gregory of Nyssa, even by Chrysostom (see *Homily* on 1 Co 15²⁸) and other Fathers, by Erigena, most of the mystics and theosophists, as they have been in modern times by Schleiermacher, Erskine of Linlathen, Maurice, Farrar, etc., not as teaching absolutely the final salvation of all men, but as pointing to the ultimate restoration of all as at least a possibility.

In the Pastoral Epistles there are three very interesting passages, 1 Ti 2⁴, Tit 2¹⁰, in which God's saving will is described as universal. This, however, is the will of God concerning men who are themselves possessors of a will, which may resist and reject as well as accept what the gracious will of God has designed for them. The same explanation must be given of Eph 1¹⁰, Col 1²⁰, which represent the gathering into one and reconciling of all as the purpose and good pleasure of God. This Divine plan is realized only in Christ, and applies therefore only to those who are in Christ. What is taken into account here is only God's purpose, and not what is actually realized in the world of human freedom. The whole scope of Scripture shows that the realization of the Divine will regarding man is conditioned by man's voluntary acceptance of the terms proposed. The universal purpose of God is well described by Martensen as 'an *ἀνοικαρδία* a parte ante' which has its development as an *ἀνοικαρδία* a parte post, under condition of man's free will, only when the possibility of eternal condemnation has been confessed. He would regard the opposition of biblical passages, on the one hand seemingly universalist, on the other hand seemingly in favour of eternal retribution, as an antinomy like that of freedom and predestination.

It is now generally admitted by the best exegetes of all schools that the doctrine of the restoration of all cannot be supported by NT texts. The ablest and most candid advocates of this theory seek to ground their position on what they regard as necessary conclusions as to the nature and character of God, or on psychological and ethical doctrines of the constitution and destiny of man.

J. MACPHERSON.

RESURRECTION. — *Introductory.* — The NT subst. *ἀνάστασις* from which, through Vulg., we obtain the term 'resurrection,' gives, so far as its strict sense goes, an incomplete account of the Biblical doctrine. The essential idea is restoration of life in its fulness to a person whose existence has not been absolutely cut off, but so mutilated and attenuated as to be unworthy to be described as life. The name 'resurrection' given to this act of God is drawn from the fact which immediately struck the eye in cases where renewal of life took place. The rising up of the body (*ἀνάστη*, 2 K 13²¹ LXX) is taken as the symbol of the whole fact. But the essential matter is the renewal of life, hence in Rabbinic *חַיָּה* (revival) is more frequent than *קִיּוּם* (resurrection). See Buxtorf, s.v., who says that some distinguished the former as the proper word to be used of the resurrection of the righteous. Delitzsch in his Hebrew NT frequently

renders *ἀνάστασις* by *חַיָּה*. Cf. the use of *ζωοποιεῖν* in Jn 5²¹ and elsewhere. In LXX cf. *ζωοποιεῖν* (only in Ezr 9⁸⁻⁹) used of revival of the nation.

The development of the Biblical doctrine of resurrection starts from a previous belief that death was not the end of existence but was the end of life, a distinction which it is difficult for modern thought to apprehend. This was itself the result of the fusion of two opposing beliefs, as has been ably shown by Charles (*Eschatology*, chas. i.-iii.). On the one side there were survivals of a primitive belief, common to the Hebrews with other nations, according to which the dead were not mere shades, but still active and powerful. On the other side was the teaching of Gn 27, that the soul was but the result of the indwelling of the Divine Spirit in the earthly body; leading logically to the conclusion that the withdrawal of the spirit at death must involve the break up of the existence of the individual. But this latter conclusion was not generally adopted, and with certain exceptions (Ec 3²⁰⁻²¹) the soul was believed to persist or subsist after the breath of life had been withdrawn. The question before us, therefore, is not that of the immortality of the soul, which in some form or other is the starting-point, not the subject, of the present inquiry. The advances made by the two peoples, Hebrew and Greek, in the doctrine of a future life show a strong contrast. The Greek advance, represented in Biblical literature by the Bk. of Wisdom only, was due mainly, though not entirely, in the limited circle affected by it, to the consciousness of intellectual vigour and the difficulty of conceiving intellectual activity arrested and annihilated, as in the belief of the Homeric age it undoubtedly was. In the Hebrew advance, it was the development of religious vigour and experience which made men feel that existence in Sheol, as generally understood, could not be their final lot. Again, to the Greek it appeared that the body was in some respects a hindrance to the intellectual life, and that the serenity needed for reflexion was disturbed by bodily passions; hence the resumption of the body presented no attractions. The Hebrew, from his less intellectual point of view, felt nothing of this, and was therefore able to retain his instinctive perception that the body was essential to the life of man, and to require that, if life was to be restored, the body should be restored also. The history of the doctrine of the resurrection in the OT is that of a slow hesitating development. In the NT there is undoubtedly development, but the doctrine is not merely developed within human thought, but revealed to it from without by a fact which assured it—the resurrection of Jesus Christ. In the present article that event will not be dealt with in its historical aspect, nor with regard to its place in Christology and in Christian evidences (see art. JESUS CHRIST), but only in its relation to the doctrine of the resurrection of mankind. The order of treatment will therefore be—(i.) the expectation of resurrection as developed in the OT and Apocrypha; (ii.) the effect on this expectation of (A) the teaching, (B) the resurrection of Jesus; (iii.) the place thenceforward assigned to the doctrine in apostolic teaching.

1. THE EXPECTATION OF RESURRECTION AS DEVELOPED IN THE OT AND APOCRYPHA. — Martha's words, 'I know that he shall rise again in the resurrection in the last day' (Jn 11²⁴), set before us the general belief of the Jews (excluding Sadducees) in the time of Christ.* But how had this belief been arrived at? Its development in OT

* The disciples' inability to understand 'what the rising again from the dead should mean' (Mk 9¹⁰) does not controvert the statement above. It arose from their unwillingness to conceive a suffering Messiah, and so to expect His death, which was the necessary preliminary to His rising again.

has been so often and so fully dealt with (e.g. Schultz, *OT Theology*, II. ch. xxii.; Salmond, *Chr. Doct. Immortality*, bk. ii.), that only an outline will be necessary.

A. OLD TESTAMENT.—1. *Stages of development.*—(a) The religious life of the individual Hebrew was subordinate to that of the nation. It is in the sphere of national life that we first find those religious conceptions which ultimately come to be appropriated by the individual, e.g. Justification (see Is 45²⁵). This holds good of the expectation of resurrection, and Hos 6² may be taken as a typical passage. Ezk 37 belongs to the same class. One prophecy of national resurrection is of a special and peculiar character, viz. Is 53¹⁰. While granting that the Servant of the LORD is primarily Israel idealized, we have here the prolongation of life after death described in so individual a way, that when once the thought is admitted that the Servant is a Person representing the nation, the prophecy becomes a prophecy of individual resurrection. It will be observed that in Hosea and Ezekiel it is a figurative resurrection, namely, the recovery of national life, which is spoken of, and not a literal one, and the whole conception depends on the nation being considered as a person capable of life and death. But it thus becomes clear that the notion of literal resurrection as a possible thing was a very early one, inasmuch as the literal conception of an event must precede its figurative application. The miracles of Elijah and Elisha (1 K 17, 2 K 4), even for those who refuse to accept them as facts, testify to the notion of resurrection being in men's minds. (b) The second stage of thought, later in logical if not in chronological order, is a transitional one. In it the notions of individual and national resurrection appear side by side—Is 26¹⁹. Compared with 26¹⁴, this verse must be understood as a prayer for the resurrection of individuals. See Dillmann, *ad loc.* (c) In Dn 12² the resurrection of individuals stands out alone and clear. The passage probably refers to the faithful and the apostates of Maccabean times (cf. 11^{32ff.}), and resurrection is predicted for both classes, without, however, any implication of resurrection for Gentiles. The form of expression and its connexion with a time of trouble and deliverance seem to show dependence on Is 26¹⁶. The passage likewise introduces for the first time the resurrection of sinful Israelites with a view to retribution.

2. By the side of these stages of thought shown in prophetic utterances we must place the reflexions of psalmists and wise men. They will best be considered under the head of *lines of thought*, in which the doctrine of resurrection was developed. In every case it must be borne in mind that it is not the renewal of an existence which has been cut off, nor merely the restoration of a body which is aspired to, but the deliverance of an existent personality from Sheol, and its re-endowment with life in all its powers and activities. (a) *Communion with God.* Of this the psalmists were conscious, yet before them lay Sheol with the entire cessation, according to the popular belief, of any such relation to Him (Ps 6⁵ 30⁹). Some of them surmount the barrier. Such a communion must partake of the nature of Him who admits it, and therefore be eternal. Two of the psalms which express most strongly the delight of fellowship with God, viz. 16 and 17, are those in which the hope of life after death reaches its least ambiguous expression (16¹⁰ 17¹³)—least ambiguous, because here and everywhere in similar passages in the Psalms it may possibly be temporary preservation from literal and physical death which is intended, as is certainly the case in Ps 68²⁰. But very widely in the Psalter there exists the feeling that life means more than

the continuance of the soul in the body. And this fact should be taken into account in interpreting all Psalm passages in which life and death are referred to. (b) *Need of retribution.* Under this head we must consider not only the Psalms but also the Prophets and Job. It makes itself felt in various ways. (1) In connexion with Messianic hopes. The more vivid and glorious these become, the more needful is it that the dead Israelites should not be thought to be debarred from partaking in their fulfilment. The idea of the dispersed who are alive being gathered to partake in the great restoration is abundantly expressed (Is 60 and elsewhere); and it is only a step further to gather them from the underworld for the same purpose. That is indeed the connexion of the prayer and promise in Is 26¹⁹ and Dn 12², already cited. The thought comes out much more clearly in Eth. Enoch 51; and when the doctrine of a temporary Messianic reign on earth grows into shape, the resurrection of the righteous to share in it is usually placed at its beginning. Hence arises the expectation of two distinct resurrections, which will be examined below. (2) Besides retribution of blessing for the righteous, retribution for the wicked came also to be felt as a necessity. For the Psalmist it had been enough to pray for vengeance on them in this life, or to think of them as shut up for ever in Sheol (Ps 49¹⁴); and for the Prophets it was enough to expect a 'day of the LORD,' in which they would receive their punishment here, and be swept away. But in Dn 12² resurrection for unfaithful Israelites with a view to their punishment appears for the first time, and it is obvious that from this starting-point an expectation of resurrection and judgment for mankind generally would naturally proceed. (c) There is another aspect of retribution, which does not look at reward or punishment, but rather at the reversal of mistaken human judgments. There must be a higher tribunal to appeal to, and to reach it man must be brought out of Sheol. Further, the dealings of God Himself require a justification which He cannot fail to give. This is in the main the line of expectation in Job. The sufferer is dying with an unjust condemnation upon him, and with no sign of regard from God. In Sheol he will still be cut off from God. He rises to the thought, and throws out the wish (14^{13ff.}), that there may be release from Sheol, and later on is assured that 'his redeemer (*gō'ēl*) lives,' and that he himself will see God (19²⁶). All this implies, first of all, literal death, and then restoration to life after death, i.e. resurrection in the proper sense of the word.*

These three tendencies of thought which were at work in the mind of Israel during and after the Exile seem to spring naturally out of the previous OT religion, and not to require any extraneous influence to account for the shape which they took. No doubt, such a passage as *Yasna* ix. 11, 12 is sufficient proof of a clear and lofty doctrine of resurrection in Persian religious thought.† But at the most such belief among their foreign rulers did no more than stimulate the home-born expectation of resurrection in the breast of Israel.

B. APOCRYPHA.—The variations which the

* It must be confessed that both the text and the exegesis of this passage are still involved in considerable obscurity. See the *Comm.*, especially those of Dillmann, A. B. Davidson, and Duhm.

† 'In order that our minds may be delighted and our souls the best, let our bodies be glorified as well, and let them, O Muzda, go likewise openly (to Heaven) as the best world of the saints devoted to Ahura, and accompanied by Asha Vahista, who is righteousness the best and most beautiful, and may we see thee and may we approaching come round about thee, and attain to entire companionship with thee.'—*Sacred Hks. of the East*, vol. xxxi. p. 312.

doctrine of resurrection underwent in the inter-Testamental period are various and complicated. Their inconsistencies may be gathered from the brief summary of them in art. ESCHATOLOGY, vol. i. p. 748^b: for a full account of their phases, Charles, *Eschatology* (Jowett Lecture), chs. v.-viii., should of course be studied. See especially an admirable summary in *Book of Enoch*, ed. Charles, ch. 51, note.

Three of the deuterocanonical books require a few words, viz. Sirach, Wisdom, 2 Maccabees, as representatives of widely divergent views. The earliest of these (Sirach) is on the lines of Ecclesiastes, not rising beyond the old popular conception of Sheol. The immortality of man is distinctly denied in Sir 17³⁰. The contrary statement in 19¹⁹ is omitted in B⁹AC (followed by RV). It is found, however, in the Complutensian text, and in the very important MS. Ho 248. Apparently, the only immortality expected is (1) that of the nation, and (2) for the individual a good name, 37²⁸. The three passages which appear to imply a better hope (46¹² 48¹¹ 49¹⁰) are capable of being otherwise interpreted; cf. Schwally, *Das Leben nach dem Tode*, § 40.—In direct opposition to Sirach is Wisdom, see Wis 2²³ 31². But the expectation of immortality in this book is probably drawn from Greek philosophy much more than from Psalms or Prophets. A belief in the pre-existence of souls is held to be involved in it (Wis 8²⁰), and resurrection of the body is nowhere contemplated.*—On the other hand, 2 Mac. expresses the assurance of such a resurrection not only as an opinion, but as the motive and support of martyrdom. The persecutor can mutilate the body, but God will restore it intact (2 Mac 7⁹ 11¹⁴, 36 14⁴⁶). And 12⁴⁴ shows that the author had a Sadducean denial of resurrection confronting him, such as is implied by the silence of 1 Mac. in regard to everything relating to a future life. Thus we have in these three books severally (1) the ancient view of Sheol as the end of man, (2) the expectation of immortality for the soul alone, (3) belief in the resurrection of the body. It may be added that in 2 Mac. for the first time *ἀναστάσις* occurs in the Gr. Bible in the sense of 'resurrection' (but cf. Ps 65 title).—2 Es. need not be discussed here, as it is entirely post-Christian. For the pseudepigraphic literature the reader has already been referred to ESCHATOLOGY.

ii. EFFECT OF THE TEACHING AND RESURRECTION OF JESUS ON THE EXPECTATION OF RESURRECTION IN ISRAEL.—In the first place there may be room for doubt as to the precise character of this expectation. May 2 Mac. be taken as the expression of it? Was it regarded as a return to life under previous physical conditions in order to partake in a Messianic kingdom upon the present earth subjugated and renewed? It is to this that a survey of OT prophecy seems to lead, and it is this which seems to be in the minds of the apostles so far as we can judge by their utterances in the Gospels. It has indeed been shown by Charles (*Eschatology*, Jowett Lect. p. 238) that such a view is more properly characteristic of the 2nd cent. B.C. than of the 1st. The portions of Eth. Enoch which belong to the 1st cent. B.C. declare that the Messianic kingdom is of only temporary duration, and that the goal of the risen righteous is not this transitory kingdom, but heaven itself (*op. cit.* p. 201 ff.). Yet the literature of a period is not decisive as to popular belief, and the expectation of the kingdom of God in the Gospels

appears to be more in harmony with the earlier eschatology. Even if 'the doctrine of the resurrection current among the cultured Pharisees in the century preceding the Christian era was of a truly spiritual nature,' it had not laid hold of the mass of the people. The character of the resurrection belief to be gathered from the Mishna (for which see Weber, *Jud. Theol.* pp. 369, 370) is probably better evidence of Jewish popular opinion in the time of Christ than any portion of Eth. Enoch, though it seems too much to say with Weber, that Enoch cannot in any case serve as authority for the exhibition of Jewish theology (*op. cit.* p. xv). Assuming, then, that the popular conception of resurrection was return to life under previous physical conditions in order to participate in a Messianic kingdom, we have to observe how this would be affected by the teaching and resurrection of Jesus.

A. TEACHING OF JESUS.—In the Synoptics the resurrection is taken for granted. There the discourses of Jesus seldom if ever communicate doctrine. Doctrine is presupposed. The discourses are practical, and it is in connexion with conduct, and judgment upon conduct, that the resurrection comes before us. However, a new view of life and death is implied in Mt 9²⁴ 'the damsel is not dead, but sleepeth,' and to enforce this teaching may have been in part the object of the three miracles of raising the dead. There is another more important exception to the absence of direct teaching, the answer to the Sadducees (Mt 22²³⁻³², Mk 12¹⁸⁻²⁷, Lk 20²⁷⁻³⁸), which was evidently felt by those who recorded it to be of the highest importance. As an answer to the difficulty raised by the Sadducees, the words of the Lord are in a measure confirmatory of Eth. Enoch 51⁴ ('they, i.e. the righteous, will all become angels in heaven'). But the Lord goes on to attack the position of His adversaries, and to prove, not indeed that there will be a resurrection, but that the conditions of it exist. The souls of the patriarchs are still truly alive, because acknowledged by God Himself (Ex 3⁶) to be in relation to Him; cf. Lk 14²⁶⁻²⁸. Their resurrection in the body is indeed a further step, but follows inevitably from the love of God (see Swete on Mk 12²⁶). The narrative of Luke extends the thought of this relation of man to God from the souls of the patriarchs to all men, and to this striking utterance St. Paul probably refers in Ro 14⁷⁻⁸.—In the Fourth Gospel the treatment of the doctrine of resurrection is different. There it forms part of Christ's doctrinal system, both as to the spiritual revival which is its necessary condition (Jn 5²⁴⁻²⁵), and as to His own share in effecting it (5²⁸⁻²⁹ 6³⁹⁻⁴⁰ 44-54). In this latter particular we may compare the expectation of Eth. Enoch, which had connected the resurrection with the coming of the Son of Man (Eth. Enoch 51¹ 61⁵). This claim of Christ is concentrated in the words, 'I am the resurrection and the life,' Jn 11²⁵. In Martha's words and Christ's reply the old and the new doctrines meet, and the old is taken up and transformed into the new, losing nothing and gaining much. A serious difficulty, however, arises on this teaching. If resurrection is presented (Jn 6⁴⁰) as the necessary ultimate result of believing on the Son of God, the resurrection of unbelievers must, it is evident, stand on some other footing. To deny it altogether would be to fall into the fallacy of arguing from denial of the antecedent to denial of the consequent. But it must clearly be different in character. What is the difference? The question will recur below in considering St. Paul's presentation of the doctrine in Ro 8¹¹. A resurrection of the wicked is plainly presupposed in Christ's teaching as to the Judgment, Mt 25³²⁻³⁴.

* Teichmann (*Die Paulinischen Vorstellungen von Auferstehung und Gericht*) endeavours to show that in 2 Co 5 St. Paul has abandoned his early Judaic belief in a literal resurrection, under the influence of Hellenic thought, and especially of the Book of Wisdom, cf. 91⁵. See pp. 11-75 for the whole argument, which, though ingeniously worked out, is nevertheless unconvincing.

It is, moreover, distinctly affirmed in Jn 5^{28, 29}. The excision of these verses as proposed by some critics (Charles, *Eschatology*, p. 371) is an arbitrary method of getting rid of the difficulty. The solution seems to lie in the doctrine of two resurrections different in nature if not in date, which is implied in Lk 14¹⁴ 20³⁵, where see Plummer's notes (*Internat. Crit. Comm.* on Luke). The causation, so to speak, of the resurrection of the righteous from the dead (ἡ ἐκ νεκρῶν ἀνάστασις) will be different from that of the rising of the wicked, though in both cases it proceeds from Christ as its author.

B. RESURRECTION OF JESUS, AND ITS EFFECT ON THE DOCTRINE OF RESURRECTION.—Of greater moment than any result of verbal teaching was the change in the doctrine produced by the resurrection of Jesus. The Jewish expectation, if it has been rightly estimated above (i. A.), would have been fulfilled by a return to life such as that of Lazarus, with a body subject to all its previous conditions. This and the two preceding raisings from the dead had appeared to confirm the popular view. And the Lord Himself had accommodated His teaching to the same expectation in Mt 18⁸, though, as we have seen, He had incidentally rebuked it in Lk 20³⁵. But when He had risen, it was clear that the body with which He had risen was in some ways released from previous material conditions. He could pass through a closed sepulchre (implied by Mt 28²), and closed doors (Jn 20²⁶), and be present at no great interval in different and distant places (cf. Lk 24¹⁵ and 24³⁴). It was the same and yet with a certain difference which was enough in some cases to delay or hinder recognition (Mk 16¹², Jn 20¹⁴ 21⁴). As against this alteration in the character of His risen body, it might be urged that He asked for and received food (Lk 24⁴², Ac 10⁴¹). But in these cases the purpose of the moment was to convince the disciples that what they saw was not a phantom; cf. Mt 14²⁸. This, with a view to the persons dealt with, could best be done by taking food. If there be resurrection of the body, there is no reason why such a body should not have the power of taking food without depending on it. Once cross the boundary of the present sphere of existence, and we are in a realm where we can no longer say 'this is impossible.' Indeed it was the reality and identity of His risen body which the Lord had to insist on; the difference was evident, and spoke for itself. To sum up, the effects of His resurrection were these—(1) It assured men of what till then had been a hope imperfectly supported by Scripture warrant, and therefore contested by an influential school of thought (the Sadducees). (2) It raised and enlarged that hope; cf. 1 P 1³. Whatever influence the lofty predictions of Eth. Enoch (*Similitudes*) may have had among the studios and learned, it is probable that the people generally had interpreted resurrection as a renewal of this present life under its previous conditions. Christ's resurrection showed that it meant entry into an entirely new phase of existence. (3) It brought the doctrine of resurrection from the background of religious thought to the very front. The gospel of Jesus Christ demanded acceptance on the ground of His resurrection. It was that which declared (ἀπο(φ)ευ) Him to be the Son of God (Ro 1⁴), and set the final seal of Divine acceptance on His teaching and life; and, as was afterwards realized, on the sacrifice of His death. The gospel which the apostles preached was the gospel of the resurrection (cf. Ac 4³), though this combination of words does not actually occur. Confession of Jesus as Lord, and belief in His resurrection, are the only things necessary for salvation, Ro 10⁹.

iii. THE PLACE THEREAFTER ASSIGNED TO THE

DOCTRINE OF THE RESURRECTION OF THE DEAD IN APOSTOLIC TEACHING.—To this the preceding remarks naturally lead us on. In two respects the doctrine presented itself to men of the apostolic age differently from the way in which we regard it. (1) To the apostles the expectation of the Second Coming in their own lifetime, arising from such sayings as Mt 24²⁴, superseded in some measure the expectation of resurrection for themselves and for those whom they addressed, yet the strong Sadducean opposition to the gospel is expressly attributed to the apostles' teaching as to the resurrection (Ac 4²). (2) On the other hand, the sense of the new life imparted to them by the words of Christ and the gift of the Spirit, with the example before them in the Person of Christ of how this life could triumph over death, made the resurrection in its aspect of quickening (ζωοποιεῖσθαι) an already present fact. They were already risen with Christ, death was brought to nought (2 Ti 1¹⁰), and the subject of their preaching was 'this life' (ἡ ζωὴ αἰών, Ac 5²⁰). But for later ages of the Church the literal resurrection has appeared to be the important thought, and the mystical resurrection has lost the freshness which it had when grown men entered by baptism into the new life, from the bondage of Judaism or the superstition and vice of heathenism (Ro 6⁴⁻⁵). But the question as to apostolic teaching is really not a general one, but special, and to be answered almost entirely from the Pauline Epistles. The Catholic Epistles and Hebrews contribute very little. It is when St. Paul turns to the Gentiles that the doctrine of the resurrection assumes a fresh prominence. It is not merely, as in Judæa, that witness must be given that Jesus is risen, to men who expect already resurrection for themselves; but the idea of resurrection is here a new one, and there is no previous belief in which the resurrection of the Lord can find its place. Popular Hellenic thought on the subject was vague, and apparently but little influenced by the doctrine of retribution taught in the mysteries (Salmond, *Chr. Doct. Immortality*, p. 135 note). Philosophic thought was simply concerned with the possible immortality of the soul, and uniformly discarded the prospect of a renewed existence in the body except by way of transmigration, a totally different conception from that of resurrection. In his discourse at Athens, St. Paul carried the Stoics with him throughout, until he came to the words 'in that he raised him from the dead,' Ac 17³¹. Then some mocked, and Paul departed from among them. Hence in both his Epistles to the most distinctly Greek of the Churches which he addresses (Corinth), St. Paul enters fully on the question of resurrection. It was apparently at Corinth, first of all, that the mystical sense of resurrection, described above, usurped the place of the literal sense. It is to St. Paul that we owe the clear presentation of both the literal and the mystical views of resurrection as truly compatible. As examples of the mystical sense, besides Ro 6⁴⁻⁵ (already referred to), we have Col 2¹² 31, Eph 2⁵. The last-named passage carries the mystical union with Christ beyond His resurrection to His ascension. And it is in reference to the mystical resurrection that we are to understand the baptismal hymn, 'Awake thou that sleepest, and arise from the dead, and Christ shall shine upon thee,' Eph 5¹⁴. It is easy to see how such language, if it stood alone and without its complement, might give occasion to the teaching of Hymenæus and Philetus that the resurrection was past already, 2 Ti 2¹⁸. It was therefore absolutely necessary for St. Paul to emphasize also the literal sense of the doctrine, which he does in 1 Th 4¹⁶, 2 Co 5, Ph 3²¹, but especially in 1 Co 15¹²⁻³⁸. In the latter passage he first shows that faith in the re-

urrection of the dead is vital to the gospel, because the resurrection of Christ is vital to it, and that cannot be maintained if the resurrection of those who are in Christ is denied. Then he meets the difficulties which Greek thought, more subtle and critical than Jewish, felt so strongly—'How are the dead raised, and with what manner of body do they come?'

In further examination of the Pauline doctrine, three questions will present themselves, which must be dealt with successively—(1) In what respects, if at all, does the teaching of St. Paul on the subject go beyond the teaching of Christ? (2) Is his teaching consistent with itself? (3) Does it include a doctrine of two resurrections?

(1) The principal thought which we owe to 1 Co 15 is that of a spiritual (*πνευματικόν*) as distinguished from a natural (*ψυχικόν*) body, namely, a body which is adapted to be the organ of a personality in which it is no longer the soul (*ψυχή*) but the spirit (*πνεῦμα*), which is supreme. This is in full correspondence with the account given in the Gospels of the risen Christ, but needed to be definitely stated (cf. 1 P 3¹⁸ RV): The analogies by which the possibility of such a body is indicated (vv. 30-41) are to be regarded as (a) popular illustrations, (b) examples of the inexhaustible resources of God, and are not adduced as arguments. The crux of the doctrine is, 'What continuity is there between the natural body resigned at death, and the spiritual body received at the resurrection?' For this, another analogy is brought forward—that of the seed and the wheat plant; and here again we have an illustration which must not be pressed too closely. It does not imply that the writer believed that there really is as it were a seed in the dead body out of which the new body will be developed (cf. Weber, *Jüd. Theol.* 2 p. 369; Hughes, *Dict. Islam*, art. 'Resurrection'). Nor do St. Paul's words necessarily imply that view of the doctrine which from the Apologists onwards was general in the Catholic Church, namely, that the matter which constituted the former body at the time of death will be collected, and that the former body will thus be reproduced in all its members. The passage lends itself quite as readily to Origen's suggestion of a 'ratio quæ salva est' (Or. *de Principiis*, II. x. 3); see Westcott, *Gospel of Resurrection*, II. § 7. In considering the difficulties attending the idea of the preservation of identity in the body, it must not be forgotten that difficulties also attend the conception of a continuous identity of the soul.

(2) *Is St. Paul's teaching consistent with itself?*—It is urged by Teichmann (*op. cit.*) that St. Paul's view in 1 Thess. is purely Judaic (*echt Jüdische*). It is true that he says nothing in 1 Thess. of the 'change' which is so prominent in the teaching of 1 Co 15, but this is no proof that it did not then form part of his expectation. 1 Co 15 is described by the same writer as 'a compromise'; and strongly contrasted with 2 Co 5, a contrast which must now be examined. (a) In 2 Co 5² the resurrection body is described as 'our habitation which is from heaven,' an expression which is not strictly consistent with the resurrection or retention of the former body as in 1 Co 15. But the inconsistency is no more than is allowable in speaking of a really indescribable event. The notion of a previously prepared body brought to the soul to be animated by it surely could not have definitely presented itself to the apostle's mind without being at once discarded. And it is further to be observed that vv. 1-2 have verbal coincidences with Mk 14²⁸, which, although a partly inaccurate statement of Christ's words, may very well have been known to St. Paul and have influenced his choice of expressions. (b) 2 Co 5¹ has been held to imply that St. Paul expected

the resurrection body immediately upon his death. But this is not proved by his use of the present tense (*ἐχομεν*), which only expresses the certainty of his hope. Nor is it proved by *ἐν καταλύσει*, for *ἐάν* need not here, as in some cases, be rendered 'whenever,' but may retain its strictly conditional force, and so express the doubt which St. Paul still felt as to whether his 'earthly house' will really be dissolved by death, or be changed at the Lord's coming without dissolution. Nor, again, does his expectation of being with the Lord as soon as he leaves the body (5⁸) imply that his resurrection would then take place (if indeed the term 'resurrection' be applicable to such a view, which is hardly the case), for, in another Epistle in which he expresses the same expectation of being immediately with Christ in case of death (Ph 1²⁵), he makes it perfectly clear that the change of the body of humiliation into the body of glory does not occur until the Second Coming (Ph 3⁵⁰). It may be replied that the change described in Ph 3⁵⁰ refers only to those who shall be alive at the Coming, among whom St. Paul has again begun to include himself (cf. Ph 1²⁵). But this can hardly be pressed in face of his definite expectation for himself of resurrection from the dead in Ph 3¹¹. We therefore conclude that he expects to be with the Lord before the Parousia in a disembodied state. Teichmann's arguments are largely based on a detached note on 2 Co 5 in Schmiedel's *Hand-Commentar*, pp. 200-202, and on Schmiedel's exegesis generally. It should be added as a supplementary consideration that the supposed abandonment by St. Paul of belief in an intermediate state would present a serious difficulty in view of the miracles of raising the dead recorded in NT. It is surely inconceivable that a soul already invested with a glorified body should be recalled to exchange it for an earthly one.

(3) *The two resurrections.*—We have already seen under OT that this expectation belongs to the earlier stages of the doctrine. First came the hope of resurrection for righteous Israelites, and it was only by degrees that the expectation was extended to wicked Israelites, and afterwards to the Gentiles. In Lk 14¹⁴ we have perhaps some sanction given to a distinction between the resurrection of the righteous and that of the wicked, and in Lk 20³⁸ they that are accounted worthy to attain that world and the 'resurrection from the dead' are spoken of as (all of them) 'sons of God.' The conclusion to be drawn is, not that Christ taught that only the righteous will be raised, but that their resurrection is to be thought of as separate from that of the wicked. This distinction seems to be confirmed by Jn 5²⁹, and to be followed by St. Paul in Ac 24¹⁵. With this clue we can scarcely fail to see the same thought in 1 Th 4¹⁶, where the resurrection of the dead in Christ is spoken of quite without reference to any general resurrection, though this must not be inferred from the word 'first.' This word is correlative to 'then' (*τῇτε*), which introduces as the second event the 'rapture' of the living. Again, in 1 Co 15^{23, 24} there seems to be a distinction between the phrases 'they that are Christ's' and 'the end,' which latter expression may cover the general resurrection and the judgment. Lightfoot (on Ph 3¹¹) distinguishes firmly between *ἡ ἐκ ἀνάστασις ἡ ἐκ νεκρῶν*, *ἀνάστασις ἐκ νεκρῶν* on the one side, and *ἡ ἀνάστασις τῶν νεκρῶν* on the other; the former two phrases being equivalent to *ἀνάστασις ζωῆς*, and the latter phrase to *ἀνάστασις κτιστοῦ*, Jn 5²⁹. And indeed it would be hard to explain St. Paul's words, Ph 3¹¹ 'if by any means I may attain,' if we suppose that what he desired to attain to was merely that resurrection which is certain for all. The only other explanation of such an aspiration

is that he had given up belief in a resurrection of the wicked. On the whole, it appears that there must be some distinctive character in the resurrection to life, both as to causation and nature, which has not yet been brought out adequately in theology. Thus we are led to return to the difficulty stated above (ii. A) as arising from the teaching of the Lord in Jn 5 and 6. Christ's promise to raise His hearers in the last day is conditioned by belief on the Son (Jn 6⁴⁰), and their resurrection is represented as an act of grace extended to them by Christ (Jn 5²¹ 6⁴⁴⁻⁴⁵), although it is also said that 'all who are in the tombs shall hear his voice and shall come forth' (5²⁹). Now St. Paul's teaching distinctly follows the same line: 'He that raised up Christ Jesus from the dead shall quicken also your mortal bodies through (or because of) his Spirit which dwelleth in you' (Ro 8¹¹), which limits this Divine operation to those in whom the Holy Spirit dwells. 1 Co 15⁴⁴⁻⁴⁶ is a fuller statement of the same thought. The body there spoken of is spiritual, i.e. a fit organ for the spirit, a description which cannot refer to any but the saved. 1 Co 15²² has been quoted on the other side as proving that all (both righteous and wicked) shall be made alive in Christ. But 'all' probably means all who are already in relation to Christ as believers. See Meyer, *Kommentar*⁸, ed. Heinrici, on the verse. It must be acknowledged that the line of teaching in the above passages makes strongly at first sight for a resurrection of the righteous only, and, in short, for the doctrine of conditional immortality. But inasmuch as this view can be carried through only by dint of very rough dealing with the text of the NT in several passages, e.g. Jn 5²⁹, it may be concluded that while 'life' (Jn 6⁴⁰) and its equivalent, the indwelling Spirit (Ro 8¹¹), are both the cause and the earnest of resurrection for believers, they are nevertheless not indispensable to such a resurrection as is involved in the presentation of the rest of mankind in an embodied state before their Judge.

(4) From the doctrine of two resurrections, in whatever form it be accepted, arises the question, Will there be an interval between them, and if so what occurs in it? 1 Co 15²⁴⁻²⁸, arguing from Ps 110¹, seems to imply that there is an interval during which Christ subdues all His enemies. A much more definite statement occurs in Rev 20⁴⁻⁶, where the interval is a thousand years—'the rest of the dead lived not till the thousand years should be finished.' In this passage the first resurrection is placed at the beginning of the millennium, and at the end of it follows not a second resurrection but the 'second death.' It is beyond the scope of this article to show that in the first three centuries belief in a millennial reign of Christ on earth was generally accepted in the Church. See esp. Justin, *Dial.* lxxx. 1; Iren. v. 33 ff. The interpretation given by Augustine* to Rev 20¹ is that the first resurrection is the spiritual awakening which began to work in mankind after the coming of Christ, i.e. the resurrection in its mystical aspect; and that the millennium of Rev 20 is the period from that awakening onwards. He supports this explanation of the reign of the saints by the constant use in NT of 'kingdom' as equivalent to the Church militant. This is hardly satisfactory as an exposition of the passage in question. It is rather an exposition of passages in the Prophets and the sayings of Christ which underlie Rev 20; and as such it has real value. The history of the

Church has been a history of the subjugation of the world to Christ, slow but progressive. Such a view, however, if adopted in reference to Rev 20, would contradict the identification of 'the first resurrection' with 'the resurrection of the just,' which must, so far as we can see, be taken in other passages to mean a literal resurrection. The interpretation of Rev 20 is beset with difficulties and contradictions, which are well stated by Milligan, *Lectures on Apoc.*, Lect. vi. The suggestion of a considerable interval of time between the resurrection of the just and that of the unjust has therefore no secure basis. The significant contribution of the Apocalypse is the clearness with which the resurrection of the wicked for judgment appears in it, which can hardly be dismissed on the ground that the book is ultra-Judaic. See, further, art. MILLENNIUM.

There remains to be dealt with in a few words what is probably the latest book in the Canon (1 Jn 3²). St. John first disclaims knowledge of the nature and conditions of our future state, and then in three words, *ομοιοι αυτω εσμεθα* ('we shall be like him'), gives the substance of the Christian doctrine of the resurrection of the dead. Our resurrection will be on the pattern, so to speak, of His. Not only does His resurrection answer all doubts as to the possibility of resurrection for us, but it also answers sufficiently the questions in which those doubts express themselves, namely, as to 'how' and 'wherewith.' In one respect the parallel between His resurrection and ours appears to fail. But a little reflexion will show that the difference involved in the reanimation of a body not yet decayed, as was the case in His resurrection, and the clothing of the soul with a body which has to be reconstituted, is of no great weight, inasmuch as the change which passed on the Lord's human body at resurrection must have been of so fundamental a character, that although outward identity was preserved, yet the natural body had given place to something wholly different.

The extenuation of the Christian doctrine of the resurrection of the dead into a natural or conferred immortality of the soul to avoid perplexities arising from the limitation of our knowledge, evacuates the force of St. Paul's teaching as to the ideal sanctity of the human body, e.g. 1 Co 6¹⁴, and sacrifices the moral value of a sense of its high destiny. Again, it breaks up the Pauline conception of man as body, soul, and spirit, all capable of being preserved entire without blame (1 Th 5²³). Even if we hesitate to accept St. Paul's psychology, we must confess that the only self which we know is a self constituted of body as well as soul. St. Paul's expression of Christian hope is not deliverance from the body, but redemption of the body. The redemption of the body is the last stage in the great process of adoption (*υιοθεσια*) by which we are made 'sons of God' (Ro 8²³).

LITERATURE.—W. R. Alger, *Critical History of the Doctrine of a Future Life*, with Bibliography by Ezra Abbott (the latter also pub. separately); Schultz, *OT Theology* (Eng. tr.), vol. ii, pp. 382-398; Beyschlag, *NT Theology* (Eng. tr.); Schurer, *HJP* § 29, 'Messianic Hope'; Schwally, *Das Leben nach dem Tode*; Teichmann, *Die Paulinischen Vorstellungen von Auferstehung und Gericht*; Cheyne, *Origin of the Psalter*, Lect. viii, part ii.; Commentaries on 1 and 2 Co, especially Meyer's *Kommentar*, ed. Heinrici, Schmiedel's *Hand-Commentar*, and Klopfer's *Second Corinthians*; articles in Herzog, *PRE3*, by Kubel, and in Hauck, *PRE3*, by Schaefer; articles on ESCHATOLOGY in present work; Westcott, *The Gospel of the Resurrection*; Sir G. G. Stokes, *Immortality of the Soul* (a short pamphlet). By far the most important modern works are Salmond's *Christian Doctrine of Immortality*; and, on different lines, Charles' *Eschatology, Hebrew, Jewish, and Christian*, with which should be read the same author's *Book of Enoch*. See also Thackeray's *Relation of St. Paul to Contemp. Jewish Thought*, ch. v. (published after the foregoing art. was in type). Fuller accounts of the literature will be found at the end of the three articles on ESCHATOLOGY.

E. R. BERNARD.

REU (רעו); LXX and NT Παρά, hence AV in Lk

* De hoc ergo regno militis, in quo adhuc cum hoste configitur, et aliquando repugnatur pugnantibus vitiis, aliquando et cedentibus imperatur, donec veniat ad illum pacatissimum regnum, ubi sine hoste regnabitur; et de hac prima resurrectione quæ nunc est, liber iste (sc. Apoc.) sic loquitur.—Aug. de Civ. Dei, xx. 9; and see also vi.-x., which are full of interest throughout.

3rd Ragan).—The son of Peleg, Gn 11¹⁸⁻²¹, 1 Ch 1²⁶, Lk 3³⁸. The ethnological signification of the name is uncertain. Von Bohlen has even suggested its identity with *Rhages* in Media; Ewald (*Hist.* i. 268, Eng. tr.) conjectures *Argana* at the sources of the Tigris; some think of *Rughwa* in the Shammar mountains in Arabia (see Sprenger, *Geog. Arab.* 233, 294), others of the Aramæan *Ru'ua* in S. Babylonia, often mentioned in the Assyrian inscriptions from the time of Tiglath-pileser II. onwards (see Delitzsch, *Paradies*, 238 ff.; Schrader, *KAT* 2 117 [COT i. 102]). Mez (*Gesch. der Stadt Harrân*, 23) makes *Reu* the name of a god; but see Dillm. *Genesis*, ad loc. J. A. SELBIE.

REUBEN (רֶעֹבֶן; LXX 'Ρουβήν [E in Gn 30¹⁴ 'Ρουβίμ]; but Jos. *Ant.* i. xix. 7, etc. 'Ρουβήλος, Syr. [Lee] ܪܘܒܝܢ; *Rûbîl*, and similarly [so Dillmann on Gn 29²²] in Arab. and Eth. Versions and some Gr. MSS 'Ρουβίλ, 'Ρουβήλ).—The etymology is quite uncertain; MT spelling makes the name = 'Behold a son.' Gn 29²², playing upon the form of the word, finds in it a suggestion of 'He hath looked upon my distress' (*ra'â b'onyi*), and possibly also of 'He will love me' (*ye'ehâbhant*). Josephus (*l.c.*) states that the word meant, 'It had happened to her according to the compassion of God,' i.e. *El*. None of these derivations are probable. Baethgen (*Beiträge*, p. 159) prefers the reading *Reuben*, and sees in it a strengthened form of the Arabic proper name *Ru'ba*, found in an African inscription as the name (in the form *Rubatis*) of a Palmyrene. If *Reubel* is read, he would explain it as *re'u-bel* or *re'u-b-el*, 'seen by [cared for by] Bel or El,' and not, as some have taken it (with Gad and Asher), as the name of a god. Dillmann (on Gn 29²²) prefers the reading *Reubel*, and connects it with Arab. *ri'bâl*, 'wolf'; Ball (on Gn 29²², *SBOT*) suggests a connexion with the Egyptian *ra-uban*, but prefers to derive from Arab. *ra'ûb*, 'a chief who mends matters, a big, portly chief,' from *ra'ba*, 'to mend.' The form רֶעֹבֶן occurs as a proper name in Aramaic inscriptions (Lidzbarski, p. 367); and it seems possible that, whichever reading is preferred, the root רֶעֹב 'great' underlies the word (note Reuben's position as firstborn). Cf. Lagarde, *Onom. Sacra*, s.v.; Gray, *HPN* pp. 65, 124.

In J. Reuben is the firstborn of Jacob, and the son of Leah, Gn 29²²; he finds mandrakes for her, 30¹⁴; and lies with Bilhah, the slave-girl whom Rachel gave to Jacob as a concubine, 35²². Perhaps in the original narrative of J this episode was placed after Jacob's death, and was a legitimate incident of Reuben's succession to his father (Addis, but cf. below). In the Blessing of Jacob (possibly incorporated by J in his work), Gn 49²⁴, in the text as it stands, Reuben is the firstborn, and is denounced for the act of incest.

In E. Reuben appears only in the story of Joseph, as making an unsuccessful attempt to save him from his other brothers, 37²²⁻²⁸,* and as offering his sons as pledges for the safety of Benjamin.

In P, Reuben is Leah's son and Jacob's firstborn, 35²², 46⁸⁻⁹ = R, etc., 1 Ch 2¹. Gn 48⁵ apparently implies that the birthright was transferred from Reuben and Simeon to Ephraim and Manasseh. This is expressly stated of Reuben in 1 Ch 5¹, and his incest is given as the reason.

Reuben is often regarded as merely the eponymous ancestor of the tribe, and the primitive traditions as tribal history cast in the form of personal narrative. See next article.

REUBEN (Tribe), REUBENITES, CHILDREN OF REUBEN, derivatives, etc., of *Reuben*, *Roubel*,

* In 37²¹ *Reuben* has been substituted for *Judah* by an editor.

etc.—(Cf., throughout, *GAD* for the treatment of matters common to the two tribes, which is not, as a rule, repeated here).

i. **EARLY HISTORY.**—The relation of Reuben to the other tribes is indicated genealogically by the statement that Reuben was the firstborn, the son of Leah, that he committed incest with Bilhah, and that the birthright was transferred to Ephraim and Manasseh; i.e. in early times Reuben was the most powerful tribe and enjoyed the hegemony, which passed at a later period to Ephraim and Manasseh. The incest incident is variously interpreted. Either the tribe retained a lax sexual morality abandoned by its fellows; or it in some way assailed the rights of the Bilhah tribes, Dan and Naphtali. If the latter view is taken, the reference must be to events before the Exodus; otherwise it is impossible to determine whether these traditions refer to events before or after the Conquest. In the narrative of the rebellion of the Reubenite chiefs Dathan and Abiram against Moses (Nu 16, JE), we may have a reminiscence of an attempt of Reuben to assert its ancient rights as premier tribe.

As a 'son' of Leah, Reuben is grouped with Simeon, Levi, Judah, Issachar, Zebulun, and Dinah. This arrangement does not agree with any known geographical or political conditions, and may be a reminiscence of the state of affairs before the Exodus.

In P, etc. (Gn 46⁹, Ex 6¹⁴, Nu 26⁵, 1 Ch 5¹), the sons or clans of Reuben are Hanoch, Pallu, Hezron, and Carmi; and, at the Exodus, the prince of Reuben is Elizur ben-Shedeur (Nu 1⁵ 2¹⁰ 7³⁰ 10¹³), and the Reubenite spy is Shammua ben-Zacur (Nu 13⁴). Buchanan Gray (*HPN* p. 197) is inclined to regard Shaddaiur [Shedeur] as one of a set of names which are 'archaic artificial formations,' not improbably created by the author of P, rather than 'names actually current at any period.' He seems to favour a similar view as to Elizur (p. 199). P also tells us that Reuben numbered 46,500 (Nu 1⁵ 2¹¹) at the first census, and at the second 43,730 (Nu 26⁷). Reuben occupies the first place in Nu 1⁵ 2²⁰ 26⁵, but the fourth place in 2¹⁰ 7³⁰ 10¹³. In the order of marching in the wilderness, Reuben headed the 'camp of Reuben,' which was on the south side, and also included Gad and Simeon, Nu 2¹⁰.

ii. **THE CONQUEST.**—Reuben was associated with Gad in the occupation of Eastern Palestine, in co-operation with the other tribes in the Conquest of the West, and in the return across the Jordan, and the various incidents connected with the erection of a great altar (see *GAD* ii.).

iii. **THE TERRITORY OF REUBEN;** cf. *GAD* iii., *Map and Table of Cities*.—Besides minor references, we have two main accounts of the territory: (a) Nu 32²⁷⁻³³ (JE) 'The Reubenites built Heshibon, Elealeh, Kiriathaim, Nebo, Baal-meon (their names being changed), and Sibmah: and gave other names* unto the cities which they builded.' These cities lie in a district about midway between the Jabbok and the Arnon, but nearer to the southern stream. Dibon and Aroer, given to Gad in the preceding paragraph, are to the south of the Reubenite cities; so that the territory of Reuben seems to have been an *enclave* in that of Gad. There is no trace of these cities being called by different names either before or after—*Beth-baal-meon* is only a variant of *Baal-meon*. The writer cannot intend to tell us that the Reubenites gave to their cities the names of foreign gods, Nebo and Baal; so that those given are the ancient names, and the new names are not mentioned here or anywhere else. Perhaps, as Dillmann suggests, the writer meant that the Reubenites did not use such

* 'Gave other names' often omitted by critics as a gloss.

names, but substituted others unconnected with the worship of false gods. This list may indicate the geographical relations of Gad and Reuben at some flourishing period of the Israelite monarchy. (b) Jos 13, P (using earlier sources?). The northern boundary of Reuben is a line drawn about E.N.E. eastwards from the northern end of the Dead Sea, or due E. from some point on the Jordan a little farther north. The line passed a little north of Heshbon. The W. boundary is the Dead Sea and the Jordan, the S. boundary is the Arnon, the E. boundary is not defined. As far as they have been identified, the cities assigned to Reuben elsewhere in P (Jos 20. 21) and in 1 Ch 6 fall in this district. The statements of P may not rest upon any actual knowledge of historical geography, but state a theory as to the legitimate claims of Reuben. (c) In 1 Ch 5^{8, 12} the Chronicler (so Kittel, *SBOT*) tells us that a Reubenite clan Joel (so apparently) occupied Aroer, as far as Nebo and Baal-meon; but also mentions a Gadite clan Joel. If these statements rest on ancient tradition, we have a trace of the confusion arising

as carried captive by Tiglath-pileser. On the other hand, they are kept quite separate in the Blessing of Jacob (Gn 49) and the Blessing of Moses (Dt 33); and the latter document shows us that Gad was flourishing when Reuben had been reduced to insignificance. Probably Gad and Reuben were associated at the Conquest, and through the proximity of their territories; but, after the Conquest, the prevailing tendency to lapse from national unity to tribal isolation loosened the ties between the two eastern tribes, till Reuben was overwhelmed by some catastrophe, and its remnants became absorbed in Gad.

Apparently, at and immediately after the Conquest, Reuben was still an important tribe. In the Song of Deborah it is referred to before Gad, and at greater length—

* By the watercourses of Reuben
There were great resolves of heart.
Why satest thou among the sheepfolds,
To hear the pipings for the flocks?
At the watercourses of Reuben
There were great searchings of heart.
Gilead abode beyond Jordan' (Jg 5¹⁸⁻¹⁷).

from the close association of the two tribes: clans and territories were reckoned sometimes to the one, sometimes to the other.

The district assigned to Reuben is described under MOAB.

iv. HISTORY AFTER THE CONQUEST.—It is difficult to determine how far Reuben had a history separate from that of Gad. In Nu 32 and in the narratives in Joshua, Reuben and Gad are constantly associated, and, as we have seen, were somewhat intermingled in their territorial settlements. This relationship probably arose out of the arrangements made during the period of the Conquest, and were not due to any previous special connexion between the two tribes; Reuben is a 'son' of Leah, Gad of Zilpah, Rachel's slave. P's usual grouping (Nu 21⁰ etc.)—Reuben, Simeon, Gad—in the history of the Exodus is a reflexion of later conditions. Reuben and Gad [Gilead] are mentioned consecutively in the Song of Deborah as having both held aloof from the war against Sisera. The two tribes are also associated in 2 K 10³³ as 'smitten' by Hazael, and in 1 Ch 5⁸

Thus, at this time, Reuben was still much occupied with flocks and herds, perhaps altogether a pastoral, semi-nomadic people; and was too little interested in its western kinsfolk to join the muster against Sisera.

In Jg 20. 21 (RP^x on JE) the eastern tribes take part in the war against Benjamin. The Blessing of Jacob, a document of the early monarchy (B.C. 1000-850), opens by referring to Reuben; thus, according to MT—

'Reuben, thou art my firstborn, my might, and the beginning of my strength;
The pre-eminence of dignity, and the pre-eminence of power.
Uncontained as water, thou shalt not have the pre-eminence;
Because thou wentest up to thy father's bed:
Then defiledst thou it: he went up to my couch.'

The sense is obscure, and the text doubtful; but the lines seem to suggest that at this time Reuben was still powerful; but in bad odour with the

* Moore (*PB*) emends the text and translates—

'Great were the dissensions in the divisions of Reuben.
Why didst thou remain amid ash-heaps,
Listening to pipings at sheepfolds?
Gilead sat still beyond Jordan.'

other tribes, possibly on account of lax sexual morality (Dillmann), or for political reasons, or because the tribe had in some way violated some Israelite tradition as to religious observances. Jos 22 may be based on some such reminiscences.

Another view is that these lines are an explanation, after the event, of the ruin of the tribe; but, if this were the case, we should expect some more definite and circumstantial reference to the calamity.

In 1 Ch 5^{21, 22}, according to Kittel (*SBOT*), part of the material added by the Chronicler to his sources, we read that, in the time of Saul, the Reubenites had much cattle, and in conjunction with Gad and Eastern Manasseh possessed themselves of the cattle and conquered the territory of the Hagrites, and 'dwelt in their stead till the Captivity' (see HAGRITES). The same stratum of Chronicles (so Kittel) makes the following statements as to the Reubenites in the reign of David. In 1 Ch 12^{23, 27} amongst the Israelites who came to David at Hebron to make him king were 120,000 from the Eastern tribes; and, according to 1 Ch 26²³, David appointed 2700 Levites of Hebron as ecclesiastical and civil officials over these tribes; and 1 Ch 27¹⁸ states that the chief of the Reubenites in his reign was Eliezer ben-Zichri. No doubt the Reubenites often engaged, with varying success, in border warfare with the neighbouring tribes; and tradition may have preserved reminiscences of a victory over the Hagrites. The statistics are probably obtained by the Chronicler's familiar conjectural reconstruction of history.

Kittel, however, considers that the statement of 1 Ch 11⁴, that among David's mighty men was the Reubenite chief Adina ben-Shiza with thirty followers, is derived from some ancient source no longer extant.

According to an ancient source preserved in 1 K 4⁷⁻¹⁹, Solomon divided the country into twelve districts, three of which lay east of Jordan. The southernmost is described as 'the land of Gad (so Benzing with LXX [B]; MT has 'Gilead'), the country of Sihon'; * Reuben, in common with the majority of the tribes, is not mentioned. At the disruption Reuben fell to the Northern kingdom, 1 K 11³¹.

In the Blessing of Moses (Dt 33), a document composed in the Northern kingdom under either Jeroboam I. or II., Reuben is still mentioned first; perhaps, however, only through the influence of the earlier Blessing of Jacob. The verse runs—

'Let Reuben live, and not die;
Yet let his men be few' (RV).†

This verse implies that Reuben had become altogether insignificant. So, too, the Moabite Stone mentions most of the Reubenite cities as occupied or conquered by Moab; it speaks of the Gadites, but does not name Reuben. Hence before the time of Mesha (a younger contemporary of Ahab), Reuben had long lost the country to the east of the Dead Sea, if it ever held it, and was merged in Gad. When or how Reuben lost its power and prosperity we do not know; the change may have been gradual. On the one hand, Reuben was the outpost of Israel towards the S.E. deserts, it was exposed to hostile neighbours on both its southern and eastern frontiers, and constantly bore the brunt of the predatory habits of the Bedawin; on the other, it was largely isolated from the other tribes geographically, and, according to the 'Blessings,' had alienated their sympathies. Reuben may have suffered through the weakening

* 'Og,' etc., is a late gloss. The last clause of v. 19 is obviously corrupt both in MT and LXX; Benzing emends 'A prefect-general was appointed over all the prefects.'

† Improbable renderings are: 'And let not his men' (RVm), and 'May he not die, or his men become few' (Dillm.). See, further, on this passage, art. SIMON (Tribe).

of the power of Israel in the latter part of the reign of Solomon, and at the time of the disruption.

The Chronicler (1 Ch 5^{22, 26}) associates the Reubenites with Gad and E. Manasseh, as occupying E. Palestine, till the two and a half tribes were carried captive by Tiglath-pileser, and mentions Beerah ben-Baal of the clan Joel as chief of the Reubenites at that time. No doubt a remnant of Reuben remained amongst the Gadites up to this captivity.

Certain indications suggest that other Reubenite clans took refuge in Judah, and became merged in that tribe. Two of the clans of Reuben as given in P and Chron. bear the same names as two clans of Judah, viz. Hezron and Carmi,* Gn 46^{8, 12}, 1 Ch 4¹; and P also mentions (Jos 15^{6, 18}) the stone of Bohan the Reubenite as a landmark on the boundary between Judah and Benjamin.

Ezk 48^{6, 21} makes provision for Reuben in the restored Israel; and Reuben is one of the twelve tribes enumerated in Rev 7⁵. Besides GAD, cf. MOAB.

Conclusion.

i. INTRODUCTION.—1. *Title*.—The first word of the Book of Revelation gives the current title not only to this book, but to the class of literature to which it belongs. The word 'apocalypse' does not occur again in Rev., and does not here signify a literary product. The title which the book

* Unless we read Chelubai in 1 Ch 4¹.

suggests is rather 'the words (or the book) of the prophecy of John' (1st 227, 10, 18, 19). Certainly the title 'Apocalypse of John' (NC, etc.) implies a different use of the word 'Apocalypse' from that which the NT attests. The book is introduced not as the Apocalypse of John, but as 'an apocalypse of Jesus Christ.' God is the ultimate author of the revelation. He gave it to Christ, and Christ, through His angel, to His servant John, who therefore testifies to that which is ultimately 'the word of God,' and more immediately 'the testimony of Jesus Christ,' though it can also be called 'whatsoever things he saw' (1st, cf. 11, 19). The phrase 'apocalypse of Jesus Christ' here means, not a revelation of Him (i.e. the Parousia, as in 1 Co 17, 2 Th 17, 1 P 17-13 413), nor a revelation concerning Him, but a revelation by Him concerning the future (cf. Gal 112, 16, where the revelation is by Christ, but also concerning Him—a self-revelation).

2. *Canonicity*.—There is probably no trace of Rev. in the Apostolic Fathers (Zahn, *Gesch. d. NT Kanons*, i. 954 f.). Ign. *ad Eph.* xv. 3 does not necessarily imply Rev 21st; still less does *ad Phil.* vi. 1 require Rev 3rd. Papias is the first to attest, not the apostolicity, but the credibility of Rev., according to Andreas, bishop of Caesarea (Cappadocia), who in his commentary cites two remarks of Papias on Rev 127. Their source, however, is unknown, and Euseb. does not directly mention any reference to Rev. by Papias (*HE* III. xxxix.). He does, however, say that Papias based his chiliasm on apostolic statements, which he took literally, instead of figuratively as he should have done. It is true that when Irenæus appeals in favour of the reading 666 (13th) to presbyters who had seen John (*Hæc.* v. xxx. 1; Euseb. *HE* v. viii. 5), we naturally think of Polycarp or Papias as his authority. But this is not a matter about which Iren. would naturally remember what, as a boy, he had heard the aged Polycarp say; and if he had been able to appeal to Polycarp, he would have done so by name. It is probably tradition rather than recollection on which he rests.

Justin (*Dial.* lxxxi. 15) is the first to declare that Rev. is by 'John, one of the apostles of Christ' (cf. Euseb. IV. xviii. 8). Melito, bishop of Sardis (170), wrote a lost work on the 'Rev. of John' (Euseb. IV. xxvi. 2). This is important, since Sardis is one of the seven Churches. Theophilus cited Rev. (Euseb. IV. xxiv. 1), and so did Apollonius (Euseb. V. xviii.). Irenæus was a defender of the apostolic authorship of the Gospel, Epistles, and Rev. of John (for Rev. see *Hæc.* IV. xx. 11, v. xxxv. 2, 'John the Lord's disciple,' elsewhere simply 'John,' i. xxvi. 3, IV. xiv. 2, etc., or without name). Iren. took his high estimation of the book with him to the West. It was regarded as 'sacred Scripture' by the Churches in Lyons and Vienne in A.D. 177 (Euseb. V. i. 10, 58; Zahn i. 201, 203 f.). Tertullian cites Rev. frequently, and attests its recognition in Africa, as by 'the Apostle John' (c. *Marcion*. iii. 14. 25). Clement of Alex. cites it and other apocalypses also, and puts value upon them. So also does Origen, in spite of his opposition to chiliasm, which he escapes by allegorical interpretation.

For the Roman Church, the eschatology of Hermas is significant for its independence of Revelation. The book stands, however, in the *Muratorian Canon* without suspicion ('John, too, in the Apocalypse, although he writes only to seven Churches, yet addresses all'); and after the elaborate defence of it by Hippolytus against Caius, its canonicity remained established for the Western Church.

But though hardly any other book in the NT is so well attested in the 2nd cent., there were already those who denied its authority, and its place in the

Canon of the Eastern Church was long uncertain. The objections appear to have rested on dogmatic grounds, though they required to be maintained by a denial of the apostolic authorship of the book. Marcion, as was inevitable, rejected the book because of its strongly Jewish character (Tert. c. *Marcion*. iv. 5). On the other hand, the Montanists, with their high appreciation of the new Christian prophecy and the strongly eschatological type of their Christianity, held the book in high esteem; and it was in opposition to them that the well-known, long-remaining antipathy of the Eastern Church to Rev. was developed.

Epiphanius (*Hæc.* li. 33) tells of a sect which rejected John's Gospel and Rev., and ascribed both to Cerinthus. He calls them *Allogi*, which suggests that the reason for their criticism was the Logos Christology, in which the Gospel, the First Epistle, and Rev. agree. The sect would then be anti-Gnostic, as the choice of Cerinthus for the author would indicate. Epiph. says they supported their view by the fact that there was no Christian Church at Thyatira (Rev 218), where this sect had its seat. They are further described as being averse to the sensuous and extravagant form of the apocalyptic language, the significance of angels, etc.

Irenæus (III. xi. 9) describes a certain sect which rejected John's Gospel on account of its doctrine of the Paraclete, and not only contended against false prophets, but would exclude prophecy from the Church altogether. Since this ground for the rejection of the Gospel would be even more conclusive against Rev., and since Epiph. himself says that the *Allogi* opposed the Spirit and denied its gifts, Zahn (i. 223-227, 237-282, ii. 967-973) concluded that this was the same sect that Epiph. called *Allogi*, and that it was an anti-Montanist, rather than an anti-Gnostic, movement. Now Epiph. probably got his information about the *Allogi* from Hippolytus (c. 190-235 A.D. at Rome), who knew a sect which rejected both books because of the support which the Gospel, in its doctrine of the Spirit, and Rev. in its prophetic character, gave to Montanism. Against these Hippolytus wrote in defence of the Gospel and Revelation. He also wrote another book against Caius, a presbyter of Rome, in defence of Revelation. This Caius, in a controversial writing against Proclus the Montanist (Euseb. II. xxv. 6, III. xxviii. xxxi. 4, vi. xx. 3), had evidently rejected Rev., ascribing it, as the *Allogi* did, to Cerinthus. The citation in Eusebius (III. xxviii. 2) reads: 'Cerinthus, through revelations professing to have been written by a great apostle, brings before us marvels which he falsely claims were shown to him through angels, asserting that after the resurrection there would be an earthly kingdom of Christ, and that men dwelling in Jerusalem will again be subject to desires and pleasures. And being an enemy to the Scriptures of God, he said that a period of a thousand years would be spent in nuptial festivities.' The long dispute as to whether this referred to our Rev. must be regarded as ended by the publication, by J. Gwynn (*Hernathena*, vi. 397-418), of fragments of the reply of Hippolytus to Caius, from which it is evident that Caius, who was not one of the *Allogi* (not a heretic), argued in detail against the harmony of Rev. with the rest of the NT, using some of the arguments of the *Allogi*, and in all probability ascribing it, and not some other apocalypse, to Cerinthus (so Zahn, Bousset, Holtzmann, etc., against Gwynn).

Zahn dates the writing of Caius against Proclus about A.D. 210, and the reply of Hippolytus in defence of Rev. about 215. It is evident that Caius did not question the Gospel of John. After this, no Western Church writer seriously questioned Rev. (though see Jerome's position, below).

In the East, Dionysius of Alexandria (A.D. 255), a pupil of Origen, wrote a temperate and scholarly criticism (Euseb. VII. xxv.), in which he argues that Rev. is not by John the apostle. He reviews previous criticisms, evidently among others that of Caius, mentioning the hypothesis that Cerinthus was its author. He does not reject the book out and out, since others valued it, but cannot himself understand it; and proves, by an elaborate comparison as to literary character, language, and composition, that it is not by the author of the Gospel and the First Epistle of John. It is indeed by some holy and inspired man whose name was John. There were many of that name (e.g. John Mark), and it is said, he adds, that there are two monuments in Ephesus, each bearing the name of John. The ground of the rejection of its apostolicity by Dionysius was probably in part a sense of its difference from John's Gospel, in part the Hellenist's aversion to sensuous hopes, and to the chiliasm which made room for such hopes.

Eusebius, who gives the argument of Dionysius at some length, evidently sympathized with his view, though his own judgment wavers. He in-

clines to ascribe Rev. to the Presbyter John of whom Papias wrote (Euseb. III. xxxix.: 'It is probably the second [John], if one is not willing to admit that it is the first, that saw the Apocalypse'). His doubt as to the place of the book, whether among the *Homologoumena* (accepted) or among the *Notha* (rejected), is expressed in III. xxv. 4. He emphasizes the rejection of the book by good churchmen, and does not mention the almost certain use of it by Papias, or the elaborate defence of it by Hippolytus. Yet he cites many words in its favour.

After Euseb. the opposition to Rev. was for a time general in the Syro-Palestinian Church. Cyril of Jerusalem (*Catech.* iv. 33-36) does not name it among canonical books; nor does it appear in the Canon 60 of the Synod of Laodicea (c. 360?), nor in Canon 85 of *Apost. Const.* viii. (Zahn, ii. 177 ff., 197 ff., 191 ff.); nor is it in the list of Gregory of Nazianzus (*ib.* 216 f.), nor in the so-called *Synopsis of Chrysostom* (*ib.* 230). Neither Chrysostom nor Theodore of Mopsuestia mentions the book, and Theodoret does not accept it. It does not appear in the *Chronography* of Nicephorus, or in the *List of 60 books* (*ib.* 298, 290 f.). The Nestorian and Jacobite Churches did not receive it (Bousset, p. 25).

The question as to the origin and significance of this attitude of the Syro-Palestinian Church leads back to the striking fact that Rev. (with 2 and 3 Jn, 2 P, Jude) did not originally stand in the Syriac NT (Peshitta). It has been supposed that it was still wanting in the Philoxenian version, but Gwynn argues that the version he edited belonged to that translation (*The Apocalypse of St. John in Syriac*, 1897). Was the book, then, wanting in the Canon of the Syrian Church from the beginning? An affirmative answer is made doubtful by the apparent references to Rev. in Ephraem. It is not certain, however, that Ephraem used Rev., the question being involved in questions of text and of authenticity (see Bousset, 21-23). Gwynn (pp. c-cv) believes that the book was excluded 'by ignorance rather than of set purpose' from the Peshitta Canon, and remained unknown to Syriac-speaking Christians for perhaps four centuries, except to the few who could read it in Greek, among whom he reckons Ephraem. Even after translation into Syriac, the book never became familiarly known in any of the Syrian Churches. Their religious thought and rich liturgical literature remained practically uninfluenced by it. Bousset thinks the dominance of another type of eschatology, the Apocalypse of Antichrist, helped to effect the exclusion of Revelation.

The Greek Church yielded only slowly to the decision of the Western, and admitted the book into its Canon. In Egypt, where the opposition first developed in orthodox circles, it was sooner overcome. Athanasius, and others after him, recognized the book. The first Eastern commentary, that of Andreas, belongs to the 5th cent., and the next, that of Arethas, to the 9th. Each begins with a defence against doubts as to the canonicity of the book.

In the West, after the elaborate defence of Hippolytus, Jerome alone shows the influence of Eastern doubts. The Eastern Church, he says, receives Hebrews; the Western, Revelation. He inclined to accept it (*Ep. ad Dardanum*, 129), but elsewhere (in *Psalms* 149) he puts it in a middle class between canonical and apocryphal. This suggestion did not bear fruit until Carstadt (1520), at the beginning of the Reformation, made a threefold division of NT books, corresponding to that of the OT in Hebrew, and put in the third, least authoritative, class (with the OT '*Hagiographa*'), 2 and 3 John, 2 Peter, Jude, James, Hebrews, Revelation. Of these seven, which are 'of third and lowest authority,' Rev. stands last, on the verge of being apocryphal.

Luther at first (Preface in Translation of NT, 1522) expressed a strong aversion to the book, declaring that to him it had every mark of being neither apostolic nor prophetic. Apostles spoke clearly, without figure or vision, of Christ and His deeds; and no prophet in the OT, to say nothing of the NT, deals so entirely with visions and figures. It is comparable only with 4 Ezra (2 Esdras), and he cannot see that it was the work of the Holy Spirit. Moreover, he does not like the commands and threats which the writer

makes about his book (22^{18, 19}), and the promise of blessedness to those who keep what is written in it (1² 227), when no one knows what that is, to say nothing of keeping it, and there are many nobler books to be kept. Moreover, many Fathers rejected the book; and though Jerome says it is above all praise, and has as many mysteries in it as it has words, yet he cannot prove this. 'Finally, every one thinks of it whatever his spirit imparts. My spirit cannot adapt itself to the book, and a sufficient reason why I do not esteem it highly is that Christ is neither taught nor recognized in it, which is what an apostle ought before all things to do.' Later (1534), Luther finds a possibility of Christian usefulness in it, and gives its message in words well worth quoting: 'Briefly [Rev. teaches that] our holiness is in heaven where Christ is, and not in the world before our eyes, as some paltry were in the market. Therefore let offence, factions, heresy, and wickedness be and do what they may; if only the Word of God remains pure with us, and we hold it dear and precious, we need not doubt that Christ is near and with us, even if matters go hardest: as we see in this Book that through and above all plagues, beasts, evil angels, Christ is still near and with His saints, and at last overthrows them' (translation of Westcott, Canon, 1889, p. 488). He still thought it a hidden, dumb prophecy, unless interpreted, and upon the interpretation no certainty had been reached after many efforts. His own interpretation of the book as anti-Papist may have led him to a more favourable opinion of it. But he remained doubtful about its apostolicity (Preface to Revelation in the edition of 1545), and printed it, with Hebrews, James, Jude, as an appendix to his New Testament, not numbered in the index. The other three doubtful books, 2 and 3 John and 2 Peter, it was not so natural to separate from 1 John and 1 Peter. In this way these four books were printed in Luther's Bible as late as the 17th cent. So also in Tindale's New Testament. 'In general the standpoint of the Reformation is marked by a return to the Canon of Eusebius, and consequently by a lower valuation of Hebrews, 2 Peter, 2 and 3 John, James, Jude, and Revelation' (Holtzmann, *Einleitung*, p. 157).

Zwingli regarded Rev. as 'not a Biblical book'; and even Calvin, with his high view of inspiration, does not comment on 2 and 3 John and Revelation. Only gradually was the effort to maintain such a deuterocanonical class of books in the NT given up, as the dogmatic displaced the freer and more historical attitude toward the Bible.

In general it may be said that Rev. has maintained its place in the Canon, in spite of doubts and assaults, not because of its extravagant claims to inspiration and authority, nor because of its visionary form, and not because of its eschatology, but rather in spite of all these, which were marks also of the many apocalypses, Jewish and Christian, that the Church rejected.* Nor can it be said that belief in its apostolic authorship kept the book in the NT, for this was very early denied, and could as easily be set aside, as, for example, that of the *Apocalypse of Peter*, which the Church rejected. The real reason, for the sake of which apostolic authorship was maintained, was the consciousness that, on the whole, the religious faith and feeling of the book predominate over its apocalyptic form, and give to apocalyptic language, which the majority cannot understand or accept in its literal sense, practically the value of figure for the emotional expression of Christian faith and hope. It is really as Christian poetry, rather than as the disclosure of mysteries of the unseen world and of the future, that the book has been valued, and, because valued, preserved and canonized by the Christian Church.

A book, however, which has been canonized because of its general contents, and the spirit behind its form, will inevitably be used by many for its details literally taken. So used, Rev. has often had a harmful influence, setting thought upon useless tasks, and stimulating self-centred and morbid hopes and fears. If one puts over against this the wonderful ministry of comfort and strength in times of trial which the book has rendered, he may find justification both for the doubts and for the final decision of the Church regarding its canonicity.

3. *History of Interpretation.*—The history of the interpretation of Rev. is an interesting chapter in

* Christianity has been in certain sects and at certain times apocalyptic in temper, but not on the whole. Many apocalypses were treasured as sacred by sects and at times, which were left aside by the Church as a whole and in the end.

Church history; * but it is an inseparable part of a much larger chapter which it would be quite impossible to write here. Harnack (*Hist. of Dogma*, i. 129 ff., 167 ff.) describes the two contrasted, though not mutually exclusive, conceptions of Christianity, the eschatological and the spiritual, the relations of which make one of the chief themes in the history of Christian thought. The earlier eschatological view gave way, especially under the influence of Greek thought, to the spiritual conception of salvation. Chiliasm, of which Rev. was the one clear and authoritative source, 'is found wherever the gospel is not yet Hellenized.' It is evident that where Hellenistic views prevailed Rev. must be either rejected or spiritually interpreted.

Among chiliasts, besides Cerinthus, the heretic, are Papias, Justin, Irenaeus, Hippolytus, Tertullian—the early defenders of the authority of Revelation. Origen, on the other hand, could receive the book and yet oppose a chiliastic conception of Christianity. The Eastern Church in general, as we have seen, followed the easier method of rejecting or neglecting the book. In the West, Victorinus (c. 303) commented on the book in a chiliastic (i.e. literal) sense; but a greater influence was exerted by the Commentary of Tyconius (before 380), whose interpretation is spiritualistic. Through him 'the Latin Church finally broke with all chiliastic inclinations and all realistic eschatology' (Bousset, 63). The 'thousand years' denote the present period of the Church between the First and the Second Coming of Christ. He was followed by Augustine (*de civitate Dei*, xx. 7-17) and Jerome.

The possession of world-rulership by the Church took away the ground for chiliastic hopes, and removed both the circumstances and the temper out of which Rev. came. There was, however, a revival of the prophetic spirit in the Middle Ages, in reaction against ecclesiasticism and the secular spirit.

From the protesting order of the Franciscans, who attempted to recover the character and spirit of apostolic Christianity, came a chiliastic interpretation of Rev. about A.D. 1200, by Joachim of Floris. In Commentaries on Jeremiah and Isaiah under his name the end of the world was fixed at 1240 (Rev 11:3 129) and then at 1290. The woman (Rev 17) was already interpreted of the Romish Church by these pre-Reformation reformers, and this, together with a like application of the beasts of ch. 13 to Rome and the Pope, inevitably became a standing feature of Protestant commentators from Luther onwards; with exceptions, such as Grotius (1644) and Hammond (1663-1669).

Over against this enticing but flagrant misuse of the book, Catholic scholars in part sought for other historical applications of these figures (Turks, Mohammed, etc.); but in part made a beginning of a more correct method of interpretation by seeking in events of the author's own time, in the Jews and the Roman empire, for the clue to his predictions.

So especially Alcazar (1614), a Spanish Jesuit of Antwerp, who maintained that Rev 1-11 was aimed against Judaism, chs. 12 ff. against Rome. This correct effort to interpret Rev. in the light of the events of its own time was carried forward by Grotius, Hammond, Clericus (1698), Wetstein (1752) and others, at first with too much reference to Judaism and the fall of Jerusalem, but finally with a growing recognition of Rome as the object of the book's denunciations (Semler (1769, etc.), Corrodi (1780), Eichhorn (1791)). The reference to Nero, in the wounded head (ch. 13), which had been found already by Victorinus (303), and again in a Jesuit commentary (Juan Mariana), was introduced into Protestant exegesis by Corrodi. This so-called *contemporary-historical* (by some called '*præterist*') method of interpretation (i.e. by reference to historical events of the writer's own time) was most fully carried to completion in the great works of Lücke (*Vernicht einer vollständigen Einleitung in die Offenbarung*, 1832, 2nd ed. 1852), Bleek (*Vorlesungen über die Apok.* 1862), and Ewald (Comm. in Latin, 1828, *Die Johann. Schriften*, 1862). So also Volkmar (1862), Düsterdieck (Meyer, 1859-87). †

In general these writers date the book before 70 (Rev 11:1-13); regard it as written chiefly against Rome; and find in it a pre-

diction of the return of Nero. The interpretation of the number 666 as *Nero Caesar* seems to have been made independently by several scholars (Fritzsche, Benary, Hitzig, Reuss, Ewald (?)). With this understanding and dating of Rev., Baur affirmed its apostolicity, and made it a monument of the original Jewish Christianity.

Against this method conservative theologians still attempted either new interpretations of the book as a summary of Church history (the '*Church-historical*' or '*continuously historical*' method, Hengstenberg, Ebrard, etc.), or a reference of its predictions to events still future, the end of the world (the *endgeschichtliche*, '*futurist*' method, Kliefoth, Zahn). A method which is in some sense intermediate between these is one that sees in Rev. not definite events in Church history, but symbolic representations of good and evil principles, their conflict and the coming victory of the good (Auberlen's *reichsgeschichtliche Methode*).

A similar standpoint is occupied by Milligan (*Commentary on the Apocalypse*; *The Rev. of St. John*, Baird Lectures, 1886; *Discussions on the Apocalypse*, 1893; *The Bk. of Rev.* [Expositor's Bible], 1899). The Apoc. embraces the whole period from the First to the Second Coming of the Lord. It sets before us within this period the action of great principles and not special incidents. We must interpret it in a spiritual and universal sense that language of the Apoc. which appears at first sight to be material and local. So also Benson (*The Apocalypse*, 1900) maintains that Rev. unveils Jesus Christ as present in this world, and His enemies, Satan and his agents, who are all principles not persons or historical characters, 'the principles which maintain the self-deceiving half of human nature in its death struggles with a Divine Wisdom which slowly vanquishes it' (p. 176).

It is, of course, true that beneath every book there are certain fundamental beliefs and hopes capable of being generalized and taken out of all historical relations. It is true also, as we shall see, that the allusions, for example, to Nero are not so clear as we should expect of one who set out to describe him in symbol. But the principles which these writers look for are still less clearly symbolized, and it is a fundamental mistake to proceed upon the assumption that such principles are everywhere intended, and also that the teachings of Rev. must agree with all other teachings of the NT and with the judgment of the Christian consciousness. The history of the book in the Canon might well have kept others from the bondage of this assumption, as it kept Luther and the early Reformers. But the assumption is no longer possible for those who approach Biblical study in a historical spirit. For such, the effort to find in the book allusions to events of its author's time is natural, and this method is destined to general acceptance. Of late, however, a growing conviction has arisen that this *contemporary-historical* method is not sufficient by itself to solve all the problems of the book.

The first question to arise concerned the unity of the book. As prophetic books like Isaiah and Zechariah and apocalypses such as Enoch are composite, it was natural to raise the question with reference to Rev., and to remove by literary analysis the unevenness in structure and the want of harmony, both in historical references and in doctrinal views, that had troubled interpreters. Theories of composite origin have been advanced in two general forms: (1) The book is in its present form a unity, but its author made use of various documentary or traditional sources, of Jewish or Christian origin, incorporating them in his work. (2) The present book is the result of one or more revisions of an older Jewish or Christian apocalypse, or more than one.

Weizsäcker, who gave the impulse to this effort at literary criticism, held the former of these two views: * 'We have in

* See Lücke, *Einl. in die Offenbarung*?, 1853; Holtzmann, *Hand-Commentar*, iv. p. 280 ff.; Bousset, *Kommentar*, pp. 61-141.

† To Lücke was especially due the recognition of the fact that Rev. is not an isolated book, but is one of a class, that it belongs in kind to the Jewish apocalypses, and is to be interpreted as they are. The fact that Daniel contains allusions to the Greek empire and to Antiochus Epiphanes was a strong reason for accepting the apparent references in Rev. to Rome and Nero.

* The history of these efforts has been told by Holtzmann, *Jahrb. f. Prof. Theol.* 1891; Barton, *AJTh*, 1898; A. Meyer in *Theol. Rundschau*, 1897; and in fuller detail by Rauch, *Die Offenbarung des Johannes*, 1894, and Bousset, *Komm.* p. 127 ff.

this writing, which is as certainly pseudonymous as are all apocalypses, a compilation, which in its origin is already a compilation; and in its various strata, which certainly reach far back, it testifies in itself alone to an extensive practice of (Christian) prophecy' (*Theol. Lit.-Zeitung*, 1882). The first efforts after detail were, however, made on the basis of the second theory.—Völter, a pupil of Weissäcker, in a series of works (*Die Entstehung der Apok.* 1882, 1885; *Das Problem der Apok.* 1893), attempted to construct a primitive apocalypse of A.D. 65-66, which the author revised after Nero's death. Three or four other revisers added to the work, to the last of whom the letters are due. Völter argues on the basis of (1) want of formal and material connexion, (2) reference to different historical situations, (3) doctrinal differences, especially as to Christology. Some of his observations are just, but his solution of the difficulties is arbitrary and unconvincing.—Vischer (*Die Offenbarung Johannis, eine jüdische Apokalypse in christlicher Bearbeitung*, 1886) put forth a simpler and more attractive hypothesis, which, appearing with Harnack's hearty approval, won many adherents. He believed Rev 41-22⁵ to be a Jewish apocalypse set in a Christian framework (1-3, 22⁶⁻²¹) with a slight Christian revision (5⁸⁻¹⁴ 7⁹⁻¹⁷ 12¹¹ 13⁹ 10 14¹⁻⁵ 12 15 15³ 16¹⁵ 17¹⁴ 19⁸ 10 12⁸ 20⁴⁻⁶ 21^{5b-8} and all references to the Lamb). His starting-point is Biblico-theological, the presence in the book of Jewish by the side of Christian ideas. Harnack (*Nachwort*) admits that this does not in itself involve Jewish authorship, but regards that hypothesis as necessary in this case.

Weyland (*Omverkingen en compilatie-hypothesen toegepast op de Apocalypse van Johannes*, 1888) elaborated Vischer's theory by supposing two Jewish sources. The oldest (2) contained (omitting slight and obvious Christian words or phrases) 10 11¹⁻¹³ 12 13. 14⁶⁻¹¹ 15²⁻⁴ 16 (part, esp. 12 14) 19¹¹⁻²¹ 20 21¹⁻³, i.e. the little book, Jerusalem and the two witnesses, the appearance of the dragon and beasts and their final overthrow, the last judgment and the new world. The later source (N) contained 11¹⁰ 12¹⁷⁻¹⁹ 4. 5¹⁻⁷ 6. 7¹⁻⁸ 9¹⁻⁷ (part) 8. 9. 11¹⁴⁻¹⁸ 14²⁻³ 15⁵ 16^{17a-20} 14¹⁴⁻²⁰ 17. 18. 19¹⁻⁶ 21⁹⁻²⁷ 22¹¹, i.e. the seven seals and trumpets, the fall of Babylon (Rome), and the new Jerusalem. These were united by a Christian redactor who added (besides occasional phrases) 11⁹ 13. 20 2. 3. 14¹⁻⁵ 16^{1-17a} 19¹⁰ 19¹⁰ 22^{7a} 12 13 16-22.

Weissäcker in his *Apostolic Age* rejected these and similar efforts at analysis, and held to his original suggestion that the book is a unity; but its author has made use of various older materials, apocalyptic visions, fragmentary in character, and has introduced these in such a way as to attempt to interrupt his plan. Such pieces are 7¹⁻⁴ 8¹⁻⁷ 11¹⁻¹³ 12¹⁻¹¹ 12¹⁷ 13. 17.

Sabatier (*Rev. de Théol. et de Phil.* 1887, and *Les origines littéraires et la composition de l'apoc. de St. Jean*, 1888) defends a similar view. The Christian writer introduced foreign oracles into his work, viz.: 11¹⁻¹³ 12¹⁻¹³ 14²⁻⁶ 16¹²⁻¹⁶ 17¹⁻¹² (18²⁴) 19¹¹⁻²⁰ 21²⁻²².

Very similar is the view of Schoen (*L'origine de l'Apoc.* 1887).

This view of the composition of Rev., which does justice both to its general unity of plan and style and to the breaks in its plan and the contrasts in its thought, and does not attempt the impossible task of reconstructing complete lost books, has gained the adherence of an increasing number of competent critics. It is the view of Jülicher (*Einleitung in d. NT*, 1894). It is also the view of Gunkel and of Bousset, though these two scholars have carried the problem of the interpretation of Rev. on to a new phase.

On the other hand Spitta (*Offenb. Johannis*, 1889), who had reached his main conclusions independently before the appearance of Völter's work, attempts an elaborate analysis in which every verse and word is ascribed to its source.

The basis of our present book is held by Spitta to be a primitive Christian apocalypse, containing the letters and the seals (14⁴ 9¹⁹ 2-3, [omitting the conclusion of each letter, 27, etc.] 4-6, 8¹ 7⁹⁻¹⁷ 19⁹ 10 22⁸ 16 13 16 18a 20b 21). He believes that this was written by John Mark, about 60 A.D. To this a later Christian added two older Jewish apocalypses; one is from the time of Caligula (13¹⁻¹⁴ refers to an illness from which he recovered; 616 [13¹⁸] = *ἡμεῖς Κασίαν*), occasioned by his effort to erect his image in the temple (13¹⁸⁻¹⁹ 12¹⁷). It contains (a) 7¹⁻⁸ 22⁵, (b) 8⁸⁻²², (c) (9¹⁵) 10¹⁻⁷, (d) 11¹⁵ 19 12¹⁻¹⁷ 12¹⁸⁻¹⁹ 14¹⁻¹¹ 16¹³⁻²⁰, (e) 19¹¹ 21¹ 2a 2b. The other Jewish source is put back to the time of Pompey (Israel's first conflict with Rome, and the danger of the temple). It is composed of (a) 10¹⁵ 2a 2a 9b 11, (b) 11¹³ 15 17 18, (c) 14¹⁴ 20 15²⁻⁴, (d) 15⁵ 16¹³ 17 21, (e) 17¹⁻⁵ 6b 18¹⁻¹⁹, (f) 21⁹⁻²² 22¹⁵. All other parts are from the hand of the reviser.

Spitta's work contains much that is of great value, but scholars generally agree that such minute analysis is impossible, that the book has a greater unity than this theory admits, and that in particular to ascribe the seven seals, trumpets, and bowls to three different hands is to over-

look one of the unmistakable characteristics of the final writer. Yet Briggs (*Messiah of Apostles*, 1895, chs. 9-15) goes even further in this direction. His analysis but not his view as to authorship [epistles, seals, bowls, and probably trumpets being attributed by Briggs to one author, the Apostle John (pp. 303, 369)] is followed by Barton (*AJTh*, 1898).

It is not to be concluded that the many laborious and ingenious efforts at literary analysis have been without value, even though they have led to no agreeing result. There has been increasing agreement as to certain general points. The book, though probably the work of one writer, is not the original product of one mind or one occasion. It contains sections which appear to be foreign to the rest, and may well be of Jewish origin, though the line between Jewish and Jewish-Christian is one impossible to determine. 7¹⁻⁸ 11¹⁻¹³ 12. 13. 17 quite certainly belong to this category, and there are other sections which may have been taken by the writer in practically finished form from apocalyptic tradition (e.g. 18. 20. 21⁹⁻²²). This result, however, important as are its bearings on the interpretation of the book, since it relieves us of the necessity of finding one type of religious thought or one historical situation in all parts, by no means solves all or even the more important problems of historical exegesis.

Gunkel (*Schöpfung und Chaos in Urzeit und Endzeit: Eine religionsgeschichtliche Untersuchung über Gen. 1 und Apoc. Joh. 12* (1895)) sharply formulated one of these outstanding problems—that concerning the ultimate origin, the first meaning, and subsequent history of that traditional material from which apocalyptic writers drew. He criticized both the methods in which critical scholars had treated the book—that which looks everywhere for figurative references to historical events of the writer's time, and that which devotes itself to literary analysis as an end. Acknowledging that some of the apocalyptic figures are allegories of current events (Dn 7. 8, Enoch 85 ff., 4 Ezr 11 f., Rev 13. 17), and also that criticism must separate some sections from their setting, he yet urges that tradition largely fixes the form of the figures, and that the apocalyptic writer uses them not with freedom, but with reverence; not creating them as a poetical embodiment of well-known persons and events, but seeking in them for the clue to the mystery of the present and future. The history of tradition is therefore more important than the history of literary composition. Tradition is, in fact, the real author of an apocalypse, and it is this fact that gives the writer his deep conviction of the truth of his predictions. Except where it is expressly indicated, it is not to be assumed that references to historical persons and events are hidden behind the apocalyptic imagery. With reference to most of such images (e.g. 9¹⁻¹¹ 9¹³⁻²¹ 11¹³⁻¹⁵ 16¹²⁻¹⁴ 16 6⁹⁻¹¹ (cf. 4 Ezr 4³⁵) 11¹⁻² 6¹⁻⁸ 16. 6¹²⁻¹⁷), Gunkel declares the contemporary-historical method bankrupt. Even in ch. 13, where the first beast is the Roman empire, and in ch. 17, where the woman is the city (Rome), many details are not to be explained historically. Here Gunkel carries his opposition to the ruling method so far as to deny the almost universal opinion of critics that Nero is indicated by the beast and its' number (pp. 210 ff., 336 ff.). Of Gunkel's specific argument, which is to illustrate and vindicate his method, viz. that Rev 12 is ultimately an otherwise lost Babylonian myth of the birth of Marduk, the conqueror of the Dragon, more will be said below. Other elements taken from Babylonian mythology Gunkel found, especially in chs. 13 and 17, but also in the seven angels, stars, candlesticks, eyes (p. 294 ff.), the twenty-four

elders (302 ff.), Harmagedon (263 ff.), the number 3½ (266 ff.), the number 666 (374 ff.).

Bousset adopted Gunkel's method in *Der Antichrist in der Uebertieferung des Judentums, des neuen Testaments und der neuen Kirche* (1895), and attempted to show that an essentially fixed apocalypse of Antichrist, originating in Judaism, can be traced from the New Test. down through the Middle Ages; and that this tradition is essentially independent of Rev., though Rev. at certain points shows dependence upon it. In his *Kritisch-exegetische Kommentar* (Meyer, 1896), Bousset, on the question of composition, follows the method of Weizsäcker, regarding the book as a unity, but seeing in many sections apocalyptic fragments introduced by the writer from existing tradition, in part Jewish in origin. In several of these fragments Bousset finds parts of the Antichrist-tradition (71-8, 111-13, 131-17, 141-20); others also may well be of Jewish origin (131-10, 18, 17 [with which should probably go also 1612-21 and 18], 212-225), while 12 is of foreign but apparently not of Jewish origin. Bousset's treatment of various matters of detail will be mentioned in the course of this article.

Holtzmann (*Einleitung in d. NT*, 1892; *Hand-Commentar*, 1893) recognizes indications of a double historical background (soon after the death of Nero, and in the reign of Domitian), but does not go beyond the recognition of two or more streams in the book, and holds chiefly to the contemporary-historical method of interpretation, though now recognizing also the importance of tradition as a source of the writer's material (*Lehrbuch der neuest. Theol.* I. 463-476).

The relative value of the three methods of interpretation last discussed—the contemporary-historical, the literary-critical, and the tradition-historical—is still a matter of debate (see Wellhausen, *Skizzen u. Vorarbeiten*, vi. 1899, pp. 215-249, and Gunkel, *Zeitschr. f. wissenschaftl. Theol.* 1899). Each in a measure limits or controls the application of the other, and the right of each, within its bounds, may fairly be said to be established. Yet they do not, taken together, wholly cover the ground. On two general lines, much work remains to be done. One is the psychological study of apocalyptic writing, the other is the historical relations of the Christianity of Rev.,—esp. the relation of its eschatology to that of Jesus and to that of St. Paul, and the relation of its Christology and Soteriology to the Pauline and the primitive apostolic. Gunkel at first put forward his tradition-historical method as also a psychological explanation of the apocalypse. The writer's belief in the truth and inviolable sanctity of his mysterious message could arise only from actual vision (which the nature of the material and the tendency of the modern mind exclude), or from the real antiquity of the material, before which the writer himself stood with awe. But Gunkel himself is now inclined to allow the actuality of visionary experiences (as psychologists recognize them) in connexion with the writing of apocalypses (see the Introduction to his translation of 4 Ezra in Kautzsch's *Pseudepigraphen d. AT*, 1900, and Preface to the 2nd ed. of his *Wirkungen des Heiligen Geistes*, 1900). The most significant effort in this direction, and the occasion of Gunkel's modification of his former position, is Weinle's *Wirkungen des Geistes und der Geister*, 1899.

On the other hand, the question so vital to an understanding of the beginnings of Christianity, whether the Christology and Soteriology of Rev. are Pauline, anti-Pauline, or independent of Paulinism, remains quite unanswered; as does the other still more vital question whether the eschatology of Rev. (given as the dictation of Jesus, 1¹ 22¹⁶) is based on that of the Gospels, and ultimately on the teaching of Jesus, or is the source of the eschatology which the Gospels wrongly ascribe to Him.

The final problem of the interpreter is, of course, to get back as fully as possible into the mind of the writer. Two main paths are now open that lead toward this result in the case of Revelation. (1) The study of apocalyptic literature in general; (2) the study of the contents, plan, sources (so far as known), historical situation, and teachings of the book itself. These two paths will be pur-

sued in the following discussion. Two other paths invite exploration—(1) the psychological study of trance and ecstatic conditions and phenomena in religious history, (2) the origin and relations of the apocalyptic and the spiritual types of Christian thought in the 1st cent. These two paths must be opened by further research, in the latter case most of all in the Gospels, before results can be summarized in an article like the present.

In following the two main paths just indicated, the following presuppositions will be in part assumed as a result of the history of criticism, in part, it is hoped, proved by the discussion—(1) Rev. is an apocalypse among others, and is to be viewed and interpreted as such. (2) Rome is that embodiment of evil against which the book is chiefly directed, whose overthrow it immediately predicts. (3) The book makes use of apocalyptic materials from various (often probably from Jewish) sources, so that the question as to the place of a given section in the writer's plan, its meaning in his use of it, is to be kept distinct from the question of its original meaning and use, and the interpreter at many points has a twofold task. (4) It may not infrequently happen that the writer receives from tradition details which have no meaning at all for him, but which he retains as parts of the picture. The traditional meaning is in such cases the only one for which we need to search; and often we can only say that it belongs to tradition, since the clue to its meaning is lost. (5) In such cases, and in various others, the possibility is open that the writer uses such material for its poetic value, and not because of a reverence which prevents his altering it.

ii. THE NATURE OF APOCALYPTICAL WRITINGS.—The Book of Rev. calls itself a prophecy, and its author classes himself among prophets; but the book is called by us an apocalypse, and we have applied this title to certain other Jewish books, and some Christian adaptations and imitations of them, which we distinguish somewhat sharply from prophecy. Our interpretation and estimation of Rev. is deeply affected by this classification. What, then, is the apocalypse in its distinction from prophecy? We cannot avoid some preliminary discussion of this question (though see, further, APOCRYPHA I., APOCALYPTIC LITERATURE, PROPHECY), as it bears on the nature of our book and the way in which it should be used. There are still some who class Rev. with the prophetic rather than with the apocalyptic writings of Israel (e.g. Zahn), and there are some who class it with apocalypses, but regard the apocalyptic as a higher form of inspiration than the prophetic (see Terry, *Biblical Apocalypses*, 1898, pp. 11, 12). Since such views strongly affect interpretation, it is essential to understand the historical relation of the two forms of writing and the place of Rev. in relation to them.

The transition from prophecy to apocalypse was effected in the OT itself. It was not a sudden but a gradual transition, nor is the contrast at the end an absolute one. The change is usually traced to Ezekiel for its beginning. Daniel is the oldest book which has complete apocalyptic form; and it remains the classical example and type of this kind of writing. Yet anticipations of certain marks of this literature can be found in earlier prophets, especially in Isaiah (e.g. Vision of God, ch. 6; description of Day of J^h, ch. 2; perhaps the inviolability of Jerusalem), and genuinely prophetic traits are not wanting in Daniel (cf. 9¹⁻¹⁹), or even in other apocalypses from Bk. of Enoch to 4 Ezra. The character of the Book of Daniel deserves somewhat close attention because of its fundamental significance and many special points of contact with Revelation.

1. *Book of Daniel.*—(a) *Occasion and message.*—The Bk. of Daniel appeared during the religious persecution of Antiochus Epiphanes. Its aim was the encouragement of patient endurance and fidelity amid persecution. It taught this lesson in part by stories (histories) illustrating the safe-keeping by God of those who resist the temptations and endure the violence of the world-power in its hostility to God; in part by predictions of the approaching end of the power now threatening and afflicting the people of God.

Antiochus shall die by a judgment of God (825 926. 27 1127. 45) after about 34 years (814 927 127. 11. 12), and the Greek world-empire shall be overthrown (234. 35. 44. 45 711. 26). This is to be accomplished not by human effort, but by God directly (234. 44. 45 825 792. 22. 26), or through Gabriel and Michael, who contend with the gods of heathen nations (1013. 111 121). After this a time of trouble shall follow, testing the Jewish people, including some of the dead, and dividing the good from the wicked (121-14. 10). Then shall be established the kingdom of God, which is the world-kingdom of Israel, and is to endure for ever.

(b) *Underlying faith.*—The general foundation on which this message rests, the underlying doctrine of the book, is monotheism, the faith that all power is God's; that 'the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will' (417. 28. 32 521), and that times and seasons are in His hand, fixed by His purpose. This faith requires the inference that God's rule must and at last shall be recognized by all kings and nations, and that He must, in the end, take His kingdom to Himself (244), and rule it through His own people (712. 14. 22. 27). But the very fact that the realization of God's rule is future reveals the dualistic element which stands over against monotheism in the theology of the book. The contrast between the present and the future, between this age and the age to come, reaches beyond the visible into the invisible world, and is connected with contrast and conflict there, finds there, indeed, its explanation. The seer who would understand the present perverse and intolerable course of history, with heathen nations at the head and Israel at the tail, must not only have the veil lifted that hides the future developments of God's fixed plan, but must see behind the scenes those actions in the angelic world by which man's history may be influenced, in some sense, and for a time, even against God's plan.

(c) *Source and authority of the message.*—Whence did the writer gain his certainty of the near approach of the fall of the existing world-empire, and the realization of the kingship of God, and of the beings and actions in the angel-world which explain present evils and are to effect their end? The predictive parts of Daniel (chs. 7-12) could well be described, like Rev 1¹, as 'revelations of God through his angel Gabriel to his servant Daniel.' Gabriel's communications are in part in the form of interpretations of dream-visions (chs. 7. 8. cf. 2), but once he interprets an OT prediction after Daniel has studied it and prayed over it (ch. 9), and once Gabriel appears to Daniel after a three weeks' fast, and declares to him directly (not through figure) mysteries of the spirit-world and of the future (chs. 10-12).

The visions are described as real experiences, time and place being given, and the deep emotions of the seer described (715. 28 815-18. 27 93. 20 107-10. 15-19). The experiences seem to lie in the region of sleep or on its borderland (71. 2 815 10⁹). Their subjective reality seems to be in a measure confirmed by the intense seriousness which characterizes the book, and the writer's evident belief in the value and Divine origin of his message.

But, on the other hand, the book is unquestionably pseudonymous, and the visions contain, in the form of Gabriel's disclosures about the future, much that was to the author really, and of course

consciously, history. Is this consistent with the impression that the writer is describing really visionary, ecstatic experiences, or does it compel us to assume that the vision is throughout a literary form? The problem is really a psychological one. How are we to explain the form of the book, that of visions and angelic interpretations, so as to explain both the fact that these consist largely in history disguised as prediction, and the fact of the writer's emotion and conviction as to their contents? It is evident that this form served the writer's practical purpose, for it showed that the present insupportable condition of his people was foreknown and determined by God, and it gave a ground for belief in the truth of predictions of really future events. But the emotion and conviction of the writer seem inconsistent with his use of a purely artistic, not to say artful, form of composition.

We are undoubtedly helped towards a solution of the problem by the fact, whose significance we owe to Gunkel, that the predictions of the apocalypse are not novelties, but rest in part on tradition. The foresight of Daniel comes to the writer, at least in part, through the study of the older prophets. The interpretation of the 70 weeks of Jer 25^{11f.} 29¹⁰ is certainly of central significance in the book (ch. 9). But it is probable also that symbolical figures such as those of chs. 7 and 8 (cf. 2) were not invented *de novo* by the author, but came to him from the past, and were regarded by him as mysterious types and forecasts of human history, in which he could find the future the more surely because he could find in them the past. The pseudonymous form becomes both less offensive to us and more intelligible if we suppose that the writer was actually searching in ancient prophecies, and in apocalyptic traditions to him no less ancient, for previsions of the actual course of post-exilic Jewish history, in order that he might the more firmly believe and the more surely convince others that the present crisis is not a break in the plan of God, but a necessary stage in its unfolding, and that the promised deliverance is near. It is possible also in this case to suppose that the interpretation came in connexion with deep emotional experiences.

(d) *Plan of the composition.*—Daniel is characterized by an unmistakable unity of tone and general teaching; but unity in plan and in detail is not obvious, and various efforts to prove composite authorship have been made. In fact the book is made up of ten quite distinct pieces, largely independent of each other (divided according to chapters, except the 10th, which includes chs. 10-12). Distinct apocalypses could easily be made of chs. 2. 7. 8. 9. 10-12. It is, however, the prevailing and probable view that the book, as we have it, comes from one author; that the enemy of God and His people is everywhere Antiochus, and the hope everywhere that of his speedy overthrow and the rulership of Israel over the nations. The book, then, has no chronological sequence throughout; it does, however, describe the present distress and the coming deliverance on the whole with increasing definiteness and detail in the successive figures. Ch. 7 is more explicit than ch. 2, while ch. 8 describes the Greek empire unmistakably, and chs. 10-12 give almost a direct history (though still in vision form) of Antiochus IV. This plan is accounted for as serving well the admonitory aim of the writer, which the stories also evidently serve. His plan is to give a clearer and fuller disclosure of the future as the book proceeds, but to enforce constantly in varied forms the lesson of the reality of God's rule and the safety of patient and enduring trust in Him amid present troubles. There is no anxiety about exact consistency throughout. The

overthrow of the Greek kingdom is at first the deed of God alone, but in the last vision Michael is the deliverer. At first the consummation seems to follow directly upon the fall of Antiochus, but in ch. 12 a period of trial for Israel intervenes before its glory. The stories teach a present deliverance for the faithful, but at the end martyrdom and a deliverance only after death come into view.

2. *Characteristics of Apocalypses in comparison with Prophecy.*—On the basis of this description of Daniel we may attempt a brief discussion of the characteristics of apocalyptic literature in general in comparison with OT prophecy.

(a) *Situation and message.*—In the case of the apocalypse the situation is always one in which the righteous are in trouble, because of the rule of a foreign power, and usually also because in the Jewish community itself those who have power and prosperity are the wicked, not the righteous. The message is that deliverance is soon to come, and for this men are to wait in patience and trust. The pre-exilic prophets, on the contrary, spoke in times of national prosperity and confidence of a coming day of J', which would be a day of judgment on Israel at the hand of a foreign power. The message was one of repentance and righteousness that the threatened judgment might be averted, the sentence recalled. The prophets predicted primarily judgment, not deliverance; the prediction was conditional, not fixed; and the practical inference was repentance, not patience. The change of message belonged in part to the change of situation which the Exile itself effected.

(b) *The dualistic theology.*—Bousset rightly calls 4 Ezr 7¹⁰ 'The Most High has made not one world, but two,' the inner principle of the apocalypse. The sharp contrast in which the kingdom of this world, which is the kingdom of Satan, is set over against the kingdom of God, can be partly explained as a result of tendencies within Judaism; but it seems probable that the Persian dualistic religion must be taken into account in order to explain this strange departure from the otherwise strongly marked monotheism of Judaism (see esp. Stave, *Einfluss des Parsismus auf den Judentum*, 1898). In contrast to this dualistic tendency the older prophets were far more consistently, even if less theoretically and consciously, monotheistic, for they believed in the actual rule of the God of righteousness in present world-history as well as in the coming age, in the visible and not only in the invisible realm. They therefore saw evidence of the nearness and reality of God's rule in the presence and growth of the power of good; while the tendency of the apocalypse was to see in the growing power of evil the evidence that God's intervention, His reversal of human history, was at hand.

(c) *The element of prediction.*—Unfulfilled prophecy is the foundation upon which the whole structure of the apocalypse was built. This was both the problem and the reliance of Jewish faith and hope. What was spoken must be literally accomplished. Of conditional prediction the apocalypse knows nothing. The prophets' predictions of judgment had been fulfilled by the Exile, but their predictions with reference to the return from exile had never been fulfilled by the actual return; hence it must be that these hopes of the renewed land, the united tribes, the royal power and glory of Israel, were still to be realized. What the prophecies really meant, in view of their apparent contradiction by events, when and how their fulfillment was to come about, it was the task of the apocalyptic scribe to discover. Ezekiel took a decided step towards apocalypse when, on the basis of the words of Zephaniah and Jeremiah concerning the Scythians, he predicted the final assault of Gog

and his wild hosts upon Jerusalem and their overthrow, and thus established one of the fixed elements in apocalyptic dogma (Ezk 38¹⁷ 39⁹). Haggai and Zechariah still looked for a human explanation of the failure of the hopes, and found it in the delay in rebuilding the temple; Malachi, in imperfect offerings and withheld tithes. But in Daniel the reason is found no longer in the fault of man but in the plan of God. The 70 years are 70 weeks of years, and the unalterable time for the end is only just now drawing near. 4 Ezra reinterprets the fourth beast of Dn 7 to prove that Rome also was included in the predestined course of history before the end could come (12¹¹, 12). Only in the Bk. of Jonah do we have a protest against the dominant apocalyptic by a surviving prophetic spirit. Here the prediction is of judgment, its aim to produce repentance, and the result the success of the preaching, with the failure of the prediction. Yet even a book written in part to prove that prediction is ethical in aim and conditional in result could be used by Jews as if its predictions were magical and inviolable (To 14⁴, B). The fault of the prophet Jonah, which the book uncovers and rebukes, was the fault of Judaism and its apocalypses. The Bk. of Jonah is a true utterance of the spirit of prophecy in unavailing protest against the narrowness, the jealousy, and the revenge that inspire much of the apocalyptic writing. Prophecy is fulfilled by every evidence in history of the rule of a righteous and merciful God, whether anticipated or not, whether for the benefit of Jews or of Gentiles. Apocalypse sees the hand of God and the vindication and glory of the seer only in a literal correspondence between predictions and events, and only in the fall of a Nineveh and the glory of Zion and Israel.

(d) *Pseudonymous authorship.*—It corresponds perfectly to the contrast just described that prophecy should be a personal and direct form of speech, the apocalypse a pseudographic and mysterious form of writing. The prophet stood before his people and spoke in his own person. The authority of his speech was in no small measure that of his personality. He spoke first and wrote afterwards, but wrote as he spoke, in the first person. When, in the Exile and after it, prophets followed who repeated what others had said, or gave expression to the common faith, and had no peculiar message, their names were unimportant, and many of them wrote anonymously (Is 40-66, Malachi, Zec 9-14, etc.). Daniel is the first example of that pseudonymous prophetic writing which characterizes the whole apocalyptic group. It embodies the Jewish worship of prediction. Yet the moral earnestness and religious elevation of books like Daniel and 4 Ezra make it difficult for us to regard them as fictions, and certain considerations may help us to understand how this form of writing could be used by such men, although we must at best put their work far below the simplicity and openness of genuine prophecy. The fact that the apocalyptic writer was a serious student of ancient prophecies, whose sacredness he revered, and whose secrets he believed he could in a measure expound, suggests that he did not regard his thoughts as his own. The fixed and really ancient character of such apocalyptic traditions as those of the dragon of the deep, makes conceivable such a writer's evident faith in his predictions, which would be psychologically incredible if the visions were pure works of the imagination. Furthermore,—and this is an observation of great importance,—no apocalypse gives the impression of entire unity and harmony. Not only the writer's own studies of OT prophets, not only his own interpretations of apocalyptic imagery, but those of others before him are at his command, and furnish

the materials of his book. Not only traditions, but writings form his sources. These materials may already have connected themselves with Enoch, or Moses, or some other great name. So that one may venture to say that the pseudonymity of these books has some basis in actuality. The hiding or sealing of the book until the end (Dn 12⁴ 8²³ (10¹⁴), Assump. Mos. 1¹⁶⁻¹⁸) belongs to the pseudographic form, accounting for the appearance of the book so long after the time of its assumed origin. Yet this may also express the actual fact of the ancient character of the writer's sources. The writers could not have put forth this material altogether in their own names, for it is not as a whole their invention. They are largely compilers and commentators, and have a deep reverence for their sources. Yet this observation, which we owe to Gunkel, must be modified in view of those figures which are unmistakably and even explicitly constructed for the purpose of setting forth in allegorical form the history of the past, especially of the recent past, as foreseen by the supposed ancient author. Dn 7 contains, no doubt, traditional material of the sort just described, but it has been freely re-shaped so as to contain the history of four successive world-empires. If the original form of the tradition contained only one dragon of the deep, how can we be sure that the description of the one like a man was not part of the writer's elaboration of his material, rather than, as Gunkel affirms, part of the tradition itself? And if so, his belief in the forecast it contains preceded his use of the tradition and determined his use of it.

(e) *Literary material and form.*—The apocalypse is characterized by the use of striking figures, not only strange and unnatural, but evidently mysterious in character, seen in dreams and visions, interpreted by angels, and yielding secrets of the future course of history. Although prophecy is full of figurative forms of speech, freely fashioned, or poetically and rhetorically applied, yet these figures have neither the strange unearthly character nor the mysterious value of the distinctively apocalyptic symbols. These latter, at least in part, go back to primitive mythological formations. This connexion is quite unmistakable in Zech., where a mass of this material suddenly meets us. The four winds, messengers and agents of God, and the seven planets; His eyes, which run to and fro through the whole earth, are still clearly to be perceived as the underlying foundation of figures which the prophet applies to the historical situation, and to the two men, Joshua and Zerubbabel, on whom he fixes his high hopes (28-11 61-8 4²-6a. 10b-14). Yet Zech. uses such material as poetry, while in Daniel it has value as mystery, containing, for one who could interpret it, the secrets of the future. The vision and its interpretation by an angel comes therefore to be of supreme value, and revelation is conceived of in this half-sensible and wholly supernaturalistic way. Ezekiel here also leads the way. His vision of God is more sensible than Isaiah's, and his inspiration more external and supernaturalistic than Jeremiah's (cf. Ezk 1 with Is 6, and Ezk 2. 3 with Jer 1).

(f) *Literary composition and history.*—After Daniel, the Jewish apocalypses appear to be in no case proper unities. Most of them have been adapted by revision to use in later and changed conditions, and all of them, including Daniel, appear to be based in their first writing on older materials which they embody, without serious effort to build them into a harmonious structure. The Bk. of Enoch is a compilation of Enoch literature, having indeed a certain rough plan as it now stands, but without real unity. Even chs. 1-36 contain three distinct descriptions of the Messianic

consummation (chs. 5. 10. 25), which, in connexion with the description of Sheol (ch. 22), form anything but a continuous and consistent picture. Almost all forms of the Jewish hope are contained in this book: that in which the Messiah occupies the central place, that in which he is subordinate, and that in which he is wholly absent; that in which the scene and character are purely earthly, that in which they are properly heavenly (angelic); that in which the heavenly precedes the earthly and finally descends to earth (37-70), and that in which the heavenly follows after the earthly in chronological succession (91¹²⁻¹⁷)—the chiliastic scheme. In general the apocalypses are not characterized by a thoroughgoing unity of scheme, nor even by a consistent unity of teaching, and cannot be understood except by the recognition of independent sources, and also, in some cases, editorial revision. Here we have especially to do with the additions of Christian hands, since through them alone these books, after Daniel, have reached us. In some cases this Christian revision has gone but a little way (Enoch, Assump. Mos., Apoc. Bar); while in some cases the Jewish apocalypse is found in a radical Christian revision (Asc. of Isaiah, Test. XII. Patriarchs). The questions as to literary analysis and the presence of a considerable Christian element are still very variously answered, especially in the case of Enoch 37-70 (71) and 4 Ezra.

(g) *Apocalyptic dogmas.*—The religious teachings of the prophets, individual and distinct as they are, can be summarized only in some such statement of their moral and religious principles as Mic 6⁸ ('to do justly, and to love mercy, and to walk humbly with thy God'), in connexion with such a formulation of their preaching of repentance in view of the threatened judgment as Zech. gives (1⁴ 7^{9a}, connecting v. 9 with v. 7). But in the apocalypses not principles so much as details become fixed in dogmas. Daniel's general scheme for the future is unchanged: a coming Day of J', which is near at hand, and comes when evil is at its height; the overthrow of the world-kingdom, the sifting of the Jewish people, and the possession by the righteous of kingship over the nations and lasting blessedness. To this were added, from Ezekiel, a final assault of the outstanding heathen upon Zion, in which they are gloriously and finally vanquished; from various prophecies, the expectation of the return of the ten tribes and the gathering of the dispersed Jews; and details regarding the renewed land and city, such as Deutero-Isaiah, Ezekiel, Haggai, and others suggested.

Within this general scheme some important differences were possible. The Messiah is sometimes conceived of as God's agent in establishing his kingdom on earth (e.g. Pa-Sol 17, Enoch 37-70), sometimes as king after the kingdom has been set up by God, e.g. Enoch 90, 4 Ezr 7²⁸, Apoc. Bar 29; and sometimes all is done by God alone, and there is no king beside him (e.g. Daniel, Enoch 1-36, Assump. Mos. 10).

The place of the individual in this eschatological scheme is differently estimated. Sometimes, and in general one may say in earlier times, nations are the chief actors, and it is the problem of Israel that events are to solve. Increasingly the individual claimed consideration, and the suggestions of Dn 12^{2.3.13} were followed and elaborated. An eschatology of the individual was developed in connexion with the national, and gradually threatened to subordinate the national to itself. At first it was enough that the righteous dead should arise to have the part they deserved in the glory of the nation. But at some time the effort to claim for the individual a more than earthly and temporary future, and perhaps also the effort to ascribe to the coming age a more than earthly glory, produced a strain and at last a break in the traditional hope. There came to be two consummations, the earthly, the world-rule of Israel, the Messianic kingdom, which would come to an end and be followed by the heavenly and eternal. Of this break of the one hope into two our earliest record is in the Apocalypse of Ten Weeks in Enoch 93-10 91¹²⁻¹⁷. Cf. 4 Ezr 7²⁸, Apoc. Bar 40³, Secrets of Enoch 33, and see MILLENNIUM. In connexion with this scheme, the lot of the soul after death became a subject of apocalyptic research and vision by the side of the lot of Israel and Zion (4 Ezra).

The idea that the visible and human world was to be understood by the invisible and angelic that lay about and beneath and above it, led the apocalyptic writers not only to a developed angelology, in part Persian in origin, but also to researches in the mysteries of nature, especially in reference to the movements of the planets, most of all those of the moon, such as are elaborated in Enoch 72-79. 82. 412-9 43. 44. 59. 69. But while some apocalypses are concerned with such speculations, others move back in the opposite direction to an almost prophetic earnestness of moral denunciation and exhortation (e.g. Enoch 91-104).

(3) *Inferences as to Methods of Interpretation.*—From this brief study of the nature of the apocalypse certain inferences follow as to the method of interpretation.

(a) *Not 'futurist.'*—The apocalypse has to do with the present and the immediate, not the remote future. Its predictions are to be understood as referring to actual or imminent historical factors and events.

(b) *Contemporary-historical.*—Some of the figures of the apocalypse are invented or freely adapted in order to represent historical persons, nations, and events. These are to be explained in accordance with their origin by the events which they describe. From them we may hope to get the clearest light upon the date of the writing.

(c) *Tradition-historical.*—Some of the figures are borrowed from the OT or from older apocalypses or traditions. In such cases the interpreter must distinguish between the original meaning of the figure and the present author's purpose in using it. He may have used it because in the main it lent itself to his application, but he may have preferred not to change it, either from artistic instinct or from reverence. It is a mistake, then, to assume that every detail had a meaning to him, and to insist on finding it. Perhaps some features of the picture were as much a mystery to the writer of our book as they are to us. Sometimes we can guess quite plausibly what the original meaning was, although we cannot tell whether the writer of our book gave it a meaning or not.

(d) *Literary-critical.*—The unity of an apocalypse cannot be assumed. The ancient material just alluded to may be introduced almost entire from some unknown source. Later readers might weave together distinct oracles, especially if they passed under the same name; and editorial comments or changes are always possible in the effort to adapt an apocalypse to the changed conditions or the changed beliefs of a later time. Literary criticism must, however, be held in check by the fact that a writer often himself used ancient traditional materials only partly harmonious with his own time and teaching, and fitted them but imperfectly into his plan.

(e) *Poetical.*—The underlying religious faith and the immediate practical aim of an apocalyptic writer (to encourage faith amid trial, to recall apostates, to guard readers against the influence of foreign thought and life, etc.), must not be lost sight of in the study of the mysteries of the unseen or future world which he would unveil. The question is always to be asked how far the strange accounts of the unseen world and of coming events were of literal, and how far of figurative or poetic value to the writer himself. There was something of the poet in the apocalyptic seer. He was seldom simply a scribe and a literalist. The greater the variety and the less the outward consistency of his visions, the less probably were they regarded by him as literally true. In connexion with this the question must arise as to the psychical experience of the apocalyptic writer, the possibility of some actual visionary experiences among the many which must be regarded as fictitious, a mere literary form. Thus Gunkel believes that such genuine experiences lie behind

some of the visions in 4 Ezra (2 Esdras), more in the first three visions (chs. 3¹-9³⁷) and less in the last three (11-14).

4. *Rev. as an Apocalypse.*—We may now notice certain points of likeness and of unlikeness which a general comparison of Rev. with the Jewish apocalypse suggests, and certain points of uncertainty which form the main problems in the following discussion.

(a) *Likeness of Rev. to Jewish apocalypses.*—The Bk. of Rev. is written to encourage faith and endurance amid trials and persecution. These trials are at least chiefly due to the rule of Rome, though within the Christian communities directly addressed there are false as well as true members. The message of the book is one of repentance only in the case of indifferent or wavering believers (2⁵. 16 3⁵. 14 [and Jews, 11¹² ?]). It is not a message of repentance for those whose sin is chiefly denounced (9²⁰. 21 16⁹. 11 22¹¹), but of deliverance and reward for those who endure a little longer; and of judgment and destruction for the evil power and its adherents. The situation and message are those of apocalypse, and not those of prophecy.

Apocalyptic, also, is the contrast between the present and the coming age; the conviction that evil must increase, and that its violence is a sign of the nearness of the end; the belief that evil has its source and strength in the world of spirits, and that angelic conflicts and triumphs precede or accompany those among men.

Rev. contains an abundance of that striking and highly wrought imagery which characterizes an apocalypse. These images are in part borrowed from Zech. and Daniel and other OT writers; in part, presumably, from the storehouse of apocalyptic traditions. That they are not used simply as poetical ornament, but have for the writer in part a mysterious value, is at all events a natural first impression. The facts that the book is so largely made up of such imagery, and that it is put in the form of vision, and is interpreted to the seer by angels, make up the most obvious resemblance between this book and the Jewish apocalypses. The literary materials and form are largely apocalyptic. That this resemblance is not merely formal but deep-going, is suggested by the extraordinary claims with which the book is sent out (1¹⁻³ 22¹⁸. 19). In its supernaturalistic conception of inspiration the book is apocalyptic rather than prophetic (1^{10a}. 4^{1a}. etc.).

In its scheme of the future, the contents of its prediction, the book has an obvious likeness to the Jewish books of this class: the coming of the day of the Lord Christ, when evil is at its height; the overthrow of the world-kingdom, Rome; the sifting of the Christian people; the earthly Messianic age, in which the saints (Christian martyrs) will possess the kingdom and reign with Christ; the final assault and overthrow of the powers of evil, the Gog of Ezekiel's prediction; the general resurrection and judgment, and the new heaven and earth with individual and eternal awards: this is simply the Jewish scheme in its Messianic and chiliastic form, with Jesus as the Messiah, and His servants as the saints and heirs. Over against such likenesses in form and substance no difference can be sufficient to sever the relationship between our book and other apocalypses. Lücke was the first fully to establish the relationship. Zahn (*Einleitung in d. NT*, ii. 1899) is the last—one is tempted to say, will be the last—real scholar to deny it. He may at least teach us to be on our guard against false inferences from this undeniable literary relationship.

(b) *Unlikeness of Rev. and Jewish apocalypses.*—Rev. is a Christian apocalypse. What and how great unlikenesses does this involve? Two general

considerations would lead us in opposite directions with reference to this question. The Christian religion as the Baptist prepared the way for it, as Christ founded it, and as St. Paul preached it, was undoubtedly in essential respects a return to prophecy, not only from the law, but also from the national and sensuous hopes of Judaism. The Baptist and Jesus announced not the fall of Rome, but the fall of Jerusalem, just as Amos and Hosea announced the approaching fall of Samaria, and Micah and Jeremiah that of Jerusalem; and for the same reason, in the same way, with the same motive, the call to repentance and righteousness. Jesus was a prophet in His belief in this world as God's world, and in good as already the ruling power in it, and also in the directness and personal authority of His words, the immediateness and inwardness of His relation to God, His eye for the supernatural in spiritual and not in magical manifestations. We should certainly hope that the new Christian prophecy would be truly prophetic in character, and not apocalyptic. But, on the other hand, we know that the early Christian Church found itself fully at home in Jewish apocalypses. It was the Jews who threw away their apocalypses, Christians who preserved them almost without change, applying to the second coming of the Messiah what Jews had imagined of His first coming. How early this happened the NT and even the Gospels give evidence. We cannot, therefore, assume that the Christian apocalypse is essentially unlike the Jewish. The Christian element may be an entirely superficial one, the mere identification of the coming Messiah with Jesus, and of the redeemed with the Christian Church.

Looking at the book itself, the most obvious unlikeness to the Jewish apocalypse, after the identifications just named, is the letters to the seven Churches. To be sure, they are introduced by a highly coloured Christophany, based on Zech. and Daniel, and are given in the form of a direct communication of the exalted Christ through the Spirit. Yet they have to do with actual, concrete conditions; they praise and blame, encourage and warn, with close discrimination and intense moral earnestness, so that we feel the prophetic spirit behind the partly apocalyptic form. Their warnings are aimed, not at foreign powers, but at the Christian communities; and the judgment they predict, though not itself conditional, is nevertheless the basis of a teaching of repentance. These are not like the letters of St. Paul, but they are far less like the Epistle of Baruch to the nine and a half tribes (Apoc. Bar 78-87).*

(c) *Remaining questions as to the relation of Rev. to the apocalypses.*—Certain points remain at which the question of likeness or unlikeness between Rev. and Jewish apocalypses cannot be answered by a general view, but only, if at all, by closer study.

(1) *Pseudonymity.*—The Jewish apocalypses are all pseudonymous, and contain accounts, in direct or figurative form, of the past course of history, in the form of predictions by the assumed author.

* Who can compare the name John [11. 4. 9. 22] with Enoch or Moses, or even with Daniel, Baruch, and Ezra? The authors of those books dated themselves centuries back, veiled themselves in the sacred names of the remote past, and turned to a credulous public of their time without even pretending any personal relation to it whatever. Here, on the contrary, a man speaks to seven Churches of the province of Asia and gives them his book, who is most accurately acquainted with their present conditions; and he speaks to them under the name, John, which was borne there about A.D. 70-100 by the most conspicuous ecclesiastical personality; and this he does according to tradition about A.D. 95, so in the lifetime of the famous

John of Ephesus, or according to any conceivable hypothesis in the lifetime of the personal pupils of this John (Zahn, *Einf. ii.* p. 584 f.).

This is Zahn's chief objection to classing Rev. with the apocalypses, to the very essence of which, he says, belongs pseudonymity. 'The representation of the development of world-history under the form of an ante-dated prediction, if it is present at all in Rev., is a wholly subordinate element in it.' With this sentence Zahn makes his position insecure. A certain amount of antedated prediction, or at least of history in the form of vision, can hardly be excluded from the picture of the Roman empire in Rev 13 and 17; but pseudonymity has such visions for its most characteristic product and one of its reasons for being. Even as a subordinate element in the book, comparable to the place of chs. 11. 12 in the Apoc. of Ezra, such visions suggest the possibility of pseudonymous authorship, which in the case of a Christian apocalypse might well choose an apostolic name. Weizsäcker therefore thinks we should start from the fact 'that among all similar writings of Jewish and ancient Christian origin, we know not a single one which bears the name of its own author.' Even Hermas is hardly a unity, and professes a greater than its actual age. This does not make it impossible that John wrote under his own name. 'But a strong presupposition always remains that the general practice of this art-form is followed in this case also' (*Apostolic Age*, ii. p. 174).

The question of pseudonymity, and the connected question whether and how far Rev. contains history in the form of vision, remains open at this preliminary stage of our discussion.

(2) *Composite character.*—So also must the question of composite character be regarded as opened, and not closed, by a general comparison of Rev. with the Jewish apocalypses.

Does Rev. share this common characteristic of the apocalypse? The book has often been praised for its architectural construction, but there are various indications of seams or breaks in its structure, and neither in the historical situation which it reflects (before or after 70; soon after Nero or under Domitian) nor in the type of religious thought which it represents (Jewish or Pauline [universalistic] Christianity; primitive Jewish, or developed [Hellenistic] Christology) is unity of impression easily gained. The course of recent investigation abundantly vindicates the proposition that the question of likeness or unlikeness between Rev. and the apocalypses in the matter of unity and sources is at present an open one.

(3) *Nature of vision.*—A third uncertainty concerns the question of the nature of the visions, the narrative of which makes up the book. All apocalypses are composed largely of accounts of visions and their interpretation by angels. The question, how far this is a literary (artistic) form, and how far really ecstatic experiences were connected with their authorship, is one that should not be answered too confidently and sweepingly even with reference to the Jewish apocalypses. Zahn accepts the visions of Rev. as actual experiences literally described, while he regards the visions of other apocalypses as artistic fictions. The difference is to him that between true and false prophecy. Others, the majority, judge the vision to be everywhere, at least in this age, a literary form, and point for evidence especially to the many repetitions or imitations of OT and other traditional materials which they contain, and to the many visions which simply embody history in allegorical form, to account for which real vision is a wholly unnecessary supposition.

* Cf. the possible companion letter to the two and a half tribes in Bar 11.3 39-42.

Recent investigation, however, showing the large dependence of the visionary upon memory, does not allow us to say with confidence of the abundance of OT allusions in Rev., 'This is literary art, and not the way in which living vision in the spirit expresses itself' (Weizsäcker).

Three important questions, then, are opened by the general comparison of Rev. with Jewish apocalypses: Is it pseudonymous? Is it a literary unity, or is it composite? Are its visions actual, or a literary form? The questions converge in the effort to recover the author's personality, and the method and purpose or spirit of his work, the self-consciousness of the man. Weizsäcker, to whom the recent course of criticism is directly due, gives his answer to our questions in this summary fashion: 'The Apoc. of John was not written by the apostle. It is also not the record of a revelation or a vision which the author experienced on a day. It is, further, not the work of a homogeneous conception' (*Apostolic Age*, ii. 174).

iii. CONTENTS AND COMPOSITION OF REVELATION.—1. *Contents of the Book.*

The Book of Rev. reads briefly as follows:—An introduction, giving title, author, address, and subject (1st), is followed by the appearance of Christ to John at Patmos, and the charge to write to the seven Churches (1st-20), to each of which a letter is dictated by Christ (or His angel-spirit), in which the Church is praised or blamed with reference to past trials and heathen influences, and in view of a greater trial soon to come in connexion with the approaching coming of Christ (2. 3). The seer then sees heaven opened, and, being summoned up thither, he sees and describes the throne of God, and the twenty-four elders, seven spirits, and four living beings, who praise God the creator (4). He sees the sealed book in God's hand, and the Lamb as if slain with seven horns and seven eyes (the spirits of God) appears amid the praises of the highest angels and of all creation, as the one who alone can open the seven seals (5). He opens six seals. The first four introduce four horsemen who seem to be agents of judgment (war, famine, pestilence). The fifth reveals the prayers of martyred souls for vengeance; the sixth an earthquake, which brings destruction to nature and terror to men (6). Before the destructive powers (winds) are loosed, 12,000 from each of Israel's twelve tribes are sealed (7th-8), and John sees a countless multitude of all nations who have passed through the great tribulation, in heavenly blessedness (7th-17). The seventh seal brings silence in heaven (8th). Then 'the seven angels' appear (8th), and, after the prayers of the saints have again been offered before God (8th-9), six of the angels sound their trumpets. The first four bring forth earthquake and volcanic phenomena with destructive effect upon a third of earth, sea, rivers, and heaven (9th-12). The remaining three are to be three woes (13th). The fifth (first woe) brings demonic locust-beings from the abyss, under their king Apollyon, who torment unsealed men five months (9th-13). The sixth brings armies of cavalry from the Euphrates, destroying one-third of men (9th-13). Before this second woe is declared to be past (in 11th), the seer receives a new commission and message, a little book which he eats (10); and it is revealed to him that Jerusalem, except the temple and inner court, will be trodden by the Gentiles 42 months, and that 'the two witnesses' will prophesy during that time, and then be killed, and after 3½ days raised to heaven (11th-14). The seventh trumpet (third woe) sounds, and heavenly voices announce the establishment of the kingdom of God and Christ (11th-18). Storm and earthquake follow the opening of God's heavenly temple (11th). The seer then beholds the unavailing effort of the dragon Satan to destroy the Messiah at His birth; the dragon's fall from heaven, and his persecution of the woman who bore the child, and of her other seed (12th-17). Out of the sea comes a beast with ten horns and seven heads, whom the dragon equips with his own authority. He wars against the saints and is worshipped by all other men (13th-18). This worship is furthered and enforced by another beast out of the earth with miraculous powers, who stamps men with the number of the beast, 666 (13th-18). Over against these evil powers the Lamb is seen with the 144,000 undefiled on Mt. Zion (14th-5). Angels announce the eternal gospel of the worship of God in view of judgment to come, the fall of Babylon, the punishment of the worshippers of the beast, the blessedness of martyrs (14th-18). One like a son of man (Messiah or angel?) reaps the earth with his sickle, and another angel gathers the grapes into the winepress of God's wrath (14th-20). Seven angels, after the heavenly praises of the redeemed are heard, pour out seven bowls containing the seven last plagues, the sixth of which brings remote nations to the last war at Har-Magedon, and the seventh an earthquake which destroys cities, divides Babylon, destroys nature (15. 16). The city is then seen as a woman seated on a scarlet beast, at last wasted and destroyed by the beast and its 10 horns (17th-18). Angels utter prophetic woes over Babylon, announcing its fall because of its persecution of prophets and saints (18). After heavenly rejoicings over the city's fall, and the readiness of the Lamb's bride (19th-19), the Messiah appears as warrior and king, the two beasts are cast into the lake of fire, and their followers

destroyed (19th-21). Satan is bound, while Christ and the risen martyrs reign 1000 years. Satan is loosed, and brings remote peoples to a final war against Jerusalem. They are destroyed, and he is cast into the lake of fire (20th-10). The general resurrection and judgment follow (20th-15). The new heaven and earth, the new Jerusalem, and final blessedness in it, are described (21st-22nd). The conclusion consists of attestations and admonitions regarding the Divine authorship and sanctity of the book (22nd-21).

2. *Plan of the Book.*—(a) *Introductory.*—There are two main methods by which plan and order are discovered in the visions of 4th-22nd. The recapitulation method (from Tyconius and Augustine to recent times) finds no progress in the successive sevens (seals, trumpets, and bowls) which form the main structure of this section, but repetition under varying forms. The seals bring already the last judgment (6th-17) and the final blessedness (7th-17). Among more recent critics, however, the view prevails that the seventh in each series is developed in the new series of seven that follows. The seventh seal contains the remainder of the book, and is unfolded in seven trumpets, of which the seventh includes all that follows to the end (10th), but is unfolded in the seven bowls (Lücke, Bleek, Ewald, etc.). In this scheme ch. 7 appears as an interlude between the sixth and seventh seals, and 10-11th as a similar insertion between the sixth and seventh trumpets. The bowls are not interrupted in the same way, but before and after them are visions which give the same impression of standing outside of the writer's ruling scheme (12-14. 17-19th).

Holtzmann represents the structure of the book in the following scheme (*Comm.* p. 295):—

| 11-8 Introduction. | |
|--|--|
| 12-22 The seven Letters. | |
| 41-514 Heavenly scene of the visions. | |
| 61-17 Six seals. | 71-17 The sealed and the blessed. |
| 81-5 The coming forth of the trumpets out of the 7th seal. | |
| 86-921 Six trumpets. | 101-1114 Destiny of Jerusalem. |
| 1115-19 Seventh trumpet. | 121-145 The great visions of the three chief foes and the Messiah-kingdom. |
| 145-20 Return to the earlier connexion. | |
| 151-161 Transition to the bowls. | |
| 162-21 Seven bowls. | 171-1910 The great Babylon. |
| 1911-2015 Final catastrophes. | 211-225 The new Jerusalem. |
| 225-21 Conclusion. | |

It is to be noticed that the sections at the right contain most of the material which Weizsäcker and others regard as of earlier origin, and that of which Jewish authorship can be most plausibly affirmed. The supposition that they were inserted by the writer, and that he was not able to bring them into the sevenfold scheme which he chose, is a natural one. Holtzmann, however, says that if this was the case, these sections have at all events been assimilated to the rest in style, and connected with it by various references, so that the lines of separation do not remain sharply defined.

By the side of this we may well place in bare outline the analysis of Zahn (*Eint.* ii. 587 ff.), which, as he believes, demonstrates the unity of the book 'in spite of all lack of literary art.'

Introd. (1-9). *First Vision*, 10-322 (Letters). *Second Vision*, 41-81 (Seals), with two Episodes, (a) 71-8, (b) 73-17, before the seventh. *Third Vision*, 83-1118 (Trumpets), with two Episodes, (a) 101-11, (b) 111-14, before the seventh. *Fourth Vision*, 1119-120. *Fifth Vision*, 151-1617 (Bowls). *Sixth Vision*, 171-1824 (Judgment on Babylon), 1618-21 introduces it, and 191-8-210 concludes it and introduces the *Seventh Vision*, 1911-218 (Judgment and Awards). *Eighth Vision*, 219-225 (or 19) (a description not of the new heaven and earth of 21st, but of the world during the 1000 years' reign of Christ, 204-5). Conclusion, 225 (or 19)-21.

(b) *Plan of chs. 1-3.*—The construction of these chapters gives the greatest evidence of conscious and careful literary art, and no doubt may fairly predispose the reader to look for art throughout. The introductory verses (1¹⁻⁸) contain a remarkably complete statement of the source, character, and contents of the entire book, and prepare us to recognize such summary, anticipatory introductions elsewhere. The ultimate author of the revelation is God, who gave it to Christ, who sent an angel to signify it to John. It can therefore be called 'the word of God,' 'the testimony of Jesus,' or 'the things which John saw.' Its contents are 'the things which must happen quickly'; that is, it is a prediction, but of the immediate not the remote future. Its readers are God's servants, who are blessed if they hear and keep what is written. More expressly 'the seven Churches in Asia' are addressed, and in saluting them the author completely sums up his theology. It is in some sense trinitarian (vv. 4-5), and the kingly exaltation of Christ through resurrection, the saving effect of His death, and the destination He made possible for believers, are described. The central message of the book, the coming of Christ, and that in its judicial aspect, is expressly announced, perhaps by God, who, at all events, as the real author of the revelation, adds in the first person His attestation. It is not, indeed, impossible to divide this introduction into independent parts (1-3. 4-6. 7. 8), and suppose them to have introduced separate apocalypses (cf. Spitta, Briggs). But it can hardly be denied that the whole is admirably adapted to introduce the book.

The vision of Christ (1²⁻²⁰) brings before us the priestly and kingly One, who lives amid His Churches and possesses or rules them. The letters are introduced by descriptions of Christ which are in most cases borrowed from the vision, and close with promises 'to him that overcometh,' which in most cases anticipate the fuller descriptions of chs. 19-22. The selection of descriptive features from the vision of Christ in several cases fits the special message of the letter; and this is sometimes, but not so often and clearly, the case with the selection of the reward. (1) The description, 2¹ (from 1^{12a}, 1^{12b}), is referred to in 2². The reward, 2^{7b} (cf. 2²²), has no obvious relation to the letter. (2) The description, 2⁸ (from 1^{17b}, 1^{18a}), fits both the message, 2^{10b}, and the reward, 2^{11b} (cf. 2¹⁰). (3) The description, 2¹² (from 1^{16b}), is referred to in 2¹⁶. The reward, 2^{17b} (only in part, if at all, parallel to 2²², cf. 1¹⁹), may possibly stand in contrast to the eating of things sacrificed to idols (2¹⁴). (4) The description, 2¹⁸ (from 1^{14b}, 1^{16a}, but 'Son of God' is here only), prepares for 2²². The reward, 2²⁶⁻²⁸ (in part parallel to 2¹⁰, cf. 1²⁵ 1¹⁹ 2^{21b}), could relate to the letter if Jezebel's teaching included submission to Rome. (5) The description, 3¹ (from 1¹⁶, cf. 2¹ 1¹⁴), has no special relation to the letter. The reward, 3⁵ (cf. 6^{11a} 7^{10b}, 13 17⁵ 20¹², 15 21⁷, Mt 10³²), is connected with v. 4 and perhaps v. 1. (6) The description, 3⁷ (not from the vision, cf. 1s 22²² [cf. 1¹⁸]), is used in v. 8. The reward, 3¹² (cf. 14^{1b} 22¹ 21² 10 19¹², 16), has no obvious connexion with the letter (Bousset compares v. 1^{12a} with v. 7^b). (7) The description, 3¹⁴ (not from the vision, cf. 1⁵, Col 1^{15a}, Jn 1⁵), may prepare for the severity of the letter (cf. v. 19). The reward, 3²¹ (cf. 20⁴⁻⁶ 1⁶ 2²⁶, 5¹⁰ 22²⁰), connects with v. 30 (cf. Lk 22²⁸, 30).

That the writer is working as an artist is evident, and a reason may have determined his choice of titles and promises where it is no longer evident. The last title is perhaps the highest, and the last reward also represents a climax. The first reward suggests Eden; the second, the Fall; the third, the Wilderness; the fourth, the Kingdom; but though the intention to represent the fulfilment of

successive stages of OT history is wholly conceivable, the evidence for it is not convincing.* No evident reason for the changed position of the sentence, 'He that hath an ear,' etc., in the last four letters, is manifest. Of the historical conditions described in the letters something will be said further on. But, in spite of unmistakable references to local conditions, each letter is a message of the spirit to 'the Churches.' They were not sent separately or meant to be read separately, but have each a representative and all together a complete character, which the number seven itself suggests.

Chs. 1-3 show not only a conscious artistic purpose, but in more details than can here be noted and still more in total effect they show a high order of poetic instinct and skill.

(c) *Plan of chs. 4-22.*—The choice of three series of sevens in the representation of the coming woes and judgment shows the same mind that addressed the Churches as seven. To assign these sevens to different sources (Spitta, Briggs), is to miss one of the most evident marks of unity in the book. It is more likely, e.g., that the author made seven seals out of an original four (see below) than that he found his sevens ready made. But what is to be said of the two twofold interludes inserted between the sixth and seventh seals and trumpets (7¹⁻⁸, 9-17 10. 11¹⁻¹³)?

The first two of these visions not only interrupt the plan, but are apparently inharmonious with each other. In one (7¹⁻⁸) a definite number of Jews are sealed before the coming of evil, in order to be kept from it; in the other (7⁹⁻¹⁷) a countless number from all nations have already come through trials and death to heavenly blessedness. The first could well be of Jewish origin (based on Ezk 9^{4a}), and describe the literal safe-keeping of Jews in the troubles of the last days. Did our writer believe that Jews would play a distinct rôle in the end? This is possible (cf. St. Paul in Ro 9-11), but it is more probable that he adopts a Jewish apocalyptic fragment applying it to the Christian community, and understanding it not in a literal sense. This would account for the fact that the four winds (7¹) are never loosed. We have not a whole but a part (9¹⁴ is related, but different). We have indeed an allusion to the sealing (9⁴, cf. 14¹) as if to prevent our supposing the section a later insertion. But there the sealed can only be all true Christians, as in 14¹⁻⁵ the 144,000 are. If Rev 7¹⁻⁸ applies a Jewish oracle to the Christian community, the deliverance it assumes may well be no more literal than the rest, and its meaning in the author's intention may be wholly like the meaning of 7⁹⁻¹⁷. Not deliverance from death, but deliverance through death, is, in fact, the promise of the book. These two visions, then, contrasted as they are, and of different origin, may have meant the same thing to the author. They are assurances of escape and salvation, inserted here, after the beginning of evils but before their culmination, to serve the practical purpose of encouragement. The second one seems to describe by anticipation nothing less than the final heavenly blessedness, for no such host had as yet passed through trial (martyrdom?) to heaven, and 6⁹⁻¹¹ seems to prevent the supposition that those who had already died were in possession of their final glory.

Our inference in regard to ch. 7 is, then, that the writer introduces foreign (in part Jewish) fragments into his book, apparently interrupting his plan, but not without a purpose. He is writing even more to encourage true Christians than to

* Trench (*Epistles to the Seven Churches*, N.Y. 1882, p. 287 f.), who proceeds with a new series, thus: fifth, individual's lot at the Day of Judgment; sixth, in companionship with the redeemed; seventh, in communion with God.

warn apostates, and so will not let assurance and promise wait until its proper place, when judgment has run its course, but will anticipate deliverance, setting light over against dark in his picture, though dark must predominate.

Turning to the second pair of insertions, we notice that ch. 10 seems to describe nothing less than a new beginning of the prophet's activity, a new commission and inspiration. It seems meant to explain the new and strange nature of the oracles that follow. Perhaps 10²⁻⁴ may serve to explain the writer's departure from the plan of developing the seventh of one series of judgments in the form of a new series of seven. Instead of the seven thunders which he heard, he is charged to write the contents of the little book of prophecies over many peoples. Yet this apparent change of plan is not a real break in the order, since it is still affirmed that the seventh angel's trumpet will bring the end (10⁷).

The second section, 11¹⁻¹³, is still preliminary, as 11¹⁴ (cf. 9¹²) clearly indicates. Its strange character is evident. Yet it may well have been meant to serve the same purpose as 7¹⁻¹⁷, and indeed it falls into two similar parts. 11¹⁻³, like 7¹⁻⁸, assures Christians, the true worshippers in the true temple of God, that they will escape from the evils of the last days. Undoubtedly in their origin these verses referred to the real temple and to Jewish worshippers. This must have been a Jewish oracle uttered some time before A.D. 70. But our author can have used it only as a figure, precisely like the sealing of the 144,000. Its unprepared and fragmentary character are explicable if it was to the writer symbol, not reality. Not otherwise must we judge 11¹⁻¹³. In our writer's plan it must mean that those who do not in the outward sense escape the evil, but because of their testimony and work against the power of evil suffer and die, will nevertheless rise in glory and be avenged upon their enemies (not unlike 7⁹⁻¹⁷). Of course this does not explain the origin of the section. It is full of unexplained allusions, and is clearly part of a larger whole. Its Jewish origin is unmistakable. Bousset regards it as a part of the apocalyptic tradition of Antichrist. It suggests an elaboration of the expectation of the return of Elijah for a work of protest and reform (Mal 4³⁻⁶, Mt 17¹⁷ 11¹⁴), and the similar hope of the return of Moses based on Dt 18¹⁵⁻¹⁸ (Mt 17³). But since our writer introduces it, not as an incident in the direct development of the drama, but in an interlude and for its general message of encouragement in faithful testimony unto death, it is natural to raise the question whether he took the details literally, and expected the two prophets and especially the conversion of the majority of the Jewish people after a partial judgment upon them (v. 13). How, indeed, could a Christian, in view of the prediction of Christ, even before A.D. 70, have taken literally either the expectation that the temple would be exempt from desecration by the heathen, or that only a tenth of the city would fall? Still less possible would the literal sense of the oracle be after 70. It is true that a Christian hand has touched the narrative (v. 3 end), but it is not probable that the resurrection of the two witnesses is shaped after that of Christ (v. 11). In its strongly Jewish character, its evident date (before 70), much earlier than the book as a whole, its unprepared insertion, apparently only for its general thought of faithful testimony, martyrdom, and heavenly reward, the section is very instructive regarding the literary manner of the author (see below, iii. 3).

The seventh trumpet must be the third woe (11¹⁴), and it must bring the consummation (10⁷). Its contents cannot therefore be given in 11¹⁵⁻¹⁸,

but must include the rest of the book. The third woe cannot be less than the last conflict with the powers of evil and their overthrow, which forms the theme of chs. 12-20 (see 12¹²). In 11¹⁵⁻¹⁸ we have, therefore, an anticipation in a heavenly chorus of the consummation which is not yet fully come (as in 15²⁻⁴ 19¹⁻⁷); a superscription for chs. 12-20.

The general plan of chs. 11¹⁵⁻²² is clear. After an introductory anticipation of the kingdom of God and the wrath and destruction that must precede its coming (11¹⁵⁻¹⁸), Satan, the real power of evil, is introduced, and his present peculiar aggressiveness is explained in such a way as to make it a ground of special hope, not of discouragement. He has been cast down from heaven, and knows that his time on earth is short (ch. 12). The chief agents of Satan in his persecution of Christians—Rome, the empire and the religion—are then introduced (ch. 13). Before judgment against the evil powers begins, the author, according to his custom, inserts various anticipatory passages: a vision of the blessedness of the saints with Christ (vv. 1²⁻³); a review of the entire teaching of the book (vv. 4¹⁻¹³); its gospel, the sole worship of God in view of judgment to come; its prediction, the fall of Rome, and the eternal punishment of those who yield to Roman life and cultus; the supreme Christian duty, patience, endurance in Christian life and faith, and the promises of heavenly blessedness for martyrs; then a general vision of judgment in two acts, the reaping of grain and the gathering of grapes (vv. 14¹⁻²⁰). The seven bowls are introduced as finishing the wrath of God (15¹, cf. 'it is done,' *γέγονεν*, 16¹⁷). They lead up to the destruction of Rome. But for this great event the writer has larger resources of description at his command. The vision of the woman seated on the dragon shows that it is her own evil demon that will turn against the city, and with its ten horns, which are ten kings, destroy her (ch. 17). Her fall will fulfil the language of prophecy against Babylon and Tyre (ch. 18). It will be finally effected—the end having been once more anticipated in heavenly praises (19¹⁻¹⁰)—at Christ's coming and by Him (19¹¹⁻²¹). Then, the beasts having been destroyed, Satan's own judgment must come, a preliminary binding and a final destruction (ch. 20). Then at last the consummation so often anticipated will be an actuality (21-22²).

Although the writer connects ch. 17 and 21² with one of the angels of the bowls, yet it must be evident that we are not to judge this section (12-22²) as consisting of the seven bowls (developing the seventh trumpet), and some introductory and concluding sections; for the prelude and postlude would in this case far overbalance the piece itself both in length and in interest and power. On the other hand, the theme of 12-22² being the fall of Rome, the present Satanic power, and with it the deliverance and blessedness of faithful Christians, it is clear that chs. 12, 13 and 17-22² form the solid framework of the structure. Ch. 19 brings the beasts of ch. 13 to judgment; ch. 20 brings the Satan of ch. 12 to an end; 21-22² brings to actuality the anticipation of 11¹⁵⁻¹⁷. To set aside the passages put in the right-hand column in Holtzmann's scheme for the sake of carrying out the plan of developing the seventh of each series by a new series of seven, would sacrifice the most important parts of the section, in which order and movement are most evident. We must conclude that the writer, in the second half of his book, renounced that plan as not adequate for his material, as ch. 10 may have been meant to suggest. The seven bowls, in fact, form the least original and impressive part of this section, being de-

pendent on the seven trumpets and inferior to them in effectiveness (see below). The seven bowls do not furnish the plan of this section. But we may fairly ask whether we are to give to the sevens quite such significance in the earlier part of the book as is commonly done. If both the seventh seal and the seventh trumpet include all that follows in the book (as also the seventh bowl is simply more fully described in chs. 17-19), then we should not divide by sevens, since this would cut off the announcement of the seventh from its development. The seventh should open, not end, a new section, and the separation of the seventh from the sixth by passages of vital importance (not mere interludes in character) seems to indicate this intention on the part of the writer. Chs. 7 and 10 seem most evidently to mark transitions.

Some such outline as this may therefore with reserve be suggested—

I. Preliminary judgments (4-9).

1. Visions of the actors (4-6).—

a. God (4); b. Christ (5); c. Destructive powers (6).

2. Promises of deliverance out of coming evils (7).

3. The judgments (one-third, without producing repentance, 8, 9).

II. Final judgments (10-22).

1. The prophet's new commission (10).

2. Vision of deliverance for true worshippers of God, and esp. for martyrs (11-14).

3. Prelude, summarizing the action (11-19).

4. Visions of the actors (12, 13 (14-15)).—

a. Satan (12); b. Roman empire and emperor-worship (13); c. The Lamb and His followers (14-15).

5. Promises and warnings (14 (or 14-20)).

6. The judgments (15-20).—

a. Upon the earth, leading up to the fall of the city, Rome (15, 16, 17-18²⁴ (19¹⁻¹⁰?)); b. Upon the demon-beasts of the Roman empire and religion and their followers (19¹⁻²¹); c. Upon Satan and all that belongs to him (20).

7. The new world and city (21¹⁻⁸ 21⁹⁻²² 22³⁻²¹).

Titles or superscriptions quite frequently summarize the contents of following visions: 1¹⁻³ sums up the whole book, 3² is a title, and 6²⁻⁵ an anticipation of the effect of the trumpets (6²⁻⁵), and the bowls are similarly introduced (15¹⁻⁴). 11¹⁻¹⁸ is a summary title of chs. 12-22; 18²⁻³ summarizes 18⁴⁻²⁴; 19¹⁻¹⁰ summarizes 19¹¹⁻²²; 21¹⁻⁸ summarizes 21⁹⁻²² (21¹⁻² = 2²¹, 3, 4 = 22, 22⁵, 5-8 = 22⁶⁻²¹).

Yet though we find evidence of a general order in the book which the artistic structure of chs. 1-3 prepares us to look for, we must take account of various departures from any strict order, if we would understand the spirit of the writer. Though the interruption of the sevens by chs. 7 and 10-11¹³ is not due to a want of plan, yet here and in various anticipatory voices, visions, and comments (e.g. 11¹⁴⁻¹⁸ 14¹⁻⁵ 15²⁻⁴ 19¹⁻¹⁰ 12¹) we find evidences of the practical impulse to encourage and admonish, rather than artistic reflexion. In the failure to observe strict chronological sequence the book is indeed only like Daniel and other apocalypses. There is here as in Daniel a progress towards greater concreteness and detail. In 6¹²⁻¹⁷ the final day of God's wrath seems already come. It is described again in 14¹⁴⁻²⁰. The fall of Rome is announced in 14⁸ as if accomplished; more fully described in 16¹⁷⁻²¹; still predicted in 17¹⁶; announced in 18², predicted still in 18²⁴. Again the letters seem to assume that though trials have been endured, martyrdom is almost wholly future (2¹³); but in 5⁹⁻¹¹ many souls of martyrs are seen, and 7^{9⁷} implies a multitude, as 20⁴⁻⁶ also does.

(d) *Experiences of the seer.*—We have already met with evidence that the author used some ancient materials for their general thought, and not in a literal sense. Before passing to a more detailed study of his use of material, it is important to ask whether he gives a consistent picture of his own experiences.

* It is evident that 17¹ and 21⁹ are meant to mark the beginnings of parallel sections, and it is possible that the likewise parallel 19¹⁰ and 22⁹ are meant to mark their close.

(1) *The position and movements of the seer.*—

He is on earth in 1¹⁰; in 4¹ he is summoned up into heaven, where he may be conceived as remaining through ch. 9 (cf. 6⁹ 8^{1, 2} etc.), though earth is not out of his sight (6^{12²} 7¹ etc.). That he is literally in heaven is clearly implied in 5⁶ 7^{13²}. But in 10¹, without a break ('and I saw'), he appears to be on earth (so 10^{4, 8}). Earth appears to be the scene of the action in 11¹⁻¹³, but in 11¹³ voices in heaven are heard, and in v. 19 the temple in heaven is seen to be open. In 12 the seer seems to be in heaven (?), but in 13 and probably in 14¹⁻¹³ he is on earth. If we read *ἐν τῇ πόλει* in 12¹⁸ (13¹), we have a definite reference to the seer's position, comparable to 1⁹. But the judgment scene 14¹⁴⁻²⁰ suggests heaven. Again chs. 15, 16 give a heavenly scene. In 17³ an angel carries John away in the spirit into a wilderness to see the woman (Rome), and in 21¹⁰ to a mountain to see Jerusalem descending out of heaven. 18¹⁻⁴ indicate that the seer is on earth. In 19¹⁻¹⁰ he seems to be in heaven, but in v. 11 on earth again (for he sees heaven open, as in 4¹); so also in 20¹ 21², and probably in 21^{10²}.

There is so little law in these movements, and so little care to make the connexion clear, that one might infer that our writer leaves such references as they stood in his different sources; but this would mean that the vision was to him a form, not a reality.

(2) *The heavenly scenes.*—

The scenery in heaven is not clearly described. Ch. 4 pictures a throne of God, with 24 elders on thrones around it, seven lamps before it which are the seven spirits of God, before it a glassy sea, and, in the midst of it and around it, four living creatures. Here in the midst of the throne stood the Lamb (ch. 5), whose seven eyes are the seven spirits of God, of which the seven lamps were already a symbol. About the throne and the elders and living beings are myriads of angels (5¹¹ 7¹¹). Here also are the multitudes who have come out of great tribulation (7¹³⁻¹⁷). Of them, however, it is said not only that they are before the throne of God, but that they serve Him in His temple. 3¹² has prepared us for the conception of a temple in heaven, and in 6² we have suddenly been made aware of 'the altar,' beneath which are the souls of martyrs. Now the trumpets are sounded by 'the seven angels which stand before God,' 8² (cf. 14⁶). These did not appear in the scene just drawn, unless they are the same as 'the seven spirits,' as 1⁴ might indicate. The altar is mentioned again, and, perhaps in distinction from it, 'the golden altar which is before the throne,' the altar of incense (8²⁻³). From the horns of this 'golden altar which is before God' comes the voice which directs the angel of the sixth trumpet (9^{13²}). The seventh trumpet reveals the original scene (the throne and elders and living beings, 11¹⁵⁻¹⁸); but then we read, 'there was opened the temple of God that is in heaven,' and in it the ark of His covenant was seen (11¹⁹). After this the 24 elders appear only in 14¹⁻⁵ and 19¹⁻⁸, two somewhat similar passages, though 15²⁻⁴ may have the same setting (cf. 4⁹). One of the four living creatures is mentioned in 15¹ in connexion with the temple; but more often the temple scenery stands by itself. Out of the temple comes the angel who summons the reaper (14¹⁸) and the angel who is to gather the grapes (14¹⁷), whom another angel from the altar directs (14¹⁸). Out of the temple come the seven angels, having the seven last plagues, and the temple is filled with smoke from the glory of God, so that it could not be entered, although open (15⁸). A great voice from the temple commands them (16¹); 'the altar' affirms the justice of the judgment (16⁷), and the final, 'It is done,' comes 'out of the temple and from the throne,' uniting the two (16¹⁷).

It is not easy to unite in one picture the conception of God as sitting on a throne surrounded by His court, and of His dwelling, in heaven as on earth, in the temple's holiest place, from which His voice or messengers issue forth. Since the scenery of the throne is that of the seals, and the temple scenery that of the bowls, it is natural to think of this unharmonized element as due to sources. The author has mixed the scenes somewhat (15⁷ could be an insertion, as the angels came out of the temple already having seven plagues, vv. 1-6); but he does not harmonize them, or paint a heaven that can be imagined. The new Jerusalem must also have been in heaven (3¹² 21²), though the seer beholds it only as it descends to earth (21^{11⁶}). The description of the new heaven and earth resolves itself into the description of a city, and in this there is no temple (21²²), but the throne remains the final seat of God (20^{4, 11} 21⁵ 22³). If the writer had wished to paint a clear, consistent picture, he could easily have done so. The inference that he took his descriptions as they were, and valued them as poetical not literal accounts, is surely a natural one.

(3) *Form of inspiration.*—The same freedom and disregard of formal consistency is evident in the representation of the way in which the seer received his revelations. There is no set way, no fixed medium.

The first verses seem explicit, yet leave us uncertain whether we are to conceive of the writer as receiving Christ's revelation through angel (1¹) or by vision ('all the things that he saw,' 1², cf. 1¹⁰). The letters are given by Christ in the first person. Yet they are introduced by a description of Christ in the third person, and the expression 'hear what the spirit saith to the Churches' suggests that the letters are dictated to John by an angel-spirit in the name of Christ. The voice which John hears at first (1^{10c}) must be the voice of Christ Himself (cf. 1^{14c}). The same voice summons John into the open heaven (4¹). He is there 'in the spirit' (4², as in 1¹⁰). But it does not appear to be Christ Himself who shows him what is to come. Christ appears as an actor in the drama of the future, not as the seer's interpreter. Not till 10¹⁵ is His voice heard again, and then not till 22⁷ (?). In 17¹ one of the seven angels of the bowls summons John and carries him away in the spirit into a wilderness to see the judgment upon Rome. This is the sort of angel guidance that ¹ would lead us to expect, but which we look for thus far in vain. This angel fulfils his function as interpreter (17¹⁸); but then we hear another angel announcing Babylon's fall (18¹⁻³); another voice from heaven pronouncing the prophetic denunciation over her (18⁴⁻²⁰); and still another angel predicting the fall by deed and word (18²¹⁻²⁴). Then are heard various voices from heaven (19¹⁻⁸); and only then, in 19¹⁰ ('and he says to me'), does the original angel-guide speak again. He then rejects John's impulse to worship him (cf. *Asc. Isaiah* 721 84 5) with the words, 'I am a fellow-servant of thee and thy brothers who have the testimony of Jesus; worship God: for the testimony of Jesus is the spirit of prophecy' (19¹¹). The last clause is often struck out as a gloss by critics (Bousset, Hilgenfeld, etc.), but this is venturesome. 'The spirit of prophecy' should mean the spirit from God which inspires the prophet; that is, in this case, the angel himself (cf. 22⁹). So he would say, 'I am only one of you who have the testimony of Jesus; indeed this testimony constitutes my very being.' The angel-spirit of prophecy is simply the personified testimony of Jesus, the word of Jesus Himself. As a messenger this angel is on an equality with John, because his message is wholly and simply the message of Christ. There follow visions of the first and of the final judgments (19¹¹⁻²⁰), and an introductory (summary) vision of the consummation (21¹⁻⁸), in which are heard the words of God Himself (vv. 3-8); and then 'one of the seven angels who had the seven bowls' (not the same one as before?) carried John in the spirit to a mountain to see the new Jerusalem. It is this angel who measured the city and showed John the details of the vision (21¹⁵⁻¹⁷ 22¹), so that when 22⁶ begins 'and he said to me,' it can be only the angel that speaks (one of the 'spirits of the prophets'); but in v. 7 his words become Christ's words, 'behold, I come quickly.' No wonder John would again worship him, but again he classes himself with the prophets. As a person he is only a revealer, a voice; but his words are those of Christ. So when he speaks again (22^{10c}) his words again become Christ's words (vv. 12-17). Now it is to be observed that the seven angels of the bowls (ch. 15), two (?) of whom are the imparters of these last prophecies of the book, naturally lead us back to 'the seven angels which stand before God,' to whom the trumpets are given (8²), and these again to the seven lamps burning before the throne, which are the seven spirits of God (4⁵), from whom (1⁴), as from God and Christ, John's message comes. When now Christ is described as 'he that hath the seven spirits of God' (3¹), and is pictured as the Lamb with seven eyes 'which are the seven spirits of God sent forth into all the earth' (5⁶), we have certainly significant indications of what the writer meant by calling his book an 'apocalypse of Jesus Christ,' and of his idea of the inspiration of a Christian prophet. Angels, however realistically described, are hardly more than a means of expressing the fact that the writer was somehow conscious of having a message from Christ for the Churches. Any further interpretation of his consciousness must be deferred until we have studied the sources and relationships of his materials.

Any set and consistent form of representing his experiences, however, the author seems purposely to avoid. Apart from 17¹⁸, 21^{10c}, we have no indication of a special interpreting angel, taking the part of Gabriel in the Bk. of Daniel. The speakers in the book are very many. The underlying faith in the kingship of God and of Christ, and its ultimate triumph, are expressed in heavenly choruses, led by the twenty-four elders and the four cherubim, but joined in by multitudes of angels and of glorified men (48-11 59-14 79-12 111-18 121-12 142 3 152-4 191-7 8). One of the elders instructs John in 5⁵ and 7¹³⁻¹⁷. Often it is simply 'a voice from heaven' that he hears (10⁴ 8 14¹³ 18⁴ 21³, cf. 10¹⁷), or from the horns of the altar (9^{13c}), or from the altar itself (16⁷). He records words of God, 1⁹ 7⁷ 21⁵⁻⁸ 16¹⁷ (?); of Christ, 11¹, 12, 20 2, 3, 16¹⁵ 22⁷, 12^c; of the spirit, 14¹³ 22¹⁷. There are beatitudes uttered by Christ (16¹⁵ 22⁷, 14), by a voice from heaven (14¹³), by the angel-guide (19⁹), by John (1³). Sometimes he seems to interrupt the story of what he had seen with a direct word of his own to the reader (2^{7a} etc. 13⁹, 10 13¹³ 14¹², cf. 17⁹). Among the other voices that are heard are those of the souls of martyrs (6¹⁰): of various angels undefined (7¹⁴ 8 9 15 18 19¹⁷ etc.); of 'the angel of the waters' (16^{6c}); an eagle (8¹³); the rod (? 11¹). At the beginning and at the end the book is declared to be from Christ Himself, His testimony (11 2 22¹⁶). The part which the

angels perform might almost be regarded as pictorial, since the writer reduces the significance of these beings, who are the uniform actors and speakers in the Jewish apocalypses, to that of messengers of Christ. He is the primary and final actor in the book (opens the seals, ch. 5¹, and executes the judgment, 19^{11c}), and He is the real speaker.

Here also, as in the case of the place and movements of the seer and the heavenly scenery, a variety of sources might explain the diversity of the representation, but we must also suppose the author to be relatively indifferent to formal consistency. He must, one is forced to think, have taken the external language of apocalypses in a figurative or poetic way. The only other hypothesis would seem to be that of composite origin (as held by Völter, Spitta, etc.); but the effort to bring consistency out of the book by analysis and the reconstruction of sources out of which it was gradually and unskilfully put together, fails to do justice to the unity of style and even of plan which the book has been found to exhibit. Moreover, this effort has been made by many able men, and according to the prevailing opinion of scholars, has failed.

In order, however, to test the possibility of a free, more or less poetic, use of traditional apocalyptic material, we must examine our author's use of tradition at various points more closely.

3. *Sources.*—(a) *Old Testament.*—Although Rev. contains no direct citations from the OT, it is full of OT language from the beginning to the end. An impression of its dependence on OT phraseology may be gained from the text of Westcott and Hort, or from that of Nestle, in which such allusions or reminiscences are printed in a distinct type. In the corresponding list of references in WH's Appendix, pp. 184-188, out of the total number of 404 verses in the book about 265 verses contain OT language, and about 550 references are made to OT passages.* The material is still more fully gathered by Hühn (*Die alttest. Citate und Reminiscenzen im NT*, 1900).

Nothing is more important for the understanding of our author's mental and literary processes than a close study of his use of OT language.

The bearing of such study upon the interpretation of our book can here only be suggested by illustrations. One of the simplest cases is the prophetic denunciation of the fall of Babylon (Rome) in ch. 18. It is composed almost wholly of material taken from the prophetic woes over Babylon (Is 13. 14, Jer 50. 51), Tyre (Is 23, Ezk 26-28), and, in a slight degree, Edom (Is 34). Even the admonition that might seem to have direct reference to the historical situation, 'Come forth, my people, out of her,' etc. (18⁴), is directly borrowed from prophetic utterances (Jer 51⁶, 2, 25 50⁸, Is 48²⁰ 52¹¹), and has there rather than here its historical explanation. Yet the chapter does not make the impression of being a laborious piece of patchwork. It has a unity of its own and a high degree of impressiveness, and seems to be the work of one whose mind is filled with the language of prophecy, and who draws abundantly, and of course consciously, from his storehouse, and yet writes with freedom and from a strong inner impulse of his own, and elaborates with his own conceptions the themes which the prophetic words contain. So he makes out of the old a product in a real sense new, a poetical whole. But what shall we say of his putting this product into the

* The allusions agree in part with the Heb., in part with the LXX. WH mark 33 references as distinctly from Heb. (and Chald.), 15 as from LXX; 5 are marked Heb. and LXX, viz. 4 references to Ex 19¹⁶ (48 88 11¹⁹ 16¹⁵) and one to Zec 3¹⁰ (129). Schürer (3 iii. 323) cites 920 108 137 204 as citations from Daniel, which follow Theodotion more closely than LXX. See Bludau, 'Die Apokalypse und Theodotion's Daniel-Übersetzung,' in *Theol. Quartalschrift*, 1897, pp. 1-26. Salmon (*Introd. to the NT*, p. 602 f.) argues that the citations in Rev. show a nearer relationship to Theod. than to LXX, referring to 920 108 127 137 196 204 11; on the other side, 114 19¹⁶. Cf. Swete, *Introd.* p. 48 f.

mouth of angels? It is easier to attribute such a literary composition to a poet than to a voice from heaven. Even the action of the angel in 18²¹ rests on the symbolic act of Jeremiah (51^{63, 64}). And if our writer says that he hears and sees these things, must we not judge the nature of his vision by its contents? A literal voice from heaven this certainly cannot be, and we seem shut up to two possibilities regarding it: either the angels and the voice from heaven belong wholly to the poetry of the piece, its literary form, or they express the writer's own interpretation of the strong impulse, as if from without, under which he wrote.

Another instructive illustration of the author's use of the OT is to be found in his description of the new Jerusalem, 21¹⁻²². This is largely taken from the anticipations of the prophets of the Exile, Ezekiel and Deutero-Isaiah, with reference to the return and the rebuilding of Jerusalem. Features are added from other sources. Here, as in ch. 18, the impression is not that of mere clipping and piecing, but rather that of the work of a mind full of the Messianic language of the prophets, writing out of a genuine and deep religious and poetic emotion, with a dependence on the OT which is free, not slavish, and yet with very little real inventiveness. Yet this also is shown to the seer by an angel, who seems to be in general the speaker (see 21¹⁵ ὁ ἄγγελος, 22⁶); and an action of his is described 21¹⁵⁻¹⁷ which is taken from Ezekiel (40³⁶). In this case, more clearly than in ch. 18, we may suspect a certain limitation of the author's imagination by his sources, which is not inconsistent with a large measure of freedom in the use of them. He has mastered the OT material of this sort, and can use it effectively, but cannot go much beyond it. How otherwise can we explain the emphatically Jewish picture of a future which was certainly to this writer universal in scope; the presence still of thoroughly earthly features in a consummation which must surely, in the writer's view, be heavenly; the appearance still of nations and kings and their wealth after heaven and earth have passed away? He has little but the old familiar national and earthly language at command for the description of that which heaven contains for Christian hope. He can describe the Christian heaven only in Jewish language. But though bound in language he is not bound in thought. He knows no more impressive and expressive language (nor do we); but the language is poetry to him, it is figurative, not literal, chosen for its poetic worth and emotional effect, which belonged to it, indeed, partly because it was old and familiar. It must of course be recognized that the most powerful imagination comes quickly to an end if it attempts to leave the earth in its descriptions of heaven. Religious faith and hope cannot do better than take the language which the greater souls have created, which generations have shaped, which age has hallowed, and use it not for its literal but for its emotional and poetic worth, to symbolize and suggest inexpressible realities.

Jewish literature furnishes other similar collections of OT Messianic imagery (To 13, etc.); and the possibility that some earlier (Jewish) mind had already shaped the material in 21¹⁻²², and that our author, in 21¹⁻⁸, introduces and summarizes this section, and adds his own concluding sentences (22⁶⁻²¹), is to be considered.

A still more striking illustration of our author's dependence on OT language, yet his freedom in the use of it, both in combination and in application, is his description of Christ in 1¹²⁻²⁰. Almost all of it is taken from Daniel, but it unites in a most surprising way features from the descriptions of the one like a son of man, and of the Ancient of Days, in Dn 7, with still more from the angel

(Gabriel) in Dn 10. The seven golden candlesticks and the seven stars are without parallel in Daniel. Something can be said, however, as to their source and use. The former was of course a familiar OT symbol (Ex 25³⁷ 37²³) which Zech. (4²) uses in an unearthly sense, explaining that the seven lamps are the seven eyes of J^h, which run to and fro through the whole earth (4^{10b} following v.^{6a}). He sees by the candlestick two olive-trees (4³), and evidently interprets their two branches as signifying Zerubbabel and Joshua, so that the two trees are the Davidic and the Aaronic houses. These two men, Zech. would say, have the eyes of the Lord upon them in favour and blessing. But this is a free application by the prophet to the historical present and to his practical purpose of a symbol which originally, no doubt, pictured the seven planets and the way in which their light was constantly replenished by the oil from ever-growing trees. It was a mythological symbol (Gunkel, *Schöpfung*, pp. 122-131), which Zech. used as poetry, not interpreting all of the symbol (4^{2b}), and perhaps adding a feature for the sake of the interpretation (4¹²). Now in Rev 1²⁰ the writer chooses to identify the seven lamps with the seven churches among which Christ is and moves. But in 4^{5b} he sees seven lamps burning before the throne of God, which are, he explains, the seven spirits of God, affirmed in 1^{4b} to be before God's throne (cf. 8³); and even in the letters (3¹) Christ is described as the one who has the seven spirits of God and the seven stars, so that this interpretation of the lamps was in his mind by the side of the other. When, still further, we read that the Lamb has 'seven eyes, which are the seven spirits of God sent forth into all the earth' (5⁶), with evident allusion to Zec 4^{10b}, we are able to realize how far from a slavish literalness and formal consistency our author's use of OT figures is. Finally, Zech.'s figure reappears in 11⁴, where the two witnesses are declared to be 'the two olive-trees and the two candlesticks [what two?] standing before the Lord of the earth,' a free identification for a purpose, similar in kind to that of Zech. himself, this time certainly made not by our author, but by some source.

Our writer cares much for OT prophetic language, and cannot easily add much to it, but he applies it freely to new uses. Note esp. that we have in Rev. no such anxious effort to interpret an OT prediction, assuming the necessity of its literal fulfilment, as Dn 9 contains. The relation of 11⁴ to Zec 4, and of 20⁶ to Ezk 38 f., is wholly different.

Other illustrations could readily be given,—such as the relation of ch. 4 to Is 6 and Ezk 1,—but enough has been presented to justify the following presuppositions with reference to passages in our book which contain imagery not derived from the OT—(1) that such imagery, if it is at all elaborate, is not the author's free invention, but is borrowed from some literary or oral prophetic traditions; (2) that the writer does not feel bound to leave it as it is, but is free to combine and interpret it to suit his own purpose, so that the interpreter must distinguish sharply between the present use of the symbols and their original use. If this distinction is necessary in 21-22⁶ and 19-20, it will be no less necessary in 11¹⁻¹³ 12, 13, etc.

(b) *Jewish apocalyptic traditions*.—The line that separates uncanonical from OT material in Rev. is not a sharp one. It would indeed be natural that Jewish apocalyptic traditions should consist largely of expositions and elaborations of OT material. The picture of the throne of God (ch. 4) is unquestionably based upon that of Ezk 1, 10 and Is 6 (cf. also the probably older passages, Ex 24¹⁰, 1 K 22¹⁹). The four living creatures, cherubim, are taken directly from Ezekiel, and, in spite
